MICHELGESTEL, or MICHIELGESTEL, a market-town of Holland, in the prov. of N. Brabant, cant. and 5 m. SSE of Bois-le-Duc, on the Dommel. Pop. 2,673.

MICHELSBERG, a mountain of Bavaria, in the circle of Lower Franconia, W of Munnerstadt.

MICHELSBERG, or MICHAELSBERG, a town of Austria, in Bohemia, in the circle and 30 m. WNW of Pilsen, on the l. bank of the Wunschelbach. Pop. 898. It has manufactories of linen, and several distilleries. In its vicinity is a mine of argentiferous lead.

MICHELSDORF, or STRAZSA, a town of Hungary, in the comitat of Zips, 8 m. SW of Kasmarkt. Pop. 720. It has manufactories of linen fabrics.

MICHELSTADT, a town of the grand-duchy of Hesse-Darmstadt, and prov. of Starkenburg, bail. and 1 m. N of Erbach, and 27 m. SE of Darmstadt, on the r. bank of the Mumling. Pop. 3,004. It has a Gothic church, in which are the tombs of the counts of Erbach, and an orphans' asylum; and possesses manufactories of cloth, leather, iron utensils, &c.

MICHERY, a commune of France, in the dep. of the Yonne, cant. and 2 m. NE of Pont-sur-Yonne. Pop. 1,064.

MICHIGAN, a federal state of the United States of North America; bounded on the N by Lake Superior; on the E by Lake Huron, the St. Clair river and lake, Detroit river, and Lake Erie, all of which separate it from the British possessions; on the S by the states of Ohio and Indiana; and on the W by Lake Michigan and the Menomonee and Montreal rivers. It is composed of two large peninsular portions, lying between the parallels of 41° 48′ and 47° 30′ N, and the meridians of 82° 20′ and 90° 10′ W; and is 344 m. in length, and 300 m. broad; with an area, according to some authorities, of 60,042 sq. m., or 38,426,294 acres; but according to others, of only 56,243 sq. m., of which about 10,000,000 acres are yet unsurveyed.

Physical features.] The surface of the lower or southern peninsula, between Lakes Huron and Michigan, is generally level, having few elevations which may be termed hills. The interior is gently undulating, rising gradually from the lakes to the centre of the peninsula, and mostly covered with fine forests of timber interspersed with 'oak openings,' plains, and beautiful prairies. Along the E shore of Lake Michigan are sand-hills, thrown by the winds into innumerable fantastic forms, sometimes covered with stunted trees and scanty vegetation, but most generally bare. On the shore of Lake Huron are some high sand-cliffs. The point formed by Lake Huron and Saginaw-bay is generally low and swampy. The forest-trees are the same as in Ohio, with the addition of white and yellow pine; fruit-trees produce abundantly. The soil is well adapted to wheat, rye, oats, barley, flax, hemp, Indian corn, buckwheat, &c. All kinds of garden vegetables, and the various species of grasses, thrive well. The southern peninsula, between Lake Michigan and Lake Superior, is drained by several large rivers, and numerous smaller streams, which rise near the centre, and pass off in an E and W direction, with the exception of the Cheyboygan, and three or four smaller streams which flow in a N direction. The larger streams are navigable for boats and canoes nearly to their sources. Raisin and Huron rivers flow into Lake Erie; Rouge into the Detroit strait; Clinton, St. Clair, and Black river, into the lake and strait of St. Clair; Saginaw river, formed by the junction of the Tittibawassee, Hare, Shiawassee, Flint, and Cass rivers, falls into Saginaw-bay. Thunder-bay river and Cheyboygan flow into the N part of Lake Huron. The St. Joseph, Kalamazoo, Grand, and Maskego rivers, and several smaller streams, flow in a W direction into Lake Michigan. Many parts abound with small clear lakes, from which are taken quantities of fish of various kinds. The N peninsula, between Lakes Michigan and Superior, occupies about 12,000,000 of acres. Mountains and lakes, plains, rivers, and forests, spread over this section with a boldness of outline which may be said to constitute almost a peculiar type in North American geography. This division embraces the mineral district of M. The N shores of Lake Michigan and of Lake Huron, as far as Point Detour, are exclusively limestone where rock is at all visible, and this rock is characterized by the usual indications of gypsum and saline springs. The sugar maple is interspersed throughout the tract, being separated by the sand-plains, the mountain masses, and tracts of spruce lands. The beech tree is found as far N as Point Iroquois at the outlet of Lake Superior. The rock-maple and red oak are found at intervals throughout the NW; both species are seen at the sources of the Mississippi, but the beech has not been observed N of the locality mentioned, nor the white oak N of the straits of Mackinac. The interior abounds in minor lakes, and enjoys a singular advantage of intercommunication by its streams and portages. Taking the whole extent of the territory of the Menomonee river, following the curves of the coast to the NW limits of the state at the mouth of the Moniaw or Montreal river of Lake Superior, it affords not less than 720 m. of coast-navigation; and embraces in this distance several large bays and excellent harbours. About 40 large and 60 small streams discharge their waters into the three lakes constituting portions of the boundary.—The mineral region of this district, in the neighbourhood of Lake Superior, is rich in copper of the finest quality, which is frequently found in its native state. The extreme length of this region is about 135 m., and it has a width varying from 1 to 6 m. In some of the river beds large boulders of native copper are met with. The growing importance of the extraordinary productiveness of the copper district of Lake Superior is causing increased interest, not only in America, but in the European states. The mineral region which surrounds its E shore is unsurpassed in the world in quantity and value. The following are returns from the North-West company's mines. In 1849 there was paid for land, mining labour, supplies, stores, tools, &c., 37,964 dollars; and the sales of copper produced 5,008 d., the rough copper shipped being 44,196 lbs. In 1850 the expenses were 47,600 d., and produce, 32,271 d.; copper shipped, 270,853 lbs.; in 1851, including steam-engine, machinery, and improvements, 62,915 d.; produce, 50,862 d.; copper shipped, 442,285 lbs. The expenses in future will be but for labour and materials, and next year it is expected to ship 1,000.000 lbs. of copper. The company hold 4,320 acres of land, and a charter from the state of M. A ship-canal is spoken of to connect Lake Superior with the other lakes and the Atlantic, and by the Illinois canal and Mississippi with the gulf of Mexico.

Climate, &c.] The climate of M. is much modified by the waters, which on three sides form its boundaries; and though naturally situated in the regions of intense cold, the state is rendered pleasant and agreeable in temperature and weather. The range of the therm. approximates to that observed on the seacoast, and the atmosphere is moist and equable at all seasons of the year.—The grains and fruits of Europe grow luxuriantly in the rich alluvial deposits; grazing and sheep-farming are highly favoured by the mildness of the climate, the housing of cattle

being seldom required, even in the dead of winter. In the northern peninsula the seasons are more marked, and the extremes of temp. greater; but even there no material obstruction to profitable husbandry is experienced. Spring is somewhat wet and backward; the winter, dry and cold.—No state in the union is more bountifully supplied with wild animals, game, fish, and aquatic fowl. The beaver frequents the rivers, and in the forests bears, wolves, elk, deer, and foxes abound. The trout of Michilimackinac are large and well-flavoured, and are plentiful at all seasons. White fish are taken in large quantities in the river Detroit and in Lake St. Clair, as well as at the falls of St. Mary's. Sturgeon are abundant in the lakes, which also contain pike, pickerel, &c.—From a statement recently made to the legislature of M., it appears that during the year 1849 the number of flour-mills amounted to 228; run of stone, 567; barrels of flour made, 719,478; number of hands employed 598; capital invested, 1,496,400 d. A comparative table of certain statistical returns made for the state in 1840, compared with similar returns of assessors made in 1849, shows the following result:

	1840.	1849.
Wheat raised, bush.	2,157,108	4,739,300
All other grains,	4,666,720	8,179,767
Wool, lbs.	153,375	1,645,756
Maple sugar made,	1,329,784	1,774,369
Horses, No.	30,444	52,305
Neat cattle,	185,190	210,268
Swine,	295,890	152,341
Sheep,	99,618	610,563
Saw-mills,	491	730
Flouring and grist-mills,	190	228
Barrels of flour made,	202,860	719,478
Men employed in saw and flouring-mills,	1,114	2,557

Manufactures and commerce.] The manufactures of M. are as yet on a limited scale, and are confined to the fabrication of articles of immediate necessity. The whole capital invested in this branch of industry amounted in 1840 to 3,112,240 d. Leather, soap, and candles, and spirits, seem to be the staple articles. The value of home-made or family goods was set down at 113,955 d. M. is finely situated for commerce, being almost surrounded by waters which are now connected with the Hudson by the Erie canal, and with the western rivers by the Michigan and Illinois canal, just completed. Little direct foreign commerce, however, belongs to this state. The total value of exports to foreign ports for the year ending 30th June, 1846, was 251,890 d., and of imports 154,928 d. The total exports from M. in 1846 amounted to the value of 4,647,608 d. These were exported from the following ports, in the subjoined values:—From Detroit, 2,495,335 d.; from Monroe, 800,241 d.; from St. Joseph's, 601,555 d.; and from minor ports, 750,475 d. The articles exported were —flour, 748,533 barrels, valued at 2,555,221 d.; wheat, 650,889 bushels; corn, 16,345 bushels; and some oats, barley, and potatoes; pork, beef, and other salt provisions, 23,289 barrels; whisky, 4,063 barrels; fish, 9,305 barrels; wool, 594,567 lbs.; leather, 100,354 lbs.; and the following articles—green and dry hides, 11,810 d.; pearl and pot ashes, 139,075 d.; lumber, 638,580 d.; shingles, 110,225 d.; staves, 20,530 d.; furs and peltries, 300,000 d.; and straw hats, 10,000 d. The principal works of internal improvement are the Central railway, from Detroit to New Buffalo via Kalamazoo and Niles, and the Southern railroad, from Monroe to Hillsdale. There is also a railroad from Toledo, Ohio, to Adrian, where it connects with the southern road; and from Detroit lines extend N and NW to Shelby and Pontiac. Other lines are contemplated; but it is probable that for some time to come the expense in completing the two great roads will absorb all the available capital of the state, and suspend the progress of minor operations.

Population.] The pop. at several decennial periods, and its progressive increase, was as folows:

Year.	Pop.	Decennial increase. — numerical.	— per cent.
1810	4,762		
1820	8,896	4,134	83·6
1830	31,639	722,43	255·5
1840	212,269	180,628	571·7
1850	402,041	188,772	88·9

Already two respectable colleges are established and receive the support of the state. In 1840, there were 12 academies and grammar-schools with 485 students, and 975 primary and common schools, with 29,701 scholars. Since that period, however, the state has almost doubled its pop., and, as a consequence, there can be no doubt that the means of education have been extended in a like ratio. The Baptists, Presbyterians, and Methodists, are numerous. The Protestant Episcopalians have a bishop and 27 clergymen, and the Catholics have several congregations.

Government, &c.] The government is based on the constitution of 1835. Every white male adult citizen may vote and is eligible for office. The representatives, in number not to exceed 100 nor be less than 48, are chosen annually; the senators, half of whom are chosen annually, serve for two years. The governor and lieutenant-governor must have been citizens of the United States five years, and residents of the state two years, and are chosen by a plurality of votes for two years. The judges of the supreme court are appointed by the governor and senate for seven years; other judges are elected by the people for four years. Any judge may be removed on address of both houses. The constitution provides for a superintendent of public instruction, —for a system of public schools,—and for a permanent school-fund and a school library in every district, to be supported by military and penal fines. Slavery is prohibited. The total receipts into the treasury in 1846 and balance of 1845, amounted to 196,675 d.; and the expenditures in 1846 were 165,125 d. The public debt of the state on the 1st January 1847 was 3,154,560 d.; and on 1st December 1850, 2,529,872 d.; for the payment of which the resources of the state are ample, although this state was one of the eleven states of the union which in 1848 repudiated its debts. The value of taxable property in the state in 1846 was 29,424,865 d.

Lansing, the cap., is situated in the middle of the state, and is as yet but a wilderness.—Detroit, the former capital, and the largest and most flourishing town in M., stands on the W shore of the river of the same name.—Monroe on Lake Erie, and St. Joseph's on Lake Michigan, are the other principal ports. Adrian, Saline, Jacksonburg, Marshall, Kalamazoo, and Niles, are also rising towns—all on the line of the Central or Southern railroads. The northern parts of the state are but thinly settled.

History.] The first permanent settlement in this state was made at Detroit by the French, in 1670; but at the peace of Paris, 1763, the country was ceded to the British, and at the close of the revolutionary war transferred to the United States. In 1805 the country was erected by Congress into a separate territorial government. During the war with England, M. fell into the hands of the enemy, but was retaken in the following year. In 1836 it was admitted into the union as a state.

MICHIGAN (Lake), one of the great lakes of North America, formerly called Lake Illinois, or Lake Dauphin. It extends from the western angle of Lake Huron, in a southerly direction, and is separated from Lake Superior by a tongue of land about 30 leagues in length. Its elevation above sea-level is 578 ft. It lies wholly within the territory of the United States, between the parallels of 42° and 46°.

Its length from N to S is 220 m., by a mean breadth of 70 m. Its circumf. is 945 m.; and its area is estimated at 22,000 sq. m., being inferior in extent to Lake Superior by about 10,000 sq. m. Its waters have in some places a depth of 1,000 ft. At its S extremity is Chicago creek, by which, in the rainy season, the head-waters of the Illinois communicate with the lake; but the bar at the mouth of the creek does not admit boats drawing above 2 ft. water. A number of streams flow into the lake; and it abounds, like the others, with excellent fish.—Mr. Asa Whitney proposes to construct a railway from the W shore of Lake Michigan to Puget-sound, or some other point on the coast of Oregon, a course 2,030 m. long, lying wholly through uncultivated and uninhabited lands, and in great part many thousand feet above the level of the sea. Mr. Whitney maintains that a complete junction of the Atlantic and Pacific oceans at Panama—as for instance by the volcanic disruption of the entire isthmus—would confer no appreciable advantage on the commerce of the old or the new world. His argument is that the sailing distance from England to India or China is greater via Panama than via the Cape of Good Hope; and that, therefore, the commerce of the West with the East would gain nothing by the supposed change. On the other hand, considering America as a continent interposed between Europe and Asia, he shows that his proposed route is nearly a straight line between Liverpool and Puget-sound, and that Puget-sound is the most favourable point on the Pacific shore for commanding sailing communication with the commercial countries of Asia. The fundamental theory of the projector is that, as pop. with all its attendant blessings follows road-making, the construction of a road through the desert immediately imparts value to lands which were otherwise valueless; therefore he proposes to make the railway pay for its own construction. Mr. Whitney demands that the federal government of America should grant him a belt of land, 60 m. wide, along the entire length of his proposed line, at 10 cents. per acre; and out of the difference between this small price and what the same land will be worth when a railway intersects it, he undertakes to defray the expenses of construction, and to remunerate himself. He proposes to make the line by sections of 10 m.; and, as each section is completed, to sell the adjoining land to the emigrants, who, he reasonably supposes, would flock to the new scene of settlement and labour. At the end, the railway is to become in point of fact national property, nominally vested in its own constructor, but with a proviso that the tolls are not to exceed the charges of working and keeping it in repair. Both in England and America, the press and public opinion support him, and 21 state legislatures of his own country have declared in his favour. If compelled by circumstances to abandon his first idea, it is said that Mr. Whitney will apply for permission to carry out his scheme on a parallel line within the British frontier, where he considers it to be equally feasible.

MICHILIMACKINAC, or Mackinac, a country in the N part of the state of Michigan, U. S., comprising an area of 13,464 sq. m. It possesses considerable diversity both of surface and of soil. On the N it is separated from Huron co. by a strait of the same name, which connects Lakes Michigan and Huron. This strait is 40 m. long, and in its narrowest part 4 m. wide; and contains several islands, the principal of which are Mackinac, Bois Blanc, and Drummond.—Mackinac (pronounced Mackinaw) island is about 4½ miles in length, and is almost entirely surrounded by rocks rising in peaks 150 ft. in height. The most elevated point of the island has an alt. of 300 ft. above the surface of the lake. It produces wheat, oats, barley, pease, and beans. On its SE coast is a village of the same name; and rising above it, on a rocky eminence 150 ft. in height, is fort Mackinac. The harbour is safe and commodious, and has a considerable trade in fish, skins, and fur. Pop. in 1840, 923. The island of M. was first colonised in 1764. In 1796 it was surrendered to the American government. In 1812 it was taken by the British, but was restored to America by the treaty of Ghent.

MICHILIMACKINAC (Little), or Mackinac, a river of the state of Illinois, U. S., which has its source in a prairie near the centre of M'Lean co.; traverses Tazewell co., and enters the Illinois river, on the l. bank, 15 m. below the lake of that name, and after a course partly navigable of 150 m.

MICHIPICOTON, a bay of the E part of Lake Superior, in Upper Canada. It is about 30 m. wide at the entrance, and nearly equal in depth; and receives two rivers, one of which bears the same name. Its banks on the N and SE rise to a considerable height. On its SE side is fort Michipicoton.

MICHIPICOTON, or Maurepas, an island of Lake Superior, in Upper Canada, at the entrance to Michipicoton bay, and about 6 m. from the continent. It is 18 m. from E to W, and 12 m. from N to S.

MICHKIN, a district and town of Russia in Europe, in the W part of the gov. of Yaroslav. The dist. is sandy, but generally fertile, producing grain, timber, and pasturage. Pop. 70,000.—The town is 63 m. W of Yaroslav, on the l. bank of the Volga. Pop. 1,000. It has a church.

MICHL (Gross), or Nagy-Mihaly, a town of Hungary, in the comitat of Zemplin, 33 m. E of Kaschau, and 39 m. SE of Eperies, on the r. bank of the Hernath. Pop. 1,600. It has 3 churches.

MICHNI, a walled town of Northern India, about 15 m. from Peshawur, on the Momund frontier, about 3 m. N of the l. bank of the Cabul, where that river debouches into the plain. It is inhabited principally by Momunds.

MICHOACAN. See Mechoacan.

MICHOURIN, a town of Russia in Europe, in the gov. of Yekâtérinoslav, district and 24 m. NW of Verkhnednieprovsk, on the r. bank of the Dnieper.

MICHOWITZ, or Michowice, a town of Bohemia, in the circle and 14 m. WSW of Kaurzim. Pop. 400. It has a considerable trade in wood and charcoal.

MICKFIELD, a parish in Suffolk, 3 m. SW of Debenham. Area 1,790 acres. Pop. 263.

MICKLEHAM, a parish in Surrey, 2 m. SSE of Leatherhead. Area 2,910 acres. Pop. 787.

MICKLEOVER, a parish of Derbyshire, 3 m. WSW of Derby. Area 5,330 acres. Pop. 1,673.

MICKLETON, a parish of Gloucestershire, 3 m. NNE of Chipping-Camden. Area 3,600 acres. Pop. 698.—Also a township in the p. of Ronaldkirk, in Yorkshire, 7 m. NW of Barnard-Castle. Pop. 513.

MICKLEY, a chapelry in the p. of Ovingham, in Northumberland, 10 m. ESE of Hexham. Pop. 297.

MICMACS, a tribe of Indians in New Brunswick, speaking a dialect of the Iroquois. Like the Melicetes, they are of a copper colour, with coarse black hair, hazel eyes, high cheek bones, and erect carriage.

MICOCO. See Anzico.

MICUIPAMPA, a town of Peru, in the dep. of Livertad, 36 m. NNW of Caxamarca, and 105 m. N of Truxillo, in the Andes, at the base of the mountain of Gualgayock, and at an alt. of 11,610 ft. above sea-level. It is one of the most elevated towns in the New World. Extensive silver-mines exist in its vicinity.

MIDAI, a town of Burmah, in the Mrauma, 5 m.

N of Ummerapura. It is one of the principal commercial entrepots between Burmah and China.

MIDDELBOURG, a department and commune of Belgium, in the prov. of East Flanders, arrond. and 20 m. NW of Ghent. Pop. 793. It has a brewery and a brick-work.

MIDDELFART, a town and port of Denmark, in the stift and on the NW coast of the island of Fuhnen, bail. and 27 m. WNW of Odensee, on the Little Belt. Pop. 1,600. It has an hospital, and possesses manufactories of cloth and distilleries of brandy.

MIDDELHARNIS, a village of Holland, in the S part of the prov. of Holland and island of Overflakkee, 14 m. S of Brielle, and about a mile E of Sommelsdyke.

MIDDELKERKE, a commune and village of Belgium, in the prov. of West Flanders, and arrond. of Furnes, 3½ m. SSW of Ostend. Pop. 714. The Submarine telegraph company have laid down an electric-telegraph wire cable between Dover and this v., which forms a central point of communication with the general system of continental telegraphs.

MIDDELSTUM, a village of Holland, in the prov. and 11 m. NNE of Groningen. Pop. 1,160.

MIDDELWYK, a commune of Belgium, in the prov. of East Flanders, and dep. of Peteghem. Pop. 984.

MIDDLE, a parish of Salop, 7 m. NNW of Shrewsbury. Area 5,880 acres. Pop. in 1831, 1,205; in 1841, 1,330.

MIDDLE, an island of the Indian ocean, in the Mergui archipelago, in N lat. 9° 5′, and E long. 97° 45′.—Also an island in the China sea, to the E of the Malay peninsula, in N lat. 3°, and E long. 105° 2′.

MIDDLE, a township of Cape May co., in the state of New Jersey, U. S., bounded on the E by the Atlantic, and on the W by Delaware bay. It has a level and marshy surface, and is watered by Goshen, Dyer's, Green and Fishing creeks. Pop. in 1840, 1,624.

MIDDLE, an island near the S coast of Australia, in S lat. 34° 5′, and E long. 123° 7′. It contains a salt lake.

MIDDLE (Mount), a summit of South Australia, between the W side of Spencer's gulf and Middleback mountain.

MIDDLEBACK, a mountain of South Australia, to the W of Spencer's gulf, in S lat. 33° 11′ 25″, and E long. 137° 9′. It is enclosed on the E by a crescent-shaped ridge, and is visible at a distance of 14 leagues.

MIDDLEBIE, a parish of Dumfries-shire, to the NE of Annan. Area 12,600 Scottish acres. Pop. in 1831, 2,107; in 1841, 2,150.

MIDDLEBOROUGH, a township of Plymouth co., in the state of Massachusetts, U. S., 40 m. S by E of Boston. It is 15 m. in length, and 9 m. in breadth, and is one of the largest townships in the state. It contains several large ponds which are feeders of Taunton river. Pop. in 1840, 5,085.

MIDDLEBOURNE, a village of Tyler co., in the state of Virginia, U. S., 307 m. NW of Richmond, on the E side of Middle Island creek.

MIDDLEBURG, a town of Holland, capital of the prov. of Zeeland, 4 m. NE of Flushing, 33 m. N of Ghent, and 84 m. SW of Amsterdam, in the centre of the island of Walcheren which lies between the mouths of the Schelde, and on a wide canal, 5 m. in length, and communicating, on the NE, with the North sea. This canal was cut in 1817, to supply the want of the ancient port of M., which had become entirely choked up. Pop. in 1844, 16,000. The town is nearly circular in form, and is both large and handsome. It was formerly strongly fortified, and is still enclosed by bastioned ramparts and a ditch. The streets are regularly laid out, and some of them are spacious and handsome. The canals, of which there are several, are crossed by drawbridges. The town-house, which stands in the Grand place, is of Gothic architecture, and surmounted with a high tower. The front is adorned with 25 statues of the ancient counts and countesses of Zeeland. The Place Ronde is lined with alleys of trees, and contains the abbey church and the office of the Admiralty. It has also an ancient cathedral, in which are several fine tombs, arsenals, a museum and library, an athenæum, a school of design, a classical school, and several other public buildings. It possesses manufactories of starch and madder, several powder-mills, a cannon foundery, several glass-works, saw-mills, salt-refineries, several silk and paper mills, &c. The trade is now much decayed, but it still exports considerable quantities of corn, salt, madder, and flax. Its imports are chiefly French wines and brandy. The environs are marshy, and the locality extremely unhealthy. M. was originally a small village, but having been gradually enlarged by the lords of Borssele, was enclosed by walls in 1132. In 1561 a bishopric was founded in it by Paul IV., which however lasted only 13 years. In 1574 it was taken from the Spaniards by the confederates, after a siege of 22 months. In 1795 it was ceded by the Dutch to France, when it was first comprised in the dep. of the Schelde, and afterwards became capital of the dep. of the Bouches-de-l'Escaut. It was taken in 1809 by the English, but was evacuated by them the same year.

MIDDLEBURG, a township of Shoharie co., in the state of New York, U. S., 37 m. W of Albany. It has a hilly surface, watered by Catskill creek, and by a stream which flows into Shoharie kill. Pop. 3,843. The village is on the E side of Shoharie creek, and contains about 300 inhabitants.—Also a township of Cuyahoga co., in the state of Ohio, watered by the E branch of Rocky river, by Baldwin's river, and by the outlet of Lake Abraham. Pop. 399.—Also a village of Hardiman co., in the state of Tennessee, 169 m. SW by W of Nashville.—Also a village of Zane township, Logan co., in the state of Ohio, between two head-streams of Big Darby creek. Pop. 300.—Also a township of Addison co., in the state of Vermont, 33 m. SSE of Burlington, and 59 m. SW of Montpelier. It has a hilly surface, and is watered by Otter creek. The soil consists of clay loam. Pop. in 1840, 3,162. The village is on the creek. It is well but irregularly built, and is the seat of Middleburg college.—Also a township of New Haven co., in the state of Connecticut, 52 m. WSW of Hartford. The surface is hilly, and is watered by branches of Nangatuck river, and by the outlet of Quassepaug pond. The soil consists of coarse gravelly loam. Pop. 761.—Also a township of Wyoming co., in the state of New York, 247 m. W of Albany. It has an undulating surface, drained by Allen's creek, and by a tributary Tonawanda creek. The soil consists of sand and clay loam. Pop. 2,445.—Also a township of Tioga co., in the state of Pennsylvania. Pop. 725.—Also a village of Talmadge township, Summit co., in the state of Ohio, 125 m. NE of Columbus, on both sides of Cuyahoga river.—Also a fertile and well-settled township of Knox co., in the same state. Pop. 1,004.

MIDDLE CREEK, a township of Union co., in the state of Pennsylvania, U. S. Pop. in 1840, 562.

MIDDLEFIELD, a township in Hampshire co., in the state of Massachusetts, U. S., 124 m. W of Boston. Pop. 1,717.—Also a township in Otsego co., in New York, 64 m. W of Albany, skirted on the W by Otsego lake. Pop. 3,319.

MIDDLEFORK, a township in Macon co., in the

state of Missouri, U. S., 92 m. N by W of Jefferson. Pop. 535.

MIDDLE GRANVILLE, a village in Washington co., in New York, U. S., 65 m. NNE of Albany.

MIDDLE-GROUND, a sand-bank in the Atlantic, to the E of Nova Scotia, and N of Sable island bank, in N lat. 44° 30′, and W long. 60° 20′.

MIDDLEHAM, a parish and market-town in the N. R. of Yorkshire, 9 m. S by W of Richmond, and 41 m. NW of York. Area of p. 2,400 acres. Pop. in 1801, 728; in 1831, 914; in 1841, 930. The town occupies a gentle acclivity on the banks of the Ure, and is built in the form of a square, with the market-house in the centre. The woollen manufacture is carried on here to some extent. A moor about a ½ m. SW of the town, is celebrated as a training-ground for hunting and race-horses.

MIDDLEHAM-BISHOPS, a parish and township in the co.-palatine of Durham, 8 m. S by E of Durham, and about 2 m. E of the Great North of England railway. The parish includes the townships of M., Cornforth, Garmondsway-moor, Mainsforth, and Thrislington. Area 5,940 acres. Pop. in 1831, 837: in 1841, 1,434.

MIDDLEKIRK. See MIDDELKERKE.

MIDDLE-MEAD, a hamlet in the p. of Little-Baddow, Essex, 4 m. NE of Chelmsford, on the N bank of the Chelmer. Pop. in 1831, 182.

MIDDLE-PAXTON, a township of Paxton co., in the state of Pennsylvania, U. S., 9 m. NE of Harrisburg. It has a mountainous surface, drained by Fishing, Stony, and Clark's creeks, and a gravelly soil, and contains anthracite coal. Pop. in 1840, 1,560.

MIDDLE-QUARTER, a township in the p. of Kirk-Linton, Cumberland, 5 m. ESE of Longtown. Pop. in 1831, 520; in 1841, 536.—Also a township in the p. of Kirkby-Ireleth, Lancashire, 5½ m. NW of Ulverstone. Pop. in 1831, 654; in 1841, 834.

MIDDLESBOROUGH, a parish, town, and port, in the N. R. of Yorkshire, on the S side of the river Tees, 3½ m. NE by E of Stockton-upon-Tees, intersected by the Stockton and Darlington railway. Area of p. 2,300 acres. Pop. in 1801, 239; in 1831, 383; in 1841, 5,423; in 1851, 7,431. The immediate cause of the extraordinary increase of this town, the site of which in 1829 was marked by a solitary farm-house, was the construction of a branch from the Stockton and Darlington railway to M. At the close of 1830 the railway was opened to M., and the first ship was loaded at its coal-staiths; and the shipment of coals has continued increasing ever since. Immediately prior to this some enterprising parties, conceiving the project of creating a new town, formed themselves into a partnership for that purpose, under the firm of 'the Middlesborough owners,' and purchased about 600 acres of land, which they laid out for building. On the land thus acquired, a town has been built in a regular form, having a large square in the centre, and streets diverging from it at right angles to each other. Among the manufactories may be noticed a pottery company, an engine and foundry company, 3 ironworks, rolling-mills, and an extensive rope and sail-cloth manufactory with steam-power looms. A large and commodious dock has been constructed, comprising an area of 9 acres of water-surface, and entered by a channel rather more than a ¼ m. in length from the middle channel of the Tees. The entrance-lock is 132 ft. long, and 30 ft. wide; and has a depth of water on the sill of 15 ft. at neap tides, and 19 ft. at spring tides. In 1831, the Clarence railway was extended to Samphire Batts, on the opposite side of the Tees, for the shipment there of the mineral riches of the Auckland and other districts of the co. of Durham. In 1837, British schools had been established in M. In 1841, a market and improvement act, conferring powers of paving, lighting, watching, cleansing, improving, and taxing, received the royal assent. Under this act the rate-payers were clothed with the privilege of electing from among themselves annually representative commissioners, to carry out its provisions; and those provisions being of a comprehensive character, and including powers of sewerage and drainage, and the removal of nuisances, M. is in this respect in advance of older towns. In 1842,—the original coal-staiths for shipping coal in the river having been found insufficient,—the docks were opened. The drops which skirt these docks are connected with the main line of railway by 10 threefold branches, laid upon a triangular platform, 15 acres in extent, and having standing room for 3,000 loaded waggons, or upwards of 9,000 tons of coal! The shipments of coals in the Tees have increased with astonishing rapidity since the opening of the Stockton and Darlington railway, and its extension to M. In 1844, 22,644 chaldrons, and 21,170 in 1845, were shipped at Stockton, and 137,885 chaldrons in 1844, and 195,726 in 1845, at M. From the latter place 70,000 chaldrons of Brancepeth coke are supplied by one establishment alone to railway companies and iron-founders in the three kingdoms, and to the mint at Bombay. A line of railway from the Stockton and Darlington railway at M. to Guisborough, with branches to the Cleveland hills, has been projected, which will add to the traffic of the town an immense iron-stone trade.

MIDDLESCEUGH AND BRATHWAITE, hamlets in the p. of St. Mary, Cumberland, 10 m. SE of Carlisle. Pop. in 1831, 195; in 1841, 181.

MIDDLESEX, the metropolitan county of England; bounded on the N by Hertfordshire; on the E by Essex, from which it is divided by the river Lea; on the S by Surrey, from which it is divided by the river Thames; and on the W by Buckinghamshire, from which it is divided by the river Colne. Its form is very irregular, stretching from the Lea, near Waltham abbey, on the NE, to the Thames, opposite Chertsey, on the SW, an extreme length of 28 m.; and from near Rickmansworth, on the NW, in a line SE to the Thames, an extreme breadth of about 17 m. Reduced to a parallelogram of equal superficies, the length would be about 20 m., by 14 m. in breadth. The square area, according to Middleton, is 280 m., or 179,200 acres; according to the parl. returns, 179,590 acres. Except Rutland, this is the smallest of the English cos. It is divided into the 6 hundreds of Edmonton, Ossulston, Gore, Isleworth, Elthorne, and Spelthorne. The hundred of Isleworth, however, lies to the westward of Gore hundred, part of Ossulston lying due S of Gore. These hundreds are subdivided, according to Middleton, into 208 parishes, whereof 108 are within the city of London, and 10 in the city and liberties of Westminster. With the exception of the metropolis itself, there is throughout this co. no great town or centre of population, though it contains the 4 market-towns of Brentford, Barnet, Staines, and Uxbridge; besides Edgeware, Enfield, and Hounslow, once market-towns; and is interspersed with numerous large villages, all of which may be considered as suburban to the metropolis, to which the whole co., indeed, forms as it were but a small demesne, filled with splendid mansions, comfortable seats, and elegant villas, and laid out in gardens, pastures, and enclosures of all sorts, for its convenience and support.

General aspect.] This district presents a gently waving surface devoid of hills, the heights, except upon the northern borders, not being sufficiently elevated to merit the name of hills. The principal elevations are those of Highwood, Hendon, Harrow, Barret, Hampstead, Highgate, and Brockley: the three last,

the highest in the co., are not more than 400 ft. above sea-level.—The Thames, the Colne, and the Lea, though they do not properly belong to this co., form its boundaries during part of their course; and four branches of the Colne pass through various parts of the district. The Thames and the Lea are of importance to the co. in so far as they promote its natural and artificial navigation. The ocean-tides flow through the Thames for about 23 m. along the border of this co.; and the river is navigable throughout its whole course of 43 m. along this border. With it are connected inland navigations by river and canal, which promote communication with all the principal inland districts, and with the waters of the Severn, the Mersey, and the Ouse. The Lea rises in Bedfordshire, passes through Hertfordshire, touches this co. near Waltham abbey, and runs S between it and Essex in several channels. The principal river fairly intersecting the co. is the Brent, which rises in Hertfordshire, and enters M. near Finchley, whence it flows SW by Kingsbury and Twyford to Greenford, and then S, in a tortuous course, by Hanwell to Brentford near which it joins the Thames. The New river, an artificial cut, though not properly a canal, designed to supply the metropolis with water, after running a course of nearly 12 m. from its source, near Ware in Hertfordshire, enters this co. at Bull-cross; and, in a very winding route of more than 26 m., passes by Enfield and Islington to the reservoirs whence the metropolis is supplied. The small river Cran takes its rise near Harrow, and running in a circuitous course by Cranford, crosses Hounslow-heath, and enters the Thames at Isleworth.

Soil, &c.] M. possesses but little variety of strata, even to the greatest depth of wells. Blue clay, or, as it is called, London clay, is most prevalent. It is commonly an excellent brick-earth to the depth of many feet beneath the surface, but a large portion of the regular strata in M. is covered with alluvial gravel. A surface of perfect sand, clean gravel, or pure clay, is not now perhaps to be found in any part of the co. The land, though in general not naturally fertile, has been converted, especially throughout the whole tract bordering on the Thames, into luxuriant gardens, fertile corn-fields, and verdant lawns and pastures. Towards the N, however, and even in the vicinity of the metropolis, there are still several extensive tracts of waste and unenclosed heath,—such are Hampstead, Finchley, and others. The N part of this co. was anciently a vast forest, connected with those of Epping and Waltham on the E, and Windsor forest on the W.

Climate.] The temp. of the atmosphere, except perhaps so far as the influence of the London fires extends, is nearly the same through the whole co. In general it is healthy, owing to the greater part of the soil being naturally dry; but undoubtedly the fires and furnaces of London have a sensible effect on the climate in its vicinity, by drying and warming the air, which, thus rarefied by heat, constantly passes upwards, and makes way for a fresh supply to come in from every side. The more stationary winds are from the SW and the NE. Those from the SW are supposed to blow nearly 6-12ths of the year: those from the NE about 5-12ths. The greatest falls of rain generally come from the S, or from a point or two W of S.

Manufactures, &c.] The trade and manufactures of the co. are principally centred in the metropolis. See article LONDON.

Canals, roads, and railways.] The Grand Junction canal enters this co from Herts, near Harefield, and running S in the valley of the Colne to West Drayton, turns E, crosses the Cran to the Brent, and following the line of that river, and in general coincident with its channel, runs to the Thames near Brentford. It is united with the Regent's canal by the Paddington canal, a branch leaving it near Cranford.—The Regent's canal, from its junction with the Paddington, runs along the W, N, and E sides of the metropolis, a length of 8½ m., till it joins the Thames near Limehouse. In its course it is provided with 12 locks, besides a tide-lock at the Thames, the fall being in all 90 ft.—The Lea navigation is partly artificial, as already remarked. A short cut, called the Kensington canal, runs in a curved direction, from a basin at Kensington to the Thames. Another, named the Grosvenor canal, runs from a basin at Westminster to the Thames. There is also a short cut, besides the dock-excavations, across the Isle of Dogs.—A large portion of the soil of this co. is occupied by the numerous roads which radiate from the metropolis as a common centre to all parts of the kingdom.—This important co., together with Surrey, is also the grand centre of railway concentration and radiation to the whole empire. The principal lines of railway centred in M. are the Great Western, the North-Western, the North-Eastern, and the South-Eastern.

Population, &c.] The pop. of this co. in 1801 was 818,129; in 1831, 1,358,200, consisting of 314,039 families, of whom 9,882 were chiefly employed in agriculture, 173,882 in trade, manufactures, and handicraft, and 130,335 otherwise occupied. In 1841, the pop. had increased to 1,576,616, being an increase in 10 years of 16½ per cent. In 1851, it was 1,886,576, of which number 150,615 were extra metropolitan.—The number of inhabited houses in 1851, was 239,362.—In 1815, the assessment of real property to the income-tax was £5,995,537; in 1851, the amount of rental of the several divisions of the co., according to the new arrangement of its divisions, was as follows:

Divisions.	
1. Holborn,	£606,746
2. Marylebone (new),	987,548
3. St. Pancras (new),	655,612
4. Paddington (new),	342,792
5. Finsbury,	786,604
6. South Mimms (new),	18,300
7. Tower,	1,364,156
8. Kensington (altered),	499,948
9. Edmonton (altered),	125,584
10. Gore,	104,408
11. Uxbridge (new),	109,008
12. Brentford (new),	153,620
13. Spelthorne,	88,836
14. Parishes of St. Margaret and St. John the Evangelist,	212,396
15. Hanover-square (new),	828,732
16. St. James's (new),	513,240
17. Strand,	356,644
	£7,754,174

The expenditure on the poor of this co. for 3 years previous to Easter 1750, averaged £81,030; in 1803 the expenditure was £367,285; in 1839, £391,900; in 1847, £520,687, being at the rate of 1s. 4½d. in the pound on the annual value of rateable property in the last-mentioned year, while the average rate for all England was 1s. 6¾d.—M. forms part of the dio. of London, and is divided between the archdeaconries of M. and of London. The co. returns 2 members to parliament, who are polled for at Brentford, Bedford, Uxbridge, Edgeware, Hammersmith, King's Cross, Enfield, and Mile-end, the principal place of election being Brentford. The number of electors registered in 1832 was 8,005; in 1837, 12,837; in 1841, 13,919; in 1853, 14,836. Besides the county-members, the metropolitan boroughs return 12 members. This co. is within the jurisdiction of the metropolitan high courts in civil causes; in the more important criminal causes it is under the central criminal court.

History.] Previous to the Roman invasion, M. was included in the district inhabited by the *Trinobantes*. This tribe possessed two fortified places; of which the 'eminence between the Thames and the Fleet-brook,' the centre of modern London, was the site of one; the other, and more important at that early era, was *Camalodunum*, now Colchester, in Essex. After the complete subjugation of the island, this county was included in the division *Flavia Cæsariensis;* and *Londinium* or *Augusta*, now London, became a principal Roman station, though not then dignified with the name of a colony. The co. derives its name from its relative situation to the three ancient surrounding kingdoms of the East, West, and South Saxons, of the first of which it formed a part for about three centuries previous to the dissolution of the Heptarchy.

MIDDLESEX, a county of Jamaica, of which it forms the central part. It comprises 9 parishes, viz., St. Ann, St. Mary, St. Thomas in the Vale, St. Catherine, St. Dorothy, Vere, Manchester, Clarendon, and St. John. Its chief town is Spanish town.

MIDDLESEX, a county in the E part of the state of Massachusetts, comprising an area of 800 sq. m., watered by Merrimac, Charles, Mystic, Sudbury, Concord, and Nashua rivers, and intersected in the NE by the Middlesex canal. It has a hilly surface, and possesses considerable diversity of soil. Pop. in 1840, 106,611; in 1850, 161,385. Its chief towns are Concord, Cambridge, and Lowell.—Also a cen-

tral co. of the state of Connecticut, containing a superficies of 342 sq. m., watered by Connecticut river and its tributaries. It has a hilly surface, and possesses a generally good soil. Pop. in 1840, 24,879; in 1850, 27,677. Its capitals are Middletown and Haddam.—Also a central county in the state of New Jersey, comprising a surface generally level of 339 sq. m., watered by Raritan river and its branches, and Millstone and Rahway rivers. It has an excellent harbour. Pop. in 1840, 21,893; in 1850, 28,671. Its cap. is New Brunswick.—Also a county in the E part of the state of Virginia, containing 170 sq. m., between Rappahannock and Piankatank rivers, and bounded on the E by Chesapeake bay. Pop. in 1840, 4,392, of whom 2,209 were slaves; in 1850, 4,406.—Also a township of Washington co., in the state of Vermont, 6 m. NE of Montpelier, bounded on the SW by Onion river, and watered by the N branch of that river. The surface is hilly, but the soil, especially near the streams, is fertile. Pop. in 1840, 1,270.—Also a township of Yates co., in the state of New York, 194 m. W of Albany. It has a hilly surface, and is drained by West creek, an affluent of Canandaigua lake, by which it is bordered on the W. Pop. 1,439.—Also a township of Butler co., in the state of Pennsylvania. Pop. 1,692.

MIDDLESMOOR. See Fountain's Earth.

MIDDLESTONE, a township in the p. of St.-Andrew-Auckland, co. of Durham, 3½ m. ENE of Bishop-Auckland. Area 870 acres. Pop. in 1831, 92; in 1841, 113.

MIDDLETON, a parish in Essex, 1 m. S by W of Sudbury, on the river Stour. Area 680 acres. Pop. in 1831, 103; in 1841, 127.—Also a township in the parish of Lancaster, co.-palatine of Lancaster, 3¾ m. WSW of Lancaster, and west of the river Lune. Area 1,030 acres. Pop. in 1831, 177; in 1841, 200.—Also a parish and market-town in the hundred of Salford, co.-palatine of Lancaster, 5½ m. NNE of Manchester, and 3½ m. W of Oldham, intersected by the Manchester and Rochdale canal, and in the line of the Manchester and Leeds railway. The p. includes the townships of Ainsworth, Birtle-with-Bamford, Hopwood, Great Lever, M., Pilsworth, and Thornham, and the chapelry of Ashworth. Area of the p. 11,510 acres. Pop. in 1801, 7,951; in 1831, 14,379; in 1841, 15,488. The town, principally situated in a fertile vale, watered by the Irk and skirted by rising grounds, was originally a small village, but since 1770 has progressively advanced and become a considerable manufacturing town, with a pop. in 1851 of 5,740, though still retaining a certain primitive character both in its general aspect and in the manners of its pop. The houses composing it extend nearly a mile along the road from Manchester to Rochdale. On the E side of the town a number of the buildings have been erected on the summit and slope of a gentle eminence. The cotton manufacture in all its branches is extensively carried on here; there are also large silk-factories and dye-works. The description of silk goods chiefly manufactured are plain sarsnets. The admirable loom constructed by Jacquard is in general use for figured goods, and a large number of these looms are made here. The silk-weavers are principally employed by Manchester manufacturers. Coal-mines are worked in the vicinity.—Also a parish of Norfolk, 3½ m. SE of King's Lynn, on the East Anglian railway. Area 3,020 acres. Pop. in 1831, 681; in 1841, 867.—Also a township in the p. of Cottingham, Northamptonshire, 6 m. N by E of Rothwell. Pop. in 1841, 411.—Also a township in the p. of Belford, Northumberland, 1¼ m. NW of Belford.—Also a parish in Suffolk, 2¼ m. SE of Yoxford, on the river Badingham. Area 2,030 acres. Pop. in 1831, 580; in 1841, 599.—Also a parish in Sussex, 5 m. SW by S of Arundel, on the coast. Area 380 acres. Pop. in 1831, 43; in 1841, 100.—Also a parish in Warwickshire, 4 m. SW of Tamworth. Area 3,540 acres. Pop. in 1831, 550; in 1841, 505.—Also a chapelry in the p. of Kirkby-Lonsdale, Westmoreland, 5 m. NE of Kirkby-Lonsdale, on the E bank of the Lune. Area 5,180 acres. Pop. in 1841, 275.—Also a p. in the E. R. of Yorkshire, 8¾ m. NW of Beverley. Area 3,340 acres. Pop. in 1831, 527; in 1841, 659.—Also a p. and township in the N. R. of Yorkshire, 1½ m. NW of Pickering. The p. includes the townships of Cowthorn, Hartoft, M., and Wretton, part of the township of Aislaby, and the chapelries of Cropton, Lockton, and Eastside, Rosedale. Area of the p. 25,450 acres. Pop. in 1831, 1,742; in 1841, 1,874.—Also a township in the p. of Rothwell, W. R. of Yorkshire, 4¾ m. N by W of Wakefield. Area 1,720 acres. Pop. in 1841, 1,077.—Also a township in the p. of Ilkley, Yorkshire, 5½ m. NW of Otley. Area 2,280 acres. Pop. in 1841, 186.—Also a township in the p. of Abberbury, co. of Montgomery. Pop. 131.

MIDDLETON, a small river of co. Cork, which issues from the bog of Peafield, and flows S through the town of Middleton to the head of the East-Ferry channel of Cork harbour. It is tidal to the middle of the town, and brings up vessels of 200 tons burthen to within a mile of the town. Its chief tributaries are the rivulets Ballinasloe, Lisgoold, Gurtoerue, Dungouney, and Roxborough.—Also a parish in co. Cork, containing the village of Ballinacurra, and part of the town of Middleton. Area 5,711 acres.—Also a post and market-town, formerly a parliamentary borough partly in the p. of Mogeesha, but chiefly in that of Middleton, co. Cork, 3¾ m. NNW of Cloyne. It has a neat appearance, and has for a number of years improved more than any other of the minor towns of Munster. Pop. in 1841, 4,591.

MIDDLETON, an island of the S. Pacific, in the Fiji archipelago, in S lat. 17° 3′, W long. 179° 8′. It is mountainous, and well-wooded. A bank connects it on the S with Scott island.

MIDDLETON, a township of Strafford co., in the state of New Hampshire, 38 m. NNE of Concord. It has a level but rugged surface. Pop. in 1840, 482.—Also a township of Essex co., in the state of Massachusetts, 22 m. N of Boston, on the river. Pop. 657.—Also a township of Wood co., in the state of Ohio. Pop. 193.

MIDDLETON, or Sir Charles Middleton, an island of the S. Pacific, to the E of Australia, in S lat. 28° 10′, E long. 160° 24′. To the S is an extensive bank of the same name.

MIDDLETON-CHENEY, a parish in Northamptonshire, 3 m. NE of Banbury. Area 1,780 acres. Pop. in 1831, 1,415; in 1841, 1,410.

MIDDLETON-ST.-GEORGE, a parish in the co.-palatine of Durham, 4½ m. ESE of Darlington, on the N bank of the Tees. Area 3,100 acres. Pop. in 1831, 299; in 1841, 433.

MIDDLETON-ON-THE-HILL, a parish in the co. of Hereford, 4½ m. NE by N of Leominster. Area 2,280 acres. Pop. in 1831, 413; in 1841, 388.

MIDDLETON (North), a township in the p. of Ilderton, Northumberland, 2 m. S by E of Wooler. Pop. in 1831, 156; in 1841, 129.—Also a township in the p. of Hartburn, Northumberland, 9 m. W by S of Morpeth. Pop. in 1831, 108; in 1841, 92.

MIDDLETON-QUERNHOW, a chapelry in the p. of Wath, Yorkshire, 5 m. N by E of Ripon. Area 590 acres. Pop. in 1831, 123; in 1841, 119.

MIDDLETON-SCRIVEN, a parish in Salop, 4½ m. SW of Bridgenorth. Area 1,170 acres. Pop. 108.

MIDDLETON (South), a township in the p. of Ilderton, Northumberland, 3½ m. S by W of Wooler.

Pop. in 1831, 69; in 1841, 78.—Also a township in the p. of Hartburn, Northumberland, 9 m. W of Morpeth.

MIDDLETON-STONEY, a chapelry in the p. of Hathersage, co. of Derby, 4½ m. N by E of Bakewell, on a branch of the Derwent. Area 1,310 acres. Pop. in 1831, 479; in 1841, 532. The v. is romantically situated at the entrance of Middleton-dale, a ravine characterized by naked and savage grandeur. —Also a parish in Oxfordshire, 3¼ m. NW of Bicester. Area 2,530 acres. Pop. 309.

MIDDLETON-IN-TEESDALE, a parish and market-town in the co.-palatine of Durham, 9 m. NW of Barnard-Castle, comprising the townships of Forest and Frith, M., and Newbiggin, and the chapelry of Eggleston. Area 38,410 acres. Pop. in 1831, 3,714; in 1841, 3,787. The town is scattered around the sides of hills enclosing an oval valley. The inhabitants are chiefly engaged in the extensive lead-mines which are wrought in the vicinity.

MIDDLETON-TYAS, a parish in the N. R. of Yorkshire, 5¼ m. NE of Richmond, including the townships of M., Kneeton, and Moulton. Area 5,420 acres. Pop. in 1831, 811; in 1841, 795.

MIDDLETOWN, a township of Upper Canada, in the Talbot district, watered by Otter and Big creeks. It contains a village of the same name. Pop. in 1841, 555.—Also a village in the township of W. Gwillimbury, 2 m. W of Bradbury.

MIDDLETOWN, a township of Rutland co., in the state of Vermont, U. S., 77 m. SSW of Montpelier, between two mountains, watered by Pultney river. Pop. in 1840, 1,077.—Also a township of Newport co., in the state of Rhode island, 28 m. S by E of Providence. Pop. 891.—Also a semi-capital and port-of-entry of Middlesex co., in the state and on the W bank of Connecticut river, in N lat. 41° 33′ 8″, W long. 72° 39′. Pop. in 1820, 2,618; in 1830, 2,965; in 1840, 3,511. The ground on which it stands rises gradually from the river. The houses are chiefly built of brick. The public edifices are numerous and handsome. The township comprises an area 9 m. in length from N to S, and from 4 to 10 m. in breadth. Pop. in 1820, 6,479; in 1840, 7,010.—Also a township of Delaware co., in the state of New York, 79 m. WSW of Albany. It has a mountainous surface, and is drained by Papacton branch of Delaware river. The soil consists of sandy loam, and is very productive. Pop. in 1840, 2,608.—Also a township of Monmouth co., in the state of New Jersey, 51 m. ENE of Trenton. It is generally level, and is drained by Swimming and Nevisink rivers. Pop. 6,063.—Also a village of Swatara township, Dauphin co., in the state of Pennsylvania, 10 m. SE of Harrisburg, near the junction of Swatara and Susquehanna rivers, and of the Pennsylvania and Union canals. Pop. about 1,000.—Also a township of Bucks co., in the same state, 20 m. NNE of Philadelphia. It has an undulating surface, and is bounded on the W by Neshaminy creek, and watered by a tributary of that river, and by Bristol creek. Pop. 2,124.—Also a township of Delaware co., in the same state, 20 m. W of Philadelphia. It has a level surface, and is bounded on the E by Ridley creek, and on the W by Chester creek. The soil consists of clay and loam. Pop. 1,451.—Also a township of Susquehanna co., in the same state. The surface is hilly, and is drained by Wyalusing creek and its branches. The soil consists of gravel and clay. Pop. 589.—Also a village of New Castle co., in the state of Delaware, 47 m. N of Dover, on Appoquinimink creek.—Also a village of New Castle co., in the same state.—Also a village of Frederick co., in the state of Maryland, 8 m. NW by W of Frederick, on Middle creek, an affluent of Catoctin creek.—Also a village of Frederick co., in the state of Virginia, 158 m. NNW of Richmond, on Meadow Run. Pop. 400.—Also a village of Lemon township, Butler co., in the state of Ohio, 30 m. N of Cincinnati, on the E side of Miami river. Pop. 1,000.—Also a village of Butler township, Columbiana co., in the same state. Pop. 27.—Also a township of Columbiana co., in the same state. Pop. 1,601.—Also a village of Jefferson co., in the state of Kentucky, 42 m. W of Frankfort. Pop. 200.—Also a village of Henry co., in the state of Indiana, 44 m. E by N of Indianapolis, on the W side of Fall creek.—Also a township of Shelby co., in the same state. Pop. 70.

MIDDLETOWN (North), a township of Cumberland co., in the state of Pennsylvania, U. S. It has a diversified surface, bounded on the N by Blue mountains, and is watered by Conadogwinits creek. The soil consists of calcareous loam and slate. Pop. in 1840, 1,999.

MIDDLETOWN (South), a township of Cumberland co., in the state of Pennsylvania. It is intersected in the S by South mountain, and drained by Yellow Breeches creek and its tributary Mountain creek. The soil is chiefly calcareous loam. Pop. in 1840, 2,055.

MIDDLETOWN POINT, a village and port of Middletown township, Monmouth co., in the state of New Jersey, U. S., 43 m. E by N of Trenton, on Middletown creek, 3 m. from Raritan-bay. Pop. in 1840, about 500.

MIDDLEWICH, a parish and township in the co.-palatine of Chester, 21 m. E of Chester, intersected by the Grand Trunk canal, and 2 m. E of the Grand Junction railway. The p. includes the townships of Byley-with-Yatehouse, Clive, Croxton, Kinderton-with-Hulme, M., Minshull-Vernon, Mooresbarrow-with-Parme, Newton, Occlestone, Ravenscroft, Sproston, Stublach, Sutton, Weever, and Wimboldsby. Area 13,330 acres. Pop. in 1801, 3,779; in 1831, 4,785; in 1841, 4,755. The town of M., the origin of which is of very ancient date, is well-built, and has an agreeable appearance. Its trade is chiefly in salt, obtained from brine springs in the neighbourhood. It has also manufactures of silk and cotton.

MIDDLEZOY, a parish in Somersetshire, 5 m. NW of Langport. Area 2,520 acres. Pop. 700.

MIDGHAM, a chapelry in the p. of Thatcham, Berks, 7 m. E by S of Newbury. Area 1,730 acres. Pop. in 1831, 349; in 1841, 345.

MIDGLEY, a township in the p. of Halifax, Yorkshire, 4 m. W by N of Halifax, in the line of the Rochdale canal, and the York and Manchester railway. Area 2,110 acres. Pop. in 1841, 2,667.

MIDHURST, a borough, parish, and market-town, in Sussex, 10½ m. N by E of Chichester. Area 700 acres. Pop. of p. in 1801, 1,073; in 1831, 1,478; in 1841, 1,536.—The town is pleasantly situated on a gentle eminence surrounded by loftier hills, on the banks of the Rother, which has been rendered navigable to Pulborough, where it joins the Arun. A good deal of business is done here at the weekly corn-market. M. formerly sent 2 members to parliament; under the reform bill it sends only 1; and the boundaries of the ancient borough have been widely extended, and now include, besides portions of others, the several parishes of M., Easebourne, Heyshot, Chithurst, Graffham, Didling, and Cocking, with a pop. in 1841 of 6,578; in 1851 of 7,021. Electors in 1837, 201; in 1848, 297.

MIDHURST, a parish of Tasmania, in the co. of Devon, bounded on the E by the Rubicon river, and on the W by the Mersey river.

MIDI (Canal du). See article France, p. 434.

MIDI (Dent du), a mountain of Switzerland, in the cant. of Valais, 5 m. WSW of Saint Maurice. It rises to the height of 10,446 ft. above sea-level. This mountain and the Peak of Morcles, from which it is separated by the Rhone, appear from their similarity of geological structure, to have formerly constituted one mountain.

MIDI (Pic du), or Pic-du-Midi-de-Pau, a summit of the Pyrenees in France, in the dep. of the Lower Pyrenees, 27 m. SSE of Oléron, and 36 m. S of Pau. It presents the form of a cone, flattened at the top, and has an alt. above sea-level of 1,493 toises = 9,547 ft. It gives rise to the Gave-d'Ossan, a tributary of the Adour.

MIDI-DE-BAGNE`RES (Pic du), a summit of a ramification of the Pyrenees in France, in the dep. of the Upper Pyrenees, cant. and 6 m. S of Campan, and 9 m. S of Bagnères, between the valleys of Campen and Barrèges. It has an alt. of 9,538 ft. above sea-level.

MIDIAH, a market-town of Turkey in Europe, in Rumelia, in the sanj. and 57 m. ESE of Kirkkilissia, and 66 m. NW of Constantinople, on the Black sea, and at the mouth of a small river of the same name. It is enclosed by walls, and has a port, but the latter is much obstructed with sand.

MIDIAN, Madian, or Madajin, a village of Arabia, in the Hedjaz, 420 m. NW of Medina, and 245 m. S of Jerusalem, on the E side of the Bahr-el-Akaba. It contains some ruins.

MIDLAND, a district of Upper Canada, bounded on the E by the Johnstown and Bathurst districts; on the W by Victoria district; and on the S by Lake Ontario and part of the Bay of Quinte. In the S and SW it contains excellent land, and is watered by the Napanee, Salmon, and Cataraque rivers, and by several branches of the Mississippi. The substratum of the district is limestone, and it contains beds of fine marble. It comprises the counties of Frontenac, Lennox and Addington, and the city of Kingston. Its chief town is Kingston, situated in the township of the same name. Pop. in 1824, 27,695; in 1834, 32,509; in 1848, 45,299. The islands of Amherst and Wolfe are included in this district.

MID-LAVANT, a parish in Sussex, 3 m. N by W of Chichester. Area 350 acres. Pop. in 1831, 278; in 1841, 279.

MIDLEM, a village in the p. of Bowden, Roxburghshire, 3½ m. E of Selkirk, and 5½ m. S of Melrose. Pop. in 1831, about 300; in 1841, 185.

MIDLEY, a parish in Kent, 3 m. W by S of New Romney. Area 2,420 acres. Pop. in 1841, 53.

MID-LOTHIAN. See Edinburghshire.

MID-MAR, a parish in Aberdeenshire, between the Dee and Don. Area 9,780 sq. m. Pop. in 1831, 1,056; in 1841, 1,093.

MIDNAPUR, or Midnapore, a district and town of Hindostan, in the presidency and prov. of Bengal. The district is bounded on the N by the districts of Rhamghur and Burdwan; and on the E by the Hugli. It comprises an area, generally level, of 8,260 sq. m., and in 1822 had a pop. of 1,914,060. Its principal productions are rice, sugar, betel-nut, indigo, silk, salt, wax, honey, and lac. The only articles manufactured in the district are common cloth, plain gauze, shell and metal ornaments, and pottery. The total revenue in 1829-30 was 1,307,614 rupees. The chief towns are Midnapur, Jellasore, and Pipley. Several mud forts formerly existed in the W part of the district, for the defence of the inhabitants against the incursions of the Mahrattas; but they have long since been suffered to fall into decay. The inhabitants are remarkable for their sobriety, and the simplicity and uniformity of their habits; they are, however, extremely indolent, and except when urged by their necessities, make little effort to improve the advantages which nature has afforded them. The dwellings even of the zemindars are of the most miserable description, and they have no religious edifices whatever. In most of the villages, however, there are schools for instruction in Bengalee and arithmetic; but the schoolmasters, who are of the lowest rank in life, are scantily paid, and bear a generally low reputation with respect to morality. The jungly portion of the district is to some extent inhabited by a poor and contemned race of men named Soutals, excluded, from the lowness of their caste, from the ordinary privileges of their neighbours, but remarkable for their integrity and industry. The town, which is the capital of the district, is 78 m. WSW of Calcutta, near the l. bank of the Cassai. It has an hospital, a civil jail, and a criminal prison. The latter was formerly a frontier fortress.

MIDOES, a town of Portugal, in the prov. of Beira, comarca and 20 m. WSW of Linhares, and 36 m. WSW of Guarda. Pop. 1,390.

MIDORINO, a town of Japan, in the island of Nifon, and prov. of Kudjouke, 75 m. NNW of Jedo.

MIDOU, a river of France, which has its source in the dep. of the Gers, cant. and 3 m. W of Bassones; runs NW; passes Nogaro; enters the dep. of the Landes; directs its course to the W; and, after a course of 72 m., joins the Douze, at Mont-de-Marsan, on the l. bank, to form the Midouze. Its principal affluents are the Lizaule, Rech, and Ludon on the l., and on the r. the Estang.

MIDOUZE, a river of France, in the dep. of the Landes, formed by the junction of the Midou and Douze. It runs first W, then SW, passes Tartas, and 5 m. below that town joins the Adour, on the r. bank, after a course, navigable in its entire length, of 27 m. It receives, on the r., the Lestrigon, Bes, and Retjon. Brandy, wood, resin, staves, &c., form its chief articles of transit.

MIDRIDGE, a township in the p. of St. Andrew Auckland, co. of Durham, 4 m. SE of Bishop-Auckland. Area 1,020 acres. Pop. in 1841, 345.

MIDRO, a town of Algiers, in the prov. and 120 m. ESE of Mascara, and 150 m. SW of Algiers, on the l. bank of a river of the same name, which joins the Shelif, on the r. bank, a little before the entrance of that river into Lake Titeri.

MIDSOUTZ, a town of Japan, in the island of Nifon, and prov. of Sinano, 90 m. WNW of Jedo.

MIDVILLE, a township in the soke of Bolingbroke and co. of Lincoln, 7 m. S by W of Spilsby. Area 3,450 acres. Pop. in 1831, 162; in 1841, 168.

MIDWOLDE, a village of Holland, in the prov. and 8 m. WSW of Groningen. Pop. 2,195.

MIDZICZ, a village of Poland, in the woiwoidie of Sandomir, and obwod of Opoczno. Pop. 280. It has a blast furnace and several fineries.

MIECHOW, an obwod and town of Poland, in the gub. of Kielce. The town is 51 m. SW of Kielce. Pop. 1,500, of whom a large proportion are Jews. It is built on hills, and it is said after the model of Jerusalem, by Gripsius Jaxa, a Pole who made a pilgrimage to the Holy city. It contains a college and 2 churches.

MIEDES, a town of Spain, in New Castile, in the prov. and 54 m. NNE of Guadalajara, and partido of Atienza, on the Bernea. Pop. 542.

MIEDNIKI, a town of Russia in Europe, in the district and 20 m. SE of Vilna, on the Varvitsa. Pop 1,000. It is the residence of a Catholic bishop. The environs are fertile and well-wooded.

MIEERET, a department and commune of Belgium, in the prov. of Namur, and arrond. of Dinant. Pop. of dep. 470; of com. 422.

MIEDZNA, a town of Poland, in the woiwodie and obwod and 23 m. NNW of Siedlec. Pop. 500.

MIEDZYBOZ, or Mendjiboj, a town of Russia, in the gov. of Podolia and district of Latyczew.

MIEDZYCHOD. See Birnbaum.

MIEDZYRZECZ, or Mijiritch, a town of Russia in Europe, in the gov. of Volhynia, district and 27 m. ENE of Rowno, and 45 m. N of Zaslav.

MIEDZYRZYZ, a town of Poland, in the woiwodie and 26 m. ESE of Siedlec, obwod and 18 m. NNE of Radzyn, on the Krzna. Pop. 1,800. It is well-built, and has a handsome castle with fine gardens and several churches.

MIEHLEN, a market-town of the duchy and 6 m. S of Nassau, bail. and 2 m. NNW of Nastätten. Pop. 1,230.

MIELAN, a canton, commune, and town of France, in the dep. of the Gers, and arrond. of Mirande. The cant. comprises 19 com. Pop. in 1831, 11,656; in 1841, 11,685. The town is 8 m. SW of Mirande, near the l. bank of the Losse. Pop. 1,931. It has an active trade in sheep and in wine.

MIELCZYN, a town of Prussia, in the prov. of Posen, regency and 51 m. S of Bromberg, circle and 15 m. SSE of Gnesen. Pop. 332.

MIELEN-SUR-AELST, a department and commune of Belgium, in the prov. of Limburg, and arrond. of Hasselt. Pop. 437.

MIELNIC, a town of Russia in Europe, in the prov. and 60 m. S of Bialystock, district and 18 m. ESE of Drohitchin, on the r. bank of the Bug. Pop. 650.

MIELSCHIN, or Mielszin, a town of Prussia, in the prov. of Posen, regency and 54 m. S of Bromberg.

MIERCHAMPS, a commune of Belgium, in the prov. of Luxemburg, dep. of Beausaint. Pop. 132.

MIERDZYRZECZ. See Meseritz.

MIERES (San-Juan-de), a town of Spain, in Asturias, in the prov. and 9 m. S of Oviedo, and partido of Lena, in a fine and fertile plain, on the r. bank of the Lena, which is here crossed by a fine bridge. Pop. 1,818. It has a parish-church, an hospital, several convents, and a custom-house, and possesses manufactories of fire-arms and of several kinds of cloth. Coal is found in the vicinity.

MIERKELWYCH, a commune of Belgium, in the prov. of East Flanders, and dep. of Adegem. Pop. 438.

MIERLA, a town of Spain, in New Castile, in the prov. and 28 m. N of Guadalajara, and partido of Tamajon. Pop. 300. It has several lime-kilns.

MIERLO, a parish of Holland, in the prov. of N. Brabant, cant. and 8 m. E of Eindhoven, and 24 m. SE of Bois-le-Duc. Pop. 1,600.—Also a parish in the prov. of Limburg, NW of Venlo. Pop. 1,160.

MIERS, a commune of France, in the dep. of the Lot, cant. and 6 m. N of Gramat, 21 m. NE of Gourdon. Pop. 1,249. It has mineral springs.

MIERY, a village of France, in the dep. of the Jura, cant. and 3 m. SW of Poligny, and 12 m. NNE of Lons-le-Saunier. Pop. 500. In the environs are two quarries of marble and a copper-mine.

MIES, Silberstadt, Strzibro, or Stejbro, a royal town of Austria, in Bohemia, in the circle and 18 m. W of Pilsen, on the r. bank of the Mies, an affluent of the Beraun. Pop. 4,269. It has mines of argentiferous lead, and a paper-mill.

MIESBACH, a langericht-bezirk and market-town of Bavaria, in the circle of Upper Bavaria, 35 m. SSW of Munich. Pop. 1,165. It has 2 churches, a castle, an hospital, and a school, and possesses 2 distilleries of brandy, a brewery, a saltpetre refinery, and a wax bleachery. This town was formerly capital of the seignory of Hohewaldeck.

MIESCHISKO, or Mieszіska, a town of Prussia, in the prov. of Posen, regency and 42 m. SW of Bromberg, circle and 8 m. SE of Wongrowitz, on the l. bank of the Welna. Pop. 580.

MIESCHKOW, or Mieszkow, a town of Prussia, in the prov. and regency and 38 m. SE of Posen, and circle of Pleschen. Pop. 707.

MIESENHEIM, a village of Prussia, in the prov. of the Lower Rhine, regency and 9 m. W of Coblenz, circle and 11 m. NE of Mayen, on the Neste. Pop. 600. It has several iron-works and blast-furnaces.

MIESTO (Nowo), a town of Russia in Europe, in the gov. of Vilna, in the district and 8 m. WSW of Poneviej, on the r. bank of the Pevieja.

MIESZKOW, a town of Prussia, in the prov., regency, and 38 m. SE of Posen, circle and 18 m. NW of Pleszew, near the l. bank of the Lubieska, an affluent of the Warta. Pop. 692. It has manufactories of cloth.

MIETERSHEIM, a village of Baden, in the circle of the Middle-Rhine, SW of Lahr. Pop. 394.

MIETESHEIM, a village of France, in the dep. of the Lower Rhine, cant. and 4 m. SSW of Niederbronn. Pop. 560.

MIEUSSY, a village of Sardinia, in the dio. of Savoy and prov. of Faucigny, mand. and 6 m. WNW of Taninge. Pop. 1,600.

MIFFLIN, a central county in the state of Pennsylvania, U. S., comprising an area of 900 sq. m. It has a generally mountainous surface, and is intersected by Juniata river and the Pennsylvania canal. It possesses considerable fertility. Pop. in 1840, 13,092; in 1850, 14,974. Its capital is Lewiston.—Also a township of Lycoming co., in the same state. Pop. in 1840, 1,224.—Also a township of Alleghany co., in the same state, 8 m. S of Pittsburg, bounded on the NE and SE by the Monongahela river. It is generally hilly, and is drained by Thomson's run, Strut's run, and Peter's creek, all affluents of the Monongahela. It has a fine loamy soil. Pop. 1,654.—Also a township of Cumberland co., in the same state, 17 m. NW of Carlisle. It has a hilly surface, and is bounded on the N by Blue mountains, and on the S by Conedogwinit creek. The soil is slaty. Pop. 1,412.—Also a township of Columbia co., in the same state. Pop. 2,150.—Also a township of Dauphin co., in the same state, 23 m. NE of Harrisburg. It is bounded on the N by Mahantango mountain, and on the S by Berry's mountain, and is watered by Wiconisco creek. Pop. 1,781.—Also a township of Richland co., in the state of Ohio, 5 m. E of Mansfield. The soil is fertile and well-cultivated. Pop. 1,800.—Also a township of Franklin co., in the same state. Pop. 825.—Also a township of Crawford co., in the same state. Pop. 316.—Also a township of Pike co., in the same state. Pop. 666.

MIFFLINSBURG, a town of Buffalo township, Union co., in the state of Pennsylvania, 76 m. N of Harrisburg, on the S side of Buffalo creek. Pop. 704.

MIFFLINTOWN, a town of Fermanagh township, Juniata co., in the state of Pennsylvania, 45 m. NW of Harrisburg, on the E bank of Juniata river, and on the Pennsylvania canal. Pop. 420.

MIFFLINVILLE, a village of Mifflin township, Columbia co., in the state of Pennsylvania, 103 m. NNE of Harrisburg, on the S side of Susquehannah river. Pop. about 100.

MIGALGARA, or Malgara, a town of Turkey in Europe, in Rumelia, in the sanj. and 37 m. NNE of Gallipoli, on the Maritza, near the foot of Mount Tekir. Pop. 2,500. It is enclosed by old walls flanked with towers, and contains several mosques, public baths, and a fine caravanserai. The locality is noted for its honey.

MIGE', a commune of France, in the dep. of the Yonne, cant. and 2 m. SW of Coulange-la-Vineuse. Pop. 1,028.

MIGERO, a town of Lower Guinea, in Congo, in the prov. of Sonho, near the entrance of the Birige into the Atlantic, and 210 m. SW of San Salvador.

MIGLIARINA, a village of Naples, in the prov. of Calabria-Ultra, district and 8 m. WNW of Catanzaro. Pop. 1,600.

MIGLIONICO, a town of Naples, in the prov. of Basilicata, district and 9 m. SW of Matera. Pop. 3,300.

MIGLOS, a commune of France, in the dep. of the Ariege, cant. and 4 m. S of Tarascon-sur-Ariege. Pop. 1,188. It contains several mines of lead.

MIGNANO, a town of Naples, in the prov. of Terra-di-Lavoro, 30 m. SE of Sora, on the r. bank of the Peccia. Pop. 800.

MIGNAVILLERS, a village of France, in the dep. of Haute-Saone, cant. and 6 m. ENE of Villersexel. Pop. 500.

MIGNE', a village of France, in the dep. of Indre, cant. and 7 m. NW of St. Gauthier. Pop. 1,000.—Also a com. and v. in the dep. of Vienne, cant. and 4 m. N of Poitiers, on the l. bank of the Auzance. Pop. 1,652.

MIGNON, a river of France, which rises near St.-Martin-d'Auge, in the dep. of Deux-Sevres; runs NW; and flows into the Sevre-Niortaise, on the l. bank, after a course of about 27 m.

MIGNOVILLARD, a village of France, in the dep. of Jura, cant. and 4 m. NE of Nozeroy. Pop. 670.

MIGOULINSKAIA, a town of Russia, on the r. bank of the Don, 40 m. SSE of Bogutshar.

MIGRON, a village of France, in the dep. of Charente-Inferieure, cant. and 3 m. NNE of Burie. Pop. 1,246.

MIGUEL (San). See Michael's (Saint).

MIGUEL (San), a river of the La Plata prov. of Cordova, which flows into the Rio Dulce, in about 29° 45′ S lat., after an E course of 150 m.—Also a river of New Granada, which descends from the E flank of the Andes, and flows E into the Putumayo, which it joins on the r. bank, in about 0° 20′ N lat., after a course of 150 m.—Also a village of New Granada, 66 m. WNW of Santa-Fe-de-Bogota, on the r. bank of the Magdalena.—Also a town of the republic of San Salvador, on a navigable river of the same name, which has its embouchure in the Pacific ocean, 24 m. WNW of the gulf of Fonseca. It was founded in 1530, and has a pop. of about 6,000.—Also a volcanic mountain in the state of San Salvador, which rises from low level ground midway between the river Lempa and Point Chiquirin. Though not exceeding 5,000 ft. in alt., yet standing alone, on a plain of many leagues in extent, it is an imposing object.—Also a town of New California, 135 m. SSE of Monterey, on the coast.—Also a fort at the S extremity of Lake Mirim, 180 m. ENE of Monte-Video.—Also a river of Peru, which flows into the Baures, on the l. bank, in 13° 20′ S lat., after a NW course of 350 m. Its principal affluents are the Parapiti on the l., and the San-Luis and Sacopo on the r.—Also a bay on the N coast of the island of Luçon, in N lat. 13° 50′, E long. 123° 10′.

MIGUEL (Gulf of San), or of Darien-del-Sur, a gulf on the New Granada coast of the Pacific, in the dep. of Ystmo, in N lat. 6° 20′, W long. 78°, forming a deep embrasure on the E side of the gulf of Panama, into the head of which the river Tuyra discharges itself. By a decree of congress, dated Bogota, June 1st, 1852, the exclusive privilege of cutting a ship-canal across the isthmus of Darien, between the gulf of Darien or Caledonia bay on the Atlantic side, and the gulf of San Miguel on that of the Pacific, with liberty to select any other point on the Atlantic coast between Punta-de-Mosquitos on the W, and the western mouth of the great river Atrato falling into the gulf of Darien on the E, for the entrance of the said canal, with all the lands necessary for the canal and its works, has been conceded to a powerful English company, who have selected a line from Port Escoces to the gulf of San M., requiring only 39 m. of cutting, being the shortest route yet discovered for a ship-canal, having its two extremities respectively on the Atlantic and the Pacific oceans.

Mr. Gisborne, one of the engineers despatched to examine the isthmus, reports that it is perfectly practicable to make a cut of sufficient capacity to form an uninterrupted navigation, without locks, from sea to sea; and that the expense of such a cut, 30 ft. deep at low tide, 140 ft. broad at bottom, and 160 ft. at low water surface, would be £12,000,000. "On the side of the Pacific, the tide rises 23 ft.; on that of the Atlantic, it is scarcely appreciable. Mid-tide is on a level or nearly so in the two oceans; so that there will be a current both ways dependent on the ebb and flow of the Pacific. This current will not exceed 3 m. an hour, and will act most beneficially, not only as a scour to prevent deposit, but as an assistance in the transit of vessels. It will secure the passage being effected in one tide, and prevent the passing of vessels going different ways, as the direction of the trade will be influenced by the ebb or flow of the Pacific tide. The material to be excavated through is chiefly rock, not expensive to quarry; so that this current will not wear away the banks, nor will the wash of passing steamers cause injury; it also affords security against any interruption to the navigation from slips, and reduces the cost of maintenance to a nominal sum. This rock is a stratified shale with thinnish beds, easy to get, though sound, and will form an admirable side-lining to the navigation, dispensing with the necessity of any artificial protection. The fact of its existence is one of the most favourable features to the undertaking as regards permanence and certainty of success." Adverting to the vast expense of this canal, Mr. Gisborne adds, "it must be remembered that no project has ever been before the public which embraces anything like the objects attained by such an uninterrupted navigation. All other propositions have but local importance, and look to their profits from local trade,—this one is adapted to every ship afloat, and seeks a return from the trade of every country. Its completion will make a change in the carrying commerce of every Pacific port; and as a railway makes its own traffic, so will this work most certainly greatly increase the commerce between the distantly separated countries which steam-power is only now beginning to reach. This is the design which after mature consideration I confidently recommend for adoption, and it is almost with regret that I feel it my duty to submit any other, so sure am I that it is the only one which will satisfy the requirements of commerce."

A tidal canal, supplied on the upper level at high water, Mr. Gisborne proceeds to state, would present a very imperfect line of navigation, and would cost about £7,000,000; but for a navigation requiring the use of locks, he submits a design which, he is of opinion, might be executed for the sum of £4,500,000. The river Savannah, flowing into the head of the gulf of San M., on the N side, opposite that of the Tuyra, which enters on the S side, and the river Caledonia, flowing into the W side of the gulf of Darien, flow through two extensive, uninhabited, uncultivated plains. "During the dry season neither of these rivers could, near their source, supply the water required at a summit-level of a navigation on the scale contemplated. During the wet season, again, they discharge a large volume of water, which in an ordinary canal would cause trouble and expense to regulate, and prevent accumulations of deposit. Under these circumstances," says Mr. Gisborne, "I propose placing an embankment across both these rivers, making the embankments long enough and high enough to raise the water at their back 90 ft. above low tide in the Pacific. This will flood both plains up to the range of hills which forms the boundary of their catchwater-basins. Through the summit a cut is to be made with 40 ft. depth of water, so as to allow 10 ft. to be drawn off the lake for lockage, or a rise of 10 ft. to catch flood-waters and prevent too rapid a current in the tidal entrances to the harbours. All the valuable timber at present growing in what would be the bottom of the lake, must be cut previous to the water being let in, so that an easy means will be afforded to convey it to the harbours for shipment. From Caledonia bay to the embankment, a cut will have to be made. The Savannah is navigable up to the point where the embankment is to cross. The rise of 90 ft. will be overcome by locks placed in the side of one of the ranges of hills against which the embankments terminate, and which are composed of rock; weirs will also be provided." To raise a vessel 90 ft., without much loss of time, Mr. Gisborne proposes "that the locks should be 400 ft. long from mitre to mitre, and 90 ft. wide between the gate-quoins. Each lock to have a lift of 30 ft., to be overcome by wrought iron gates. The large supply at the summit-level does away with the usual objection to a high lift wasting water. There will be no difficulty in constructing the locks and gates of the dimensions proposed, stone, lime, and sand of excellent quality, are obtainable in more than one place on the line of country to be traversed. Three locks will thus be required in each embankment, and the second set will be 300 ft. long, and 50 ft. wide, with 22 ft. of water on their cills. Thus 4 vessels can be passed into the lake at the same time, and the larger locks only used for those adapted to their size."

The estimated cost of this last scheme, Mr. Gisborne proceeds to say, "is only about one-third of that set down for an uninterrupted cut from sea to sea; but the disadvantages are very great; locks are decidedly objectionable in an undertaking of this magnitude and mercantile value; the best studied plans carried out in the most perfect manner cannot guard against accident or ne-

glect, which may stop the whole transit for months; delay and risk there must be when such large machinery is worked; and there is no doubt shipowners would sooner pay a higher toll to pass directly from sea to sea, than run the risk and incur the delay of lock navigation. A far-seeing thinker cannot doubt that the level cut is the only one which will comply with the requirements of the world." As regards the benefits that would be derived from the execution of a ship-canal on the scale proposed, little difference of opinion exists, the suffrages of the entire mercantile world being in its favour. The vast saving of time that would be effected by the adoption of such a passage would enable ships to make two voyages where they now make one. Another great benefit to shipping would consist in the facility with which they could revictual, or take in water or coal. It is further expected that emigrants to Australia would take the isthmus route, as Sydney could be reached by steam in from 50 to 55 days from Southampton. The prospective advantages to New Granada are so immense, that not a doubt can be entertained of a continuance of the cordial co-operation already accorded by the government to the ship-canal project. It appears, however, that the promoters of this magnificent undertaking feel the necessity of proceeding with caution, and it has been determined to have full corroboration of the surveys and plans before any attempt is made to carry out the project. It would appear that the cosmopolitan character of the work is to be fully recognised, and that consequently the co-operation of the chief commercial nations of the world will be enlisted in its support. It is even stated that measures will be adopted for obtaining direct assistance, probably in the shape of a guarantee on a portion of the capital, or the absorption on favourable terms of a portion of the shares from the great commercial states, more especially Great Britain, France, and the United States. The comparative length of the six different canal lines by which it has been proposed to effect a junction of the two oceans, is as follows:

1. The Tehuantepec or Mexico route, . .	198 m.
2. The Nicaragua route, from San-Juan-del-Norte to Realejo, ...	273
3. The Nicaragua route, from San-Juan-del-Norte to San-Juan-del-Sur, ...	170
4. Atrato route, by Napipi and Cupica, . .	172
5. Chagres or Limon bay to Panama, . .	51
6. Darien route, from Port Escoces to the gulf of San Miguel, ...	39

MIGUEL (Sao), a district and town of Brazil, in the prov. and 25 m. WSW of Alagoas, on a river of the same name, 35 m. above its entrance into the Atlantic. Pop. of district about 2,000. Besides the culture of provisions for local use, the inhabitants raise tobacco and cotton for the Bahia market.—Also a district and town of the prov. of Santa-Catharina, on the bay of that name. Pop. of district in 1842, 3,000, of whom 2,000 were slaves. Rice, sugar, millet, mandioc, and kidney beans are extensively reared in the locality. It has several cooperages. Cheese forms also a considerable article of manufacture for the market of the town of Desterro. The roadstead of São M. affords good anchorage for vessels of the largest size, and is well-sheltered from the W wind.—Also a village and mission-station in the prov. of São-Pedro-do-Rio-Grande, on the l. bank of the Uruguay. Pop. 1,000, of whom 700 are Indians. The village consists of a few streets uniting in a quadrangle, at the head of which are the façade and nave, the only portions of the sumptuous church erected here by the Jesuits which escaped destruction during the conflagration of the village in 1756. The district contains mines of copper and mercury.—Also a village of the prov. of Maranhão, on the r. bank of the Rio Itapicurú, 30 m. below the town of Itapicurú-Mirim, and 75 m. from the bay of São-José. Its inhabitants are all of Indian descent.—Also a parish in the prov. and 50 m. N of Parahiba, and 2½ m. N of the bay of Acejutibiró or Traicão. Pop. 1,200. Cotton and oil form the chief produce of the locality.—Also a parish of the prov. of Minas-Geraes, on the r. bank of the Rio-Jiquitinhonha, at the junction of a small stream named also São-Miguel, 40 m. NE of Tocayos, and 150 m. from the sea. Legumes, cotton, mandioc, and millet are cultivated in the locality.—Also an ancient village of the prov. of Para, on the r. bank of the Rio-das-Amazones. It is inhabited by Indians of the Baré tribe.—Also a mission-station of the prov. of Mato-Grosso, on the Rio-Mequen, near the confluence of that river with the Guapore.—Also an ancient village of the prov. of Bahia, in the district of Jaguaripe. It has a church and an elementary school.—Also a town of the prov. of Bahia, in the comarca and on the l. bank of Rio-de-São-Francisco, 70 m. below Barrado-Rio-Grande.—Also a town of the prov. of São-Pedro-do-Rio-Grande, at the S extremity of Lagoa-Mirim, at the mouth of a river of the same name, and 35 m. NNE of Santa-Theresa.—Also a river of the prov. of Alagoas, which has a total course from W to E of about 70 m. It waters the district of the same name, traverses a lake on which the town of Santa-Anna is situated, and throws itself into the ocean 90 m. NE of the embouchure of the Rio-São-Francisco. It has a bar at its mouth with only 6 ft. water.

MIGUEL-D'ACHA (Sao), a town of Portugal, in the prov. of Beira, comarca and 9 m. E of Castello-Branco, and 11 m. W of Idanha-Nova.

MIGUEL-ARCANGEL (Santo), a group of islets in the South Pacific, in the Low Archipelago, to the SE of the island of St. Paul, in S lat. 20° 9′, and W long. 144°. It was discovered by Quiros in 1606.

MIGUEL-DA-CACHOEIRA (Sao), a parish of Brazil, in the prov. of Para, on the Guama. It is inhabited by Indians, who find their chief subsistence in fishing, the chase, and the cultivation of a few common articles of provision.

MIGUEL-DIAS, a mountain of Brazil, in the prov. of Minas-Geraes, to the SW of Barbacena. It forms a lofty summit of the Cordilheira-da-Mantiqueira, and gives rise to the Rio-das-Mortes. — A town of the same name is situated on this mountain 15 m. S of Barbacena.

MIGUEL-ESTEBAN, or Migueleste'ban, a town of Spain, in New Castile, in the prov. and 57 m. SE of Toledo, and partido of Quintanar-de-la-Orden, in a marshy plain. Pop. 1,868.

MIGUEL EL-GRANDE (San), a town of Mexico, in the state of Guanaxuato, in a fine plain. Pop. 3,000. It has manufactories of saddles, harness, and of other articles in leather. Cattle are extensively reared in the environs.

MIGUEL-IGNACIO, a mountain of Brazil, in the prov. of Goyaz. It runs from E to W parallel to the Rio-Verde, an affluent of the Maranhão, between Meia-Ponta and Pilar.

MIGUEL-JOSE, a mountain of Brazil, in the prov. of Mato-Grosso, on the l. bank of the Paraguay, in S lat. 21° 22′. This mountain is one of those which enclose the bed of the Paraguay, and it separates the Campos Parécès from the Baixo-Paraguay, locally called Fecho-dos-Morros.

MIGUEL-DE-MATA-DENTRO (Sao), a village of Brazil, in the prov. of Minas-Geraes, and district of Santo-Barbara, on Surucaba, an affluent of the Piracicaba.

MIGUEL-DE-NEVIRI (Sao), a town of Brazil, in the prov. of Para, on the r. bank of the Amazonas, founded in 1633.

MIGUEL-DE-PEDROSO (San), a town of Spain, in Old Castile, in the prov. and 26 m. E of Burgos, and partido of Belorado, 15 m. W of Santo-Domingo-de-la-Calzada, between two hills, on the Tiron, which is here crossed by a bridge. Pop. 398. It has manufactories of coarse linen and woollen fabrics.

MIGUEL-DEL-PINO (San), a town of Spain, in Leon, in the prov. and 14 m. WSW of Valladolid, and partido of Mota-del-Marqués, on the r. bank of the Duero. Pop. 210.

MIGUEL-DE-PIRACICABA, an ancient parish of Brazil, in the prov. of Minas-Geraes, district and 70 m. ESE of Cahete, on both sides of the Piracicaba, which is here crossed by a wooden bridge.

Drawn by C. Dibdin from a sketch by T. Bacon Esq.

ABU'S TOMB, MERAT.

A. Fullarton & Co. London & Edinburgh

The town rises amphitheatrally from the river, and all the houses are surrounded with gardens. The p. comprises an area about 100 m. in length, and 30 m. in breadth, and contains nearly 11,000 inhabitants, of whom, in 1816, 1,942 were whites, 18 Indians, 4,122 free mulattoes and negroes, and 5,867 slaves. The industry of the locality consists chiefly in the culture of millet and kidney-beans, and the rearing of pigs.

MIGUEL-DE-LA-RIBERA (San), a town of Spain, in Leon, in the prov. and 17 m. SSE of Zamora, and partido of Fuente-el-Sanco, on the slope of a mountain. Pop. 897. It has a convent founded by St.-Pierre-d'Alcantara.

MIGUEL-DE-SAPA (San), a village of Peru, in the intendency of Arequipa, prov. and 15 m. E of Arica. Pepper is extensively cultivated in the environs.

MIGUEL-DE-SERREZUILA (San), a town of Spain, in Old Castile, in the prov. of Avila, and partido of Piedrahita, on the E side of a low hill, 32 m. SE of Salamanca. Pop. 578. It has a parish-church, a custom-house, and a granary.

MIGUEL-TOTOMCAPAN (San). See Totomcapan.

MIGUEL-DE-TUCUMAN (San). See Tucuman.

MIGUELTURRA, a town of Spain, in the prov. and partido and 4 m. SE of Cuidad-Real. Pop. 7,500. It has an hospital and a convent, and possesses manufactories of brandy and of soap, and several tanneries.

MIGUEL-DE-VALERO (San), a town of Spain, in Leon, in the prov. and 33 m. SW of Salamanca, and partido of Sequeros-del-Condado, in a mountainous locality. Pop. 480.

MIHALY (Nagy). See Michl (Gross).

MIHALY (Nemet Saint). See Pettersdorf (Gross).

MIHALYI, a town of Hungary, in the comitat and 27 m. ESE of Oedenburg, on the l. bank of the Little Raab. Pop. 1,229. It has a castle.

MIHEE, a village of Afghanistan, in the Murree mountains, on the road from Bagh to Kahun.

MIHIEL (Saint), a canton, commune, and town of France, in the dep. of the Meuse, and arrond. of Commercy. The cant. comprises 28 com. Pop. in 1831, 16,229; in 1841, 17,180. The town is 10 m. N of Commercy, and 22 m. ENE of Bar-le-Duc, on the r. bank of the Meuse. Pop. in 1841, 6,462. The chief object of interest which it possesses is the church of St. Etienne, in which there is a magnificent piece of sculpture called the Sepulchre, executed in fine white stone by Ligier-Michier, a pupil of Michael-Angelo. It has a communal college, a public library, and a printing establishment, and contains manufactories of cloth, cotton fabrics, and lace, several tanneries and dye-works, oil-mills and breweries, a copper-foundery, iron-forges, and a manufactory of cranes. The trade, which is considerable, consists chiefly in wool, grain, oil, game, rape-seed, linen damask and lace. The environs afford good red wines, and trout of excellent quality abound in the river. This town owed its foundation to a Benedictine abbey, which was erected in the locality in 709. It was formerly well-fortified, and had sustained several sieges.

MIHLA, a market-town of the grand-duchy of Saxe-Weimar, in the principality and 7 m. N of Eisenach, bail. and 4 m. ENE of Kreutzburg, on the r. bank of the Werra. Pop. 1,294. It has manufactories of velvet. Agriculture forms also an important branch of local industry.

MIHRIDGIAN. See Isferjan.

MIIAS. See Miask.

MIJANES, a village of France, in the dep. of the Ariege, cant. and 3 m. NW of Querigut, on the l. bank of the Jonne. Pop. 500.

MIJARES, a town of Spain, in Old Castile, in the prov. and 29 m. SW of Avila, and partido of Arenas-de-San-Pedro, and 14 m. ESE of Mombeltran. Pop. 767. It has a parish-church and a custom-house; and possesses manufactories of cloth, of water-buckets, and of pitch.

MIJARES, or Minares, a river of Spain, in Aragon, which has its source in the prov. of Teruel, near the village of Monteagudo; runs SE; enters the prov. of Castellon-de-la-Plana in Valencia; receives on the l. bank the Monleon; and throws itself into the Mediterranean 5 m. SE of Castellon-de-la-Plana, and after a course of about 75 m.

MIJAS, a town of Spain, in Andalusia, in the prov. and 18 m. SW of Malaga, partido and 15 m. ENE of Marbella, near the shore of the Mediterranean, and surrounded by a mountain of the same name. Pop. 4,086. It has a parish-church, a custom-house, an hospital, and a public granary; and possesses manufactories of paper, serge, and common cloth. Lead, iron, copper, and cobalt, are found near the surface in the surrounding territory, but have not yet been wrought to any advantage.

MIJAUX, a village of France, in the dep. of the Jura, cant. and 6 m. E of St. Claude, on the Valcelline. Pop. 530.

MIJIRITCH, a town of Russia in Europe, in the gov. and 90 m. NW of Kharkov, district and 9 m. N of Lebeden. Pop. 7,000. It is enclosed by an earthen rampart, and contains 8 churches. It carries on an active trade in cloth and in silk fabrics.—Also a town in the gov. of Kiev, district and 33 m. WNW of Tcherkasi. See also Miedzyrzecz.

MIKAMI, a district of Japan, in the island of Nifon, and prov. of Bingo.

MIKASA, a province of Japan, in the island of Kiu-siu, and prov. of Tsikousen.

MIKATTA, a town of Japan, in the island of Nifon, and prov. of Wakasa, on the sea of Japan.

MIKE, a town of Japan, in the island of Kiu-siu, and prov. of Tsikongo, 66 m. E of Nagasaki, on a small river which throws itself into the bay of Simabara.

MIKENAUK, a central county of the state of Michigan, U. S., comprising an area of 576 sq. m. It contains two lakes, the outlets of which form Maskegont river, and it contains also the head-streams of Au Sable river.

MIKESDAL, a parish of Norway, in the dio. of Aggershuus, and bail. of Bradsberg. Pop. 1,972.

MIKHAILICHKI, a town of Russia in Europe, in the gov. and district and 41 m. ENE of Vilna, and 27 m. NE of Ochmiana.

MIKHAILOV, a district and town of Russia in Europe, in the gov. of Riazan. The district, which is situated in the W part of the gov., possesses a level surface, and is very fertile, producing corn, hemp, flax, hops, and legumes. Cattle are also extensively reared in the locality. The town is 36 m. SW of Riazan, on the Pronia. Pop. 6,500. It contains numerous churches. The foundation of this town is by some authorities assigned to the era of Rurik, son of Rostislav of Novgorod. According to the annals of the reign of the czar Ivan-Vasilievitch, however, it appears to have been built in the year 1551. It has the remains of wooden ramparts, and of a ditch.

MIKHAILOVKA, a village of Russia in Europe, in the gov. and 20 m. SSE of Yekaterinoslav, district and 14 m. ENE of Alexandrovsk, on the l. bank of the Moskovka, an affluent of the Dnieper. Pop. 3,591.—Also a town in the gov. of Volhynia, district and 24 m. WNW of Doubno, and 51 m. SW of Vladimir.—Also a town in the gov. of Voronej,

district and 45 m. WSW of Bogoutchar, 54 m. SSW of Pavlovsk.—Also a town in the same gov., in the district and 7 m. NE of Pavlovsk, on the r. bank of the Osereda.—Also a town in the gov. and 54 m. SSW of Orel, district and 23 m. SE of Dmitrovsk.

MIKHAILOVSKAIA, a town of Russia in Europe, in the gov. of the Don Cossacks, and district of Khoper, 285 m. NNE of Tcherkask, on the Khoper.

MIKHALEVSKAIA (Nijnii), a town of Russia in Europe, in the gov. of the Don Cossacks, and district of Donetz, 78 m. NE of Tcherkask, on the r. bank of the Don. To the NE is Verkhnei-Mikhalevsk.

MIKHALPOL, a town of Russia in Europe, in the gov. of Podolia, district and 27 m. WSW of Letitchev. Pop. 465.

MIKI, a district of Japan, in the island of Sikokf, and prov. of Sanoki.

MIKKOUMMI, a district of Japan, in the island of Nifon, and prov. of Tamba.

MIKLOS (Szent), a town of Hungary, in the comitat and 14 m. ESE of Oedenburg. Pop. 1,570.

MIKLOS (Szent), Swaty-Mykulas, Sanct-Nikolai, or Sankt-Niklau, a town of Hungary, cap. of the gsp. of Liptau, 21 m. N of Briesen, and 31 m. NNE of Libethen, on the r. bank of the Waag. Pop. 4,160. It contains a Catholic church and a synagogue, and has several distilleries, breweries, and salt-refineries.

MIKLOS (Nagy-Szent), or Gross-Sanct-Niklau, a town of Hungary, in the gsp. of Torontal, 27 m. ESE of Segedin, on the Arauka. Pop. 14,222. It has a catholic and a Greek church, and an agricultural institute.

MIKOKO. See Anziko.

MIKOLAJOW, a town of Austria, in Galicia, in the ldgb. of Lemberg, NE of Stry. Pop. 1,862.

MIKTAB, a town of Nubia, in the Taka territory, about 270 m. NE of Sennaar.

MIKULINCE, a town of Austria, in Galicia, in the gov. of Lemberg, circle and 12 m. S of Tarnopol, 7 m. NW of Trebowla, on the r. bank of the Serea. Pop. 2,000, chiefly Jews.

MIL, a village of Holland, in the prov. of N. Brabant, 21 m. E of Bois-le-Duc. Pop. 1,100.

MILAGRO, a town of Spain, in the prov. and 27 m. S of Pampeluna, on the r. bank of the Aragon. Pop. 1,784. It occupies the site of the ancient *Ergavia.*

MILAH, a town of Algeria, a day's march to the NW of Constantina, at the foot of the S flank of the Zouagha mountains, on the l. bank of the Rummel. It is walled, and is environed by gardens and citron-groves. Pop. 1,600. It has a considerable trade in raisins, oranges, and kouskous.

MILAN (Duchy of), or The Milanese, an extensive region in the N of Italy, situated between the Alps on the N, and the Po on the S; having Switzerland on the N; the Venetian territory and the duchy of Mantua on the S; and Piedmont on the W. That portion which lies to the E of the Ticino belongs to the kingdom of Austrian-Lombardy; the remainder to the kingdom of Sardinia. This country was comprised, with others in the N of Italy, under the general name of Lombardy, until the 14th cent., when Visconti aspired to the sovereignty, and was supported by the emperor of Germany. About the end of that cent., John Galeatius purchased the ducal title from the reigning emperor; and his daughter marrying the duke of Orleans, gave rise to the pretensions of the kings of France to this duchy. After the death of the last duke of this line, Francis Sforza was chosen duke in 1450. On the extinction of his family, a century after, Charles V. gave the Milanese as a fief of the empire to his son Philip II., king of Spain, and it remained an appendage to that Crown till 1706, when a brilliant campaign of Prince Eugene put it in possession of the house of Austria, to which, with the exception of the Sardinian Milanese, it continued subject during ninety years, until the victories of Bonaparte in 1796. On the formation of the Cisalpine republic, the whole of the Milanese, divided into 4 departments, was comprised in it; but on the reinstatement of the old order of things in 1814, the part belonging to the king of Sardinia was restored, and the remainder incorporated with Austrian Italy, or, as it is styled in diplomacy, the Lombardo-Venetian kingdom, in the political arrangements of which it forms, along with the duchy of Mantua, and the Valteline, the gov. of Milan, or the western of the two great divisions of Austrian Italy.

The superficial extent of the Austrian government of M., or Lombardia, is 6,488 Italian or geog. sq. m. Its pop. in 1837 was 2,460,079; in 1851, 2,667,202. It is divided into 9 delegations, viz. those of Milano, Pavia, Lodi-et-Crema, Cremona, Como, Sondrio, Bergamo, Brescia, and Mantua. Of these, the deleg. of M. contains 532·59 geog. sq. m., with a pop. of 604,512 in 1851.

The Sardinian Milanese, situated to the W of the Austrian Milanese, and separated from it by the Ticino, contains about 3,300 sq. m., and was formerly divided into the provinces or districts of Alessandria, Lomellina, Tortona, Voghera, Bobbio, Siccomario, Vigevanasco, Novara, and Sesia; but it is no longer recognised in the administrative divisions of the Sardinian states.

The Austrian M. forms one of the finest regions in Europe, the far greater part of its surface consisting of fertile valleys and luxuriant plains. The northern part is mountainous, the southern part is flat. The northern part, backed by the Rhetian Alps and their ramifications, forms an immense ladder of snowy mountains to the height of 13,200 ft. above the level of the Adriatic; their southernmost steps, more than 3,200 ft. in height, reach nearly to Varese, Como, Lecco, Bergamo, Iseo, Brescia, and Salo. The mountains finish insensibly in hills. The most prominent hills stretch along the Lambro, almost to Monza, and along the lake of Garda to Castiglione. In the midst of this labyrinth of mountains many valleys are shut in, some of which are very deep, and contain extensive lakes. The principal of these are Lake Maggiore, and the lakes of Lugano, of Como, of Iseo, and of Garda. About 20 other smaller lakes are spread here and there; a group of 5 lakes near Varese; a group of 5 near Erba. The smaller lakes are not adapted for commerce. From the glaciers, from the valleys, and from the lakes, descend in almost parallel lines from NW to SE the rivers Ticino, Olona, Lambro, Adda, Brembo, Serio, Ollio, Mello, Elisio, and Mincio; these all fall into the Po. The southern part is uniformly inclined towards the S, but with a slight declivity towards the E, taking the course of the Po. The most elevated point of the plain is the NW angle, where the Ticino issues from Lake Maggiore; the lowest point is the SE angle, where the Mincio enters the Po. The flat country is wider towards the W along the Ticino, viz. about 40 Italian m. from Lake Maggiore to the Po; and is more narrow towards the E, along the Mincio, which extends above 20 m. The higher part of the flat country is generally dry, the lower part is irrigated. This physical conformation of the country establishes five regions, viz., 1. The Mountainous; 2. The Littoral or the *Riviera;* 3. The Hilly; 4. The High flat country; 5. The Low flat country. [*Bowring.*] For further physical and statistical details see article Lombardo-Venetian Kingdom.

The country between Cremona and Lodi comprises the richest part of the Milanese. It is here that the system of artificial irrigation is pursued with the greatest skill and success. In this fertile plain, a farm of 60 English acres is considered as a large one. These farms are subdivided into fields of 2 or 3 acres, for the convenience of irrigation,—a practice which, in the course of a few years, impairs the quality of the grass to such a degree that it becomes necessary to discontinue it. In this case the sluices are shut; the ground is ploughed in autumn; and in the following spring sown with hemp, which shoots up a great height; when this is pulled, the ground is sown with leguminous plants. In the next spring it is sown with oats, which grow to the height of 6 or 7 ft. The richness of the soil being thus sufficiently subdued, it is next cropped with wheat. Maize is then sown in the following spring; and a second crop of wheat succeeds, and finishes the course of cropping; the ground is then left to itself, and is immediately covered with herbage. During winter it is manured, and the new meadow is then subjected again to the process of irrigation, which is usually continued for 15 years. Thus the rotation in the Milanese extends to 20 years, viz., 5 years for the growth of hemp, pulse, and grain; and 15 for the growth of grass. Rice is also grown in some parts of the Milanese; but as it partakes of the nature of an aquatic plant—for the rice-grounds are kept under water during nearly the whole period of its growth, and in the Milanese it is held that land under rice absorbs every 24 hours a stratum of water having a depth of nearly half-an-inch—its cultivation has been placed under considerable restriction by the government, owing to the *malaria* which it engenders. The gross annual returns from the Milanese irrigated meadows is about £7 8s. per acre, and the rent is about one-fourth of the gross return. The irrigation of an acre of meadow requires, under average circumstances, the continued discharge of 18½ cubic inches of water. A cubic foot of water per second will thus suffice for the irrigation of 93 acres. In Upper Lombardy, the farms are small, and are delivered over to the cultivator stocked, the produce being divided between the landlord and the tenant; but the great irrigated farms of Lower Lombardy are for the most part let at money-rents.

MILAN, or MILANO, in German MEILAND, a large and fine city, the capital of the Austrian Lombardo-Venetian kingdom, situated on the small river Olona, in a beautiful plain, between the Ticino and the Adda, in N lat. 45° 28′ 1″, E long. 9° 11′ 20″, at an alt. of 498 ft. above sea-level. Its form is compact, and nearly circular. The circumf. of the closely-peopled part is nearly 5 m.; that of the outer wall is not less than 10 m. The latter includes not only the suburbs, but a number of gardens and orchards. It has a double avenue of trees around it, one within and the other without the walls. The compact part of the city is surrounded by a canal from the Olona. M. is an old city, and is built without much regard to regularity. The streets are in general narrow and winding; but some are tolerably broad, and are paved with two rows of large flag-stones, at the distance of 3 ft. from each other, for the wheels of carriages to roll over. The private houses, without having great pretensions to elegance of architecture, are tolerably built, and generally from 3 to 5 stories in height. In point of sumptuous family mansions, M. is inferior not only to Rome and Genoa, but to Florence. Its principal mansions are the *casi*—as mansions elsewhere in Italy styled *palazzi* are here called—of Durini, Serbilloni, Litta, Greppi, Belgiojosa, Tirelli, Visconti, Cicogna, and Calderara. The palace of the viceroy has a front about three times the length of Whitehall chapel, but less ornamented. The principal entrance to the city is from the NW, by a spacious esplanade in the middle of which stands the Gothic castle of the ancient family of Visconti. This esplanade, called the Piazza-di-Castello, was ornamented by Prince Eugene Beauharnois, during his viceroyalty, with plantations, grass-plots, and gravel walks. A beautiful white marble gate, called the Arco-del-Pace, opens into the Place-des-Armes. The most frequented public walk is the Corso, which is perhaps not inferior to any in Europe, and the adjacent gardens near the E gate. The number of handsome carriages on the Corso, in the afternoon, produces a high idea of the opulence of the Milanese. The Champ-de-Mars is a square of about 2,000 ft., and including the forum and the amphitheatre, with an immense barracks, comprises about a sixth part of the city and suburbs. The fortifications, consisting of a bastioned wall and some other works, forming an irregular polygon, are by no means of sufficient strength to stand a siege. The citadel has indeed been lately strengthened; but it is strong relatively only to any insurrection in the city itself, which is in fact an open city, not defensible against an invading force.—Although M. can boast of few family mansions, its public edifices display all the richness and magnificence of Italian architecture. Of these, the first is the cathedral, one of the grandest and most imposing specimens of architecture extant. It is situated almost in the centre of the city, in the public square called the Piazza-del-Duomo. It was begun to be built in the 16th cent., but on so large a scale that it still remains in an unfinished state. Inferior only to St. Peter's at Rome, it equals in length and in breadth surpasses the cathedrals of Florence and St. Paul's; but in interior elevation it yields to both. Its double aisles, its clustered pillars, its lofty arches, the splendour of its white marble walls, and its numberless niches filled with figures of the same materials give it a novel and singularly majestic appearance. The length of the cathedral is 490 ft., its breadth 298 ft., its interior elevation under the dome 258 ft., and its exterior, that is to the summit of the tower, 400 ft. The length of the transept is 283 ft. 10 in.; the height of the nave, 151 ft. 11 in.; height to the top of the lantern, 247 ft. The façade is magnificent, and the three other sides are hardly inferior. The roof is covered with slabs of marble; and above the dome there rises an elegant tower or spire in the shape of an obelisk. All parts of the building are crowded with marble statues said to amount to the surprising number of 4,400. The interior is altogether in the Gothic or Saracenic taste, being supported by 52 pillars and adorned with fret-work, carvings, statues, and paintings. The pillars are above 90 ft. in height, though only 8 ft. in diam. The floor is formed of marble of different colours, disposed in various figures; but the smallness of the windows, and the paintings on the glass, give to the interior an air of gloom, which, though it tends to heighten the majestic solemnity of the whole, detracts from the beauty of the more minute parts. The view from the top of the church is extremely beautiful and extensive, including the whole of the city, part of the rich plains of Lombardy, and towards the N the first range of the Alps. Several of the other churches, which are 24 in number, though far inferior to the cathedral, are worth attention both for their architecture, and the statues and paintings of celelebrated masters which decorate their interior. The church of Laurentius has a colonnade of the Corinthian order in Paros marble. In a building attached to the church of Santa-Maria-delle-Grazie is the celebrated fresco painting of the Last Supper, executed by Leonardo da Vinci. about the year 1490.

The venerable basilica of St. Ambrose is the most interesting church in M. Its wide pronaos, its mosaics of the 9th cent., the tombs of Louis II., who died in 875, and of the archb. Anspert, his contemporary, contrast singularly with its splendid chapels of later ages. The hospitals and charitable institutions of M. are numerous, and amount in all to about 30. The Ospedale Maggiore, or great hospital, is an immense edifice, 880 ft. in length, and 360 ft. in depth, capable of containing 1,200 patients, besides working convalescents. The great foundling-hospital receives about 4,000 children. The lazaretto, outside of the city, is likewise on a vast scale, enclosing 30 acres, but is opened only in the case of an epidemic disease. Of theatres there are in M. no less than 8 or 9; most of them are small, but that called the Scala rivals in size and magnificence the famous theatre of Naples, containing 240 boxes in 6 tiers, and capable of accommodating from 800 to 1,000 in the pit. M., says Von Raumer, "stands in a sea of green trees, as Venice in a sea of green waters. Everything in M. reminds one that it is a great central point of wealth and activity." M., says Ripamenti, reckoned at one time 300,000 inhabitants. Morigia says that in 1590 it contained 264,000; and it contained 200,000 immediately before the great pestilence of 1630. The pop. of M. was estimated in 1837 at 145,500, and including the suburbs, at 171,268; in 1846 it was 161,966, inclusive of a garrison of 8,000 men, and 17,000 casual residents. The upper ranks have been described as having the air of something between the French and the English,—more grave than the former, more lively than the latter. Though there is not much appearance of poverty in the pop. of M., there is less of overgrown wealth.

M. is the seat of government for Austrian Italy, and of the court-of-appeal and high criminal court of Lombardy. It is an archbishop's see, and has 2 lyceums, 6 gymnasia, a royal college, an archiepiscopal seminary, several normal schools, a college of medicine, a polytechnic school, a musical conservatory, and a tribunal of commerce. The public library, in the Casi-di-Brera, the Louvre of M., has 100,000 vols.; and the Ambrosian library, founded by Cardinal Borromeo, possesses 60,000 vols., and 10,000 manuscripts, amongst which are numerous acquisitions from the monastery of Bobbio in the Apennines, founded in the 7th cent. The books in this latter library are ranged along the sides of one vast hall, without any titles or indications of the contents. There are also a museum of natural history, a botanical garden, and an observatory. M. seems to be now the most literary town of Italy, if we may judge from the number of works which issue from its presses.

Manufactures and commerce.] The principal manufactures, next to those of silk, are chemical substances, jewellery, mathematical instruments, gloves, and bronze works. It is the largest book-mart in Italy, and has numerous printing establishments and type-foundries. Its commerce in rice and in cheese is considerable; and it is the centre and most important mart of the Italian trade in silk. Not only are the transactions of the Lombardo-Venetian provs. united in this city, but a large portion of the neighbouring states either sell their silk produce in M., or remit it through M. to foreign countries; and this is the case not for raw silk alone, but also for organzine and tram. English houses especially frequently make their advances at M. to the consigners of silk. Bergamo alone has from time immemorial carried on her foreign commerce, and especially that with Great Britain, by direct correspondence, without the intervention of M. This city and its neighbourhood are also the principal district for the preparation and throwing of raw silk. M. has many establishments for fabricating rich silk stuffs, which are encouraged by alternate yearly exhibitions at M. and Venice.—M. is being connected by railway with Vienna; it has also a railway to Monza and Como, 28 m. in length. It communicates with the Po by two canals,—that of the Ticino, begun in 1179, and that of the Adda, finished in 1457; and the routes of Stelvio, Spluga, the Novaresse, the Simplon, and Saint-Gothard, all facilitate its communication with different parts of Europe.

Meteorology.] The following table exhibits the general results of a series of meteorological observations made at M. in 1845 by the Abate Giov. Capelli:

	Barometer. Max.	Min.	Reaumur's therm. Max.	Min.	Fall of rain.
January, .	28°·0	26°·10	10°·17	—3°·17	207·06 mil.
February, .	27·9	26·10	8·02	—4·83	65·82
March, .	28·2	26·11	15·72	—0·63	124·03
April, .	28·1	26·9	19·96	2·53	33·50
May, .	27·9	27·1	22·24	3·98	131·39
June, .	27·10	27·3	24·97	9·77	147·30

December, .	27·11	27·8	11·1	—82·90	80·90

History.] M. is one of those very ancient cities which, though it has not escaped the devastations and the ravages of all-consuming Time, has yet survived them, and preserved to modern times some vestiges of its former glory. It was founded by the Insubrian Gauls about 584 B. C., and gradually rose into such importance as to become the cap. of a considerable territory, which had strength sufficient to keep a Roman army in check, and to require the united efforts of two Roman consuls to reduce it. It was called *Mediolanum* by its new masters; and flourished for several ages under the protecting shade of the Mistress of the world. The stern Attila visited it in his fury, and butchered its inhabitants. It next fell a prey to the Goths, who, under Vitiges, delivered it up to flames and devastation. It suffered a similar fate from the Lombards, who took and sacked it. Charlemagne in some measure restored it to its ancient splendour. In 1162 it felt the vengeance of Frederick Barbarossa, who razed it to the ground, and sowed it with salt to avenge an affront its insolent citizens had put upon his empress. But M. survived this tremendous visitation, and arose like another phœnix out of its ashes, even by the assistance of the prince whom it had affronted. The French took it in 1796; and at the close of the revolutionary war it became the cap. of the Cisalpine republic. The recent history of this city is traced in our article on the Lombardo-Venetian Kingdom.

MILAN, a township in Coos co., in New Hampshire, U. S., 118 m. N by E of Concord. Pop. 386.—Also a township in Dutchess co., in New York, 62 m. S of Albany. Pop. 1,725.—Also a township in Erie co., in Ohio, 103 m. N of Columbus, on the Huron river, 8 m. from Lake Erie. Pop. 1,531.—Also a township in Monroe co., in Michigan, 50 m. SW of Detroit.—Also a township in Calhoun co., in Illinois.

MILAZZO. See Melazzo.

MILBORNE-PORT, a town and parish in the co. of Somerset, 2¾ m. NE of Sherborne. Area of p. 3,150 acres. Pop. in 1801, 953; in 1831, 2,072; in 1841, 1,740. The town, which consists principally of detached houses, is situated at the bottom of a hill near the river Ivel, on the high road from Yeovil to Shaftsbury. Its principal manufactures are leather-dressing and glove-making. It formerly sent 2 members to parliament, but was disfranchised by the Reform act.

MILBOURNE-CHURCHSTONE, a parish in the co. of Dorset, 8 m. SW of Blandford-Forum. Area 3,320 acres. Pop. in 1831, 240; in 1841, 287.

MILBOURNE-STYLEHAM, a parish in the co. of Dorset, adjacent to the above. Pop. in 1841, 290.

MILBROOK, a chapelry in the p. of Maker, Cornwall, 4¾ m. S by W of Saltash. The inhabitants are mostly fishermen.

MILBURN, a township in the p. of Ponteland, Northumberland, 11 m. NW of Newcastle-upon-Tyne. Pop. in 1831, 101; in 1841, 79.

MILBURN AND MILBURN-GRANGE, a chapelry in the p. of Kirkby-Thore, Westmoreland, 6½ m. NW of Appleby. Pop. in 1841, 116.

MILBURY, a township in Worcester co., in Massachusetts, 6 m. SE of Worcester, on Blackstone river. Pop. 2,171.

MILCOMBE, a chapelry in the p. of Bloxham, Oxfordshire, 4 m. NW of Deddington. Area 1,380 acres. Pop. in 1831, 230; in 1841, 224.

MILDEN, a parish in Suffolk, 5 m. NW of Hadleigh, at the confluence of the river Bret. Area 1,430 acres. Pop. in 1831, 177; in 1841, 186.

MILDENHALL, a parish and market-town in Suffolk, 9 m. S by W of Brandon, on a branch of the Ouse, called the Lark, which is here navigable. Area of p. 13,710 acres. Pop. in 1801, 2,283; in 1831, 3,267; in 1841, 3,731. Part of this large parish is fen-land; the rest is upland, with a substratum of chalk. The town is one of the polling-places for the co., and a station on the Eastern Counties railway.—Also a parish in Wilts, 2 m. NE of Marlborough, on the river Kennet. Area 3,770 acres. Pop. in 1831, 427; in 1841, 437.

MILE-END, a parish within the liberty of the borough and 1 m. N of Colchester, in Essex. Pop. in 1831, 477; in 1841, 596.

MILE-END. See STEPNEY.

MILEHAM, a parish in Norfolk, 6 m. NW of East-Dereham. Area 3,110 acres. Pop. in 1831, 566; in 1841, 532.

MILES, a township in Centre co., Pennsylvania, U. S. Pop. 1,198.

MILESTOWN, a village in the p. of Kilsaran, co. Louth, a short distance S of Castle-Bellingham. Pop. in 1831, 108.

MILESTOWN, a village in Philadelphia co., in Pennsylvania, 104 m. E by S of Harrisburg.

MILETO, a town of Naples, in Calabria-Ultra 2da, 47 m. NNE of Reggio. Pop. 1,250. It was almost entirely destroyed by an earthquake in 1783.

MILFORD, a parish in Southamptonshire, 3 m. SW by S of Lymington, including the tythings of Efford, Keyhaven, and Pennington. Area 4,430 acres. Pop. in 1801, 1,012; in 1831, 1,533; in 1841, 1,819.—Also a tything in the p. of Laverstoke, Wilts, ½ m. E of Salisbury. Pop. in 1831, 522; in 1841, 537.—Also a village in the p. of Duffield, Derbyshire, 2 m. S of Belper, on the river Derwent, over which a handsome bridge has been erected, and intersected by the Derby and North Midland railway, which here passes through a tunnel 836 yds. in length. Pop. 895. This place, not many years ago, consisted only of a few houses. Its increase in size and pop. is owing to the erection of large cotton-mills, and the establishment of extensive bleaching-works.

MILFORD, a township in Penobscot co., in the state of Maine, U. S., 82 m. NE of Augusta, on the E side of the Penobscot river. Pop. 474.—Also a township in Hillsboro' co., in New Hampshire, 33 m. S by W of Concord, intersected by Souhegen river. Pop. 1,455.—Also a township in Worcester co., in Massachusetts, 30 m. SW by W of Boston. Pop. 1,773.—Also a township in Newhaven co., in Connecticut, 45 m. SSW of Hartford, skirted by Housatonic river on the W, and Long Island sound on the S, and connected with Stratford by a bridge across the Housatonic. Pop. 2,455. It has a harbour admitting vessels of 200 tons.—Also a township in Otsego co., in New York, 13 m. S of Cooperstown. Pop. 2,095.—Also a v. in Hunterdon co., New Jersey, 39 m. NW of Trenton, on the E side of the Delaware.—Also the cap. of Pike co., in Pennsylvania, 162 m. NE by E of Harrisburg. Pop. 648.—Also a township in Bucks co., in Pennsylvania, 36 m. NW of Philadelphia. Pop. 2,193.—Also a township of Juniata co., in Pennsylvania. Pop. 1,824.—Also a township of Somerset co., in Pennsylvania, 7 m. SW of Somerset. Pop. 1,632.—Also a v. in Kent co., 95 m. S of Philadelphia. Pop. 2,356.—Also a v. in Clermont co., in Ohio, 112 m. SW of Columbus. Pop. 500.—Also a township in Butler co., in Ohio. Pop. 1,868.—Also a township in Knox co., in Ohio. Pop. 1,158.—Also a township in Oakland co., in Michigan, 41 m. NW of Detroit. Pop. 880.—Also a township in Williams co., in Ohio. Pop. 175.—Also a township in La Grange co., in Iowa. Pop. 298.

MILFORD. See MILLFORD.

MILFORD CENTRE, a village in Union co., in Ohio, U. S., 32 m. NW of Columbus. Pop. 201.—Also a v. in Otsego co., in New York.

MILFORD (SOUTH), a township in the p. of Sherburn, W. R. of Yorkshire, 4¾ m. NNE of Ferry-Bridge, crossed by the Selby and Leeds railway. Pop. in 1831, 719; in 1841, 751.

MILFORD-HAVEN, a sea-port in the p. of Stainton, co. of Pembroke, about 257 m. W of London, 40 m. WSW of Carmarthen, on the splendid bay or haven of the same name, and at a distance of 5 or 6 m. from the main sea. Pop. in 1841, 2,377; in 1851, 2,837.—The town is of modern origin, having been founded, in 1790, under an act of parliament obtained to enable Sir W. Hamilton to establish quays, docks, &c., with a market. It is situated on the N side of the haven, and is elegantly and uniformly built, consisting principally of three streets parallel to each other, and possessing a handsome church, market-house, custom-house, dock-yard, &c. A little to the E of the town is Pill, a village inhabited chiefly by sailors belonging to the port; and in the parish of Hubberstone, on the W side of the Pill or creek adjoining the town, is the town of Hakin, forming a small port, with shops for the supply of ship chandlery, &c., connected with M., and within its parliamentary boundaries. The growth of M. was checked, in 1814, by the removal of a government dock-yard establishment to Pembroke dock. The importance of the place, however, depending upon its great adaptation as a resort for shipping, which led not only to the establishment of a custom-house, to which Pembroke is subordinate, but of packet and quarantine establishments, and the convenience of its situation for vessels under particular circumstances of weather and destination being great, it has continued to sustain its position as a place of some importance; and a scheme for the construction of wet-docks and a floating-basin is now entertained. The haven, which is held to be one of the best and most capacious asylums for shipping in the British dominions, is formed by an advance of the sea inland for about 20 m. in length, from its mouth to Pembroke, and has the appearance of an immense lake with numerous creeks, roads, and bays. In this spacious harbour the shipping of the whole British empire, mercantile as well as naval, might ride together in perfect safety, and from the extraordinary height to which the tides rise, might proceed to sea with almost any wind. The protecting lands at the entrance are, St. Ann's head on the N, and Sheep island and Block-house point on the S side. The prevailing winds are from W to SW, from eight to nine months in the year, commencing generally in September; the remainder are from E to NE. The haven is subject to fogs when the wind is S of W and clear otherwise. The bottom, in mid channel, is mud and blue clay, and considered good anchorage. Opposite Nangle, from the great width, it is considered best for large ships,

as they have room to swing with a good length of cable; opposite M. the channel is equally deep but not so wide, but large ships anchor safely. The number of vessels that entered the port coastwise in 1850 was sailing vessels 571 = 17,507 tons, steamers 105 = 32,454 tons; the number which cleared coastwise was 1,228 sailing vessels = 37,889 tons; and 104 steamers = 32,374 tons. In the same year 15 vessels = 3,698 tons, entered from the colonies; and 14 British vessels = 2,303 tons, from foreign ports, and 5 foreign vessels = 1,582 tons. The registered shipping in the same year was 75 sailing vessels under 50 tons, and of a total tonnage of 2,110 tons; 67 vessels exceeding 50 tons, and of a total tonnage of 7,334 tons; 1 steamer of 48 tons, and 1 of 100 tons. The trade of the port, besides that produced by the supplying of ships with necessaries, consists chiefly in the export of stone-coal for drying malt, quantities of which are shipped for London, and for the different ports along the Bristol channel, and of limestone and culm, in which there has also been a tolerable coasting-trade. The port extends nearly from Laugharne to St. David's head. There are bonded warehouses for all foreign goods, except tobacco and East India goods. The gross receipts of customs-duty, during the last 8 or 10 years, have been singularly fluctuating. In 1835, they were valued at £11,989; in 1836, at only £4,073; in 1840, at £17,557; in 1850, at £3,038. The whale-fishing was at one time successfully carried on by a company of Quakers from Nantucket in North America. —Under the Reform act, M. is united with Pembroke, Tenby, and Wiston, in returning a member to parliament. The number of electors registered, in 1837, was 76. The pop. of the whole parl. burgh, in 1841, was 12,876; the number of electors 920. In 1851 the pop. was 16,700.—A railway has been projected from M. to Manchester, running through the heart of South Wales, from Carmarthen, through Llandilo and Builth, to Llanidloes, and thence to Crewe.

MILFORD HAVEN, a deep bay on the E coast of Nova Scotia, in Sydney co. It is a prolongation of Chedabucto bay.—Also a bay on the N coast of Virginia, in N lat. 37° 26′.—Also a bay on the W coast of the Middle island of New Zealand, in S lat. 44° 35′.

MILHAC-DE-MONTRON, a village of France, in the dep. of Dordogne, cant. and 4 m. SE of Saint-Pardoux-la-Riviere. Pop. 1,300.

MILHARS, a town of France, in the dep. of Tarn, at the confluence of the Serou and Aveyron, 13 m. N of Gaillac. Pop. 1,000.

MILHAU, or Millau, a town of France, in the dep. of Aveyron, on the r. bank of the Tarn, 12 m. NE of Saint-Affrique. Pop. in 1841, 9,014. It is a place of considerable trade, having manufactures of gloves, hats, and different kinds of leather, and conducting a brisk traffic in cheese and agricultural produce.—The arrond. of M. comprises an area of 199,531 hect., and is divided into 9 cants. Pop. in 1841, 64,015.

MILHAUD, a town of France, in the dep. of Gard, on the river Vistre, 9 m. SW of Nismes. Pop. 1,673. It has a trade in wine and brandy.

MILHR (El), a gulf of the Mediterranean, on the coast of Barcah, between the meridians of 25° and 26° E.

MILIANA, a small town of Algeria, 45 m. SSW of Algiers, on the S flank of the Little Atlas, near the r. bank of the Shellif.—Also a river of Tunis, which falls into the Mediterranean, 10 m. SE of Tunis.

MILIANOVITCHI, a village of Russia, in the gov. of Volhynia, 12 m. WSW of Kowel. Pop. 300.

MILIATIN, a town of Russia, in the gov. of Volhynia, 27 m. SSE of Vladimir.

MILIATY, a town of Russia, in the gov. and 48 m. N of Vilna.

MILICIA, a town of Sicily, in the prov. and 12 m. SE of Palermo, at the embouchure of a small river of the same name.

MILILLI, a town of Sicily, in the prov. and 15 m. NW of Syracuse, on the r. bank of the Cantara, and declivity of the Hyblæan mountains. Pop. 4,200. It is famous for its growth of sugar. A little to the SE of this town are the remains of the ancient *Hybla;* and honey of admirable quality is still abundantly produced in the neighbourhood.

MILIN, a village of Bohemia, in the circle and 24 m. S of Beraun.

MILIQUEAN CREEK, or Holland's River, a river of Canada, which runs NNE into the SW arm of Simcoe lake.

MILIS, a village of the island of Sardinia, 12 m. N of Oristano. Pop. 1,400. It is supposed to occupy the site of the ancient *Neapolis.* In its neighbourhood are extensive salines; and silk is produced in the vicinity, which is richly clothed with orange and mulberry groves. The greater part of the pop. is employed in the transport and sale of the produce of the orange and lemon groves, which are estimated to contain 300,000 full-grown trees, producing each from 4,000 to 5,000 fruit annually. Many of the trees are from 35 to 40 ft. high. The species grown here are the *arangiu agni* or *Citrus Bigaradia,* or bitter orange; the *Chinothe,* or Chinese orange; and the *sanguignee,* or blood-red orange; and the *arangiu de croju suttili,* resembling the Saint-Michael's. The fruit is sold at from 15 to 50 ctssi, or 1½d. to 4¾d. the dozen. The excellence of the fruit produced here is attributable to nature rather than to any care or skill bestowed on its cultivation. The only artificial production of the village is a kind of sack or pannier, and plain flat mats, made of the reeds which skirt the river Baudesias.

MILITAR-GRANZE, or The Military Frontier, an administrative division of the Austrian empire, which has its name from its situation on the frontiers on the SE side of the empire, and from its military constitution. The name first occurs in the 16th cent. when King Ferdinand granted lands to a number of Turkish emigrants on the boundaries of Croatia, taking them bound in return to defend these limits. The complete formation, however, of the frontiers of Carlstadt, Warasdin, and the Banat, took place in the course of the 17th cent.; the Slavonian frontier was formed in 1702; and that of Transylvania between 1764 and 1766. These different boundaries run in an uninterrupted chain along the Turkish frontier from the Adriatic to Galicia, and surround the provinces of Croatia, Slavonia, Hungary, and Transylvania. They are themselves bounded by the canal of Morlach, and Illyria, Croatia, Hungary, Transylvania, Galicia, Moldavia, Wallachia, parts of Romelia and Bosnia, and Dalmatia. The superficial extent of the whole is 609·32 German sq. m.; and the pop. in 1850, 1,009,109: viz.

Physical features.] The principal mountains on the different frontiers are the Carpathians on the Transylvanian frontier; the mountains of the Banat, which divide Transylvania and Wallachia from the frontier of the Banat, and in which occurs the cave of Piatra Kupeseguli, or the cave of Veterani; the Upper and Under Clissura, a chain which runs from the Carpathians to the Danube; the Julian Alps; and the Carnian Alps belonging to the chains running between the Save and the Drave. The higher ridges of the Military frontier lie partly on the E and partly on the W, leaving the plains of Slavonia in the middle between them. A small part of the frontiers borders upon the Adriatic; and in this dist. occur several streams, such as are found in steppes, which seem to sink into the ground and probably reach the sea by subterranean channels. Lakes are found in the district of Carlstadt only: the most remarkable are the eight lakes of Plittwitz and a lake formed by the Gacska. In the lower districts of the Slavonian and western frontier of the Banat there are extensive morasses.

Soil, climate, and productions.] The soil is very various in quality. In the mountainous countries it is poor, and fit only for pasture; but on the Slavonian frontier, in the plains of Warasdin, and in the Banat, there is some excellent arable land. The calcareous soil along the coast is very barren, and there is a large district of land in the Banat of which one-third is quicksand unsusceptible of any culture.—The climate is also very different in different districts. On the SW, the cold dry *borra*, and the warm and damp but violent *zugo*, reign alternately; while on the coast the fierce *tramontane*, so much dreaded by sailors, ploughs up the ocean. Under the united influence of these three destructive winds all vegetation dies away. In the NE the air is still colder. In the immediate neighbourhood of the mountains, however, the climate is milder; and in the valleys of the SW there is an Italian and Grecian sky. The plains in the Banat and in Slavonia have the most equable and warm climate, but are not healthy on account of the number of marshes.—The productions of the Military frontiers are horses of Hungarian breed, cattle, sheep, goats, swine, and game. The Julian Alps and the Carpathians are inhabited by wolves. Corn, Turkish corn, melons, cucumbers, fruit, wine, wood, tobacco, madder, and liquorice, are among the vegetable productions; and agriculture is the exclusive employment of the inhabitants. The commerce of the Military frontiers is merged in that of Transylvania and Hungary. The exportations consist in the productions of the country.

Population, &c.] Except on the Transylvanian frontier, the Slavonians form by far the largest proportion of the inhabitants. They are reckoned to amount to above 800,000. There are also 122,000 Wlaches, and 80,000 Magyars and Szeckhelyi; and about 1,500 Greeks, Jews, and Gipsies. German is the official language, and that of the higher classes of society, though the pop. of German race does not exceed 12,000. The members of the Greek church amount to 500,000; those of the Catholic to 400,000; the United Greeks exceed 44,000, and the Protestants and Unitarians amount to 40,000. The inhabitants of the frontiers are much behind those of the other Hungarian states in education, though government has done a good deal of late for the establishment of schools.

Government, &c.] There is no nobility nor any privileged class among the inhabitants of the frontiers, though they form a complete military state, having many points of resemblance to the feudal constitutions of the middle ages. The frontier government was originally created to protect the empire of which it forms a part, against the invasion of barbarians; and in later times as a *cordon sanitaire* against the plague. All landed property in this district belongs exclusively to the government, but is held by a kind of military fief on condition of military service in peace and war. Only such boys as are not fit for military service are allowed to engage in any other occupation than that of bearing arms; those who are to follow a learned profession, or to enter the church, are likewise specially selected by the authorities. Each country—of which there are in all 14—constitutes within itself a compact community, though all are held together by the bond of a general responsibility to the Crown and its representatives. "The inhabitants of a frontier country are all, more or less, agriculturists, that is to say, every family obtains a holding under the Crown, and makes the most of it. Each household, moreover, grows its own wool, weaves its own cloth, and makes its own wearing apparel; while for the holding which produces the materials of all these, rent is paid in labour. The men, besides the military service which is exacted from them, cultivate, in addition to their own farms, both the officers' portions and those which the government keeps in its own hands. From the latter toil they may indeed purchase an exemption, provided they contrive, by any means, to obtain the command of money; but as this seldom, if ever, happens to be the case, the privilege is rather nominal than real. Moreover, there are public works, such as the making of roads, the building of forts and magazines, and the construction and repair of the officers' lodgings, in which, when required, they must busy themselves; the time which they spend in these being carried to the credit side of their account with the government. Such is the kind of rent which each man pays for his farm, and which is regularly computed for him by a public accountant. According to the extent and value of his holding, he owes to the government a certain quantity of labour, or else a certain amount of money, for which the produce of that labour is assumed to be an equivalent. It is not, however, by the works of his hands alone, during a given number of days in the year, that the borderer purchases his right to till his own fields, and gather in their produce. The law imposes upon every male, so long as he is capable of bearing arms, the liability to serve as a soldier. Even in times of peace, each county is required to keep on foot 2 battalions of 1,200 men a-piece; while in times of war the levy is increased to 4 battalions. But this is not all. Should an exigency arise, the emperor has the right of ordering out the entire male population. In this case, all between the ages of 18 and 36 are absolutely at the disposal of the state; all above 18 and below it, from the age of 12, must arm to defend their own fire-sides. Hence, if the active battalions, as they are called, were marched away, *en masse*, into Italy or elsewhere, the frontier duty would still be carried on by old men and boys. When the system was first invented,—and to Prince Eugene belongs the merit of devising it,—there was perpetual war, or the hazard of war, between Austria and Turkey. For many years afterwards that danger continued, and down to the present moment the borderers on both sides are pretty much in the state of our own moss-troopers under the last of the

Tudors." [*Gleig.*] The only tax is a very moderate land and trade-tax. The superior council of war at Vienna is the highest authority in the Military frontiers; but a governor or commander-in-chief has his head-quarters at Peterwardein. The different governments into which they are divided, manage the military, political, and law business, under the direction of this council. "No one," says Kohl, "who has ever had an opportunity of comparing the state of civilization in the contiguous districts of Hungary and Turkey, can doubt what vast benefit this institution has conferred on the inhabitants of the countries immediately within its influence. In the first place the security of the inhabitants is placed upon a firmer footing than in the neighbouring districts of Hungary, to say nothing of Turkey. Within the Military frontier very few robberies take place, and the traveller is as safe as in a German province. To secure life and property ought to be the first consideration of rational civilization. The second is the security of judicial rights, and in this respect also the Military frontier has an immense advantage over the neighbouring countries. A great deal has also been effected for the morality and social order of the inhabitants. Their temperance, domestic peace, and the punctual fulfilment of their duties is subjected to a wholesome surveillance, but which must by no means be supposed to degenerate into a tyrannical and inquisitorial spirit of meddling. The highest as well as the lowest are restrained by military and moral regulations, of which they feel the salutary influence, and I myself, in the sequel, met with many Hungarian peasants who had taken refuge in the Military frontier from the tyranny and severity of their masters, and who assured me that they were far better off in their new homes than they had ever been before. The frontier is, therefore, peopled from two sources, from Turkey and Hungary, by fugitives from oppression, who seek a refuge, in the order, security, and peace established in the frontier districts."

Military force.] The Military frontiers form 17 infantry regiments, and 1 of hussars. Each of the infantry regiments contains from 2,800 to 3,600 men; and the regiment of hussars about 869. Besides these there are 4 companies of Tschaikists, for the service of the flotillas on the Danube and Theiss. The regular fortified places, such as Semlin, Brod, and Alt-Gradisca, are occupied by garrisons from the regular army.

Topography.] There are four divisions of the Military frontiers, containing in all 11 towns, 24 boroughs, 4 fortresses, and 1,995 villages.—The Croatian Frontier forms the western part, and stretches between Illyria, the prov. of Croatia, the prov. of Slavonia, the Slavonian frontier, Bosnia, Dalmatia, and the Adriatic. Its surface, according to Blumenbach is 288·10 German sq. m., according to Liechtenstern 278·07. Zeng, a maritime town on the Adriatic, is one of its chief towns.

The Slavonian Frontier borders on the N and NE upon the prov. of Slavonia; on the E upon Hungary; on the S upon the Turkish empire; and on the W on the frontier of the Banat. The surface, according to Liechenstern, is 135·15 German sq. m. Semlin, between the Save and the Danube, is the seat of a Greek protopope, and its chief town. Karlowitz, on the Danube, is the seat of the Greek archb. and metropolitan. Peterwardein, a town and fortress on the Danube, and one of the strongest frontier-places, is 50 m. NW of Belgrade.—The Tschaikists inhabit an angular district of this frontier, bounded by the Danube and the Theiss, and extending to about 330 British sq. m.

The Frontier of the Banat, or The Hungarian Frontier, lies on the E and S part of the former Banat, and borders on the NW and N upon Hungary; on the E upon Wallachia and Transylvania; and on the SW on the Slavonian frontier. The surface is, according to Liechtenstern, 145·20 German sq. m. Its chief town is Pancsova which conducts an animated commerce with Turkey. Mehadia, a village on the Krajova, has celebrated hot baths.

The Transylvanian Frontier runs all around Transylvania, where that country borders upon Turkey; and is so blended with Transylvania itself that the actual extent is not easily determined. Liechtenstern calculates it at 253·30 German sq. m. The town of Kezdi-Vasarhely, in this division, possesses some commerce.

MILITELLO, a town of Sicily, in the prov. and 24 m. SW of Catania, district and 17 m. E of Catalagirone. Pop. 7,200.

MILITELLO-DI-PATTI, a town of Sicily, in the prov. and 60 m. WSW of Messina, district and 17 m. WSW of Patti. Pop. 3,500.

MILITSCH, or Mielicz, a kreis or circle and town of Prussia, in the prov. of Silesia, reg. and 33 m. NNE of Breslau, and 24 m. WSW of Ostrowo, on the Bartsch. Pop. 2,100. It is enclosed by walls, and contains 3 Catholic churches, an hospital, and a fine castle belonging to the counts of Mallzahu. It has manufactories of linen, leather, and shoes. Area of circle 141 sq. m. Pop. 38,318.

MILIZAC, a commune of France, in the dep. of Finistere, cant. and 8 m. WSW of Plabennec, and 8 m. NW of Brest. Pop. 1,552.

MILK, a rivulet of Annandale, Dumfries-shire, which joins the Annan a ½ m. above Hoddam-castle.

MILK, a river which has its source in British N. America, in the district of Saskawatchan; flows thence into the Sioux territory, U. S.; and joins the Missouri, on the l. bank, in N lat. 47° 50′, W long. 105° 15′, and about 100 m. above the confluence of Yellow Stone river. It derives its name from the whiteness of its waters.

MILKAU, a village of Saxony, in the circle of Leipsig, SE of Rochlitz. Pop. 227.

MILK COVE, a creek in co. Cork, about a mile W of Ross harbour.

MILK HAVEN, a creek in the p. of Ahamplish, 1¾ m. NE by N of Grange, co. Sligo.

MILKHOUSE STREET, a hamlet in the p. and 1¼ m. NE of Cranbrook, co. of Kent.

MILKOW, a river of Moldavia, which joins the Sereth on the confines of Wallachia.

MILL, a group of islands, five in number, in the NE part of Hudson's bay, towards the W entrance of the strait of that name, and to the E of Southampton island, in N lat. 64° 20′, W long. 88° 40′.

MILL, a township of Tuscarawas co., in the state of Ohio, U. S. Pop. in 1840, 1,225.

MILLAC, or Milhac-de-Nontron, a commune of France, in the dep. of the Dordogne, and cant. of Saint-Pardoux, 9 m. E of Nontron. Pop. 1,628. It has manufactories of earthenware, pipes, &c., and contains mines of manganese.

MILLA-DU-MADU, an atollon or group of islands in the N part of the Maldive archipelago, Indian ocean, between the group of the Tilla-dumatte on the N, and that of the Phaidi-Pholo on the S, in N lat. 6° 10′, E long. 73° 20′. The principal island, Mafer or Mahfaru, lies in the SE part of the group, in N lat. 5° 50′, E long. 73° 32′.

MILLAN (San), a chain of mountains in Spain, in Old Castile, in the E part of the prov. of Burgos. It joins on the NW the Sierra-de-Oca, and on the SE that of San Lorenzo, and makes part of the great Iberian chain.

MILLANA, a town of Spain, in New Castile, in

the prov. of Guadalajara, and partido of Sacedon, 14 m. WNW of Piego. Pop. 640.

MILLANÇAY, a village of France, in the dep. of the Loir-et-Cher, cant. and 7 m. NNE of Romoranton. Pop. 600. It contains the remains of a fortress, supposed to have been of the era of Julius Cæsar.

MILLAND, a chapelry in the p. of Trotton, Sussex, 6 m. NW of Midhurst.

MILLAN-DE-LOS-CABALLEROS (San), a town of Spain, in the prov. and 23 m. S of Leon, partido and 3 m. WSW of Valencia-de-Don-Juan, in a fertile plain. Pop. 207.

MILLAN-DE-LA-COGULLA (San), a town of Spain, in Old Castile, in the prov. and 25 m. SW of Logrono, and partido of Najera, in a valley of the same name. Pop. 1,692. It has a parish-church, a custom-house, and a celebrated Benedictine abbey.

MILLAN-DE-LARA (San), a town of Spain, in Old Castile, in the prov. and 22 m. SE of Burgos, and partido of Salas-de-los-Infantes, in a cold and mountainous locality. Pop. 327.

MILLAN-DE-YECORA (San), a town of Spain, in Old Castile, in the prov. and 42 m. W of Logrono, partido and 17 m. NW of San-Domingo-de-la-Calzada. Pop. 200.

MILLANES, a town of Spain, in Estremadura, in the prov. and 54 m. ENE of Caceres, and partido of Navalmoral-de-la-Mata. Pop. 248.

MILLAS, a canton, commune, and town of France, in the dep. of the Eastern Pyrenees, and arrond. of Perpignan. The cant. comprises 8 coms. Pop. in 1831, 9,241; in 1841, 10,077. The town is 11 m. W of Perpignan, on the r. bank of the Tet. Pop. in 1841, 2,095.

MILLAU. See Milhau.

MILLBROOK, a parish in the co. of Southampton, 2 m. WNW of Southampton, at the mouth of the Anton or Test river. Area 2,900 acres. Pop. in 1831, 2,735; in 1841, 1,819.—Also a parish of Bedfordshire, 1¾ m. W by N of Ampthill. Area 1,450 acres. Pop. in 1831, 602; in 1841, 462.—Also a hamlet in the p. of Loughcrew, co. Meath, 1¼ m. S by W of Oldcastle. Pop. in 1831, 50.—Also a hamlet in the p. of Aughnish, co. Donegal.—Also a manufacturing village on the E border of the p. of Kilwaughter, co. Antrim, 2 m. W of Larne.

MILLBROOK, a central village in the township of Cavan, Upper Canada. Pop. 250.—Also a village of Clinton township, Wayne co., in the state of Ohio, U. S., 98 m. NE of Columbus. Pop. in 1840, 150.

MILL-CREEK, a village in the township of Ernestown, Upper Canada, 13 m. W of Kingstown. Pop. 150.—Also a township in Erie co., in the state of Pennsylvania, U. S. Pop. 2,682.—Also a township in Coshocton co., in Ohio, 93 m. NE of Columbus. Pop. 907.—Also a township in Hamilton co., in Ohio. Pop. 6,249.—Also a township in Union co., in Ohio. Pop. 523.

MILLE, a commune of Belgium, in the prov. of Brabant, and dep. of Hamme-Mille. Pop. 250.—Also an island of the N. Pacific, in the group of the Radack islands, Mulgrave archipelago.

MILLEDGEVILLE, the capital of Baldwin co., and of the state of Georgia, U. S., situated on the W bank of the Oconee, at the junction of Fishing creek, and at the head of steam-boat navigation, in N lat. 33° 7′ 20″, W long. 83° 09′ 45″, 58 m. W of Savannah. Pop. in 1840, 2,095. The state-house is a handsome Gothic building. In the vicinity is Oglethorpe college, founded in 1836.

MILLENAGH, a parish of co. Wexford, on the road from Wexford to Dublin. Area 4,189 acres. Pop. in 1831, 1,201; in 1841, 1,342.

MILL-EN-SAINT-HUBERT, a village of Holland, in the prov. of N. Brabant, 7 m. SE of Grave. Pop. 1,990.

MILLER, a central county of Missouri, U. S., watered by the Osage. Area 555 sq. m. Pop. in 1840, 2,282; in 1850, 3,834. Its cap. is Tuscumbia.—Also a township in Dearborn co., in Iowa. Pop. 1,209.—Also a township in Knox co., in Ohio. Pop. 977.

MILLE-ROCHES, a village of Upper Canada, in the township of Cornwall, about 5 m. from the town of Cornwall.

MILLER'S BAY, a bay on the S coast of Jamaica, a little to the N of Portland point.

MILLER'S RIVER, a river of Massachusetts, U. S., which flows WSW into the Connecticut, between Northfield and Montague.

MILLERSBURG, a township in Dauphin co., in Pennsylvania, U. S., 31 m. N of Harrisburg, on the E bank of the Susquehanna. — Also the cap. of Holmes co., in Ohio, 87 m. NE of Columbus. Pop. 600.

MILLERSTOWN, a village in Perry co., in Pennsylvania, U. S., 30 m. NW of Harrisburg.—Also a village in Champaign co., in Ohio.

MILLERY, a town of France, in the dep. of the Rhone, 7 m. SSW of Lyons. Pop. 1,525.—Also a village of France, in the dep. of Meurthe, cant. and 7 m. SSE of Pont-a-Mousson, on the r. bank of the Moselle. Pop. 390.

MILLESIMO, a town of the Sardinian states, in the duchy of Montferrat, on the r. bank of the Bormida, 30 m. W of Genoa. Pop. 1,300. It is remarkable for the obstinate and sanguinary actions of 13th and 14th April 1796, by which, and that of Montenotte, Bonaparte began his military career, and opened a passage into Lombardy.

MILLFIELD, a township in the p. of Kirk-Newton, in Northumberland, 5 m. NW of Wooler. Pop. 225.

MILLFIELD, a village of Athens co., in the state of Ohio, U. S., 73 m. SE of Columbus, on Sunday creek. There are salt-works in its vicinity.

MILLFORD. See Milford.

MILLFORD, a village in the p. of Cloydagh, 2½ m. N of Leighlin-Bridge, on the river Barrow, the seat of large flour-mills.—Also a village in the p. of Tullyferne, 4 m. NNW of Ramelton, near the head of Mulroy bay.—Also a village in the p. of Kilbolane, co. Cork, 5 m. SW of Charleville. Pop. 310.

MILLFORD, a village in Lewis co., in Missouri, U. S., 164 m. N by E of Jefferson.

MILL-GROVE, a village in Cobb co., in Georgia, U. S., 114 m. NW of Milledgeville.—Also a v. in Warren co., in Ohio, 90 m. SW of Columbus.—Also a v. in Owen co., in Iowa.

MILLHALL, a village in Clinton co., in Pennsylvania, U. S., 104 m. NNW of Harrisburg.

MILLHEIM, a village in Centre co., in Pennsylvania, 88 m. NW of Harrisburg.

MILLHEUGH, a village of Lanarkshire, in the p. of Dalserf, on the road from Glasgow to Carlisle.

MILLHOUSE, a manufacturing village of Forfarshire, 3 m. N of Dundee.

MILLI, a village in the Punjab, in N lat. 31° 59′, within about 9 m. of the Jelum river.

MILLIE'RES, a village of France, in the dep. of La Manche, cant. of Lissay, 10 m. N of Coutances.

MILLINGEN, a town of the Prussian prov. of Cleves-Berg, 11 m. E of Cleves. Pop. 1,200.

MILLINGTON, a parish in the E. R. of Yorkshire, 3 m. NNE of Pocklington. Area 2,750 acres. Pop. in 1841, 255.—Also a township in the p. of Rosthern, in Cheshire, 5 m. NW of Nether Knutsford. Pop. 312.

MILLINGTON, a village in Franklin co., in Massachusetts, U. S., 70 m. W by N of Boston.—Also a

v. in Middlesex co., in Connecticut.—Also a v. in Somerset co., in New Jersey.—Also a v. in Kent co., in Maryland.

MILLIS. See MILIS.

MILL-ISLE, a village in the p. of Donaghadee, co. Down, 2¼ m. S of Donaghadee. Pop. 274.

MILLOM, or MIL-HULME, a village and parish of Cumberland, situated between the rivers Duddon and Esk, 12 m. SW by S of Ravenglass. Area of p. 32,780 acres. Pop. in 1831, 2,037; in 1841, 1,979.

MILLPORT, a neat village on the Greater Cumbray island, in the frith of Clyde, 5 m. SW of Largs, and 11 m. SE of Rothesay, with a small harbour having 14 ft. water at full tide. Pop. in 1840, 932.

MILL-PORT, a village in Chemung co., in New York, 199 m. WSW of Albany, on Catherine's creek. Pop. 450.—Also a v. in Potter co., in Pennsylvania.—Also a v. in Fayette co., in Alabama.

MILL'S POINT, a village in Hickman co., in Kentucky, U. S., 310 m. SW by W of Frankfort.

MILLSTADT, a town of Illyria, in the gov. of Laybach, 18 m. NW of Villach, on the N bank of a lake of the same name, which discharges its waters into the Drave.

MILLSTONE, a township of Somerset co., in New Jersey, U. S., 27 m. N of Trenton, on a stream of the same name, which flows into the Raritan.

MILLSTREET, a small market-town in the p. of Drishane, co. Cork, on a tributary of the Blackwater, 8¾ m. SW by S of Kanturk. Pop. in 1841, 2,162.

MILLTHORPE. See MILNTHORPE.

MILLTOWN, a village in the p. of St. Peter, co. Dublin, on the river Dodder, 2¼ m. SSE of Dublin castle. Pop. in 1831, 673; in 1841, 736.—Also a village in the p. of Kilmactalway, co. Dublin, 2¼ m. NE of Newcastle.—Also a village in the p. of Dingle, co. Kerry, on the shore of Dingle bay, ¾ m. W of Dingle. Pop. in 1831, 160; in 1841, 387.—Also a small market-town in the p. of Kilcoleman, co. Kerry, on the road from Killarney to Dingle, 7 m. S of Tralee. The Maine river passes a brief distance to the N. and occasionally brings up thus far vessels of 50 tons burthen. Veins of lead and copper ore have been partially worked in the neighbourhood.—Also a village in the p. of Tartaraghan, co. Armagh, on the shore of Lough Neagh, 1 m. SE of the mouth of the Blackwater. Pop. in 1841, 144.—Also a village in the p. of Addergoole, co. Galway, on the Clare river, 6½ m. NNW of Tuam.—Also a village in the p. of Garvaghy, co. Down, 3 m. SSE of Dromore.—Also a village in the p. of Donaghmore, ¾ m. SE of Ashbourne, co. Meath.—Also a village in the p. of Derryaghy, co. Antrim. Pop. in 1831, 107.—Also a village in the p. of Pass-of-Kilbride, co. Westmeath, 2¾ m. NE of Rochfort-Bridge. Pop. in 1841, 133.

MILLTOWN, a village in Putnam co., in New York, U. S., 100 m. S of Albany.—Also a village in Crawford co., Iowa.

MILLTOWN-MALBAY, a town in the p. of Kilfarboy, co. Clare, 1¼ m. E of the head of a cove of Malbay, and 6 m. SSW of Lehinch. It has become a favourite resort for summer sea-bathers, and is in a prosperous condition. Pop. in 1841, 1,295.

MILLVILLE, a township of Cumberland co., in New Jersey, U. S., 67 m. S by W of Trenton. Pop. 1,771.—Also a township of Butler co., in Ohio, 108 m. WSW of Columbus. Pop. 300.—Also a township of Columbia co., in Pennsylvania.—Also a township in Caldwell co. in Kentucky.—Also a village of Upper Canada, in the township of Darlington, 6 m. N of Bowmanville. Pop. 150.

MILLWAUKEE, a county and a rising town in the W part of the state of Wisconsin, U. S.—The co. is watered by a stream of the same name, which flows into Lake Michigan, and by the Manewakee, the Root, the Des Plaines, and the Fox rivers, and by several affluents of Rock river. It has an area of 800 sq. m.; and is skirted by Lake Michigan on the E. Its pop. in 1840 was 5,605; in 1850, 22,791.—The town is situated on both sides of the river of the same name, near its entrance into Lake Michigan, 83 m. E of Madison, in N lat. 43° 3′, W long. 87° 57′, 700 m. direct distance from Washington. It rises gradually from the banks of Lake Michigan to a considerable elevation. The river answers the double purpose of affording a safe harbour to the shipping, and of giving water-power for the numerous grain-mills which have been erected on its banks. The town is regularly laid off, with good wide streets, and attention is being paid to the paving and lighting. The old pine houses are rapidly giving place to others built of a light-coloured brick, which have a neat appearance, and immense numbers of new dwelling-houses and stores are in progress of erection. A few years ago it was the haunt of the red man; in May 1834, there was but one white person resident on its site; in 1838 its pop. was 700; in 1842, 2,700; in 1847, 14,000; in 1850, 20,026; and every year is rapidly adding to the number. While the navigation is open there is communication daily with New York, in 75 hours, a distance of about 1,100 m.: if the circuit of the lakes is made, the distance is increased to upwards of 1,500 m. There is electric telegraph communication between M. and New York, costing 2½ d. for a message not exceeding 20 words. The exportation of flour from M. in 1845 amounted to 7,500 barrels, and of wheat to 95,000 bushels. In 1850, the exportation of flour exceeded 200,000 barrels, and of wheat 1,150,000 bushels. The manufactures in 1849 were valued at 1,714,200 d., and included the product of foundries, carriages and waggons, leather, bricks, paper, tin, sheet-iron and copper, wooden ware, clothing, cabinet-ware, and a great variety of other articles. In addition to the above, there are 5 flouring-mills propelled by water-power, and 1 by steam, containing 17 run of stone, each run capable of turning out 80 to 100 barrels of flour per day, and consuming in all 7,000 bushels of wheat daily. The value of the imports at M. in 1849 was 3,828,650 d. Among these were 16,000 tons of merchandise, valued at 3,200,000 d.; 35,000 barrels of salt, at 43,750 d.; 17,500 tons of furniture, lumber, &c. The exports were valued at 2,098,469 d., consisting of flour and wheat, valued at 1,949,000 d.; 5,527 barrels of pork, at 44,216 d.; 810 tons of lead and shot, at 53,000 d.; 10,281 hides, at 23,132 d.; and sundry manufactured articles. The arrivals of vessels of all descriptions in 1848 were 1,376.

MILLWOOD, a township of Clerk co., in Virginia, U. S., 135 m. NNW of Richmond.—Also a township in Dooly co., in Georgia.—Also a township in Knox co., in Ohio.

MILLY, a town of France, in the dep. of Seine-et-Oise, on the Ecolle, 9 m. W of Fontainbleau. Pop. 2,078.—Also a town in the dep. of La Manche, 3 m. NE of St. Hilaire. Pop. 1,200.—Also a town in the dep. of the Oise, 6 m. NW of Beauvais. Pop. 1,150.

MILMANDA, a village of Spain, in the prov. and 18 m. SSW of Orense. Pop. 250.

MILMARCOS, a village of Spain, in the prov. and 21 m. SW of Calatayud. Pop. 800.

MILNA, a village and port of Dalmatia, in the circle and 12 m. S of Spalatro, on the W coast of the island of Brazza, in N lat. 43° 19′ 29″. Its harbour is deep and secure.

MILNATHORT, a large village in the p. of Orwell, in Kinross-shire, 14 m. S of Perth, and 1¾ m. NNE of Kinross. Pop. in 1831, 1,772; in

1841, 1,605, who are most employed in weaving cotton.

MILNGAVIE, a manufacturing village on Allander water, in the p. of New Kilpatrick, Stirlingshire, 4 m. S of Strathblane. Pop. 1,622. There are extensive calico-printing and cotton-spinning works and bleachfields here.

MILNROW, a chapelry in the p. of Rochdale, Lancashire, 2 m. SSE of Rochdale, in the line of the Rochdale canal, and the Leeds and Manchester railway. John Collier, better known by his assumed name of Tim Bobbin, author of poems in the Lancashire dialect, was schoolmaster of this v.

MILNTHORPE, a market-town in the p. of Heversham, Westmoreland, 7½ m. S by W of Kirkby-Kendal, on the small river Bala which falls into the channel of the Kent near this place. Pop. in 1801, 968; in 1841, 1,159. The town consists principally of one long and well-built street. It has several flour and paper-mills, and manufactories of sheetings, bed-ticks, and sacking; and is the only port in Westmoreland. Coasting-vessels ply from hence to Lancaster, Ulverston, Whitehaven, and Liverpool, but as they cannot approach the town, they unload their cargoes into carts at low-water, whence they are conveyed to some small storehouses built along the shore, or to their destination at once. The Preston and Carlisle railway has a station here.

MILO′, anciently *Melos*, an island of the Greek archipelago, in N lat. 36° 45′, E long. 24° 23′, 70 m. N of Crete, and 65 m. E of the coast of the Morea. It is 14 m. in length from E to W, 8 m. in breadth, and about 60 m. in circuit, and is penetrated on the N by a spacious bay, in which a large squadron may lie in deep water. Mount St. Elias, which is the highest part, rises to an alt. of 2,480 ft. above the level of the sea. Rocks of lava, and sulphureous hot springs, and other circumstances, denote the frequent influence of subterraneous fires; and Calamo, which is supposed to have been a volcano of great antiquity, still emits fetid sulphureous smoke from several spiracles on its summit. The springs, since the days of Hippocrates, have been thought efficacious in the cure of diseases. Porphyry, iron, gypsum, and fine alum, the latter substance obtained from a subterraneous gallery in which the therm. stands at 108°, are among the productions of this island. There are marshes on the shore filled by the sea-water in winter, which evaporates during the heat of summer and produces salt. The lower grounds are extremely fertile and well-cultivated. Grapes, figs, melons, and olives are abundant; also wheat, barley, leguminous plants, and cotton. The fruits are said to be the best in the archipelago, and the wine and honey of M. are esteemed excellent. Besides mules, black cattle, sheep, goats, and swine, game is very plentiful. Yet, notwithstanding these advantages, the insalubrity of the climate is so great as to threaten the island with depopulation. Little more than a century ago, the inhabitants were computed at 20,000; now they have dwindled down to only 1,500 according to Thiersch; by Richardson in 1818 to 500 families; and were it not from the resort of families from the Morea, allured by the fertility of the soil, it is believed that this island would speedily be without an inhabitant. The inhabitants chiefly follow pastoral pursuits; some are fishermen and pilots. The women are occupied in fabricating coarse stuffs and cotton stockings. Formerly, the hand-mills of M. were celebrated for the quality of their stone; and were exported to the Turkish continent, the Ionian islands, Italy, and Egypt. This island contains two towns,—Milo the capital, and Castro or Sifours. The inhabitants of the former, who, in the beginning of last cent., amounted to 5,000, are now reduced to about 200; and the town, which stands on the low ground at the head of the bay, but about 2 m. from the shore, is in ruins. Castro occupies the lofty peak of a mountain on one side of the entrance to the harbour, and its inhabitants often attain a very advanced age in this elevated situation. In 1700, Tournefort found 18 churches in M., and 13 monasteries, besides chapels, 2 bishops, and an ecclesiastical establishment corresponding to a numerous population. Some of the monasteries still subsist. The site of the ancient cap. is ascribed to an assemblage of ruins between the harbour and Castro, consisting of fragments of walls, some fine columns of granite, vaulted excavations lined with cement, and the remains of bricks and pottery. On the opposite side of a deep ravine, is a hill penetrated by an immense number of catacombs which are gained by a subterraneous flight of steps. The position of the ruins, their extent, the solidity of their walls, and the nature of the fragments, together with the number of catacombs, are supposed to indicate the previous existence of a flourishing city. — Near the NE extremity of the island is the rock of Kimoli or Argentiera, and to the NW lies Anti-Milo.

MILO, a township of Piscataquis co., in the state of Maine, U. S., 98 m. NNE of Augusta. Pop. 756. —Also a township of Yates co., in the state of New York, 193 m. W of Albany. Pop. 3,986.

MILOCHMORE, a bog 3½ m. NW of Newtown-Bellew, co. Galway. Area 1,218 acres; height above the level of high water in Galway bay 209 ft.

MILORADOVITCH ISLES, a group in the Dangerous archipelago, in about 16° 42′ S lat., and 145° 30′ W long., discovered by Bellinghausen in 1819.

MILOSLAV, a town of Prussian Poland, in the reg. and 29 m. SE of Posen. Pop. 1,590.

MILSON, a parish in Salop, 4 m. NE of Tenbury. Area 1,600 acres. Pop. in 1831, 156; in 1841, 160.

MILSTEAD, a parish in Kent, 7¾ m. SW of Feversham. Area 950 acres. Pop. in 1841, 229.

MILSTON AND BRIGMIS, a parish in Wilts, 2¾ m. N by E of Amesbury, on the river Avon. Area 1,480 acres. Pop. in 1831, 107; in 1841, 110. Joseph Addison was born at the parsonage-house here, in 1672, his father being then rector.

MILTENBERG, a town of Bavaria, 5 m. S of Amorbach, on the l. bank of the Maine. Pop. 2,700.

MILTON, a parish in Berks, 3 m. SW of Abingdon, crossed by the Great Western railway. Area 1,380 acres. Pop. in 1831, 413; in 1841, 466.—Also a parish in Cambridge, 3½ m. NE by N of Cambridge. Pop. in 1831, 377; in 1841, 452.—Also a hamlet in the p. of Adderbury-East, Oxfordshire, 2¾ m. NW of Deddington, on a branch of the Cherwell. Area 1,160 acres. Pop. in 1831, 205; in 1841, 168.—Also a chapelry in the p. of Shepton-under-Whichwood, Oxfordshire, 4 m. N by E of Burford. Area 2,130 acres. Pop. in 1831, 568; in 1841, 660.—Also a parish in the co. of Southampton, 5 m. E by N of Christ's-church. Area 4,560 acres. Pop. in 1831, 956; in 1841, 1,185.

MILTON, a fishing-village in the p. of St. Cyrus, Kincardineshire.

MILTON, a parish of Van-Diemen's Land, in the co. of Somerset, to the S of Chatsworth.

MILTON, a township of Piscataquis co., in the state of Maine, U. S. Pop. in 1840, 469.—Also a township of Strafford co., in the state of New Hampshire, 47 m. NE of Concord, bordered on the E by Salmon Fall river, and watered by its branches. Pop. 1,322.—Also a township of Chittenden co., in the state of Montpelier. The surface is hilly, and is watered by Lamouille river. The soil possesses considerable fertility. Pop. 2,134.—Also a township of

Norfolk co., in the state of Massachusetts, 7 m. S of Boston. The surface is diversified, and is bordered on the N by Neponset river. The soil consists of gravelly loam, and is very fertile. Pop. 1,822.—Also a village and parish of Litchfield township, Litchfield co., in the state of Connecticut, 36 m. W of Hartford. It has a rugged surface, but affords good pasturage.—Also a township of Saratoga co., in the state of New York, 30 m. N by W of Albany. It is generally level, and is drained by the Kayaderosseras creek and its tributaries. The soil consists of clay loam and sand. Pop. 3,166.—Also a village of Marlboro' township, Ulster co., in the same state, 79 m. S by W of Albany, half-a-mile W of the landing on Hudson river. Pop. 450.—Also a village of Turbot township, Northumberland co., in the state of Pennsylvania, 71 m. N of Harrisburg, on the E bank of the W branch of Susquehanna river, and on both sides of Limestone river. Pop. 1,508.—Also a village of Santa Rosa co., in the state of Florida, 20 m. NE of Pensacola, on the W side of Blackwater river. Also a village of Trimble co., in the state of Kentucky, 52 m. NW of Frankfort, on the S bank of the Ohio river. Pop. about 100.—Also a township of Trumbull co., in the state of Ohio, 157 m. NE of Columbus, watered by Mahoning river. Pop. 1,277. It contains a village of the same name.—Also a township of Jackson co., in the same state. Pop. 912.—Also a township of Miami co., in the same state. Pop. 252.—Also a township of Richland co., in the same state. Pop. 1,861.—Also a township of Wayne co., in the same state. Pop. 1,157.—Also a township of Wood co., in the same state. Pop. 124.—Also a township of Wayne co., in the state of Indiana, 54 m. E of Indianapolis. Pop. 465.—Also a township of Jefferson co., in the same state. Pop. 1,280.—Also a township of Cass co., in the state of Michigan. Pop. 439.

MILTON-NEXT-GRAVESEND, a parish in Kent, on the S bank of the Thames, crossed by the Thames and Medway canal, and incorporated with the town of Gravesend. Area 650 acres. Pop. in 1801, 2,056; in 1831, 4,348; in 1841, 9,256.

MILTON-NEXT-SITTINGBOURNE, a parish and market-town in Kent, 7¾ m. W by N of Feversham. The town is situated at the head of a creek which opens into the Channel between the isle of Sheppey and the coast of Kent. It possesses a port for barges; but the inhabitants are chiefly occupied in the oyster-fishery, which gives employment to above 100 dredgers. The M. oysters are considered the finest in England. A capital of £10,000 is employed in stocking and storing the ground with young oysters and brood. Area of p. 2,340 acres. Pop. in 1801, 1,622; in 1831, 2,233; in 1841, 2,538.

MILTON (Great), a parish in the co. of Oxford, 5½ m. SW of Thame. Area 3,020 acres. Pop. 737.

MILTON (Little), a parish in Oxfordshire, 4½ m. W by S of Tetsworth. Area 1,290 acres. Pop. in 1831, 473; in 1841, 482.

MILTON (South), a parish in Devon, 3 m. WSW of Kingsbridge. Area 1,650 acres. Pop. 475.

MILTON (West), a chapelry in the p. of Poorstock, Dorsetshire, 3½ m. NE of Bridport.

MILTON-ABBAS, a parish in Dorsetshire, 6 m. SW of Blandford-Forum. Area 2,420 acres. Pop. in 1831, 846; in 1841, 853.

MILTON-ABBOT, a parish in Devonshire, 5½ m. NW of Tavistock, on the river Tamer. Area 5,320 acres. Pop. in 1831, 1,205; in 1841, 1,256.

MILTON-BRYANT, a parish in Bedfordshire, 2½ m. SE of Woburn. Area 1,480 acres. Pop. 382.

MILTON-DAMERELL, a parish in Devonshire, 5 m. NE of Holsworthy, on the N bank of the Waldon. Area 5,260 acres. Pop. in 1841, 813.

MILTON-ERNEST, a parish in Bedfordshire, 4½ m. NW by N of Bedford, on the E bank of the Ouse. Area 2,070 acres. Pop. in 1831, 372; in 1841, 446.

MILTON-KEYNES, a parish in Bucks, 3½ m. S by E of Newport-Pagnell, on the river Ouzel. Area 1,770 acres. Pop. in 1831, 334; in 1841, 327.

MILTON-LILBOURNE, a parish in Wilts, 2 m. E by N of Pewsey. Area 2,740 acres. Pop. 709.

MILTON-MALZOR, a parish in Northamptonshire, 3¾ m. S by W of Northampton, in the line of the London and Birmingham railway. Area 1,190 acres. Pop. in 1831, 541; in 1841, 607.

MILTON-PODIMORE, a parish in Somersetshire, 1¾ m. NE of Ilchester. Area 1,130 acres. Pop. in 1831, 175; in 1841, 149.

MILTOWN. See Milltown.

MILTSHIN, a village of Bohemia, 12 m. N of Tabor. Pop. 850.

MILVERTON, a parish and market-town of Somersetshire, 16 m. SW of Bridgewater. Area of p. 6,400 acres. Pop. in 1831, 2,233; in 1841, 2,154. The town consists of three irregularly-built streets, with the church standing on an eminence in the centre. Flannel is woven here, and there is a silk-mill.—Also a parish in Warwickshire, 2 m. NE of Warwick. Area 1,180 acres. Pop. 831.

MILWICH, a parish of Staffordshire, 5 m. ESE of Stone. Area 2,800 acres. Pop. in 1841, 563.

MIMA, a town of Japan, in the island of Sikokf, prov. and 36 m. W of Ava.

MIMASAKA, a prov. of Japan, in the W part of the island of Nifon, to the N of the prov. of Bizen, to the NE of that of Bitchu, and NW of the prov. of Farima. It consists of an extensive and fertile valley, and is divided into 7 districts. It contains mines of iron.

MIMAY, a town of Nigritia, in Mandara, 30 m. S of Mora.

MIMBASTE, a commune of France, in the dep. of the Landes, and cant. of Pouillon, 9 m. S of Dax, on the l. bank of the Arrigand. Pop. 1,350.

MIMBIGZ, Mambedj, or Bambuch, a town of Turkey in Asia, in the pash. and 50 m. NE of Aleppo, and 6 m. W of the r. bank of the Euphrates. It occupies the site of the ancient *Hierapolis*, and has an aqueduct.

MIMBRES (Sierra-de-los), a range of mountains in Upper California, in the chain of the Rocky mountains, extending between 33° and 35° N lat., between the mountains of Anahuec on the N, and the Sierra-Acha on the S. The Gila river descends from its W side.

MIMEURE, a village of France, in the dep. of the Côte-d'Or, cant. and 1½ m. N of Arnay-le-Duc. Pop. 400.

MIMICO, a village of Upper Canada, in the township of Etobicoke, and on the creek of that name, 9½ m. from Toronto. Pop. 150.

MIMIZAN, a canton and commune of France, in the dep. of the Landes, and arrond. of Mont-de-Marsan. The cant. comprises 6 com. Pop. in 1831, 4,383; in 1841, 4,870. The village is 45 m. NW of Mont-de-Marsan, near the outlet of the pond of the same name. Pop. 703. It has a fine glass-work.

MIMLING. See Mumling.

MIMMS (North), a parish in Hertfordshire, 3 m. S by W of Hatfield. Area 4,910 acres. Pop. 1,118.

MIMS (South), a parish in Middlesex, 3½ m. NNW of Chipping-Barnet. Area 4,260 acres. Pop. in 1831, 2,010; in 1841, 2,760.

MIN. See Min-Keang.

MINA, an auriferous district of Brazil, in the prov. of Maranhão, on the r. bank of the Rio-Turinána.

MINA, or Mona, a town of Arabia, in the Hedjaz, a

little to the S of Mecca, in a valley enclosed by granitic mountains. It consists of a long street bordered with houses, some of them handsome, but to a great extent in a ruinous condition. At the entrance, near a fountain, is an edifice of great antiquity.

MINA (El). See Elmina.

MINAB, a town and port of Persia, in the prov. and 180 m. S of Kerman, in Moghostan, on the r. bank of the Ibrahim, a little above the entrance of that river into the Persian gulf, and at the foot of a mountain the summit of which is surmounted by a fort. It covers a considerable space, and the houses, though of wood, are generally well-built and commodious. It is the capital of the possessions in Persia of the imam of Muskat. The environs abound in grain and dates.

MINAGE, a rivulet of France, in the dep. of the Nievre, which issues from a pond of the same name, and throws itself into the Yonne, on the r. bank, below the confluence of the Houssière, opposite the Pont-de-Blaizy, and after a course of about 5 m.

MINAKA, a town of Japan, in the island of Nifon, and prov. of Muts, 36 m. W of Xenday.

MINAKOUTZ, a town of Japan, in the island of Nifon, and prov. of Oumi, 42 m. E of Meaco. It has a castle and a suburb.

MINAM, a village of Persia, in the prov. and 138 m. W of Kerman. It consists of about 400 grottoes, cut out of a mountain, and inhabited by a sect of schismatic Mahommedans.

MINANE, a village in the parish of Tracton, co. Cork. Pop. in 1841, 217.

MINARA, a village of Asiatic Turkey, in the sanjak of Meis, on a small affluent of the Xanthus, and 9 m. NNW of the village of Xanthus, a little to the E of the site of the ancient *Pinara*, the grandest of all the ruined cities of Lycia. It is picturesquely situated, and is composed of capacious flat-roofed huts.

MINARD, a parish in co. Kerry, 5¼ m. ESE of Dingle. Area 6,056 acres. Pop. in 1841, 1,666.

MINAS, an island of Brazil, in the prov. of Para, in the Madeira river, 90 m. above its confluence with the Amazoras. It is 15 m. in length, and 5 m. in breadth, and is supposed to be the largest island in the M. Its northern point is in S lat. 6° 34′.

MINAS, or Concepcion-de-Minas, a town of the republic and 75 m. NE of Monte-Video, and 42 m. NW of Maldonado, near the source of the Santa-Lucia. It is seated on a little plain, and is surrounded by low rocky mountains, in a very thinly-inhabited country.

MINAS-BASIN, a bay of Nova Scotia, on the NW coast, enclosed on the N by Cumberland co., and on the S by King's, Hants, and Colchester cos., and communicating by a strait or channel of the same name with the Bay of Fundy. The bay is about 54 m. in length from E to W, and 21 m. in breadth from N to S. The tides rise in this basin higher than in any part of America; and from their extraordinary velocity bear in their waters vast quantities of alluvial matter, which being deposited on the banks of the basin form those tracts of rich dike and marsh-land which render the locality the richest in Nova Scotia. Of the rivers, 19 in number, which flow into this basin, the principal are—on the S, the Avon, Horton, and Cornwallis; on the E, the Truro and the Shubenacadie, the latter of which issues from the Great lake and communicates with Halifax harbour. The chief towns on its banks are Windsor and Truro. The E part of the basin is distinguished as the bay of Cobequid. The channel of M. running between Partridge island and Cape Blomedon is 33 m. in length from E to W, and from 3 m. to 5 m. in breadth. At its W entrance is High island.

MINAS-DO-CASTELLO, a village of Brazil, in the prov. of Espirito-Santo and parish of Itapé-Mirim.

MINAS-GERAES, a central province of Brazil, which extends from 14° to 23° S lat., and between 41° and 48° W long. It is bounded on the N by the provs. of Pernambuco and Bahia; on the E by those of Porto-Seguro and Spirito-Santo; on the S by Rio-de-Janeiro and São-Paulo; and on the W by São-Paulo and Goyaz. It is composed of four great physical divisions: that on the NW, and by far the largest of the four, being the basin of the upper course of the San-Francisco; the NE section, that of the two great head-streams of the Rio-Grande-do-Belmonte; the SE section, that of the upper course of the Rio-Doce; and the SW section, that of the upper part of the Para. The Sierra-Montequeira, with its continuations, the Sierra-Itambe, Serro-Frio, and Sierra-do-Santa-Branca, intersects the entire length of the prov. from SSW to NNE, and divides the waters flowing E to the Atlantic, from those flowing W to the great affluents of the Parana, and those which form the upper tributaries of the San Francisco. The Sierra-Matta-Gorda, the Sierra-Cristaeo, and Sierra-Araras, form in continuation its western boundary, dividing it from Goyaz; the Sierra-Canastra connects the Sierra-Matta-Gorda on the W, with the Sierra-Montequeira on the E, and separates the basin of the San-Francisco from that of the Para. The Sierra-Esmeraldas, branching eastwards from the Sierra-Itambe, divides the basin of the Rio-Grande-do-Belmonte on the N, from that of the Rio-Doce on the S.—The great rivers of the prov. are those already mentioned. The Rio-de-Sylva flowing E, and the Rio-Gurutaba flowing W, both affluents of the San-Francisco, form the N boundary of the prov. The Paraiba separates it along the SE frontier from Rio-de-Janeiro. Its form is rhomboidal, with an area estimated at 150,000 sq. m., and a pop. of 760,000. The agricultural capabilities of this prov. are very great. Its soil yields Indian corn abundantly, besides coffee, sugar, tobacco, and cotton; and may be made to grow wheat.—Mawe describes the climate of the cap., Villa-Rica or Ouro-Preto, as "perhaps equal to that of Naples." The therm. in the heat of summer never rises above 82° in the shade, and rarely falls below 48° in the winter. The usual range is from 64° to 80° in summer, and from 54° to 70° in winter. The greatest heats prevail in January. Owing to its great elevation, however, the temperature is subject to great alternations in the same day, and sudden thunder-storms are frequent. During the cold months, June and July, the sugar and coffee plantations are liable to be injured by night-frosts. The winds blow from various directions, and are never accompanied by great heat, but frequently by thick fogs, which envelope the summits of the neighbouring mountains. Upon its *campinas*, or upland prairies, considerable herds of cattle and sheep find abundant pasture. These *campinas* or *campos-geraes*—so called from their uniformity of appearance and vast extent—are thus described by Prince Maximilian: "Immense plains entirely bare of forests, or rather hills with gentle acclivities which extend in chains, covered with tall and dry grass and scattered shrubs, present themselves as far as the eye can reach. These campos, which stretch to the Rio San Francisco, to Pernambuco, Goyaz, and beyond, are intersected in different directions by valleys, whence issue the rivers which from this elevated plateau descend to the sea. The most remarkable is the Rio San Francisco: it has its source in the Serra da Canastra, which may be regarded as the boundary between the provs. of M. and Goyaz. In the valleys which cut this chain and these naked plateaus, the borders of the rivers and

brooks are garnished with forests. Isolated woods are also found hidden in these hollows, especially on approaching the frontiers of M. This kind of forests is one of the chief characteristics of these open regions. You imagine yourself sometimes to have before you one continued plain, when all at once you find yourself on the border of a narrow valley with deep precipitous sides; you hear the murmur of a rivulet beneath, and the eye falls upon the tops of a forest, the trees of which, embellished with flowers of various hues, adorn its banks. Here, in the cold season, the sky is constantly clouded, and the wind blows incessantly: in the dry season the heat is suffocating, all herbage is dried up, the sun is scorching, and all drinkable water fails. This description," continues Prince Maximilian, "proves that the *campos-geraes* of Eastern Brazil, though destitute of forests, and generally level, differ notwithstanding from the steppes both of the old and the new world; for the *llanos* or steppes to the N of the Oronoco, and the pampas of Buenos Ayres, do not resemble the *campos-geraes*, and the steppes of the old world are still more dissimilar. These *campos-geraes* are not perfectly level: their surface presents alternately eminences of gentle ascent, and plateaus. Their aspect is monotonous and lifeless, especially in the dry season; nevertheless, they are not so naked as the *llanos* and the *pampas*, and still less so than the steppes of the old world, for they are everywhere carpeted with grass which often grows tolerably high, while little shrubs generally cover the declivities, and sometimes whole plateaus. Consequently, the rays of the sun do not here produce effects so violent as in the *llanos*, nor do we meet here with those dry suffocating winds and whirlwinds of sand, which are so serious an annoyance to the traveller in the *llanos* of America, the deserts of Africa and Asia, and the steppes of Asia. In coming from the sea-coast, you begin by climbing this first stage of the mountains of the interior, which in the region I traversed is not very elevated, since no snow falls there, and ice and hail are rare phenomena; moreover, a great part of the trees preserve their foliage all the year. But a little further westward, this is no longer the case on the more elevated summits. Proceeding towards the highest part of *campos-geraes*, you arrive at the chain of mountains which stretches along their surface, but which cannot be compared with the cordillera of the Andes of Spanish America: they present neither peaks covered with perpetual snows, nor volcanoes. Those regions of South America which are destitute of wood, resemble each other only in respect of animated nature, and differ especially from the steppes of the old continent, in the circumstance that their various aboriginal inhabitants were found by the first European discoverers in the lowest stage of civilization, subsisting entirely by hunting, while those of the old world were nomades, a condition of society which has never existed in America." A large portion of the surface of this prov., notwithstanding its physical advantages of soil and climate, is still a mere wilderness, and overrun with Indian tribes; while the want of roads still renders it impossible to send its produce to market by wheeled carriages. The journey from Ouro-Preto, the capital, to Rio-de-Janeiro, a distance of 200 m., is performed on the backs of mules and horses only, and ordinarily requires 15 days. It nevertheless conducts considerable trade with Rio, Bahia, and São-Paulo; and besides the road to the capital, and that by way of San-Joao-del-Rey to São-Paulo, has roads diverging from it by Minas-Novas to Bahia, and by São-Romao and Tejuco to Paracatu, Goyaz, and Matto-Grosso.—Its mineral wealth is indicated by its name, which signifies the 'general' or 'universal mines.' Gold, silver, copper, iron, and precious stones, occur within it. "On the table-land of Minas-Geraes, near to Villa-Rica, a mica-slate, containing beds of granular limestone, is covered by primitive clay-slate. On this latter rock reposes, in conformable stratification, the chloritous quartz which constitutes the mass of the peak of Itacolumi, 1,000 toises above the level of the sea. This formation of quartz contains alternating beds; 1. of auriferous quartz, white, greenish, or striped, mixed with talc-chlorite; 2. chlorite slate; 3. auriferous quartz mixed with tourmaline; 4. specular iron mixed with auriferous quartz. The beds of chloritous quartz are sometimes 1,000 ft. thick. The whole of this formation is covered with a ferruginous breccia, extremely auriferous. M. d'Eschwege thinks, that it is to the destruction of the beds we have just named, and which are geognostically connected, that the soil which is worked by means of washing should be attributed, containing gold, platina, palladium, and diamonds (Corrego das Lagens), gold and diamonds (Tejuco), and platina and diamonds (Rio Abaite). The decomposed chlorite-slate, from which the topaz is procured, belongs to this formation." [*Humboldt.*] Its four comarcos or districts, of St.-Joao-del-Rey, Sabara, Villa-Rica, and Cerro-do-Frio, all of which produce gold, and in 1809, according to a calculation of Mawe, the royal fifth yielded by them, amounted to 150 arrobas of 32 lbs. each, equal in value to about £1,100,000. The extraction of diamonds in the 'Districto Diamantino' was formerly a government monopoly, but has of late years been thrown open to the public.—Kidder reports that this prov. has 182 public schools, with about 8,000 pupils; besides a number of private schools; and that according to official statistics it takes the lead of all the Brazilian provinces in education. In 1833 it was administratively divided into 14 comarcas: viz. Barbacena, Ouro-Preto, Patrocinio, Rio-das-Mortes, Rio-das-Vilhas, Rio-Grande, Rio-Jequitinhonha, Rio-Paracatu, Rio-Parahibuna, Rio-Parana, Rio-Piracecaba, Rio-de-Sao-Francisco, Rio-Sapucahi, and Rio-Cerro. Its chief towns and villages are Ajuruoca, Araxa, Baependi, Bom-Fim, Cahete, Caldas, Carvello, Desemboque, Diamantina, Gram-Mogor, Formigas, Itabira, Jacuhi, Jaguari, Januaria, Lavras-do-Funil, Oliveira, Paracatu, Pitangui, São-João-Baptista, Queluz, Salgado, Santa-Barbara, São-João-Nepomuceno, São-Romao, Sapucahi, Tamandua, Uberaba, and Villanovo-da-Formiga. Its militia force is taken at 47,000. It has a provincial council of 30 members; and sends 20 deputies and 10 senators to the Imperial assembly.

MINAS-NOVAS, a comarca, district, and town of Brazil, in the prov. of Minas-Geraes. The comarca now bears the name of Jequitinhonha (which see). The district is bounded on the N by the districts of Gram-Mogor, and Januaria; on the E by that of Formigas; on the S by the district of Serro; and on the W by the Cordilheira-dos-Aimores. Pop. 10,000. The climate is dry and warm, and not insalubrious. The culture of cotton forms the chief branch of local industry. Gold and diamonds are found in the district, and it is said also to contain abundant mines of copper. The town, which is also called N. S.-do-Bom Successo-das-Minas-de-Fanado and São-Pedro-do-Fanado, is 365 m. NNE of Ouro-Preto, and 180 m. NE of Serro, in S lat. 17° 37′. Pop. 3,000. It stands on a height between the rivers Bom-Successo and Fanado, affluents of the Aracuahi. The three principal streets form the figure of the letter Y, and are broad and well-paved. The houses are built of brick or earth, and most of them have gardens attached. The principal buildings are the ancient intendencia, now used as a

town-house, and the churches. It has also several chapels and schools, and an hospital. Agriculture, and the manufacture of a few common fabrics, form its chief branches of industry. Its trade consists chiefly in cotton.

MINATILLAN, a town of Mexico, on the W bank of the Huazacualcos river, 34 m. from its mouth, situated upon a cluster of small hills. The river was found to be 780 ft. wide at this place in the month of December 1851, when the American steamer Alabama visited it, and could have proceeded 30 m. further up.

MINAYA, a town of Spain, in Murcia, in the prov. of Albacete and partido of La Roda, 60 m. SSW of Cuenca. Pop. 2,312. It has a handsome parish-church, and an elementary school. Coarse mats and common cloth are manufactured here.

MINCARLO, one of the Scilly isles, 4 m. W of St. Mary's isle. It comprises an area of about 12 m.

MIN-CHAN, or KIEOU-TING-CHAN, a mountain of China, in the prov. of Sze-chuen, in N lat. 31° 34′, and E long. 103° 54′. It has 9 summits, which, it is said, are covered with perpetual snow.

MINCHINHAMPTON, a parish and town of Gloucestershire, 12 m. SE by S of Gloucester, and 5 m. W of the Cheltenham railway. Area 6,270 acres. Pop. of p. in 1831, 7,255; in 1841, 7,037.

MINCHMOOR, a mountain-ridge running between the parishes of Traquair and Yarrow, and the counties respectively of Peebles and Selkirk. Its highest summit has an alt. of 2,285 ft.

MINCIO, a river of Austria, in Lombardy, which issues in a deep and clear stream from the SE extremity of Lake Garda, at Peschiera, in the deleg. of Mantua; runs S into the deleg. of Verona; then re-enters that of Mantua, and bending E, towards the town of that name, forms a lake the waters of which are enclosed by two dikes. Below the northern of these dikes, the Mincio forms another lake, and then bending SE joins the Po, on the l. bank, about 12 m. below Mantua, and after a course of 45 m. Above Mantua this river flows with considerable impetuosity, but below that town its course is tranquil, and its waters are generally embanked like a canal, and frequently inundate the vicinity. The M. gave its name to a dep. of the kingdom of Italy, now comprised in the deleg. of Mantua.

MINDANAO. See MAGINDANAO.

MINDE, a village of Norway, at the foot of the Miösen lake, on the W side of the Wormen, or outlet of that beautiful sheet of water.

MINDEL, a river of Bavaria, which rises in the principality of Kempten, and falls into the Danube, after a course of 45 m. from S to N.

MINDELHEIM, a well-built town of Bavaria, on the Mindel, 27 m. SSW of Augsburg. Pop. 2,000.

MINDEN, a *regierungs-bezirk*, or regency, of the Prussian states, comprising the NE part of what has been, since 1815, the prov. of Westphalia, and composed of the former principalities of Minden, Paderborn, Rittberg, and Corvey, the bailiwick of Reckeberg, and the lordship of Rheda. Its area is 95·68 German sq. m.; and had a pop. in 1837 of 412,587; in 1849 of 463,229, of whom 186,835 were Catholics, and 5,894 Jews. It is divided into 10 districts or, as they are officially termed, circles: viz. Minden, Lubbecke, Herford, Bielefeld, Halle, Wiedenbrück, Paderborn, Büren, Warburg, and Höxter; and contains 27 towns, 20 market-towns, 489 villages, and 202 colonies, as they are called. The soil of this prov. is unequal; some spots are barren, but the greater part is fertile in corn, and a large quantity both of hemp and flax is raised. The pasturage is good, and live-stock numerous. Iron, lead, and salt occur within the district. The chief river is the Weser; and along its banks the trade is of some importance.

MINDEN, the capital of the above government, stands in a very pleasant situation on the l. bank of the Weser, at the confluence of the Bastau. Pop. in 1837, 7,966. It is one of the oldest towns of Germany; and, while the see of a bishop, formed a petty republic under his protection. It was even then a place of traffic, from its position on the Weser, over which it has a bridge 600 ft. in length. It has 3 Lutheran, a Calvinist, and 2 Catholic churches; an Evangelical gymnasium, an orphan-house, 4 hospitals, and a Lutheran convent. Its manufactures, consisting of woollen, linen, leather, &c., are all on a small scale. The river affords the means of exporting both the corn and timber of the neighbourhood; and in the vicinity is a number of saw-mills. —In 1529, this town embraced the reformation; in 1757 it was taken by the French, and the following year retaken by the Hanoverians. In 1759, the French entered it again; but they were obliged to quit it immediately after their defeat by the British troops on the plain of Todtenhausen. In 1806, it was occupied by the French, and finally ceded to Prussia in 1814; since which its fortifications have been renewed and extended.

MINDEN, a township of Montgomery co., New York, U. S., on the S side of the Mohawk, 62 m. WNW of Albany. Pop. 3,507.—Also a v. in Claiborne co., Louisiana.

MINDO, a settlement of Ecuador, 20 m. NW of Quito.

MINDORO, one of the Philippine islands, lying between the parallels of 12° 12′ and 13° 30′ N. It is 110 m. in length, by about 25 m. in average breadth, and is situated due S from the SW extremity of the island of Luçon, from which it is separated by a channel 3 leagues wide. It is of a triangular form; high and mountainous in the interior, but sloping towards the coast. The surface is covered with trees, and is well-watered. Pop. in 1837, 29,632. The Spaniards have a few establishments upon it, but the island is otherwise well-inhabited. A part of the adjoining sea, between the island of Borneo and the Sulu archipelago on the S, and the Philippine archipelago on the E, N, and NW, is called the sea of Mindoro.

MINDTOWN, a parish in Salop, 4 m. NE of Bishop's-Castle. Area 870 acres. Pop. 48.

MINDURRA, a town of Hindostan, in Gujerat, 15 m. S of Janagor.

MINE, a river of the United States, in Illinois, which, after a course of 70 m., falls into the Illinois, on the N side, about 75 m. from its mouth. It is navigable 40 m.—Also a river of Louisiana, which has its source between the Great Osage and the Kanzas, and falls into the Missouri, 200 m. from its confluence with the Mississippi. It is navigable for boats 80 or 90 m., and is about 70 yds. wide at its mouth. It divides into two streams, about 5 leagues from the Missouri; and at the point of junction are some very rich salt springs. The W branch is so strongly impregnated with salt, that for 20 m. the water is not palatable.

MINE-A-BRETON, a township in Washington co., in Missouri, U. S. Pop. 994.

MINE-CREEK, a township of Hampstead co., in Arkansas, U. S. Pop. 436.

MINEHEAD, a borough and parish in Somersetshire, 22 m. W by N of Bridgewater. Area of p. 3,780 acres. Pop. in 1831, 1,481; in 1841, 1,489.—The town is situated on the Bristol channel; and has a harbour of easy access, with an excellent quay and pier. The town consists of three divisions, or distinct assemblages of houses, arranged in the form

of a triangle. The upper town comprises some irregular streets, on the E declivity of a steep hill called Minehead-point. The lower or middle town, about a ½ m. from the sea, is the principal part; and possesses some good houses. The third division is the quay-town, or part close to the water-side, where there is a custom-house. About the beginning of last cent., the trade of this port rose rapidly, and it had numerous vessels trading to Ireland, America, and the Mediterranean; since that period, however, it has declined. At present its commerce is chiefly carried on coastwise. Possessing a fine sandy beach, and a neighbourhood remarkable for the variety and the beauty of its scenery, with great salubrity of climate, M. has become a place of resort for fashionable valetudinarians during the summer months. It formerly sent 2 members to parliament, but was disfranchised by the Reform act.

MINEHEAD, a cape on the SE coast of co. Waterford, 4 m. SSW of Helwick-head.

MINEO, an inland town of Sicily, in the Val-di-Noto, situated on a hill in a fertile country, 32 m. NW of Syracuse. Pop. 8,000. It probably marks the site of the ancient *Menœ*.

MINERA, a chapelry in the p. of Wrexham, Denbighshire, about 3 m. NW of Wrexham. Pop. 628.

MINERAL LAKE. See MINI-WAKAN.

MINERAL-POINT, the capital of Iowa co., in Wisconsin, 52 m. WSW of Madison. Pop. 700.

MINERSVILLE, a village in Schuylkill co., in Pennsylvania, U. S., 66 m. NE of Harrisburg. Pop. 600. Anthracite coal is extensively wrought in the vicinity.—Also a v. in Alleghany co., in Pennsylvania, 2 m. E of Pittsburg.

MINERVA, a village of Mason co., Kentucky, U. S., 13 m. from Washington.—Also a village in Stark co., in Ohio, on the Sandy and Beaver canals.—Also a township in Essex co., in New York, 94 m. N of Albany. Pop. 455.

MINERVE, a commune and village of France, in the dep. of Herault, cant. of Olonzac, on the Cesse. Pop. 1,253.

MINERVINO, a town of Naples, in the Terra-di-Bari, situated on the declivity of the Apennines, 85 m. E of Naples. Pop. 900.

MINETY, a parish partly in the co. of Gloucester, partly in Wilts. 5½ m. NE of Malmsbury, and crossed by the Great Western railway. Area 3,470 acres. Pop. in 1831, 585; in 1841, 736.

MINEWITHEN, one of the Scilly islands, situated a little to the NE of St. Mary's. It contains about 16 acres of land.

MINGALA, or MENGALAY, an island of Scotland, nearly at the S extremity of the Outer Hebrides, or archipelago of Long Island, 9 m. SW of Barra, and separated from Pabba on the NE by the sound of Mingala, which is 1¾ m. wide. Its extreme length is 2½ m. from NE to SW; its extreme breadth, 1¾ m. The highest ground on the island appears to be short of 1,000 ft. above sea-level; and the general surface is pastoral, yet such as to maintain a pop. of about 50.

MINGAN-ISLANDS, a cluster of low limestone islands, near the S coast of Labrador, in the gulf of St. Lawrence, 30 m. N of Anticosti, in N lat. 50° 15′. These islands are 29 in number, and extend in a line parallel to the coast about 45 m. They possess little soil, but nevertheless are thickly wooded with spruce, birch, and poplar. They abound in wild fowl and seals.

MINGELSHEIM, a town of Baden, 6 m. N of Bruchsal. Pop. 1,500.

MING-KEANG-CHU, a district and town of China, in the prov. of Kwan-se, and div. of Tae-ping-fu, in N lat. 23° 3′, E long. 106° 55′.

MINGLANILLA (LA), a town of Spain, in the prov. and 50 m. SSE of Cuenca. Pop. 1,800. Rock-salt is mined in the vicinity.

MING-NAN, a district and town of China, in the prov. of Shen-se, and div. of Shan-chu.

MINGONIA, a town of Spain, in the prov. and 8 m. NNE of Avila, on the r. bank of the Adgja. Pop. 1,000.

MINGRELIA, a province of Asiatic Russia, bounded on the N by the Circassian districts; on the E by Imeritia Proper; on the S by Guriel; on the SW by the Black sea; and on the NW by the territory of the Abasses. The Risni is its principal river. It has an area of 2,365 sq. m., with a pop. estimated at from 60,000 to 100,000. They are in general inferior in personal appearance and physical strength to the mountaineers of the Caucasus, but obedient and faithful to their feudal chiefs. It is a mountainous region, intersected by deep valleys, "still as damp, hot, and subject to fevers as when Hippocrates described it under the name of *Colchis*." The most fertile tracts lie waste, only poisoning the atmosphere with the effluvia of their decomposed herbage. Vegetation is rapid, and fruits are produced without the care of grafting; but their flavour is not always the finest. The wine is good; and tobacco, rice, millet, and *gomi* are grown. The Mingrelians do not now cultivate flax, which in the time of Herodotus and of Strabo furnished the Colchians with the means of an important manufacture. The only object to which they appear to give any attention is the management of bees, and, in the district of Ledzgami, the rearing of the silk-worm. The honey of some cantons, where the *Azalea pontica* abounds, is bitter. It was beyond the Phasis that Xenophon found a kind of honey which caused a species of delirium in those who eat of it,—an effect which Pliny attributes to the rhododendron, a shrub which abounds in the forests where the bees swarm. The rivers of this fine prov. are without bridges, the country without roads, and its aspect is altogether savage and deserted. The prince of M., who resides in the town of Zubdidi, assumes the title of *dadian*, or 'master of the sea,' though he possesses not even a fishing-boat. The nobility of M. are addicted to the chase, and are acquainted with the art of training birds of prey to kill game. According to a Mingrelian proverb, a good horse, a good dog, and a good falcon, are three indispensable things for human happiness. The dominant religion is that of the Greek church, and the prov. is divided into 3 dioceses. On the W coast of this prov. the Russians have the forts of Redout-Kaleh and Anaklia.

MING-SHAN, a district and town of China, in the prov. of Sze-chuen, and div. of Ya-chu-fu, in N lat. 30° 10′, E long. 103° 11′.

MINHO, or MINO, a river which has its source in Spain, in the Sierra-de-Mondonedo, in Galicia, in the prov. of Lugo, 9 m. S of Mondonedo; passes Lugo; enters the prov. of Orense; passes the town of that name; forms the line of separation between the prov. of Vigo and the Portuguese prov. of Minho; and throws itself into the Atlantic at La Guardia, 42 m. SSW of Vigo, and 51 m. N of the embouchure of the Duero, after a course, in a generally SW direction, of 180 m. At its mouth it divides into two arms, and forms a small island. Its principal affluents are the Sil on the l., and on the r. the Avia and Tea. At the junction of the Sil its waters become nearly double in volume, and the locality through which it passes, and in the centre of which Orense now stands, is supposed to have formerly been the bed of a lake. On reaching Bibadavia it is confined by lofty mountains which run along the frontiers of Spain and Portugal, and becomes impetuous in its course to the sea. It is navigable for only a short

distance from its mouth, and is considerably obstructed by sand-banks. The chief towns on its banks are Lugo, Orense, and Tuy, in Spain; and in Portugal Melgazo, Monzon, Valencia, Villanova-de-Cerveira, and Caminha. It is said to derive its name from the vermilion (minium) found on its banks.

MINHO. See Entre-Douro-e-Minho.

MINIAC, a commune of France, in the dep. of the Ille-et-Vilaine, cant. and 1 m. S of Becherel, and 11 m. N of Montfort.

MINIAC-MORVAN, a commune of France, in the dep. of the Ille-et-Vilaine, cant. and 4 m. SSE of Chateauneuf-en-Bretagne, and 12 m. SSE of St. Malo. Pop. 3,041.

MINIAK-TCHOU, a name by which the river Ya-lung-keang is distinguished in its passage through Tibet.

MINIANAK, a Shilluk village on the l. bank of the White Nile, in N lat. 10° 5′.

MINIATO (San), Sanminiato, or Samminiato-al-Tedesco, a town of Tuscany, cap. of a communita, in the emp. or prov. and 20 m. WSW of Florence, and 21 m. ESE of Pisa, on a hill. Pop. 2,383. It has a fine cathedral, several churches, a foundling hospital, a lyceum, and a savings' bank. This town is said to have been the original seat of the Bonaparte family.

MINICOY. See Malicoy.

MINIEH, Menyeh, or Menieh, a prefecture or province in the S part of Middle Egypt. It extends along the l. bank of the Nile, between the prov. of Beni-suef on the N, and that of Siut on the S and SE, the prov. of Atfieh on the NE, and the Libyan on the W. Pop. 154,256. It is about 66 m. in length from N to S, and 9 m. in medium breadth, comprising a total superficies of 201 m. It is intersected by several canals which communicate with the Nile, and is very fertile. Its principal produce is sugar. Its chief town bears the same name.

MINIEH, Minyeh, or Miniet-ebn-Khasib, a town of Middle Egypt, cap. of the prov. of the same name, 141 m. SSW of Cairo, and 75 m. NNW of Siut, on the l. bank of the Nile. It occupies a strong position, and, in comparison with other towns in Middle Egypt, is large and handsome. It has manufactories of a species of earthenware vessel locally named *bardak*, and a cotton factory. In the environs are numerous gardens. M. is supposed to occupy the place of the ancient *Cynopolis*.

MINIET-DASHUR, a village of Lower Egypt, in the prov. and 17 m. S of Ghizeh, on the Western canal. In its vicinity are 4 pyramids.

MININGSBY, a parish of Lincolnshire, 4¾ m. W by S of Spilsby. Area 730 acres. Pop. in 1841, 498.

MINIS, a small island in the Sulu archipelago, in N lat. 6° 32′.

MINISH, an island of the Atlantic, off the coast of Galway, 3 m. W of Kilkerran bay. It is 2 m. in length. Pop. about 500.

MINISINSK, a township of Orange co., in the state of New York, U. S., 120 m. SSW of Albany. It is low, and overspread by the waters of the Wallkill in the E, but is hilly in the W. Pop. 5,093.

MINISKA, a river of Prussia, in Silesia, in the circle of Breslau, which joins the Oder between Breslau and Brieg.

MINI-WAKAN, or Mineral Lake, a lake of North America, in the valley of the Upper Missouri, on the plateau of the Shayen-Oju, supposed to be 40 m. in extent, with an average breadth of 15 m. It is bordered by hills varying in height from 20 to 250 ft., and so filled up with islands and promontories that it is difficult to get a glimpse of its full expanse. Its waters, which are brackish, and of a deep green colour, appear to be the drainings of the surrounding hills, and contain sulphates and hydrochlorates of soda and magnesia. Nicollet calls this lake Devil's Lake. It does not appear to have any outlet; or if any, it must be into the Shayen-Oju.

MIN-KEANG, a river of China, in the prov. of Fo-kien, which has its sources in the mountains of Vuye, on the NW frontier of the prov., and in the Bohea tea district, and flows in a generally SE direction to Hoc-sieu bay, which it enters by a considerable embouchure, about 25 m. below Fuh-chu-fu, and in N lat. 26°, E long. 119° 35′. Its principal affluents are the Si or Tsi, Si-ki, and Theen-tchou. The chief towns on its banks are Keen-ning-fu, Yeu-ping-fu, and Fuh-chu-fu. At the latter town it is crossed by a substantial stone bridge, 150 rods in length, and 1½ in breadth, and supported on huge stone pillars. This river is navigable for vessels of considerable burden.

MINKOVTZY, a town of Russia in Europe, in the gov. of Podolia, district and 23 m. NNW of Ouchitza, and on the r. bank of the river of that name.

MINKRAVORA, a village of Afghanistan, in the valley of Suwat, near a river of the same name.

MINNA-EL-DAHAB. See Dahab.

MINNIEHIVE, a village of Dumfries-shire, in the p. of Glencairn, 16½ m. NW of Dumfries. Pop. 670.

MINNIGAFF, a parish of Kirkcudbrightshire, containing part of the town of Newton-Stewart Pop. in 1831, 1,885; in 1841, 1,826.

MINO. See Minho.

MINO, a province of Japan, in the central part of the island of Nifon, to the N of the prov. of Ysse, and E of that of Oumi, and comprising 18 districts. It is intersected by a range of lofty mountains in the W, but is in other parts fertile, producing rice, corn, barley, and cotton, in great abundance.—Also a district of the same island, in the prov. of Ivami.—Also a district of the island of Sikokf, in the prov. of Sanoki.—Also an island of the N. Pacific, in the Philippine archipelago, to the NE of the island of Bohol, in N lat. 10° 12′, E long. 124° 20′. It is about 6 m. in length.

MINO, a township of Mifflin co., in the state of Pennsylvania, U. S. Pop. in 1840, 974.

MINOKE, a village of Japan, in the island of Nifon, and prov. of Oumi. It has an extensive trade in drugs.

MINOLA. See Manilla.

MINORCA, or Menorica, [*i. e.* 'the Smaller,' as compared with Majorca,] an island of the Mediterranean, the second of the Balearic isles in point of importance, situated in 40° N lat., and 30° 45′ E long., about 22 m. NE of Majorca, and 120 m. from the E coast of Spain. It is of a long, narrow shape, extending WNW and ESE, circular in outline towards the N, and concave on the S coast; about 32 m. in length, and 8 m. in breadth. Its area has been estimated at 260 sq. m.—At the distance of 1 m. from its SE extremity is Isle Ayre, ¾ m. in length.—The island is generally flat in its surface, particularly on the S coast; the soil, though rocky or thin, is in most respects tolerably productive. It is much exposed to the N winds, which greatly injure the growth of the trees on that quarter; but snow is seldom seen in the winter-season, and the climate during spring is mild and salubrious. In autumn the rains are extremely heavy; and in summer the heat and drought are most oppressive. The principal mountain, Mount Toro, rises nearly in the centre of the island, to an alt. of 4,793 ft. It is steep and conical, with a flat summit on which is built a monastery, to which penitents and pilgrims ascend barefooted. Iron and lead ores abound, and marble of various qualities and colours is wrought. Lime-

stone, full of petrified shell-fish, is very abundant, besides a fine blue slate, and an excellent soft white stone which hardens by exposure to the air. Red coral is found in great quantities on the shores, and sometimes the fishers bring up large pieces of white coral in their nets.—The wild animals of the island are chiefly hares, rabbits, and hedgehogs; but birds of different species are very numerous. The fish around the coast are abundant in all seasons, and of excellent quality; oysters and other kinds of shell-fish are also plentiful and good, and excellent mullet are reared in the small lakes. Mules and asses are chiefly used in riding. The mules are handsome; the ass is also of a large breed, and by good management is rendered a very tractable animal. The other domestic animals are horned cattle, sheep, goats, and pigs, of which last considerable numbers are reared in the island.—The principal crops are wheat, barley, and a little maize; but fruit of every kind is very plentiful. The olive grows spontaneously, but the fruit is used more for pickles than for making oil. Both red and white wines are made. Excepting a few evergreen oaks, M. is almost destitute of trees.—The inhabitants of M. have no manufactures or articles of commerce, but might easily produce for exportation as well as for their own use, cotton, flax, oil, saffron, and quantities of excellent fruit. Their exports consist chiefly of a little wool and cheese, to the value of £2,500 per ann.; lead, wax, wine, saffron, capers, honey, cheese, and salt, to the annual value of £17,000. The imports are corn, rice, sugar, coffee, brandy, tobacco, spices, linen, fine cloths, pitch, cordage, and articles of furniture.

The island is provided with the finest harbours in the world, particularly those of Fornella and Port-Mahon, which are capable of containing the largest fleets. It is divided into 4 *terminos* or districts; and the principal towns are Ciudadella, Port-Mahon, Alayor, Ferarias, and Mercadel. Ciudadella, the cap., situated to the NW, with a small harbour, is a very ancient place, and tolerably fortified. Port-Mahon, which is now the principal town, is situated on a rocky promontory of difficult access from the landside, and defended by Fort St. Philip. Alayor, about half-way between Mahon and Ciudadella, is tolerably well-built. The other two towns are mean villages in the central district of the island.

The pop. of the island is estimated at 44,000. The inhabitants are a quiet race, and still preserve among them the skilful use of the sling, for which their ancestors were renowned. They are remarkably attached to religious ceremonies, and delight in pilgrimages and processions. The dress of the men resembles that of Majorca, but that of the women is rather peculiar.

History.] M., the *Balearis Minor* of the ancients, has been successively possessed by the Carthaginians, Romans, Vandals, Moors, Aragonese, and Castilians; and has fallen by turns into the hands of the Austrians, British, French, and Spaniards. Various antiquities are still discernible, or are occasionally discovered in the island, which indicate its former possessors. The English, desirous of a naval station farther up the Mediterranean than Gibraltar, took possession of it in 1708. It was confirmed to the British by the peace of Utrecht, and remained in their possession until 1758, when it was retaken by a French fleet and army, after the failure of an attempt to relieve it, which led to the sentence of the unfortunate Admiral Byng. At the peace of 1763, M. was restored to Britain, but in 1782 it was retaken by the Spaniards. It was once more taken by the British in 1798, but restored at the peace of Amiens in 1802.

MINORCA, or Bajoli (Cape), a headland of the island of Minorca, on the W coast, in N lat. 40° 3′, E long. 3° 50′.

MINORI, a town of Naples, in the prov. of Principato-Citra, district and 8 m. WSW of Salerno, cant. and 2 m. E of Scala, near the gulf of Salerno. Pop. 2,100.

MINOT, a village of France, in the dep. of the Cote-d'Or, cant. and 6 m. E of Aignay.

MINOT, a township of Cumberland co., in the state of Maine, U. S., 46 m. SW of Augusta, bordered on the E by Androscoggin river, and on the S by Little Androscoggin river. Pop. in 1840, 3,550.

MINOUSINSK, a district and town of Russia in Asia, in the gov. of Yeniseisk. The district occupies the S part of the gov., and is considered its most fertile portion. It is well cultivated. The town is 165 m. SSW of Krasnoiarsk, on an arm of the Yenisei, at the junction of the Minousinska. Pop. in 1831, 1,152. Its trade consists chiefly in skins.

MINOZZO, a town of the duchy and 33 m. SW of Modena, district and 23 m. SSW of Reggio.

MINPURY, or Minapuri, a town and fortress of Hindostan, in the presidency of Bengal, the modern capital of the Etawah district, in the prov. and 66 m. E of Agra, near the r. bank of the Issa, in the midst of the fertile plains of the Doab. It has a considerable pop.; and its old fortress has been for centuries the stronghold of the rajahs of M., Chohans whose ancient blood, descending from the great Pirthee Raj and the regal stem of Nim-rana, represents *la crême de la crême* of Ranjut aristocracy. "Here, when a son, a nephew, a grandson, was born to the reigning chief, the event was announced to the neighbouring city by the loud discharge of wall-pieces and matchlocks; but centuries had passed away, and no infant daughter had been known to smile within those walls. In 1845, however, thanks to the vigilance of Mr. Unwin, a little grand-daughter was preserved by the rajah of that day. The fact was duly notified to the government, and a letter of congratulation and a dress of honour were at once despatched from head-quarters to the rajah. The giving a robe of honour to a man because he did not destroy his grand-daughter, was very far from being a ridiculous incident. The very next year after the investiture of the rajah, the number of female infants preserved in the district was trebled." Such is the effect of local influence supported by the government in this part of India, scarcely assisted by legal sanction, that it has almost entirely put an end to the practice of female infanticide. In 1843, not a single female Chohan infant was to be found in the district; there are now 1,400 living, between the ages of 1 and 6. The salutary reform commenced in M. has extended to other places.

MINSEN, a village of the grand duchy of Oldenburg, in the circle and 11 m. NNE of Jever.

MINSH (The), the broad sound which separates the N part of the Long Island group of the Hebrides from the continent of Scotland, and at its S end becomes split into two straits by the isle of Skye. Its mean breadth is about 35 m. A packet sails once a-week across the M. from Pol-Ewe to Stornoway, and is partially maintained by a contribution of £130 a-year from government. Generally throughout the year, and invariably during the four winter-months, the wind in the M. veers round to the W and SW at noon. The meaning of the name is 'the stormy sea.'

MINSH (The Little), that sound which separates the central part of Long Island from the isle of Skye. Its breadth is tolerably uniform, and probably averages 16 or 17 m.

MINSHULL-CHURCH, a parish in Cheshire, 5 m. N of Nantwich, on the Weaver, and crossed by the Birmingham Grand Junction railway. Area 2,250 acres. Pop. in 1831, 468; in 1841, 467.

MINSHULL-VERNON, a township in Cheshire, in the p. and 4½ m. S by W of Middlewich, on the E bank of the Weaver, and crossed by the Middlewich branch of the Birmingham railway. Area 2,630 acres. Pop. in 1831, 385; in 1841, 406.

MINSK, an extensive government of European Russia, comprehending that part of Lithuania which corresponds to the old palatinate of Minsk, as well as portions of the palatinates of Polotzk, Wilna, and Novogrodek. It extends from the Dwina on the N,

to the frontiers of Volhynia on the S, between the parallels of 51° 30′ and 56° N. Its general outline is triangular, having its apex on the Dwina and its base on the Pripet. The governments of Vitebsk, Moghilev, and Chernigov, stretch along its E side; on the S it borders on Kiev and Volhynia; and on the W it is skirted by Grodno and Vilna. Its area is 78,500 sq. versts, or 34,457 sq. m. Its pop. in 1838 was 1,034,800, of whom 100,000 were Jews; in 1846, it was 1,046,400. Like the rest of Lithuania, this prov. is little better than a dead flat, of great productiveness wherever the natural fertility of the soil is called into operation by culture; but in great part, particularly in the S, overrun with marshes, and in other places shrouded with extensive forests. The soil is alluvial. A low chain of hills which crosses this prov. between the parallels of 54° and 55°, rising a little to the N of the city of Minsk, separates the waters flowing to the Black sea from those which fall into the Baltic. The rivers are numerous, and some are of considerable size, though they acquire a much larger volume after leaving this prov. The chief are the Dwina, which skirts it for a brief distance on the N, and its affluents the Disna; the Beresina, which waters its E section, and falls into the Dnieper on the r. bank; the Dnieper, which forms the SE boundary of the gov. from the point of confluence with the Beresina, to a little above the junction of the Pripet; and the Pripet, with its numerous tributaries from S and N, which water the whole S part, comprising above one-half of the superficies of this prov. The Niemen and the Vilna have their head-streams in the NW part of this gov. Of all these rivers, the Beresina is best known, as having been the scene of many a struggle on its banks between the Russians and the French, in the disastrous retreat from Moscow.—Wood, potash, hemp, flax, rye, leather, oxen, and horses, are the chief articles of export. A little iron is mined. The principal branches of domestic industry are linen and woollen weaving, distilling, tanning, and glass-making; but upon the whole, this gov. is one of the poorest and most backward of the empire. The inhabitants are a mixture of Poles, Lithuanians, Tartars, Armenians, Greeks, Jews, and Gypsies.

MINSK, the cap. of the above gov., is situated on the river Swislocz, 154 m. ENE of Grodno. Pop. in 1846, 20,000. It is an ancient town, the see of a Greek archb. of Lithuania, and of a Roman Catholic bishop; and has several churches, a synagogue, several Tartar mesheds or mosques, and a gymnasium. Its streets are narrow and irregular, and its houses mostly of wood.

MINSK, a small town of Poland, in the palatinate of Podlachia, 25 m. E by S of Warsaw.—Also a town of Poland, capital of the obwod and 8 m. S of Stanislawow, in the gub. of Masow, and 24 m. ESE of Warsaw. Pop. 375.

MINSKEP, a township in the p. of Aldborough, Yorkshire, 1½ m. SW of Boroughbridge. Area 1,140 acres. Pop. in 1831, 267; in 1841, 234.

MINSTEAD, a parish in Hants, 2¾ m. N by W of Lyndhurst. Area 8,590 acres. Pop. in 1831, 1,074; in 1841, 1,155. A triangular stone in this p. marks the site of the tree from which the arrow glanced that killed William Rufus.

MINSTER, a parish in Cornwall, 5 m. N by E of Camelford. Area 3,140 acres. Pop. in 1831, 497; in 1841, 573.—Also a parish in Kent, 4½ m. W by S of Ramsgate. Area 5,640 acres. Pop. in 1831, 911; in 1841, 1,380. Near the borders of Minster-level, in the SE part of the p., is Ebbsfleet, remarkable as the landing-place of Hengist and Horsa, on their first visit to Britain.

MINSTER-IN-SHEPPY, a parish in the isle of Sheppy, Kent, 2¾ m. ESE of Sheerness, including the ville of Sheerness. Area 7,510 acres. Pop. in 1801, 5,561; in 1831, 7,983; in 1841, 8,684.

MINSTER-LOVELL, a parish in Oxfordshire, 2½ m. NW of Witney, on the river Windrush. Area 1,560 acres. Pop. in 1831, 355; in 1841, 316.

MINSTERLEY, a chapelry in the p. of Westbury, Salop, 9 m. SW of Shrewsbury, on the river Rea. Pop. in 1831, 809; in 1841, 914.

MINSTER-SOUTH, or SOUTHMINSTER, a parish in Essex, 2¾ m. N by E of Burnham. Area 6,700 acres. Pop. in 1801, 1,128; in 1841, 1,444.

MINSTERWORTH, a parish in Gloucestershire, 3¾ m. WSW of Gloucester, on the N bank of the Severn. Area 1,810 acres. Pop. in 1841, 498.

MINTAO. See BATU.

MINTERN-MAGNA, a parish of Dorset, 9½ m. N by W of Dorchester, at the source of the Frome. Area 2,670 acres. Pop. in 1841, 354.

MINTING, a parish in Lincolnshire, 13 m. E by N of Lincoln, on a branch of the Witham. Area 1,910 acres. Pop. in 1831, 301; in 1841, 280.

MINTLYN, a parish in Norfolk, 2¾ m. E by S of King's Lynn. Area 1,100 acres. Pop. in 1831, 31; in 1841, 36.

MINTO, a parish in Roxburghshire, 5½ m. NE of Hawick. Pop. in 1831, 481; in 1841, 455.

MINTO, a county of Western Australia, bounded on the N by Howick and Beaufort counties; on the S by Peel co.; and on the W by Grantham co. At its NW corner is County Peak.—Also an original district of New South Wales, in the co. of Cumberland, bounded on the E and SE by George's river and Bunburycurran creek. — Also a parish in the same co. Pop. 503.

MINTOW, a town on the W coast of the island of Banka, in the Asiatic archipelago, at the mouth of a small river, at the foot of a mountain named Monapin. Pop. in 1822, about 2,000, of whom 1,580 were Malays, 266 Chinese, and 126 slaves. It is the chief seat of the tin trade. It is very unhealthy, and suffered extensively in 1824 from a fire. In its vicinity is a Dutch fort.

MINUANOS, a tribe of Indians of the Tapes family, in Brazil, in the prov. of Sao-Pedro-do-Rio-Grande. They originally inhabited the N and W banks of Lakes Mirim and Patos, but retired on the advance of the Portuguese to the banks of the Rios Caziquei, Batuvi, and Vaccahi. They are governed by a chief. They acknowledge a supreme Being, whom they call Tupa, but do not appear to offer him any species of worship. They inter with the dead a piece of bread, and the arms and other implements which they had used in life. They are well-formed, and are good horsemen. In character they are said to be generous and energetic. Their dwellings are formed of mats, and covered with skins.

MINUCCIANO, a town of the duchy and 29 m. NNW of Lucca, district and 21 m. NW of Borgo-a-Mozzano. Pop. 2,200. It lies in a small territory of the same name, 6 m. in length, and 5 m. in breadth, enclosed by the duchy of Modena on the E, and on the W by the enclave of Fivizzano.

MINUMURRA, a river of New South Wales, in the co. of Camden. It flows into the sea 3 m. N of Kiama.

MINVER (SAINT), a parish of Cornwall, 3½ m. NW by N of Wadebridge. Area 6,890 acres. Pop. in 1831, 1,110; in 1841, 1,139.

MINWORTH, a township in the p. of Cudworth, Warwickshire, 3½ m. NW by W of Coleshill, intersected by the Birmingham and Fazeley canal. Area 1,550 acres. Pop. in 1831, 324; in 1841, 329.

MINYEH. See MINIEH.

MINZIER, a town of Sardinia, in the dio. of Savoy and prov. of Carouge, mand. and 1½ m. NE of St. Julien, and 5 m. SW of Geneva. In the vicinity is the ancient castle of Noverry.

MIOES-VAND, a lake of Norway, in the dio. of

Christiansand, and N part of the bail. of Bradsberg, between the Tind, Tange, and Gousta Field. It is 24 m. in length from N to S, and 1½ m. in breadth. It receives the Qvoenna-elv, and empties itself by the Maan-elv into the Tindsöe.

MIO-FIORD, a bay on the NE coast of Iceland, in N lat. 66° 4′, between Finna-fiord and Sandvik.

MIOGLIA, a village of Sardinia, in the div. of Alexandria, prov. and 17 m. S of Acqui, mand. and 4 m. NE of Dego. Pop. 1,150.

MIOS, a commune of France, in the dep. of the Gironde, cant. and 6 m. SE of Audence, on the r. bank of the Leyre. Pop. 2,284.

MIOSEN, or Mios Lake, a fine lake in the central and best cultivated part of Norway, 63 m. in length, and varying in breadth from 1 to 5 m.; at an alt. of 426 ft. above sea-level at Christiania. [*Von Buch.*] It may be regarded as an expansion of the Lougen river, or Louven-elv, commencing at Lillehammer, at the S end of the well-cultivated Guldebrandsdal, and terminating at Minde. It discharges itself by the Wormen, which issuing from its SE extremity, falls into the Glommen. On its E side it sends off several small arms, the largest of which is opposite to the island of Helgeö. The scenery towards the head of the lake is very beautiful, though the breadth of the lake does not for the first 10 m. exceed 1 m. or 1½ m.; and it here bears resemblance to a broad river confined between high wooded hills. Towards its lower end, the mountains descend into it by gentle, green, and wooded slopes clothed with fir, alder, birch, mountain-ash, hazel, and poplar. Laing says the scenery of the M. is pastoral or beautiful rather than sublime. "Its shores are well-cultivated, and, with the exception of a few rough promontories dipping into the lake, the slopes are easy, and the back-country in view not strikingly high." The cultivation reaches far back among the hills, and over the summits of the lower heights, and the crops of oats, bere, rye, and potatoes here reared are very good. The outlet of the M. seems very small for so large a body of water. It is crossed by a ferry-boat and a rope stretched across; but it is stated to be 80 ft. in depth. The lake itself is often clear of ice, while the fiord of Christiania is quite frozen up. At the time of the great Lisbon earthquake, the waters of the M. suddenly rose 20 ft., and as suddenly retreated.—A railway has been projected to connect Christiania with the S extremity of this lake, on which steamers now ply regularly. The capital required for this undertaking is £450,000, one-half of which is to be furnished by the government. From the port of Christiania the line extends a distance of 42 m., through the most populated districts, to the lakes of Ojern and Miösen. The traffic is estimated at 6 per cent., without allowing for any increase consequent upon the introduction of a new system. Three-fourths of the work are already constructed, and the entire line is to be finished before the end of 1854. Interest at the rate of 4 per cent. is to be paid to the subscribers until the opening, and thenceforth the conditions are that the whole profits of the road shall be applied, first, to insure a payment to them of 5 per cent., after which the government are to take all that may accrue between 5 and 9 per cent., while any surplus beyond 9 per cent. is to be shared equally by both. The grant is for 100 years, at the end of which time the government may take possession upon payment of the £225,000 expended by the company; and during its continuance it gives freedom from all taxes and local dues, as well as the privilege of importing the necessary working materials, including coals, duty free.

MIOSI, a district of Japan, in the island of Sikokf, and prov. of Ava.

MIOUS, a river of Russia in Europe, in the gov. of the Don Cossacks, and district of the same name. It has its source a little to the NW of Grabovaïa, on the confines of the gov. of Yékatérinòslav; runs first E, then S; traces the W boundary of the district of Rostov, in the gov. last named; and, after a course of about 120 m., throws itself into the sea of Azof, 27 m. SW of Taganrog. Its principal affluent is the Krynka, which it receives on the r. Its banks are covered with fine forests of oak and fir.

MIOUS, or Miouskoe′-natchaltsvo, a district of Russia in Europe, in the SW part of the gov. of the Don Cossacks. It derives its name from a river by which it is intersected. Ysaeva is one of its chief towns.

MIPIBU, a small town of Brazil, in the prov. of Rio-Grande-do-Norte, pleasantly situated on Lake Papari and a river of the same name, 50 m. SSW of Natal, and 15 m. from the sea. Pop., consisting chiefly of Brazilians and Indians, 2,000. It has a parish-church and an elementary school. The surrounding district produces rice, millet, mandioc, and tobacco, in great abundance, and in small quantities sugar. The woods abound with fruit-trees, and the rivers with fish. The Mipibu flows into Lake Groahiras.

MIQUELON, an island of the Atlantic, near the S coast of Newfoundland, and to the SW of Fortune Bay, and NNW of the island of St. Pierre, in N lat. 47° 4′, and W long. 56° 20′. To the S of and connected by a causeway of sand with Miquelon, is Langlade, or Little Miquelon island. Their united superficies amounts to about 42 m., and they form one parish. Pop. in 1842, 475. M. terminates in the N in a cape of the same name, and near that cape is an extensive roadstead also bearing the name of Maquelon. To the SE is Dunn harbour. This island is better provided with wood than that of St. Pierre, and it has also better pasturage. The inhabitants, who are few in number, live chiefly on the coasts, and in common with the inhabitants of the other islands in the group, employ themselves chiefly in fishing. Little Miquelon, or Langlade, terminates in the S in Cape Langlade, and on the NW has a fine bay. It abounds in wood, has fine meadows, and has also some good arable ground. The two islands of Miquelon form, with St. Pierre, a French colony, under the government of a functionary who has the titles of commandant and administrator. See Saint-Pierre.

MIQUELON (Little), or Langlade. See Miquelon.

MIQUINDANY, or Mikindani, a village and port of East Africa, in Zanguebar, in the gov. of Quiloa, a little to the SE of Mongallo, in S lat. 10° 10′.

MIR, a town of Russia in Europe, in the gov. of Grodno, district and 30 m. ESE of Novogrodek, and 60 m. NE of Slonim. It has a fortress.

MIRA, a town of Austrian Lombardy, in the gov. and deleg. and 11 m. W of Venice, district and 3 m. ENE of Dolo, on the Brenta-Morta, below the junction of the canals of Mirano and Brenta-Novissima. Pop. 2,000.

MIRA, a town of Portugal, in the prov. of Beira, comarca and 21 m. NW of Coimbra, and 18 m. S of Aveira, on a small island of the Atlantic. Pop. 6,000.—Also a town of Spain, in New Castile, in the prov. and 42 m. WSW of Cuenca, at the foot of a high mountain, on the Moya. Pop. 1,598. It has a parish-church, several convents, and a public granary, and contains manufactories of pottery, coarse cloth, and linen, and a fulling-mill.

MIRA, a river of Ecuador, which has its source in the Andes, in the prov. of Imbabura, runs NW, and falls by several mouths into the Pacific. At

some distance from its r. bank, and near its source, is a town of the same name, 65 m. NE of Quito.

MIRABEAU, a village of France, in the dep. of Vaucluse, cant. and 8 m. E of Pertuis, near the r. bank of the Durance. Pop. 600. It was formerly a seignory, from which the family took its name.

MIRABECHE, a town of Spain, in Old Castile, in the prov. and 33 m. NE of Burgos, and partido of Miranda-de-Ebro, at the foot of a mountain. Pop. 400.

MIRABEEL, a commune and town of France, in the dep. of the Tarn and Garonne, cant. and 6 m. W of Caussade, and 10 m. NNE of Montauban. Pop. 1,670.—Also a village in the dep. of the Ardeche, cant. and 4 m. SSW of Villeneuf-de-Berg. Pop. 534.

MIRABEL, or MIRAVEL, a town of Spain, in Estremadura, in the prov. and 39 m. NNE of Caceres, partido and 16 m. SSW of Plasencia, at the foot of a mountain, on which is a fortress. Pop. 1,207. It has an oil and several spinning mills.

MIRABEL (BAY), an indentation of the N coast of the island of Candia, in N lat. 35° 12′, and E long. 25° 50′. It is 12 m. in depth, and has a breadth at the entrance, between Cape St. John and Point Psyra, of about 11 m. It contains, on the NW, the port of Spina-Longa, and in the SW is the ruinous fort of the same name.

MIRABELLA, a town of Naples, in the Principato-Ultra, 10 m. SE of Benevento. Pop. 5,800.—Also a village of Sicily, in the prov. of Catania, district of Calatagirone.

MIRABELLO, a town of Naples, in the prov. of Sannio, 3 m. S of Campobasso. Pop. 2,000.—Also a village of Austrian-Lombardy, 2 m. N of Pavia. Pop. 900.

MIRA-BUENA, a town of Spain, in the prov. and 36 m. NE of Guadalajara. Pop. 516.

MIRACA, a village of Greece, in the Morea, 12 m. E of Pyrgos, on the r. bank of the Rufia.

MIRADOUX, a town of France, in the dep. of Gers, 7 m. NE of Lectoure. Pop. 1,750.

MIRA-EL-RIO, a town of Spain, in the prov. and 24 m. NE of Guadalajara, near the Bornoba.

MIRAFLORES, a town of Peru, 8 m. S of Lima.—Also a town of the Plata confederation, in the prov. of Tucuman, on the Salado.—Also a settlement of New Granada, in the prov. of Tunja; and another in the prov. of Popayan.

MIRAFLORES-DE-LA-SIERRA, a town of Spain, in the prov. and 30 m. N of Madrid. Pop. 2,000.

MIRAGAMICHI, a harbour on the NE coast of Nova Scotia, to the SE of Pictou harbour, and 6 m. NE of New Glasgow.

MIRAGE, a natural phenomenon occurring in almost every country situated between the Tropics, and frequently noticed by travellers, especially in the East, the *sirab* or 'Water of the Desert' of the Persians, and *chittram* of Western India. It is chiefly to be observed when the atmosphere is most clear, and when the sun is at its height, and consists of a sudden appearance, on the horizon, of trees, palaces, gardens, lakes, ships, and other objects. Monge was the first person who gave any scientific explanation of it. Forming a part of the French expedition to Egypt, he was, for a moment, the dupe of an illusion which deceived the entire army; but it was only for a moment, and he speedily detected the causes of his error. When the ground is intensely heated by the sun, and the weather calm, experience proves that the lower strata of air are dilated by the heat of the earth; and that, commencing from a certain height, they are less dense in proportion as they approach the soil. In that case, it happens, that the rays of light passing from objects placed above the horizon towards the earth, having to traverse layers of air of different densities, are refracted; and that finally, presenting themselves very obliquely to enter into a new stratum, they fail to penetrate it, and are reflected. Then, if a spectator be so placed as to receive, at once, the rays of light which proceed from objects directly to himself, and those which, passing from the same objects towards the ground, are reflected, that spectator will see both the objects themselves, and their images reversed beneath them. Now if the same spectator be placed in the midst of a plain so level and extensive that those rays, projected from that portion of the sky which touches the horizon in the direction of the ground, present themselves to the expanded strata of air in a direction so oblique to their surface that those rays are reflected, then the spectator in question will see on the earth the image of the sky; and this image it is which has to his eyes the perfect aspect of a sheet of limpid water. All the varieties of this illusion depend on the irregular refraction of the rays of light. The term *mirage* properly means 'suspension,' for at sea ships and other objects frequently appear not only inverted but suspended in the clouds, in consequence of irregular refraction. A form of mirage, occurring at Reggio in the straits of Messina, has received the name of the *Fata Morgana*.

MIRAGOANE, a town of the island of Hayti, on the NW coast, 31 leagues E by S of Port-au-Prince, on the gulf of Leogane.

MIR-ALLAH, a caravanserai in Afghanistan, 42 m. S of Herat, on the road thence to Candahar, in a fertile and well-watered locality. It is now in a ruinous condition.

MIRAMBEAU, a town of France, in the dep. of Charente-Inferieure, 12 m. S of Pons. Pop. 2,414.

MIRAMBEL, a walled town of Spain, in the prov. and 36 m. ENE of Teruel. Pop. 900.

MIRAMICHI, a port, bay, and river, on the NE coast of New Brunswick, and co. of Northumberland, in N lat. 47° 10′. The entrance into the bay has Point-Portage for its N point; its S side is formed by Escuminax point, which is 53 m. NE of Shediac harbour, and 34 m. SE of the mouth of the Nipissighit river which empties into Chaleur bay. The river, which is the second in the prov. in importance, rises in Carleton, and its heads communicate by easy portages with the St. John. About 50 m. from the ocean, the two main head-streams unite in forming its main body, which is navigable for 50 m. by large vessels. It derives its chief importance from the immense forests of red and white pine which clothe its banks. At the mouth of the river, on each side, are landing-places where a few cargoes are loaded, but the chief seats of business are 20 m. up the river, at Chatham, Douglas, Nelson, and Newcastle, at all which places are wharfs, warehouses, and sawmills; there are also important establishments as high up as the division of the stream into its NW and SW head-branches. The earliest traffic carried on on this river was in furs and fish; the lumber-trade took its rise about the year 1814. In October 1825 the whole northern borders of the M. were devastated by a fire which reduced the forests to a mass of charred timber, and destroyed all the towns and villages on that side. The conflagration travelled 85 m. in 9 hours, and was in some places 25 m. in breadth, and the cinders and smoke occasioned by it were observed at Quebec, and even as far as the Bermudas. Since the fire, hardwood, chiefly poplar and white birch, with a sprinkling of maples, has taken the place of the pines; but the background in the rear of the settlements on the river has still a very desolate appearance.

MIRAMONT, a commune of France, in the dep. of Lot-et-Garonne, 12 m. NE of Marmande. Pop. 1,636.—Also a commune in the dep. of Haute-Garonne, cant. of St. Gaudens. Pop. 1,676.—Also a town in the dep. of Tarn-et-Garonne, cant. and 6 m. WNW of Bourg-de-Nizac. Pop. 550.

MIRANDA. See EO.

MIRANDA-DE-ARGA, a town of Spain, in the prov. and 15 m. SSE of Pampeluna, on the l. bank of the Arga. Pop. 1,650.

MIRANDA-DEL-CASTANAR, a town of Spain, in the prov. and 42 m. SSW of Salamanca. Pop. 1,760.

MIRANDA-DO-CORVO, a town of Portugal, in the prov. of Beira, on the river Dueca, 12 m. SE of Coimbra. Pop. 3,880.

MIRANDA-DE-DOURO, a town of Portugal, in

the prov. of Tras-os-Montes, on the r. bank of the Douro, 28 m. SE of Braganza. Pop. 4,840.

MIRANDA-DO-EBRO, a town of Spain, in the prov. of Burgos, on the r. bank of the river Ebro, 32 m. NE of Burgos. Pop. 2,390.

MIRANDE, a walled town of France, in the dep. of Gers, on the l. bank of the Bayse, 11 m. SW of Auch. Pop. 2,706. It has tanneries and distilleries. The arrond. of M. has an area of 171,360 hect.; and comprises 8 cants.

MIRANDELA, a fortified town of Portugal, in the prov. of Tras-os Montes, 32 m. WSW of Braganza, on the l. bank of the Tua, opposite Golfeira. Pop. 1,700.

MIRANDOL, a village in the S of France, in the dep. of Tarn, 14 m. N of Alby. Pop. 2,059.

MIRANDOLA, or La Mirandole, a considerable inland town of Italy, in the duchy of Modena, the cap. of a prov. of the same name, situated on the Burana, 16 m. NNE of Modena. Pop. 4,600. It is regularly fortified, and defended by a citadel and castle called La Rocca. It has manufactures of silk and linen.

MIRANHAS, a tribe of Indians in South America, who live on the banks of the Jupura, above the cataracts of Cupati. They are regarded as occupying almost the lowest point in the scale of civilization, scarcely recognising the domestic relations, freely practising cannibalism, and apparently destitute of any idea of a superior being.

MIRANO, a town of Austrian Italy, in the prov. of Venice, situated 10 m. NE of Padua, on a spot insulated by the river Musone, and at the commencement of a canal, which, running S, joins the Musone to the Brenta-Morta. Pop. 5,500.

MIRANPUR, a village of Northern India, in the Punjab, in N lat. 29° 41′.

MIRANZI, a valley of Northern India, to the W of Kohat, and adjoining Hungu. It contains a few villages, which are now regarded as under British protection.

MIRAPORVOS, a rocky islet among the Bahamas, near the SW coast of Crooked island, in N lat. 21° 55′.

MIRAT, a town of Hindostan, in the prov. of Ajmir, 43 m. NW of Ajmir.

MIRAU, Murau, or Mirow, a town of Austria, in Moravia, in the ldgb. of Brunn, circle and 24 m. NW of Olmutz, near the Muglitz. Pop. 690.

MIRAUMONT, a commune of France, in the dep. of the Somme, cant. and 8 m. NNE of Albert, and 18 m. NNW of Peronne, at the source of a small river of the same name, which waters Albert; flows SW; and, after a course of about 27 m., throws itself into the Somme, by the r. bank, at Corbie. Pop. 1,120.

MIRAVAL-CABARDES, a village of France, in the dep. of the Aude, cant. and ¾ m. NW of Mas-Cabardes, and 12 m. N of Carcassone, on the Durviel. Pop. 1,018. It has several fulling-mills.

MIRAVALLES, a town of Spain, in the prov. of Vizcaya, and partido of Valmaseda, 8 m. SSW of Bilboa, and 7 m. N of Orozo, on the l. bank of the Nerpion, which is here crossed by two bridges. Pop. 400. It has an hospital, and several iron-works.—Also a volcano of Guatimala, in the state of Nicaragua.

MIRAVAUX. See Mirevals.

MIRAVET, a town of Spain, in Catalonia, in the prov. and 32 m. W of Tarragona, and partido of Gandesa, near the Ebro. Pop. 1,726. It is situated between hills, on the summit of one of which are the ruins of a fortress which belonged to the Templars, and contains a parish-church and a custom-house.

MIRAVETE-DE-LA-SIERRA, a town of Spain, in Aragon, in the prov. and 23 m. NE of Aragon, and partido of Aliaga. It is intersected by the Guadalope, which is here crossed by a bridge, and is commanded by an old castle. It contains an hospital, and has manufactories of varieties of woollen fabrics.

MIRAY BAY, an arm of the Atlantic, on the E coast of Cape Breton, at the mouth of a river of the same name, in N lat. 46°, W long. 59° 50′. It is 6 m. in length from E to W, and 3 m. in breadth. The river, consisting to a great extent of a series of lakes, has its source about 40 m. in the interior. Its entrance is obstructed by a bar, by which its navigation is considerably impeded. The soil on its banks is light, but generally fertile. It has a village of the same name on its banks.

MIRBUL, a pass over the Snowy Panjal, on the E frontier of Cashmere, leading from the valley of Burengo on the W, to that of Kishtewar on the E, in N lat. 33° 20′. It has an alt. of 11,500 ft. above sea-level.

MIRCUT, a town of Afghanistan, in the prov. of Cabul, in N lat. 33° 31′.

MIRDAI, or Kach-Tach, a mountain of Chinese Turkistan, one of the loftiest in the chain of the Thsoung-ling mountains, about 200 m. SE of Yarkand. It consists entirely of jades. It is crossed by the road from Yarkand to India.

MIRE′, a village of France, in the dep. of the Maine-et-Loire, cant. and 6 m. N of Chateauneuf, and 20 m. ENE of Segre. Pop. 860.

MIREBALAIS, an ancient district of France, in Haut-Poitou, now comprised in the W part of the dep. of the Vienne. It derived its name from its cap., Mirabeau.

MIREBALAIS (Le), a town of Hayti, in the dep. of the West, 32 m. NNE of Port-au-Prince, on the l. bank of the Artibonite.

MIREBEAU, a canton, commune, and town of France, in the dep. of the Vienne, and arrond. of Poitiers. The cant. comprises 10 coms. Pop. in 1831, 8,002; in 1841, 8,475. The town is 17 m. NNW of Poitiers. Pop. in 1841, 2,556. It has a considerable trade in sheep, grain, wine, and wool. This town was formerly capital of the ancient territory of Mirebalais, in Haut-Poitou. It was built by Foulques-de-Nera, count of Anjou. It had a castle, which was destroyed in the 17th cent.

MIREBEAU-SUR-BE′ZE, a canton, commune, and town of France, in the dep. of the Cote-d'Or, and arrond. of Dijon. The cant. comprises 22 coms. Pop. in 1831, 8,935; in 1841, 9,344. The town is 15 m. ENE of Dijon, on the Beze, an affluent of the Saone. Pop. 1,227. It has an hospital, and possesses manufactories of serge, druggets, hats, and pottery.

MIRECOURT, a town of France, in the dep. of Vosges, on the l. bank of the small river Madon, 30 m. S of Nancy. Pop. in 1841, 5,577. It has manufactories of lace and of musical instruments, and some commerce in the light wines of the neighbourhood, and in coal, which is wrought in the vicinity.—The arrond. has an area of 106,980 hect., and comprises 6 cantons.

MIREFLEUR, a town of France, in the dep. of Puy-de-Dome, 9 m. SE of Clermont. Pop. 1,324.

MIREMONT, a town of France, in the dep. of Puy-de-Dome, 23 m. W of Riom, on the l. bank of the Sioule. Pop. 1,324.—Also a town in the dep. of Haute-Garonne, 12 m. NE of Rieux.—Also a small town in the dep. of Dordogne, 10 m. SW of Montignac.

MIRENI, a small town of Wallachia, on the Argis, 30 m. S of Bucharest.

MIREPOIX, a town of France, in the dep. of Ariège, on the Lers, 18 m. NE of Tarascon. Pop. 4,160. It has woollen factories; and trades in cattle, wool, iron, and grain.

MIREVAIL, or MIREVAL-LAURAGAIS, a village of France, in the dep. of the Aude, cant. and 5 m. S of Castelnaudry. Pop. 570.

MIREVALS, a town of France, in the dep. of the Herault, cant. and 5 m. NE of Frontignan. Pop. 300.

MIRFIELD, a parish in the W. R. of Yorkshire, 5 m. NE of Huddersfield, on the Lancashire and Yorkshire railway. Area 3,390 acres. Pop. 6,919.

MIRGOROD, a town of Russia in Europe, in the gov. and 54 m. NW of Poltova, on the l. bank of the Khorol. Pop. 5,900. It has 3 churches, and carries on a considerable trade in earthenware.

MIRIBEL, a commune and town of France, in the dep. of the Ain, cant. and 5 m. WSW of Montluel, and 8 m. NE of Lyons, near the r. bank of the Rhone. Pop. 2,400.—Also a commune in the dep. of the Isere, and cant. of Saint Laurent-du-Pont, 21 m. N of Grenoble. Pop. 2,711.—Also a village in the dep. of the Drome, cant. and 12 m. N of Romans, near the r. bank of the Herbasse. Pop. 600.

MIRIK (CAPE), a headland of the Sahara, on the Atlantic, to the S of the embouchure of St. John's river, and 114 m. SE of Cape Blanco, in N lat. 19° 22′ 14″, W long. 16° 31′ 21″.

MIRIM, or MERIM (LAKE), a lake of South America, between the parallels of 32° and 33° 40′, occupying a kind of debatable ground on the E frontier of the Banda-Oriental, and the S extremity of Brazil. It is of very irregular outline, but has a length of upwards of 100 m., with a breadth varying from 5 to 25 m. It receives the rivers Yaguarron, Tacuari, and Cebollati, on its W side, and discharges itself into the Lago-dos-Patos by the San-Gonzales river. It is very shallow, and in the rainy season widely extends its borders. Vessels of from 50 to 70 tons burthen ascend by the Gonzales into Lake M., and thence ascend the larger rivers which flow into it. By the convention of 5th May 1852, Brazil abandoned the line of frontier which the treaties of Oct. 1851 accorded to her, along the banks of the rivers Cebollati and Tacuari, and the cession of the right of free navigation on Lake M. to the Oriental flag.

MIRIRIPE, a small river of Brazil, in the prov. of Parahiba, which runs E, and falls into the bay of Lucena, to the N of the point of the same name.

MIRITI, a parish and town of Brazil, in the prov. and 15 m. NW of Rio-de-Janeiro, on a river of the same name, and on the road thence to Barbacena, in the prov. of Minas-Geraes. Pop. 3,000. It has several churches. In the surrounding country sugar, rice, coffee, and millet, are cultivated to a considerable extent. The river M. runs from W to E, and throws itself into the bay of Rio-de-Janeiro.

MIRITIBA, a village of Brazil, in the prov. of Maranhão, and district of Brejo, on a river of the same name, an affluent of the Parnahiba.

MIRJAOW, a town of Hindostan, in the prov. of Canara. It stands upon an inlet of the sea, and is supposed to have been the *Musiris* of the ancients. It was nearly destroyed by Hyder Ali in 1773. The neighbouring forests abound with teak timber, and black pepper grows spontaneously on the hills.

MIRKA-SERAI, a town of Bengal, in the district of Chittagong, in N lat. 26° 35′.

MIRLONDAINE, a commune of Belgium, in the prov. of Liege, and dep. of Ampsin. Pop. 113.

MIRMANDE, a commune of France, in the dep. of the Drome, cant. and 4 m. S of Loriol, and 18 m. S of Valence, on a steep hill. Pop. 2,166. It has several silk-spinning mills, and tile and lime-kilns.

MIROIR, a summit of the Jura chain, in the dep. of the Ain, and cant. of Collonge. It has an alt. of 4,060 ft. above the lake of Geneva.

MIRON (EL), a town of Spain, in Old Castile, in the prov. of Avila, partido and 7 m. NNW of Piedrahita. Pop. 270. It contains an old castle, and has a manufactory of coarse cloth. Its trade consists chiefly in woollen yarn.

MIROPOLE (NOV), a town of Russia in Europe, in the gov. of Volhynia, district and 39 m. SSE of Novgrad-Volynsk, and 36 m. NE of Staro-Konstantinow, on the r. bank of the Stuez.

MIROPOLIE, a town of Russia in Europe, in the gov. of Koursk, district and 12 m. S of Sudja, on the l. bank of the Psiol, at the junction of the Kudava and Studenek. Pop. 5,000. It is enclosed by ramparts of earth and a ditch, and contains 7 churches. It has several distilleries.

MIROSLAW, a town of Poland, in the woiwodie of Augustowo, obwod and 30 m. NE of Segny, and 45 m. ENE of Suwalki. Pop. 220.

MIROTITZ, a small town of Austria, in Bohemia, in the circle of Prachin, 10 m. NNW of Pisek, on the Lomitz. Pop. 1,253.

MIROW, a town of Mecklenburg-Strelitz, 12 m. WSW of New-Strelitz. Pop. 1,378, of whom 52 are Jews. It has a normal school, and contains manufactories of sponges and of tobacco, a brewery, and a spinning-mill. See also MIRAU.

MIROWITZ, a town of Austria, in Bohemia, in the circle of Prachin, 15 m. NNW of Pisek, and 33 m. S of Beraun, on the l. bank of the Rziczka. Pop. 475. It has several large breweries.

MIRWAERT, a commune of Belgium, in the prov. of Luxemburg, and dep. of Awenne. Pop. 215.

MIRWANAH, a town of Hindostan, in the prov. of Delhi, 26 m. W of Kurnaue.

MIRZA-MOMBAROK, a port of Abyssinia, on the Red sea, 60 m. NW of Massouah. It is frequented by the Bedouins.

MIRZANAGUR, a town of Hindostan, in the prov. of Bengal, and dist. of Jessore, 53 m. NE of Calcutta.

MIRZAPORE, a district of British India, in the presidency of Bengal, and prov. of Benares. Area 3,650 sq. m. Pop. 1,000,000.—Its cap., of the same name, is situated at the foot of a range of hills, and on the S bank of the river Ganges, 30 m. WSW of Benares, in N lat. 25° 10′. Its pop. was 50,000 in 1801; and has recently been estimated at 150,000. It is a civil and military station; and also a flourishing trading-town, being the chief mart for silk and cotton, and all the productions of the territories lying to the westward. It has also an extensive manufactory of carpets, and some iron-works. Several opulent merchants and indigo-planters, both native and European, reside in the town or vicinity; and their bungalows add much to the appearance of the place, intermixed with Hindu temples, and flights of *ghauts* or stone stairs leading to the river. It has been proposed to connect M. with Calcutta by a direct line to Burdwan Shirgotty, and Chunar, a distance of 450 m.; or, according to another plan, by a railway running up the valley of the Ganges, by Rajmahl, Monghyr, Patna, and Benares, 549 m. in length. The river winds greatly above and below M.; and the stream, being confined between high banks, is in consequence deep.—Also a town of the prov. of Berar, formerly the cap. of the dist. of Corair, belonging to the Chohan rajah, a tributary of the Mahrattas.—Also a village in the Punjab, on the l. bank of the Chenab, 20 m. S of Multan.—There are several other places of the same name in India, but none of consequence.

MIS, a river of Russia in Europe, in the gov. of Courland, which has its source 30 m. W of Alt-Zelburg; runs NW, and then SW; and flows into the Eckau, on the r. bank, 4 m. NE of Mitau, after a course of 60 m.

MISAKI (CAPE), a long promontory forming the

extreme W point of the Japanese island of Stikof, at the entrance to the Swounda sea by the Bungo channel, in N lat. 33° 22′, E long. 132° 18′. It approaches within 10 m. of a projecting headland on the E coast of Kiu-siu.

MISAMIS, a district and fortress of the island of Mindanão, in the Philippine archipelago. The district contains about 18,500 inhabitants. The fortress is on the N coast of the island, on the bay of Panguil, 165 m. ENE of Samboanga.

MISAVA, a district of Japan, in the island of Nifon, and prov. of Mouts.

MISCHEK, or Mnissek, a town of Bohemia, in the circle and 11 m. SE of Beraun, and 18 m. SW of Prague. Pop. 650.

MISCOM, a commune of Belgium, in the prov. of Brabant, and dep. of Kersbeek-Miscom. Pop. 314.

MISCOU, an island of New Brunswick, on the S side of the entrance to the bay of Chaleurs. It is 20 m. in circumf., and is an important resort of fishing-craft.

MISELAR, or Manselar, an island of the Asiatic archipelago, off the bay of Tappanuly, on the W coast of Sumatra, in N lat. 39°, E long. 98° 30′. It is about 15 m. in circumf., and rises to a considerable height.

MISENE, or Miseno (Cape), a headland of Naples, in the prov. and 11 m. SW of the town of that name, district and 5 m. SSW of Pouzzuoli, at the entrance of the gulf of Naples, in N lat. 40° 46′ 15″, E long. 14° 5′ 0″. It is composed of a block of tufa or limestone of considerable height. In its vicinity, to the N, are the remains of the ancient town and port of *Misenum*.

MISERDON, a parish in Gloucestershire, 6 m. NE of Stroud. Area 2,410 acres. Pop. 509.

MISE'RIE, a commune of Belgium, in the prov. of W. Flanders, and dep. of Beernem. Pop. 200.

MISERY (Mount), a summit of the island of Saint Christopher, in the W. Indies, 8 m. WNW of Basse-Terre. It has an alt. of 3,711 ft. above sea-level, and is an extinct volcano. See article Christopher's (Saint.)

MISHKINYA, a village of Afghanistan, in the range of the Suliman mountains, 60 m. WNW of Dera Ismail Khan, on the road thence through the Gomul pass.

MISILLAC, a village of France, in the dep. of the Loire-Inferieure, cant. and 7 m. WSW of St. Gildas-des-Bois, and 15 m. NW of Savenay. Pop. 2,615.

MISILMERI, a town of Sicily, in the prov. and district and 8 m. SSE of Palermo, on the l. bank of the Bagaria.

MISIMBATY, a small island of the Mozambique channel, off the coast of Zanguebar, and of the state of Quiloa, and to the N of the Querimba archipelago, in S lat. 10° 12′.

MISINABE, a lake of Upper Canada, about 45 m. NE of Lake Superior. It is about 24 m. in length from N to S, and discharges itself by Moose river, which issues from its N extremity, into James bay. It has a trading establishment of the same name on its NE bank.

MISITRA, Mistra, or Mistras, a town of Greece, in the SE part of the Morea, 28 m. SSE of Tripolizza, on the declivity of an insulated rock, at the foot of Mount Taygetus. From a distance it has a fine appearance, the houses being interspersed with gardens, cypresses, and orange-trees; and it was at one time one of the strongest places in the Morea; the interior, however, presents many marks of decay. A citadel, built on an elevated position, commands a fine view of the plains of Laconia, the site of Sparta, the vale of the Eurotas, and the snow-crested Paximadi, one of the five summits of Taygetus. The streets are narrow, dirty, and unpaved; and many of the houses are of wood, and only one story high. It is the see of a Greek bishop. Before the Russian invasion of the Morea in 1769, its pop. was estimated at between 12,000 and 15,000; in 1806 it contained nearly 7,000 inhabitants; at present, however, its pop. does not exceed 4,000. It was sacked and burned by Ibrahim Pasha in 1825. The country in the vicinity is fertile and well-cultivated; at one time the district of M. produced annually not less than 75,000 lbs. of silk, and the olive-plantations produced in good years 2,400,000 okes of oil. Among the ruins of M. are several fragments of relics of the famous Sparta. The spot on which that city stood is, however, 3 m. SE of M.

MISKATENU, an oasis and wells in the Sahara, on the road from Murzuk to Kouka, at the S extremity of Wady Kawass, and 15 m. S of Bilma.

MIŠKE, a town of Hungary, in the comitat of Eisenburg, 22 m. E of Georgenburg, and 29 m. ESE of Güns. Pop. 422.

MISKHEL, a village of Afghanistan, 40 m. SE of Ghuzni.

MISKISK, or Slieve-Miskisk, a range of mountains in co. Cork, running S between the Kenmare estuary and Bantry bay.

MISKOLCZ, a town of Hungary, capital of the gsp. of Borsod, 51 m. SSW of Kaschau, and 42 m. SSE of Rosenau, on the l. bank of the Sinwa, in N lat. 48° 5′ 56″, E long. 16° 25′ 2″. Pop. in 1843, 28,000, chiefly Protestants. It is large and well-built, and contains numerous Lutheran, Greek, and Roman Catholic churches, a synagogue, several gymnasia, a Greek national school, a Catholic high school, and a convent. Wine and melons are extensively cultivated in the environs. The former, and the produce of the neighbouring iron-mines, constitute its chief articles of trade.

MISLAREUTH, a village of Saxony, in Voigtland, SW of Plauen. Pop. 370.

MISLIBERSITZ, a town of Moravia, in the circle and 16 m. NNW of Znaim, and 9 m. ENE of Budwitz. Pop. in 1834, 701.

MISLING, a village of Austria, in Styria, in the circle and NW of Cilly. Pop. 660.

MISLITZ, or Miroslaw, a town of Moravia, in the circle and 14 m. ENE of Znaim, between two mountains. Pop. in 1834, 795.

MISLOWITZ, a town of Prussia, in the prov. of Silesia, reg. of Oppeln, and circle of Beuthen, on the Brzemsa. Pop. 700. It has a custom-house. Coal and zinc are found in the environs.

MISNIA. See Meissen.

MISON, a commune of France, in the dep. of the Lower Alps, cant. and 8 m. NW of Sisteron. Pop. 1,411.

MISOX, or Mesocco, a jurisdiction and village of Switzerland, in the cant. of the Grisons, in a valley of the same name, and on the r. bank of the Moesa, 39 m. SSW of Coire, and 18 m. NE of Bellinzona. Pop. (Cath.) 1,182. It contains the ruins of an ancient fortress. The valley extends southwards from Mount St. Bernardin, and is 27 m. in length. It is watered by the Moesa, and is very fertile. The jurisdiction contains about 6,200 inhabitants. They are Catholics, and speak a corruption of the Italian language, or a dialect of the Rhætian tongue.

MISPILLON, a hundred of Kent co., in the state of Delaware, U. S. Pop. in 1840, 3,069.

MISSAGLIA, a district and market-town of Austria, in Lombardy, in the prov. of Coma. The district contains 24 coms., and 14,447 inhabitants. The town is 15 m. SE of Como, and 20 m. NNE of Milan. Pop. 2,100.

MISSAH, or OBOE, an island in the sea of Babel-Mandeb, at the mouth of the Anazo, in Abyssinia.

MISSAO-DO-JACUHIPE, a village of Brazil, in the prov. of Alagoas, on the Jacuhipe. Pop. in 1832, 800. Its inhabitants are Indians of the Cabanos tribe.

MISSAO-DE-SAO-JOAO-DE-CORTES, a parish of Brazil, in the prov. of Maranhão, near the Jacaruana.

MISSAO-DE-JOAZEIRO, an old missionary establishment, and now a parish, in the prov. of Bahia, on the Rio São Francisco.

MISSAO-NOVA, a village of Brazil, in the prov. of Ceara, and district of Ico, inhabited by Indians of the Cairiris-Novas tribe.

MISSAO-DA-PALMEIRA, a modern missionary settlement in Brazil, in the prov. of Alagoas, and district of Palmeira-dos-Indios. Pop. in 1841, 444.

MISSAO-DO-RIO-DA-CORDA, a missionary settlement of Brazil, in the prov. of Maranhão, near the junction of the Corda and Mearim rivers, and about 320 m. S of São-Luiz. It was founded in 1841.

MISSAO-DO-SAHI, a village of Brazil, in the prov. of Bahia, 10 m. from Villanova-da-Rainha. The surrounding district is fertile and well-watered, and produces rice, millet, and mandioc.

MISSAO-VELHA, a village of Brazil, in the prov. of Ceara, district and 40 m. ESE of Crato. Its inhabitants are chiefly of European extraction. They employ themselves chiefly in the chase, fishing, and the culture of a few ordinary articles of provision.

MISSE'GRE, a village of France, in the dep. of the Aude, cant. and 8 m. NE of Coniza. Pop. 187. It has quarries of marble.

MISSELAD. See OM-TEYMAN.

MISSEN, a village of Bavaria, in the circle of Suabia, SW of Kemplen. Pop. 140.

MISSENDEN (GREAT), a parish in Buckinghamshire, $4\frac{3}{4}$ m. NW of Amersham. Area 5,320 acres. Pop. in 1831, 1,827; in 1841, 2,225.

MISSENDEN (LITTLE), a parish in Buckinghamshire, $2\frac{3}{4}$ m. WNW of Amersham. Area 3,350 acres. Pop. in 1831, 937; in 1841, 1,011.

MISSIGUINIPI, a lake of Lower Canada, to the NE of Lake St. John. It empties itself on the S into the Grande-Decharge, a tributary to the Saguenay. A little to the E of this lake is Little Missiguinipe, which discharges itself into the Saguenay.

MISSIMA, a district of Japan, in the island of Nifon, and prov. of Yetsougo.—Also a town in the same island, in the prov. of Nagato, 240 m. W of Meaco, on the strait of Corea.

MISSINIPPI. See CHURCHILL.

MISSIONARY STATION, a settlement of Floyd's co., in the state of Georgia, U. S., 173 m. NW of Milledgeville, on Coosa river.

MISSIONES, a prov. of La Plata, bounded on the N by Paraguay and Brazil, from which it is separated by the Parana, and its affluent the Yguazu or Grande Curitiba; on the E and SE by Brazil, from which it is separated by the Uruguay; and on the W by the prov. of Corrientes, with which it is now identified. It takes its name from the once-famed missions of the Jesuits, the greater part of which were situated on the Parana and the Uruguay.

MISSIQUASH, a river which has its source in New Brunswick, about 5 m. from Verte Bay; runs SW; and throws itself into Cumberland basin, an arm of Fundy bay, between Forts Cumberland and Lawrence, and after a course of about 18 m.

MISSISQUE, a river of the state of Vermont, U. S., which has its source in Orleans co.; runs NE into Canada; re-enters Vermont; directs its course first SW, then W; and falls into Missisque bay, a branch of Lake Champlain, in Highgate, near the Canada line, and after a course of 75 m. It is navigable a distance of 6 m. for vessels of 50 tons.

MISSISSINEWA, a river of the state of Indiana, U. S., which has its source in the state of Ohio; runs NW; and falls into the Wabash, a little above Peru. —Also a township of Darke co., in the state of Ohio. Pop. in 1840, 127.

MISSISSIPPI, a magnificent river of the United States, 3,260 m. in length, which gathers its waters from the whole region lying between the Rocky mountains on the W, and the Alleghanies on the E, and stretching from the parallel of 47° 10′ N to the N shore of the gulf of Mexico, or from above a seventh part of the N. American continent; and forms the chief stream of that continent, whether we regard the continuity of its course, the velocity of its current, the immense volume of its waters, the number and magnitude of its tributary streams, the vast extent of its inland navigation, or the broad expanse of its periodical floods. In length of course it is only excelled, as far as our geographical knowledge extends, by the Maranon or Amazon of S. America. In velocity of current it greatly exceeds the Amazon, or the vast Hoang-ho of Northern China, which last it also resembles in the yellowish tinge of its waters. In extent of inland navigation, and extent of surface drained by its streams, it is excelled only by the great S. American river. The M. runs through 19 deg. of lat. At its source, the winters have the rigours of those of Norway; at its mouth, the seasons are those of Spain. The fir and the birch grow about its northern springs; and the palm, the live oak, and orange at the Balize. It is closed by ice in November, in its northern course, which is melted early in the spring, before it has floated many hundreds of miles of its mouth: 'lone, wandering, but not lost,' it flows for the first 400 m. through a high prairie-like country, until it is precipitated over the falls; then having descended from the high shelf of land it has lately watered, it flows for the next 700 m. through one of the most beautiful regions inhabited by man. "The M.," says Banvard, "commences in many branches that rise for the most part in wild rice lakes; but it traverses no great distance before it has become a broad stream. Sometimes in its beginnings it moves a wide expanse of waters, with a current scarcely perceptible, along a marshy bed. At others, its fishes are seen darting over a white sand, in waters almost as transparent as air. At other times it is compressed to a narrow and rapid current between ancient and hoary limestone bluffs. Having acquired, in a length of course, following its meanders, of 300 m., a width of half-a-mile, and having formed its distinctive character, it precipitates its waters down the falls of St. Anthony. Thence it glides alternately through beautiful meadows and deep forests, swelling in its advancing march with the tributes of a hundred streams. In its progress it receives a tributary which of itself has a course of more than a thousand leagues. Thence it rolls its accumulated, turbid, and sweeping mass of waters through continued forests, only broken here and there by the axe, in lonely grandeur to the sea. The hundred shores laved by its waters; the long course of its tributaries, some of which are already the abodes of cultivation, and others pursuing an immense course without a solitary dwelling of civilized man being seen on its banks; the numerous tribes of savages that now roam upon its borders; the affecting and imperishable traces of generations that are gone, leaving no other memorials of their existence, or materials for their history, than their tombs, that rise at frequent intervals along its banks; the dim, but glorious anticipations of the future—these are subjects of contemplation that cannot but asso-

ciate themselves with the view of this river." After the junction of the M. with the Missouri, the character of the river changes; it loses its majestic calmness, and rolls onward with a wild impetuosity. From this point to Balize, it is a wild, furious, whirling river, never navigated safely, except with great caution.—From the days of Father Hennepin, this mighty river has been called the *Mississippi*—or *Mechasipi* as it was always spelled by that father—a term derived from the savages of the Illinois, and signifying in their language 'the Great river.' Du Pratz, in his history of Louisiana, says, that the word *Mississippi* is a contraction of the savage appellation *Meactchasipi*, which literally denotes 'the ancient father of rivers.' In the history of the adventures of Hernand Soto and his Spanish companions, who explored this country in 1541, the M. is termed the *Rio Grande*. But while, in point of fact, this great river-system has been hitherto denominated the Mississippi, it ought, in point of right, to have borne that of the Missouri. It was known long before the voyages of Clarke and Lewis, that the latter was the larger and longer stream: giving in fact a length of 4,424 m. to the great river of N. America, while the M. gives only 3,267 m. Like the Amazon, the Saint Lawrence, the Hoang-ho, and the Bahr-el-Abiad, the Missouri is a white, or rather yellowish muddy stream; while, like the Rio Negro which falls into the Amazon, or the Abyssinian Nile which falls into the Bahr-el-Abiad, the M. is a clear and transparent stream. At the confluence of the two sister-streams, the Missouri rushes triumphantly across the M., its turbid waters seeming to disdain a connection so inferior. In fact, from the junction down to the sea, the muddy waters of the Missouri completely discolour the stream; and every peculiar characteristic of the M., as a distinct river, is lost in the majestic volume of the Missouri. Therefore, in classifying the numerous streams composing that immense mass of waters which, below New Orleans, discharges itself into the gulf of Mexico, geographers might in strict justice assign the first rank to the Missouri; the M., the Ohio, the Arkansas, and the Red river, being considered as in fact four great subordinate branches of the Missouri.

Mouth.] On account of the extreme flatness of the coast, and the many openings made by inlets, lakes, and marshes, it was long very difficult to discover the mouth of the M.; and it would be equally difficult still, were it not for the houses at the pilot-stations known as the Old and New Balize, and the flag-staff at the former, which are discernible some distance at sea. The white clayey colour of the river-water remaining unmixed on the surface for many miles out at sea, is another indication that the mouth of the M. is not far distant. The principal stream is divided for a few miles above its mouth into four channels, each of which is called a *pass*, and has a sand-bar at its entrance. These sand-bars are subject to continual shiftings on account of the rapidity of the current, its change of direction, and the constant accumulation of alluvial matter. Their distance from the entrance of the river—which is generally about 2 m.—depends much on the winds being accidentally with or against the tides. When these bars have accumulated sufficiently to resist the tides and the current of the river, they form numerous small islands, which, constantly increasing, join each other, and at last reach the continent. "Too much cannot be said of the extreme muddiness and ugliness of this celebrated river, a few miles from its mouth. Its fogs 'whip' those of our Thames. By degrees, however, the scenery improves, and the woods are thicker; still, the timber is not of large growth, though the late autumn-colours of the leaves render them very varied and beautiful. The most common tree is the sycamore, not quite the same as ours of the same name, but nearly so; the brilliant crimson of its seed-pods contrasts finely with the brown and changing leaves. As we advance up the river the trees are of a more considerable size, and there is much more variety in their foliage: ilex and the live oak are very frequent. There is a peculiarity in the appearance of the woods, owing to the trees being almost universally covered with the long drooping Spanish moss. This parasitical plant hangs from every branch and twig, descending in long weeping clusters; these dependants often grow to the length of six or eight feet, and are of a greyish colour; they give a sombre hue to the forests, and render their appearance somewhat monotonous. The shores increase in beauty as we proceed, being diversified with splendid magnolias and cotton-wood trees. Occasionally we see extensive clearings, on which are temporary wooden houses erected near the river-side; they are occupied by the wood-cutters, who are employed in felling and stacking the wood for the innumerable steamers which work up and down the river." [*Houston's Texas.*]

Course from confluence with the Missouri.] From the point where the Missouri unites with the M., in 38° 55′ N lat., and 89° 57′ W long., to the Balize, the united stream has a total length of 1,300 m. The city of New Orleans, in 29° 57′ N lat., being within 4′ of the same parallel of longitude with the junction of the two rivers, the bearing between these two points is almost due N and S, 622 m. of direct distance, and 1,194 m. by water. Within this space, the point where it receives the Ohio, is the most eastern, being in 88° 40′ W long., and 36° 57′ N lat.; or 1° 17′ W, and 1° 58′ S, of the junction of the Missouri and M., and 186 m. SE by water. From this last point, the river assumes a SW course, till it receives the Arkansas, in 91° 10′ W long., and 33° 45′ N lat. For 411 m. by water, to the point where the Red river enters the M., in 91° 33′ W long., and 31° 1′ 15″ N lat., the course of the M. is almost due S. Thence the remainder of its course is 336 m. SE as far as the English turn, 18 m below New Orleans; and thence it is pretty straight to the sea. Besides the Red river, the Arkansas, the Ohio, and the Missouri, which the M. has received within the above space of 1,300 m., it also receives many other streams. Among these is the White river, which falls in from the W after a course of 600 m., 22 m. above the mouth of the Arkansas. The St. Francis, after a SE course of 350 m., joins the M. by a mouth 200 yds. wide, in 34° 45′ N lat., 111 m. above the outlet of the Arkansas. The Marameg, after running 150 m. NE, falls into the M. below St. Louis. It is a large stream, 200 yds. broad, and famous for the lead-mines on its banks, which being believed to be silver, gave rise to the famous Mississippi scheme, in France, in 1720. The Homochitto, Big Black, Yazoo, Wolf, Hatchee, Obion, Forked Deer, Reelfoot, and other minor streams, fall in on the E side.—The delta of the M. may be defined as that part of the great alluvial plain which lies below or to the S of the branching-off of the highest arm of the river, called the Atchafalaya. This delta is about 13,600 sq. m. in area, and elevated from a few inches to 10 ft. above the level of the sea. The greater part of it protrudes into the gulf of Mexico, beyond the general coast-line. The level plain to the N, as far as Cape Girardeau, in Missouri, above the junction of the Ohio, is of the same character, including, according to Mr. Forshey, an area of about 16,000 sq. m., and is therefore larger than the delta. It is very variable in width from E to W, being near its N extremity, or at the

mouth of the Ohio, 50 m. wide; at Memphis 30 m.; at the mouth of the White river 80 m.; and contracting again farther S, at Grand gulf, to 33 m. The delta and alluvial plain rise by so gradual a slope from the sea as to attain, at the junction of the Ohio, a distance of 800 m. by the river, an elevation of only 200 ft. above the gulf of Mexico.

Tributaries above the Missouri.] About 18 m. above the confluence of the Missouri, the M. receives the Illinois from the NE. The Illinois is 450 yds. wide at its junction with the M.; and as above the point of confluence it makes a sudden bend to the W, the Illinois might be taken for the principal stream. Beyond this the Buffalo river, 100 yds. wide, enters the M., which, 5 m. above, expands to a breadth of nearly 2 m. About 100 m. above the mouth of the Illinois, Salt river, 120 yds. wide, and navigable for at least 200 m. in high water, joins the M. Nearly 230 m. up the M., the Moingoma falls into it from the NW, after a course of 350 m. in direct distance. Above the mouth of the Moingoma, a series of difficult rapids, 11 m. in length, impede the navigation of the stream. The Jowa, 300 yds. wide, after a SE course, enters the Mississippi 61 m. above the rapids; and 50 m. above the Jowa is the mouth of Rocky river, 300 yds. wide. This stream has its source near Green bay, upwards of 450 m. from its mouth, and is navigable for 300 m. Above the junction of Rocky river another series of rapids present themselves in a continued chain of rocks for 18 m., in some places reaching from shore to shore, and which though containing more water than the rapids above the Moingoma, are yet much more difficult to pass. In N lat. 43° 44′, and W long. 92°, is the mouth of the Wisconsin river, nearly half-a-mile wide. This river is the grand source of communication between the great lakes and the M.; and is the route by which all the traders of Michillimackinack convey their goods for the trade of the M., from St. Louis to the Crow river, and the confluent streams which are in those boundaries. From the mouth of the Wisconsin to the portage is 60 leagues. The portage is only 2 m. to the forks of Fox river, which falls into the bottom of the bay of Puans or Green bay. The Fox river, at these forks, is navigable for boats of 4 tons weight all the way, for 57 leagues, to its mouth, where it is 200 yds. wide. At the above portage the waters in the dry season separate, part going to the M. and the gulf of Mexico, and part to Lake Michigan, the Saint-Lawrence, and the Atlantic. But in the wet season, when the waters are high, canoes and loaded boats pass over the portage; and a canal might easily be cut so as to admit of a water-communication at all times between the M. and the lakes by means of the Wisconsin and Fox rivers. Beyond the mouth of the Wisconsin, Black river enters the M. on the E side. In N lat. 44° 50′, about 770 m. above the junction of the Missouri, the Chippeway falls in from the N, in a deep majestic stream, at least half-a-mile wide. This river communicates by a short portage with Montreal river, which falls into Lake Superior. Lake Pepin, below which is the mouth of the Chippeway, is merely an expansion of the river, 22 m. long, and from 4 to 1½ m. broad. The St. Peter's falls into the M. on the SW side, 9 m. below the rapids, at the foot of the falls of St. Anthony. This is a deep and beautiful river, running through a delightful country. From the St. Peter's to the falls of St. Anthony, the river is contracted within high hills, and is one continued rapid or fall, the bottom being covered with limestone rocks, which in low water are some feet above the surface, with narrow channels between them. The fall of the stream between the place of unloading and reloading is 58 ft.; the perpendicular fall of the shoot, 16½ ft.; the width of the river above the fall, 627 yds., and below, 209 yds. Beyond these falls, which are 1,029 m. from its extreme source, the navigation becomes extremely difficult. Above the mouth of Pine river are three successive settlements of the North-West company; and 15 m. beyond the third settlement are the falls of Peckagama, 20 ft. in height, and next to the falls of St. Anthony the greatest impediment to the navigation of the Upper M. Here the river is a quarter of a mile broad below the falls; but immediately above it is only 20 yds. wide. About 45 m. beyond is Little Lake Winnipeg, 36 m. in circumf., communicating with Cedar or Cass lake by a water-course or strait of 15 m. Leech lake branch, or the SW head-stream, was long reckoned the main source of the M.; but the Winnipeg branch is navigable the greatest distance. Cass lake is united to Travers lake by a stream flowing from W to E; and the latter lake, which is 10 m. by 5 m. in extent, receives a stream flowing in a N direction, and 20 ft. wide by 2 ft. deep, from Lake La Biche or Itasca, the fountain-head of the M. See Itasca. About Leech lake and Itasca lake, the whole face of the country has the appearance of an impenetrable morass or boundless savannah.

Velocity of current.] Three remarkable peculiarities distinguish the M. from all other North American rivers, namely, its velocity,—the sinuosity of its course,—and the vast number of islands and sandbars in its bed. Nothing, however, can be more discordant than the accounts given by travellers respecting the first particular, as far as regards the course of the stream below the confluence with the Missouri: while some represent the current as rapid and strong, others affirm that it is gentle and slow. These differences of observation evidently arise from the different seasons at which travellers have made them. The motion of the stream is of course much slower in the dry season than at the time of its periodical floods; and while some will have its mean motion in the dry season to be 2 m., and others little more than 1 m. per hour, others make the mean rate to be from 3½ to 4 m. an hour during the dry season. We rather incline to believe the last statement, as it is admitted on all hands that however the motion of the stream be accelerated during the inundations—which commence in March and subside in July—yet the uniform rapidity of the current is so great that there is no tide in the river, and ships cannot ascend higher than New Orleans, the velocity increasing as it is ascended. The reason of this is that below the confluence of the Red river the delta of the M. commences. The river continually sending off new branches as it approaches the sea, this delta increases in size as the main stream diminishes in volume, strength, and rapidity. Above the head or apex of the delta, or 3 m. below the mouth of the Red river, the whole of the confluent waters being united in one channel, the strength and velocity of the current are consequently much greater than below. As a proof that velocity of the current depends as much or even more upon quantity of volume than on degree of declivity, it may be remarked that the degree of descent is comparatively small in the great valley of the M. from the junction of the Missouri to the sea; and that in the periodical floods, when the volume of water is at least three times more than in the dry season, the velocity is accelerated in proportion,—the motion being increased threefold according to Hutchins, or at least double according to others, though on the same degree of declivity. It is, then, to the impetus or propelling force, originating at the place where adventitious waters are poured in, and successively communicated to every part of the

stream, that we are principally to attribute the increase of velocity in the main stream, which is greater or less according to the quantity poured in; on the other hand, where the waters are continually draining off as they approach the sea, by an increasing number of new channels, the velocity and strength of the main stream are gradually diminishing. From the confluence of the Missouri as far as the mouth of the Kanzas, a distance of 334 m., the velocity of that stream is from 5 to 7 m. an hour; from this to the mouth of the Platte, it is 6 m. an hour; and a little below the mouth of that river, 10 m. This is a velocity very far beyond what we are accustomed to observe in rivers in our part of the world. So great is the general flatness of the N. American continent, between the Rocky mountains on the W, and the Alleghanies on the E,—between the gulf of Mexico on the S, and the northern upland that separates the sources of the M. from those of Red river and the St. Lawrence,—that the degree of slope on which the various branches of the M. and even that river itself run is extremely small. The source of the M. is not more, probably, than 1,500 ft. above the level of the gulf of Mexico, into which it falls—which, on a slope of 2,750 m. by the course of the stream, does not exceed 6·75 inches per mile, even including the falls of St. Anthony and Packagama, amounting together to 78 ft. The confluence of the M. and Missouri does not exceed 400 ft. above the level of the Mexican gulf; so that the slope of the combined stream is still less than 4 in. per mile. On the line of the Ohio, the slope is equally small. At Cincinnati, 1,618 m. by water from the sea, the bed of the river is only 430 ft. above the sea; so that the degree of slope is only 3¼ in. per m. Even at Pittsburg itself, the level of the Ohio does not exceed 750 ft. above the sea; so that the degree of slope on 2,061 m. of descent to the sea, is not more than 4½ in. per m.; and the source of the Ohio itself is not 1,000 ft. above the sea. This extreme flatness, however, of the great basin of the M. is exceedingly favourable for navigation, and particularly so for internal water communication by canals.

Navigation.] The second peculiarity of the M. is the vast quantity of sand carried down by its stream, and by all the rivers which run into it above the confluence. Not only are great quantities of rolling sand continually coming down, and forming shifting sand-bars, but the banks also, being continually undermined by the direction and violence of the current, are constantly falling into the river, while the bed itself is thus changing. "This great, this magnificent M., held out as a land of promise,—says Volney,—is a very bad neighbour. Strong in a body of yellowish muddy water, 2,000 or 3,000 yds. broad, which it annually rolls to the height of 25 ft. over its banks, it urges this immense mass of loose sand and clay,—forms islands and destroys them,—floats along trees, which it afterwards overturns,—varies its course through the obstructions it creates for itself, and at length reaches you at a distance where you would have supposed yourself perfectly safe,—similar in this to most of the grand agents of nature, as volcanoes, hurricanes, &c., which are no doubt sublime, but which prudence counsels to admire at a distance." Not only is the river full of sand-bars continually shifting their position, but the bottom of the stream is also full of sunk logs; and vast quantities of drifted timber are carried down the stream, especially in the high floods. One tree, if stopped by its roots or branches in a shallow part, is sufficient to stop the passage of thousands more, and to fix them in the same place, no human force being able to remove them, while the mud carried down by the river serves to bind and cement them together. They are then gradually covered, and every inundation not only extends their length and breadth, but adds another layer to their height. In less than ten years' time canes and shrubs grow on them, and form points and islands which forcibly shift the bed of the river. The sunk logs, or *snags* as they are called, in the bottom of the channels, are likewise very dangerous to vessels. Mr. Calhoun estimated the losses to vessels by obstructions on the river at 11½ per cent. on its commerce; and by snags alone at 6½ per cent.

From what has been related, it is evident that the navigation of the M. is no easy matter, whatever American writers may advance to the contrary. In the dry season, vessels of 250 tons can indeed get up to New Orleans; but for vessels of a larger size this is impossible, as there is no tide, and the channel is full of shoals and sand-bars for a considerable distance up the river. In the time of high floods none but steam-vessels can sail against the stream; other vessels are sometimes 3 weeks in working up to New Orleans, though the distance is only 108 m. A line of steam-boats, however, has now been established between New Orleans and Louisville up the Ohio, and they have been found to answer remarkably well. The first steam-boat on the M. was introduced in 1811. About 30 years ago a voyage from St. Louis to New Orleans occupied 27 days; it now takes about 4. The tonnage employed on the M. was then about 7,000 tons; it is now about 550,000. The net money value of the river-trade, including passengers, in 1846, was 183,609,725 d., and the total value of the craft was estimated at 12,942,355 d. The whole steam-boat navigation of the M. and its tributaries extends 16,674 m., with a pop. dependent upon it of 6,576,027, occupying 14 states.—The boats of the M., says Banvard, "are so various in their kinds, and so curious in their construction, that it would be difficult to reduce them to specific classes and divisions. No form of water-craft so whimsical, no shape so outlandish, can well be imagined, but what, on descending to New Orleans, it may somewhere be seen lying to the shore, or floating on the river. But the boats of passage and conveyance, that remain after the invention of steam-boats, and are still important to those objects, are keel-boats and flats. The flat boats are called, in the vernacular phrase, 'Kentucky flats,' or 'Broad horns.' They are simply an oblong ark, with a roof slightly curved from the centre, to shed rain. They are generally about 15 ft. wide, and from 50 to 80, and sometimes 100 ft. in length. The timbers of the bottom are massive beams; and they are intended to be of great strength, and to carry a burden of from 200 to 400 barrels. Great numbers of cattle, hogs, and horses are conveyed to market in them. We have seen family-boats of this description, fitted up for the descent of families to the lower country with a stove, comfortable apartments, beds, and arrangements for commodious habitancy. We see in them ladies, servants, cattle, horses, sheep, dogs, and poultry, all floating on the same bottom; and on the roof the looms, ploughs, spinning-wheels, and domestic implements of the family. Much of the produce of the upper country, even after the invention of steam-boats, continues to descend to New Orleans in Kentucky flats. They generally carry three hands, and perhaps a supernumerary fourth hand—a kind of supercargo. This boat, in the form of a parallelogram, lying flat and dead in the water, and with square timbers below its bottom-planks, and carrying such a great weight, runs on a sand-bar with a strong headway, and ploughs its timbers into the sand; and it is of course a work of extreme labour to get the boat afloat again. Its form and its weight render it difficult to give it a direction with any

power of oars. Hence, in the shallow waters, it often gets aground. When it has at length cleared the shallow waters, and gained the heavy current of the M., the landing such an unwieldy water-craft, in such a current, is a matter of no little difficulty and danger."

Inundations.] The inundations of the M. commence in March and subside in July. In the month of May, the inundations have attained their greatest height, which averages about 25 ft. perpendicular. The greater part of the superfluous waters now finds its way to the sea by other channels than that which runs past New Orleans. Below the Iberville, the waters of the inundations never return within their channel, the channel of the river being on a higher level than that of the adjacent grounds. For 50 m. W of the river, from the Ohio downwards, the inundations extend; but on the E side they are checked by a chain of heights which leaves in general a space of not more than 5 m. for the river to overflow. This space may be regarded as the ordinary channel of the river on the E side in high floods, and these heights, as the outer bank of the stream being properly the commencement of high and dry land: for the M. has strictly speaking two banks,—an inner and an outer; the former being its limit in the dry season, and from 20 to 25 ft. above the level of the stream; the latter, its boundary in the season of the periodical floods. The inundations of the river force all its branches to overflow their banks, and that in proportion to the degree of declivity. On the E side, the rivers are completely dammed up for 15 or 20 m. above their mouths, and are compelled to overflow their banks; but each of these rivers, like the M., has also an inner and an outer bank; the former being bounded on both sides by a small stripe of low ground, from 60 to 80 yds. wide, and this again limited by a gentle slope or secondary bank which prevents the adjacent land from being overflowed. On the W side of the M., the tributary rivers suffer a much greater interruption in their course than those on the opposite side, as there is little or no acclivity for many miles back into the country. During the inundation in 1799, the Washita—which falls into the Red river 26 m. from its junction with the M.—was so dammed up beyond the post of the Washita, a distance of more than 120 m., or 200 m. by the windings of its stream, that a stagnation and consequent corruption of its waters took place which destroyed all the fish within its influence. The slime deposited by these annual floods is great, and similar to that which the Nile deposits in Egypt. In half-a-pint tumbler of the M. water has been found a sediment of 2 inches of slime; it is, notwithstanding, we are told, extremely wholesome and well-tasted, and very cool in the hottest season of the year. Above the mouth of Red river, from 31° to 33° N lat., the inundation is, at a medium, 20 m. wide—covering 2,770 sq. m. Below 31° N lat., to the outlet of La Fourche, a distance of 80 m., the medium width of the inundation is 40 m., and covers 3,200 sq. m. Below this, the inundation occupies a space of 2,370 sq. m. The inundation of the Red river occupies 2,550 sq. m. In the state of Mississippi, the inundation covers 1,000 sq. m. The total of inundated surface below 33° N lat. is 12,000 sq. m. Four-fifths of the inundating water escape by the Atchafalaya branch, 3 m. below the mouth of Red river. The tide never rises above 2½ ft. or 3 ft. in the gulf of Mexico, yet it frequently approaches within 30 m. of the head of the Atchafalaya. The swell of the M. during the inundations is, near the sea, only 3 ft.; at New Orleans, which is 102 m. from its mouth, 12 ft.; at Baton Rouge, 138 m. higher, 25 ft.; at Fort Adams, and generally between that place and the Ohio, 45 ft.; and in the Upper Mississippi, the rise is from 18 to 22 ft.

Levées.] The fertile tracts of alluvial land which everywhere border the shores of the M., have given rise to an artificial work of great extent, for confining its stream, and for securing the country from the effects of its inundations. This work is an embankment of the river, and is usually called the *levee*. On the E side of the M., the embankment commences about 60 m. above New Orleans, and extends down the river for more than 130 m. On the W shore it commences at Point Coupée, 172 m. above New Orleans, including the windings of the river. It is here that the navigator emerges from a gloomy wilderness presenting detached settlements, at long and tedious intervals, into beautiful and finely cultivated plantations. On the side of this elevated artificial bank is a range of neatly built houses, appearing like one continued village as far as the city of Orleans. They are one story, framed buildings, elevated on piles 6 or 8 ft. high, painted generally white. The high land terminates at Baton Rouge, in an elevated bluff, 30 or 40 ft. above the greatest rise of the water in the river; and here commences the eastern embankment, which is continued, like that on the W side, to Orleans. At a point a little below the Iberville, and 16 m. below Baton Rouge, commences an uninterrupted series of plantations, which are continued, upwards of 100 m., to the city of New Orleans. These plantations are all cleared in front, and under improvement: some of them are planted with sugar cane, but the greater part with cotton. They are narrow at the bank, and extend back to the swamp ground, which is incapable of cultivation. The *levee* consists of a mound of earth, raised up at the distance of 30 or 40 yds. from the natural bank of the river, varying from 4 to 6 ft in height, and usually from 6 to 9 ft. at the base, with sufficient breadth at the top for a footpath. The materials of which this embankment is formed, is commonly a close stiff clay, bound on the lower parts of the river. Sods are placed on the sides and at the top, and cypress slabs are in the inside, for the purpose of preventing the water, where there is any current, from wearing away the earth. A ditch is made for the purpose of draining off the water which oozes through; and the road which lies between the *levee* and the fences is crossed at intervals by drains covered with plank, like the sewers of a city, for the purpose of carrying off the water to the swamp. Holes are continually made in the embankment by craw-fish, through which an immense quantity of water finds its way, and these sometimes increase so rapidly, as to effect a breach. The work is also liable to be injured by the rains; and it is generally several years before it acquires solidity. As this embankment is too slight to resist the river, and to turn it from its course, it must follow all its windings; and if it encroaches on any point, a new *levee* is constructed behind the first, so that there are frequently double *levees;* and a person standing within the outward embankment during a flood, seems, from the height to which the waters are raised, by being thus artificially confined, to be considerably below the surface of the flowing stream, or, as some have expressed it, the water appears to roll over his head. It is calculated that the M., in its natural state, overflows its banks for at least 150 m. above New Orleans, to the height of from 2 to 3 ft.; and the descent to the swamps is very rapid, being supposed to be not less than 4 ft. in the course of a mile. We may easily conceive, therefore, the velocity with which a sheet of water will suddenly rush on the adjacent grounds. Mr. Brackenridge gives the following animated description of this terrible catastrophe: "The water rushes from the river with indescribable impetuosity, with a noise like the roaring of a cataract, boiling and foaming, and tearing everything before it. To one who has not seen this country, it is almost impossible to convey any idea of the terrors excited by a *crevasse* or breaking of the *levee*. Like the breaking out of fire in a town, where no one knows when his own dwelling may be assailed, it excites universal consternation; every employment is abandoned for miles above and below, and all hasten to the spot, where every exertion is made day and night to stop the breach, which is sometimes successful; but more frequently the hostile element is suffered to take its course. The consequences are the destruction of the crop; the buildings, and sometimes the land itself, is much injured where the current rushes over, carrying away the soil, or leaving numerous logs and trees drawn into the vortex as they floated down the river; these must be destroyed before the land can again be cultivated. The effects of a breach of the *levee* are even more desolating than those of fire." To guard against a breach in the *levee*, therefore, by which valuable tracts of cultivated ground are secured from inundation, and on which houses and buildings of every description are erected, various precautions are adopted. Every individual is bound to maintain the *levee* in good repair in front of his own land; and previous to the annual floods it is regularly inspected by commissioners, who direct whatever repairs they may judge necessary to be made at the proprietor's expense. But these precautions are by no means sufficient to insure the community against a breach of the embankment; and in addition to this, during the season of floods the *levees* require continual attention and watching, and all hands are frequently summoned from their labour in the fields to guard against the tremendous consequences of a general inundation. In some places earth must be added to raise the levee to a proper height; in other places, where it appears to crumble in, it must be protected by slabs. Where it has become spongy and loose, every appearance of a hole made by the craw-fish must be watched and filled up, and one moment of negligence is sufficient to destroy the labour of years. The city of New Orleans has repeatedly suffered dreadfully from the river breaking through its banks. Mr. Hewson proposes to overcome this evil by seconding the natural efforts made by the swollen river to throw off its surplus water. He thinks it probable, and supports his opinion by geological evidence, that the Red river has not always, as at present, been a tributary to the M.; and proposes turning it back into its former channel. Should this be found impracticable, he proposes to open and improve the Iberville, which formerly emptied itself into the gulf of Mexico through Lake Pontchartrain, but has ceased to be a channel of discharge from the M. since the military works of General Jackson, in 1814, cut off the communication. The turning of the Red river to its ancient course will, he thinks, be of itself sufficient to prevent further floods in the M., without creating any obstacle whatever to its navigation as it now exists, while at the same time it will improve the drainage of the neighbouring country. As regards the opening of the Iberville, should such a measure be found necessary, he asserts it to be no innovation on Lake Pontchartrain, and he answers all objections regarding the formation of shoals and bars by instancing the Nile at Lake Mœris, and the Leck, which discharges a large proportion of the waters of the Rhine into the Meuse, which was a military work of the Romans, and has been in operation ever since. Besides which, the waste-course proposed is addressed solely to an extraordinary freshet, the mere prevention of which "interferes in no way with the general conditions under which the river has maintained itself since creation."

Alluvial deposits.] In attempting to compute the minimum of time required for the accumulation of the alluvial matter in the delta and valley of the M., Mr. Lyell refers to a series of experiments made

by Dr. Riddell at New Orleans, showing that the mean annual proportion of sediment in the river was to the water $\frac{1}{1245}$ in weight, or about $\frac{1}{3000}$ in volume. From the observations of the same gentleman, and those of Dr. Carpenter, and of Mr. Forshey, an eminent engineer of Louisiana, the average width, depth, and velocity of the M., and thence the mean annual discharge of water were deduced. In assuming 528 ft., or the tenth of a mile, as the probable thickness of the deposit of mud and sand in the delta, Mr. Lyell founds his conjecture on the depth of the gulf of Mexico between the S point of Florida and the Balize, which equals on an average 100 fath. The area of the delta being about 13,600 sq. m., and the quantity of solid matter annually brought down by the river 3,702,758,400 cub. ft., it must have taken 67,000 years for the formation of the whole; and if the alluvial matter of the plain above be 264 ft. deep, or half that of the delta, it has required 33,500 more years for its accumulation, even if its area be estimated as only equal to that of the delta, whereas it is in fact larger. If some deduction be made from the time here stated in consequence of the effect of the drift-wood, which must have aided in filling up more rapidly the space above alluded to, a far more important allowance must be made, on the other hand, for the loss of matter, owing to the finer particles of mud not settling at the mouths of the river, but being swept out far to sea, and even conveyed into the Atlantic by the Gulf stream. Yet the whole period during which the M. has transported its earthy burden to the ocean, though perhaps far exceeding 100,000 years, must be insignificant in a geological point of view, since the bluffs or cliffs bounding the great valley, and therefore older in date, and which are from 50 to 250 ft. in perpendicular height, consist in great parts of loam, containing land, fluviatile and lacustrine shells, of species still inhabiting the same country.—It is generally supposed that the advance of the long narrow promontory formed by the great river and its banks between New Orleans and the Balize has been very rapid; but Mr. Lyell arrived at an opposite conclusion. After comparing the present state of this region with the map published by Charlevoix 120 years ago, he doubts whether the land has on the whole gained more than a mile in the course of a century. A large excavation, 18 ft. deep, at New Orleans, and still in progress in March 1846, showed that much of the soil there consists of fine clay or mud, containing innumerable stools of trees, buried at various levels, in an erect position, with their roots attached, implying the former existence there of fresh-water swamps, covered with trees, over which the sediment of the M. was spread during inundations so as slowly to raise the level of the ground. As the site of the excavation is now about 9 ft. above the sea, the lowest of these upright trees imply that the region where they grew has sunk down about 9 ft. below the sea-level. The exposure also in the vertical banks of the M. at low water, for hundreds of miles above the head of the delta, of the stumps of trees buried with their roots in their natural position, three tiers being occasionally seen one above the other, shows that the river in its wanderings has opened a channel through ancient morasses, where trees once grew, and where alluvial matter gradually accumulated. The old deserted bed also of the river, with its banks raised 15 ft. above the adjoining low grounds, bears testimony to the frequent shifting of the place of the main stream; and the like inference may be drawn from the occurrence here and there of crescent-shaped lakes, each many miles in length, and half-a-mile or more in breadth, which have once constituted great curves or bends of the river, but are now often far distant from it. The M., by the constant undermining of its banks, checks the rise of large commercial towns on its borders, and causes a singular contrast between the wealth and splendour of its fine steamers, and the flat monotonous wilderness of uncleared land which extends for hundreds of miles on both sides of the great navigable stream.

MISSISSIPPI, one of the Southern United States of North America, situated between 30° 10′ and 35° N lat., and 38° 10′ and 91° 35′ W long.; and bounded on the N by Tennessee; on the E by Alabama; on the S by the gulf of Mexico and Louisiana; and on the W by the Pearl river, which separates it from Louisiana, and by the Mississippi, which separates it from Louisiana and Arkansas. It is 325 m. long from N to S, and 192 m. in extreme breadth; containing an area of 47,114 sq. m., or 30,153,054 acres, but according to another admeasurement only 45,760 sq. m.—The gulf of Mexico skirts the southern shore of this state for 70 or 80 m., and a chain of low and sandy islands stretches along the coast. The principal of these are Cat island and Ship island, the former of which has lately become a depot of the British and West India royal mail steam-ships. The bay of Pascagoula, lying between these and the main land, is 65 m. long and from 7 to 8 m. wide, and forms an inland navigation from Mobile bay to lakes Borgue and Pontchartrain. No harbour admitting vessels of more than 8 ft. draught, is found in all this distance.

Physical features.] In the S, for about 100 m. from the gulf of Mexico, the country is almost a dead level, covered chiefly with forests of pine, cypress swamps, prairies, and inundated swamps and marshes. Further N the surface becomes more elevated and in many places hilly and broken, but in no part of the state are there any elevations approaching the character of mountains. A range of bluffs, which stretch along the Mississippi at various distances, in some places reaching almost to the margin of the river, are an extension of the table-lands which extend over a portion of the state into the low grounds of the river, and are in general possessed of a fertile soil. The low alluvial grounds on the margin of the rivers is the richest land in the state. These, however, are frequently overflowed during the season of flood, and devastation is spread far and wide in the cultivated districts. The lands bordering on the Yazoo, in the NW part of the state, are very fertile, with a fine rich and black mould; but the pine regions, on the contrary, are comparatively barren, and have a light and unproductive soil. The Mississippi river winds along the W borders for 530 m. Its banks, except where approached by the bluffs, consist of inundated swamps covered with cypress. The Yazoo, the largest river entirely within the state, has a course of more than 200 m. from N to S, 50 of which are navigable; and after passing through a most fertile and elevated district, enters the Mississippi 12 m. N of Vicksburg. The Big Black is also a large river, falling into the Mississippi near 32° N lat., after a course of 200 m. The other rivers emptying into the Mississippi are of small account, and, except the Homochitto, incapable of navigation. The Tombigbee rises in the NE part of this state, and flows into Alabama. The rivers flowing into the gulf of Mexico are the Pascagoula and the Pearl. The former has a course of 250 m. The Pearl rises in the centre of the state; forms, in its lower course, the dividing line of the states of M. and Louisiana; and at length enters the Rigolets between lakes Pontchartrain and Borgue. It is navigable for vessels drawing 6 ft. water for about 50 m., and for boats 100 m. further up; but the bay, at its mouth, has only 4 ft. of water.

Climate and productions.] The climate of this state is more mild and agreeable than Louisiana. In the N the temperature ranges between 26° and 94°, which may be considered as extremes; but the S portion, below 31°, is both uncomfortably hot and unhealthy. In these regions the lime and the orange flourish luxuriantly. The great staple of M. is cotton, but Indian corn, bananas, sweet potatoes, tobacco, indigo, and great varieties of fruit, are cultivated; and the natural growths, consisting of valuable timber, and spices, fruits, &c., yield considerable wealth to the inhabitants.—Agriculture is the chief occupation of the people of this state. The live stock in 1840 consisted of 109,227 horses and mules; 623,197 neat cattle; 128,367 sheep; and 1,001,209 swine. The value of poultry was stated at 369,483 d. The amount of wool produced was 175,196 lbs.; and the produce of the dairy was valued at 359,585 d. The pork-trade is large and valuable.—The crops of the different species of grain, in the years 1840 and 1847, were comparatively as follows:

	Wheat.	Barley.	Oats.	Rye.	Indian corn.
1840	196,626	1,654	668,624	11,444	13,161,237 bush.
1847	500,000	2,000	1,378,000	23,000	16,000,000 —

The staple crops are rice, tobacco, and cotton, the products of which for the years 1840, 1845, and 1847 were as follows:

	1840.	1845.	1847.
Cotton, . .	193,401,577	235,000,000	250,000,000 lbs.
Rice. . .	777,195	975,000	1,000,000 —
Tobacco, .	83,471	193,600	200,000 —

The miscellaneous crops in 1840 consisted of 1,630,100 bushels of potatoes, 171 tons of hay, 16 tons of hemp, with some little hops, sugar, beeswax, and silk cocoons. Lumber was produced to the value of 192,794 d.; ginseng and other products of the forest to 6,873 d.; and furs and skins to 3,382 d. Of tar, pitch, rosin, and turpentine, 2,248 barrels were obtained.

Manufactures and Commerce.] The manufacturing capital of M. in 1840 was 1,797,727 d., more than one-half of which was invested in flouring, grist, saw and other mills. Bricks and lime-making also employed considerable capital. These, with tanning, leather manufacturing, and the making of soap and candles, constitute the staple manufactures of the state. The value of home-made or family goods was stated at 682,945 d.—The direct foreign commerce of M. is very limited, and the shipments being made through New Orleans, no separate statistics are supplied by the general government. In 1840 there were in the state 7 commercial and 67 commission houses, with a capital of 673,900 d.; and 755 retail stores, with an aggregate capital of 5,004,420 d. Natchez is the chief commercial mart.—The internal improvements in this state are not extensive. The Vicksburg and Jackson railroad, 46 m., has been extended to Brandon, 13 m. further. It has a branch to Raymond. The Mississippi railroad is intended to unite Canton with Natchez, via Jackson, but as yet little progress has been made in the matter. A railroad from St. Francisville to Woodville is 28 m. long; but the greater part of this line is in Louisiana. Several other railroads are projected.

Population, &c.] M. is divided into Northern and Southern districts. The N district in 1840 contained 22 counties; the S district 34 counties. The increase of the pop. is shown in the annexed table:

Year.	Pop.	Increase per cent.
1800	8,850	...
1810	40,352	357·9
1820	75,448	86·8
1830	136,621	81·1
1840	375,651	174·9
1850	605,488	61·2

The Methodists and Baptists are the most numerous religious denominations. In 1847 the Methodists had 15,949 church-members; the Baptists, 19,539 communicants. There were also some Anti-Mission and other Baptist sects. Presbyterians were also numerous. The Anglican church had a bishop and 17 clergymen, and the Roman Catholics had also a bishop and several congregations. Mississippi university, founded at Oxford in 1846, though not fully organised, is expected to become an institution of great value. The Centenary college and Oakland college are also in a flourishing state. In 1840 there were in this state, besides 7 collegiate institutions, 71 academies for the higher branches of education, in which 2,553 young persons were being taught; and 382 common and primary schools, with 8,236 scholars. The number of adult white persons unable to read or write was 8,360.

Government.] The constitution of this state is dated 1817. Every free white male person, 21 years of age, a citizen of the United States, and a resident of the state for one year, and of the town or county in which he offers his vote for four months next preceding an election, is entitled to suffrage. The legislature consists of a senate and a house of representatives. Representatives not less than 36 nor more than 100 in number, and not less than one for each county, are chosen every second year. They must be qualified voters, and have resided in the state two years, and in the county for which they are elected one year last past. The senate must consist of not less than one-fourth nor more than one-third the number of representatives. Senators must be at least 30 years old, citizens of the United States of four years standing, and have resided in the district they represent one year. They are elected for four years; one-half being renewed every two years. The executive is vested in a governor chosen by a plurality of votes for two years. All officers are elected by the people in districts or counties. The legislature has no power to emancipate slaves without the owner's consent, except on account of great public services, and then must pay for them; nor can it prevent immigrants from importing slaves of the same description with those already in the state if they be *bonâ fide* property and not criminals. The introduction of slaves as merchandise is prohibited; but settlers, previous to 1845, might import them for their own use. No grand jury is necessary to prosecute slaves for crimes not capital. The number of slaves in 1840 was 195,211; in 1850, 308,167. The judiciary consists of a high court of errors and appeals, a superior court of chancery, district chancery courts, and district or circuit courts.

Finances.] The ordinary expenses of the government are about 155,000 d., exclusive of interest on public debt. The debt consists of 5,000,000 d. (with arrears of interest from 1838) raised for the purpose of establishing the Mississippi Union bank, and of 2,000,000 d. raised for the Planters' bank in 1830 and 1833. After having received and expended the 5,000,000 d., the state in two years became insolvent, and the governor recommended the repudiation of that debt on the ground of a technical informality! The legislature were not yet prepared for this step, and in reply passed a special vote, affirming the full liability of M., and also that she would "preserve her faith inviolate," and that any insinuation to the contrary would be "a calumny upon her justice, honour, and dignity." Her financial condition, however, rapidly became worse, and the disposition to pay diminished accordingly. In 1842 a committee consequently recommended repudiation, which was then eagerly resorted to, and has since been maintained through 11 years, during which she has experienced a return of prosperity that has now rendered her one of the most thriving and influential states of the American Union. This act of repudiation applied solely to the 5,000,000 d. loan, and did not include the 2,000,000 d. raised for the Planters' bank; but their difference of position was merely nominal, since no dividends were paid on either. In the one case there is a refusal to pay, and in the other a deliberate neglect. At the creation of the Planters' bank bonds a sinking fund was also established, and in 1848, after a long course of mal-administration, a balance of 94,000 d. remained of it. The legislature then passed an act that this sum should be applied to the discharge of the first of the

overdue coupons of those securities. Still the prospect of any approach to honesty on the part of the executive officers seems as distant as ever. Though Michigan has nearly paid up its arrears, and Louisiana and Indiana both reduced their debt, and Georgia resumed payment, nothing is done either by the legislature or their constituents in M. to wipe away the stain of repudiation as regards the 5,000,000 d. loan, or to make regular provision for the payment of any dividends on the 2,000,000 d. Indeed, the people, on being appealed to, decided by a specific vote against troubling themselves with any taxation in connection with such purposes.

Towns.] Jackson, in Hinde's co., and on the W bank of the Pearl river, is the capital; but Natchez is the largest and most commercial town in the state. It is situated on the E bank of the Mississippi, about 12 m. below the mouth of the Yazoo river, and 300 m. above New Orleans. Vicksburg, 106 m. N of Natchez, is the depot of an extensive back country, and the steam-boat traffic in the cotton season is immense. The other considerable towns in the state are Yazoo city, on the Yazoo; Commerce, on the Mississippi; Monticello, the former capital; Woodville, in the SW corner of the state; and Mississippi city and Shieldsboro, on the Gulf shore.—The Indians, many tribes of which but a few years ago inhabited this state, have been removed to the territory W of Arkansas.

History.] The discovery of this portion of the Union is attributed to De Soto, a Spaniard, who in 1540 landed in Florida, and afterwards traversed the country as far as the Mississippi in search of gold, and died on the banks of that river in 1542. The first settlement was made by the French at Natchez, in 1716, but in 1729 the whole colony was massacred by the Indians. In 1763, this territory, together with all the vast possessions claimed by the French E of the Mississippi, was ceded to Great Britain, and claimed by Georgia. In 1783, peace being consummated, the country fell into the hands of the United States. In 1802, Alabama and M. were purchased by the general government, and were then named the Mississippi territory. In 1817 M. was portioned off as a state, and Alabama erected into a separate territorial government. The S portion of the state, below 31° N lat., belonged to Florida, but was captured by the United States in 1811, and attached to M. by President Madison.

MISSISSIPPI, a river of Upper Canada, which issues from the chain of lakes in the townships of Barrie, Clarendon, and Palmerston, in the W part of Midland district; traverses the townships of N. Sherbrooke, Dalhousie, and Drummond; expands in the last-named township into a lake of the same name, which extends to the NW corner of the township of Beckwith; thence pursues its course through the townships of Ramsay, Pakenham, and Fitzroy; and joins the Ottawa a little below the Lac-des-Chats. Its principal affluent is the Clyde, which it receives in Drummond township. Large quantities of timber are cut on its banks.—Also an island of the Ottawa river, in Fitzroy township, 2½ m. above Fitzroy harbour. It comprises an area of about 1,000 acres.

MISSISSIPPI, a county in the NE part of the state of Arkansas, U. S., comprising an area of 1,000 sq. m., between the Mississippi on the E, and St. Francis river on the W, and drained by Whitewater river. Pop. in 1840, 1,410; in 1850, 2,276. Its cap. is Osceola.—Also a township of Scott co., in the state of Missouri. Pop. in 1840, 615.—Also a village of Harrison co., in the state of Mississippi, 265 m. SSE of Jackson, on the Gulf coast.

MISSIVRI, a town of Turkey in Europe, in Bulgaria, in the sanjak of Silistria, 20 m. NE of Bourgas, and 138 m. NW of Constantinople, on the Black sea. It is situated on a rocky peninsula, and has a port to the SW, which is said to have received all the fleet of the Byzantine empire. The town has but a small number of inhabitants, and their occupation consists chiefly in fishing.

MISSOLONGHI. See MESOLONGHI.

MISSON, a parish in Nottinghamshire, 3 m. NE by E of Bawtry, on the N bank of the Idle. Area 6,170 acres. Pop. in 1831, 841; in 1841, 834.

MISSON, a village of France, in the dep. of the Basses-Alpes, cant. and 8 m. NW of Sisteron. Pop. 1,200.—Also a village in the dep. of the Landes, cant. and 3 m. SE of Pouillon, and 11 m. SE of Dax. Pop. 1,140.

MISSOUDA, a town of Abyssinia, in the kingdom of Tigre, in the prov. of Avergale, near the Tacazze, 60 m. WNW of Antalo.

MISSOURI, a noble river of the United States of North America, the twin-sister of the Mississippi, which rises within a mile of the sources of the Columbia, in N lat. 43° 30′, W long. 112° 30′, and joins the Mississippi 3,096 m. from its source, and 1,408 m. from the gulf of Mexico, 18 m. above St. Louis, in N lat. 38° 50′, W long. 90° 13′. [*Nicollet.*] In this immense course it receives upwards of 50 large rivers, and 150 smaller streams.—The Gasconade is 157 yds. wide, and 19 ft. deep, where it falls into the M., 105 m. above the confluence of the latter with the Mississippi, in N lat. 38° 41′. It runs 150 m. from SW to NE. About 30 m. higher up, the M. receives the Great Osage, in N lat. 38° 35′, after running 300 m. from SW to NE. About half-way between the Osage and the Kanzas, the M. receives the Grand river, 100 yds. wide at the entrance. In N lat. 39° 5′ is the mouth of the Kanzas, 342 yds. wide, which runs a course of 500 m. from SW to NE. At the distance of 236 m. higher up, the great and rapid river Platte falls into the M., in N lat. 41° 3′. This river is in fact much more rapid than the M., and drives its current towards the N shore, on which it is constantly encroaching. At some distance below the point of confluence, the M. is 2 m. wide, with a rapid current of 10 m. an hour in some parts, the rapidity increasing as we approach the mouth of the Platte, the velocity of which, combined with the vast quantity of rolling sands which drift from it into the M., renders it completely unnavigable unless for flats or rafts, though the Indians pass it in small flat canoes made of hides, and the Americans have contrived to navigate it by means of keel-boats, which being constructed to draw but little water, and built upon a small keel, are well-adapted for sailing up rapid and shallow streams. The Platte runs a course from W to E of more than 800 m. About 1,026 m. up the M. is the entrance of Rapid river, which is so rapid and full of moving sands as to be unnavigable through its whole course of 300 m. from W to E. Still higher up is White river, 300 yds. broad, and navigable to a great distance. The Chyanne falls in from the SW at a point 180 m. further up. It is 400 yds. broad, and navigable to the Black mountains, where it rises in the third range. At Fort Mandan, in 99° 24′ 56″ W long., and 47° 21′ 47″ N lat., the M. is 500 yds. broad. The Little Missouri, which rises in the Black mountains, and runs more than 240 m. from S to N in direct distance, enters the M. 92 m. above Fort Mandan, but its velocity and numerous sand-bars, and comparative shallowness, being only 2½ ft. deep, render its navigation impossible but for light canoes, except in the wet seasons when the river is high. Nearly 278 m. beyond Fort Mandan is the mouth of the Jaune or Yellow Stone. Here the M. is deep and rapid, having 337 yds. of water, and 190 of a sand beach. The course of the Jaune is from SW to NE. It is large and navigable for 837 m., to the Snowy mountains; there being none of the moving sand-bars in it which impede the navigation of the M. It receives the Bighorn, which rises from Lake Riddle, a little to the N of the source of the Platte river; winds through the eastern range of the Rocky mountains; pierces the Black mountains; and, after a winding course of 500 m., falls into the Jaune. At the junction, both rivers are 220 yds. wide; but the Jaune contains much more water, being from 10 to 12 ft. deep; while the

depth of the Bighorn varies from 5 to 7 ft. White Earth river, which flows from the N into the M., is a deep and rapid stream, 60 yds. wide. The source of this river is near the Saskatchewine, and consequently beyond the 50th degree of N lat.; and the point of entrance may be regarded as the most northern bend of the M., being in 48° 20′ N lat., and 226 m. by the course of the river NW of Fort Mandan. In 110° W long., and 47° 25′ N lat., is the junction of the M. and Maria, the former being 372 yds. wide, and 6 ft. deep; the latter, 186 yds. wide, and 5 ft. deep. Here the M. is perfectly transparent, and the current rapid, with a smooth and unruffled surface; while the waters of Maria river are of a whitish brown colour, thick and turbid, and running in the same boiling and rolling manner as the M. in the greater part of its course. The Maria runs from NW to SE. Its volume of water is larger nearer its source than at its entrance into the M., as a great portion of its waters among these high and parched plains is evaporated and absorbed by the thirsty earth. In 46° 46′ 50″ N lat., and 60 geog. m. SW of the Great Falls, in direct distance, commences the great range of the Rocky mountains. From this point to its remotest source, the M. rolls its majestic stream 456 m. through the country intersected by these lofty ranges. Before entering the mountain region several dangerous rapids must be passed. For several miles below the rapids, the current of the M. gradually increases in rapidity, and the spurs of the mountain advance towards the river, which is more than 70 yds. wide, and very deep. At the rapids the river is closely hemmed in on both sides by the hills, and foams for half-a-mile over opposing rocks. The general direction of these hills is from NW to SE, and the cliffs themselves are 800 ft. perpendicular height above the surface of the river. They are of hard black granite, through which the river seems, in the progress of time, to have worn its channel. About 47 m. below the spot where the M. issues from the mountains to the plains, a most sublime and extraordinary spectacle presents itself, emphatically denominated 'the Gates of the Rocky mountains.' In ascending, the stream increases in rapidity, depth, and breadth, to the mouth of this formidable pass, where the rocks approach on both sides, rising perpendicularly from the edge of the water to the height of 1,200 ft. Near their base they are composed of black granite; but above, the colour is of a yellowish brown and cream colour. Nothing can be imagined more tremendous than the frowning darkness of these rocks, which project over the river, and menace the passenger with instant destruction. For the space of 5¾ m. the rocks rise to the above degree of elevation, and the river, 350 yds. broad, seems to have forced its channel down the solid mass; or, to use Volney's expression respecting the Falls of Niagara, literally to have sawed a passage through this body of hard and solid rock, near 6 m. in length, being incased as it were during all this distance between two walls of 1,200 ft. high. Throughout the whole distance the water is very deep, even at the edges; and for the first 3 m., there is not a spot, except one of a few yards, in which a man could stand between the water and the towering perpendicular precipice of the mountain. Above the Gates, the perpendicular rocks cease, the hills retire from the river, and the valley suddenly widens to a considerable extent; and if we can admit the supposition that the river has gradually pierced the rock, this must have been formerly the bed of a lake which once contained the obstructed waters of the M. The river now spreads out to more than a mile wide, but being much shallower, admits the use of the setting-pole. Soon after this, the M. is divided into three branches of nearly equal size, or *forks* as they are denominated in the American nomenclature. These forks are 180 m., by the course of the stream, beyond the entrance of the mountains, and 269 m. beyond the rapids at the foot of the Great Falls, in N lat. 45° 24′ 8″. Here the original American explorers ungratefully decreed to depose this grand monarch of streams by whose favour they had been enabled to advance a distance of nearly 3,000 m.; and chose to denominate that branch on which they decided to follow up their discoveries, Jefferson; while on the other two they bestowed the respective names of Gallatin and Madison. Thus this ill-fated stream has been twice deprived of its name and legitimate honours: first, by Father Hennepin, who transferred them to the Mississippi; and lastly, by Lewis and Clarke, who deprived it of its very name. Of these three branches, the Gallatin, coming from the SE, is 70 yds. wide, and is the most rapid of the three. The Madison and Jefferson branches are each 90 yds. wide; the former being the middle fork, and coming from the S, the latter from the SW. The Jefferson is 6 ft. deep, and from 90 to 120 yds. wide. The whole of these streams run with great velocity, throwing out large volumes of water; their beds are formed of smooth pebble and gravel, and their waters are perfectly transparent. At 100 m. above the forks of the M. are the forks of Jefferson river, in N lat. 45° 2′. The two subordinate branches of this stream were named Wisdom and Philanthropy; the latter coming from the NW, and the former from the SE. Philanthropy river is 20 yds. wide, with a gentle current and gravelly bottom. Wisdom river is 50 yds. wide, cold, rapid, and containing a third more water than the Jefferson; it seems to be the drain of the melting snows on the mountains, but is unnavigable on account of its rapidity. About 148 m. farther up is the extreme navigable point of the river, in N lat. 43° 30′ 2″, and 112½° W long. Two m. beyond this, is a small gap or narrow entrance, formed by the high mountains, which recede on each side, at the head of an elevated valley 10 m. long, and 5 m. broad. Up this gap is the Indian road to the W. From the foot of one of the lowest of these mountains, which rises with a gentle ascent of half-a-mile, issues the remotest water of the M. Capt. Lewis's party ascended toward the W by the Indian path, till they reached a high ridge which formed the dividing line between the waters of the Pacific and the Atlantic. Here the cold was so intense, though it was the latter end of August, that the water which stood in vessels exposed in the air was frozen to the depth of one-fourth of an inch during the course of the night; the ink froze in the pen; and the low grounds were white with hoar-frost, though the day afterwards proved extremely warm.

Scenery.] Catlin, describing the scenery of the M. and the character of its stream, says: "From the mouth of the Yellow Stone river to the M.'s junction with the Mississippi, a distance of 2,000 m., the M., with its boiling, turbid waters, sweeps off in one unceasing current; and in the whole distance there is scarcely an eddy or resting-place for a canoe. Owing to the continual falling in of its rich alluvial banks, its water is always turbid and opaque, having at all seasons of the year the colour of a cup of chocolate, or coffee, with sugar and cream stirred in it. For the distance of 1,000 m. above St. Louis, the shores of this river (and, in many places, the whole bed of the stream) are filled with snags and raft, formed of trees of the largest size, which have been undermined by the falling banks, and cast into the stream; their roots becoming fastened in the bottom of the river, and their tops floating on the surface of the water, and pointing down the stream, forming

the most frightful and discouraging prospect for the adventurous voyageur. Almost every island and sand-bar is covered with huge piles of these floating trees, and when the river is flooded its surface is almost literally covered with floating raft and drift wood, which bids positive defiance to keel-boats and steamers on their way up the river. The scene is not, however, all so dreary; there is a redeeming beauty in the green and carpeted shores, which hem in this huge and terrible deformity of waters. There is much of the way through, where the mighty forests of cotton-wood stand, and frown in horrid darkness over the filthy abyss below, into which they are ready to plunge headlong, when the mud and soil in which they were germed and reared has been washed out from underneath them, and is with the rolling current mixed, and on its way to the ocean. The greater part of the shores of this river, however, is without timber, where the eye is delightfully relieved by wandering over the beautiful prairies; most of the way gracefully sloping down to the water's edge, carpeted with the deepest green, and, in the distance, softening into velvet of the richest hues, entirely beyond the reach of the artist's pencil. Such is the character of the upper part of the river especially; and as one advances towards its source, and through its upper half, it becomes more pleasing to the eye, for snags and raft are no longer to be seen; yet the current holds its stiff and onward turbid character. One thousand miles or more, of the upper part of the river, were, to my eye, like fairy-land; and, during our transit through that part of our voyage, I was most of the time riveted to the deck of the boat, indulging my eyes in the boundless and tireless pleasure of roaming over the thousand hills and bluffs, and dales and ravines, where the astonished herds of buffaloes, of elks, and antelopes, and sneaking wolves, and mountain-goats, were to be seen bounding up and down and over the green fields; each one and each tribe, band, and gang, taking their own way, and using their own means to the greatest advantage possible, to leave the sight and sound of the puffing of our boat, which was, for the first time, saluting the green and wild shores of the M. with the din of mighty steam. From St. Louis to the falls of the M., a distance of 2,600 m., is one continued prairie, with the exception of a few of the bottoms formed along the bank of the river, and the streams which are falling into it, which are often covered with the most luxuriant growth of forest timber. The summit-level of the great prairies stretching off to the west and the east from the river, to an almost boundless extent, is from 200 to 300 ft. above the level of the river, which has formed a bed or valley for its course, varying in width from 2 to 20 m."

Velocity of current, &c.] The velocity of the M. is said to be about 4 m. an hour, or double that of the Mississippi; and its water is turbid, while that of the Mississippi is beautifully clear. The fall of the Mississippi from St. Peter's, and that of the M. from Pierre Chouteau, to the confluence of the two rivers, are in the ratio of 45 to 85, according to Nicollet, and therefore the average rapidity of the M. is nearly twice that of the Mississippi. The great rapidity of current in the M. rendering this river difficult of navigation, even by the power of steam, in the upward voyage, is not the only obstacle, however, to the passage of boats upon it. Its velocity and force constantly bring along and heap up sand-bars, — a characteristic of nearly all the western rivers, except the Des Moines and Rock rivers, which have rocky beds. Beside the accumulating and shifting of sands, the same cause fills the river with 'planters,' 'snags,' and 'sawyers,' which are all the same thing, that is, drift wood partly buried in the sand so as to hold in position, while projecting to the surface it presents a point upon which the boat strikes and is wrecked. The different names given to this kind of obstruction have reference merely to the position in which they become fixed. The M. in the lower part of its course is very turbid, bringing down a great quantity of mud with its waters. This character, it has been said, it loses above the Platte, 600 m. from its mouth. The difference in the descent of its current above that point, as given by Nicollet, renders the assertion very probable. Above Yellow Stone it has a fall of 362 ft. in 17 m.: the upper fall is 90 ft. On reaching the Coteau-du-Missouri, there are no further apparent traces of the cretaceous formation. It is a rolling prairie, the soil partly covered by a short, sweet-scented, and grateful verdure. An inspection of the gulleys shows that the basis of this soil is the erratic deposit previously described. The siliceous particles of the soil are blackened by the smoke of the vernal and autumnal fires of the prairies; and, as the growth is too scant to prevent the dust from being raised by the almost incessant winds that blow over them, the traveller is very much inconvenienced. There are no springs to quench the thirst; and it is only at wide distances apart that small pools are met with, bordered by aquatic plants, towards which the experience of his guide is necessary to bring him to his bivouac.

MISSOURI, one of the Western United States of North America, situated between 36° 30′ and 40° 30′ N lat., and between 89° 20′ and 96° W long.; and bounded on the N by the state of Iowa; on the E by the Mississippi, which separates it from the state of Illinois and Kentucky; on the S by 'the compromise line' of 36° 30′; and on the W by the Indian territory and the Missouri river. Its length from N to S is about 300 m.; its average breadth, 230 m. The superficial area is 67,451 sq. m., or 43,169,028 acres, according to some authorities; but others estimate it at only 64,000 sq. m.

Physical features.] With the exception of the alluvial bottoms, M. is rolling or hilly; yet no part rises to an elevation deserving the name of a mountain. No other state in the Union is so greatly diversified as respects soil and external features. The SE corner is almost entirely alluvial. A range of hills commences in François co., and extends in a SW direction to the S boundary of the state. Another range of a larger class, commencing near the Missouri, and between the waters of the Gasconade and Osage, continues through the state, increasing in magnitude until far within the state of Arkansas, —it is termed the Ozark mountains. This ridge is frequently very abrupt near the water-courses, and often retiring from them, with strips of rich alluvial between. The 'Pine ridge' in this region, furnishes that lofty timber in abundance; many of the trees being 90 ft. high, and 4 ft. in diam. Throughout the mineral district is found, on searching the bowels of the earth for ores, beds of rich red marl clay, which has been proved to be the very best manure for the soil. These beds are inexhaustible; and some years hence, that portion of M. which is considered a sterile, mineral region, will be found as fertile as any portion of the state. Between the waters of the Osage and the Missouri is a fine tract of country celebrated for its fertility, agreeably diversified with woodland and prairie, and abounding with coal, salt springs, &c. The country N of the Missouri is a fine district, and can be traversed easily in its natural state. It has for the most part a surface delightfully rolling and variegated, sometimes rising into picturesque hills, then stretching far away

into the sea of prairie, occasionally interspersed with shady groves and sparkling streamlets. Almost every acre of this fine region of country is susceptible of agricultural improvement, and is unusually productive.—The Mississippi meanders along the entire E boundary of the state, for a distance of 400 m., receiving in its course the waters of the Missouri. Through the centre and the richest part of the state, the wild Missouri pours out its never-ceasing currents, being navigable for steam-boats far westward, for 4 or 5 months in the year. The Lamine, Osage, and Gasconade on the r., and the Grand and Chariton on the l., are the navigable tributaries of the Missouri in this state. Salt river, a navigable stream, falls into the Mississippi 86 m. above the Missouri. Maramec river, also navigable, enters the Mississippi 18 m. below St. Louis. The White and the St. François drain the SE portion, and the Six Bulls and its tributaries the SW part of the state.

Climate and soil.] This state is subject to great extremes of temperature. The summer is intensely hot, and the winter often so severe, that the Missouri is frozen for weeks so as to be passed by loaded waggons. The sky in summer is clear, and the air generally very dry.—The soil contains more sand, and is more loamy and friable than that of the lands upon the Ohio. The alluvial prairies are universally rich, and nearly as fertile as the river bottoms. The rich uplands have a dark gray soil, except about the lead mines, where the soil is formed of a decomposed pyrites, and is of a reddish colour. Nearly all the level tracts are sufficiently fertile to produce good crops of maize without manure. The alluvial borders of the Missouri are generally loamy, with a large proportion of sand. The soil here contains a quantity of marl or lime, and is exceedingly fertile. The richer prairies and bottoms are covered with grass and weeds so tall as to make it difficult to travel on horseback. In the SW part are large tracts of poor, sandy soil, covered with yellow pine, and in many parts stony.

Minerals.] Perhaps no region in the world surpasses M. in the variety and abundance of its mineral resources. To inexhaustible stores of lead and iron, coal and salt, are to be added zinc, manganese, antimony, plumbago, iron pyrites, arsenic, and copper, nitrous and aluminous earth, potter's clay, marble, freestone, and granite, sulphuretted and thermal waters, &c., and according to some accounts, indications of silver and cobalt occur. Generally speaking, the prevailing rocks are carboniferous limestones and saliferous sandstones. The Ozark mountains appear to consist mainly of masses of instrusive rocks, granite, sienite, porphyry, &c., and of altered limestones and sandstones. The repository of the lead-ore, which is galena or sulphuret of lead, is magnesian limestone, but the limits and extent of the galeniferous region have never been ascertained; the ore is known to be abundant, not only in the districts usually called the lead-region, and the seat of the oldest and most extensive diggings, but also in several counties W of the Osage, and N of the Missouri. Operations were commenced here by the French as early as 1720. The processes have been of the rudest sort; wherever indications of the *mineral*—as the galena is called by the miners—appear on the surface, an excavation has been commenced, and the whole surface of the ground has been cut out into pits of various sizes, from 3 or 4 to 20 ft. in diam., and from 10 to 15 ft. in depth, '*the digging*' being abandoned as soon as the depth renders it inconvenient to throw out the earth, or to hoist out the mineral by a simple windlass and bucket; blasting is also resorted to when a rich vein is struck in the metalliferous rock, but much of the ore is found loose in alluvial deposits, in lumps of various sizes. In a large way, it yields from 80 to 85 per cent. of pure metal, but by more careful processes might be made to give considerably more. The annual produce of the M. diggings is at present about 7,000,000 lbs., a portion of which is manufactured into shot and sheet lead. Iron-ore is found in numerous localities, but we have no particular account of its character and quantity, except in the case of the enormous masses in Madison and Washington cos. The Iron mountain, of this district is a homogeneous deposit of pure, massive, specular iron, containing only in a few cases, crystals of feldspar; and the Pilot-knob is a mountain made up in large proportion of specular iron, the feldspar often scarcely exceeding the ore with which it is mixed. Although copper and silver are known to exist, and have been successfully worked, we have no definite account of the situation and extent of the ores. Bituminous coal is found in almost every co., except in the mineral district, and the beds are said to be of great extent and of easy access. Salt springs are numerous, but little attention is paid to the manufacture of salt.

Finances.] The receipts into the Treasury for the two years, 30th September, 1850, were: 787,088 d. 71 c.

Add balance in Treasury, October 1, 1848,	405,404	90
Total means,	1,192,493	61
Expenditures during the same period,	532,585	82
	659,907	79

Of which sum 569,036 d. 19 c. belongs to the revenue fund.

The income of the state is derived from taxation, from granting licenses, and from dividends of bank stock owned by the state in the bank of Missouri. The dividends of the bank stock were, in 1849, 28,541 d.; and in 1850, 16,972 d. The amount received for licenses to merchants, professional men, foreign insurance companies, &c., in 1849 and 1850, was 169,889 d. The list of taxables for the two years was as follows:

	1849.	1850.
Polls,	33,798 d.	35,546 d.
Taxes,	31,879	32,512
Land (acres),	8,808,603	9,511,251
Valuation,	31,512,391	36,099,407
Taxes,	63,276	72,511
Town lots,	32,017	34,663
Valuation,	22,441,068	24,563,830
Taxes,	45,115	49,127
Slaves,	65,707	69,422
Taxes,	35,544	39,215
Tax on salaries,	2,421	1,237
Notes and bonds,	6,989	12,821
Personal property (value),	7,730,508	10,797,566
Tax,	15,473	21,689
Total taxes,	203,488	229,273

Debt.] The state debt, exclusive of the surplus revenue deposited with the state, is 922,261 d., which is the exact amount of the state bonds sold and now outstanding.

State debt,		922,261 d.	00 c.
Deduct stock in bank of M., owned by state,	272,263 d. 60 c.		
Sinking fund,	9,394 78		
		281,658	38
Which would give for the debt of the state,		640,602	62
But the bank claims as due from the state for money advanced and interest of,		124,026	47
Which, if allowed, would make the debt		764,620	09

The state owns bank stocks in the bank of M. as follows:

The seminary fund,	100,000 d.	00 c.
State school fund,	575,667	96
Sinking fund,	6,273	66
In her own right,	272,263	60
	954,205	22

MISSOURI, a township of Boone co., in the state of Missouri, U. S. Pop. in 1840, 2,964.—Also a township of Scott co., in the same state. Pop. 504.—Also a township of Pike co., in the state of Arkansas. Pop. 205.—Also a township of Hempstead co., in the same state. Pop. 672.

MISSOURITON, a village of St. Charles co., in the state of Missouri, U. S., 92 m. E by N of Jefferson city, on the N side of Missouri river.

MISSTRAET, a commune of Belgium, in the prov. of Antwerp and dep. of Konings-hoyckt. Pop. 187.

MISTAKEN (Cape), a headland of Newfoundland, on the SE coast of the peninsula of Avalon, and WSW of Cape Race, in N lat. 46° 40′. It is frequently mistaken by navigators for Cape Race.

MISTAKEN, or Coxcomb (Cape), a headland of Van Diemen's Land, on the E side of Maria island, co. of Pembroke, and to the N of Reidle bay, in S lat. 42° 42′ 30″, and E long. 148° 14′.

MISTASSINNY, or Mistassin, a lake of Labrador, 270 m. ESE of St. James's bay, with which it communicates by the Rupert.

MISTE′, a volcano of the Andes, in Peru, in the intendency and 9 m. NE of Arequipa. Its height was estimated by Haenk at 3,180 toises, by Curson at 3,721 toises.

MISTECK, or Mistko, a town of Moravia, in the circle of Prerau, 1 m. S of Friedeck, and 30 m. ENE of Weisskirchen, on the l. bank of the Ostrawitza. Pop. 2,610. It has a manufactory of coarse cloth.

MISTELBACH, a market-town of Austria, in the lower circle of the Mannhartsberg, 20 m. NE of Korneuburg, and 10 m. W of Zistersdorf, on the Zaya. Pop. 2,468. It has a college of the Barnabites and an hospital, and contains several tanneries and soap-works.

MISTEN-FJORD, a bay of Norway, in the amt of Nordland, to the N of Saltens-fjord.

MISTERBIANCO, a town of Sicily, in the prov. and district and 4 m. NW of Catania. Pop. 3,000. It has several thermal springs.

MISTERHAUT, a parish of Sweden, in the prefecture and 60 m. N of Kalmar, near the coast. Pop. 2,420. It has a copper-mine.

MISTERIOSA, an island in Honduras bay, 180 m. E of Yucatan, in N lat. 18° 35′. It is environed by a huge sand-bank.

MISTERTON, a parish of Leicestershire, 1 m. E by S of Lutterworth. Area 3,580 acres. Pop. in 1831, 587; in 1841, 589.—Also a parish in Nottinghamshire, 4½ m. NW of Gainsborough, intersected by the Chesterfield canal. Area 5,420 acres. Pop. in 1831, 1,579; in 1841, 1,706.

MISTLEY, a parish and village of Essex, ¾ m. SE by E of Manningtree. Area 1,890 acres. Pop. in 1831, 876; in 1841, 976.

MISTRA. See Misitra.

MISTRETTA, a district and town of Sicily, in the prov. of Messina, 81 m. WSW of Messina. The district contains 5 cants. The town is 81 m. WSW of Messina, and 23 m. SE of Cefalú, on the l. bank of the Regitano. Pop. 8,400.

MISYIMMA, a town of Japan, in the island of Nifon, and prov. of Sangami, to the SW of Jedo. It is noted for its temple.

MISZLING, a village of Austria, in Styria, in the circle of Cilly, on a river of the same name. Pop. 706. It has a blast-furnace, and several manufactories of iron-ware.

MISZTOTFALU, a town of Hungary, in the comitat and 32 m. ESE of Sathmar.

MITAU, Mittau, or Jelgava, a town of Russia in Europe, cap. of the gov. of Courland, 27 m. SW of Riga, and 360 m. SW of St. Petersburg, in a flat and marshy locality, on the l. bank of the Aa. Pop. in 1846, 28,100, of whom about a half are of German descent. Its ancient ramparts have been destroyed, and it now extends over a large surface. Some of its streets are spacious, straight, and regular, but many are still unpaved. The old portions of the town are ill-built, but these are being rapidly substituted by modern buildings, and the market-place is now surrounded by handsome colonnades. The houses are chiefly of timber, low, and one-storied. The principal edifices are the government-house, originally a castle founded by duke Ernest John, and noted as the residence for several years of Louis XVIII., and the churches, of which 1 is Catholic, and 4 are Protestant. It has also 3 synagogues, a gymnasium with a library of 25,000 vols., a museum and observatory, a bank in connection with that of St. Petersburg, an hospital, an alms-house, a lunatic asylum, and several other benevolent institutions. Linen, soap, hosiery, and leather, are its chief articles of manufacture. This town was the ancient capital of the dukes of Courland. It was taken by the Swedes in 1701, and held by them for nearly six years.

MITCHAM, a parish and village of Surrey, 8 m. S by W of London, and crossed by the Croydon railway. Area 2,670 acres. Pop. in 1841, 4,532.

MITCHELDEVER, a parish in the co. of Southampton, 6½ m. N by E of Winchester, and intersected by the Southampton and London railway. Area 9,340 acres. Pop. in 1831, 936; in 1841, 1,119.

MITCHELL, an island of New South Wales, in the co. of Gloucester, formed by the two embouchures of Manning river at their entrance into the Pacific.—Also a mountain of Eastern Australia, in the district of Clarence river, near Cunningham's gap.—Also a summit of the Dividing range, in the district of Darling downs, which has an alt. of 4,120 ft. above sea-level.—Also a mountain of Western Australia, in the co. of Stirling, on the W side of Forth river.—Also a river of North Australia, in S lat. 13°, discovered by Dr. Leichhardt.

MITCHELL, a township of Poinsett co., in the state of Arkansas, U. S. Pop. in 1840, 414.

MITCHELLESTON, a village of Australia Felix, on the Goulburn or Bayungun river, 80 m. N of Melbourne.

MITCHELLSTOWN, a post and market-town in the p. of Brigown, co. Cork, on a small tributary of the Funcheon, 13½ m. SW by W of Cahir, and 101 m. SW by S of Dublin. The town wears an air of comfort and respectability. The college is a square of neat houses, with attached chapel and chaplaincy, for the maintenance of 12 decayed gentlemen and 16 decayed gentlewomen. It was originally intended for the decayed Protestant tenantry on the Kingston estates, but it now embraces a much more extensive scope. Each of the eleemosynary inmates has a small house and garden, and an allowance of £40 a-year. The church of Brigown is a handsome structure, erected in 1800 at the private cost of the countess of Kingston. The Roman Catholic chapel is also a handsome edifice.—The town has well-attended markets and fairs, and conducts a considerable amount of retail business. Pop. in 1831, 3,545; in 1841, 4,181. Families employed chiefly in agriculture, 197; in manufactures and trade, 425.—M. demesne comprises not less than 1,300 acres, enclosed with a wall 10 ft. high, with offices, plantations, gardens, pleasure-grounds, and water-scenes upon the Funcheon river, in a style of gorgeous display. The mansion is a castellated structure, claiming to be both the largest and the best modern castellated residence in Ireland, erected by the Earl of Kingston in 1823.

MITCHELLSTOWN, or Strokestown, a parish in co. Meath, 3 m. SE of Nobber. Area 973 acres. Pop. in 1831, 303; in 1841, 248.

MITCHELLSTOWN CAVES, an extensive and beautiful series of stalactitic caverns in co. Tipperary, situated about 1 m. S of the transit of the Dublin and Cork mail-road, midway between Cahir and Mit-

chellstown, and 6½ m. NW by W of Clogheen. Two small and mutually adjacent hills of compact grey limestone are the sites of the two series of caves.

MITCHELMERSH, a parish in the co. of Southampton, 3¾ m. N by W of Romsey, bounded on the W by the Anton or Test river, and crossed by the Andover canal. Area 5,440 acres. Pop. 1,180.

MITERIO (San), a town of Italy, in the prov. and district and 27 m. NNW of Syracuse, and 13 m. NW of Agosta, near a small lake.

MITFORD, a parish and township in the co. of Northumberland, 2½ m. W by S of Morpeth, on the Wansbeck. Area of p. 9,790 acres. Pop. in 1831, 701; in 1841, 733. Pop. of township in 1831, 194.

MIT-GAMAR, a town of Lower Egypt, in the prov. and 27 m. SSW of Mansurah, and 48 m. N of Cairo, on the r. bank of the principal E branch of the Nile, and nearly opposite Zefti. It is ill-built, and contains a Coptic church and several mosques.

MITHO, a town of Annam, in the prov. of Dongnae, on the l. bank of Japanese river, the E branch of the Mekon, 30 m. above its entrance into the China sea, and 45 m. SW of Saigon.

MITIA. See Aurora.

MITIAKINSKAIA, a town of Russia in Europe, in the gov. of the Don Cossacks, and district of Donetz, 102 m. N of Tcherkask, on the l. bank of the Donetz.

MITIARO, or Mitiero, an island of the South Pacific, in the group of the Harvey islands, in S lat. 19° 55′, W long. 157° 54′. It is about 5 m. in length from N to S; low, woody in the centre, but possessing little fertility. It was discovered in 1823 by Captain Dibbs.

MITIMOROU, a town of Zanguebar, and state of Quiloa, ESE of Mongaleo, on the Indian ocean.

MITIOUCHEV, or Mitouchev (Cape), a headland of Nova-Zembla, on the W coast, to the N of the entrance of Matochkin strait, in N lat. 73° 45′.

MITKOVA, a town of Russia in Europe, in the gov. and 78 m. NE of Tchernigov, and district of Novo-Zibcoy, 33 m. SW of Starodoub.

MITLA, a village of Mexico, in the state and 30 m. ESE of Oaxaca, on the table-land of Mixtecapan, It is also called Miguellan, which, appropriately to the gloomy wildness of the locality, signifies 'place of Desolation.' It was the place of sepulture of the Tzapotic monarchs.

MIT-RAHINEH, a village of Middle Egypt, in the prov. and 12 m. S of Ghizeh, and 34 m. NNE of Atfieh, in the midst of a date plantation, near the pyramids of Saccara.

MITRE, a desert island of the South Pacific, in S lat. 11° 50′, E long. 170° 45′. It has two remarkable promontories, one of which presents the form of a mitre, and the other of a steeple. It was discovered by Captain Edwards in 1791.

MITRE (Saint), a village of France, in the dep. of the Bouches-du-Rhone, cant. and 5 m. SSE of Istres, and 25 m. WSW of Aix, on an elevated plateau. Pop. 1,040. It is enclosed by substantial walls, and contains an abundant supply of water.

MITROWITZ, or Mitrovicz, a market-town of Hungary, in the Militar-Gränze, 24 m. SSW of Peterwardein, and 45 m. WNW of Belgrade, near the l. bank of the Save. Pop. 5,200, chiefly Greeks. It contains a Catholic, 3 Greek churches, and a high school. It has a considerable trade in cattle and in skins. This town was ceded to Austria by the Turks in 1699.

MITRY, a commune of France, in the dep. of the Seine-et-Marne, cant. and 5 m. NW of Claye, and 14 m. W of Meaux, near the canal de l'Ourcq. Pop. 1,383.

MITSUKE, a district of Japan, in the island of Nifon, and prov. of Bingo.

MITSU-SIMA-NADA, a strait of Japan, which separates the islands of Nifon and Sitkokf. It is 15 m. in breadth at its narrowest part, and is studded with islands.

MITTAGONG, a town of New South Wales, in the co. of Camden, on the great S road, 73 m. SW of Sydney, and 10 m. ENE of Berrima.—Also a range of hills in the same co., commencing about 73 m. from Sydney, and terminating abruptly on the W in its highest summit named Bowrell or Gibraltar. It divides the basins of the Nepean and Wingecarribee rivers.

MITTAMATTA, a river of Australia Felix, in the district of Murray, which flows into the river of that name near Albury.

MITTAU. See Mitau.

MITTELBRONN, a village of Würtemberg, in the circle of the Jaxt, and N of Gmund. Pop. 380. It has an alum and vitriol manufactory.

MITTEL-GEBIRGE, a chain of mountains in Bohemia, in the circles of Saatz and Leitmeritz. It detaches itself from the Erzgebirge on the S, between the sources of the Biela and Wild-Saubach; runs first in a SE direction between these two rivers; bends then NE between the first-named, the Eger, and the Elbe; and joins the latter near the confluence of the Biela, near Aussig, after a course of 45 m.

MITTELHARNIS, a village of Holland, in the prov. of South Holland, on the N side of the island of Over Flakke.

MITTELHAUSEN, a village of the duchy of Saxe-Weimar, to the NW of Weimar, on the Gera. Pop. 813.

MITTEL-POLLNITZ, a village of the duchy of Saxe-Weimar, and circle of Neustadt, NE of Triplis. Pop. 220.

MITTEL-ROTH, a hamlet of Würtemberg, in the circle of the Jaxt, bail. and 2 m. WSW of Gaildorf, and 20 m. W of Ellwangen.

MITTELSCHEUERN, a village of Bavaria, in the circle of Upper Bavaria, and presidial of Pfaffenhofen. It has a manufactory of arms.

MITTELSCHMIEDEBERG, a village of Saxony, in the circle of the Erzgebirge, and circle of Wolkenstein.

MITTELWALDE, Medzibor, or Meczibor, a town of Prussia, in the prov. of Silesia, regency and 37 m. NE of Breslau, circle and 7 m. of Wartenberg, at an alt. of 1,400 ft. above sea-level. Pop. in 1837, 1,640. It has a custom-house, and possesses manufactories of linen, cloth, hosiery, and tobacco.

MITTENWALD, or Mittewald, a market-town of Bavaria, in the circle of Upper Bavaria, on the l. bank of the Isar. Pop. 1,718. It has manufactories of musical instruments, and carries on an active trade in wood.—Also a village of Austria, in the Tyrol, in the circle and 10 m. NNW of Brixen, in the Pusterthal.

MITTENWALD, or Mittenwalde, a town of Prussia, in the prov. of Brandenburg, regency and 23 m. ESE of Potsdam, circle of Teltow-Storkow, and 20 m. SSE of Berlin, on the Notte. Pop. 1,966. It is enclosed by walls, and has two churches and an hospital.

MITTERBURG. See Pisino.

MITTERDORF, a village of Illyria, in the gov. and 15 m. S of Laybach, circle and 29 m. WSW of Neustädt, at the foot of the mountain of Trannagora. It has a coal-mine.

MITTERFELS, a village of Bavaria, in the circle of Lower Bavaria, 12 m. NE of Straubing. Pop. 200.

MITTERSILL, a town of Austria, in the ldgb. of Linz, circle and 27 m. SSW of Saltzburg, on the r. bank of the Salza. Pop. 600. It has two churches, and mineral baths.

MITTERTEICH, a market-town of Bavaria, in the circle of the Upper Pfalz, to the NW of Tirschenreut. Pop. 1,160.

MITTIERO. See MITIERO.

MITTIMI, an oasis of Nigritia, in the N part of Bornu, and to the NW of Lake Tchad, on the road from Murzuk to Kuka, and 12 m. N of Lari. It has upwards of 50 wells, in a hollow shaded with groups of tellobs and other trees of the mimosa species.

MITTLODI, a village of Switzerland, in the cant. and 2 m. SSE of Glaris, on the l. bank of the Linth.

MITTON, a parish and township, partly in Lancashire, and partly in the W. R. of Yorkshire, 2¼ m. SW of Clitheroe. Area of p. 18,540 acres. Pop. in 1831, 5,277; in 1841, 4,201. Area of township 1,450 acres. Pop. in 183[illegible], 262; in 1841, 212.—Also a township in the p. and 2½ m. WNW of Penkridge, Staffordshire, on a branch of the Trent.

MITTON (LITTLE), a township in the p. of Whalley, Lancashire, 3¼ m. SW of Clitheroe, at the junction of the Hodder and Calder with the Ribble. Area 1,450 acres. Pop. in 1831, 70; in 1841, 74.

MITTON (LOWER), a chapelry in the p. and 3½ m. S by W of Kidderminster, co. of Worcester. Pop. in 1831, 2,952; in 1841, 3,012. This chapelry includes the town of Stourport.

MITTON (UPPER), a hamlet in the p. of Hartleburg, Worcestershire, ¾ m. NE of Stourport. Area 180 acres. Pop. in 1831, 202; in 1841, 269.

MITTUAPIRA, a river of Brazil, in the prov. of Rio-de-Janeiro, and parish of Itaborahi.

MITTUN-KOTE, a town in the S extremity of the Punjab, 70 m. S of Dera-Ghazi-khan, and 460 m. from the sea, near the confluence of the Punjnud with the Indus, and at an alt. of 220 ft. above sea-level, in N lat. 28° 54′, and E long. 70° 25′. Pop. 4,000. The Indus was here found by Burnes, in the month of May, 2,000 yds. wide; but during the period of inundation it spreads over a wide tract of country, and renders the locality extremely unhealthy. Apart from its insalubrity, the situation of the town is a highly advantageous one, commanding as its does the trade of the Indus. The surrounding country contains numerous date-groves.

MITTWEYDA, a town of Saxony, in the circle and 39 m. SE of Leipsig, bail. and 11 m. SE of Rochlitz, on the l. bank of the Zschopau. Pop. in 1846, 6,237. It has extensive manufactories of cotton, woollen, and linen fabrics, sail-cloth, hosiery, and hats.

MITYLENE, or METELIN, an island in the Ægean sea, off the coast of Asia Minor, at the mouth of the gulf of Adramytti, the *Lesbos* of the ancients. It is 50 m. in length from NW to SE; and varies in breadth from 6 m. to 23 m. It is one of the most fertile and beautiful islands of the Ægean. Here winter is unknown; the verdure is perpetual; and the abundance of evergreens gives to January the colouring of June. Here the parching heats of summer are never felt: the thick shade of trees, and thousands of crystal founts which everywhere rise and form themselves into numberless rivulets, joined to the refreshing sea-breeze—the constant corrective and companion of meridian heat—cool the air, and render the year an endless May. The mountains, covered with vines and olives even amidst their rugged tops, rise round the numerous bays of the coast; while in the interior they are clad with the mastic, turpentine, pine of Aleppo, and cistus. The verdure of the olive is here embellished and brightened by a lively mixture of bays and laurels aspiring to the height of forest trees, of myrtles, and pomegranates, of arbutus rich at once in blossom and berry, and of mulberries growing wild and loaded with fruit. The houses are chiefly square towers neatly built of hewn stone, and so high as to overtop the trees and command a view of the sea and neighbouring islands. Their lower stories are granaries and storehouses, and the habitable apartments are all at the top, to which access is gained by a stone stair built for the most part on the outside, and surrounding the tower. The amount of the pop. has been variously estimated. By one estimate 25,000 souls is the number assigned, and by another 40,000, one-half of whom are Turks and the other half Greeks. At the time of the Turkish massacre in 1825, its pop. was said to amount to 70,000. Castro, the capital, built on the site of the ancient *Mitylene*, many vestiges of which are still found, stands on the SE shore. It has manufactories of soap, and some well-furnished bazaars, and might command an extensive trade were it not for the exactions of its rulers. The other towns are Patras and Coloni.—M. formerly contained eight cities of note, amongst which *Methymna* was celebrated for its fertile territory and excellent wines. But the island is chiefly famous for the many great men it produced. Pittacus the sage, Alcæus the lyric poet, Arion the musician, Terpander who gave additional strings to the lyre, Theophrastus the successor of Aristotle, Hellanicus the historian, Callias the critic, and Sappho the celebrated poetess, were natives of this island. It was captured by the Venetians in 1185; recaptured by the Greeks; and at last seized by the Turks, who still retain it.

MITZKADEH, a town of Japan, in the island of Nifon, and prov. of Tutomi, consisting of about 250 houses.

MITZKE, a town of Japan, in the island of Nifon, and prov. of Tutomi, near the W bank of the bay of Totomina. It consists of about 500 houses.

MITZUBO, a district of Japan, in the island of Nifon, and prov. of Farima.

MIUHA, a small river of Brazilian Guayana, an affluent of the Rio-Negro, which it joins on the l. bank, between the villages of Camundé and Camanahu. Sarsaparilla grows abundantly on its banks.

MIXBURY, a parish of Oxfordshire, 7½ m. N by E of Bicester, and S of the Ouse. Area 2,630 acres. Pop. in 1831, 387; in 1841, 391.

MIXCO, a village of Guatimala, in the state and 5 m. SW of the town of that name, and in the valley of Mixco, at the foot of a mountain. In its vicinity are the ruins of a town of the same name.

MIXNITZ, a village of Styria, in the circle and 6 m. SSE of Bruck, and 20 m. NNW of Gratz, on the l. bank of the Muhr.

MIXTAT, or MIXSTADT, a town of Prussia, in the prov. and regency and 83 m. SSE of Posen, circle and 8 m. N of Schildberg. Pop. 1,150.

MIXVILLE, a village of Hume township, Alleghany co., in the state of New York, U. S., 267 m. W by S of Albany, on West Koy creek.

MIYA, or MIA, a bay of Japan, on the S coast of the island of Nifon, bordered by the prov. of Owari on the E, that of Minho on the N, and by the prov. of Isse on the W. It is about 70 m. in depth; and receives on the N the Uta-gawa and Kisso-gawa rivers. Its entrance is about 25 m. in breadth. On its E side it expands into Owari bay.—Also a town in the province and on the bay of Owari, at the mouth of a river. It is surrounded with a ditch; and has a palace, a temple, and a small port. It consists of about 2,000 houses.

MIYAKI, a district of Japan, in the island of Nifon, and prov. of Mouts.

MIYAKO. See MEACO.

MIYARISIMA, an island of Japan, dependent on the prov. of Idsou, in the island of Nifon, to the

Drawn by J.D.Harding from a sketch by R. Fayle

Engraved by E. Finden

MT. TEIDE.

SSE of the island of Nokisima. It is inhabited chiefly by fishermen.

MIYASAKI, a district of Japan, in the island of Kiu-siu, and prov. of Fiyouga.

MIYAVARA, or MIAVARA, a town of Japan, in the island and district of Avasi.—Also a town in the island of Kiu-siu, and prov. of Tsikougo, on the gulf of Simabara.—Also a town in the island of Nifon and prov. of Bingo.

MIYOURI-YESIMA, a district of Japan, in the island of Nifon, and prov. of Sangami.

MIZANTLA, a village of Mexico, in the state and 75 m. NW of La Vera Cruz, near the gulf of Mexico. It contains about 490 families, 260 of whom are Indian. The latter find their chief employment in gathering vanilla in the adjacent forests of Quilate.

MIZAR, or MAZAR, a river of Chinese Turkestan, which has its source on the N side of the Yagni-Dawan or New Mountains; flows NNW; and joins the Yarkand river, about 10 m. SW of the town of that name, and after a course of about 150 m. The principal towns on its banks are Mazar, Kelastan, and Kergalik. It often bears the name of the latter in the lower part of its course.

MIZEN-HEAD, a headland of co. Wicklow, 6½ m. SSW of Wicklow-Head. It has an alt. of 41 ft. above sea-level, and is surmounted by an old round tower.—Also a headland of co. Cork, at the extremity of a peninsula, between Dunmanus and Ballyderlin bays, 5¼ m. S of Sheep-Head, and 11 m. WNW of Cape Clear. It rises gradually to the height of 759 ft. above sea-level.

MIZIAKOV, a town of Russia in Europe, in the gov. of Podolia, district and 9 m. N of Vinnitza, and 12 m. NE of Litin, on the r. bank of the Bug.

MIZIM, a village of Galicia, in the circle and 24 m. S of Stry, and 36 m. W of Stanislowow, on the l. bank of the Mizunia. It contains mines of iron.

MIZOTCH, a town of Russia in Europe, in the gov. of Volhynia, district and 21 m. E of Doubno, and 17 m. W of Ostrog.

MIZQUE, a town of Bolivia, in the dep. of Cochabamba, 42 m. SE of Oropesa, and 60 m. N of Chuquisaca, on the l. bank of the Guapey. It was formerly the capital of a prov., and still exhibits extensive remains of its ancient splendour. Its decay is attributable chiefly to the insalubrity of the locality.

MLADA-BOLESLAW. See BUNZLAW.

MLAVA, a river of Turkey in Europe, in Servia, and sanj. of Semendria, which has its source in Mount Haiduchki; runs NNW; and joins the Danube, on the r. bank, at Kullich, 15 m. ENE of Semendria, and after a course of about 60 m.

MLAWA, an obwod and town of Poland, in the gov. of Plock. The obwod contains 33,375 inhabitants, of whom 3,164 are Jews. The town is 51 m. NE of Plock, and 45 m. NW of Pultusk, on the Mlawka. Pop. 1,000. It has two churches and a convent, and possesses manufactories of cloth and leather.

MLAZOWITZ, a town of Bohemia, in the circle of Bidschow, 12 m. N of Neu-Bidschow, and 8 m. ESE of Gitschin. Pop. 400.

MLOUINOV, a town of Russia in Europe, in the gov. of Volhynia, district and 7 m. NW of Doubno, and 24 m. SE of Loutzk, on the r. bank of the Ikva.

MNAKEB, a town of Arabia, in Yemen, 15 m. W of Sana.

MNICHOWICE. See MICHOWITZ.

MNISSEK. See MISCHEK.

MNISZOW, a village of Poland, in the woiwodie of Sandomir, obwod and 35 m. N of Radom, and 32 m. S of Warsaw, at the confluence of the Pilica and Vistula. It has a palace with a fine garden.

MNITOMTYN. See LIEBEMUHL.

MO, a parish of Sweden, in the prefecture of Gefleborg, and hæred of S. Helsingeland, 8 m. NW of Soederhamn, and 54 m. N of Gefle. It has a manufactory of linen and cotton fabrics, and a paper-mill. —Also a hæred of Sweden, in the prefecture of Joenkoeping.

MOA, an island of the Asiatic archipelago, in the group of the Serwatti islands, to the E of Timor island, and between Letti and Lackar islands, in S lat. 8° 15′, and E long. 128° 5′. It is about 36 m. in length from E to W, and 18 m. in breadth. Kolff says: "On Moa, as well as on most of the other islands, the pop. is divided into two classes, Christians and Heathens, which may be considered as standing in the same relation to each other as masters and subjects. The subordination of the heathens, (who are by far the most numerous,) and the respect they entertain towards the Christians, is very remarkable, and may be partly attributed to the superior consideration in which the Christians are held by our government; but undeniably, it is in a great measure owing to an irresistible belief on the part of the heathens, in the moral superiority of the Christians. That the latter must be the chief cause is apparent, from no Dutch ship of war having visited these islands for a long series of years."

MOA (CAYO DE), an island of the archipelago of the Antilles, near the N coast of Cuba, in N lat. 20° 42′, and W long. 74° 48′. It is about 1½ m. in length, and is in some parts marshy. On its N coast is a port.—Also a mountain in the island of Cuba, 30 m. WNW of Baracoa.

MOAMARCAS. See ASSAM.

MO'AMMERAH, or MOHAMMERAH, a town and port on the boundary between Persia and the pashalik of Bagdad, in the territory of the Ch'ab Arabs, situated on both sides of the Haffar or canal which connects the Euphrates with the Karun, 15 m. above the influx of those great rivers into the Persian gulf. The Haffar is from 200 to 400 yds. broad, with a depth varying from 30 to 42 ft.; and the Khor-Bamushir, a deltoid branch of the Euphrates, has a navigable channel of 9 ft. at low water to the gulf. The territory belonged to the sheik of Gaban, an Arab district, comprising all the marshy land at the eastern mouth of the Euphrates, and part of ancient Susiana, the capital of which is Felahiyah, or Dorak, the residence of the sheik. This Arab principality has some historical interest, inasmuch as it chiefly caused the overthrow of the Dutch settlement on the island of Karrack, which has been occupied by British troops for the last few years. The same Arabs were formerly well known in the Persian gulf for their piracies committed upon our merchant ships, and for their unsparing depredations in cases of wreck or disaster. Latterly, however, this roving spirit had left them, and they had become settled, and given to commerce and agriculture, and more especially to pasturing large herds of buffaloes in their boundless marshes, the milk of which, in its various preparations, and the luxuriant dates of the country, supplied them with their chief articles of diet. The Euphrates expedition visited this interesting country in 1837. At that time M. was in its short-lived glory. On each side of the Karun was a mud fort of different Arab sheiks, but the chief market had grown up on the N bank. As yet there were but few houses; many of the stores were kept under mere mattings, and shops of date and bamboo, but still there was a sort of covered bazaar, and a thriving commerce. A short time after this, Turkish troops from Bagdad sacked and destroyed this rising mart.

MOANVAGHAN, a bog in King's co., about 3 m.

N by W of Portarlington, at an alt. of 238 ft. above sea-level. Area 1,377 acres. Average depth 19 ft.

MOAT, a township of the p. of Kirk-Andrew's-upon-Esk, Cumberland, 3½ m. N by E of Longtown, on the E bank of the Esk. Area 2,600 acres. Pop. in 1831, 170; in 1841, 305.

MOATE, or Moate-Grenogue, a small market and post-town in the p. of Kilmanaghan and Kilcleagh, co. Westmeath, 5 m. NW by N of Clara, 7½ m. E by S of Athlone, and 52½ m. W of Dublin. Area 151 acres. Pop. in 1831, 1,785; in 1841, 2,095.

MOBBA. See Bergu.

MOBBERLEY, a parish of Cheshire, 2¾ m. ENE of Nether-Knutsford. Area 4,680 acres. Pop. 1,272.

MOBILE, a county in the SW part of Alabama, U. S., watered by the Tombigbee and Mobile rivers, and on the W by the Pascagoula. Area 2,250 sq. m. The surface is undulating near the gulf, and hilly towards the N. Pop. in 1840, as distinct from the city, 6,191; in 1850, 7,085.—Its cap., of the same name, is situated in N lat. 30° 40′, W long. 88° 21′, 30 m. N of Mobile-point; 160 m. NE of New Orleans; and on the W side of the Mobile river, at its entrance into the bay, at an alt. of only 15 or 20 ft. above tide-water. It contains a court-house, jail, custom-house, city hospital, naval hospital, several banks, and 46 wharves. Though M. was among the first places established by the French after their arrival in the gulf of Mexico, it remained a mere military post during the existence of the French and Spanish authority in Louisiana. It was taken possession of by the United States in 1813, at which time it contained about 100 houses, mostly decaying wooden buildings of one story. Since 1816 the pop. has increased rapidly, amounting in 1830 to 3,194; in 1840 to 12,672; and in 1850 to 20,513; warehouses have been established; the port has become, next to New Orleans, the chief port for the export of cotton, and its foreign trade is fast increasing. The chief articles of export, next to cotton, are lumber, pitch and tar, beef, pork, rice, and corn. The total annual value of exports now exceeds 18,000,000 d. The approach to the harbour for vessels drawing more than 8 ft. water is circuitous and difficult, around a marshy island into Mobile river, and thence down to the port. M. suffered severely from fire in 1827 and in 1839.

MOBILE, a deep, broad, and navigable river of North America, in West Florida, formed by the junction of the Tombigbee and the Alabama, 40 m. above Mobile city, in N lat. 31° 06′, W long. 11° 05′. From the junction of the two streams to the commencement of the bay, it is about 45 m. long; and the bay being 30 m. long, the distance is 75 m. from the gulf of Mexico to the confluence of the Tombigbee and the Alabama. A few miles below the junction it divides into several channels. The main W branch is called the Mobile; the main eastern channel, which is the deepest and widest, is called the Tensaw. It is navigable for vessels drawing 5 or 6 ft. water by the Tombigbee branch to St. Stephen's, and by the Alabama branch to Claiborne.

MOBILE (Bay of), a bay in the gulf of Mexico, on the S coast of the state of Alabama, U. S., to the W of Pensacola bay, intersected by the meridian of 88° 10′ W. It is about 36 m. in length, and of an average width of 12 m. Opposite its mouth is Dauphin island, extending from E to W about 7 m. Coasters from Lake Ponchartrain and Bayou-St.-John enter the bay through the strait between the W end of Dauphin island and the main; but the water in this pass is shoal, and incapable of receiving vessels drawing more than 5 ft. water. Vessels from Pensacola, the W. Indies, and other places, enter the bay between Dauphin island and Mobile point, or the extremity of the mainland on the E shore. From one end of the bay to the other, the water is very shallow for a considerable distance from the shore. Excellent fish and oysters are found in this bay. It is defended by Fort Morgan, situated on a low sandy point opposite Dauphin island, and 30 m. below the town of Mobile, and has a lighthouse at its entrance, in N lat. 30° 10′, W long. 88° 15′.

MOBILE POINT, the SE point of Mobile bay, in N lat. 30° 10′, W long. 88° 25′.

MOBOASU, a village of Upper Guinea, on the Gold coast, 90 m. NNE of Coranza.

MOCAMBO, a river of Eastern Africa, which runs E, and falls into the Indian sea 15 m. S of Mozambique.

MOCAMOCO, a town on the SW coast of Sumatra, on the N shore of the small river Luggan. Ships arriving here must wait for a boat from the shore, as their own cannot land without great danger in consequence of the heavy surf. The imports consist chiefly of salt, piece-goods, iron, steel, and opium; the exports of provisions, pepper, timber, and gold-dust. An English settlement was formed here in 1717.

MOCARANGA. See Monomotapa.

MOCCAS, a parish of Herefordshire, 10 m. WNW of Hereford. Area 1,550 acres. Pop. 188.

MOCHA, or Mokha, a city of Arabia, in the prov. of Yemen, the principal port on the Red sea, in N lat. 13° 20′, E long. 43° 12′, 55 m. NNW of the straits of Bab-el-Mandeb, and 632 m. from the island of Socotra. The town is built close to the shore, between two points of land which form a bay, and on one of which is a round castle, and on the other a small fort. Its appearance from the sea is handsome, having all its buildings white-washed, and three minarets of considerable height, while the line of flat roofs is broken by several tombs which form handsome structures. The pleasing ideas, however, which are inspired by this view, are quickly banished on entering the place, by the filth with which the streets and open spaces are covered, and by the decayed state of many of the habitations. The houses are built of unburnt bricks, and if neglected, speedily become a heap of rubbish, the bricks readily returning to their original state of mud. The residence of the *dola* or governor,—who is sometimes an Abyssinian slave,—the principal edifice, is large and lofty, having one front to the sea, and another to a square which forms the only regular place in the town. Another side is filled up by the official residence of the secretary-of-state, and by an extensive serai built by the Turks while they were masters of M. The number of houses is about 3,000, but about two-thirds only are inhabited. The best houses in general are those facing the sea. Many of these are three stories in height, and highly ornamented on the outside, which also frequently presents an elaborately carved wooden balcony. The windows are mostly small and irregularly placed, and the upper apartments have usually a range of circular ones, which are glazed with a thin strata of a transparent stone found in a mountain near Sana. The floors and roofs are of chunam. Crooked, dark, and narrow passages, steep staircases, and strong doors, give many of the houses the appearance of castles. The lower ranks live in huts of wicker covered in the inside with mats, and sometimes on the outside with a little clay, the roof being thatched. The bazaars are extensive, and well-supplied with goods. In the public markets fish, fowls, goats, sheep, and bullocks, are abundant, but little fruit and vegetables is exposed for sale. The fruits consist of highly flavoured dates, small oblong-shaped grapes, raisins, and pomegranates; the vegetables of water-melons, sweet potatoes, onions, sorrel, and gourds. Fish of various kinds and excellent in quality are plentiful.—The pop. is variously estimated at from 5,000 to 10,000; and appears to fluctuate greatly. They are in general a sickly sallow-looking race, and much addicted to smoking hemp.—The town is enclosed by a wall extending for about a ½ m. in nearly a straight line facing the sea, and afterwards taking a circular direction inland. Towards

the sea, the height of this wall does not exceed 16 ft., though towards the land-side it is often more than 30 ft. It is too thin to resist a cannon ball; and the forts which defend it towards the sea would be levelled to the ground by a single broadside from a man-of-war. The harbour hardly deserves the name, being a mere roadstead. A sand-bank extends about 2 or 3 m. to the S of M., with very little water on it, and there is a narrow channel between it and the mainland by which boats and small vessels can pass, while the shoal protects the anchorage in some degree from the swell of the sea; but still it is difficult to communicate with the shore. The difficulty of egress during the NE monsoon is very great.—M. is at present the emporium of nearly the whole of the E side of Africa. Its main staple is coffee, of which this part of Arabia was the original country. The coffee is here a small tree or shrub, which rises to the height of 16 or 18 ft., and has leaves about 5 inches long. The fruit grows in clusters, resembling a cherry, and is gathered when of a deep red. Previously to 1803, nearly the whole coffee brought to M. was conveyed to Jidda, whence it was exported to Alexandria and Constantinople, and either consumed in the Turkish empire or transmitted to the western countries of Europe. The quantity then sent to Jidda was estimated by Lord Valentia at 16,000 bales of 305 lbs. each, making 4,880,000 lbs. In 1803 the Americans began to export coffee on a great scale, and the competition of the English soon raised the price from 36 or 40 to 50 d. per bale. In the following years 8,000 bales were exported by the Americans, and 2,000 by the British. The former delivered it in their own country at £6 18s. 9d. per cwt., while the India company could not deliver it in England at less than £10 3s. 8d., chiefly owing to the circuitous route by Bombay, and to some other expenses which were avoided or reduced by the private traders. The annual export of coffee in 1833 was about 8,000 bales, at from 29 to 36 dollars per bale. At M. are also sold gum arabic, myrrh, and frankincense, which are brought from the opposite coast of Africa; but Aden is much more advantageously situated for this trade. Other articles are balm of Gilead or of Mecca, a resinous juice much used in the East as a cosmetic, senna to the average amount of 30,000 cwt., sharks' fins, rhinoceros' horns and hides, and indigo, barilla, and civet from the interior of Africa. The trade of M. is chiefly carried on by Banians or Gentoo merchants, who trade largely with Surat and Cutch; there are also Somaulis and Habeshis, and Jews. At present American vessels load coffee, gums, hides, and skins here for the ports of Marseilles, Leghorn, and Genoa; and pay for their cargoes in dollars and gunpowder.—The country in which M. is situated is the most dreary that can well be conceived, being a plain bounded by mountains, and consisting entirely of arid sand covered with a saline efflorescence, whose dreariness is little relieved by the embrowned leaves and burnt appearance of the few vegetables which make their appearance upon it. Around the town, indeed, date trees are plentiful; and a date grove extends nearly 2 m. along the S beach; but their stinted growth shows the poverty of the soil in which they spring. The climate is intensely hot, in consequence of the SE wind, which blows here for eight months in the year, and has passed over the burning sands of Africa. For the other four months, a NW wind blows, which is also very hot, having passed over the sands of Arabia.

History.] M. was visited in 1513 by Alphonso Albuquerque, but does not appear to have been then a place of much consequence. The first attempt to open a trade with it was in 1610, by the British expeditions under Sharpey and Middleton. M. was then, what it has since continued, the chief emporium of the Red sea. The Dutch were the first to establish a factory here. They were followed in 1708 by the French, and soon after by the English. In 1803 the Americans, animated by the active genius of private trade, discovered that large profits might be made by exporting the coffee of M. In 1833 M. was in the possession of a Turkish rebel chief.

MOCHA, a river of Russia in Europe, in the gov. of Olonetz, and district of Kargapol. It issues from a small lake of the same name; runs NW; and joins the Onega on the r. bank, at Bogdanovo, and after a course of 54 m. It is one of the principal affluents of the Onega. Large timber grows in great abundance on its banks, and forms one of its chief articles of transit.

MOCHA, a river of Peru, in the intendency of Truxillo, which descends from the Andes, to the SW of Guamachuco; runs WSW; and throws itself into the Pacific, 3 m. S of Truxillo, in S lat. 8° 10′, and after a course of about 60 m.—Also an uninhabited island of Chili, in the Pacific, near the coast of Araucania, and 120 m. NNW of Valdivia, in S lat. 38° 21′, and W long. 74°. It is from 12 to 15 m. in length from N to S, and rises at its N extremity to an alt. of 1,230 ft. above sea-level. It is very fertile, and was formerly populous and well-cultivated; but is now only occasionally visited by whaling ships.

MOCHADY, a town of Russia in Europe, in the gov. of Vilna, district and 33 m. NW of Telsch, on the r. bank of the Vartau.

MOCHALES, a town of Spain, in Old Castile, in the prov. of Guadalajara, partido and 21 m. NW of Molinà-de-Aragon, on the l. bank of the Mesa, between four mountains. Pop. 540. It has several spinning and two fulling-mills.

MOCHAONA. See Takoun.

MOCHARA, a village of Sinde, on the r. bank of the Indus, near the divergence of the Buggaur branch, 10 m. SE of Tattah.

MOCHERA, a fortress of the Banda Oriental, near the frontier of the Brazilian prov. of São-Pedro-do-Rio-Grande.

MOCHI, a town of Nubia, in Dongola, on the l. bank of the Nile, to the NW of the island of Argo, and 29 m. NNW of Marakah.

MOCHNY, a town of Russia in Europe, in the gov. of Kiev, district and 18 m. WNW of Tcherkasi, on the l. bank of the Mochna.

MOCHRAMORE. See Minnigaff.

MOCHRUM, a parish in Wigtonshire, bounded on the S and SW by Luce-bay, and comprising an area of about 52½ sq. m. Pop. in 1831, 2,105; in 1841, 2,539. See also Kirkoswald.

MOCHTREF, or Moughtrey-with-Eskirgilog, a parish of Montgomeryshire, 3 m. SW of Newton, on a branch of the Derwent. Pop. in 1841, 639.

MOCKERN, a town of Prussia, in the prov. of Saxony, rgbz. and 15 m. E of Magdeburg, and circle of Jerichow, on the r. bank of the Ehle. Pop. 1,550. It has an hospital, and possesses manufactories of cloth and several breweries.

MOCKLEN, a lake of Sweden, in the prov. of Kronoberg, to the W of the Asner-see.

MOCKMUHL, an ancient town of Würtemberg, in the circle of the Neckar, bail. and 14 m. NNE of Neckarsulm, on the r. bank of the Jaxt. Pop. in 1840, 1,600.

MOCKLEBY, a village of Sweden, in the prov. of Calmar, near the E coast of the island of Oland.

MOCKREHNA, a village of Prussia, in the prov. of Saxony, and regency of Merseburg, to the SW of Torgau. Pop. 285.

MOCLIN, a town of Spain, in Andalusia, in the prov. and 18 m. NW of Granada, and partido of Iznallaz, on the r. bank of a small river of the same name, in a mountainous locality. Pop. 2,000.

MOCOA, a town of Ecuador, on the S bank of the Caqueta or Japura, 100 m. ENE of Pasto.

MOCOANDOS, a people of Lower Guinea, in the kingdom of Benguela, who inhabit the coast district between the Coporore on the N, and Vermelha bay on the S, and to the N of the territory of the Mocorocas. They are divided into two tribes, governed by two chiefs. They have large numbers of cattle, inhabit villages, and cultivate maize and legumes.

MOCOLLOP. See LISMORE.

MOCOMOCA, a town on the SW coast of the island of Sumatra, in the district of Anak-Sungei, at the head of a bay, near the N side of the Si-Luggan river, at the mouth of which is the fort of Sainte Anne, and 135 m. NW of Bencoolen. The natives bring to Fort Sainte-Anne pepper, timber, and gold dust, which they exchange for stuffs, salt, iron, steel, and opium. The first English settlement was formed in this locality in 1717. The surrounding country is low, flat, and sandy.

MOCONANDIVA, a river of Brazil, in the prov. of Maranhão, and district of Icatú, which flows into the bay of São-Jose, 30 m. E of the embouchure of the Moni.

MOCONGA. See CUTATO.

MOCOROCAS, a savage people of Lower Guinea, in the W part of the kingdom of Benguela, to the S of the territory of the Mocoandos.

MOCOS. See MACUZO.

MOCS, a village of Hungary, in the comitat and 17 m. W of Gran, on the r. bank of the Danube.—Also a village of Transylvania, in the lower circle of the comitat and 24 m. W of Klausenburg. It has a mineral spring.

MOCSONOK, a town of Hungary, in the comitat and 11 m. SW of Neutra.

MOCU, a river of New Granada, in the prov. of San-Juan-de-los-Llanos, which runs E, and after a course of about 120 m., throws itself into the Vichada, on the l. bank, in N lat. 73° 10′, and W long. 70° 50′.

MOCULLAH, a town of Abyssinia, in the kingdom of Tigre, and prov. of Enderta, 15 m. NE of Antalo, near a mountain of the same name.

MOCURRA, a town of Abyssinia, in the prov. of Wofila, 10 m. NE of Lake Ashangi. It is inhabited by Gallas, who profess Mahommedanism.

MOCURRY, or TOMACURRY, a hamlet in the p. of Monart, co. Wexford, on the bank of the Slaney, 3¼ m. N of Enniscorthy.

MODAGO, a territory of Nigritia, to the W of Borgu.

MODAIN, or TAK-KESRA, a scattered village of Turkey in Asia, in the pash. and 24 m. SE of Bagdad, on the l. bank of the Tigris. It occupies the site formerly covered by *Ctesiphon*, the capital of Syria, and afterwards of Persia.

MODANE, a town of Sardinia, cap. of a mand. in the div. of Savoy, and prov. of Maurienne, 17 m. ESE of St.-Jean-de-Maurienne, and 26 m. N of Briançon, on the l. bank of the Arc, and at an alt. of 1,193 yds. above sea-level. Pop. 1,140. The Sardinian government contemplates the execution of a railway commencing at M., and running up the valley of the Arc to that of the Isère, by Montmelian and Chambery, and then to Aix-les-Bains and Albens, whence it will be continued to the frontiers of the cant. of Geneva.

MODAVE, a department of Belgium, in the prov. of Liege, and arrond. of Huy, watered by a small stream named Hoyoux. Pop. 359. It contains two com. named Grand and Petit Modave, and possessing respectively 242 and 102 inhabitants.

MODBURY, a parish and market-town of Devonshire, 11½ m. E by S of Plymouth, and 208 m. WSW of London. Area 5,910 acres. Pop. in 1831, 2,116; in 1841, 2,048.

MODBURY, a creek of New South Wales, in the co. of Murray, which rises near Mount Gourock, and flows into the Shoalhaven at Kurraducbidgee.

MODDER GAT, a village of South Africa, in Hottentotia, on a small lake, 30 m. SSW of Gariep station.

MODENA, a duchy of Northern Italy, which has its name from its capital, and lies, like Parma, on the r. side of the Po, between the parallels of 43° 57′ and 44° 57′ N. It is bounded on the N by the Lombardo-Venetian states and by Guastalla, a district of Parma; on the E by the States of the Church; on the SE and SW by Tuscany; on the S by Lucca and Massa; and on the W by Parma, from which it is partly separated by the Lenza. The surface, according to the best maps, is 2,121 sq. m.; Lichtenstern and Balbi estimate it at 2,000 sq. m.; the *Almanach de Gotha* at 28·916 German sq. m., exclusive of Reggio and Garfagnano, the united areas of which two districts is 44·486 German sq. m.—This country lies in the valley of the Po, and is level towards the river; in the S, the Apennines rise to the height of the Alps, but not to the line of eternal snow. Monte Cimone attains an alt. of 7,452 ft. The soil in the plain is mostly clay covered with a thick strata of vegetable mould, and always moist; near the mountains it is stony and dry. All the rivers descend from the Apennines. The principal are the Lenza, the Serchio, and the Panaro; but none are navigable, neither are the numerous canals by which the country is intersected, except that of Tassoni. The climate is like that of Parma. Corn is grown, and a good deal of wine is exported. Rice, maize, oil, and hemp are also principal articles of culture. In the valley of Garfagnano, the rearing of cattle forms the chief occupation.—Stein, in 1826, stated the pop. at 375,000, and Balbi at 350,000. In 1850, it was returned for the whole possessions of the duke at 586,458, of whom 204,491 belonged to the duchy of M. Proper; 161,646 to Reggio; and 37,897 to Garfagnano. The other possessions are Guastalla, Frignano, Massa-Carrara, and Lunigiana. A recent article in the *Mantua Gazette* informs us, that the states of M. contain 3,586 priests, 7,021 military men, 2,648 persons exercising liberal professions, 3,623 functionaries, 15,723 merchants, 40,075 artisans, 337,507 peasants, 11,577 shepherds, 109,500 day-labourers and servants, 19,076 indigent persons, 2,821 Jews, and 212 Protestants. The inhabitants are of the same race as the Lombardians; the dialect is between the Milanese and that of Tuscany. The establishments for education are wretched in the extreme, and all in the hands of priests and Jesuits. There is a university at Modena, with about 200 students, and a library of 60,000 vols.—The only manufactures are canvass, leather, paper, glass, and earthenware.—The government is an absolute monarchy, in which the duke monopolizes both the legislative and the executive power. The Austrian civil law was adopted in 1815. The revenue in 1851 was 8,413,622 francs. The regular military force is about 3,500 men. The militia numbers 14,656.

History.] M. was formerly a fief of the empire, and had dukes of the house of Este. The Margrave Albert Azo II., who died in 1097, bequeathed several of his Italian estates to his son Julio, who became the founder of the house of Modena and Este. During the troubles which agitated Italy in the midst of the 12th cent., the members of the house of Este lost part of their possessions, but they were afterwards chosen Podestas in Ferrara and Modena, and in 1452 Borso of Este was created duke of M. and Reggio by Frederick III. The direct line became extinct in 1598 with Alphonso II., who obtained liberty from the emperor Rodolph II. to bequeath M. and Reggio to Cæsar the son of his uncle, by a marriage of the left-hand, as it is called; but Ferrara reverted as a vacant fief to Pope Clement VIII. From this Cæsar are descended the dukes of M., who enlarged their territory by several new possessions. The last duke, Hercules III., married the heiress of Massa and Carrara, and had only one daughter, Beatrice, duchess of Este; who was married to the archduke Ferdinand of Austria, brother of the emperor Joseph II. In 1796

his lands were seized by the French. He was afterwards indemnified by the Breisgau at the peace of Luneville; but he ceded this country to his son-in-law, and died in 1803 at Treviso. His son-in-law, archduke Ferdinand, lost the Breisgau by the peace of Presburg in 1805, and died in 1806. He was succeeded by his son Francis IV., who in 1814 was restored to the duchy of M., and distinguished himself by the cruelty with which he persecuted and punished all those who were suspected of liberalism. He also recalled the Jesuits to his dominions; and resumed the name of Este. His mother was restored to the government of Massa and Carrara, which after her death were reunited with Modena. In 1846 Francis V., the present duke, succeeded his father. In the event of the house of Este becoming extinct, all its states are to revert to Austria.

MODENA, the capital of the above duchy, is situated in a delightful plain, between the rivers Panaro and Secchia, 24 m. WNW of Bologna, in N lat. 44° 38′ 35″, E long. 10° 55′ 13″. It has a citadel, and is surrounded with ramparts, which, however, conduce less to its strength than to the beauty of its aspect, and form pleasant public walks. Its houses are well-built; and its streets clean and regular. The Strada Maestra, in the line of the ancient Æmilian way, is the finest in the town; almost all the streets are bordered with arcades under which the foot-passengers walk. The pop. in 1843 was 27,430. The finest public building is the ducal palace, which is situated in a large square, and is superbly furnished. The ducal library contains 100,000 vols. The cathedral is a building in the Gothic style, remarkable for nothing but its marble tower, which is said to be one of the highest in Italy. The other churches of the town claim little attention, with the exception of those of St. Vicenzo and St. Agostino. The other objects of interest are the hospitals, the citadel, the theatre, and some good scientific collections. The university of M. was suppressed in 1821, and succeeded by a school of theology, law, and medicine. The trade of M. is inconsiderable: silk was formerly the chief object of manufacture, but that branch has now greatly declined; and those of hemp, woollens, leather, and glass, have to a certain degree taken its place. A large weekly market for agricultural produce is held.

MODER, a river of France, in the dep. of Bas-Rhin, which rises to the N of La Petite-Pierre; runs E, passing Inguiller and Haguena; and flows into the Rhine near Seltz, after a course of 50 m., in which it receives the Rothbach on the r., and the Zintzel on the l.

MODERBRUCKE, a village of Styria, 21 m. WNW of Judenburg.

MODERN, MODOR, or MODRA, a walled town of Hungary, in the com. and 14 m. NNE of Presburg, at the foot of the Carpathian mountains. Pop. 5,000. It carries on woollen manufactures. In 1729 and 1800 it suffered severely from fire.

MODGOL, or MUDGUL, a town of Hindostan, in the prov. and 52 m. SE of Bedjapur, on an affluent of the Krishna.

MODIBU, a town of Bambarra, near the l. bank of the Niger, 56 m. NE of Sego.

MODICA (CONTADO DI), a district in the SE of Sicily, in the Val-di-Noto, erected into a county in the 11th cent. by Roger of Normandy. Though only about 30 m. in length, and 10 m. in medium breadth, it contains 6 towns whose joint pop. exceeds 80,000. It is subdivided into the 7 cants. of Chiaramonte, Comiso, M., Ragusa, Scieli, Spaccaforno, and Vituria.—Its capital, of the same name, is situated near the river Scieli, in a narrow valley surrounded by magnificent scenery, 45 m. SSW of Catania. The pop. is about 18,000. The inhabitants are employed partly as mechanics, and partly in domestic manufactures, but in a considerable degree likewise in agriculture. The environs produce corn, wine, oil, and a great variety of fruit, such as oranges, lemons, and almonds. It exports grain, oil, wine, and cheese, chiefly to Malta.

MODIGLIANA, a walled town of Tuscany, on the Marzeno, 40 m. NE of Florence. Pop. 2,335.

MODLIBORZYCE, a town of Poland, in the woivode and 36 m. SSW of Lublin, on the l. bank of the Sanna. Pop. 600.

MODLIN, a fortress of Poland, in the woivode and 45 m. ESE of Plock, at the confluence of the Bog and the Vistula, opposite Nowydwor. It is next in importance as a place of strength to Zamosz, and has been recently strengthened.

MODLING. See MEDLING.

MODON. See METHONE.

MODRA, a village of Sinde, near the Western Rin, 5 m. WSW of Nuggur Parkur.

MODREENY, a parish of co. Tipperary, comprising an area of 12,165¼ acres. Pop. in 1841, 5,286.

MODRICH, a market-town of Turkey in Europe, in Bosnia, in the sanjak and 24 m. NW of Srebernik, and 66 m. ENE of Banjaluka.

MODRITZ, or MODRICE, a town of Moravia, in the circle and 5 m. S of Brünn, on the r. bank of the Schwarza. Pop. 940.

MODRUSS, a village of Military Croatia, in the generalat and 29 m. SW of Carlstadt, district and 8 m. S of Ogulin, on the W side of Mount Capella. Pop. 1,300. This village was formerly capital of a co. of the same name.

MODRYDD, a hamlet in the p. of Llanspythid, co. and 2 m. W of Brecon. Pop. in 1841, 137.

MODUGNO, a town of Naples, in the prov. of the Terra-di-Bari, district and 7 m. SW of Bari. Pop. 5,000. It has manufactories of woollen and cotton fabrics, and several tanneries.

MODUM, a village and parish of Norway, in the stift of Aggershuus, and amt of Buskerud, 30 m. W of Christiania, and 18 m. NE of Königsberg. Pop. 4,500. In its vicinity are extensive mines of cobalt, and a manufactory of smalt.

MODURLI, or MODERNI, a town of Turkey in Asia, in Anatolia, in the sanjak and 27 m. SW of Boli, on the r. bank of the Lansu, an affluent of the Sakaria, in a fine valley. It contains about 600 families, chiefly Turks. The houses are almost all built of wood, and the general aspect of the town is miserable in the extreme.

MODWASCH. See MEDWISCH.

MOEDLING. See MEDLING.

MOEKLEBY, a haerad and parish of Sweden, in the prefecture of Kalmar, and island of Æland. It has an extensive alum-mine.

MOELAN, a commune of France, in the dep. of the Finistere, cant. and 7 m. SE of Pont-Aven, and 6 m. SW of Quimperlé, near the shore of the Atlantic. Pop. in 1841, 4,132.

MOEL-FAMMA, a summit of Denbighshire, in the Clwydian chain. It has an alt. of 1,845 ft. above sea-level.

MOELK. See MELK.

MOEL-Y-MWNT, or MOUNT, a parish in the co. and 3½ m. N of Cardigan. Pop. in 1841, 140.

MOEN, a department and commune of Belgium, in the prov. of W. Flanders, and arrond. of Courtrai. Pop. 2,363. It has manufactories of linen.

MOEN, an island of Denmark, in the Baltic, between 54° 57′ 35″ and 55° 03′ 28″ N lat., and 0° 01′ 20″ and 0° 28′ 20″ W long. of Copenhagen, in the stift of Zeeland, and bail. of Prästöe, separated from the island of Zeeland on the N by the Uloe-sund, and by the Grön-sund on the SW from the island of Falster. It is 18 m. in length from E to W, and about 4 m. in medium breadth, comprising, with the small adjacent islands of Nyord and Bogöe, a total superficies of 92 sq. m., and a pop. of 13,200, of whom 300 are in Nyord, and about 1,000 in Bogöe. In the E it terminates in a calcareous rocky ridge

named Möens-klint, the white cliffs of which, consisting of chalk and parallel layers of nodular flint, rise to the height of from 300 to 400 ft. above the level of the sea. It is otherwise level, very fertile, and so pleasing in its general aspect as to have been distinguished by the name *Amœna*. It has several streams, one of which is mineral. The chief town, Steege or Stege, is on the NW coast, and has a harbour. Its other towns and villages are Borre, Marienborg, Klintholun, Liselund, Leernake, and Koster.

MOEN, or Mucho-ma, an island of Russia in Europe, in the gov. of Livonia, and district of Arensburg, in the Baltic, to the N of the gulf of Livonia, in N lat. 58° 34′, E long. 23° 10′. It is separated from the island of Oesel on the SW by the Maloï-sund, a channel about 1½ m. in width, and from the W coast of the gov. of Esthonia by a channel 6 m. in breadth. It is 14 m. in length from NW to SE, and 11 m. in breadth, at its widest part. It is entirely destitute of trees, and its inhabitants find their subsistence in the rearing of cattle, and in fishing.

MOENEBROEK, a commune of Belgium, in the prov. of E. Flanders, and dep. of Ophasselt. Pop. 126.

MOERBEKE, a department and commune of Belgium, in the prov. of E. Flanders, arrond. of Ghent. Pop. 3,823. The v. is 14 m. NE of Ghent, on the Moervaert canal. Pop. of v. 1,063. It contains an ancient v. belonging to the bishops of Ghent. It has bleacheries of linen, and possesses a considerable trade in grain, wood, and hay.—Also a dep. and com. in the same prov., and arrond. of Audenarde. Pop. of dep. 1,218; of v. 756. It has several spinning-mills.

MOERDYK, a village of Holland, in the prov. of N. Brabant, arrond. and 9 m. NE of Breda, cant. and 5 m. N of Zevenbergen, on the l. bank of the Hollands-diep.

MOERE, a department and commune of Belgium, in the prov. of W. Flanders, and arrond. of Bruges, intersected by the canal of Moeredykvaerd. Pop. 1,150.

MOERE (Grande-et-Petite), a marsh of France, in the dep. of the Nord, and cant. of Hondtschoote. The Grande-M., which is partly in the Belgian prov. of W. Flanders, is 6 m. in length from NE to SW, and about 3 m. in breadth, and communicates with the Petite-M., which discharges itself by the Canal-de-Moeres into the Canal-de-Bergues.

MOERES, a department and commune of Belgium, in the prov. of W. Flanders, and arrond. of Furnes. Pop. 211.

MOERE-VAERT, a canal of Belgium, in the prov. of E. Flanders, and arrond. of Ghent. It detaches itself from the canal of the Sas-de-Ghent 6 m. N of Ghent, and terminates at the hamlet of the Spletters-Putté, where it joins the Durme. It has a total length of about 12 m.

MOEREYNDE, a commune of Belgium, in the prov. of Antwerp, and dep. of Wechelderzande. Pop. 114.

MOERHEYDE, a commune of Belgium, in the prov. of E. Flanders, and dep. of Hamme. Pop. 341.

MOERHUYSE, a commune of Belgium, in the prov. of E. Flanders, dep. of Maldegem. Pop. 227.

MŒRIS (Lake), a lake in the Egyptian prov. of Fayum, which has been by many identified with the Birket-el-Kerun or el-Korn, a sheet of water about 35 m. in length, and little more than 7 m. broad in the widest part; but which, it is obvious, never could water the town of Crocodilopolis and the Labyrinth, nor encircle two pyramids, as Lake M. is stated to have done. The bed of a dry lake to the SE of the Birket-el-Kerun, and equal in extent and depth to it, discovered by Linant, appears to Lepsius to fulfil the required conditions and relative positions of the ancient lake. In a memoir read before the Archæological Institute in 1851, the Chevalier Bunsen is considered to have established the fact that the lake was in great part a vast artificial reservoir of the waters of the Nile, designed to irrigate the prov. of Fayum, and to render habitable and fertile what since has been and still is the richest and most productive province of the land of the Pharaohs. See article Fayum. Both Herodotus and Strabo saw and described the lake of M.; but the one considers it as the work of man, the other as a natural lake connected with immense engineering works in sluices, and with a still greater one of a canal conducted from the Nile. Both described the phenomenon from what they saw, and from those who saw it or could verify its nature and action. So did Pliny, when he said, "The lake of Moeris, a huge ditch" (*grandis fossa*), but by the Egyptians accounted "amongst the great and admirable works." To modern Europe the very place of this lake was unknown before the great French expedition; and its existence was so doubtful that D'Anville, the greatest of all geographers since Eratosthenes and Ptolemy, came to the idea of imagining two lakes of M.,—one of which he placed near the Labyrinth, and called it the lake of Batten or Bathen,—a lake nowhere found. Still, the great man's mistake was wiser than the opinions of those who corrected him in proving that, in the Egyptian prov. in question, there was only one lake, the Birket-el-Querun, which they said must be and therefore was the lake of M. The chevalier argues that this reservoir was so constructed as to allow the superabundant water to supply the eastern districts of the valley of the Nile in the neighbourhood of Fayum; and observes that M. Linant submitted to the late viceroy of Egypt a project to renew the lake for the same purpose, in order to restore the prov. to its pristine fertility, and to have at command a supply of water for the western side-valley of the Nile in years of scarcity. The question naturally arises, To what period of Egypt does this great and most beneficent work belong? The chevalier thinks himself enabled to answer, To the same period to which the Labyrinth and the Pyramids belong—in short, all the most stupendous works of the Egyptians—to the old empire. This dynasty is that of the Sesortocides, from the name of Sesortôsis, the origin of the world-famed name of Sesostris. Jacob and the children of Israel settled as peaceable shepherds in Goshen under the third king of that name, whose prime minister was Joseph. His successor was called Moeris, and was, M. Bunsen argues, the author of the work just described. He was the same who built the Labyrinth, or General council-house for the 27 *nomoi* or districts of the united kingdom, and constructed the pyramid by its side as his sepulchre.

MOERKERKE, a department and commune of Belgium, in the prov. of E. Flanders, and arrond. of Bruges. Pop. of dep. 2,815. The v. is 7 m. ENE of Bruges, on the Lieve. Pop. 1,819.

MOERSTRAET, a commune of Belgium, in the prov. of East Flanders, dep. of Eecloo. Pop. 188.

MOERWEGWYK, a commune of Belgium, in the prov. of East Flanders, dep. of Adegem. Pop. 752.

MOERZEKE, a department and commune of Belgium, in the prov. of East Flanders, arrond. of Termonde. Pop. 3,204.—The town is 3 m. NE of Termonde, on the l. bank of the Scheldt. Pop. 2,098. It has manufactories of linen.

MOESA, or Muesa, a river of Switzerland, which has its source in the Bernardino, in the Lepontine Alps, on the NE frontier of the cant. of Tessin; runs first S, then W through the valley of Misox; and joins the Tessin, on the l. bank, above Bellinzone,

and after a course of about 36 m. It is liable to inundation. Fish, especially salmon, abounds in its waters.

MOESIE, or Musi, a river of Sumatra, in the kingdom of Palembang, which has its source in the mountains of the same name, to the NE of Bencoolen; runs NE; and throws itself by four arms, which branch off at different points below Palembang, into the strait of Banka. The eastern arm is named Sali, the Pontian or Western is called by the natives Kvala. The largest branch, named Soensang, affords the easiest and most speedy communication with Palembang. It has a bar about 5 m. from its mouth, but is navigable by vessels of heavy burthen. The M. has a total course of about 300 m. Its principal affluents are the Lamatang, Ugan, and Kamring, on the r., and on the l. the Lakitan and Rawas. Its waters are infested by alligators of a peculiarly ferocious species. The valley watered by this river is rich, well-cultivated, and picturesque; and its inhabitants are described as proud, independent, and hospitable.

MOESSEROEN, a village of Belgium, in the prov. of West Flanders, arrond. and 8 m. SSW of Courtrai. Pop. 5,600. It has manufactories of woollen fabrics.

MOEURS. See Meurs.

MOEZ (Turat al), or Canal of Moez, a canal of Lower Egypt, in the prov. of Sharkieh, which diverges from the principal eastern branch of the Nile, near a village of the same name, and 33 m. N of Cairo; runs NE a distance of about 75 m., and along the course of the old Tanaitic channel; and terminates in the lake of Menzaleh, to the SSE of the town of that name. It is 150 ft. wide, and navigable all the year for large boats. It abounds in fish. The canal of Tel-el-Wadi detaches itself from its l. bank at Zakazik. On the E, near the ruins of *Bubastes*, it forms a communication with the Pelusiac or Meneghi branch.

MOFFAT, a parish, chiefly in Dumfries-shire, and partly in Lanarkshire. The Dumfries-shire part forms the N extremity of the district of Annandale. The Lanarkshire part, on both sides of Evan water, touches the Dumfries-shire part along the E and the S. Moffat-water rises in the extreme NE, and runs 10½ m. almost direct SW to the Annan, augmented in its progress by 15 mountain-rills. The courses of the three chief streams, the Evan, the Annan, and the Moffat, are for a long way sheer gorges, overhung by steep and often almost inaccessible hills, admitting little more than space for excellent though hanging roads, and possessing at their upper end, even on the beds of the streams, an alt. of about 1,000 ft. above sea-level. About 3,800 acres of the whole area are in tillage; about 450 are under wood; and upwards of 34,000 are wildly and irreclaimably waste or pastoral. The mountains on the boundary include Hartfell, and one-half or upwards of the parish is occupied with the loftiest Scottish mountains S of the Forth and Clyde. Nearly all the heights are curved and regular in outline, broad in their summits, and clothed with vegetation on their surface; but Saddleback, 1¾ m. SE of Hartfell, is a curious exception, being so narrow at the top that a person may almost bestride it. The parish is traversed by turnpikes leading northward respectively toward Glasgow, Edinburgh, and Selkirk, along the vales and gorges of the three principal streams. Pop. in 1801, 1,610; in 1831, 2,221; in 1841, 2,199.—The village of M. stands on a beautiful rising ground on the l. bank of the Annan, 1¾ m. above the influx of the Moffat and the Evan; 16 m. N of Lockerby, and 50 m. S of Edinburgh; at an alt. of 300 ft. above the level of the sea, at the head of the luscious valley which stretches away in an expanding stripe from its site 20 m. to the Solway frith; and only 4½ m. S of Errickstane-brae-head, whence issue streams that run from the highest ground in the S of Scotland, E, W, and S to the Atlantic, the German, and the Irish seas. Its pop. in 1841 was 1,413. It has been called the Cheltenham of Scotland, and is more distinguished for its medicinal waters than any place N of the Sark and the Tweed. The wells are three. One of them, called the Hartfell-spa, is noticed in the article Hartfell. Another, called distinctively and emphatically Moffat-well, is a strong sulphureous water, about 1½ m. N of the village. It oozes out of a rock of compact greywacke, containing interspersed pyrites, and has an odour resembling that of Harrowgate. The third well is near Evan bridge, about 1¼ m. S of the village. It is a weaker chalybeate than the water of Hartfell spa, strongly resembling the Harrowgate chalybeate. The climate of Moffat is mild and healthy, and the lands which environ the village are gravelly and irretentive of moisture.

MOFHAK, a town of Arabia, in Yemen, 30 m. WSW of Sana, on a steep mountain. It is the residence of a dola or governor. At the foot of a mountain is a suburb, in which travellers generally take up their quarters.

MOGADOR, the principal sea-port of Marocco, situated in N lat. 31° 32′ [*Ali Bey*], 31° 30′ 29″ [*Evans*], E long. 9° 35′ [*Ali Bey*], 9° 47′ 38″ [*Evans*], 125 m. WSW of Marocco, and about 20 hours from Safi, and 130 m. from Tangier, and 320 m. SW of the straits of Gibraltar. It was founded in 1760, by the emperor Sidi Mahommed, who laid the foundation of the wall with his own hands, and spared no pains to make it the principal seat of commerce in the empire. The town is built on the N edge of the bay, on a low flat desert of accumulating sand which separates it from the cultivated country, and on which it is impossible to raise fruits or vegetables sufficient for the supply of the inhabitants, which must therefore be brought from gardens at the distance of from 4 to 12 m. Safi, or Asfi, is the chief town of the province, and only 38 leagues from Marocco, but has been abandoned as a port on account of its inconvenience and insecurity from its being open to the W gales. The pop. of M. may be estimated at about 12,000, of whom 1,300 are Jews, and not more than 30 or 40 Europeans. It returns a customs revenue of nearly 1,000,000 francs; while Safi produces only between 50,000 and 60,000 fr.; and the twin towns of Rabat and Sali, whose united pop. amounts to 52,000 souls, and are next in commercial importance to M., produce no more than 380,000 fr. The town is called Souerah by the Maroccomen,—it being to a neighbouring island alone that they give the name of Mogador,—after a saint called Sidi Mogodol, whose tomb is to be seen on the coast opposite Souerah. On the island, which lies about a ½ m. to the SW of the town, and is a bleak barren rock ½ m. in length and ¼ m. in breadth, there was formerly a small fort built by the Portuguese, of whom memorials are to be found all along the coast from Tangier to the country of Sus-el-Acsa opposite the Canary islands. It is fortified, and garrisoned by a small party of Moors from the town.—The construction of the town of M. must have been attended with great difficulties, particularly the SW rampart facing the island, which is raised on several rocks against which the sea breaks with great violence, and which are united by two curtained works. The site presents at a distance that picturesque aspect which gained it the name of Souerah, 'a picture;' but the interior, which is divided into two towns separated by a wall, does not realize this pro-

mise, although its streets are regular, and it has some fine buildings. The houses, having no windows in the outer walls, present a sombre and gloomy aspect, but they are often of considerable size. Those of the foreign merchants, however, are more spacious, having from eight to twelve rooms on a floor, opening into a gallery which surrounds the house on the inside and encloses an interior used as a warehouse. The roofs are flat, and serve for walks in the evening, for which purpose they are greatly preferable to the walks which lie around the place, which present nothing but barren sands drifting with the wind. There are two towns, one of which may more properly be called a citadel, containing the custom-house, treasury, the residence of the alkaid, and the houses of the foreign merchants.—The harbour is formed by an island to the S, about 2 m. in circumf., but as the water at ebb-tide is only 10 or 12 ft. deep, ships of burden must anchor about 1½ m. W of what is called the Long battery. Trading-vessels moored on the E side of the island are sheltered from the W and N winds, but exposed to those from the SW, which frequently blow with great force. The general depths in the centre of the bay vary from 4 to 5 fath., on a rocky bottom; but the actual clear space in the central part of the bay is much contracted by flats of shoal water running off the main shore. The rise and fall of the tide is generally from 8 to 10 ft.; but it has been known to reach 12 and even 14 ft. On the island are four batteries, and the most considerable portion of the fortifications can play upon the island and the moorings-place with good effect, being at only about 1,500 yds. distance. The annual number of trading-vessels visiting the port is about 40, few of which exceed 200 tons burden.

In 1804, the imports into M. were estimated by Jackson at £151,450. They consisted chiefly of sugar, spices, iron, tin, lead, copper, woollens, linens, raw silk, gums, hardware, glass, beads, toys, and a variety of minor articles, with 99,000 Mexican dollars. The exports were: almonds, gums, bees'-wax, goat-skins, oil of olives, skins, sheep's wool, ostrich-feathers, pomegranates, and dates: the amount reckoned at £127,679. M. is the great commercial depot of the Atlantic coast; its trade is, however, principally with the south, the districts of Sus and Wadnun, and the Great Desert. It is also the port of the capital of Marocco. The merchants of M., with one or two exceptions, are all imperial merchants—that is, persons whom the sultan has given credit for custom-house duties to various and large amounts. During the flourishing times of its commerce, M. exported to Lisbon, Cadiz, Marseilles, Gibraltar, and even to New York, large quantities of corn and wool, gum, almonds, olive oil, figs, wax, leather, goat-skins, aniseed, orange-peel, and medicinal drugs: and to the coast of Guinea were shipped *haiks* or small mantles of wool, and other light articles in woollen and cotton. The imports consisted of bar-iron, steel, cutlery, and hardware of all kinds, cloths, silk handkerchiefs, ornaments of gold and silver, pearl, amber and coral necklaces, looking-glasses, sugar, and spices. At one time there were 34 Christian houses of commerce established in the town, forming a small colony of about 100 Europeans. But the free exportation of corn and wool with which the country abounds, and extensive commerce with Europe and America, might create large fortunes, and here give to families and even to towns sufficient influence and strength to cause umbrage to a government ever jealous and alarmed. The emperor Muly Soliman, the predecessor of the present emperor, impressed with these ideas, began to bring them into action by closing the gates of Rabat, Amazor, Dar-Beida, Mazagan, Saffi, and Santa-Cruz, and ordering the foreign merchants who resided there to remove to M., with promises of protection and favour. Some time after he prohibited the exportation of wool, wheat, and oil, and laid enormously heavy export duties on other articles. The present sultan, without making any fundamental change in this system, felt the necessity of giving some protection to commerce in order to restore his treasury. Having been for a long time pasha of M. before his accession, he had gained some insight into commercial affairs, and as far as a Mussulman can, acquired some notions of civilization: he at least comprehended how closely it was connected with his own pecuniary interests, and in the end transformed the administration of the empire into one great undertaking for his own personal profit. His predecessor had treated all commerce with Christians as scandalous and impious, being denounced by the Koran: Abderrahman, to recruit his treasury, conceived an ingenious device for meeting the prohibitions of the law of the Prophet, and contrived to gain the assent of the devotees and teachers of the doctors of Islamism to the following sophistry: The law forbids us to sell to infidels any food or clothing, but the law commands us to make war upon them, and for this we must have gunpowder; therefore, by exacting from them a contribution of gunpowder for each sale we make to them, we turn commerce to the maintenance and advantage of the true faith. This being admitted as unanswerable logic, gunpowder, the manufacture of which in Marocco is very inferior, was received from the hands of the Christians in payment of export duties. At first, one pound of powder and 15 f. was imposed upon the export of each quintal of wool; but this duty has since been increased until the money duty amounts to 35 f. on unwashed, and 55 f. on washed wool, and has become very burdensome to European commerce. The export of corn is totally prohibited, and whole provinces producing enough to load a whole fleet are reduced to the most abject poverty. The sultan finding that, notwithstanding this excessive increase of duty, the produce allowed to be exported was still purchased, and that the purchasers continued to gain a profit upon it, determined to appropriate to himself a portion even of this gain; and conceived the idea of granting credit for the customs' duties to Moorish and Jewish merchants, and to one or two European houses. This gave birth to a crowd of small dealers without capital, who went headlong into speculations, and the trade of M. lost all its solidity. A system of cash payment was then resorted to, with deductions in the shape of discount. But the Barbary tariff exhibits the impossibility of any important increase ever taking place in the traffic of the coast, while such enormous duties are levied as the following table exhibits:

British import duty.		London prices.	Mogador export duty.
10s. per cwt.	Sweet almonds,	40s.	6s. 3d.
Free,	Bitter almonds,	36s.	6s. 3d.
Free,	Bees'-wax,	120s.	41s. 6d.
Free,	Wool (washed)	84s.	19s. 0d.
Free,	Olive oil,	39s.	9s. 6d.
Free,	Brown gum,	50s.	6s. 3d.
Free,	Gum sandrac,	70s.	9s. 6d.
Free, per case,	Ostrich feathers,	£100	£31 5s.
Free, per doz.,	Goats' skins,	14s.	2s. 6d.
Free, ,,	Sheep skins,	25s.	1s. 6d.
Free, ,,	Calf skins,	45s.	9s. 6d.

All these duties stand rated in the local currency 25 per cent. higher than here stated, but that deduction is allowed in the shape of discount for prompt payment. The import trade is regulated on a widely different principle. The duties levied on imported

articles are not paid in money, but in kind, and on English manufactures, army and navy cloth, brass, copper, tea, and sugar, and in fact in all cases, with few exceptions, at 20 per cent., or one-fifth part of the goods, whatever they may be, that are landed. This primitive mode of business is also accompanied by disadvantages, and assists, in conjunction with the high tariff, to cripple any endeavours attempted to bring the Barbary states in closer mercantile alliance with ourselves.—On the 15th of August 1844, M. was bombarded and the fortifications destroyed by a French fleet under the Prince de Joinville. See article Marocco.

MOGADOURO, a town of Portugal, in the prov. of Tras-os-Montes, comarca and 26 m. WSW of Miranda, and 30 m. NE of Torre-de-Mincorvo, on a height. Pop. 450. It is enclosed by old walls, and has a fortress and a Franciscan convent.

MOGANE. See Mariguana.

MOGANGUELAS, or Muganguelas, a family of the Cassangues tribe, who inhabit the territory of Lower Guinea, to the E of Benguela.

MOGARRA, a valley in the W part of Lower Egypt, running nearly ENE, and terminating in the E in the Bhar-Bila-ma or river without water. It is traversed by the caravan-route from Cairo to Sivah, and has a station named also Mogarra or El-Ain-Awara, at which is a well of good water.

MOGARRAZ, a town of Spain, in Leon, in the prov. and 42 m. SSW of Salamanca, and partido of Sequeros, on the Francia. Pop. 932. It has a parish-church and a custom-house.

MOGAUM, a district and town in the N part of Burmah. The town is on an affluent of the Irawaddi, 255 m. NNE of Ava.

MOGEALY, a parish in co. Cork, 2½ m. W of Tallow. Area 9,709 acres. Pop. in 1841, 3,255.

MOGELIN, a village of Prussia, in the prov. of Brandenburg, reg. and 50 m. ENE of Potsdam, and 34 m. ENE of Berlin. It has an agricultural academy.

MOGELSDORF, a village of Bavaria, in the circle of Middle Franconia, presidial and 3 m. ENE of Nurnberg. It has a paper-mill and several quarries.

MOGEMUG, a group of islands, 26 in number, in the N. Pacific, in the Caroline archipelago, to the E of the island of Gap. This group is also called Egoy or Lumululu.

MOGEN-PORTO, an island of Russia in Europe, in the gulf of Finland, on the S coast of the grand-duchy of Finland, and of the gov. of Viborg, in N lat. 60° 25′, E long. 26° 33′. It has few inhabitants.

MOGGIO-DI-SOTTO, a town of Austria, in Lombardy, cap. of the district of Moggio, in the gov. of Venice, deleg. and 26 m. N of Udine, on the r. bank of the Fella. Pop. 2,792. It has a paper-mill.

MOGGLINGEN, a market-town of Würtemberg, in the circle of the Jaxt, obmt. and NE of Gmund, on the Rems. Pop. (Cath.) in 1840, 915. In its vicinity are the mineral baths of Christenhof.

MOGGOR, a town of Mozambique, a little to the W of the town of that name.

MOGHAN, a steppe of Russia in Asia, in the Shirvan. It forms the N part of the khanat of Talishin, and extends between the Aras on the W, the Kur on the N and E, and the Caspian on the SE. It has a total length of about 75 m. from NE to SW, and is 30 m. in medium breadth. It abounds in excellent pasturage, but is much infested by serpents.

MOGHILEV. See Mohilev.

MOGHILNIA, a town of Russia in Europe, in the gov. of Minsk, district and 75 m. SW of Igoumen, and 54 m. ESE of Novogrodek, near the l. bank of the Niemen.

MOGHOSTAN, a district of Persia, belonging to the Iman of Mascat, in the S part of Kirman, between Laristan on the W, and Beluchistan on the E, and bathed on the W and S by the Persian gulf, the strait of Ormus, and the sea of Oman. The coast extends from the mouth of the Kur on the SW, to Cape Mucksa in the SE, a distance of nearly 240 m. The breadth of the district to the mountains of Alfeldha is about 90 m. The principal rivers are the Minnow or Ibrahim, and Nahres. The chief town, Minab, is situated to the N of the former. The name signifies date-country.

MOGHOU, or Mogu, a port of Persia, in Farsistan, and district of Laristan, 60 m. S of Lar, on the Persian gulf, in N lat. 26° 33′, E long. 49° 44′. It is deep and spacious.

MOGHUMDI, a village of the Punjab, near the l. bank of the Chenab.

MOGI, or Mugi, a mountain of Brazil, in the prov. of Minas-Geraes, and comarca of Sapucahi, on the confines of the prov. of São-Paulo, and between the Rios-Mogi-Guaçu and Pardo.

MOGI-DAS-CRUZES, a populous and industrious town of Brazil, in the prov. and 40 m. ENE of São-Paulo, and about 4 m. from the l. bank of the Tiete, in N lat. 23° 27′. Pop. 9,000. It has 4 churches, a Carmelite convent, and an elementary and a classical school. The houses are chiefly built of mud. The industry of the locality consists in the manufacture of cloth and of rum, and the culture of sugar, coffee, and cotton.

MOGIELINCA, a town of Poland, in the gov. of Masovie, obwod. and 45 m. SSW of Warsaw. Pop. 742, of whom 219 are Jews. It has 2 churches.

MOGI-GUAÇU, an ancient town of Brazil, in the prov. and 180 m. N of São-Paulo, and N part of the district of Mogi-Mirim, on the r. bank of a river of the same name. It has a parish-church. The cultivation of a few ordinary articles of provision, the rearing of cattle and pigs, and fishing in the Rio-Mogi, form the chief branches of local industry.—Also a river in the same prov., which has its source in the Serra-da-Mantiqueira, and runs W, parallel to the Jaguari-Mirim, which it joins a little above the confluence of the latter with the Parana.

MOGILA, or Claratomba, a village of the republic and 6 m. E of Cracow, on the l. bank of the Vistula. Pop. 800. It has a rich abbey of the Cistercian order, and a Catholic gymnasium.

MOGILLNO, or Mogilnow, a circle and town of Prussia, in the prov. of Posen. The circle comprises 150 sq. m., and contains 25,323 inhabitants. The town is 53 m. NE of Posen, in the reg. and 35 m. SSW of Bromberg. Pop. in 1837, 1,363. It has manufactories of cloth and leather.

MOGIMONT, a commune of Belgium, in the prov. of Luxemburg, and dep. of Vivy. Pop. 278.

MOGLAH, a town of Turkey in Asia, in Anatolia, in the sanj. of Mentesha, 48 m. NNE of Rhodes, and 63 m. SE of Guzelhissar, near an affluent of the Thavas. It is the ancient *Alinda*.

MOGLENA, a town of Turkey in Europe, in Rumelia, in the sanj. and 42 m. NW of Salonica, and 17 m. NE of Vodnia, on the l. bank of the

MOGLIANO, a village of the Pontifical states, in the deleg. and 9 m. S of Macerata.

MOGNE, a river of France, in the dep. of the Aube, which has its source at the hamlet of Fay, a little to the NE of St. Phal, and throws itself into the Lozein, on the l. bank, after a course of about 9 m.

MOGODOR. See Mogador.

MOGORBIN, a parish in co. Tipperary, 5 m. E of Cashel. Area 4,149 acres. Pop. 1,468.

MOGORO, a town of the island of Sardinia, in the prov. and 15 m. W of Isilis. Pop. 1,880.

MOGREBBINS, a name given to the Arabs in the W part of Egypt, and especially in the city of Cairo.

MOGU, a port of Laristan, in Persia. It has one of the most secure roadsteads in the gulf, formed by Cape Bostano on the E, and a point called Certes on the W. It is of good depth, and capable of holding large fleets.

MOGUER, a town of Spain, in the prov. of Huelva, at the mouth of the Tinto, on its l. bank, 51 m. W of Seville. Pop. 6,700. It has an active trade in wine.

MOH, a river of the Burmese empire, rising near the frontiers of Arracan, and flowing E to the Irawaddi.

MOHACS, a town of Hungary, in the palatinate of Baranya, in N lat. 46° 0′, 21 m. E of Funfkirchen, on the r. bank of the W branch of the Danube, whose bifurcation here forms the marshy island of M. or Margetta. Pop. 8,316. The Hungarians were defeated here, with the loss of their king, Louis II., 7 bishops, and 500 nobles, by the Turks, in 1526. The effects of this battle were in part retrieved by the defeat of the Turks on the same field in 1687. It is inhabited by a mixture of Hungarians, Germans, and Rascians, and has a Catholic, a Calvinist, and a Greek church.

MOHADAN (Al), a village of Arabia, in the Hedjaz, 80 m. E of Madian.

MOHAMMED (Ras), a cape on the Arabian coast of the Red sea, in N lat. 27° 43′, E long. 34° 20′, on the straits of Jubal. It is an abrupt broken cliff, with a flat top, about 90 ft. high.

MOHAN, a town of Hindostan, in the prov. of Oude, and district of Lucknow, pleasantly situated on the E bank of the Sye river, on the road between Cawnpore and Lucknow, in N lat. 26° 50′.

MOHANA, a town of Hindostan, in the prov. of Malwah, 45 m. N of Serouji.

MOHARAY, a town of the island of Arad, in the Persian gulf, on the S coast.

MOHAVI, a fort of Afghanistan, in the Derajat, in N lat. 30° 30′, on the route from Dera-Ghazi-Khan to Bori.

MOHAWK, a river of the state of New York, U. S., which rises about 40 m. to the E of Lake Ontario, and, after a course of 135 m., flows into the Hudson by three mouths, about 9 m. N of Albany, between Waterford and Troy. It is connected with Wood creek by a canal. There are also canals at German Flats and Herkimer. The Erie canal passes along its banks as far as Rome. This river, about 2 m. W of the Hudson, has remarkable falls, called the Cahoos, or Cahoes. The river just above the falls, is between 300 and 400 ft. wide, and descends at high water in one sheet near 70 ft.—Also a river of Delaware co., New York, U. S., which unites with the Popachton, and forms the Delaware.—Also a river of New Hampshire, which runs W into the Connecticut, in Colebrook co.—Also a village in Herkimer co., in New York, 79 m. WNW of Albany, situated on the Erie canal, and the S side of Mohawk river. Pop. 700.—Also a township in Montgomery co., in New York. Pop. 3,112.

MOHAWKS, the most noted tribe in the Six-Nation confederacy, who inhabited, at the period of the discovery of America, and for a considerable time after, the rich and beautiful tract of country S of Lake Ontario and the river St. Lawrence. Immediately after the formation of the Society for the Propagation of the Gospel in Foreign Parts, in 1701, a missionary was sent among this tribe of Indians, which for some time had been on the most friendly terms with the British government, and the greater part of the M. nation were converted to Christianity. It soon followed that the M. forsook their wandering life, and for many years previous to the breaking out of the American war, resided in two villages upon the banks of the W branch of the Hudson, called after them the Mohawk river. One of these villages was known by the name of Canajoháre, which name is still retained by the American village built upon its site; the other Fort Hunter,—the site of which is near the Erie canal, and its ruins, still perceptible, are pointed out to the traveller as an object of interest. Their attachment to the British cause eventually compelled them to seek a distant settlement. One party, consisting of a majority of the nation, fled, in 1776, under the guidance of the celebrated Captain Joseph Brant, to Niagara, and eventually settled on the Grand river, where they still reside. The other party escaped to Lower Canada; and after a sojourn of seven years at La Chine, in that prov., they proceeded to the spot selected by their chief, on the bay of Quinté, in the Upper prov., which they reached on the 15th of May, 1784, and have occupied ever since. This tract of land was immediately surveyed, and called Tyendenaga, in honour of the principal chief of the nation.

MOHELNO, a town of Moravia, in the circle and 18 m. NNE of Znaim, near the l. bank of the Iglawa. Pop. 728.

MOHECAN, a village in Wayne co., in Ohio, 88 m. NE of Columbus.

MOHICCON, the N branch of the river Muskingum, in the state of Ohio, formed by the union of Muddy-fork and Armstrong's forks.

MOHILEV, an extensive government or province of the W of European Russia, lying between 28° 50′ and 32° 45′ E long., and 51° 55′ and 55° 15′ N lat. It is bounded on the N by the gov. of Vitebsk; on the E by that of Smolensk; on the SE and S by Chernigov; and on the W by Minsk, from which it is in part separated by the Dnieper. Its area is 42,814 square versts, or 18,824 square miles. Its pop. in 1846 was 931,300, of whom the majority were Poles, the remainder Russians and Jews. M. forms part of the great plain of Russia, and has an immense extent of forests and marshes. In its N part it is traversed by the grand ridge which divides the waters flowing N and S. The soil in the other grounds is in general fertile, and produces rye, barley, oats, maize, hemp, and flax. The principal rivers are the Dnieper, which flows to the Black sea, and receives in this gov. the Droutz or Druz, and the Soj or Sosha. The Southern Dvina intersects it in the N. By means of these rivers, the timber of its forests is conveyed to Riga, and the ports of the Black sea. Its exports are corn, cattle, leather, timber, tallow, potash, and paper. Its manufactures, with the exception of a few articles of domestic consumption, are confined to paper-mills, and glass and iron works. It is divided into 12 circles, and includes a part of Lithuania ceded to Russia in 1772.

Mohilev, the capital of the above gov., is situated on the r. bank of the Dnieper, in N lat. 55° 54′, E long. 30° 24′, 420 m. S of St. Petersburg. It is divided into four quarters, of which the castle, built on an eminence, is the most conspicuous. In the centre of the town is a large octagonal square surrounded with neat stone buildings. The government-offices, the magazines, and the archbishop's palace, are handsome edifices. There are here a Greek and a Latin archbishop. The latter is the superior of all the Catholics in Russia and Poland; and the Jesuits, who, after the suppression of their order in the rest of Europe, found here an asylum under his protection, still retain their college. The pop. of Mohilev amounts to 12,500, part of whom manufacture leather, while others carry on a traffic with Riga, Memel, and Dantzig. The number of Jews at M. is nearly 2,000. The annual fairs are well-attended.—Also a considerable town of Russia, in the gov. of Podolia, on the l. bank of the Dniester, 57 m. SSE of Kaminiec.

MOHILLA, Muhilly, or Moely, a small island in the Indian sea, forming one of the group of the Comoros, situated between Madagascar and the coast of Africa, in S lat. 12° 40′, 250 m. from Mozambique. Its coast is entirely composed of rocks, which leave space however for a few landing-places; and there is a good road for vessels. Its summit is lofty and wooded. It has two towns,—one on the N

and the other on the E part of the island. The soil is fertile, and the productions are rice, cocoa-nuts, oranges, citrons, pine-apples, and sugar-cane. The pop. was once pretty considerable; but has been much reduced by war, and by the devastations of pirates.

MOHILL, a parish in cos. Leinster and Leitrim. Pop. in 1831, 16,664; in 1841, 17,918. Area 30,540 acres. — Also a town in the Leitrim section of this p., 8 m. E by S of Carrick-on-Shannon. Pop. 1,626.

MOHIM, a town of Hindostan, in the prov. and 65 m. WNW of Delhi. It is a place of considerable extent, but is now much dilapidated, and but thinly populated.

MOHINDRA-MALLE'E, a low chain of mountains in Hindostan, in the presidency of Madras, in the Northern Circars and district of Guntur, extending parallel to the coast a distance of about 105 m.

MOHIVILLE, a department and commune of Belgium, in the prov. of Namur, and arrond. of Dinant. Pop of dep. 303; of com. 62.

MOHLIN, a village of Switzerland, in the cant. of Argau, district and 2 m. E of Rheinfelden, and 15 m. NW of Aarau.

MOHON, a village of France, in the dep. of the Morbihan, cant. and 4 m. S of La Trinite, and 11 m. NNW of Ploërmel. Pop. 3,000.

MOHONGO, a town of Lower Guinea, in the kingdom of Benguela, 180 m. NE of St. Philippe-de-Benguela, on the l. bank of the Cuvo.

MOHRA, a village of the duchy of Saxe-Meiningen, NW of Schweina. Pop. 438.—Also a river of Moravia, which has its source in the circle and 18 m. N of Olmütz; flows thence into the circle of Troppau; and joins the Oppa, on the r. bank, 3 m. E of Troppau, and after a course, in a generally E direction, of 54 m.

MOHRENBACH, a village of the duchy of Schwarzburg-Sondershausen, S of Gehren. Pop. 752. It has manufactories of linen.

MOHRIN, a town of Prussia, in the prov. of Brandenburg, regency and 38 m. NNW of Frankfort, circle and 8 m. S of Königsberg, on the Schlippe. Pop. in 1837, 1,221.

MOHRINGEN, or MÖRINGEN, an amt and town of the grand duchy of Baden, in the circle of the Lake, on the l. bank of the Danube. Pop. 1,200. It has manufactories of hosiery and of linen.—Also a village of Würtemberg, in the circle of the Neckar, obmt and 4 m. SW of Stuttgard. Pop. 2,146.—Also an amt and town of Hanover, in the gov. of Hildesheim, and principality of Gottingen. Pop. of amt 2,750. The town is 14 m. NNW of Gottingen, and 33 m. SSW of Hildesheim, on the Mohr, an affluent of the Leine. Pop. 1,570.

MOHRUNGEN, a circle and town of Prussia, in the regency of Königsberg. The circle lies between the lakes Mohrunger and Scherting, and comprises an area of 183 sq. m. Pop. 30,445. The town is 63 m. SSW of Königsberg, and 29 m. SE of Elbing. Pop. 2,800. It is enclosed by a wall and double ditch; and has manufactories of cloth, hats, and leather. Agriculture forms also an important branch of local industry.

MOHUMBA, a village of Sinde, near the N border of the Great Western Runn, 35 m. W of Nugger-Parker.

MOHUN, a town of Hindostan, in the prov. of Oude, district and 18 m. WSW of Lucknow.—Also a town in the prov. of Malwah, 114 m. WSW of Indore.

MOHUNGUNGE, a town of Hindostan, in the prov. of Oude, district and 54 m. SE of Lucknow.

MOHUNGUR, a town of Hindostan, in the prov. of Agra, district and 30 m. SSW of Narvar, and 90 m. N of Seronge, to the S of the Chumbul.

MOHUNKOT, a village of the Punjab, a little to the E of Lake Manasa, amid the Himalaya mountains. It had a fortress which was destroyed by Runjit Singh.

MOHUN-KOTE, a fortress of Sinde, in the range of the Lukki mountains, 40 m. NW of Hyderabad.

MOHUNPUR, a town of Hindostan, in the prov. of Malwah, 49 m. N of Seronge.

MOHURBUNGE, a zemindary or district of Hindostan, in the presidency of Bengal, and prov. of Orissa; bounded on the N by the district of Midnapur; on the E by that of Balasore; on the S by Nilghur; and on the W by the Gond mountains; and comprising an area 150 m. in extreme length, and 100 m. in extreme breadth. It possesses little cultivation, and is scantily populated. Its principal productions are timber, rice, oil, iron, dammer, and lac. The natives manufacture weapons of warfare for exportation. The chief towns are Harriorpur and Bustar. This zemindary was formerly of much greater extent. During the ascendancy of the Mahrattas it was dependent on Kuttack. It became in 1803 a tributary to the British government.

MOIDIEU, a town of France, in the dep. of the Isère, cant. and 8 m. E of Vienne, and 22 m. SSE of Lyon. Pop. 693.

MOIGNELE'E, a department and commune of Belgium, in the prov. and arrond. of Namur, watered by the Sambre. Pop. 432. It has several coal-mines.

MOIGNENEINS, a village of France, in the dep. of the Ain, cant. and 2 m. SSE of Toissey, near the l. bank of the Saône, and 16 m. N of Trevoux. Pop. 1,085.

MOILOUGH. See MOYLOUGH.

MOIMENTA-DA-BEIRA, a town of Portugal, in the prov. of Beira, comarca and 29 m. SSE of Lamego, and 31 m. NE of Viseu. Pop. 840. It has a convent.

MOINE, a river of France, which has its source in the dep. of the Maine-et-Loire, near the confines of the dep. of the Deux-Sevres, 3 m. NE of Maulevrier; passes Chollet and Montfaucon; enters the dep. of the Loire-Inferieure; and after a total course, in a generally W direction, of 33 m., joins the Sevre-Nantaise, at Clisson.

MOINE, DES MOINES, or MOINGONAN, a river of the state of Missouri, U. S., which rises in a lake in N lat. 43° 30′, and flows SE to the Mississippi, which it joins, on the r. bank, in N lat. 40° 21′ 43″, W long. 91° 32′ 30″, 1,594 m. from the gulf of Mexico, and at an alt. of 444 ft. above the gulf.

MOINE (LA), a bay on the S coast of Newfoundland, 25 m. E of Cape Ray.

MOINES (ILE AUX), an island off the N coast of France, in the Channel. It is the largest of the Sept Isles, and is fortified.

MOINGT, a commune and village of France, in the dep. of Loire, cant. and 1 m. SSE of Montbrison. Pop. 651.

MOINTOIRA, a town of Zanguebar, on the coast of the Indian ocean, in S lat. 10° 15′.

MOIRA, a parish and town of co. Down. Area of p. 6,096 acres. Pop. in 1831, 3,801; in 1841, 4,148.—The town is 4 m. NE of Lurgan. Pop. 823. It gives the title of Earl to the family of Rawdon-Hastings, Earls of Loudoun in the Scottish peerage.

MOIRA, a small river of Upper Canada, which falls into the bay of Quinte, in Lake Ontario, at the town of Belleville.—Also a township in Franklin co., in New York, U. S., 227 m. N by W of Albany.

MOIRA'S SOUND, an extensive inlet on the E coast of the Prince of Wales's archipelago, in N lat. 54° 57′. It is divided into several branches, with

some islands lying before its entrance. The land in the neighbourhood is high, and rather steep to the sea.

MOIRANS, a canton and town of France, in the dep. of Isère, arrond. of Saint-Marcellin. Pop. of cant. in 1841, 6,742. The town is situated on the river Morge, 15 m. NNE of Saint-Marcellin. Pop. 2,755. It has manufactories of cutlery and of straw hats.—Also a town of France, in the dep. of Jura, 15 m. NW of Saint-Claude. Pop. 1,355.

MOIRAT (Mount), one of the Himalaya chain, in the prov. of Gurwhal, in N lat. 30° 51′, E long. 79°.

MOIRAZES, a village of France, in the dep. of Aveyron, cant. and 6 m. W of Rhodez. Pop. 1,600.

MOISBURG, a village of Hanover, 15 m. SW of Hamburg. Pop. 400.

MOISDON-LA-RIVI'ERE, a town of France, in the dep. of Loire-Inférieure, 34 m. NE of Nantes, near the l. bank of the Don. Pop. 2,371.

MOISI, a river of Canada, which forms Lake Mitchigamichik, and runs into the St. Lawrence, in N lat. 50° 15′.

MOISLAINS, a commune and town of France, in the dep. of Somme, cant. and 6 m. NE of Peronne. Pop. 1,801.—Also a village of France, in the dep. of La Somme, cant. and 4 m. NNE of Peronne. Pop. 1,400.

MOISSAC, an arrondissement, canton, and town of France, in the dep. of Tarn-et-Garonne.—The arrond. comprises 6 cants., and has an area of 88,176 hect. Pop. in 1841, 62,295.—The cant. comprises 6 coms. Pop. 16,324.—The town is situated on the Tarn, in a fertile district, 18 m. NW of Montauban, on the railway from Bordeaux to Cette, and is a place of considerable trade in wine, oil, saffron, salt, wool, and grain. Its principal manufacture is linen.

MOISSAT, a town of France, in the dep. of Puy-de-Dome, cant. of Vertaizon. Pop. 1,835.

MOISSELLES, a commune and village of France, in the dep. of Seine-et-Oise, cant. of Ecouen. Pop. 311.

MOISSEY, a commune and village of France, in the dep. of Jura, cant. of Montmirey-la-Ville. Pop. 897.

MOISTA SOUND, a romantic feature of the NE coast of co. Mayo, 4 m. WNW of Balderig. It is a chasm of about a cable's length in extent, of perpendicular sides of rock at least 500 ft. in height, and of so narrow a sea-path or bottom that a boat's oars must be reefed in passing through it.

MOITA, a commune and village in the island of Corsica, 15 m. E of Corte. Pop. 620.

MOITIERS-D'ALLONNE, a commune and village of France, in the dep. of Manche, cant. of Barneville. Pop. 1,060. It has brick and pottery works.

MOJABRA, a place in the territory of Augila, on the caravan-route from Siwah to Fezzan. The inhabitants are chiefly engaged in trade, and pass their lives in travelling between Cairo and Murzuk.

MOJACOR, a town of Spain, in the prov. and 39 m. ENE of Almeria. Pop. 3,272.

MOJADOS, a town of Spain, in the prov. and 12 m. S of Valladolid, on the l. bank of the Cega. Pop. 1,180.

MOJAISK, a town of Russia, situated near the Mojaïke, an affluent of the Moskwa, 63 m. WSW of Moscow. Pop. 4,000. It has 9 churches or chapels, and a cathedral. At one end of the town stands a castle, with thick stone walls. Between M. and the small town of Ghiatsk, was fought on 7th September, 1812, the obstinate and sanguinary battle of the Borodino. See Borodino.

MOJENT, a town of Spain, in the prov. and 14 m. WSW of San-Felipe. Pop. 3,170.

MOJGURT, a town of NW. Hindostan, 40 m. SE of Bhawulpore.

MOJOS. See Moxos.

MOJU, a river of Brazil, which flows into the Para, on the r. bank, a little to the SW of Para, after a course of 180 m.

MOKA. See Mocha.

MOKABRAT (Al), a town of Nubia, in the district of Berber, on the r. bank of the Nile, 15 m. above the confluence of the Albara, and 15 m. SSW of Ad-Damar.

MOKATTAM (Jebel), a range of mountains in Egypt, on the S confines of Lower Egypt, on the r. bank of the Nile, a little to the SE of Cairo. It extends from W to E a distance of about 30 m., and attains an alt. of about 500 ft. above the plain of the environs of Cairo. The citadel of that town stands on its W extremity.

MOKATTEB, or Mukatteb (Wadi), a valley in the peninsula of Sinai, stretching from the neighbourhood of the E shore of the gulf of Suez for the space of 3 hours = 6 or 7 m. in a SE direction, on the route from Wadi Shellat to Wadi Feiran and Sinai, in about 28° 50′ N lat. The name, which signifies 'the Written valley,' has been given to it from the vast multitude of well-preserved inscriptions which occur on the rocks in this wadi, chiefly, says Robinson, "at such points as would form convenient resting-places for travellers or pilgrims during the noonday sun. The character is everywhere the same; but until recently, it has remained undeciphered, in spite of the efforts of the ablest palæographists. The inscriptions are usually short, and most of them exhibit the same initial characters. Some Greek inscriptions are occasionally intermingled. These inscriptions are first mentioned by Cosmas, about A. D. 535. He supposed them to be the work of the ancient Hebrews. When the attention of European scholars was again turned upon these inscriptions by Clayton, bishop of Clogher, about the middle of the last cent., they were still attributed by him and others to the Hebrews on their journey to Sinai. Since that time they have usually been regarded as probably the work of Christian pilgrims on their way from Egypt to Mount Sinai, during the 4th cent. As to the character, Gesenius supposed it to belong to that species of the Phœnician, or rather Aramæan, which in the first centuries of the Christian era was extensively employed throughout Syria, and partially in Egypt; having most affinity with that of the Palmyrene inscriptions. Professor Beer of Leipzig, on the other hand, who has recently deciphered these inscriptions for the first time, regards them as exhibiting the only remains of the language and character once peculiar to the Nabathæans of Arabia Petræa; and supposes, that if at a future time stones with the writing of the country shall be found among the ruins of Petra, the character will prove to be the same with that of the inscriptions of Sinai. A large number of them have been copied and published by Mr. Gray in the *Transactions of the Royal Society of Literature*, vol. iii. The characters of the Sinaitic inscriptions Beer finds to belong to a distinct and independent alphabet. Some of the letters are wholly peculiar; the others have more or less affinity with the Palmyrene, and particularly with the Estrangelo and Cufic. Indeed, their affinity with the latter is so great, as to lead to the supposition that the Cufic was afterwards developed from this alphabet. They are written from right to left. The contents of the inscriptions, so far as Beer has yet proceeded, consist only of proper names, preceded by a word which usually signifies *peace*, but sometimes *memoriatus sit*, and in a very few cases *blessed*. It is a remarkable fact, that not one Jewish or Christian name has yet been found. The words which are not proper names seem rather to belong to an Aramæan dialect. A language of this kind Beer supposes to have been spoken by the inhabitants of Arabia Petræa, in other words, by the Nabathæans, before the present Arabic language spread itself over those parts; and of that language and writing, these inscriptions he regards as the only monuments now known to exist. The question as to the writers of the inscriptions receives very little light from their contents. A word at the end of some of them may be so read as to affirm that they were pilgrims, and this opinion Beer also adopts; but this reading is not certain. That the writers were Christians seems apparent from the crosses connected with many of the inscriptions; and on palæographic grounds, Beer supposes the greater part of them could not have been written earlier than the 4th cent. These Christian pilgrims, who were they? and whence did they come? The fact that all the inscriptions are found only on the great routes from Egypt, would seem to imply that they came from that country, or at least from the W side of the gulf of Suez. But if so, how comes it that not a trace of this alphabet and language is found in Egypt or its vicinity? Egypt, too, we know, was full of Jews and Christians in the early centuries; how comes it, then, that no Jewish nor Christian names are found among the inscriptions?" Dr. Forster, in his work entitled *The One Primeval Language traced experimentally* [Lond., 1851], disputes Beer's theory, and argues that these inscriptions are records made by the Israelites of the events which befell them during their wanderings in the Desert. Lepsius thinks that they are "the work

of a pastoral people," but adopts Beer's theory as to their Christian origin. Professor Robinson's remarks on Beer's theory are also of much weight.

MOKAURA, a town of Hindostan, in the presidency of Bombay, and prov. of Aurungabad, 47 m. SE of Damaun.

MOKHNATCH, a town of Russia in Europe, in the gov. and 24 m. SE of Kharkov, and 11 m. NE of Zmikeiv, on the l. bank of the Donetz.

MOKIDDO, a town of Abyssinia, in the kingdom of Tigre, and prov. of Agamé.

MOKOBUDY, a town of Poland, in the woiwodie and obwodie and 11 m. NW of Siedlec, consisting of about 390 houses.

MOKR-BAKSAI, an arm of the Ural river, in Russia, in the gov. of Orenburg. It detaches itself from the r. or W side of the river; runs SSW; and falls into the Caspian sea 27 m. W of Gouriev, and after a course of about 36 m.

MOKRIN, a village of Hungary, in the comitat of Toronthal, and NW of Komlos. Pop. 5,254.

MOKSHA, a river of Russia in Europe, which has its source in the gov. of Penza, district and 15 m. SSW of Mokshansk; flows past Mokshansk, Troitzk, Krasnoslobodsk; enters the gov. of Tambov; passes Temnikov; and throws itself into the Oka, on the r. bank, 18 m. SSE of Elatom, and after a course, in a generally NW direction, of about 270 m. Its principal affluents are the Isa on the r., and on the l. the Vad and Tsna. This river abounds with fish, and but for the trunks of trees which incumber its bed, it would be navigable at all seasons. In spring, when its waters are high, boats built on its banks, which are to a great extent covered with magnificent wood, are employed in the transit of corn chiefly to St. Petersburg.

MOKSHANS, a people of Russia in Europe, who inhabit the banks of the Moksha, in the gov. of Penza and Tambov. They form one of the two principal branches of the family named by the Russians, Morduans or Mordowines.

MOKSHANSK, a town of Russia in Europe, in the gov. and 28 m. NW of Penza, on the Moksha. Pop. 2,000. It has the remains of earthen ramparts and of ditches, 5 churches, and a Greek convent, and has a manufactory of cloth. This town was formerly a frontier fortress, and in 1717 made a successful defence against the Tartars of the steppe of Kouban.

MOKTARA, a village of Turkey in Asia, in the pash. and 64 m. NE of Acre. It has a fortress, in which a sheikh of the Druses resides.

MOKULMUSSID, a village of the Punjab, about 15 m. SE of Multan.

MOLA, or Mola-di-Gaeta, a town of Naples, in the Terra-di-Lavoro, 3 m. NE of Gaëta. It is a straggling place, but has a pleasant neighbourhood, and a fort of considerable strength. The inhabitants, amounting to about 2,000, are chiefly supported by fishing. The town is situated on the *Via Appia*, and all around it are ruins of tombs and other structures. The most remarkable are those said to be the remains of the *Villa Ciceronis*, or the country seat of that orator, in the neighbourhood of *Formiæ*.

MOLA, or Mola-di-Bari, a considerable town of Naples, in the prov. of Bari, on the Adriatic, 15 m. ESE of Bari, in N lat. 41° 3′. Pop. 8,500. It has a good harbour; but the streets of the older part of the town are irregular, narrow, and gloomy, and the houses have in general a decayed appearance. The chief trade is in oil, cotton, carobs, and other products of the adjacent country.—Also a village on the NE coast of Sicily, in the Val-di-Demona, singularly situated on the top of a high rock which appears to overhang the town of Taormina, 25 m. SW of Messina.

MOLAC, a village of France, in the dep. of Morbihan, cant. and 4 m. N of Questembert. Pop. 1,400.

MOLAHIFFE, or Mulahiffe, a parish in co. Kerry, 4½ m. NE of Milltown. Area 9,808 acres. Pop. in 1831, 3,708; in 1841, 3,635. The surface lies along the l. bank of the river Maine.

MOLANA, a small island in the river Blackwater, co. Waterford, 3 m. NNW of Youghal.

MOLAR (El), a town of Spain, in the prov. and 24 m. NNE of Madrid, famous for its mineral springs. Pop. 1,100.

MOLARDIER, a small town of Savoy, on the river Seeran, 8 m. NE of Chamberry.

MOLARES (Los), a village of Spain, in the prov. and 18 m. SE of Seville. Pop. 400.

MOLATO, one of the small islands on the coast of Dalmatia, in the gulf of Venice, situated between Long Island and St. Pedro-de-Nino.

MOLD, a parish and town in the co. of Flint, 6¾ m. S of Flint, and 10½ m. W by S of Chester. The parish includes the townships of Ardynwent, Argoed, Bistree, Broncoed, Gwernaffield, Gwsaney, Hartsheath, Hendrebiffa, Leeswood, Lhwynegrin, and Mold, with the chapelry of Nerquis. Pop. in 1801, 5,413; in 1831, 9,385; in 1841, 10,653.—The town, which consists chiefly of one long street, is pleasantly situated on the banks of the Allen, in the centre of a rich mineral district. Pop. in 1851, 3,432. The chief trade of the place depends upon the lead and coal-mines, which are very extensively and profitably worked. Cotton-spinning has also been introduced, and woollens are manufactured in the vicinity. The assizes and quarter-sessions are held at M., which is now virtually the county-town. It unites with Flint in returning a member to parliament.

MOLDASH, a parish in Kent, 6 m. N by E of Ashford. Area 1,220 acres. Pop. in 1841, 391.

MOLDAU, a large and rapid river of Bohemia, which rises in the Bohemian forest, near the mountains which separate that kingdom from Bavaria, to the SW of Prachatitz; runs SW, and passes by Budweis, Prague, and other places, and joins the Elbe, on the l. bank, a little above Melnik, after a course of 210 m. In its course it receives the Malsch, Luschnitz, Woltawa, Sazawa, Beraun, and Miess. It is a large and rapid stream; and is navigable by boats of 15 tons as far as the town of Budweis, whence there is a railway to Linz.—Also a town of Hungary, in the com. of Abaujour, 21 m. E of Rosenau.

MOLDAU, or Moldava, a considerable river which rises in the Carpathian mountains, and flowing E, traverses the Bukowine; enters Moldavia, to which it gives name; and joins the Sereth at the town of Roman, after a course of 105 m.

MOLDAUTEIN, a small town in the central part of Bohemia, on the r. bank of the Moldau, 58 m. S of Prague. Pop. 2,200.

MOLDA'VIA, a district of Eastern Europe, situated between N lat. 45° 24′ and 48° 50′, and E long. 26° 10′ and 28° 30′, over which, in common with Wallachia, the Porte exercises a kind of sovereignty. The two principalities are situated between the Carpathian mountains, and the Danube and Pruth, and formed in ancient times the country of *Dacia Transalpina*. The territory of Budshak, and Eastern Moldavia extending between the Pruth and Dniester, and the Buckowine, also belonged to *Dacia;* but the two former are now Russian provs., and the latter belongs to Austria. The Turkish part of M. and Wallachia comprises about 42,631 sq. m. The principality of M. received its present name in the 14th cent., from the river Moldava. The Turkish name of the territory is Bogdan,—a term which was in use when the Kumanes possessed this country. It forms the most northern province of the Ottoman

empire. On the N and E it is separated from Bessarabia, now belonging to Russia, by the Pruth; on the SE the Danube forms the boundary; on the S it is bounded by Wallachia; on the SW by Transylvania; and on the NW by Gallicia. Its form is oblong. Its length from N to S is nearly 200 m.; its breadth about 120 m. It is divided into Upper Moldavia, or Zara-de-Suss, and Lower Moldavia, or Zara-de-Shoss. The former is subdivided into 4, and the latter into 9 districts. It contains 31 towns, and 1,802 villages. Jassy or Yassy is the capital. Stein estimates the superficial extent at 18,068 sq. m.; Hassel and Balbi at 17,400 sq. m.

Physical features.] The Carpathians cover the W part of this country, and separate it from Transylvania. These heights gradually decline towards the Sereth and the Pruth, and at last sink into gentle undulations finely clothed with vines, and presenting rich and varied scenery. The face of the country consists of undulating plains of great beauty and vast extent, covered with luxuriant crops of grass. There are here no hedges, landmarks, or any division of territory; and the monotony of the prospect is interrupted only from time to time by small lakes and artificial ponds formed by the damming up of rivers, on whose banks are frequently situated villages of the most primeval appearance. On the frontiers, the mountains are wild and rugged, and inhabited by bears, wolves, lynxes, and eagles. A high ridge of slate rock, called Pietra and Rosa, runs along the boundaries of M., Wallachia, and Transylvania. The Danube bounds M. only for a short space; but is valuable as opening a communication with Austria and the Black sea. It receives the Pruth and the Sereth, the former of which rivers is navigable. The smaller tributary rivers are the Suczava, the Moldava, and the Bestritza. The principal lakes are those of Dorshœ and Bratersh.

Climate, soil, and productions.] The Moldavian winters are long, and usually more severe than might be expected in such a latitude. The Danube here is often covered with ice of enormous thickness, and the deepest wells are sometimes frozen. It would appear that the wind blowing from the NE, over an open flat country, increases the cold. The summers are very warm. June is a rainy month; in July and August the heat is oppressive during the day, but the nights are chilly; the vintage is over in September, when the rain begins again; but October and November are comparatively mild months. M. is occasionally visited with earthquakes, but they are never so violent here as those which occur in Wallachia.—The soil in the valleys is as rich as in Wallachia, and still more impregnated with salt and saltpetre. There are no mines wrought, although there are evident traces of gold, silver, lead, and iron, and coal exists in abundance.—The agriculture of this country is inferior to that of Wallachia: but its rich soil yields excellent harvests. In 1828 and 1829, though the principalities of M. and Wallachia were obliged to support an army of 180,000 men, and 40,000 horses, and a vast number of men were engaged in transporting provisions for so large an army, no dearth was felt on account of the consequent deficiency of labourers. On the promulgation of new laws in 1831, with liberty of commerce, the rejoicing was immense, and commerce was rapidly increasing, when, Odessa finding its existence as a port in danger, the Russian provisional government imposed a heavy duty on all grain exported, under the pretext that so large an exportation might cause a famine. The principal commercial port is Galatz on the Danube. Wheat, barley, and millet are cultivated throughout the country. Fruit-trees are reared in large forests; the melon thrives well; and a considerable quantity of wine is exported to Poland and Russia. The Odokescht is considered the best Moldavian wine; next to it is the Kotnar. Many districts are covered with rich pastures in which the luxuriant grass attains the length of 7 or 8 ft. The Moldavian horses are a superior breed, and usually bought for the Austrian and Prussian cavalry. Some boyars possess *hergelies* or studs of 400 or 500 mares, which remain summer and winter in the open air, even where the soil is covered with snow. The oxen are exported to Silesia and Bohemia. Fish are abundant in the rivers, and few countries are so well stocked with bees; some boyars are known to possess 6,000 or even 12,000 bee-hives, which are usually formed in the hollow trunk of a tree. Before the partition of the prov. the hospodar or prince derived a revenue of 60,000 piastres from the tithe on honey and wax. Locusts occasionally commit great devastation; some districts are also infested with enormous swarms of lizards. The wild animals are wolves, foxes, bears, martins, and hares.

Population.] Mr. Wilkinson estimated the pop. of M. at 500,000 souls, which Hassel considers may have been the number of inhabitants in 1823, though Karaiczai has calculated the pop. at only 367,000. The mass of this pop. like the Wallachians, are descended from the Romans, Dacians, Mœsians, and Bulgarians, though they regard themselves as aborigines, and affect to consider the Wallachians as Hungarians. They are a fine-looking, tall and slender race; the women in particular are very beautiful and handsome. The prevailing vices of the male sex are drunkenness and idleness. Greeks, Armenians, Gypsies, Wallachians, settlers from Transylvania, Germans, and Poles, compose the remainder of the pop.

Religion, government, &c.] The Greek creed is the established religion. The head of the church here is the archbishop of Jassy. There are about 12,000 Catholics. None of the villages possess schools; but there is a college at Jassy.—The government is the same as that of Wallachia. The privileges which the Moldo-Wallachian principalities acquired from their capitulation with the Turks are the right of electing their hospodars, administrative and legislative independence, and inviolability of territory. The rights of sovereignty appertaining to the Porte are the right of confirming the election of hospodars, and an annual tribute of 3,000,000 piastres from the two principalities. The revenue of the hospodar is nearly 2,000,000 piastres.

History.] Towards the close of the 12th cent., a Wallachian colony coming from Transylvania settled in this country. Their leader, Bogden, was the first prince of M., laid the foundation of the principal towns, and gave the name of Bogdania to the N part of the country. In the 14th cent., M. became subject to the king of Hungary, after a severe struggle. The Turks had made attempts on the country so early as 1280; at last, in 1529, the inhabitants submitted to Solyman I., on condition of obtaining security for their religion and laws, and being exempted from all taxes except a yearly present to Constantinople. These conditions were not strictly adhered to by the Turkish government, or its representatives the woivodes; and in 1686, when Sobieski, king of Poland, invaded the country, the Moldavians publicly burnt the articles of their treaty with the Turks. M. suffered greatly in the wars between Russia and Turkey, and has been the scene of several sanguinary engagements. At the treaty of Bucharest, in May 1812, the part of M. on the l. bank of the Pruth was retained by Russia. By the treaty of Ackermann, concluded in 1826, it was stipulated that the hospodars or woivodes should be nominated for seven years, and might be deposed by the suzerain or the protecting powers. By the treaty of Adrianople, signed three years later, it was agreed that they should be appointed for life. The Russians recently required, for reasons of their own, that the sultan should consent to revert to the former conditions of the treaty of Ackermann; but this demand was rejected by the Porte. By the treaty of Balta-Liman, of 1st May 1849, it is agreed that the hospodars of M. and Wallachia shall in future be appointed by the sultan, and for a term not exceeding 7 years; and that the organic laws which were given to the principalities in 1831 shall remain in full force with the exception of those alterations of which the necessity has been proved by ex-

perience, especially respecting the ordinary and extraordinary meetings of the boyars, which for the present shall remain suspended. They are to be replaced by a divan or council, consisting of boyars and of some members of the clergy. This divan shall chiefly occupy itself in fixing the taxes and auditing the annual budget. It is further provided, for the necessary improvement and for the reformation of abuses, that two commissioners shall be appointed at Bucharest and Jassy; where their reports shall be examined by the Turkish cabinet with the co-operation of the cabinet of St, Petersburg; and that the proposed alterations must have the consent of the two contracting powers before they are proclaimed by a hattischeriff of the sultan.

MOLDE, a port of Norway, 27 m. SW of Christiansund, in N lat. 62° 44′. Pop. 900.

MOLDNISCH-KIMPULUUG, a small town of Austrian Poland, in the Buckowine, 46 m. SSW of Sereth.

MOLDOVA (Alt), a small town of Hungary, in the Banat-Gränze, dist. of Temeswar, on the Klissura. In the neighbourhood stands the town of Neu Moldova or Bosniak. For 60 m. below Alt-Moldova the Danube is not at all times navigable, and from this point begins the excellent road recently constructed along the l. bank of the Danube to Orsova. When the river is low, steam-boats descend no further than M.; at other times, Drenkova, 12 m. lower down, is the station where steamers stop.

MOLE, a river in Surrey, formed by the union of several springs which rise in the forest of Tilgate, and compose a considerable stream in the p. of Horley, Sussex. Near Dorking it enters one of the defiles of the great barrier downs which extend across Surrey, and after traversing a romantic valley washes the foot of Boxhill—under which it has been erroneously supposed to run,—in its progress to Leatherhead, whence it continues its course N to its confluence with the Thames opposite Hampton-court.

MOLE (Cape), a headland of the island of Hayti, in the dep. of the Nord, to the N of Le Mole-Saint-Nicolas.

MOLE (Le), or Le Mole Saint-Nicolas, an arrondissement and town of the island of Hayti, in the dep. of the Nord. The arrond. comprises 17,150 inhabitants. The town is 84 m. W of Cape Haytien, and 120 m. NW of Port Republicain, at the entrance of a small river into a bay of the same name. In 1811 this town was extensively damaged by an earthquake. The bay is 6 m. in depth, and about 3 m. in breadth, and although inferior in some respects to Cape Francois and Port-au-Prince, forms the finest and the best defended harbour in the island. It is well fortified both by nature and by art, the works having to a great extent been executed by Count d'Estaing; and has a considerable trade in coffee, indigo, and cotton. The locality is well supplied with water, and is considered the healthiest in Hayti.

MOLEHEYDE, a commune of Belgium, in the prov. of Brabant, and dep. of Hever. Pop. 128.

MOLEM, a commune of Belgium, in the prov. of Limburg, and dep. of Lummen. Pop. 224.

MOLEMBA. See Mallemba.

MOLEMBAIS-SAINT-JOSSE, a commune of Belgium, in the prov. of Brabant, dep. of Jodoigne. Pop. 186.

MOLEMBAIS-SAINT-PIERRE, a commune of Belgium, in the prov. of Brabant, dep. of Huppaye. Pop. 176.

MOLEMBAIX, a department and commune of Belgium, in the prov. of Hainault, and arrond. of Tournai. Pop. 1,375.

MOLEMES, a town of France, in the dep. of the Côte-d'Or, cant. and 6 m. N of Laignes, and 12 m. WNW of Châtillon-sur-Seine, near the r. bank of the Laignes. Pop. 900. It had a Benedictine abbey.

MOLEN, a commune of Belgium, in the prov. of Limburg, dep. of Zonhoven. Pop. 428.

MOLENBEEK, a commune of Belgium, in the prov. of Brabant, dep. of Molenbeek-Wersbeek. Pop. 192.

MOLENBEEK-SAINT-JEAN, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Brussels, watered by the Senne. Pop. of dep. 5,703; of village 3,347. The village has a church, and possesses extensive manufactures.

MOLENBEEK-WERSBEEK, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Louvain. Pop. 832.

MOLENBERG, a commune of Belgium, in the prov. of Brabant, dep. of Binckom. Pop. 166.

MOLE'NE, an island of France, in the dep. of Finistère, cant. and 17 m. W of St. Renan, between Le Conquet and the island of Ouissant. Pop. 213.

MOLEN-ET-WALESTRAET, a commune of Belgium, in the prov. of Brabant, dep. of Rotselaer. Pop. 201.

MOLEN-EYNDE, a commune of Belgium, in the prov. of Antwerp, dep. of Bevel. Pop. 221.—Also a commune in the prov. of East Flanders, dep. of Saffelaere. Pop. 486.

MOLENHOEK, a commune of Belgium, in the prov. of Antwerp, dep. of Berlaer. Pop. 630.—Also a commune in the prov. of East Flanders, and dep. of Impe. Pop. 129.—Also a commune in the same prov., in the dep. of Nederbrakel. Pop. 441.

MOLENSTEDE, a commune of Belgium, in the prov. of Brabant, dep. of Schaffen. Pop. 570.

MOLENSTRAET, a commune of Belgium, in the prov. of East Flanders, dep. of Baerdegem. Pop. 213.—Also a commune in the same prov., and dep. of Overmeire. Pop. 167.—Also a commune in the prov. of Antwerp, dep. of Morkhoven. Pop. 241.

MOLEQUES, a group of islands, three in number, at the N extremity of the island of Santa Catharina, Brazil, a little to the SW of Ponta-da-Rapa.

MOLE-SAINT-NICOLAS. See Mole (Le).

MOLESSON, a summit of the chain of the Great mountains, in Switzerland, in the S part of the cant. of Friburg, bail. and 5 m. WSW of Gruyeres. It has an alt. of 6,585 ft. above sea-level, and is the highest point in the cant. It is noted for the beauty of its prospects, and is named the Rigi of Western Switzerland.

MOLESWORTH, a parish in Huntingdonshire, 5 m. NW of Kimbolton. Area 1,800 acres. Pop. in 1831, 222; in 1841, 221.

MOLES-ZYDE, a commune of Belgium, in the prov. of Antwerp, dep. of Mirxplas. Pop. 245.

MOLEVELD, a commune of Belgium, in the prov. of Limburg, dep. of Stockheim. Pop. 103.

MOLEWYK, a commune of Belgium, in the prov. of West Flanders, dep. of Wielsbeke. Pop. 283.

MOLEZE, or Molaize, a village of France, in the dep. of the Saône-et-Loire, cant. and 6 m. NNE of Verdun-sur-Saône, near the l. bank of the Saône.

MOLFETTA, a town of Naples, in the prov. of the Terra-di-Bari, district and 16 m. ESE of Barletta, and 12 m. WNW of Bari, on the Adriatic. Pop. 15,200. It has a cathedral and bishop's palace, numerous churches, and a college, and possesses a small port. It has manufactories of linen and of saltpetre, and a ship-building-yard, and carries on a considerable trade in grain, oil, and almonds.

MOLHEM-BOLLEBEEK, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Brussels. Pop. of dep. 987; of com. 248.

MOLIATITCHI, a town of Russia in Europe, in the gov. of Mohilev, district and 23 m. NNE of Tcherikov, and 24 m. E of Tchaousi.

MOLIENS, a village of France, in the dep. of the Oise, and cant. of Formerie, 27 m. W of Beauvais. Pop. 820. It has manufactories of hosiery.

MOLIENS-LE-VIDAME, a town of France, in

the dep. of the Somme, 13 m. W of Amiens. Pop. 798.

MOLIE'RES, a village of France, in the dep. of Dordogne, cant. and 3 m. W of Cadouin. Pop. 780. —Also a v. in the dep. of Lot, cant. and 5 m. N of La Capelle-Marival. Pop. 950.—Also a v. in the dep. of Tarn-et-Garonne, 12 m. N of Montauban.

MOLINA, a town of Spain, in the prov. and 6 m. N of Murcia, on the l. bank of the Segura. Pop. 3,500. It has manufactories of silk and oil mills.—Also a village of Lombardy, in the Valteline, 1 m. N of Bormio.

MOLINA (Sierra de), a mountain-ridge in Spain belonging to the Iberian chain, and dividing the prov. of Guadalajara from Calatayud and Teruel. It is united on the S to the Sierra-de-Albarracin.

MOLINA-D'ARAGON, a town of Spain, in the prov. of Guadalajara, 60 m. NNE of Cuença. Pop. 3,600. In the neighbourhood are mines of iron and copper, and quarries of marble.

MOLINARA, a town of Naples, in the Principato-Ultra, 12 m. NW of Ariano. Pop. 2,000.

MOLINELLA, a village of the Papal States, 18 m. ENE of Bologna.

MOLINES-EN-QUEYRAS, a village of France, in the dep. of Hautes-Alps, cant. and 4 m. SSW of Aiguilles. Pop. 950.

MOLINE'S GUT, a river on the SW side of the island of St. Christopher's, with anchorage near its mouth of from 5 to 10 fath.

MOLINEUX'S HARBOUR, a bay on the SE coast of the southern island of New Zealand, in S lat. 46° 25′.

MOLINOS (Los), a village of Spain, in the prov. and 27 m. NNW of Madrid, near the Guadarrama. Pop. 450.—Also a v. in the prov. of Saragossa, 21 m. SW of Alcaniz.

MOLINOS-DEL-REY, a town of Spain, in the prov. and 7 m. W of Barcelona, on the coast, and near the mouth of the Llobregat. Pop. 1,050.

MOLISE. See Sannio.

MOLISE, a small town of Naples, in the prov. of Sannio, 48 m. NNE of Naples. Pop. 650.

MOLITERNO, a town of Naples, in the Principato-Citra, 25 m. NE of Policastro. Pop. 5,000.

MOLIVO, or Methymne, a town on the NW coast of the island of Mitylene. Pop. about 2,000. It exports oil and fruit.

MOLK. See Melk.

MOLKWERUM, or Molkerem, a town of Holland, in the prov. of Friesland, cant. and 3 m. S of Hindelopen, and 17 m. SW of Sneek, near the Zuyder-Zee. Its inhabitants, who are chiefly fishermen, speak the Anglo-Saxon language, and have preserved the manners and ancient costume of the Frisons.

MOLL, a department, commune, and town of Belgium, in the prov. of Antwerp, and arrond. of Turnhout. Pop. of dep. 4,894. The village is 16 m. SE of Turnhout, on the Moll-Nethe, an affluent of the Grande-Nethe. It has a church, the tower of which is remarkable; and it possesses extensive manufactories of cloth, lace, hosiery, and tobacco, and several breweries.

MOLL, a river of Illyria, in the gov. of Laybach, which issues from Lake Betzenitz, near the W extremity of the circle of Villach; runs ESE; and throws itself into the Drave, on the l. bank, 1½ m. below Sachsenburg, and after a course of about 45 m.

MOLLAND, a parish of Devonshire, 6¼ m. ENE of South Molton. Area 5,170 acres. Pop. in 1831, 531; in 1841, 550.

MOLLANS, a commune and town of France, in the dep. of the Drôme, cant. and 5 m. WSW of Le Buis, on a rocky peak, in a gorge on the r. bank of the Ouvèze. Pop. 1,178. It is enclosed by high walls, and has manufactories of silk. The environs afford good oil. M. is supposed to be one of the 19 towns of the Vocontians territory. It still exhibits the remains of two citadels and two forts.

MOLLARE, a town of Sardinia, in the div. of Alexandria, prov. and 12 m. ESE of Acqui.

MOLLE, a river of France, in the dep. of the Var, which has its source in the mountain of the Roc-Rigaud, between Bormes and Collebrières; passes near the castle of La Motte; and throws itself into the Mediterranean, in the gulf of Grimaud, 5 m. W of St. Tropez, after a course, in a generally NE direction, of about 21 m.

MOLLENDAEL, a commune of Belgium, in the prov. of Brabant, and dep. of Bierbeek. Pop. 305.

MOLLENDO, a village of Peru, in the intendancy and prov. and 60 m. SW of Arequipa, on the Pacific, 16 m. WNW of Mexico point. It consists of about 50 huts constructed of matting. Landing is attended with some difficulty, and is accomplished by means of canoes; and the port is now only capable of sheltering small vessels. Guano forms its chief article of trade.

MOLLENDORF, a village of Prussia, in the prov. of Saxony, reg. of Merseburg, 24 m. WNW of Halle, and 1½ m. SW of Mannsfeld. Pop. 185. It has several mineral springs, and a millstone quarry.

MOLLENT, a commune of Belgium, in the prov. of Antwerp, and dep. of Broechem. Pop. 397.

MOLLER, an island of the S. Pacific, in the Low archipelago. Its SW extremity is in S lat. 17° 52′ 50″, W long. 140° 52′ 39″. It is about 18 m. in length from NE to SW. It possesses magnificent vegetation, but is not inhabited. It was discovered by Bellingshausen in 1820.

MOLLES, a village of France, in the dep. of the Allier, cant. and 5 m. NNE of Cusset, and 11 m. SSW of La Palisse. Pop. 658.

MOLLIENS-EN-BEAUVOISIS, a commune of France, in the dep. of the Oise, and cant. of Formerie, 27 m. W of Beauvais. Pop. 1,095. It has extensive manufactories of hosiery.

MOLLIENS-VIDAME, a canton, commune, and town of France, in the dep. of the Somme, and arrond. of Amiens. The cant. comprises 29 coms. Pop. in 1841, 15,125. The town is 13 m. W of Amiens. Pop. 836.

MOLLINBURN, a village in the E division of p. of Cadder, Lanarkshire. Pop. 200.

MOLLINGTON, a chapelry in the p. of Cropredy, co. of Oxford, 4¾ m. N by W of Banbury. Area 1,200 acres. Pop. in 1831, 360; in 1841, 380.

MOLLINGTON (Great), a township in the p. of Backford, Cheshire, 2¾ m. NW of Chester, on the line of the Chester and Birkenhead railway.

MOLLIS, a parish and town of Switzerland, in the cant. and 4 m. N of Glaris, near the r. bank of the Linth. Pop. 2,400. It has manufactories of cloth, and of iron-ware. A species of green cheese, locally named *schapsiger*, is also extensively manufactured in the district.

MOLLN, a town of Denmark, in the duchy and 21 m. NNE of Lauenburg, district and 8 m. SSW of Ratzeburg, on the Steckenitz. Pop. 2,750. It has a considerable trade in cattle.

MOLLNAU, a village of Prussia, in the prov. of Silesia, reg. and 35 m. ENE of Oppeln, circle and 8 m. N of Lublinitz. It has a large iron-work.

MOLLTROP, a parish of Sweden, in the prefecture of Skaraborg, and hærad of Wadsbo. It has a large alum-work.

MOLLWITZ. See Molwitz.

MOLMERSWEND, a village of Prussia, in the prov. of Silesia, and reg. of Merseburg, 36 m. WNW

of Halle, and 6 m. E of Harzgerode, in the Harz mountains. Pop. 635.

MOLNEYNDE, a commune of Belgium, in the prov. of E. Flanders, and dep. of Uytbergen. Pop. 348.

MOLOCHIO, a village of Naples, in the prov. of Calabria-Ultra, district and 12 m. ESE of Palmi, cant. and 1½ m. E of Oppido.

MOLODETSHINO, a town of Russia in Europe, in the gov. of Minsk, district and 14 m. S of Vileika, and 60 m. WNW of Borilov.

MOLODKOWA, a village of Galicia, in the circle and 18 m. S of Stanislawow.

MOLOGA, a river of Russia in Europe, which has its source in the gov. of Twer, in the lake of Veristovo, in the district and 17 m. NW of Bejetsk. It runs first SW, then NNE; flows thence into the gov. of Novgorod; passes Oustioujna; turns SE; enters the gov. of Yaroslav; and throws itself into the Volga, on the l. bank, at a town of the same name, and after a course of about 300 m. Its principal affluents are the Serednitza, Roboja, Tshagoda, and Jana, on the l.; and on the r. the Kesma and Lona. This river abounds with fish, and is navigable for large boats as far as Oustioujna.—Also a district and town of the gov. of Yaroslav. The district occupies the NW portion of the gov. The soil is partly marshy, but is to a considerable extent dry and fertile, producing grain and forage in abundance, and pasturing large numbers of cattle. Pop. 63,671. The trade consists chiefly in grain, cattle, and faggots. The town is 75 m. WNW of Yaroslav, and 240 m. NNE of Moscow, on the l. bank of the Volga, at the confluence of a river of the same name, in a marshy locality. Pop. 2,109. It has 2 churches. It has an active trade in grain, fruit, and linen.

MOLOKHA, a town of Turkey in Europe, in Albania, in the sanj. and 24 m. SW of Okhrida.

MOLONDIN, a village of Switzerland, in the cant. of Vaud, district and 6 m. ESE of Yverdun, and 20 m. W of Friburg.

MOLONGLO, a river of New South Wales, in the co. of Murray, which traverses the plains of the same name; receives in Limestone plains the Queanbeyan and Jarabombara rivers; and on the W confines of the co. joins the Murrumbidgee.

MOLONTA, a port of Dalmatia, on the Adriatic, in the circle and 21 m. SSE of Ragusa, in N lat. 42° 26′ 50″, and E long. 18° 25′ 50″. At its entrance is an island.

MOLOPPO, or Maloppo, a river of South Africa, in the territory of the Bechuanas. It has its source in a small lake, in S lat. 25° 50′, and E long. 26° 45′; runs W, receiving in its course numerous streams, and is supposed to join the Gariep in Orange river.

MOLOTSHNIA-VODY, a river of Russia in Europe, in the gov. of Taurida, which has its source in the district, and to the SE of Orekhov; runs SW; passes Melitopol; and after a course of about 75 m., enters Lake Molotshnoé, which discharges itself into the sea of Azof. Several German colonies have settled on its banks since 1802.

MOLOUGH, or Moylagh, a parish in co. Tipperary, 7 m. SE by S of Cahir. Area 1,625 acres. Pop. in 1831, 746; in 1841, 703. The surface lies along the l. bank of the Suir.

MOLSBERG, a town of the duchy and 14 m. NNE of Nassau, bail. and 6 m. ENE of Meudt. Pop. 305. It has a castle.

MOLSCHLEBEN, a village of the duchy of Saxe-Gotha, to the NE of Gotha. Pop. 840.

MOLSDORF, a village of the duchy of Saxe-Gotha, to the SE of Gotha. Pop. 523. It has a castle and a pleasure-garden.

MOLSEN, a town of Prussia, in the prov. of Saxony, regency and 15 m. S of Merseburg, circle and 8 m. ESE of Weissenfels. Pop. 956. In the environs are several coal-mines.

MOLSHEIM. See Bruche.

MOLSHEIM, or Moltzen, a canton, commune, and town of France, in the dep. of the Lower Rhine, arrond. of Strasburg. The cant. comprises 18 com. Pop. in 1831, 21,641; in 1841, 22,414. The town is 12 m. ESE of Strasburg, on the l. bank of the Bruche, at the foot of the Vosges. Pop. 3,333. It is well-built. It has extensive manufactories of hardware, cotton and linen fabrics, cloth, hosiery, tape, and cordage, several bleacheries and dye-works, tile-works, potteries, and paper-mills. It has a considerable trade in wine, the produce of the locality, and grain. This town belonged to the bishops of Strasburg, and was regarded in the 12th cent. as their strongest place. In 1677 it was destroyed by the imperialists.

MOLSTEN, a commune of Belgium, in the prov. of West Flanders, and dep. of Wielsbeke. Pop. 152.

MOLTCHAD, a town of Russia in Europe, in the gov. and 87 m. ESE of Grodno, district and 23 m. NE of Slonim.

MOLTON (North), a parish in Devonshire, 3¼ m. NE of South Molton, on the river Mole. A rich copper-mine is wrought here; and gold of a very pure quality is found associated with the copper. Area 15,330 acres. Pop. in 1831, 1,937; in 1841, 2,121.

MOLTON (South), a parish and municipal borough in Devonshire, 11½ m. ESE of Barnstaple, on the river Mole, which is here crossed by a bridge of 3 arches. Area 6,160 acres. Pop. in 1831, 3,822; in 1841, 4,274.—The town is pleasantly situated on rising ground, on the W side of the river Mole. It consists of several streets, well-paved, and with flagged footpaths. In the centre of the town is a spacious market-place, and guild-hall. The principal manufacture is that of woollen cloth. Serges, shalloons, and felts were formerly made. The lace manufacture has been recently introduced. The pop. in 1851 was 4,482. The income of the borough in 1850 was £2,837.

MOLTRASIO, a village of Austria, in Lombardy, in the district and 4 m. N of Como, on the W bank of the lake of that name.

MOLUCCA SEA, a name given to that part of the Great ocean which lies between the parallels of 2° and 8° S, having the archipelago of the Moluccas on the N; Celebes on the NW; and the eastern extremity of the Sunda chain on the S.

MOLUCCAS (The), a name given by the Portuguese to all the islands in the Eastern archipelago lying between the parallels of 5° N and 9° S, and between 122° and 131° E long., to the W of Papua, and the E of the Molucca passage or channel between Gilolo and the N peninsula of Celebes; comprising Gilolo, Ceram, Buro, Amboyna, the Banda islands, Obi, Waygiou, and others. The M. according to the original and proper application of the term consist of five small islands to the W of Gilolo, viz., Ternate, Tidore, Motir, Makian, and Bakian or Bachian; but the sovereigns of the M. had possessions in Gilolo, Ceram, and other islands in the neighbourhood, and these are called the Great Moluccas. Some geographers divide them into three groups: viz., the Gilolo group, or Moluccas Proper; the Ceram group; and the Timor-Laut group.—The archipelago of the M. bears evident marks of a region overturned by one of those physical revolutions which naturalists called *debacles*, containing islands broken and indented in a singular manner,—enormous peaks, projecting abruptly from the surface of the deep rocks, piled up to immense elevations,—and a number of volcanoes, some of which are in a state of activity, and others extinguished. The earth-

quakes, which in these regions are frequent, render navigation dangerous, for not a year passes without the formation of new sand-banks, and the disappearance of old ones.—The heat attended with excessive moisture, and followed by long droughts, and the nature of the soil, which is a spongy rock, prevent the cultivation of the *cerealia* in the M. The pith of the sago-tree serves for bread. The bread-fruit tree, the cocoa, and all the fruit-trees of India, thrive in these islands. The *lingoa* or *Pterocarpus draco*, a native of these islands, though less hard and durable than teak, is fitter for cabinet-work. The enormous excrescences which grow on it are wrought into beautiful articles equalling in lustre the finest variegated marble. The spice trees, however, are the objects by which the avarice of Europeans has been principally attracted to this part of the world. The clove-tree [*Eugenia caryophyllatta*] has a more limited geographical distribution than any other useful plant. It was originally confined to the five M. islands, and chiefly to Bakian. It had been conveyed to Amboyna a very short time before the arrival of the Portuguese. Not partial to large islands, it does not grow well in Gilolo, Ceram, Buro, or Celebes. It has, however, been cultivated and has produced fruit in the western part of Oceanica. It has also borne fruit, though of inferior quality, in the Mauritius. Even at Amboyna the tree is not productive before the ninth year of its growth, and requires great attention; whereas in the parent-islands it bears in its seventh or eighth year, and requires little care or culture. See article Amboyna. The other valuable species is the *Myristica moschata*, or nutmeg-tree, which in its general appearance resembles the clove-tree, but is less pointed at the top, and its branches are more spreading. The limits of its geographical distribution are much wider than those of the clove. It grows in New Holland, in the S of India, and in Cochin-China; but in these countries it is void of flavour, and for all useful purposes its geographical limits are nearly those of the clove. See article Banda Islands. Massoy bark, an aromatic production used for culinary purposes by the Malays and Javanese, and of late in request in China and Japan, is obtained in the Molucca islands, and the *Laurus Culitlawan*, which also yields an aromatic bark. The leaf of the *Melaleuca leucodendron*, or cajeput-tree, a native of these islands, yields a fragrant essential oil. —No metals are found upon the M. islands, but pearls are said to be frequently met with on their coasts. Goats are the most common animals, and snakes of various descriptions abound. Birds of paradise, which are supposed to come from New Guinea, are taken in great numbers on the M., by means of bird-lime, and form a considerable article of traffic.

Population.] At the discovery of these islands, two distinct races of people were found upon them,—Malays or Mahommedans on the sea-coast,—and Oriental Negroes or Papuas in the interior. The former speak a dialect of the Malay tongue mixed with many foreign words, but the ancient Molucca or Tirnata language appeared to Dr. Leyden to have been an original tongue. They have adopted many of the observances of the Brahminical system. The Papuas have been rapidly decreasing, and have wholly disappeared in most of the smaller islands; but they still exist in many of the more eastern islands, and hold undisturbed possession of New Guinea. The colour of the natives is a deep mixture of black and yellow, and their dispositions wild and ferocious. They subsist chiefly on sago. The men wear little covering except a hat of leaves, and a piece of cloth round their middle; the women are dressed in a large wide garment like a sack, with a remarkably broad hat on their heads. Their arms are a kind of light tough wood, arrows of reed pointed with hard wood, and bucklers of black hard wood, ornamented with designs in relievo, made with white shells. They excel in the construction and management of their vessels.

Historical notices.] The natives of the M., before they were visited by foreign nations, attached no value to the vegetable riches which are peculiar to their islands, and which have rendered them at once so celebrated and so unfortunate. The Chinese first accidentally landed upon these islands in the Middle ages, and discovered the clove and the nutmeg, in consequence of which a taste for these commodities was diffused over India, and thence extended to Persia and to Europe. The active Arabians, who then engrossed almost all the commerce of the world, soon turned their attention to the native country of these precious commodities, and repaired to it in numbers: but the Portuguese wrested the treasure from that nation. In 1521, Antonio de Brito appeared in the M. with a force, for the express purpose of taking possession of them in the name of the king of Portugal. The unsuspecting sovereigns received their guests with caresses, but one of the first acts of the commander was to imprison some of the followers of Magellan, who had been left in this part of the world, because they belonged to Spain. A system of violence, intrigue, and perfidy towards the natives was immediately begun, and with the single exception of the two years of the government of the virtuous Galvan, was maintained for sixty years, at the end of which period, the Dutch, with the assistance of the natives, drove out the Portuguese, but soon discovered a rapacious policy equally oppressive. In 1613, the Dutch procured from the native princes the exclusive right of buying cloves, and every infraction of the iniquitous compact was severely punished. The English were, indeed, allowed at one time to have a mercantile establishment at Amboyna, when held by the Dutch; but the latter, in 1623, after forcing some Chinese and Javanese soldiers by torture to make confession of a plot on the part of the English, seized on the whole of the English residents, and put them to death with circumstances of indignity and cruelty sufficient to disgrace any barbarians. It was not, however, till 1680 that the Dutch, by completely crushing the natives, were enabled to carry the principles of their commercial policy into rigid practice. While the culture of cinnamon was confined to Ceylon, that of the clove was confined to Amboyna, and that of the nutmeg to the Banda islands; nor was it till 1778, when the plantations at Banda were greatly damaged by an earthquake, that the Dutch allowed the nutmeg as well as the clove to be cultivated in Amboyna. The particulars of this department of mercantile history are given in detail by Mr. Crawfurd, whose inferences, pointing out the ruinous tendency of all those cruel and unjust measures, are luminously drawn. The price given for cloves to the cultivator is or was 3¼d. per lb. avoird., or nearly 8 dollars per picul of 133⅓ lbs. When the trade was conducted by the natives, it even sold in Java at an average of 14 d. per picul. When the article arrived by a difficult and hazardous land-carriage at the Caspian sea, it cost 91 d.; at Aleppo 141 d.; and in England 237 d. When brought directly to England, they were sold at an advance of 1,258 per cent. on the natural export price! During the Portuguese and Spanish supremacy, the five M. islands produced annually 2,376,000 lbs.; when the trade was free, the quantity was one half more. The M. islands were specially excepted from the operation of the treaty with the British government of March 1824; and in 1829, it was declared that no ships or vessels coming from harbours belonging to foreign nations shall be admitted in the M.; and that the only harbours open to Netherland ships shall be Amboyna, Banda, Ternate, Manado, and Kima. See articles Amboyna and Banda.

MOLUCHES, or Warrior Indians, a numerous tribe of Indians who inhabit the NW part of Patagonia.

MOLUNE (Haute), a commune of France, in the dep. of the Jura, and cant. of Les Boucheux, 12 m. from St. Claude. Pop. 1,000.

MOLUSK, or Mobluse, a parish in co. Antrim, 2 m. SW of Carnmoney. Area 928 acres. Pop. in 1831, 766; in 1841, 596.

MOLVITINA, a town of Russia in Europe, in the gov. and 35 m. NE of Costroma, district and 26 m. SSE of Boni, on the l. bank of the Chatcha.

MOLWITZ, a village of Prussia, in the prov. of Silesia, regency and 25 m. SSE of Breslau, circle and 5 m. WSW of Brieg. The Prussians here gained a victory over the Austrians in 1741.

MOLYRANY, a hamlet in the p. of Burrishoole, co. Mayo, on the N shore of Clew bay, 8¼ m. W by N of Newportpratt.

MOMALLE, a department and commune of Belgium, in the prov. and arrond. of Liege. Pop. of dep. 887; of com. 705.

MOMANA, a tribe of Indians in Brazil, who inhabit the banks of the Jutahi and Jabari, in the prov. of Para. They subsist chiefly on fish and fruit.

MOMANSING, a district of Hindostan, in the E part of the presidency of Bengal, bounded on the N by the Garrau, and traversed by the Brahmaputra. Its chief town is Beygenburri.

MOMAPONE, a lake in the N part of Lower Canada, which discharges its waters into Lake St. John, 100 m. to the SW of the Paribuaca.

MOMBAÇA, Mombassa, or Mombas, an island on the coast of Zanguebar, in S lat. 4° 04′, E long. 39° 38′, at the mouth of the Barrette. It is 3 m. long, by 2 m. broad; affords excellent anchorage; and has a town upon it which appears to have been at one time a place of considerable importance. Surrounded by cliffs of madrepore, and encircled by a moat over which there is but one dangerous ford, Nature has formed it like a huge castle, which might easily be rendered almost impregnable. Its soil produces abundance of corn, and the sugar-cane thrives well upon it. In 1507, Francis d'Almeida took the town of M. after a severe struggle; and Minho d'Acunha again reduced it to a heap of ashes. It does not appear to have ever recovered from the latter assault, and it is now a poor place inhabited by Arabs and Sowhylese. The Wanyekas inhabit the adjacent mainland for some miles inland. Capt. Owen says, "There is not a more perfect harbour in the world than M. It possesses good riding-ground at the entrance, sheltered by an extensive reef on either side; an anchorage which from its vicinity to the coast constantly enjoys the sea-breeze; and a steep rocky shore, in many places rendering wharfs unnecessary, and in others forming a shelving sandy strand, where vessels can be hauled up and careened, favoured by a tide rising 12 or 14 ft." A large lake, having its banks thickly studded with buildings, is reported to exist in the interior nearly due W from Mombas.

MOMBACHO, an isolated volcanic mountain of Central America, on the W shore of the lake of Nicaragua, not far from the city of Granada. Alt. 4,500 ft.

MOMBARAK. See Mirza-Mombarok.

MOMBARCARO, a village of the Sardinian states, in the prov. and 15 m. NE of Mondovi. Pop. 700.

MOMBARUZZO, a town of the Sardinian states, in the division and 15 m. SW of Alessandria. Pop. 1,900.

MOMBELLO, a town of the Sardinian states, in the div. and 27 m. NW of Alessandria. Pop. 1,920.

MOMBELTRAN, a town of Spain, in the prov. and 34 m. SSW of Avila, at the foot of Mount Pico. It is an ancient place, and is defended by a strong castle. It has oil-mills, pottery works, and a copper foundry. Pop. 1,800.

MOMBERCELLI, a town of the Sardinian states, in the division and 18 m. WSW of Alessandria. Pop. 2,535.

MOMBEREY, a village of Spain, in the prov. and 45 m. NW of Zamora. Pop. 650.

MOMO, a town of the Sardinian states, in the prov. and 9 m. NNW of Novara, on the l. bank of the Gogna.

MOMOBOMBO, an active volcano of Central America, at the N extremity of the lake of Managua. It probably exceeds 5,000 ft. in alt.

MOMORANO, a town on the coast of Illyria, in the gov. of Trieste, 30 m. SSE of Pisino.

MOMPOX, a town of New Granada, in the dep. of Magdalena, 37 leagues SE of Carthagena, and 120 m. N of Santa-Fe-de-Bogota, on the l. bank of the Magdalena river, 21 m. above the confluence of the Cauca, in N lat. 9° 14′ 20″, W long. 74° 27′ 43″. It was founded in 1640, and is a well-built and comparatively thriving town, with a pop. of about 10,000, and an active commerce, "the only place on the river," says Stewart, "where anything like the bustle of active human life and industry is to be found." —The prov. of M. had a pop. of 47,557 in 1836.

MOMUNDS, a numerous Afghan tribe, occupying the whole extent of hill-country extending along the l. or N bank of the Cabul river from Jellalabad to its debouchment into the plains of Peshawur. They possess also a few villages in the plain itself, and inhabit others, which belong to the British territories. Their principal chief is Sadahut Khan, of Lalpur. Along the whole extent of their river-frontage they have numerous small watch-towers holding 5 or 6 men each, by means of which they are enabled to mulct heavily all timber or merchandise floated down the stream. Their possessions in the plain are a fort called Dub close to the frontier-town of Michni, and five villages lying immediately round the little fort of Shubkardir, a post situate a little further into the plain. Their chief, Sadahut Khan, has been lately very troublesome, having induced the inhabitants of Michni to revolt. An expedition was recently sent to retake Michni, to destroy the fort of Dub—always a favourite stronghold of the Momund robbers—to annex Sadahut Khan's villages in the plain, together with a slice of his territory, where the Cabul river leaves the hills; and, if necessary, make a descent on his capital of Lalpur, which is situated on the same bank of the Cabul river as Michni, about 20 m. higher up.

MONA, an uncultivated island in the channel betwixt Hayti and Porto-Rico, in N lat. 18° 6′, W long. 67° 49′. It is about 6 m. in length from E to W. It is low and almost level, and its surface is covered with brushwood. A little to the NW, in N lat. 18° 9′, W. long. 67° 56′, is an islet called Monica, the resort of an immense number of sea-fowl.—These two isles lie nearly in the middle and towards the S end of what is called the Mona passage, a clear and safe channel, 26 leagues in breadth, between Porto-Rico and Hayti.—Also a town of Burmah, in the territory of Cochanpri, 150 m. SE of Ummerapura.

MONA (Lake), a newly-discovered lake of California, in the basin of the Great Salt lake, 120 m. E of Mariposa. It is 60 m. in length, and from 20 to 30 m. in breadth; and receives five or six fresh-water streams, two of which are of considerable magnitude. The lake itself is alkaline, and contains no fish; its margin is encrusted with saltpetre and other salts. There is abundance of water-fowl, geese, brandt, and ducks, on the rivers, and on the plain an infinite number of hares, large grouse, and other game. The land is reputed to be fertile on the borders of the streams, but the plains are generally sandy and arid. There is a great profusion of oaks and pines suitable for building purposes. Lieutenant Moore proceeded some 75 m. E of the lake, and found the country all of the same character: presenting large timber, beautiful fresh-water streams whose banks were clothed with the most luxuriant verdure, mineral deposits, and mineral springs. The mountain-region on the E slope of the Sierra-Nevada is very precipitous, and is remarkable for the evidence it bears of a volcanic origin. There are three or four islands in the lake, composed entirely of lava. The Mona Indians are evidently of a different race from the rest of the Californian Indians, speaking a different language, having strongly-marked Roman features, and being almost white.

MONACHLOGDDU, a parish of Pembrokeshire, 7 m. SE of Newport. Pop. 487.

MONACO, a small principality of Italy, under the protectorate of Sardinia. It is a mountainous district bordering on the gulf of Genoa, sheltered on the N by the Alps, and enclosed by the Sardinian territory. From NE to SW it has a length of about 15 m.; its greatest breadth does not exceed 6 m. Its area is 53 sq. m. Pop. 6,800. It enjoys a delicious climate, and a productive soil. The olive, vine, lemon, orange, and other fruits of the S are grown; silk and honey form important articles of produce. On the coast its pop. is chiefly supported by fishing, and the coasting-trade. The independence of this little state was recognised by the treaty

of Paris in 1815. The prince is recognised by that treaty as a *soverano assoluto*, or absolute sovereign; but the government is conducted by a governor assisted by a council-of-state. The French code is the law of the country. The principality is divided into the 3 communes of Monaco, Mentone, and Roccabruna. The bishop of Nice is the chief ecclesiastical authority, and is represented by a vicar-general who resides at Monaco. The military force consists of 50 men, besides a Sardinian garrison of 300 men. The revenue is about 350,000 fr., of which 9,200 fr. are paid to Sardinia; 80,000 fr. expended in the government; and the remainder forms the patrimony of the sovereign. In 1848 the people of the state successfully petitioned to be admitted to the enjoyment of the privileges of constitutional government under the king of Sardinia, and the jurisdiction of the tribunal of Nice was extended to the communes of Mentone and Roccabruna. In 1852, Florestan I., "by the grace of God sovereign of Monaco," protested against the intervention of the Sardinian government.—The capital is Monaco, a small town of 1,400 inhabitants, situated on a rocky promontory, on the gulf of Genoa, 8 m. NE of Nice. It is walled, and defended by a strong castle with a Sardinian garrison.

MONAD-LEADH MOUNTAINS, an elongated group of lofty and rugged heights, extending from SW to NE, in a line parallel to the Glenmore-nan-Albin, and occupying the central districts of the southern division of Inverness-shire. They rest on a high base or table-land of dreary heathy moor; and are comparatively flowing in their outlines, unbroken in their declivities, and free from abruptness or jaggedness of aspect. In their upper or SW district they contain the sources of the chief head-streams of the Spey, the Dulnain, the Findhorn, and the Nairn; and, in their lower district, they chiefly divide Strathdearn, or the vale of the Findhorn, on the NW, from the upper vale of the Spey on the SW. They consist principally of granite and quartz rock.

MONADNOCK (Grand), a mountain-ridge of New Hampshire, U. S., in Cheshire co., 22 m. E of Connecticut. It extends about 5 m. from N to S, and 3 m. from E to W; and rises 3,254 ft. above sea-level.

MONAGAY, a parish of co. Limerick, comprising part of the town of Newcastle, from which it extends to the S and W. Area 22,701 acres. Pop. in 1831, 4,711; in 1841, 6,366.

MONAGHAN, an inland county of Ireland, in the centre of the S of Ulster; bounded on the N by Tyrone; on the E by Armagh; on the SE by Louth; on the S by Meath; on the SW by Cavan; and on the W by Cavan and Fermanagh. The outline of the county is nearly that of a slender parallelogram extending in the direction of SE by S, with a compact wing of about 14 sq. m. of area extending eastward, and a triangular wing of about 8 m. on each of its three sides projecting westward. The greatest length of the county, from the Blackwater SSE to Lough Ballyhoe, is 30½ m.; its breadth, WSW from the extremity of the E wing, is 12 m.; its greatest breadth, in the same direction, to the extremity of the W wing, is 16½ m. Its area comprises 285,885 acres of arable land, 21,585 of uncultivated land, 5,816 of compact plantations, 304 of towns, and 6,167 of water,—in all, 319,757 acres.

Surface.] The Slieve-Beagh mountains, a bleak and sterile range of hills, extend SSW from the vicinity of the boundary with Tyrone, along the W border, into Fermanagh. A main offset of the Fews mountains occupies the greater part of the county's small E wing; and various upland portions of the interior possess sufficient altitude to be appropriately designated mountain. The general face of the co., however, is strongly featured champaign ground, or a very hilly and constantly undulated plain, subsiding in two or three districts into considerable tracts of comparatively level and undiversified land. The principal summits of the Slieve-Beagh mountains, named from N to S, have altitudes above sea-level of 1,254, 752, 539, 301, and 485 ft.; the chief summit of Mullyash has an alt. of 1,034 ft.—The W part of the co. belongs to the basin of the Erne; the N to that of the Blackwater; and the S to the basins of the Fane and the Glyde. The Finne, the Cootehill, and the Annalee rivers, are the chief streams which flow to the Erne. The Blackwater passes only along and never within the boundary. The rivers Fane and Glyde have only small affluents from the interior. The Ulster canal, recently completed, and connecting the eastern navigations of Ulster from the Blackwater in the vicinity of Charlemont, with the navigation of the Erne a little above the head of Upper Lough Erne, passes SW through the co. of Monaghan, and near the towns of Monaghan, Smithborough, and Clones. Of the other numerous lakes of the co., Lough Muckno, by much the largest, has an area of 1,013 acres, and a surface-elevation above sea-level of 302 ft.

Geology and minerals.] Rocks of the transition series, consisting principally of greywacke slate, fossil clay slate, flint slate, and chlorite slate, and subordinately of hornblende slate, porphyritic schist, and some other metamorphic and schistose rocks, occupy all the central and S portions of the co., excepting a district of about 28 sq. m. in the extreme south. Yellow sandstone and sandstone conglomerate occupy a district of about 7 sq. m. in the extreme NW, and a tiny pendicle or two on the W border in the vicinity of Clones. Rocks of the calp series of the secondary limestone formation constitute the greater portion of the Slieve-Beagh mountains. Rocks of the carboniferous limestone series, which prevail throughout the vast floetz limestone field of Ireland, occupy all the remaining parts of the county N of the transition districts, and they also constitute about two-thirds of the district of 28 sq. m., not of transition formation, and situated in the extreme south. A small coal-field occurs SW of Carrickmacross. Brick clay is plentiful; and potter's clay is found in some districts. Lead mines were at one time worked, but have been relinquished. Ironstone, though of inferior quality, is found; slates or flagstones are raised in several quarries; and a fine white sandstone is quarried in the NW side of the Slieve-Beagh mountains. Limestone of sufficient fineness and beauty to be used as marble, and of great variety and excellent quality for use as manure, occurs in various quarters.

Climate and soil.] NW winds prevail during more than one-half of the year; and bring up from the Atlantic, and along the wide, low natural funnel of the valley of the Erne, such masses of dense clouds as break with violence around Slieve-Beagh, and drench the surrounding country with almost constant rains. The county, therefore, has an exceedingly moist atmosphere.—The soil which prevails in the co. at large is a strong, deep, cold, clayey loam, well-adapted to the cultivation of flax, not unsuited to the cultivation of potatoes and oats, but too spouty and inclined to rushes for the finer departments of husbandry.—Flax is, aggregately, a very large and productive crop; but its quality is not so fine as that raised in co. Armagh. Most of the grain raised, in consequence partly of the foulness of the land, and partly of the want of winnowing machines, is of inferior quality. Thrashing in the field, and winnowing in the open air with the aid merely of the wind, are not uncommon. The number of acres under crop in 1848 was 148,563; of which there were in wheat, 6,856; in oats, 87,880; in barley and rye, 6,445; in pease and beans, 1,643; in potatoes, 19,634; in turnips, 5,930; in mangel-wurzel, carrots, and cabbage, 1,432; in flax, 5,088; in meadow and clover, 13,655.—In 1841, the live stock, with its estimated value, consisted of 9,690 horses and mules, £77,520; 2,666 asses, £2,666; 37,285 cattle, £247,353; 7,040 sheep, £7,744; 33,938 pigs, £42,422; and 211,641 poultry, £5,291.—Ancient forests seem to have cov-

ered the whole co., but have all disappeared. In 1841, the plantations within the co. covered 5,816 acres, besides 350,629 detached trees, equivalent to 2,191 acres.

Population.] Pop. of the co. in 1792, 118,000; in 1831, 195,536; in 1841, 200,442; in 1851, 143,510, being a decrease of 28 per cent. within 10 years. In 1841 the males above 4 years of age attending primary schools were 4,316; attending superior schools, 350; females above 4 years of age attending primary schools, 3,475; attending superior schools, 172. In 1848 there were 114 national schools in operation attended by 13,268 children. Most of the peasantry pay their rent in labour to the parties from whom they hold their con-acre and their cabins. The common food is potatoes, with rarely a little butter-milk or sweet-milk. The cabins have either one or two rooms of 12 ft. square, and 7 or 8 ft. high; they are floored with mere soil, and have straw thatching; and their windows are usually about a foot square, and rarely glazed.

Manufactures and trade.] The linen manufacture, after having grievously declined, has for several years past been in a reviving and improving condition. The principal bleach-greens in 1801 were computed to have annually bleached 130,000 webs of linen.—The Ulster canal is of great value to the northern and central districts of the co. The principal roads which traverse the co. are the Dublin and Londonderry mail-road, through Castle-Blaney, Monaghan, and Emyvale, and the Belfast and Enniskillen mail-road through Monaghan and Clones. The county-surveyor had under his charge at the close of 1841, 1,142 m. of public roads, and about 200 m. of parish roads.

Divisions and towns.] The co. is divided into the five baronies of Trough in the N, Dartry in the W, Farney in the S, Monaghan N of the centre, and Cremourne S of the centre. The towns and principal villages are, in Trough, Emyvale and Glasslough; in Dartry, Clones, Newbliss, Rockcorry, and Drum; in Farney, Carrickmacross; in Monaghan, Monaghan, Smithborough, Ballinode, and Scotstown; and in Cremourne, Ballybay, Castle-Blaney, and Ballytrain. The whole co. is within the dio. of Clogher.—The constabulary force of the co. consists of 208 men. The co.-jail is at Monaghan, and bridewells are at Carrickmacross and Castle-Blaney. The assizes are held at Monaghan: quarter-sessions at Monaghan, Castle-Blaney, Carrickmacross, and Clones.—The co. returns 2 members to parliament. Constituency in 1849, 1,301.

History.] The Irish sept of MacMahon formerly bore undivided sway within the territory now constituting this co., and occasioned it to be long known as MacMahon's country. The MacMahons received from Thomas of Lancaster, son of Henry IV., a confirmation of the territory at a certain rent. In the reign of Elizabeth the district was made county ground, and reduced to a better social condition than in former periods. In the wars of the earl of Tyrone, some of the MacMahons followed the standard of rebellion. During these wars the English had a fort in Monaghan; and at the settlement of Ulster in 1808, the corporation of that town was one of those created to strengthen the English interest. In the civil wars of 1641, the co. was the scene of various disturbances.

MONAGHAN, or Rockwallis, a parish, containing the town of the same name, in co. Monaghan. Area 13,547½ acres. Pop. in 1831, 11,875; in 1841, 12,160.

MONAGHAN, the capital of the co. of Monaghan, and formerly a parliamentary borough, on the Ulster canal, at the intersection of the Dublin and Londonderry mail-road with the mail-road from Belfast to Enniskillen, 14 m. W by S of Armagh, and 60¾ m. NNW of Dublin. It has a compact alignment, and a tolerably fair average architectural appearance. The old court-house or town-hall occupies the principal side of one of the areas in the SW district of the town. The new co. court-house is an elegant modern edifice, in the centre of the town. The market-house, a handsome structure, stands in the Diamond, as an open central area is called. The co.-infirmary occupies an elevated and airy site. The barrack is usually the station of a detachment of infantry. The co.-jail stands at the W extremity of the town. The principal trade is the manufacture of linen, and the exchange of general merchandise for the agricultural produce of the surrounding country. Pop. in 1831, 3,848; in 1841, 4,130. Families employed chiefly in agriculture, 199; in manufactures and trade, 479.

MONAGHAN (North), a township of Upper Canada, in the Colborne district, comprising the town of Peterborough, on the Otonabee river.

MONAGHAN (South), a township of Upper Canada, in Newcastle district. Pop. in 1842, 719.

MONAIA, or Monaja, a river of Lower Guinea, in Benguela, in the Mocoroas territory, which throws itself into the Atlantic, in S lat. 14° 10′. It has a total course of about 120 m., and near its mouth expands into a considerable lake.

MONAINCHA, or Moanahinch, a bog environing a celebrated abbey, and lying on the mutual border of Queen's co. and co. Tipperary, from 1¼ to 3¾ m. SE of Roscrea. It measures 4,690 acres in area; lies from 326 to 360 ft. above sea-level; has an average and a maximum depth of respectively 16 and 32 ft.; and is traversed by the nascent river Nore.

MONALUMAN, a bog in co. Mayo, extending southward to the head of Lough Mask, and bounded on the W by Slieve-Bohane, and on the E by the Ballyhane and Ayle rivers. Its area comprises 6,220 English acres. Its greatest elevation above the level of Lough Mask is 89 ft.; its greatest depth, 42 ft.; and its average depth, 14 ft.

MONAMINTRA, or Ballycloghy, a parish in co. Waterford, 4 m. SSE of Waterford. Area 356 acres. Pop. in 1831, 102; in 1841, 100.

MONANCE (Saint). See Abercrombie.

MONANIMY, a parish in co. Cork, 3½ m. ENE of Mallow. Area 8,831 acres. Pop. in 1831, 2,751; in 1841, 3,135. The surface lies along the l. bank of the Blackwater.

MONART, a parish in co. Wexford, 3 m. NW of Enniscorthy. Area 13,029 acres. Pop. 3,712.

MONASSIR, a small district of Nubia, extending a distance of about 45 m. on both sides of the Nile, between the district of Robotat on the E, and that of Shaygya on the W. It contains several villages, the principal of which is Selmi.

MONASTERBOICE, a parish in co. Louth, 2¾ m. E of Collon. Area 2,316 acres. Pop. in 1831, 705; in 1841, 801. A pillar-tower in this p. still measures 110 ft. in height. It is 9 ft. in diam. within the walls, and is divided into 5 stories by bands of stone.

MONASTEREVEN, a parish, containing a town of the same name, in co. Kildare. Area 7,142 acres. Pop. in 1831, 4,384; in 1841, 3,693. The highest ground has an alt. of 361 ft. above sea-level.—The market-town of M. stands on the river Barrow, and on the Mountmellick and Athy branches of the Grand canal, 2¾ m. NE by N of Ballybrittas, and 30¼ m. WSW of Dublin. It has been much improved since the formation of the Grand canal, and continues to wear an increasingly prosperous appearance. Several docks, storehouses, and other appliances for commercial interchange, have been constructed. The weekly markets are large, and the quantities of corn and other agricultural produce forwarded along the canal considerable. Pop. in 1831, 1,441; in 1841, 1,097.

MONASTERIO-DI-RODILLA, a town of Spain, in Old Castile, in the prov. of Burgos, partido and 7

m. SW of Bribiesca. Pop. 578. It is situated on a height, and contains a castle, supposed to have been built by the Moors, several churches, a custom-house, and a public granary. In its vicinity are the remains of the ancient *Tricium*.

MONASTERIO-DI-LA-VEGA, a town of Spain, in the prov. and partido and 27 m. SE of Leon, near the Cea. Pop. 289.

MONASTEROLO, a village of Sardinia, in the div. of Coni, prov. and 6 m. NE of Salluccio, mand. and 2 m. SW of Cavalier-Maggiore. Pop. 1,355.

MONASTERZYSKA, a town of Galicia, in the circle and 21 m. ENE of Stanislawow, and 15 m. WNW of Yalowiec, on the l. bank of Koropiec. It has a Catholic and a Greek church, and a manufactory of tobacco.

MONASTIER (Le), a canton, commune, and town of France, in the dep. of the Haute-Loire, and arrond. of Le Puy. The cant. comprises 10 coms. Pop. in 1831, 12,208; in 1841, 12,248. The town is 10 m. SSE of Le Puy, on the r. bank of the Gazeille. Pop. 3,461.

MONASTIR, a village of the island of Sardinia, situated a little to the W of Monte Zara, in a volcanic district, between Sanluri and Cagliari.

MONASTIR, or Mistir, a town and port in the kingdom and 90 m. SE of Tunis, and 15 m. SE of Susa, at the extremity of the headland of the same name, the *Dionysii promontorium* of the ancients, and on the S side of the gulf of Hammamet. Pop. 12,000. It has manufactories of woollen fabrics and camlets, and possesses some export trade in olive oil.

MONASTIR, Toli, or Bitolia, a town of European Turkey, in Romelia, situated on the slope of a hill, near the frontiers of Albania, 30 m. SE of Ochrida, and watered by one of the tributary streams of the Vardar. It is inhabited by the descendants of Bulgarians, to the number of 15,000, and compared with most other towns in this country, may be called rich and commercial. Ali Pasha carried his arms into this quarter, and took forcible possession of the town, carrying away the most valuable property of the inhabitants.—The sanjak of M. lies between 39° 54′ and 41° 46′ N lat., and 20° 32′ and 22° 25′ E long., and forms the SW part of ancient *Macedonia*.

MONASTIRSKA, a village of Asiatic Russia, in the gov. of Tobolsk, on the Mura, 252 m. ESE of Yeniseisk.

MONASTYRSHTSHINA, a town of Russia, in the gov. of Mohilev, 15 m. N of Mtislavi, on the l. bank of the Loutaia.

MONASTYRISHTE, a village of Russia, in the gov. of Kiev, 27 m. NW of Uman.—Also a v. in the gov. of Chernigov, 24 m. SE of Nejin.

MONAT (Point), a cape on the E coast of the island of Gilolo, in N lat. 1° 6′, E long. 128° 36′.

MONATE, a village of Lombardy, in the prov. and 21 m. W of Como.

MONBAHUS, a town of France, in the dep. of Lot-et-Garonne, cant. and 4 m. WNW of Caucon. Pop. 1,400.

MONBAZENS, a town of France, in the dep. of Aveyron, 15 m. NE of Villefranche. Pop. 1,000.

MONBRIO, a town of Spain, in the prov. and 12 m. WNW of Tarragona. Pop. 1,500.

MONBRUN, a town of Western Africa, 15 m. SW of Guriel.

MONCADA, a town of Spain, 6 m. NNW of Valencia. Pop. 2,720.

MONCALIERI, a town of Piedmont, in the prov. of Turin, delightfully situated on the Po, at the foot of a hill, and in a rich and fertile district, 4 m. S of Turin. It contains 910 houses, and 8,602 inhabitants. It was founded in 1230, and the ruins of the ancient *Testona* were employed in its construction. That place was situated about a mile distant, on the l. of the road to Truffarello. The town lies on rather a sharp declivity, and is crowded with cafés and restaurants, some of which have gardens and places of amusement attached, it being a fashionable resort in the summer for parties of pleasure from Turin, and particularly since the formation of the railway to Genoa, which skirts the town. The royal castle or palace is a very extensive brick building, forming three sides of a quadrangle. Along the front of the central part is a terrace raised on arches, whence is beheld the whole extent of the plains and of the Alps that bound them, with the winding channel of the Po from its source to the very feet of the colline from which we view it,—the majestic pinnacle of Monte-Viso, marking the parent spring, being the most prominent and imposing object seen from this spot. The palace contains two long and splendid galleries, in which is a series of portraits of the princes of the house of Savoy and of the princesses and ladies of the court of Duke Charles Emmanuel II. A great cattle-market is held at M. every Friday, which supplies the city of Turin. The average number of cattle brought for sale is about 200, and 550 calves. Sheep and pigs are seldom seen, except in the winter season. There is also a very large general fair held here annually in October, which lasts for several days. The salubrity of the air and the splendour of the scenery, as well as its being the country residence of the court, have made the territory of M. the favourite rural abode of many of the most wealthy families of Turin.

MONCALVELLO, a village of Spain, in the prov. and 45 m. WNW of Cuenca, on the r. bank of the Huete.

MONCALVO, or Moncal, a town of Piedmont, in the prov. of Montferrat, 30 m. E of Turin, in a district renowned for its wines and silk. It contains 717 houses, with a pop. of 3,686. Its fortifications were dismantled during the wars of succession. It has 4 churches, and 3 or 4 piazze, a fine hospital, an orphan asylum, and a lyceum.

MONÇAO, a town of Portugal, in the prov. of Entre-Minho-e-Douro, on the l. bank of the Minho, 28 m. N of Braga. Pop. 1,200.

MONÇARAS, a town of Portugal, in the prov. of Alemtejo, situated on the Guadiana, 4 m. NNW of Murao. Pop. 1,500.

MONCAUT, a town of France, in the dep. of Lot-et-Garonne, 9 m. E of Nerac. Pop. 650.

MONCAYO (Sierra de), a mountain of Spain, in the Iberian chain, on the frontiers of the provs. of Calatayud and Saragossa. It rises above the snow-line, and gives birth to the rivers San-Martin, San-Juan, and Queiles.

MONCEAU, a department and commune of Belgium, in the prov. of Namur, and arrond. of Dinant. Pop. 260.

MONCEAUX, a town of France, in the dep. of Corrèze, on the Dordogne, 20 m. E of Brives. Pop. 1,780.

MONCH (Le), a summit of the Bernese Alps, on the frontiers of Berne and Valais, 3 m. NE of the Jungfrau, and 6 m. W of the Finsteraarhorn. It has an alt. of 2,145 toises = 4,534 yds. above sea-level.

MONCHAUDE, a village of France, in the dep. of the Charente, cant. and 3 m. SW of Barbezieux. Pop. 1,016.

MONCHAUVET, a village of France, in the dep. of the Calvados, and cant. of Beny Bocage, 5 m. E of Vire. Pop. 1,078.

MONCHBERG, a village of Bavaria, in the circle of Lower Franconia, presidial and 7 m. E of Klingenberg and 32 m. W of Wurtzburg. Pop. 1,128.

MONCHEAUX, a village of France, in the dep.

of the Pas-de-Calais, cant. and 5 m. from St. Pol. Pop. 2,000.

MONCHESTEIN, a village of Switzerland, in the cant. and 5 m. S of Bâle, on the r. bank of the Birse, which is here crossed by a covered bridge. Pop. 400. It has a fortress, now in ruins; and in the environs are some Roman remains.

MONCHIQUE, a town of Portugal, in the prov. of Algarve, comarca and 16 m. N of Lagos, and 19 m. WNW of Silves, at the foot of the mountain-range of the same name, and at the extremity of a narrow valley. Pop. 2,760. It has a convent, an hospital, and thermal baths.

MONCHIQUE (Serra-de), a range of mountains in Portugal, forming the western part of the Oretano Hermenienne chain. It extends along the confines of the provinces of Alemtejo and Algarve, and into the latter prov., commencing near the sources of the Sadao, and terminating in Cape St. Vincent, the SW extremity of Europe, a total length of about 60 m. La Foya, its highest summit, has an alt. of about 4,050 ft.

MONCHNIENBURG. See Nienburg.

MONCHOBO, Monksobo, or Mongkabi, a town of Burmah, in the Mranmapyi, on the SW bank of Lake Nandokando, 45 m. NNE of Ava, in N lat. 22° 40′, E long. 96° 20′. It is walled, and forms a regular square. Its pop. is about 4,000. It is noted as the birth-place of Alompra.

MONCHRODEN, a village of the duchy of Saxe-Coburg-Gotha, in the principality and 5 m. NE of Coburg, bail. and 5 m. SW of Neustadt-a-der-Heyde. Pop. 453.

MONCHSROTH, a village of Bavaria, in the circle of Middle Franconia, in the jurisdiction and 14 m. WNW of Oettingen, and 26 m. SSW of Anspach.

MONCHY-AUX-BOIS, a village of France, in the dep. of the Pas-de-Calais, and cant. of Beaumetz, 9 m. SSW of Arras. Pop. 1,000.

MONCHY-HUMIE'RES, a village of France, in the dep. of the Oise, cant. and 5 m. S of Ressons, on the l. bank of the Aronde. Pop. 760. It has a chemical work.

MONCLAR, a canton, commune, and town of France, in the dep. of the Lot-et-Garonne, and arrond. of Montauban. The cant. comprises 5 com. Pop. in 1831, 6,262; in 1841, 6,239.—The town is 13 m. ESE of Montauban. Pop. 2,187.—Also a canton, commune, and town, in the dep. of the Tarn-et-Garonne, and arrond. of Villeneuve-sur-Lot. The cant. comprises 10 com. Pop. in 1831, 8,958; in 1841, 8,639.

MONCLEY, a village of France, in the dep. of the Doubs, cant. and 4 m. N of Audeaux, on the r. bank of the Oignon. Pop. 960. It has a manufactory of agricultural implements, &c.

MONCLOVA, a town of Mexico, in the state of Cohahuila, 150 m. N of Montelovez, on the r. bank of the Rio-del-Norte. It contains about 150 families, and has a garrison for the defence of the frontier.

MONCOFAR, a town of Spain, in Valencia, in the prov. and 11 m. SSW of Castellon-de-la-Plana, and 13 m. ENE of Murviedro, on the Mediterranean. Pop. 882. It has distilleries of brandy, but fishing forms the chief branch of local industry.

MONÇON. See Monzon.

MONCONTOUR, a canton, commune, and town of France, in the dep. of the Cotes-du-Nord and arrond. of Saint-Brieuc.—The cant. comprises 11 com. Pop. in 1831, 14,849; in 1841, 15,250.—The town is 13 m. S of St. Brieuc. Pop. in 1841, 1,678. It has manufactories of pack-sheet.—Also a canton, commune, and town of the Vienne, and arrond. of Loudun. The cant. comprises 18 com. Pop. in 1831, 8,148; in 1841, 8,228. The town is 11 m. SSW of Loudun, and 29 m. NNW of Poitiers, on the r. bank of the Dive. Pop. 694.

MONCOORAH, an uninhabited island of the bay of Bengal, off the coast of Hindostan and of the prov. of Bengal, to the SE of the island of Deccan-Shabazpur. It is 15 m. in length from N to S, and about 5 m. in breadth.

MONCOMET. See Montcomet.

MONCORVO. See Torre-de-Moncorvo.

MONCOUTANT, a commune and town of France, in the dep. of the Deux-Sevres, and arrond. of Parthenay. The cant. comprises 12 com. Pop. in 1831, 10,151; in 1841, 10,887. The town is 20 m. NW of Parthenay, near the r. bank of the Sevre-Nantaise. Pop. 1,822. It has extensive manufactories of woollen fabrics, fine linen, and yarn, and carries on a considerable trade in grain. Cattle are extensively reared in the surrounding country. Cheese and flax form its chief agricultural productions.

MONCRABEAU, a commune and town of France, in the dep. of the Lot-et-Garonne, and cant. of Francesas, 8 m. S of Nerac, on the r. bank of the Bayse. Pop. 2,522.

MONCRIEFF, or Mordun, a hill in the co. and 2½ m. S of Perth, which has an alt. of 756 ft. above sea-level. It is noted for the beauty and extent of the prospect which it commands.

MONCRIVELLO, a town of Sardinia, in the dio. of Novara, prov. and 23 m. W of Vercelli, mand. and 3 m. NNW of Cigliano. Pop. 2,244.

MONCUCCIO, a village of Sardinia, in the dio. of Alessandria, prov. and 21 m. NW of Asti, mand. and 2 m. NW of Castelnovo-d'Asti. Pop. 1,611. It has several gypsum quarries.

MONCUQ. See Montcuq.

MONCUR, a group of islets, three in number, in Bass's straits, 12 m. SE of Wilson's promontory, the SE extremity of Australia.

MONCY, a village of France, in the dep. of the Orne, and cant. of Tinchebray, 12 m. N of Domfront. Pop. 1,000.

MONDA, a town of Spain, in Andalusia, in the prov. and 21 m. WSW of Malaga, and partido of Coin. Pop. in 1845, 8,300. It has a parish-church, a custom-house, and a public granary, and contains extensive Roman remains. Cattle are extensively reared in the vicinity. It is the *Munda* of the Romans.

MONDAVII, a town of the Pontifical states, in the deleg. of Urbino and Pesaro, 17 m. S of Pesaro, and 30 m. W of Ancona.

MONDAY CREEK, a township of Perry co., in the state of Ohio, U. S. Pop. in 1840, 986.

MONDEGO, a river of Portugal, in the prov. of Beira, which rises in the Sierra-da-Estrella; flows westward; and falls into the Atlantic at the ports of Buarcos and Figueira, after a course of 120 m. Its principal affluents are the Dão on the r., and the Ceira on the l. At particular seasons it is navigable to a considerable distance from its mouth. Its banks were the scene of great military movements between the British and French, in Sept. 1810 and March 1811.

MONDEGO, or Mbotetey, a river of Brazil, in the prov. of Mato-Grosso, which descends from the Serra-de-San-Jose; flows NW; and enters the Paraguay, in S lat. 20° 30′, after a course of 240 m., nearly navigable throughout.

MONDEGO (Cape), a cape on the W coast of Portugal, in the prov. of Beira, in N lat. 40° 12′, W long. 8° 54′.

MONDEJAR, a town of Spain, in the prov. of Madrid, on the river Tajuna, 30 m. E of Madrid. Pop. 2,700.

MONDIM, a town of Portugal, in the prov. of Beira, comarca and 12 m. SSE of Lamego, on the r. bank of the Taruca. Pop. 600.

MONDOLEH, a small but finely wooded and fertile island of Africa, in the SE part of the bay of Amboises, opposite the NE point of Fernando Po.

MONDOLFO, a village of the Papal states, in the deleg. of Urbin-et-Pesaro, 15 m. SE of Pesaro. Pop. 1,500.

MONDOME'RE, a village of France, in the dep. of Lot, cant. and 4 m. SSW of Alberique. Pop. 800.

MONDONEDO, a town of Spain, in the N of Galicia, on the borders of Asturias, 33 m. NNE of Lugo, at the entry of the beautiful valley of Lorenzana. It is enclosed with walls, has 5 gates, 7 churches, and 2 hospitals. The houses are tolerably built; and the streets though narrow are regular. The rivers Sinto, Ruzos, and Picos, separate it from its faubourgs, and unite to form the Masma a little below the town. The inhabitants, above 6,000 in number, manufacture coarse woollens, and carry on some trade in flax, horses, and sheep. It is the see of a bishop; and on an adjoining height stands the castle of Castro Oro.

MONDONEDO (Sierra de), a chain of mountains in the NW of Spain, occupying the whole of the N of Galicia, and taking its name from the town of Mondonedo, where it commences.

MONDOUBLEAU, a town of France, in the dep. of Loir-et-Cher, 9 m. NE of Sainte-Calais. Pop. 1,671. It has manufactories of serge, and tanneries.

MONDOVI, or Mondovia, a province of Piedmont, bounded on the N and NE by the prov. of Alba; on the SE by Albenga; on the S by the provs. of Oneglia and Nezza; and on the W by Cuneo and Alba. It has an area of 1,758 sq. kilom., with a pop. of 138,266. About two-thirds of the surface are mountainous; one-half is arable. Some of the mountains are covered with noble forests of fir, chestnut, and pine. Iron and lignite are wrought; and there are several quarries of beautiful marble of various colours. The agricultural produce is valued at 16,595,116 lire annually; the average annual growth of silk at 3,350,000 lire. Nearly one-half of the productive surface is occupied with vineyards, and natural and artificial meadows. The annual growth of wool is 56,500 lbs. There are about 70 silk-manufacturing establishments in the prov., employing 4,000 hands; and several factories at which strong coarse woollens are made. The other manufactures consist of cotton and mixed fabrics, leather, wax-candles, paper, pottery, and glass. The prov. is divided into 18 *mandamenti* or districts, which are subdivided into 71 communes.

Mondovi, the cap. of the above prov., is situated on a hill near the river Ellero, 45 m. SSE of Turin. Its appearance at a distance is rather picturesque, but it loses much of its interest by the still more striking view of the surrounding Alps. It is divided into four parts: the town proper called Piazza, situated on the mountain, at an alt. of 180 ft. above the level of the sea, and three suburbs built at the bottom. The distance between the upper and lower part of the town is considerable, and the road by which they are connected inconveniently steep. The town proper has a small citadel, and is surrounded with walls. It contains, with its dependent suburbs, 2,252 houses, and 15,921 inhabitants. It has 5 parochial churches, of which that of San Donato is a noble structure. Among the institutions are a large seminary for young ecclesiastics, capable of containing 300 students, a royal college, 4 hospitals, and several infant schools. M. is the see of a bishop. The suburbs are entirely given to trade, and have manufactures both of woollen and muslin, as well as tanneries and iron-forges; but the chief branch of industry is spinning silk.—M., the *Monsirsis* or *Monsregalis* of the Middle ages, is comparatively a modern town, having been founded in 1232. On the 22d of April 1796, Bonaparte obtained here an advantage over the Piedmontese, which led the court of Turin to separate from its alliance with Austria. In 1799, the Piedmontese peasants assembled here to the number of 40,000, to interrupt the retreat of the French. A few days after, a stronger body of French arrived, and the town was abandoned to all the horrors of a general pillage. The celebrated Beccaria was a native of this town.

MONDOVI, a newly-formed colonial station near Bona, in Algeria, consisting of a few rows of wooden huts, and about 30 brick houses, seated in a very insalubrious spot, and seldom destitute of typhus epidemic.

MONDRAGON, a commune and town of France, in the dep. of the Tarn, cant. and 5 m. NNW of Lautrec, and 15 m. NNW of Castres, on the l. bank of the Adon. Pop. 400.—Also a commune and town in the dep. of the Vaucluse, and cant. of Vaucluse, 10 m. NNW of Orange, on the r. bank of the Leze. Pop. 2,321.—Also a town of Spain, in the prov. of Guipuzcoa, 33 m. SW of San Sebastian, partido and 8 m. SSW of Vergara, near the l. bank of the Deva, in a valley commanded by lofty mountains. Pop. 2,500. It is enclosed by walls in a good state of preservation, and was formerly defended also by a castle. The streets are narrow, but regular and well-paved, and it has a public square, in which there is a substantial town-house. It has also several churches, 3 convents, good barracks, an hospital, a prison, and a public granary. In the environs are the noted baths of Santa-Aguedo, and several iron-works. The neighbouring mountains abound in metals and medicinal plants.

MONDRAGONE, a town of Naples, in the prov. of the Terra-di-Lavoro, district and 20 m. SE of Gaeta, cant. and 8 m. SSW of Carinola. Pop. 2,150. It has a custom-house. It has quarries of marble, and sulphur-mines.

MONDREPUIS, a commune of France, in the dep. of the Aisne, cant. and 3 m. NNW of Hirson, and 13 m. NNE of Vervins. Pop. 1,781.

MONDSEE, or Mansee, a market-town of Austria, in Upper Austria, in the ldgb. of Linz, and circle of Hausruck, 42 m. WSW of Wels, and 18 m. ENE of Salzburg, on the N bank of a lake of the same name Pop. 1,170. It has a castle and a Benedictine abbey and possesses some iron-works. The lake is 8 m. in length, and about 1½ m. in breadth.

MONDZONA, a town of Tibet, in the prov. of Wei, 150 m. SE of Lassa, on the r. bank of the Monchu, or Om-chu.

MONDURUP, a mountain of Western Australia, on the S confines of the co. of Hay. It forms one of the highest summits of Stirling range.

MONEA, a village in the p. of Devenish, and co. of Fermanagh, 5 m. NW by N of Enniskillen.

MONEAH, a town of Hindostan, in the presidency of Bengal, prov. and district of Bahar, 24 m. W of Patna, at the confluence of the Sone with the Ganges. It is noted for the mausoleum of Mukdum-Shah-Dowleh, a beautiful specimen of Mogul architecture, and in the environs are numerous Hindu remains.

MONEDIE, a parish near the centre of Perthshire, comprising an area of about 18 sq. m. Pop. in 1841, 315. It has an alt. in its W part of about 1,800 ft. above sea-level, and is watered by the Almond, Ordee, Schochie, and Milton-burn.

MONEGAN, a township of Rives co., in the state of Missouri, U. S. Pop. in 1840, 1,105.

MONEIN, a canton, commune, and town of France, in the dep. of the Lower Pyrenees, and arrond. of Oleron. The cant. comprises 8 coms. Pop. in 1831, 10,843; in 1841, 11,101. The town is 9 m. N of Oleron, and 12 m. W of Pau, on the l. bank of the Baise. Pop. in 1841, 5,373. It has a considerable trade in wine. In the environs are mines of iron, copper, and lead.

MONEMBASIA, Napoli - di - Malvasia, or Mengeche', a town of Greece, in the Morea, in the dep. of Lacedæmon, dio. of Laconia, and cap. of the eparchy of Epidauros, 45 m. SE of Mistra, and 114 m. SW of Athens, on a small island of the archipelago,—the *Minoa* of the ancients,—which is united to the continent by a bridge of 12 arches, and at the foot of a steep rock, surmounted by a fortress. Pop. 2,000. It has a port, which, although possessing little security, is well-frequented. Wine grown in the environs forms its chief article of export. In the vicinity are the remains of the ancient *Epidaurus Limera*. M. was taken from the Venetians by the Turks in 1540, and again in 1715.

MONENGA, a town of Lower Guinea, in Benguela, near the Louga, and 90 m. SE of Fort Massangano.

MONESIGLIO, a town of Sardinia, in the division of Coni, prov. and 18 m. ENE of Mondovi, on the r. bank of the Bormida.

MONESTAY, a commune of France, in the dep. of Allier, cant. of Montel-aux-Moines. Pop. 700.

MONESTERIO, or Monasterio, a town of Spain, in the prov. and 63 m. SSE of Badajoz, and partido of Fuente-de-Cantos. Pop. 2,804. It has a parish-church and a custom-house.

MONESTIER (Le), a village of France, in the dep. of Puy-de-Dome, cant. and 2 m. SE of St.-Amand-Roche-Savine. Pop. 1,015.

MONESTIER-DE-BRIANCON (Le), or Monetier (Le), a canton, commune, and town of France, in the dep. of the Upper Alps, and arrond. of Briançon. The cant. comprises 3 com. Pop. in 1831, 5,238; in 1841, 5,392. The town is 9 m. NW of Briançon, on the l. bank of the Guisane. Pop. in 1841, 2,797. It has thermal baths, and possesses a cotton-spinning mill, and manufactories of linen and of nails. Coal and copper are wrought in the environs.

MONESTIER-DE-CLERMONT (Le), a canton, commune, and town of France, in the dep. of the Isère, and arrond. of Grenoble. The cant. comprises 11 com. Pop. in 1831, 4,636; in 1841, 4,858. The town is 21 m. S of Grenoble. Pop. 752.

MONESTIER-DU-PERCY (Le), a village of France, in the dep. of the Isère, cant. and 3 m. SE of Clelles, and 37 m. S of Grenoble. Pop. 275.

MONESTIER-EN-VAUCANCE, a village of France, in the dep. of the Ardeche, cant. and 8 m. SW of Annonay, near the l. bank of the Cance. Pop. 240.

MONESTIES, a canton, commune, and town of France, in the dep. of the Tarn, and arrond. of Albi. The cant. comprises 16 com. Pop. in 1831, 10,244; in 1841, 11,288. The town is 11 m. NNW of Albi, on the r. bank of the Ceron. Pop. 1,467. It was formerly well-fortified. The trade, which is considerable, consists chiefly in fine linen, of local manufacture, yarn, and cattle.

MONEVA, a town of Spain, in Catalonia, in the prov. and 39 m. S of Saragoza, and partido of Belchite, on the l. bank of the Aguas. Pop. 640.

MONEY, an island of the China sea, in the Paracels archipelago, in N lat. 16° 29′, and E long. 111° 30′. They are surrounded with rocks.

MONEYGALL, a small market-town in the p. of Cullenwaine co., Leinster, 3½ m. NE by N of Toomavara. Pop. in 1831, 379; in 1841, 764.

MONEYMORE, a town in the parishes of Artrea and Desertlyn, co. Londonderry, 3 m. NW by N of Coagh, and 86¼ m. N by W of Dublin. The town and a large tract of adjacent country are the property of the Drapers' company of London, and possesses a character of neatness and comfort. The linen manufacture is extensively carried on in both the town and the circumjacent country. Pop. in 1831, 1,025; in 1841, 942.

MONEYPOINT, a headland 4 m. SE by E of Kilrush, co. Clare. The face of both the headland itself and the immediately adjacent sweep of coast is a cliff overhanging the Shannon, which yields a fine hard, close-grained, gritty flag.

MONFAN, a bog in the p. of Clonmacnoise, King's co. It extends about 2½ m. E, from the vicinity of the Seven Churches, on the N side of Lough Fin, and comprises an area of 1,509 acres. Its W end lies 18 ft., and its E end 47 ft., above the level of the Shannon.

MONFALCONE, a town of Illyria, in the gov. and 18 m. NW of Trieste. It is enclosed by walls, and defended by a fortress situated on an adjacent height. Pop. 1,360. The cultivation of corn and wine, and fishing, form the chief branches of local industry.

MONFALOUT. See Manfalut.

MONFARVILLE, a village of France, in the dep. of the Manche, cant. and 5 m. N of Quettehon, and 15 m. NNE of Valognes.

MONFIA, an island of the Indian ocean, off the Zanguebar coast, NE of Quiloa, in S lat. 7° 50′, and E long. 39° 40′. The surface is low and flat, but it is very fertile. Its length from N to S is upwards of 15 m. Its inhabitants are Mahommedans, and recognise the sovereignty of the Imam of Mascat.

MONFLANQUIN, a canton, commune, and town of France, in the dep. of the Lot-et-Garonne, and arrond. of Villeneuve-sur-Lot. The cant. comprises 11 com. Pop. in 1831, 12,942; in 1841, 12,880. The town is 10 m. N of Villeneuve-sur-Lot, on a hill, near the l. bank of the Lede. Pop. in 1840, 5,075. The streets are irregular and ill-paved. The environs produce wine and fruit.

MONFORT. See Montfort.

MONFORTE, a town of Spain, in Valencia, in the prov. and 13 m. W of Alicante, and partido of Novelda, on a hill. Pop. 3,188. It is well-built, and has a parish-church, an elementary school, and a convent. It possesses several oil and corn mills, and has some manufactories of common cloth.—Also a town in Leon, in the prov. and 45 m. SSW of Salamanca, and partido of Sequeros-del-Condado, in a mountainous locality. Pop. 700. It has manufactories of fine linen.—Also a town of Portugal, in the prov. of Alemtejo, comarca and 17 m. N of Villa-Viçosa, and 21 m. S of Portalegre, on a steep mountain. Pop. 1,000. It contains 3 parish-churches and several chapels, an hospital, and an alms-house, and has a considerable trade in wine and melons. This town enjoys exemption from taxation.—Also a village in the prov. of Beira, SE of Castel-Branco.

MONFORTE, a town of Sardinia, in the div. of Coni, capital of a mandemento in the prov. and 8 m. S of Alba, and 6 m. E of Cherasco. Pop. 2,200.—Also a town of Sicily, in the prov. and district and 14 m. W of Messena, cant. and 5 m. ENE of Santa Lucia. Pop. 1,800.

MONFORTE, a town of Brazil, in the prov. of Para and island of Marajo, 60 m. N of Belem. Its inhabitants are all Indians. Agriculture and navigation form their chief employments.—Also a town of the prov. of Espirito-Santo, in the parish of Vianna, and situated in the Cordilheira-dos-Aimorés.

MONFORTE-DE-LEMUS (Santa-Maria-de),

a judicial partido and town of Spain, in Galicia, in the prov. of Lugo. The partido comprises 120 parishes. The town is 30 m. S of Lugo, and 25 m. NNE of Orense, on a height, near the l. bank of the Cabe, which is here crossed by a bridge. Pop. 5,180. It contains 2 parish-churches, 4 convents, an hospital, a magnificent seminary, supported by the Lemus family, and the remains of a fine edifice, supposed to have been a palace of the counts of Lemus. It has manufactories of linen fabrics, hair-cloth, and of biscuits. Cattle are extensively reared in the environs.

MONFORTE-DE-RIO LIVRE, a town of Portugal, in the prov. of Tras-os-Montes, comarca and 36 m. NW of Torre-de-Moncorvo, and 6 m. NE of Chaves, between the Tamega and Ragua. Pop. 400. It is enclosed by ancient walls, and has a fortress.

MONFRICI, a town of Sicily, in the prov. of Girgenti, district and 13 m. NW of Sciacca, and 9 m. SSW of Santa-Margarita. Pop. 6,000.

MONGA, or Munga, a territory of Nigritia, to the W of Bornu. Its inhabitants resemble those of Bornu. They are said to have 12,000 fighting men, and use in warfare poisoned arrows.

MONGALLO, a town of Zanguebar, in the state and 80 m. SSE of Quiloa, at the mouth of a river of the same name, in S lat. 10° 5′. It carries on an active trade in ivory. The river M. has its source in Lake Maravi, from the NE extremity of which it issues under the name of Nears-fer river; runs along the N confines of the Makua territory; divides into several arms, one of which falls into the Mozambique channel at Cape Delgado, and the most northerly at the town of M.—To the W of Quiloa, in the interior, is a territory inhabited by a tribe bearing the name Mongallos.

MONGANAP, a lake of Western Australia, in the co. of Perth.

MONGARLO, a river of New South Wales, in the co. of St. Vincent, an affluent of Shoalhaven river.

MONGAS. See Monjus.

MONGEHAM (Great), a parish in Kent, 2 m. SW of Deal. Area 780 acres. Pop. 286.

MONGEHAM (Little), a parish in Kent, 3 m. WSW of Deal. Area 1,210 acres. Pop. 100.

MONGELLA, an island in the Persian gulf, off the coast of Farsistan, near Cape Kems.

MONGES (Los), islands of the Caribbean sea, on the coast of New Granada, in N lat. 12° 30′.

MONGEWELL, a parish in Oxfordshire, 2 m. S of Wallingford. Area 1,650 acres. Pop. 202.

MONGHYR, or Mongier, a district of Hindostan, in the prov. of Bahar, on the S side of the Ganges, now included in Bhangulpore. A considerable portion of this district is hilly and unproductive, but some parts are highly cultivated. It was in this district that the experiment was first made of granting waste lands to invalid native officers and sepoys, which has answered so well that the waste lands have been brought into cultivation, and a considerable pop. has grown up in places formerly covered with long grass, and occupied only by wild beasts. Iron ore occurs in the hills; and several chalybeate springs, particularly one called Sitacund, held in high veneration by the Hindus, situated about 1 m. from the fortress of M. Its water is of a temp. of 138°, without salt, lime, or carbonic acid gas; yet there are several cold wells within a few yards of it.

MONGHYR, Monger, or properly Mudgo-gheri, a town of Hindostan, capital of the above district, beautifully situated on the S or r. bank of the Ganges. It is 80 m. E of Patna, in N lat. 25° 23′, E long. 86° 30′. It is composed of a group of villages and market-places scattered over a considerable extent of ground. The houses are generally very small, with sloping roofs covered with red tiles. The shops are numerous; and it is a place of considerable manufacturing activity. Guns, arms, cutlery, carriages, and army clothing, shoes, and palanquins, are extensively made here. The pop. is estimated at 30,000. The fortress, situated on a piece of ground forming nearly a peninsula, and commanding the navigation of the river, is very extensive, and was formerly fortified in the Indian style, with a high brick wall, and round towers at the angles; and, except on the river-side, was surrounded by a dry ditch; but having been found much too large to be defended, the fortifications have been for many years neglected since the English rule was extended to the N and W. It is now a depot for European and native invalids.—M. is first noticed in Mahommedan history, in the early part of the 16th cent., and was then an object of contention between the kings of Bahar and Bengal. In 1580 it was the head-quarters of Todermoll, the general of Akbar. In 1762 the nabob, Kossim Ali Khan, fixed upon it as the place of his residence, and strengthened the fortifications; but it was taken by the British forces after a short siege the following year.

MONGHOA, or Munghoa, a city of China, of the first rank, in the prov. of Yun-nan, in N lat. 25° 20′, E long. 100° 21′, 23 m. S of Tchao. It is surrounded by high mountains, the haunt of the animals from which musk is obtained.

MONGHODJAR, a range of mountains in Independent Tartary, in the Kirghiz territory, under the 49th parallel, connected on the NE with Mount Karaader, and on the NW with the Urkatch.

MONGIE (La), a town of France, in the dep. of Puy-de-Dome, cant. of Jumeaux, 25 m. SE of Clermont. Pop. 1,100.

MONGOBELLO. See Ætna.

MONGOL, one of the small Philippine islands, to the NE of Masbate, in N lat. 12° 14′.

MONGOLIA,

An immense region of Central Asia, skirting on Siberia, on the N; having the country of the Mandshurs and Lyautong on the E and SE; the wall of China on the S; the Chinese prov. of Kan-su on the SW; and Sungaria and Siberia on the W. Its two extreme N points lie respectively to the N of the sources of the Jenisei, in the Ergiktargak-Targa mountains, and near Argunskoi on the Argau river; its extreme S point rests on the Hoang-ho river of China. In the extreme E, it touches the Songari river of Girin-ula; on the W, it reaches the great Altai plateau. In round numbers its length from W to E may be stated at 1,700 m.; and its average breadth at 850 m. It is divided into two regions, viz. Northern Mongolia, or the country of the Kalkhas, or the Black Mongols; and Southern Mongolia, or the region of the Yellow Mongols.

Northern Mongolia extends from the Altai or Bogdo on the W, to the Khingan mountains, or the territory of the Solones, on the E, an extent of 22 degrees of long.; and from the 53d degree of N lat. to the S extremity of the Cobi or desert, in 37° 30′, which is reckoned to belong to them. This region has Sungaria on the W; Siberia on the N; the Mandshurs on the E; and the Sharra Mongols on the S and SE. It is a lofty table-land, traversed by several ranges of great elevation. From the Little Altai, the Tangnu mountains run in an ENE direction, separating the head-streams of the Jenisei from the basin of the Oubsa-Nor, and bending round towards the N from the dividing ridge, between the head-streams of the Selengha running E, and those of the Jenisei running W. A ridge running E and S connects the Tangnu chain with Mount Malakha

and the Karadabhan. The great Bogdo, supposed by the natives to be the highest range of Central Asia, rears its rugged sides and snowy summits with striking sublimity between the Mongolian and Sungarian deserts. This chain is of great breadth and length, as well as elevation, and consists of a number of parallel ranges under different appellations, running from SE to NW, and also from SW to NE. On the Russian frontier, the chain of Eguden Tchao, or Udon-Song, commences 157 versts W of Kiakhta at the source of the Katsuratai, which falls into the Dzelturi, 56 versts from its entrance into the Dzida. This chain runs 200 versts NW, separating the sources of the Ekhe, the Dzida, and the Irkut from each other. The road from Kiakhta, S to the Mongolian upland, is a continued ascent of several days' journey. Now, as Kiakhta is itself 2,536 ft. above the sea, the height of this plateau must be very great, and the cold increases gradually till it becomes intense. On the road to the Urga or court of the khan of the Kalkhas, from Kiakhta—from which it is 220 m. distant—several extensive mountain-ranges must be crossed, as the Blue mountains, the White mountains with long and narrow defiles, and the Mangatai mountains, which are frequented by wild goats, deer, foxes, steppe-cats, and bears. On the l. of this route is an insulated volcano, called Bangi, and a range called Tumecky. From a high eminence in this last range, an extensive view is obtained of naked hills whose sharp summits seem like a succession of blue waves. To the E of the Mangatai rises, at a great distance, Mount Duloshi, insulated like Mount Blanc, and presenting the appearance of an immense cone, and farther east Mount Mandal, a still loftier summit. These two lofty summits undoubtedly belong to the range of Mount Kentey or Kentai. As we approach Urga, or Kuren, the mountains increase in number, and are covered with forests which are used as hunting-grounds for the grandees of the khan. About 20 versts N of Urga is the range of Guntu, the highest Timkowski and his suite had yet crossed, and which was covered with snow several vershoks deep. All the mountains on the road had *obos* or cairns of stones on their summits; and on the highest summit of the Guntu is a very large obo surrounded with wooden pillars bearing inscriptions in the Tibetian language. As this region is but comparatively little known, we cannot pretend to describe the other ranges; their names as they occur in Du Halde and D'Anville's maps constitute nearly all that we know about them.—The Gobi or Shamo is the most striking physical feature in this region. The precise extent of this desert is not known: we only know that it extends S to Tibet; W to the lake of Lop, 25° W of Pekin; and thence NE to the Tula river, the eastern branch of the Selinga. Its longitudinal extent is at least 1,400 m. Its breadth seems to vary from 180 to 100 m. across. See article Gobi.

Rivers.] This part of M. is well watered, especially to the NW and E. The chief rivers are the Selingha, Orkhon-Tula, Kerlon-Argun, Onon, Khalkha-Pira, Altay or Siba, Hara, Eeru, Iben-Pira, Patarik-Pira, Tegurik-Pira, and others, all famous in Mongolian story.—The Selingha is composed of a multitude of minor streams, all originating at the base of the mountains of Tangnu-ula. But its chief source seems to be a lake called Husukul, or Kussugol, in 51° N lat., and 100° E long., whence it issues under the name of the Ekhe-gol, or Iga, according to the Russian maps. The other chief branches are the Karatal from the W, and the Khaswi from the SW.—The Orkhon, the great southern branch of the Selingha, rises in the same vast range of mountains in 46° 40′ N lat., and 14° 40′ W long. of Pekin, and running in a NNE direction, joins the Tula in 49° N lat., and 11° 25′ W long. of Pekin, after a course of 300 m., exclusive of its sinuosities which are very great. The Tula, the third large stream which forms the great volume of the Selingha, rises in 48° 10′ N lat., and 8° 30′ W long. of Pekin, in the very centre of the Kentei or Kinhan range, being divided from the source of the Wanan by an intervening ridge; from that of the Kerlon by another; and by another from the sources of the Khara and Eeru; whilst on the N it is separated by a ridge from the source of the Podemnaja, which enters the Selingha at Selinginsky. This must therefore be a very elevated spot, as it divides the waters which flow N to the Arctic sea, from those which descend E to the sea of Amur. The Tula runs first a SW, and then a NW course of about 300 m., and has a breadth of 300 yds. nigh its confluence with the Orkhon, flowing gently over a channel of rocks. The combined stream, after a NE course of more than 100 m., joins the Selingha about 20 m. to the S of Kiakhta; it then enters Eastern Siberia, passes the town of Selinginsky 91 versts N of Kiakhta, with a stream double the breadth of the Thames at London-bridge, and finally enters the sea or lake of Baikal in 52° 23′ N lat., and 107° 30′ E long., with a stream a mile in breadth. See Baikal. The upper basin of the noble Jenisei embraces the NW angle of Northern Mongolia. Its head-streams here rise to the W of the Kussu-gol, and flow W draining all the country between the Tangnu-ula chain on the S, and the Ergikargak-Targa on the N.—The Kerlon, or Kemlon, the twin-stream of the Amur, rising to the E of Urga, beyond the Kulon-Nor, is partly a Russian river. It is at first but a shallow stream not above 60 ft. broad, and runs a long winding course of 600 m., almost due E, to the Kulon lake, which it enters in N lat. 48° 50′ 24″, and 0° 45′ E long. of Pekin. At its exit it takes the name of the Argun.—The Kalkha rises in the Siolki range, on the confines of Mandshuria, in the lake of Kalhi, at the base of the Mukhtur-Alin in 48° N lat., and 4° 30′ E long. of Pekin, and runs a winding but generally western course of 160 m. to the Puyur or Bujur lake. Emerging thence under the name of the Urkon, it runs N to the Kulon-Nor, which it enters on the E side, in 49° N lat., and 1° 30′ E long. of Pekin. This river is considered to give name to the Kalkhas, although they do not frequent it much.—The Hara, Eeru, and Iben-Pira all fall into the Urkon, the two former from the SE, and the latter from the W. In 1726 the abode of the Khutuktu-lama and of the khan of the Kalkhas was in 49° 26′ N lat., and 10° 59′ W long. of Pekin, though now it is farther S on the Tula.—The Patarik-Pira is parted from the source of the Haswi by a ridge of the Tchangai, and runs 2° S to the Chahan-Omo, or 'White lake.'

Lakes.] This region has several large and a great number of small lakes. The most northern is the Husukul or Kussu-gul, to the SW of the Baikal, but wholly within the Mongolian frontier. It is completely surrounded with mountains called, in the map, the Whaypoldok-Alin, except to the SE, where the Ekhe, or Iga, the NW branch of the Selingha, flows out. It is said to be 70 m. from S to N, and 20 m. from W to E; but it does not seem to be half that size in the Russian maps. One of the largest lakes seems to be the Kulon-Nor, into which the Kerlon and Kalkha rivers run, and out of which issues the Argun. It extends from 48° 45′ to 49° 26′ N lat.; and is about 46 m. long from SW to NE, by one-half in breadth. Whether it is fresh, or brackish, or salt, the Jesuit fathers have not told us. Towards the NE it is embosomed in mountains, so that Gerbillon only saw its SW extremity, where it was so shallow, he says, that one might wade 4 Chi-

nese furlongs, and not find above 3 ft. water. The shores at the SW end are barren and sandy, without herbage, except a species of tufty herb of which the camels are very fond.—The Puyur, Puir, or Bujur, about 100 m. SSE of the Kulon, is 70 m. in compass, extending from SSW to NNE, and abounds in fish. The nomadic hordes, who encamped on the borders of these two lakes, and the streams connected with them, were denominated the Su-Mongols and Water Tartars, by the Western historians, in opposition to those who wandered in the dry and thirsty plains of the Shamo.

Climate, soil, and produce.] From its high elevation, this region is very cold, especially in winter. The mountains of Kinhan or Kentai seem to be well wooded on their slopes, indicating a much lower elevation than those of the Muz-Tagler and the Himalaya, which are totally destitute of that article. Gerbillon, who travelled along the Kerlon and Tula, gives us a very favourable picture of the mountains near their sources, especially those near that of the latter. He describes them as covered with beautiful woods of pine and fir, and as abounding in wild strawberries exactly resembling those of France. The same circumstance was noticed by Moorcroft in the vicinity of the Niti pass, where the mountains were covered with strawberry plants with yellow, red, and white flowers, and having a cone of seed without any pulp. On the banks of the Upper Tula the Han-Alin range is quite covered with pines and firs. Moorcroft travelled 30 lys along the side of this forest, the resort of bears, stags, and wild boars. The Tula, in this part of its course, forms several small isles full of delightful groves, and its banks are lined with bushy and beautiful trees, beyond which extend meadows of fine grass. The Kalkhas, in fact, possess by far the best part of M. The pastures and meadows on the banks of the Selingha, Orkon, Tula, and Kerlon, are the finest in Tartary; and afford pasture for innumerable flocks of horses, camels, sheep, goats, cows, and oxen, which constitute the sole wealth of the Mongols.—Though the elevation of the country is so considerable, yet, setting aside the Gobi or Shamo, and a few other sandy tracts, all the rest affords good pasture and abundance of grass as high as a man's waist. The Mongols in spring, like the Indians of North America, set fire to the old herbage, which sometimes spreads round to a circle of 100 leagues. In a fortnight after, the new grass shoots up everywhere to the height of a span. This seems to indicate great fertility of soil, and doubtless much of this vast region could support quadruple the number of the present natives were it cultivated, but agricultural arts little suit the wandering habits of nomadic tribes. The Jesuit missionaries, however, say that all the region westwards from Mandshuria to the Caspian sea is generally unfit for tillage; and that that pastured by the Naimans, and those of Kortchin and Oban, in SE Mongolia, are the worst of all.

II. Southern Mongolia, or the country of the Sharra or Yellow Mongols, is a very large region, extending from the 124th degree to the 142d degree of long. E of Ferro, and from the 38th to the 47th degree of N lat. Its length, from the borders of Mandshuria on the E, to Ninghya on the W, is full 900 m.; and in some parts it is 600 m. from N to S, though not everywhere so broad it would appear from the maps of Du Halde. This tract lies to the S and SE of the Gobi or great desert, which separates it from the territories of the Kalkhas; to the W of the Mandshurs; and immediately to the N of the Great wall. It is inhabited by 24 *aimaks* or tribes. It is intersected by a range of mountains which take their rise near the banks of the Hoang-ho; skirt that river, in its N course, for about 400 m.; and from about the parallel of 42° turn E, and run for above 600 m. under the name of the Inshan range or Gardjan-Ula. The eastern districts of Kortshin and Tshili are skirted on the W by the great range of the Khingan-Ula. Its principal rivers are the Hoang-ho and the Sira-Muren. Much of its surface has an elevation of perhaps 5,000 ft. above sea-level. From the S limits of Kortshin to the N frontiers of the Chinese prov. of Chen-si, the country lying to the S of the Inshan chain is divided into the districts of Kharot, Oniot, Toumet, and Ordos or Ordes, so called from the different tribes or families of tribes which inhabit them.

Natural history.] It may be presumed, from the mountainous nature of this country, that it should abound in metals and minerals, especially as Russian Daouria, a province very similar in aspect, is noted for its minerals: nothing however is yet known on this subject. The animal kingdom is diversified. All sorts of game, wild boars, hares, deer, squirrels, foxes, and an animal called *tael-pe*, the skins of which are made into mantles at Pekin are plentiful. Yellow goats are common in Southern M., but are not known in Northern M. Tigers and leopards are numerous. Of the former there are two kinds, the red and the white, both striped, the one with black lists, and the latter with black and grey. The other animals which roam in M. and Sungaria only become known by their occasional visits to Siberia and China. The *kulan* or wild ass inhabits the steppes and open plains, but does not appear beyond 48° N lat. His flesh is used as food. The *shiggetai* or *djiggetai* [*Equus hemionus*], an intermediate link between the horse and the ass, is found in droves on the banks of the Onon, the Argun, and the Amur, in the Govi, and throughout the whole of Tibet. He shows more intelligence than the common ass, and has been tamed, but does not entirely lose the wildness of his character. The double-humped or Bactrian camel wanders independent in the Mongolian wilds. The mountains near the source of the Amur mark the limits of the rein-deer to the S; but the elk is found as low as 45° N lat. The missionaries saw some elks which were larger than the biggest ox. They frequent the boggy grounds near the Sioiki mountains. The argali or wild sheep, the goat, the chamois, the wild goat of Caucasus, the antelope, and the *saiga* or yellow goat of Du Halde, wander in flocks on the steepest mountains. The musk-deer, which delights in cold and boundless solitudes, inhabits M., Daouria, and the mountains near the source of the Onon; and is found in Tibet, in the mountains of Shan-si, in those of Quang-si and Tong-king, and on the W in the valleys of the Upper Indus and Sutledge, in the mountains of Cashmere, and in the subalpine region which flanks the Great Himalaya on the S. Towards the N it has been found on the banks of the Yenisei near Krasnoyarsk. Among the ferocious animals are brown and black bears, the *korsak*, the *karagan*, and the white lynx called *irgis* by the Kalmuks. Regis mentions a feline animal called the *chulon* and *chilison*, which he calls a species of lynx. It has long soft thick hair of a greyish colour, and its fur is valued at the courts of Russia and China. Other feline animals are the *karakal* or *karakulak*, the *manul*, and the *julbar* or ounce. All the fur animals of Siberia are found in Central Asia. One would imagine that in this elevated and extensive region Nature had assembled into one corner of the world various races of animals which exist in regions far removed from each other; and from this lofty platform it may also be supposed that several races have descended into the surrounding countries.

Inhabitants.] The Kalkhas are a branch of the great Mongolian family, who have inhabited the N part of Central Asia from a period long antecedent to the dawn of history. See article Kalkhas. The prince of the Kalkhas does not, it would seem, pay any tribute to the court of Pekin, but on the contrary receives magnificent presents as an acknowledgment for his tribe serving as a sort of garrison on the Russian frontier.—The Tshakar or Chakar Mongols are spread over that part of Southern M. which lies immediately N of the Great Chinese wall. Between the Tshakars and the Kalkhas, the less numerous Sunnit M. roam over a wide but barren region, of which even less is known than of the districts to the south and the north of them.—The religion of the Mongols before the accession of Jenghis Khan seems to have been a species of Shamanism. They received, however, in the reign of Kublai Khan, the system of Budha, and learned the use of alphabetical characters, through the medium of a Tibetian, who was honoured by Kablai with the title of 'the pre-eminent lama.' By his influence, and that of the Tibetian priesthood, the Mongols became Budhists; but after their expulsion from China in 1368, they relapsed into Shamanism; and more than 200 years elapsed before Budhism was introduced anew amongst them. The Budhism of the Mongols is exactly the same with Lamaism, the system practised in Tibet, and differs from Shamanism in this, that while the latter allows no succession to the numberless *tængri* or gods, the former teaches, that by a mysterious operation performed in the person of the Grand lama, the same divinity subsists eternally in this supreme pontiff, under different human forms which he deigns successively to assume. Whilst the Russian embassy in 1820 was on the road to Urga, the Russians were requested not to fish, as the souls of their ancestors

might have passed into fish. They believe in a future state, in a purgatory, in the efficacy of confession, absolution, pardons, and other doctrines very conformable to the Romish system, as celibacy in both sexes, monasteries, nunneries, crossings, holy-water, beads, &c. Budha, or Fo, they believe, communicates his divinity to his chosen servants, who officiate as his vicars in various parts of his spiritual dominions. These vicars are, in the Mongolian language, denominated *khootookhtoos*. This is a convenient piece of ecclesiastical policy; for, considering the immense extent of his spiritual empire, it is impossible for by far the greater number of his spiritual subjects to come all the way to Lhassa to worship his incarnate person. "In the monasteries of M. there is a strict religious discipline, but each lama has generally his cows and sheep, as well as a horse. Almost every establishment is nobly endowed, and the funds are distributed on fixed days in the year in proportions regulated by the rank attained by each member. But each lama is free to seek other emoluments, such as by practising as a physician, or by performing domestic religious services, or by casting horoscopes, or in any similar manner not inconsistent with the profession of a lama. Some attain wealth, which, having no families, they generally spend prodigally. The number of lamas in Tartary is extreme; almost all the younger sons are devoted from infancy to this destiny, the eldest only being brought up as laymen, to tend the flocks and keep up the family. The younger brothers have no choice, but have their heads shaven from childhood. It is said to be the policy of the court of Pekin to encourage this multiplication of lamas among the Tartars, in the idea that it checks the increase of population. The shaven are, however, the most intelligent and influential, if not the most numerous body of these sons of the desert, and the Chinese pay court to them assiduously in consequence. In China Proper the corresponding class of bonzes is quite neglected by the government, and has sunk into the most abject poverty. The reason is obvious. A regenerated Boodh of Tibet or Tartary can at any time call round him thousands of devoted lama followers, ready to sacrifice their lives at his bidding; and these no less than the lay Tartars, whom they lead by their religious influence, have a high military spirit, and the recollection of the past glories of their race in the days of Jungeez and of Tymoor, to excite them to great enterprises. It is hence the study of the Chinese, and a recognised part of their policy, to associate this influence with the state, just as the church in Europe is made by most governments an engine of order and of civil government. To effect this, the government of Pekin contributes largely to all monastic institutions of M., Tibet, and Tartary, and supports the hierarchy and even the theocracies established by the aspiring priests in various parts, as at Lassa, and at the Grand Kooren of Oorga, using these institutions to control the nobility as well as to lead the mob But there is at each seat of theocratic government a skilful Chinese diplomatist, who advises and even controls the deified lama, and who, upon occasions for political action of any kind, is the prompter and director of all affairs, holding the string and wires that move the puppet, whilst they treat him with all outward respect and reverence." [*Prinsep.*]

Like most pastoral tribes of Asia, the Mongols are divided into *aimaks* or tribes, and these are subdivided into smaller bodies, each of which has its chief, called *taïki*, which title descends hereditarily to the eldest son. In their physiognomy and personal appearance, the Mongol race differ considerably from the Turkish race, having flat noses, small oblique eyes, thick lips and scanty beards, ears large and prominent, black hair, and reddish, brown, or yellow complexions. They shave off their hair, leaving only a small lock on the crown of their head, which falls down their backs. In contrast to their very homely looks, they have pretty mouths, with small white teeth, and are perfectly well limbed. Their women are by no means beautiful, but are generally handsome and well-shaped. Their manners are sufficiently rude and unpolished, but they are honest and sincere, and not nearly so much addicted to plunder and robbery as the Mahommedan Tartars. Both the Kalkhas and the Sharra Mongols are slovenly in their tents and clothes. Their general clothing is sheep and lamb skins, which are worn with the wool next the body. They know how to dress and whiten these skins, as well as those of stags, deer, wild goats, and other animals, which serve the richer sort for under garments in the spring; yet, for all the care they take, the smell of a Mongol is felt whenever he draws near you, hence the Chinese call them *Tsau-Tatse, i. e.* 'the stinking Tartars.' Red is the colour in greatest esteem amongst them; however illclothed the *taïkis* may be in other respects, they never fail to have a red or a yellow robe for state occasions. Horse flesh and mutton is their general food. The sheep are very large, with remarkably fat tails often two spans long, and weighing commonly about 10 or 12 lbs., consisting almost entirely of very rank fat. In summer their common food is milk variously prepared, as that of cows, mares, ewes, goats, and camels. Their usual drink is water, boiled with a coarse kind of Chinese tea. They are fearless horsemen. "When a mere infant," says M. Huc, "the Mongol is weaned: and as soon as he is strong enough he is stuck upon a horse's back behind a man, the animal is put to a gallop, and the juvenile rider, in order not to fall off, has to cling with both hands to his teacher's jacket. The Tartars thus become accustomed from a very early age to the movements of the horse, and by degrees and the force of habit they identify themselves, as it were, with the animal. There is, perhaps, no spectacle more exciting than that of Mongol riders in chase of a wild horse. They are armed with a long heavy pole, at the end of which is a running knot. They gallop, they fly after the horse they are pursuing down rugged ravines, and up precipitous hills, in and out, twisting and twining in their rapid course, until they come up with their game. They then take the bridle of their own horses in their teeth, seize with both hands their heavy pole, and bending forward, throw, by a powerful effort, the running knot round the wild horse's neck. In this exercise the greatest vigour must be combined with the greatest dexterity, in order to enable them to stop short the powerful untamed animals with which they have to deal. It sometimes happens that pole and cord are broken, but as to a horseman being thrown, it is an occurrence we never saw or heard of. The Mongol is so accustomed to horseback that he is altogether like a fish out of water when he sets foot on the ground. His step is heavy and awkward; and his bowed legs, his chest bent forward, his constant looking around him, all indicate a person who spends the greater portion of his time on the back of a horse or a camel."

Language and literature.] Of all the languages spoken by the people of Asia, whether nomadic or fixed, savage or civilized, the Mongolian is least known,—a surprising circumstance considering the great figure they once made on the theatre of history, and that it is a spoken language all the way from the Belur to the Siolki, and from the wall of China to Southern Siberia. We have never yet had a grammar or lexicon of the language, as of Mandshurian and Chinese; all the knowledge possessed of it by Europeans has been through the medium of these latter, or through the Turkish. Remusat in his very learned and interesting work on the site of Karakorom and the geography of Central Asia, complains much of the want of a Mongolian dictionary. Such a work, he says, is an indispensable requisite for an accurate knowledge of the history and geography of M., as it would furnish the means of restoring the names of cities, rivers, and mountains, of which in the maps (of the Jesuits) we have nothing but corrupted transcriptions, or translations in the Chinese, Turkish, or Mandshur languages. Had the elder Des Guignes been acquainted with the Mongolian language, he never could have committed the monstrous error of confounding Huns, Turks, and Mongols together, and taking them for one and the same race, and continually giving Chinese translations of Turkish names. Before the time of Jenghis Khan, none of the nomadic tribes had an alphabetical character or written language, except the Oigurs, who alone of all the congregated host that followed his victorious banners knew the use of letters, and therefore that Mongolian hero was compelled to employ them as his secretaries. But who these Oigurs were, is not agreed amongst the learned. Remusat, Klaproth, and others, have taken them for Turks; but the learned Schmidt, of the St. Petersburg academy, has controverted this opinion, and has endeavoured from Mongolian history to show that the Oigurs were a Tibetian race, well-acquainted with the language of Tibet, and the books of the Budhists.

MONGOYO'S, a tribe of Indians in Brazil, who inhabit the Cordilheira-dos-Aimorés and the banks of the Patipe, in the prov. of Bahia. They inhabit villages, and employ themselves in fishing and hunting, and in the culture of gourds, melons, yams, sweet potatoes, and mandioc. From the two latter, and from honey, they manufacture an inebriating liquor of which they often partake to excess. Their own weapons of warfare consist in the bow and arrow, but the musket is now in use by them. They are well-proportioned in form, and have a not disagreeable aspect of countenance. Their only clothing consists of a wrapper of cotton cloth, and of a fabric of palm-leaves, which in the women has the addition of a fringe descending to the knees.

MONGRANDO, a town of Sardinia, capital of a mandemento, in the prov. and 5 m. SSW of Biella, and 8 m. ENE of Ivrea. Pop. 3,150. It has manufactories of woollen and linen fabrics.

MONGRASSANO, a town of Naples, in the prov. of Calabria-Citra, district and 20 m. NNW of Cosenza, cant. and 1½ m. N of Cerzeto. Pop. 1,200.

MONGUAGON, a township of Wayne co., in the state of Michigan, U. S. It has an undulating surface, and comprises an island in the Detroit strait. Pop. in 1840, 307.

MONGUILLEM, a town of France, in the dep.

of the Gers, cant. and 11 m. NW of Nogaro, near the l. bank of the Midou. Pop. 500.

MONGURU, a town of Central Africa, in the Movizas territory, 330 m. WNW of Tête, and on the road from that town to the capital of the Cazembes.

MONGUYON, or MONTGUYON, a canton, commune, and town of France, in the dep. of the Charente-Inferieure, and arrond. of Jouzac. The cant. comprises 14 com. Pop. in 1831, 12,152; in 1841, 12,008. The town is 21 m. SE of Jouzac, on the l. bank of the Mouzon, an affluent of the Palais. Pop. 1,471. It has an extensive tannery.

MONGYI, a village and petty state of Western Africa, 20 m. W of the Bar of Benin.

MONHEGAN, an island in Lincoln co., in the state of Maine, U. S. Pop. in 1840, 77.

MONHEIM, a town of Bavaria, capital of a presidial, in the circle of Swabia, 18 m. N of Donauworth. Pop. 1,300. It has 3 churches. — Also a town of Prussia, in the prov. of the Rhine, regency and 12 m. SSE of Dusseldorf, circle and 11 m. WSW of Solingen, on the r. bank of the Rhine. Pop. 1,400. It has manufactories of cloth and of pottery.

MONI, MUNI, or NOEL, an island of the Indian ocean, to the SW of Java, in S lat. 10° 30′, E long. 105° 35′. It is surrounded by rocks, and abounds in cocoa-palms.

MONI, or MUNIM, a river of Brazil, in the prov. of Maranhão, which has its source in the district of Brejo, 28 m. W of Parnahiba; runs NE; receives on the r. the united waters of the Preto and Dobro, and the Iguará on the l.; waters the towns of Manga and Icatu; and throws itself into the bay of São-Jose, 8 m. E of the embouchure of the Itapicuru.

MONIFIETH, a parish on the S verge of Forfarshire. Area 3,710 Scottish acres. About 400 acres of low sandy beach along the frith of Tay appear to have been once under water, and it has been supposed that nearly 1,600 acres of land might yet be reclaimed from the sea in Monifieth bay The highest ground, Drumsturdy-muir-law, 2¼ m. from the shore, rises 530 ft. above sea-level. The villages are Broughty-ferry, Drumsturdy-muir, and Monifieth, which last stands in the SE corner of the p., 3 m. from Broughty-ferry, and 7 m. from Dundee. Pop. in 1801, 1,407; in 1831, 2,635; in 1841, 2,946.

MONIKIE, a parish in the maritime district of Forfarshire, comprising the villages of Gouldie, Camustown, Craigton, M., and one or two hamlets. Pop. in 1801, 1,236; in 1831, 1,322; in 1841, 941.

MONIMAIL, a parish in Fifeshire, occupying a portion of the central valley of the co., and comprising three villages, the largest of which is Letham; the other two are M., situated near the church, containing a pop. of 80, and Easter Fernie, containing about 60 inhabitants. Pop. of p. in 1831, 1,230; in 1841, 1,162. There are about 3,000 acres under cultivation in the p.

MONIM-SIMA. See BONIN-SIMA.

MONISTROL, MONISTROL-L'EVEQUE, or MONISTROL-SUR-LOIRE, a canton, commune, and town of France, in the dep. of the Haute-Loire, and arrond. of Yssengeaux. The cant. comprises 5 coms. Pop. in 1831, 12,083; in 1841, 12,505.

MONISTROL-D'ALLIER, a commune of France, in the dep. of the Haute-Loire, cant. and 5 m. E of Sauges, and 14 m. WSW of Le Puy, on the r. bank of the Allier, at the confluence of the Ance, at an alt. of 1,221 yds. above sea-level. Pop. 908. It has a paper-mill.

MONITEAU, a township of Cole co., in Missouri, U. S., 20 m. NE of Jefferson. Pop. 1,533.—Also a township in Cooper co., in the same state; and another in Howard co.

MONITZ, a village of Moravia, 10 m. SW of Austerlitz. Pop. 480.

MONIVAE, a parish in co. Galway. Area 21,932 acres. Pop. in 1831, 5,117; in 1841, 4,810. The church at the v. stands on a site of 271 ft. above sea-level. The bog of M., on the l. bank of the Moyne, has an area of 1,054 acres.

MONIVAIRD AND STROWAN, two parishes lying chiefly in the upper end of Strathearn, Perthshire, but having detached sections entirely isolated. A large part of the united p. is hilly or mountainous. The heights which stretch along the SE boundary of the Glenartney districts, and the S boundary of the main body of Strowan, divide the waters which are tributary to the Forth from those which are tributary to the Tay; and the heights along the N extremity of Monivaird divide the basins of the Earn and the Almond. Those in the N of Monivaird are among the highest Grampians which flank Strathearn. Benchonzie, which is the highest, has an alt. above sea-level of 2,923 ft. Torlum, a hill on the S extremity of Strowan, rises 1,400 ft. above sea-level. Glenturret, extending SE through all the upland district of Monivaird, has some grandly savage yet softened scenery. Near its middle stretches Loch Turret, about 1 m. long, and ¼ m. broad, surrounded by very bold craggy mountains. Pop. in 1841, 853.

MONJES. See MONGES.

MONJUR, a village of Caramania, in Asiatic Turkey, 20 m. S of Kirshehr.

MONJUS, a people inhabiting the interior of Eastern Africa, in a NE direction from Mozambique. In the early European maps, their country, under the title of the empire of Monomuji, is made to fill all the interior of this part of the continent, from Monomopata to Congo. They are of a deep shining black, with high cheek bones, thick lips, and small knots of woolly hair on their heads.

MONKLAND (NEW), a parish in the Middle ward of Lanarkshire, forming its N boundary from the cos. of Dumbarton and Stirling. It is nearly 10 m. in length, by about 7 m. in breadth. Much of the surface has an elevation of from 600 to 700 ft. above the level of the sea. The most important feature of this p. is its mineral wealth, which has greatly increased the pop., and raised Airdrie, within a few years, from the condition of an inconsiderable village to that of a bustling and important town, with a share in the election of a member of parliament. Coal, the quality of which is only equalled by its abundance, in many places is found in seams from 9 to 10 ft. in thickness. Ironstone occurs both in balls and seams, and much of it is of the valuable kind called Black-band, which is so abundantly mixed with coal as to require little addition of fuel in the burning. Almost all the extensive iron-works in this district of country are to a certain extent supplied with ironstone from this p., including those of Clyde, Cadder, Chapel-hall, Gartsherrie, and Carron. Limestone is worked in the p., but not to great extent; and several mineral springs exist, chiefly of the chalybeate kind. The Monkland-well, near Airdrie, at one time enjoyed an extensive reputation for its efficacy in the cure of scorbutic, scrofulous, and other cutaneous diseases. The Ballochney railway connects itself with the Kirkintilloch and the Garnkirk railways, and thus brings New M. and its produce into easy and rapid communication with both Edinburgh and Glasgow; and the same service is performed by the Monkland and the Forth and Clyde canals. The extensive reservoir for the supply of these splendid water-ways, situated partly in this p., and partly in the p. of Shotts, extends over nearly 300 acres of land. In addition to the town of AIRDRIE [which see], there are several thriving villages in the p., as Colston, Clerkston, Greengairs, and Riggend. In point of pop., few districts in Scotland

have advanced with greater rapidity than that within the bounds of New M., and there are few in which that advance has a fairer prospect of being steadily continued. The following table exhibits its progressive increase during a period of 40 years:

	In Airdrie.	In the country.	Total.
1801	2,745	1,868	4,613
1811	3,474	2,055	5,529
1821	4,860	2,502	7,362
1831	6,594	3,273	9,867
1841	12,396	8,119	20,515
1851	14,435		

MONKLAND (Old), a parish in the Middle ward of Lanarkshire, extending for several miles along the E bank of the Clyde. In respect of fertility of soil and salubrity of climate, the district of Old M. is much superior to that of New M., and has been regarded as the most productive soil which anywhere covers the great mineral fields of Scotland; but it is to its almost exhaustless stores of coal and iron that this district owes its principal celebrity. The coal—which is here always found above the lime—is worked in pits of from 30 to 100 fath. in depth. The total thickness of the coal-measures above the lime may be about 775 ft. Still more than to its coal, however, is the p. in recent times indebted to its ironstone and iron-works; although it is proper to mention, that the ore for the supply of the latter is to a great extent drawn from the adjoining p. of New M. To the burning of ironstone has been added within the last few years works and machinery for the manufacture of bar or malleable iron. The principal iron-works in this p., or in the immediate borders of it, are Gartsherrie, Cadder, Dundyvan, Monkland, Summerlee, Clyde, and Carnbroe, producing amongst them by far the larger portion of the iron manufactured in Scotland, and giving employment to thousands of persons in the large village of Coatbridge, and other communities rising in the p. Even in 1806, the produce of pig-iron in the whole of Lanarkshire did not amount to 10,000 tons yearly; now the furnaces of Old M. alone are computed to produce 200,000 tons, with an expenditure of 600,000 tons of coal, and an incredible quantity of lime; and it is computed by many that the mineral productions of the Monkland district, great as they are, bid fair to be doubled in a few years. The quarries produce abundance of red and white freestone, white pavement-stone, whinstone, and greenstone. A good deal of weaving is done for the Glasgow market in the p., and there are also other manufactures in progress. In addition to parish and turnpike roads, no fewer than four great railways enter or are connected with the district, viz., the Garnkirk and Glasgow railway, the Monkland and Kirkintilloch, the Ballochnie, and the Wishaw and Coltness. The Monkland and Glasgow canal extends through almost the entire length of the p. There is nothing in this populous p. which properly deserves the name of a town; but there is a succession of villages which are rapidly rising in wealth and pop.: such are Coatbridge, Langlone, Dundyvan, Bailieston, and Crosshill. There is also an extensive and rising village-pop. at the following localities, viz., Tolcross, Carmyle, Broomhouse, and Toxley, Merriston, Bargeddie, Barrachine, Dykehead, and Coatdyke. The pop. of this p. has, like that of New M., increased with railroad speed, especially between the years 1831 and 1841, as will be seen by the following statement of its progressive rise:

Years.	Population.
1755	1,813
1791	4,000
1801	4,006
1811	5,469
1821	6,983
1831	9,580
1841	19,675
1851	

MONKLAND, a parish in Herefordshire, 2½ m. WSW of Leominster, on the river Arrow. Area 1,180 acres. Pop. in 1831, 180; in 1841, 184.

MONKLEIGH, a parish in Devonshire, 3 m. NW by W of Great Torrington, on the Torridge river. Area 2,040 acres. Pop. in 1831, 562; in 1841, 699.

MONK-NASH, a parish in Glamorganshire, 6 m. SW of Cowbridge. Pop. in 1831, 121; in 1841, 109.

MONKNEWTOWN, a parish in co. Meath, 2¾ m. E by N of the town of Slane. Area 3,673 acres. Pop. in 1831, 700; in 1841, 824.

MONKSEATON, a township in Tynemouth, Northumberland, 7 m. NE of Newcastle. Pop. 581.

MONKSILVER, a parish in Somersetshire, 6¼ m. N by W of Wiveliscombe. Area 840 acres. Pop. 308.

MONKSLAND, or Monkstown, a parish in co. Waterford, containing the v. of Knockmahon, a little ENE of Bonmahon. Area 2,118 acres. Pop. in 1831, 1,024; in 1841, 1,672. The river Mahon traces the whole of the W boundary. The surface is nearly all poor land, but the substrata abound in mineral wealth, and render M. a chief part of one of the richest mining districts in Ireland.

MONKSTON, a parish in Southamptonshire. 3¾ m. W by S of Andover. Area 960 acres. Pop. 293.

MONKSTOWN, a parish in co. Meath, 5 m. SE by E of Navan. Area 1,869 acres. Pop. in 1831, 429; in 1841, 460. The surface is a part of the rich plain of Meath, 2¾ m. NE of Tara.—Also a parish in co. Cork, containing the villages of M. and Maulbaun, and part of the town of Passage. Area 1,541 acres. Pop. in 1831, 2,199; in 1841, 2,138. The surface is a rich, beautiful, and picturesque portion of the western sea-board of the estuary of the Lee, and lies directly opposite Cove and Great island. The v. of M. stands on the shore, immediately N of the creek of Ballybricken. It has become a favourite retreat during the summer-months of the gentry of Cork and the surrounding country. Pop. of the v. in 1841, 538.—Also a parish in co. Dublin, containing the hamlets of Montpelier, M., Kill-of-the-Grange, and Glenagarey or Sally Noggins, the villages of Bullock, Glasthule, and Honeypark, and the towns of Blackrock and Kingstown. Area 2,052 acres. Pop. in 1831, 9,815; in 1841, 13,143. The whole district is one of the most lively portions of the S sea-board of the bay of Dublin. The principal part of the atmospheric railway is within its limits.

MONKSWOOD, a chapelry in Monmouthshire, 2½ m. NW of Usk, on the river Usk. Area 1,030 acres. Pop. in 1831, 193.

MONKTON, a parish in Devonshire, 2 m. NE by N of Honiton, on the river Otter. Area 2,090 acres. Pop. in 1831, 120; in 1841, 141.—Also a parish in Kent, 9¼ m. NE of Canterbury. Area 1,960 acres. Pop. in 1831, 376; in 1841, 402.

MONKTON and PRESTWICK, a united parish on the coast of Kyle, Ayrshire. Area, between 9 and 10 sq. m. The coast-line is about 2¼ m. long, low, flat, and sandy. The village of M. is situated 1 m. from the sea, and 4 m. N of Ayr, and has a pop. of about 380. Other villages are Prestwick and Prestwick-Toll. Pop. in 1831, 1,818; in 1841, 1,933.

MONKTON with JARROW, a township in Jarrow parish, co.-palatine of Durham, 4 m. E by N of Gateshead, on the river Tyne. Area 3,690 acres. Pop. in 1801, including Headworth and Hebburn, 1,566; in 1831, 3,598; in 1841, 3,600. The venerable Bede was born here in 673.

MONKTON-BISHOPS, a chapelry in the parish of Ripon, W. R. of Yorkshire, 3½ m. S by E of Ripon. Area 1,420 acres. Pop. in 1841, 460.

MONKTON-FARLEY, a parish in Wilts, 3½ m. NW of Bradford, intersected by the river Avon and

the Great Western railway. Area 1,970 acres. Pop. in 1831, 396; in 1841, 435.

MONKTON-MOOR, a parish and township in the upper division of the ainstey of the city of York; 6 m. NW of York, on the SE bank of the Nidd, including the townships of Hessey and M. Area 4,230 acres. Pop. in 1831, 484; in 1841, 454.

MONKTON-NUN, a parish in the W. R. of Yorkshire, 7 m. NW of York, on the river Ure, at the junction of the Nidd. Area 1,250 acres. Pop. 365.

MONKTON-TARRANT, a parish in Dorsetshire, 4 m. NE by E of Blandford-Forum. Area 3,210 acres. Pop. in 1831, 220; in 1841, 246.

MONKTON (West), a parish in Somersetshire, 3½ m. NE by N of Taunton. Area 3,410. Pop. 1,164.

MONK-WEARMOUTH. See Wearmouth.

MONMOUTH, a parish and capital of the co. of the same name, situated in the hund. of Skenfreth, 13 m. E by S of Abergavenny, and 115 m. WNW of London, in a valley at the conflux of the Wye and the Monnow. Area of p. 2,700 acres. Pop. in 1801, 3,345; in 1831, 4,916; in 1841, 5,466.—The town consists of one long principal street, with several smaller ones diverging from it. Many of the houses are handsome erections; and the streets are paved and lighted with gas. The county-jail is a massive stone building, commodiously constructed, and well-regulated. On the ridge of an eminence upon the banks of the Monnow, W of the principal street, are the ruins of an ancient castle. Under the reform act, M., in conjunction with Usk and Newport, continues as heretofore to return one member to parliament. The parliamentary boundary includes the p. of M., and also those parts of the old borough which lie beyond that parish. The pop. of the parl. borough in 1841 was 5,822; in 1851, 5,710. The number of electors registered for M. in 1837 was 360; in 1847, 352; for the district, 1,144. M. carries on a considerable trade with Bristol and other places by means of the Wye, and furnishes the surrounding country with supplies of various goods. The principal business of the town consists in converting pig-iron into bars, and in making tin plates. The iron is brought from Newport and Cardiff: the tin for coating is brought up the Wye to Redbrook in the form of blocks. Timber and bark are exported to Bristol and Ireland; and coals are brought from Coleford by means of a tram-road, which is said to have proved an unprofitable speculation to the projectors. On the neighbouring streams have been erected many mills for the manufacture of paper and the grinding of corn.

MONMOUTHSHIRE, a maritime county of England bordering on South Wales, bounded on the N by part of Brecknockshire, and by Herefordshire from which it is divided by the river Monnow; on the E by Gloucestershire, from which it is divided by the river Wye; on the S by the Bristol channel; and on the W by Glamorganshire, from which it is divided by the river Romney or Rumney. It is about 110 m. in circumf., comprising an area of 550 sq. m., or 352,000 acres. Nearly one-third of the county is a rich plain or moor, upon the shore of the Severn; one-third consists of beautifully variegated ground watered by considerable rivers; and one-third assumes the mildest character of mountain abounding with lovely valleys. The most remarkable are the Skyrryd, or St. Michael's Mount, and the Sugar-loaf. The other mountains which attract notice are the Hatterel-hills, the Graig, Mynyth-Llwyd or Grey-hill, Mynyth-Allervig, Mynyth-y-Crug, and Twin-Barlwn.

Rivers.] The only river of importance properly belonging to this co. is the Usk. The Wye and the Severn only bound the co. The Monnow and the Romney, rivers of inferior magnitude, also merely bound the co., except that the Monnow crosses a small district to the town of Monmouth and its junction with the Wye. The Usk, rising in Brecknockshire, enters this co. on the NW, between Crickhowell and Abergavenny, where it is joined by the Grwyneu-Fawr, and afterwards, near Abergavenny, by the Kebby and Kevenny; it then runs SSE in a very winding course, by Usk, Caerleon, and Newport, and is joined by various other tributaries, the principal of which are the Avon and the Ebwy from the NW, and the Alwy from the NE. Expanding into an estuary to the S of Newport, it becomes tidal and navigable for about 5 m., and then falls into the Bristol channel. The river Ebwy, which falls into this estuary, rises in Brecknockshire to the S of the Usk, and passes round the Beacon mountain, by two branches. The Avon or Torvaen rises to the N of Aberystwith, and runs SE by Pont-y-pool, Llanvihangel, and Caerleon, to the Usk. The Alwy rises on the E border of the co., near the Wye, and flows WSW to the Usk, a little below the town of Usk. The Trothy is a small river in the NE part of the county, falling into the Wye, at its junction with the Monnow, near Monmouth. Numerous small streams cross the hundred and level of Caldicot, and fall into the Bristol channel, and the Severn estuary.

Canals and railroads.] The Brecon and Monmouth canal enters this co., in the valley of the Usk, a little to the S of the point at which the Usk itself enters; sends a branch to the Usk; and winds, in a somewhat devious S course, to the vicinity of Pont-y-pool, to a railroad NW of which a branch is carried. The main canal continues its course southwardly, through the valley of the Avon, to Newport; sending off another branch near its terminus, through the valley of the Ebwy, to Crumblin, where it also terminates in a railroad.—The Romney railroad runs from the Twyncarno iron-works, at the head of Romney valley, southwards down the valley of the Romney, and by Cock-y-north to Newport, crossing the river Ebwy near its termination. The Sirhowey railroad runs from the Tredegar and Sirhowey iron-works, at the head of the Sirhowey river, down the valley of that river, to near Risca, where it is joined by the Ebwy railroad, and then continues its course SE to Newport. The Ebwy railroad runs from the head of the Ebwy valley, at the Beaufort and Ebwy vale works, and follows a similar course with the former down the Ebwy valley to its junction with the Sirhowey railroad. The railroad joining the Brecon and Monmouth canal, near Pont-y-pool, runs down the Avon valley from the Blaenavon and other iron-works. The Mamhilad railroad unites the Brecon canal, and the Usk, between Mamhilad and Usk. The Abergavenny and Hereford railroad has been noticed under article Herefordshire. The Monmouth and Forest of Dean railway runs from the town of Monmouth into the forest, where branches radiate through it in different directions. There are various other branch railroads in this co., the whole being chiefly devoted to the conveyance of iron and coal. A railway has been projected to run from Newport by the Wye at Huntisham-ferry, to the terminus of the Birmingham and Gloucester railway, at Gloucester.—The principal roads in this co. are those entering near Monmouth from Hereford, London, &c., and radiating to Chepstow, to Cardiff by Usk, Caerleon, and Newport, to Pont-y-pool, and to Brecon by Abergavenny.

Mineral produce.] In the district comprehending Monmouth and Glamorganshires fuel, ore, and flux commingle almost of themselves, and so intimate and convenient is their mutual proximity, that towards the head of the parallel valleys of Monmouth and Glamorgan, with Merthyr-Tydvil in the focus, most of the great iron-works of Wales are concentrated. Here, lying chiefly in a continuous range of furnaces from Merthyr to Pont-y-pool, numerous masses of the pop., comprehending from 4,000 to 10,000 individuals, are collected. The ironstone of M. is argillaceous, occurring both in strata and in lumps detached. The ores contain on an average 35 per cent. of iron, with a remanent proportion of carbonic acid and clay in their composition. These ores are situated in the midst of the 'South Welsh coal-field,' which occupies the W district of this county, and is girt round with limestone strata. The coal and lime are, of course, as extensively used as the iron ore, the quantities mutually requisite in the manufacture of iron being about equal. The coal is of two kinds,—furnace and stone coal; the latter of which burns with great brilliancy and intensity of heat. The lime is broken into small pieces, and used as a flux, to combine with the clay of the ore in the manufacture of iron, and thus flow off in the form of 'slag' or refuse. It is also burnt in large quantities for manure and building purposes. There are numerous quarries of brescia for millstones, and other valuable stone for building. The E districts are chiefly occupied by the old red sandstone formation, which stretches N into Brecknockshire and Herefordshire.

Soil and agriculture.] The soil is of various kinds, but generally fertile, except in the hilly districts, particularly in the NW. The Caldicot-level, or southern district, is alluvial, and consists of light and heavy loam, with black and sterile peat. The vale of the Usk, particularly the tract of country to the E of the river, is fertile in corn and pasture, and well-wooded: so also is the land bordering on the Wye. The climate, except in the more exposed situations on the hills, is temperate and salubrious, particularly in the S quarter of the county, and in the valleys of the Usk and the Wye.

Divisions, population, &c.] This co. is divided into the 6 hundreds of Abergavenny, Caldicot, Ragland, Skenfrith, Usk, and Wentlloog; and subdivided into 127 parishes, containing the borough and county-town of Monmouth; with two contributary boroughs, Newport and Usk; and 8 market-towns, namely: Abergavenny, Caerleon, Chepstow, Monmouth, Newport, Pont-y-pool, Tregedar, Usk.—Pop. in 1801, 45,582; in 1831, 98,200, consisting of 19,911 families, of whom 5,614 were chiefly employed in agriculture, 8,626 in trade, manufactures, and handicraft, and 5,671 otherwise occupied; in 1841, 134,355; in 1851, 157,418, of whom 82,349 were males, and 75,069 females. Inhabited houses in 1841, 24,944; in 1851, 28,944.—M. is in the province of Canterbury, and dio. of Llandaff, except a small portion on the NE, including the borough of Monmouth, which is in the dio. of Hereford. According to the report of Mr. Seymour Tremenhere to the committee of council on education, in a pop. of 85,000, the total number of children occasionally attending 47 day and 53 dame schools, and these in general of a nearly useless description, was only 3,308; and upwards of 70·8 per cent. of the whole number of children belonging to the working classes in the district, did not attend any day school whatever. The number of savings' banks in the co. on 20th November, 1838, was 5; number of depositors, 2,505; amount deposited, £62,315. The number of savings' banks in 1851 was 5; number of depositors, 4,124; amount deposited, £107,960.—The poor-rate returns for 3 years, to Easter 1750, show an average expenditure of £2,898 on the poor of this county; for 1803, an expenditure of £19,762; for 1833, of £30,826; and for 1847, of £28,645.

Franchise, &c.] The county returns 2 members to parliament, besides 1 for the borough of Monmouth, to which Newport and Usk are contributory. Monmouth, Abergavenny, Bedwelty, Newport, and Usk are polling-places in the county-elections, the principal place of election being Monmouth. The number of electors registered for the county, in 1837, was 4,347; in 1848, 4,614.—M. is included in the Oxford circuit. The quarter-sessions are held alternately at Monmouth and at Usk. The county-court and county-jail are at Monmouth.—According to the criminal returns, the total number of offenders in the co., in 1838, was 197; in 1849, the number of criminals was 370.

Trade and manufactures.] The great trade of the co. is in iron and coal: see articles NEWPORT, MERTHYR-TYDVIL, PONT-Y-POOL, USK, CHEPSTOW, and MONMOUTH. The celebrated Welsh flannel was at one time manufactured to a greater extent than now. In 1838 there were 9 woollen-mills employing 71 hands; but flannel is chiefly made by hand-loom weavers, of the number of whom there is no accurate return. There is a considerable trade in timber, bark, and foreign produce.

History and antiquities.] Under the British dynasty this co. was included under the name of Wales. At the time of the Roman invasion, it formed part of the Silurian territory. In early and obscure times its history can be traced only with great difficulty. Sometimes it formed a detached district called Gwent; at other times it was included in Morganwg, which comprehended Glamorganshire and part of Caermarthenshire. Henry VIII., when he divided Wales into 12 counties, annexed M. to England; it was, however, considered a Welsh county till the time of Charles II. In the great civil war, Chepstow-castle surrendered to the Parliamentarians in 1645. In 1648 it was surprised by the royalists, but retaken by assault. During the same year Ragland-castle, after a heroic defence, surrendered to Sir Thomas Fairfax. The most interesting event in the modern history of this co., is the Newport insurrection of Chartists in November 1839.

MONMOUTH, a county of Van Diemen's Land, having the Derwent river on the S, and the Clyde on the W; and comprising the 9 hundreds of Apsley, Bath, Bothwell, Pictou, Hamilton, Pontville, Brighton, Bellerive, and Yarlington.

MONMOUTH, a maritime county of New Jersey, U. S. Area 1,030 sq. m. Pop. in 1840, 32,909; in 1850, 30,293. Its cap. is Freehold.—Also a township of Kennebec co., Maine, U. S., 17 m. WSW of Augusta. Pop. 1,882.—Also the cap. of Warren co., in Illinois.

MONMOUTH (CAPE), a cape on the coast of Patagonia, in the straits of Magellan, at the entrance of St. Sebastian's sound, in S lat. 53° 23′, W long. 70° 24′.

MONMOUTH ISLAND, a small island in the straits of Magellan, 2 m. W of James island, or Isla-de-los-Infantes.—Also one of the Bashi islands, in the Eastern seas, in N lat. 20° 18′. It is about 3 leagues long, and a league broad, hilly, with many steep precipices.

MONNAIE, or MONNOYE, a town of France, in the dep. of Indre-et-Loire, 10 m. NNE of Tours. Pop. 1,550.

MONNIERES, a commune of France, in the dep. of Loire-Inferieure, cant. of Clisson. Pop. 1,100.

MONNIKENDAM, a town of Holland, in the prov. of N. Holland, 8 m. NE of Amsterdam, in N lat. 52° 27′. Pop. 2,471. It has a harbour on the Zuyder-Zee, at the embouchure of the Mounik, but it is nearly blocked up by sand.

MONO, a township of Upper Canada, in Simcoe district. Pop. in 1842, 1,020.

MONOBLET, a village of France, in the dep. of Gard, 4 m. NE of St. Hippolyte. Pop. 1,140.

MONOCASY, a river of Maryland, U. S., which runs S into the Potomac, 50 m. above George-town.

MONODY CREEK, a river of Pennsylvania, U. S., which joins the Swatara, 12 m. W of Lebanon.

MONOHAN, a township of York co., in Pennsylvania, U. S. Pop. 770.

MONOKA, a river of the United States, in Maryland, which runs into the Chesapeake, in 76° 53′ W long., 38° 10′ N lat.

MONOMIES. See MENOMONEE.

MONOMOTAPA, MUKARANGA, or MOCARANGA, a country of S. Africa, between the 15th and 19th parallels of S lat.; bounded on the N by the Zambese, which separates it from Mozambique; on the E by the Indian ocean,—or, more limitedly, according to some geographers, by the Manzora, which separates it from Manica; on the S by the territory of Delagoa; and on the W by countries in the interior, of which we are almost entirely ignorant, but which are supposed to be possessed by the Botongas, Changa-Meras, and other tribes who have received the general appellation of Kafirs. The longitude of its western boundary is not known.—It is a mountainous country, watered by several considerable rivers, of which the Zambeze, the Maçares, and the Manzora, are the chief. A large part of the country is uncultivated, and covered with forests, which shelter numerous herds of elephants whose teeth afford an important article of commerce. Gold is said to abound in the interior, especially at Zumbo in S lat. 18° and E long. 27°, whither it is brought from Abu-

tua, a distance of 360 m. to the W. To the same spot considerable quantities of ivory are brought, which is said to be procured in the countries along the Orange river. The natives are reported to be entirely black with woolly hair, and to have all the characteristics of the African negro. In many of their customs they appear to resemble the Abyssinians, particularly in their mode of hunting and dressing their hair. This country appears to be the Bonomotapa, and Mestapa, of some geographers. The tribes inhabiting this district appear to have pushed northwards, and to be now in possession of the country around the great lake N'yassi.

MONONGAHELA, a river of the United States, which has its rise in the Laurel mountains in Virginia; runs N into Pennsylvania; and, after a course of 300 m., unites with the Alleghany at Pittsburg to form the Ohio. It is navigable for barges to Brownsville, and still farther for lighter craft. It is deep, and in general of a gentle current. Its principal tributaries are the Cheat and the Youghisgony.—Also a township in Greene co., in Pennsylvania, 14 m. SE of Waynesburg. Pop. 1,178.—Also a county in the NW part of Virginia, U. S. Area 550 sq. m. Pop. in 1840, 17,368; in 1850, 12,387.

MONO POINT, the NW extremity of the island of Trinidad, in N lat. 10° 43′, W long. 61° 44′.—Mono or Ape's Island, off this point, has a length of about 2½ m. from NE to SW, and is 1½ m. in breadth. Its N part rises to 1,013 ft. above sea-level.

MONOPOLI, a town of Naples, in the Terra-di-Bari, on the Adriatic, 26 m. ESE of Bari, in N lat. 40° 57′, E long. 17° 18′. It is well built, has two faubourgs, and contains a cathedral and a number of churches. Its streets are narrow, but extremely clean. "Domes, spires, and minarets rise above its bastions and flanking walls; but every thing is in miniature." [*Williams.*] Its principal manufactures consist of hempen and cotton stuffs; it also exports wine and olives. Pop. 19,000. It has two ports, capable of containing vessels of considerable size. At a small distance are several subterranean villages or series of habitations, hollowed out of a bed of calcareous spar, which, like the excavations near Modica in the SE of Sicily, seem to have been the primitive dwellings of shepherds. About 4 m. SE of Monopoli are the vestiges of the ancient town of *Egnatia*.

MONOS, a river of Guinea, which falls into the Atlantic, 15 m. S of Tombi.

MONOVAR, a town of Spain, in the prov. and 21 m. WNW of Alicante. Pop. 10,000. Rock-salt is procured in the neighbourhood.

MONPAZIER, a town of France, in the dep. of Dordogne, on the Dropt, 25 m. SE of Bergerac. Pop. 1,030.

MONPEYROUX-DU-BOSQUET, a village of France, in the dep. of Aveyron, cant. and 3 m. SW of La Guiolle. Pop. 1,500.

MONPIANO, a village of Lombardy, 3 m. N of Brescia. Pop. 1,400.

MONPON, a canton and village of France, in the dep. of Dordogne, 18 m. SSW of Riberac, on the l. bank of the Isle. Pop. 1,400.

MONPOX. See Mompox.

MONREAL, a town in the north of Spain, in Navarre, 10 m. SE of Pampeluna. Pop. 500.—Also a village in the prov. and 50 m. SW of Cuença.—Also a town of Prussia, in the reg. and 21 m. WSW of Coblenz. Pop. 600.

MONREAL-DEL-CAMPO, a town of Spain, in the prov. and 30 m. NNW of Teruel, on the l. bank of the Xiloca. Pop. 1,500.

MONREALE, a town of Sicily, situated on a hill 2 m. WSW of Palermo, of which city it may be considered a suburb. The view from the town is one of the most interesting in Sicily. Its cathedral is one of the finest specimens extant of the Gothic style. The walls are covered with mosaics and other ornaments, producing a very fine effect. In the neighbourhood is a richly endowed convent. Pop. 8,000.

MONROE, a county in the NW part of the state of New York, U. S., bounded on the N by Lake Ontario. It comprises an area of 607 sq. m., drained by Genesee river and several small streams, all affluents of Lake Ontario, and intersected by the Erie and the Genesee Valley canals, and by the Auburn, Rochester, and Tonawanda railroad. The surface is slightly undulating, and the soil is rich and highly productive. It contains large quantities of iron-ore, gypsum, and marl, and several sulphur-springs. Pop. in 1840, 64,902; in 1850, 87,838. Its cap. is Rochester.—Also a co. in the E part of the state of Pennsylvania, comprising a superficies of 750 sq. m., bounded on the NW by Lehigh river, and on the E by Delaware river, and drained by branches of those rivers. It has a hilly surface, but possesses considerable fertility. Pop. in 1840, 9,879; in 1850, 13,263. Its cap. is Stroudsburg.—Also a co. in the W part of the state of Virginia, containing a surface of 750 sq. m., bordered on the W by New river, and drained by Greenbrier river. It is intersected in the E by the Alleghany mountains, and has a general alt. of 1,500 ft. above sea-level. The soil consists of a rich calcareous loam. Pop. in 1840, 8,422, of whom 868 were slaves; in 1850, 10,197. Its cap. is Union.—Also a central co. of the state of Georgia, containing an area of 370 sq. m., bordered on the NE by Ocmulgee river, and drained by branches of that river. Pop. in 1840, 16,275, of whom 8,447 were slaves; in 1850, 16,900. Its cap. is Forsyth.—Also a co. of the state of Florida, situated in the S part of the peninsula, bordered on the S by the Florida channel, and on the W by the gulf of Mexico. It comprises a part of the Everglades,—an inundated region covered with pine,—and the Florida keys. In the NW part it contains some fertile land. Pop. in 1840, 688; in 1850, 2,645. Its cap. is Key West.—Also a co. in the S part of the state of Alabama, comprising an area of 980 sq. m., watered by Alabama river and its branches, and containing along these rivers tracts of fertile land. Pop. in 1840, 10,680, of whom 5,292 were slaves; in 1850, 1,213. Its cap. is Monroeville.—Also a co. toward the NE part of the state of Mississippi, containing a superficies of 650 sq. m., drained by Tombigbee river, and its tributary the Battahatchee. Pop. in 1840, 9,250, of whom 4,083 were slaves; in 1850, 21,131. Its cap. is Athens.—Also a co. in the SE part of the state of Tennessee, containing a superficies of 750 sq. m., drained by branches of Tennessee river. Pop. in 1840, 12,056; in 1850, 11,878. Its cap. is Madisonville.—Also a co. in the S part of the state of Kentucky, drained by Big Barren river and its branches, and to a small extent by Cumberland river. Pop. in 1840, 6,526; in 1850, 7,756. Its cap. is Tompkinsville.—Also a co. in the SE part of the state of Ohio, bounded on the r. by the Ohio, and drained by Little Muskingum river, and by Sunfish, Duck, and Wills creeks. It is to a great extent hilly, but it has some level and fertile districts, and contains coal and iron-ore. Pop. in 1840, 18,521; in 1850, 28,378. Its cap. is Woodfield.—Also a co. in the SE part of the state of Michigan, comprising a surface, generally level and fertile, of 540 sq. m., bounded on the E by Lake Erie, and drained by Otter, Plum, Sandy, Stoney, and Swan creeks. Pop. in 1840, 9,922; in 1850, 14,702. Its cap. is Monroe.—Also a central co. in the state of Indiana, containing a superficies of 390 sq. m., drained by the W fork of White river and its tributaries. It

has a level surface, and contains a considerable extent of prairie. Pop. in 1840, 10,143; in 1850, 11,283. Its cap. is Andersontown.—Also a co. in the SW part of the state of Illinois, comprising an area of 360 sq. m., watered by Horse, Prairie, De Long, and Eagle creeks, and bounded on the W and SW by the Mississippi. Its W part is hilly, but toward the E it contains a considerable extent of good land. Pop. in 1840, 4,481; in 1850, 7,680. Its cap. is Waterloo.—Also a co. toward the NE part of the state of Missouri, comprising a superficies of 744 sq. m. The surface is undulating, to a large extent prairie, and generally fertile, and is watered by Salt river and its branches. Pop. in 1840, 9,505; in 1850, 10,543. Its cap. is Paris.—Also a co. in the E part of the state of Arkansas, comprising a surface of 1,150 sq. m., watered by Cache and White rivers. Pop. in 1840, 936; in 1850, 2,190. Its cap. is Lawrenceville.—Also a township of Waldo co., in the state of Maine, 54 m. NE of Augustus, watered by Marsh river, an affluent of the Penobscot, and generally fertile. Pop. in 1840, 1,602.—Also a township of Washington co., in the state of Vermont, 15 m. NNE of Montpelier, watered by branches of Onion or Winooske and Lamoille rivers. Pop. 1,092.—Also a township of Franklin co., in the state of Massachusetts, 120 m. W by N of Boston, bordered on the E by Deerfield river. Pop. 282.—Also a township of Fairfield co., in the state of Connecticut, 54 m. SW of Hartford. It has a rough and stony surface, and contains little arable ground. Pop. 1,351.—Also a township of Orange co., in the state of New York, 14 m. SE of Goshen, 117 m. S by W of Albany. It is intersected by the range of the Highlands, and is generally hilly. It possesses considerable diversity of soil, and is drained by Ramapo, an affluent of Passaic river. Pop. 3,914. The village is on Ramapo river, and is intersected by the New York and Erie railway. Pop. 450.—Also a village of Hardiston township, Sussex co., in the state of New Jersey, 80 m. N of Trenton.—Also a township of Middlesex co., in the state of New Jersey. Pop. 2,453.—Also a township of Bradford co., in the state of Pennsylvania. Pop. 1,153.—Also a village of Durham township, Bucks co., in the same state, 116 m. E of Harrisburg, on the W bank of Delaware river, consisting in 1840 of about 12 dwellings.—Also a township of Cumberland co., in the same state, 7 m. SE of Carlisle. It has a level surface, watered by Yellow Breeches creek. The soil consists of calcareous loam. Pop. in 1840, 1,570.—Also a township of Luzerne co., in the same state. Pop. 340.—Also a township of Armstrong co., in the same state. Pop. 1,151.—Also a village of Walton co., in the state of Georgia, 61 m. NW by N of Milledgeville, on the head of Ocmulgee river.—Also a village of Washiti parish, in the state of Louisiana, 300 m. NW by N of New Orleans, on the E side of Washiti river. Pop. 500.—Also a village of Overton co., in the state of Tennessee, 102 m. E by N of Nashville, on a small branch of Obie's river.—Also a village of Hart co., in the state of Kentucky, 100 m. SW of Frankfort, on the W side of Little Barren river.—Also a village of Lemon township, Butler co., in the state of Ohio, 95 m. WSW of Columbus. Pop. 250.—Also a township of Adams co., in the same state, on the Ohio river. Pop. 832.—Also a township of Ashtabula co., in the same state. Pop. 1,323.—Also a township of Butler co., in the same state. Pop. 202.—Also a township of Carrol co., in the same state. Pop. 1,060.—Also a township of Clermont co., in the same state. Pop. 1,628.—Also a township of Coshocton co., in the same state, between Killbuck and Mohiccan creeks. Pop. 557.—Also a township of Darke co., in the same state. Pop. 471.—Also a township of Guernsey co., in the same state. Pop. 940.—Also a township of Harrison co., in the same state. Pop. 1,039.—Also a township of Holmes co., in the same state. Pop. 899.—Also a township of Knox co., in the same state, intersected in the E part by Schenck's creek. Pop. 1,249.—Also a township of Licking co., in the same state. Pop. 1,156.—Also a township of Logan co., in the same state. Pop. 1,203.—Also a township of Madison co., in the same state. Pop. 385.—Also a township of Miami co., in the same state, on the N side of the National road. Pop. 1,404.—Also a township of Muskingum co., in the same state. Pop. 918.—Also a township of Perry co., in the same state. Pop. 999.—Also a township of Preble co., in the same state. Pop. 1,176.—Also a township of Pickaway co., in the same state. Pop. 1,346.—Also a township of Richmond co., in the same state, on Mohiccan creek. Pop. 1,624.—Also a township of Putnam co., in the same state. Pop. 509.—Also a township of Putnam co., in the state of Indiana. Pop. 1,341.—Also a township of Washington co., in the same state. Pop. 1,537.—Also a township, and the cap. of Monroe co., in the state of Michigan, 37 m. SSW of Detroit, on the river Raisin, 2½ m. from its mouth. It is connected by a canal with Lake Michigan, and by a railroad with Hillsdale. Pop. 1,703.—Also a village of Greene co., in the state of Wisconsin, 81 m. S of Madison, on a branch of Pickatonokee river.—Also a township of Hardin co., in the state of Illinois. Pop. 328.—Also a township of Lincoln co., in the state of Missouri. Pop. 796.—Also a township of Livingston co., in the state of Missouri. Pop. 217.—Also a township of Lafayette co., in the state of Arkansas. Pop. 504.—Also a township of Sevier co., in the same state. Pop. 216.

MONROEVILLE, a village of Monroe co., in the state of Alabama, U. S., 151 m. S of Tuscaloosa, on a branch of Limestone creek, and 12 m. E of Alabama river.—Also a village of Ridefield township, Huron co., in the state of Ohio.

MONROE-WORKS, a village of Monroe township, Orange co., in the state of New York, U. S., 105 m. S by W of Albany, consisting in 1840 of about 40 dwellings. Iron-ore of good quality is found in the environs.

MONROIG, a town of Spain, in the prov. and 12 m. W of Tarragona. Pop. 3,000. It has soap-manufactories, and antimony is wrought in the vicinity.

MONROVIA, a town on the W coast of Africa, the cap. of the free state of Liberia, at the embouchure of the Mesurado, and on the side of Cape Mesurado, in N lat. 6° 16′. Pop. 2,000. Its appearance from the sea is picturesque. Its interior presents a few stone-houses, amongst which is a large legislative hall; and a stone-fort occupies the highest point of ground in the place.

MONROY, a town of Spain, in the prov. and 18 m. NNE of Caceres. Pop. 800.

MONROYO, a town of Spain, in the prov. of Saragossa, 30 m. W of Tortosa. Pop. 1,500.

MONS, in Flemish BERGHEN, a town of Belgium, capital of the prov. of Hainault, situated partly on a hill, partly in a plain on the small river Trouille, by which it is divided into two parts, and which joins the Haine, a little below the town, 20 m. ENE of Valenciennes, and 32 m. SW of Brussels. It is surrounded by an earthen mound and a ditch, and has, since 1818, received additional fortifications, especially on the W side. On the E it is protected by two large etangs or pools which discharge themselves into the Haine. It is the only strong place between Brussels and the French frontier. It is a well-built town, with several squares, and tolerably regular

streets, which are steep and winding, but in general wide and well-paved. The market-place is spacious, and contains the government-house, and the house of the provincial council. The hotel-de-ville is a large old building, with a fine steeple. The churches are in general well-built; that of St. Elizabeth is remarkable as occupying the site of an ancient castle, demolished in 1618, and said to have owed its origin to Julius Cæsar. The Trouille is crossed by 3 bridges. The charitable institutions are, a large hospital originally constructed by Vauban, a foundling-hospital, and a work-house. The library of the gymnasium is extensive. M. has a great variety of manufactures in woollens, cotton, linen, and lace; and its command of coal has also led to the establishment here of iron foundries, along with works for salt, earthenware, oil, soap, and copper and lead foundries. In these articles, and in coals, its trade is very considerable. There are also extensive bleaching-grounds in the vicinity. It communicates with the Scheldt by a canal to Condé. The pop. of this town, at present 26,000, is said to have been formerly greater, but it has frequently experienced the calamities of war. In 1691 it was besieged by Louis XIV., and, to prevent bombardment, the citizens compelled the governor to capitulate. In 1709 it was taken by the allies under Marlborough and Eugene, after the sanguinary battle of Malplaquet. In 1746 it was taken by Marshal Saxe; and in the wars of the French revolution, it was successively taken and retaken by the opposing parties.

MONS, a village of France, in the dep. of Aude, 15 m. E of Carcassonne. Pop. 500.—Also a village in the dep. of Var, 4 m. N of Fayence.

MONSAGSO, a town of Spain, in the prov. of Salamanca, 18 m. ESE of Ciudad Rodrigo. Pop. 528.

MONSALES, a village of France, in the dep. of Aveyron, cant. and 6 m. NW of Villeneuve. Pop. 565.

MONSANTO, a town of Portugal, in the prov. of Beira, comarca and 18 m. NE of Castello-Branco. It is situated in an elevated position, and is surrounded by decayed fortifications. Pop. 1,400.

MONSARAS, a walled town of Portugal, in the prov. of Alemtejo, 18 m. S of Villa-Vicosa, near the r. bank of the Guadiana. Pop. 1,400.

MONSEGUR, a town of France, in the dep. of La Gironde, on the l. bank of the Dropt, 9 m. ENE of La Reole. Pop. 1,344.—Also a village in the dep. of Lot-et-Garonne, cant. and 6 m. SE of Monflaquin. Pop. 664.

MONSELICE, a town of Austrian Lombardy, in the prov. and 12 m. SSW of Padua, on a canal of the same name which runs from Este to Bacchiglione. It has manufactories of silk and woollens, and conducts an active trade by means of the canal. Pop. 4,500.

MONSELMINES, a race of people in the W part of the Sahara, and scattered along the coast of the Atlantic from Cape Nun to Cape Jubi, who appear to be a mixture of Arabs and fugitive Moors from Marocco. Their territory is fertile in dates, figs, almonds, and grapes; and they export these fruits, and oil, wax, and tobacco.

MONSEMPRON, a village of France, in the dep. of Lot-et-Garonne, cant. and 1 m. WSW of Fumel. Pop. 790.

MONS-EN-PERVELE, a commune and village of France, in the dep. of Nord, cant. and 3 m. S of Pont-a-Marcq. Pop. 1,700. Philip the Fair defeated the Flamands in the vicinity of this place on 18th August, 1304.

MONSERRAT. See MONTSERRAT.

MONSERRATE, an island in the gulf of California, in N lat. 25° 45′, SE of Carmen island.

MONSHEIM, a town of Hesse-Darmstadt, in the prov. of Rhein-Hessen, cant. of Pfeddersheim, 7 m. WNW of Worms, near the l. bank of the Pfrim. Pop. 819.

MONSOL, a village of Lower Guinea, the cap. of the kingdom of Anzico, 420 m. NE of San-Salvador.

MONSOL, a town of France, in the dep. of Rhone, arrond. and 18 m. NNW of Villefranche, near the source of the Grosne. Pop. 1,202.—The cant. of M., comprising 12 coms., had a pop. of 12,462 in 1841.

MONSON, a township of Hampden co., in the state of Massachusetts, U. S., 75 m. SW of Boston. Pop. 2,151.—Also a township of Piscataquis co., in the state of Maine, 77 m. N by E of Augusta. Pop. 548.

MONSOON, winds which blow in the N part of the Indian ocean from the parallel of 12° S, for about five months of the year, or from the middle of April to the end of September, in a SW, and for other five months, or from November to March, in a NE direction. When either of the monsoons is about to change, there is an interval, occurring between the middle of March and the middle of April, and the middle of September and that of October, during which the winds gradually fail, and are not unfrequently replaced by a dead calm. When in full they blow a moderate and sometimes even what in nautical phrase is termed a fresh gale. The name is derived from the Malay word *musim*, or the Arabic *mausim*, signifying 'a fixed time,' 'epoch,' or 'season.' Professor Guyot thus explains the origin and characteristics of these winds. The Indian ocean "is in reality only a half-ocean,—a great gulf surrounded on the sides by huge continental masses: the mighty Asia with its peninsulas and its table lands on the N, Africa on the W, Australia on the E. Asia prevents the oceanic trade-wind of the NE from arriving there, and the influence of the lands and of the vast plateaus remains greatly preponderating. Thus the movements of the atmosphere depend upon the unequal heating of the neighbouring continents during the extreme seasons of summer and winter, which are opposite in the continents situated in the N and in the S. The eastern trade-wind in this way changes into a sort of double semi-annual breeze, blowing regularly six months in one direction, and six months in another. While Africa, S of the equator, receives the vertical rays of the southern summer sun, in December, January, and February, Southern Asia, on the N of the equator, and the neighbouring seas, are feeling the low temperatures of winter. The air rushes in from the colder regions of the Indies and of Upper Asia towards the warmer regions of S. Africa, and the trade-wind is transformed into a north-easter, which blows as long as this difference of temperature lasts. It is for India the winter or NE monsoon. The reverse takes place when India and Asia are heated by the burning sun of the northern summer, and when Africa is cooled by the southern winter. The air blows towards the places of which the temperature is more elevated: it is for India the summer or SW monsoon. Hence, in place of a constant current setting from E to W, the relative position of the lands, combined with the action of the earth's rotation, gives occasion to two periodical winds: the monsoon of the SW, blowing from April to October during the northern summer, and the NE monsoon, blowing from October to April during the southern summer. In the S part of the Indian ocean, which is not under the influence of the lands, the SE trade-wind blows quite regularly through the whole year. The transition from one monsoon to another, depending upon the course of the sun, does not occur at the same period in places situated under different latitudes; but the approach of this critical season is always announced by variable winds succeeded by intervals of calm, and by furious tempests and whirlwinds, proving a general disturbance of the atmosphere. The phenomenon of the monsoon, or the change of winds according to the seasons, takes place in like manner between the Indies and New Holland; but is less regular and less marked than the Indo-African system just described. The seas of Southern China and the great archipelago of Sunda and of the Moluccas, by their position, feeling at the same time the influence of the trade-wind of the Great ocean, and of the double system of the monsoons of the Indies and Australia, it may be readily conceived that we must seek in this circumstance the cause of the tempests and typhoons which desolate this sea more than any other upon the surface of the globe."

MONSTER, a village of Holland, in the prov. of S. Holland, 15 m. WNW of Rotterdam. Pop. 850.

MONSTREUX, a commune of Belgium, in the prov. of Brabant, cant. of Ittre. Pop. 318.

MONSUR, or MANSA, a small town and fortress of the Punjab, near the l. bank of the Indus, and on the N frontier of the territory of the Sikhs.

MONSWILLER, a village of France, in the dep. of Bas-Rhin, cant. and 2 m. N of Saverne. Pop. 300.

MONT, a department and commune of Belgium, in the prov. of Luxemburg, and arrond. of Marche. Pop. 834.—Also a com. in the prov. of Liege, and dep. of Comblain-au-Point. Pop. 210.—Also a com.

in the same prov., and dep. of Dison. Pop. 529.—Also a com. in the prov. of Hainault, and dep. of Flobecq. Pop. 125.—Also a commune in the prov. of Namur, and dep. of Godinne. Pop. 315.—Also a com. in the prov. of Brabant, and dep. of Perwez. Pop. 725.—Also a com. in the prov. of Namur, and dep. of Sombreffe. Pop. 241.—Also a com. in the prov. of Liege, and dep. of Thieux. Pop. 106.

MONT (Le), a commune of Belgium, in the prov. of Namur, and dep. of Biesnee. Pop. 185.—Also a com. in the prov. of Namur, and dep. of Bioul. Pop. 237.

MONT (Le Grand), a village of Switzerland, in the cant. of Vaud, district and circle and 14 m. N of Rolle, and 16 m. NW of Lausanne. Pop. 673.

MONT (Saint), a town of France, in the dep. of the Gers, cant. and 3 m. W of Riscle, and 32 m. WNW of Mirande, on the l. bank of the Adour. Pop. 610.

MONTA, a town of Sardinia, in the div. of Coni, prov. and 11 m. NNW of Alba, mand. and 1½ m. NW of Canale. Pop. 2,850.

MONTABAUR, an amt or bailliage of the duchy of Nassau. The bail. is in the W part of the duchy, bordered on the S, SE, and E, by that of Nassau. Pop., chiefly Cath., 13,019. The town is 11 m. ENE of Coblenz, and 33 m. NW of Wiesbaden. Pop. 2,727. It is enclosed by walls; and has 2 suburbs, 5 churches, and an hospital. It possesses several paper, oil, and fulling-mills.

MONTACUTE, a parish in the co. of Somerset, 4 m. WNW of Yeovil. Area 1,370 acres. Pop. in 1831, 1,028; in 1841, 1,047.

MONTACUTO, a town of the grand-duchy of Tuscany, in the prov. and 51 m. ESE of Florence, vicariat and 3 m. NW of Anghiari.

MONTAFIA, a village of Sardinia, in the dio. and 35 m. WNW of Alessandria, prov. and 17 m. NW of Asti. Pop. 750.

MONTAGANO, a town of Naples, in the prov. of Sannio, district and 5 m. NNW of Campobasso. Pop. 2,850.

MONTAGNAC, a canton, commune, and town of France, in the dep. of the Herault, and arrond. of Beziers. The cant. comprises 12 coms. Pop. in 1831, 9,958; in 1841, 9,956. The town is 18 m. ENE of Beziers, and 24 m. WSW of Montpelier, on the l. bank of the Herault. Pop. in 1841, 3,446. It has a Calvinist consistorial church; and possesses manufactures of serge, druggets, and other woollen fabrics, a distillery of brandy, and several oil-mills. Wine is extensively cultivated in the surrounding country.—Also a village in the dep. of the Lot-et-Garonne, cant. and 4 m. E of Monflanquin, and 14 m. NNE of Villeneuve-d'Agen. Pop. 1,795.

MONTAGNAC-SUR-L'AUVIGNON, a commune and town of France, in the dep. of Lot-et-Garonne, cant. and 6 m. ENE of Nérac. Pop. 1,177.

MONTAGNAC-LA-CREMPSE, a commune and town of France, in the dep. of Dordogne, cant. of Villamblard. Pop. 1,400.

MONTAGNANA, a walled town of Lombardy, in the prov. and 24 m. WSW of Padua, on the r. bank of the Frassinone. Pop. in 1840, 8,640. It has manufactures of silk and linen, and a considerable traffic in the agricultural produce of the surrounding territory.—Also a village in the duchy and 9 m. SSW of Modena.

MONTAGNE-DE-SAINT-GEORGES, a commune and village of France, in the dep. of Gironde, cant. of Lussac, 6 m. E of Libourne. Pop. 1,698. Good red wines are made here and in the vicinity.

MONTAGNY, a commune and village of France, in the dep. of Loire, cant. of Perreux, 8 m. E of Roanne. Pop. 1,724.

MONTAGNY, or Montenach, a village of Switzerland, in the cant. and 6 m. WNW of Friburg. Pop. 615.

MONTAGRIER, a canton, commune, and village of France, in the dep. of Dordogne, arrond. and 6 m. E of Riberac. Pop. of cant. 9,548; of com. 842.

MONTAGUE, an island of the S. Pacific, in the group of the New Hebrides, to the N of Sandwich island, in S lat. 17° 20′, E long. 168° 30′.—Also an island off the coast of Moneroo, New South Wales, in S lat. 36° 20′, E long. 150° 25′, 6 m. E of Cape Dromedary.—Also a river of Tasmania, which flows N, and falls into Bass's strait, to the S of Robbin's island.

MONTAGUE, a township of Upper Canada, in the Bathurst district. It is to a considerable extent fertile and well-cultivated. Pop. in 1842, 2,097.

MONTAGUE, an island of Russian America, in the N. Pacific, at the entrance to Prince William sound, in N lat. 60°, W long. 147° 20′. It is nearly 60 m. in length from NE to SW, and about 9 m. in breadth.

MONTAGUE, a township of Franklin co., in the state of Massachusetts, U. S., 85 m. W by N of Boston, on the E bank of Connecticut river, which is here crossed by a bridge, and watered by Sawmill river. It has a hilly surface, and considerable diversity of soil. Pop. in 1840, 1,255.—Also a township of Sussex co., in the state of New Jersey, 91 m. N of Trenton, bounded on the NW by Delaware river. It is mountainous towards the SE, but in the SW is a river alluvion. It is drained by Mill and Chambers'-Mill brooks, and Big and Little Flat kills, affluents of Delaware river, and is to a great extent fertile and well-cultivated. Pop. 1,026.—Also a village of Essex co., in the state of Virginia, 68 m. NE of Richmond. Pop. about 50.

MONTAIGU, a canton, commune, and town of France, in the dep. of the Vendée, and arrond. of Bourbon-Vendée. The cant. comprises 10 coms. Pop. in 1831, 14,138; in 1841, 15,246. The town is 23 m. NE of Bourbon-Vendée, and 21 m. ESE of Nantes, on a hill, near the r. bank of the Maine. Pop. 1,310.—Also a department and commune of Belgium, in the prov. of Brabant, and arrond. of Louvain. Pop. 2,228.

MONTAIGU (Pic), a summit of a ramification of the Pyrenees, in France, in the dep. of the Hautes-Pyrenees, cant. and to the E of Argelis. It has an alt. of 2,376 metres = 2,599 yds. above sea-level.

MONTAIGU SOUND, an indentation of the NW coast of Australia, to the W of Admiralty gulf, in S lat. 14° 30′, E long. 125° 30′. It is 36 m. in length from E to W, and 18 m. in breadth.

MONTAIGUT, a canton and town of France, in the dep. of Tarn-et-Garonne, on the river Seune, 28 m. NW of Montauban. Pop. of cant. 7,967; of town 4,073.—Also a town in the dep. of Puy-de-Dome, 27 m. WNW of Clermont, on the summit of a commanding eminence. Pop. 1,421.

MONTAIGUT-LE-BLANC, a commune and village of France, in the dep. of Puy-de-Dome, cant. of Champoix, 8 m. NW of Issoire. Pop. 1,352.

MONTAJONE, a town of Tuscany, 22 m. SW of Florence, near the Elsa. Pop. in 1839, 1,244.

MONTALCINO, a town of Tuscany, in the prov. of Sienna, 45 m. SSE of Florence. Pop. 3,819. It is the see of a bishop.

MONTALE, a town of Tuscany, in the prov. and 15 m. NW of Florence, vicariat and 5 m. E of Pistoia.

MONTALEGRE, a town of Portugal, in the prov. of Tras-os-Montes, comarca and 69 m. W of Braganza, and 15 m. W of Chaves, on an elevated plateau. Pop. 720. It has a fortress, which protects the road to the frontiers of Galicia.

MONTALEGRE, a town of Brazil, in the prov. and 390 m. W of Para, in Guiana, on an island formed by the confluence of the Gurupatuba with the Amazon. Pop. in 1842, 4,000. It was one of the principal stations of the Jesuits. The surrounding district produces mandioc, cotton, coffee, cacao, &c. —Also a village in the prov. of Bahia, and district of Jacobino.

MONTALEMBERT, a village of France, in the dep. of the Deux-Sevres, cant. and 3 m. SE of Sauze, and 18 m. SE of Melle. Pop. 800.

MONTALET, a village of France, in the dep. of the Gard, cant. of St. Ambroix, and com. of Meizannes, on the Cèze, 12 m. N of Alais. It has mines of zinc.

MONTALIEU, a village of France, in the dep. of the Isère, cant. and 2 m. NNW of Touvet, and 20 m. NNE of Grenoble. It has a quarry of fine blue marble.

MONTALIVET, a group of islets off the NW coast of Australia, to the NW of Montaigu sound, in N lat. 14° 14′, E long. 125° 17′.

MONTALTO, a district and town of the Pontifical states, in the deleg. of Ascoli. The town is 11 m. NNE of Ascoli, and 15 m. SSW of Fermo, near the r. bank of the Aso, an affluent of the Adriatic. Pop. 1,470.—Also a town of Naples, in the prov. of Calabria-Citra, district and 11 m. NW of Cosenza. Pop. 2,400.—Also a town of Sardinia, in the div. and 30 m. ENE of Alessandria, prov. and 11 m. E of Voghera.—Also a village in the dio. of Coni, prov. and 6 m. S of Mondovi, on the r. bank of the Corsaglia. Pop. 2,025.—Also a village in the dio. of Turin, in the prov. and mand. and 1½ m. N of Ivrea. Pop. 1,180.

MONTALTO-DI-CASTRO, a town of the Pontifical states, in the deleg. and 20 m. NNW of Civita-Vecchia. Pop. 432.

MONTALVAO, a fortified town of Portugal, in the prov. of Alemtejo, comarca and 29 m. N of Portalegre, and 21 m. S of Castello-Branco, on a height near the l. bank of the Sever. Pop. 740.

MONTALVEN, a town of Spain, in the prov. and 38 m. N of Teruel, on the Rio-Martin. Pop. 3,700. Coal is wrought in the vicinity.

MONTALY, a village of France, in the de . of the Var, and cant. of Grimaud.

MONTALZAT, a village of France, in the dep. of the Tarn-et-Garonne, cant. and 3 m. SW of Montpezat, and 18 m. NNE of Montauban.

MONTAMISE', a village of France, in the dep. of the Vienne, cant. of St. George-les-Baillargeaux, and 5 m. NE of Poitiers. Pop. 750.

MONTAN, a town of Spain, in Valencia, in the prov. and 36 m. WNW of Castellon-de-la-Plana, and partido of Viver or Vivel. Pop. 1,000. It has a convent, and possesses several distilleries of brandy, and oil-mills.

MONTANANA, a town of Spain, in Old Castile, in the prov. and 42 m. NE of Burgos, partido and 4 m. WNW of Miranda-de-Ebro, on the r. bank of the Ebro. Pop. 156.—Also a town of Catalonia, in the prov. of Huesca, partido and 8 m. E of Benabarri. Pop. 800. It has manufactories of linen and coarse woollen fabrics.

MONTANARO, a town of Piedmont, in the prov. and 16 m. NNE of Turin. It retains its ancient walls and gates, and has several churches. Pop. 4,182. The vicinity is remarkably productive of hemp.

MONTANARO, a town of Sardinia, capital of a mandemento, in the prov. and 16 m. NNE of Turin, and 3 m. NW of Chivas. Pop. in 1841, 4,400. It is well-built, and has an orphans' asylum.

MONTANCHES, a judicial partido and town of Spain, in Estremadura, in the prov. and 20 m. N of Merida. Pop. 4,890. It has a considerable traffic in agricultural productions, and especially in hams, which are highly celebrated.

MONTANER, a canton and village of France, in the dep. of Basses-Pyrenees, arrond. and 24 m. ENE of Pau. Pop. of cant. 6,102; of com. 925.

MONTANGE, a village of France, in the dep. of Ain, cant. and 1 m. N of Chatillon. Pop. 720.

MONTANS, a village of France, in the dep. of Tarn, cant. and 3 m. S of Guillac. Pop. 800.

MONTANT (Saint), a village of France, in the dep. of Ardeche, cant. and 4 m. N of Bourg St. Andreol. Pop. 1,580.

MONTANVERT, a ridge of the Lepontine Alps, in Savoy, running NE from Mont-Blanc, between the valley of Chamouni and the Mer-de-Glace.

MONTAPAS, a village of France, in the dep. of La Nievre, cant. and 4 m. ESE of Saint-Saulge, on the Aron. Pop. 850.

MONTARGIL, a town of Portugal, in the prov. of Estremadura, comarca and 36 m. ESE of Santarem, near the l. bank of the Tagus. Pop. 1,400.

MONTARGIS, an arrondissement, canton, and town of France, in the dep. of Loiret.—The arrond., with an area of 161,721 hectares, had a pop. of 70,385 in 1841, and comprises 7 cants.—The cant. comprises 15 coms. Pop. in 1841, 16,567. — The town is situated on the river Loing, at an alt. of 278 ft. above sea-level, 40 m. ENE of Orleans, near the junction of the canals of Briare and Loing. Pop. in 1789, 465; in 1821, 6,568; in 1841, 7,301. It is a place of considerable trade and manufactures. Woollen cloths, cottons, paper, and leather, are pretty extensively made; and white wines, grain, saffron, honey, and butter are largely dealt in.

MONTARLOT, a village of France, in the dep. of Haute-Saone, cant. and 4 m. W of Rioz. Pop. 470.

MONTARRON, a town of Spain, in the prov. and 20 m. NNE of Guadalajara.

MONTASTRUC, a village of France, in the dep. of Haute-Garonne, cant. and 6 m. SSE of Salies.—Also a village in the same dep., in the arrond. and 12 m. NE of Toulouse.—Also a village in the dep. of Gers, cant. and 4 m. SSW of Fleurance. Pop. 850.

MONTAT (Le), a town of France, in the dep. of Oise, cant. and 4 m. S of Cahors. Pop. 1,400.

MONTATAIRE, a village of France, in the dep. of Oise, cant. and 2 m. W of Creil, at the confluence of the Therain and Oise. Pop. 1,535. There is a large iron-founding establishment and engine-manufactory, here.

MONTAUBAN, an arrondissement, canton, and town of France, in the dep. of Tarn-et-Garonne. The arrond. comprises 10 cants., and has an area of 159,811 hect. Pop. in 1841, 105,592.—The cant. comprises 4 coms. Pop. 25,581.—The town, which is the cap. of the dep., is situated on the Tarn, in N lat. 44° 1′ 6″, W long. of Paris 0° 59′ 6″, 30 m. N of Toulouse, and 120 m. ESE of Bordeaux, at an alt. of 574 ft. above sea-level. It consists of three parts, of which those called the Old and New town are situated on the r. bank of the Tarn, and communicate with the other part, called the Ville-Bourbon, by a brick bridge of 7 arches, remarkable for the boldness of its construction. The streets of the older part of the town are narrow and ill-paved; but the suburbs present some straight wide streets, and handsome mansions. In the centre of the town is a square surrounded with good buildings, and presenting a double range of arcades adorned with pilasters of the Doric order. The interior of the square forms an agreeable public garden. This square forms likewise the point of junction of eight streets. The view from the elevated public walk called Les Ter-

rasses extends to the surprising distance of 30 leagues, being terminated on the one side by the sea, on the other by the Pyrenees. The principal buildings of the town are the cathedral, which is in the Italian style, the bishop's palace, and a college formerly belonging to the Jesuits. Here are also an astronomical observatory, a society of arts and sciences, and a public library of 12,000 vols. Its celebrated Protestant university, suppressed in 1629, was re-established by Bonaparte in 1810, and has 4 professors of theology. The pop. in 1789 was 23,920; in 1841, 23,561, of whom about one-third are Protestants. —The manufactures of M. consist of silk and hair stuffs, stockings, linen, serge, and other woollen stuffs, also earthenware, starch, leather, and beer. Its trade consists in these and other articles of manufacture, as well as in the corn, wine, and brandy of the neighbouring country.—The origin of this place dates from 1144. In 1572 the inhabitants embraced the Reformation, and fortified the town, which became one of the principal strongholds of the Hugonots in the civil wars. In 1621 it was besieged by Louis XIII. in person, but did not surrender till 1629, when the fortifications were demolished. Under Louis XIV. it was deprived of many valuable citizens, who quitted France during the persecution of the Protestants.—Also a town of France, in the dep. of Ille-et-Vilaine, 5 m. NW of Montfort, near the l. bank of the Garun. Pop. 2,626.—Also a v. in the dep. of Drôme, cant. of Sederon, 18 m. ESE of Nions. Pop. 600.

MONTAUD, a town of France, in the dep. of Ariege, 12 m. NW of Mirepoix.—Also a town in the dep. of Loire, 9 m. S of St. Etienne, on the l. bank of the Furand.

MONTAUDIN, a town of France, in the dep. of Mayenne, on the Futaie, 18 m. WNW of Mayenne. Pop. 1,484.

MONTAUK, or Montuck Point, the E extremity of Long island, in the state of New York, U. S. It has a lighthouse upon it in N lat. 41° 4′ 12″, W long. 71° 51′ 55″.

MONTAUT, or Montault, a town of France, in the dep. of Landes, on the river Adour, 6 m. WSW of St. Sever. Pop. 1,407.—Also a town in the dep. of Gers, cant. and 5 m. NE of Auch. Pop. 1,084.—Also a com. and v. in the dep. of Basses-Pyrenees, cant. of Clarac. Pop. 1,078.

MONTAUT-LE-JEUNE, a town of France, in the dep. of Lot-et-Garonne, cant. and 6 m. SW of Villereal. Pop. 1,270.

MONTAZZOLI, a town of Naples, in Abruzzo-Citra, 18 m. SW of Il-Vasto. Pop. 1,900.

MONTBARD, or Montbart, a town of France, in the dep. of Cote-d'Or, 36 m. NW of Dijon, on the Brenne and the canal of Burgundy. Pop. 2,215. It has manufactures of gloves and woollen stuffs; also some paper-mills, tanneries, and iron works. It was the birthplace of Buffon.

MONTBARREY, a commune and village of France, in the dep. of Jura, 10 m. SE of Dole. Pop. 500.

MONTBAYEY, a commune and village of France, in the dep. of La Charente, cant. and 4 m. NNE of Chalais. Pop. 1,400.

MONTBAZIN, a village of France, in the dep. of Herault, cant. and 7 m. WSW of Meze, on the l. bank of the Veine. Pop. 720.

MONTBAZON, a village of France, in the dep. of Indre-et-Loire, 6 m. S of Tours, on the l. bank of the Indre. Pop. 1,050.

MONTBELET, a village of France, in the dep. of Saone-et-Loire, 11 m. N of Macon.

MONTBELLIARD, a town of France, in the dep. of Doubs, near the river Alan, 15 m. NW of Porentruy, on the Halle and the Luzine. Pop. in 1841, 4,948. It has manufactories of cotton-stuffs, caps, and watches.—The arrond. of M. has an area of 110,323 hect., and comprises 7 cants.

MONTBENOIT, a village of France, in the dep. of Doubs, 9 m. NE of Pontarlier. Pop. 1,000.

MONTBERNENCHON, a village of France, in the dep. of Pas-de-Calais, cant. and 4 m. ENE of Lillers. Pop. 1,060.

MONTBERT, a village of France, in the dep. of Loire-Inferieure, cant. of Aigrefeuille, on the l. bank of the Ognon. Pop. 400.

MONTBEZOT, a village of France, in the dep. of Sarthe, 10 m. N of Le Mans. Pop. 1,117.

MONT-BLANC. See Blanc (Mont).

MONTBLANC, a commune and village of France, in the dep. of Herault, 8 m. ENE of Beziers. Pop. 1,203.

MONTBLANCH, a town of Spain, in the prov. and 30 m. ESE of Lerida, on the r. bank of the Francoli. Pop. 4,000. It has manufactories of coarse cottons and woollens, and some trade in brandy.

MONTBLYART, a village of Belgium, in the prov. of Hainault, cant. and 6 m. S of Beaumont. Pop. 568.

MONTBOISSIER, a village of France, dep. of Puy-de-Dome, 14 m. SE of Issoire.

MONTBOZON, a town of France, in the dep. of Haute-Saone, 15 m. SW of Lure, on the r. bank of the Oignon. Pop. 720.

MONTBRAN, a village of France, in the dep. of Hautes-Alpes, cant. and 6 m. NW of Aspres-les-Veynes. Pop. 500.

MONTBRAY, a village of France, in the dep. of La Manche, cant. and 4 m. SE of Percy. Pop. 1,020.

MONTBREHAIN, a commune and village of France, in the dep. of Aisne, cant. and 4 m. SW of Bohain. Pop. 1,480.

MONTBRISON, an arrondissement, canton, and town of France, in the dep. of La Loire. The arrond., comprising 9 cants., has an area of 193,674 hectares, with a pop. in 1841 of 126,460.—The cant. comprises 20 coms. Pop. in 1841, 17,888.—The town is situated 52 m. WSW of Lyons, on the Vizezy, an affluent of the Lignon, in N lat. 45° 36′, E long. 3° 4′. Pop. in 1789, 4,788; in 1841, 7,054. It is an ill-built town, but has a considerable trade in wool, cattle, and the produce of the surrounding district; and in the vicinity are mineral baths of some repute.

MONTBRON, a canton and town of France, in the dep. of Charente, arrond. of Angouleme. The cant., comprising 14 coms., had a pop. of 12,696 in 1841.—The town is situated near the l. bank of the Tardoire, on a low hill, 18 m. E of Angouleme. Pop. 3,189.

MONTBRONN, a commune and village of France, in the dep. of Moselle, cant. of Rorbach, 9 m. SE of Sarreguemines. Pop. 1,711.

MONTBRUN, a commune and village of France, in the dep. of Haute-Garonne, cant. and 6 m. S of Montesquieu-de-Volvestre. Pop. 1,630.

MONT-CENIS. See Cenis.

MONT-CENIS, a canton and town of France, in the dep. of Saone-et-Loire, arrond. of Autun.—The town, 12 m. SSE of Autun, has a trade in coal which is wrought in the vicinity; and near it are the iron-works of Creuzot. Pop. of town in 1841, 1,508; of cant. 16,772.

MONCHAMPS-LE-GRAND, a village of France, in the dep. of Calvados, cant. and 6 m. NW of Vassy. Pop. 1,050.

MONTCHATON, a village of France, in the dep. of La Manche, cant. and 2 m. NNE of Montmartin. Pop. 900.

MONTCHEMO, a village of France, in the dep.

of La Drome, cant. and 6 m. NNE of Saint-Donat. Pop. 680.

MON-TCHU, a river of Tibet, which rises to the S of Naibudung; runs SE; and joins the Yaru-zangbo-tchu near the defile of Sing-ghian-Khial, after a course of 300 m. Its principal affluent is the Subnak-tchu.

MONTCLERA, a town of France, in the dep. of Lot, cant. and 2 m. SSW of Cazals. Pop. 700.

MONTCONY, a village of France, in the dep. of Saone-et-Loire, cant. and 6 m. NW of Beaurepaire. Pop. 750.

MONTCORBON, a village of France, in the dep. of Loiret, cant. and 7 m. ENE of Chateau-Renard. Pop. 780.

MONTCORNET, a commune and town of France, in the dep. of Aisne, cant. and 6 m. WSW of Rozoy-sur-Serre, near the confluence of the Hurtaut and the Serre. Pop. 1,743. Weaving and hat-making are carried on here; and there are tanneries, breweries, and beet-root sugar manufactories.

MONTCY-NOTRE-DAME, a village of France, in the dep. of Ardennes, cant. and 2 m. NE of Mezieres. Pop. 400. Marble is quarried in the vicinity.

MONT-D'ASTERAC, a village of France, in the dep. of the Gers, cant. and 8 m. S of Masseube, and 17 m. SSE of Mirande. Pop. 350.

MONT-DAUPHIN, a commune and town of France, in the dep. of the Hautes-Alpes, cant. and 1½ m. NW of Guillestre, and 11 m. NNE of Embrun, near the confluence of the Durance and Guil, and at an alt. of 2,953 ft. above sea-level. Pop. in 1841, 669. It stands on a rocky acclivity commanding four valleys, and is well-fortified. In the environs are several thermal springs. This town is sometimes named Mont-Lyon.

MONT-DE-MARSAN, an arrondissement, canton, commune, and town of France, in the dep. of the Landes.—The arrond. comprises an area of 512,529 hect., and contains 12 cants. Pop. in 1831, 91,595; in 1841, 94,145.—The cant. comprises 19 coms. Pop. in 1831, 15,333; in 1841, 16,015.—The town, which is the cap. of the dep., is 69 m. S of Bordeaux, 111 m. WNW of Toulouse, and 420 m. SSW of Paris, at the confluence of the Midon and Douze, which by their junction form the Midouze, in a sandy but well-cultivated plain, in N lat. 43° 53′, W long. 0° 29′. Pop. in 1789, 3,000; in 1821, 3,065; in 1831, 3,774; in 1841, 4,465; in 1846, 4,380. It is generally well-built, and has a good port. The streets are regular, broad, well-kept, and adorned with fountains. The principal buildings are the prefecture, the justiciary-hall, and the bridge across the Midouze. It has also a communal college, a theatre, several fine bathing establishments, barracks, a prison, 2 printing establishments, and in the environs fine promenades; and possesses manufactories of sail-cloth, common cloth, and blankets, and several tanneries and distilleries. The trade consists chiefly in wine, brandy, wool, oil, and turpentine. This town was founded in 1140 by Viscount de Marsan. In 1560 it was taken and pillaged by the Protestants. It was the cap. of the small territory of the same name, in the ancient prov. of Gascogny.

MONTDIDIER, an arrondissement, canton, commune, and town of France, in the dep. of the Somme. The arrond. comprises an area of 91,349 hect., and contains 5 cants. Pop. in 1831, 67,881; in 1841, 70,226. The cant. comprises 33 coms. Pop. in 1831, 13,882; in 1841, 14,222. The town is 23 m. SSE of Amiens, and 27 m. SW of Peronne, on a hill near the r. bank of the Dam, at an alt. of 766 ft. above sea-level. Pop. in 1789, 3,224; in 1841, 3,868. It is ill-built, and, with the exception of the town-house, the belfry of which is remarkable, and a monument to the Count-de-Montdidier in the church of Saint-Pierre, it contains nothing worthy of note. It has manufactories of hosiery, numerous tanneries, a dye-work, an oil-mill, and carries on an active trade in coal, grain, cattle, and poultry. This town, which is very ancient, was formerly fortified, and has sustained several sieges.

MONT-D'OL, a commune of France, in the dep. of the Ille-et-Vilaine, and cant. of Dol, 15 m. ESE of St. Malo. Pop. 1,854.

MONT-DON-LES-BAINS. See Bains-du-Mont-Done.

MONTDOUBLEAU, a canton, commune, and town of France, in the dep. of the Loir-et-Cher, and arrond. of Vendome. The cant. comprises 14 coms. Pop. in 1831, 11,410; in 1841, 11,153. The town is 15 m. NW of Vendome, near the Graisne. Pop. in 1841, 1,671. It has extensive manufactories of serge, and linen and cotton fabrics, several tanneries, and extensive lime, tile, and brick-kilns; and carries on a considerable trade in cloves, dried fruit, iron, &c.

MONTDRAGON. See Mondragon.

MONTE (Rio-del), a river of Spain, in Estremadura, in the prov. of Caceres. It has its source in the mountains of Villuercas, in the Sierra-de-Guadalupe; runs NW; and joins the Tagus, on the l. bank, 6 m. NE of Garrovilles, and after a course of 75 m. It forms in winter a rapid stream, but often becomes dry in summer.

MONTE-ACUTO. See Montacuto and Acuto (Monte).

MONTE-AGUDO, or Monteagudo, a town of Spain, in the prov. and 28 m. SSE of Cuenca, and partido of Canete-y-la-Huergina, 33 m. N of Tarazona, on a hill, near a pyramidal-shaped mountain, on the summit of which are the ruins of a fort. Pop. 312. It has several manufactories of salt.—Also a town in the prov. of Navarra, partido and 6 m. SSW of Tudela, and 39 m. S of Pamplona, on the l. bank of the Queyles. Pop. 630. On an adjacent height is a fine palace.—Also a town in the prov. and 26 m. SSE of Soria, and partido of Medinacele, 8 m. SE of Deza, on a steep mountain, near the l. bank of the Deza. Pop. 765. It has a parish-church, and a custom-house.

MONTE-ALBODO, a town of the Pontifical states, in the deleg. and 26 m. W of Ancona, and 8 m. SSW of Sinigaglia.

MONTE-ALEGRE, a town of Spain, in the prov. of Albacete, and partido of Almansa, 27 m. ESE of Chinchilla, in a narrow valley, commanded by a Moorish castle, now in ruins. Pop. 3,490. It has 3 churches, an hospital, a custom-house, and a school; and possesses manufactories of soap, cloth, flannel, and linen, 2 distilleries of brandy, and 2 potteries. In the environs gypsum and sharping-stone are found in abundance, and in the vicinity is the salt lake of Higuera.—Also a town in the prov. of Valladolid, partido and 7 m. ENE of Medina-de-Rioseco, on a height. Pop. 823. It has 2 parish-churches, and an old castle. It possesses manufactories of common woollen fabrics, and carries on a considerable trade in mules.

MONTE-ALLEGRO, a town of Sicily, in the prov. and district and 17 m. WNW of Girjenti, and 5 m. SW of Cattolica.

MONTE-APERTO, a village of Sicily, in the prov. and district and 2 m. WNW of Girjenti, on a mountain. Pop. 1,000. It is noted as an asylum for criminals and brigands.

MONTE-APPONE, a village of the Pontifical states, in the deleg. and 12 m. S of Macerata.

MONTEAU, a village of France, in the dep. of the Loire, cant. and 1 m. N of Saint Etienne.

MONTEAUX, a village of France, in the dep. of

the Loir-et-Cher, cant. and 8 m. SSW of Hirbault, and 13 m. WSW of Blois. Pop. 480.

MONTE-BAROCCIO, a town of the Pontifical states, in the deleg. and 9 m. SSW of Pesaro, and 12 m. ENE of Urbino. Pop. 1,952.

MONTEBECCARIA. See MONTUBECCARIA.

MONTEBELLO, a group of islands, three in number, in the Indian ocean, near the W coast of Australia, in S lat. 20° 20′, E long. 115° 40′. They are named Hermite, Tremouille, and Lowendaal. A series of reefs and small islands extends from this group towards Barrow's island.

MONTEBELLO, a town of Austrian Lombardy, in the prov. and 9 m. WSW of Vicenza, on the r. bank of the Aldego. Pop. 3,060.—Also a village of the Sardinian states, in the div. and 27 m. ENE of Alessandria, near the r. bank of the Coppo, an affluent of the Po. On the 10th of June 1800, the Austrians under Melas were defeated by the French under Lannes at this place.—Also a town of Naples, in the prov. of Calabria-Ultra-1ma, 10 m. SE of Reggio. Pop. 1,450.

MONTEBELLUNA, or MONTBELLUNA, a town of Austrian Lombardy, in the deleg. and 12 m. WNW of Treviso. Pop. 4,070.

MONTEBOURG, a town and canton of France, in the dep. of La Manche, arrond. of Valognes.—The cant., comprising 22 coms., had a pop. of 11,750 in 1841; the town, 4 m. S of Valognes, of 2,502.

MONTECALVO, a town of Naples, in the prov. of Principato-Ultra, cant. and 4 m. NNE of Ariano. Pop. 4,500.

MONTECARLO, a town of Tuscany, in the prov. and 26 m. WNW of Florence. Pop. in 1839, 2,966.

MONTECAROTTO, a town of the Papal states, in the deleg. and 27 m. WSW of Ancona. Pop. 2,240.

MONTECASCIANO, a town of the Papal states, in the deleg. and 6 m. N of Macerata. Pop. 4,063. There is a house-of-correction here.

MONTECASTELLI, a village of the Sardinian states, in the prov. and 4 m. NE of Alessandria, near the l. bank of the Tanaro. Pop. 1,440.

MONTECASTELLO, a village of the Papal states, in the leg. and 21 m. SSE of Forli.—Also a village in the deleg. and 21 m. S of Perugia.

MONTECATINI, a town of Tuscany, in the prov. and 21 m. WNW of Florence, in the Val-di-Nievole. Pop. in 1839, 1,201. It is celebrated for its hot saline baths, which have been in repute since the 14th cent. A copper-mine is wrought here, which has yielded, until of late, 100,000 lbs. of copper per ann. A curious grotto, 800 ft. long, by 70 ft. in width, and richly incrusted with stalagmites and stalactites of the most varied and fantastic forms, which it must have taken ages to generate, was recently discovered here. The most singular circumstance connected with this grotto is, that its temp. is permanently at 96°, which circumstance, together with the close air, renders it impossible to stay within, unless in a state of nudity; and even then a copious perspiration is unavoidable.—Also a village of Tuscany, in the prov. and 27 m. SE of Pisa.

MONTECCHIO, a town of the Papal states, in the deleg. and 6 m. W of Macerata.—Also a town in the duchy of Modena, 9 m. W of Reggio, near the r. bank of the Lenza. Pop. 2,000.

MONTECCHIO-MAGGIORE, a town of Austrian Lombardy, in the prov. and 16 m. SW of Vicenza. Pop. 4,200.

MONTE-CERIGNONE, a village of the Papal states, in the deleg. of Urbin-et-Pesaro, 15 m. NW of Urbino.

MONTE-CERVOLI, a village of Tuscany, in the prov. and 36 m. SSE of Pisa. The lagunes in the Volterra district near this town furnish about 600,000 lbs. of boracic acid annually. These lagunes are spread over a surface of about 30 m.; but the most productive district is that of Monte Cerboli. Before the boracic lakes were turned to profitable account, their fetid smell, their frightful appearance agitating the earth around them by ceaseless explosions of boiling water, and the great danger to man and beast of being precipitated into them through the thin crust of soil, gave to the whole district a singularly forbidding character.

MONTECH, a canton and town of France, in the dep. of Tarn-et-Garonne, arrond. of Castel-Sarrasin, 6 m. SW of Montauban, on the l. bank of the Mouline, an affluent of the Garonne. Pop. of cant. in 1841, 10,468; of com. 2,574.

MONTECHEROUX, a village of France, in the dep. of Doubs, cant. and 3 m. NNW of Saint Hippolyte. Pop. 806.

MONTECHIARI. See CHIARI.

MONTECHIARO-D'ASTI, a town of the Sardinian states, in the div. and 27 m. W of Alessandria. Pop. 1,900.

MONTECHIARO. See CHIAROMONTE.

MONTE-CHIARUGOLO, a town in the duchy and 9 m. SE of Parma, on the l. bank of the Lenza.

MONTE-CHRISTI, a town of Ecuador, in the dep. and 102 m. NW of Guayaquil, near the coast.—Also a town in the island of Hayti, on a small bay of the same name, 18 m. NNE of Port-de-la-Liberté. It has a good roadstead.

MONTE-CHRISTO, a small island belonging to Tuscany, the *Oglasa* of the ancients, in N lat. 42° 19′, E long. 10° 20′, 14 m. S by E from the SE end of Pianosa. It is very high, though only 2 m. in extent from N to S.

MONTE-CLARA, one of the Canary islands, lying between Graciosa and Allegranza. It is a mere rock, but yields a little pasture for goats, and is noted for its beautiful canary birds.

MONTE-COMPATRI, a town of the Pontifical states, in the comarca and 19 m. ESE of Rome, and 4 m. E of Frescati.

MONTE-CORNO. See GRAN-SASSO-D'ITALIA.

MONTE-CORVINO, a town of Naples, in the prov. of the Principato-Citra, district and 12 m. E of Salerno, and 9 m. WNW of Campagna. Pop. 4,270.

MONTE-COSARO, a town of the Pontifical states, in the delegation and 10 m. E of Macerata, and 24 m. S of Ancona.

MONTE-CUCCOLO, a town of the duchy of Modena, in the district and 27 m. SSW of Modena, and 14 m. NW of Poretta.

MONTE-DEL-BUCHON, a headland of the W coast of New California, 114 m. SE of Monterey, in N lat. 35° 18′, and W long. 120° 30′.

MONTE-DELL'-OLMO, a town of the Pontifical states, in the delegation and 5 m. SSE of Macerata, and 14 m. WNW of Fermo.

MONTE-DI-NOVE, a town of the Pontifical states, in the delegation and 9 m. N of Ascoli, and 17 m. SSW of Fermo.

MONTE-D'OGLIO, a town of the grand-duchy of Tuscany, in the prov. of Florence, vicariat and 3 m. NNE of Anghiari, and 4 m. NW of Borgo-S.-Sepolcro, on the l. bank of the Tiber.

MONTE-D'ORO, a town of Sicily, in the prov. and district and 15 m. W of Caltanisetta, and 5 m. W of Serra-di-Falco, on a mountain.

MONTE-ELPARE, a town of the Pontifical states, in the delegation and 13 m. N of Ascoli, and 14 m. SW of Fermo.

MONTE-FALCIONE, a town of Naples, in the prov. of the Principato-Ultra, district and 6 m. NE

of Avellino, cant. and 5 m. SSW of Monte-Miletto. Pop. 4,000.

MONTE-FALCO, a town of the Pontifical states, in the delegation and 21 m. SE of Perouse, and 13 m. NNW of Spolète. Pop. 3,398.

MONTE-FALCONE, a village of the Pontifical states, in the delegation and 12 m. NW of Ascoli. —Also a town of Naples, in the prov. of Sannio, district and 14 m. WNW of Larino, and 21 m. N of Campobasso. Pop. 2,500.

MONTE-FANO, a town of the Pontifical states, in the deleg. and 17 m. SSW of Ancona, and 9 m. N of Macerata. Pop. 3,372.

MONTEFEGATESI, a village in the N part of the duchy of Lucca. Lead and jasper are wrought in the vicinity.

MONTE-FERRATO. See MONTFERRAT.

MONTEFESTINO, a town in the duchy and district and 18 m. SSW of Modena.

MONTEFIASCONE, an ancient town of the Pontifical states, in the deleg. and 11 m. NNW of Viterbo, and 54 m. NNW of Rome, on the W branch of the Tuscan Apennines, and near the E bank of the lake of Bolsena. Pop. 5,288. It is ill-built, and, with the exception of its cathedral, an early work of Sanmichell, and a few convents, it contains no buildings worthy of note. The environs are noted for their wine, a species of sweet muscat.

MONTEFIK, a tribe of Arabs who inhabit the pash. of Bassora in Turkey in Asia, to the S of the Euphrates and of the Shat-el-Arab. The sheik of this tribe is said to be able to put under arms 4,000 mounted men. It originally consisted of two principal stocks,—the Ajwad, and the Ben-i-Malek, who are both deducible from a very ancient tribe called Zahtan. They are in possession of the finest and most fertile tracts of the country, and have begun to congregate near the rivers, and even to plant groves of date-trees, yet few of them will condescend to become *fellahs* or operatives. Among the conditions of tenure by which they hold possession of the Shamieh or W bank of the Euphrates, is their maintaining the *suds* or dykes from Semava down to Bassorah, on both sides.

MONTE-FILATRANO, a town of the Pontifical states, in the deleg. and 17 m. SW of Ancona, and 12 m. NNW of Macerata.

MONTE-FILIPPO, a fortified town of the grand-duchy of Tuscany, in the prov. and 69 m. S of Sienna, podesteria and 3 m. SE of Orbitello, on a small bay of the Tyrrhenian sea.

MONTE-FIORE, a village of the Pontifical states, in the deleg. and 9 m. S of Fermo.

MONTE-FIORINO, a town of the duchy and district and 21 m. SW of Modena, and 18 m. S of Reggio, on the r. bank of the Dolo.

MONTE-FOLLONICA, a town of the grand-duchy of Tuscany, in the prov. and 30 m. ESE of Sienna, capitanate and 6 m. SW of Asinalunga. Pop. 600. It has 2 churches, a convent, and a glass-work.

MONTE-FORTE, a town of Austria, in Lombardy, in the prov. and 14 m. E of Verona, district and 1½ m. N of S. Bonifacio, on the r. bank of the Alpon. Pop. 1,672.—Also a town of Naples, in the prov. of the Principato-Ultra, district and 5 m. WSW of Avellino. Pop. 3,500. It has 2 churches and a glass-work.

MONTE-FORTINO, a town of the Pontifical states, in the deleg. and 27 m. WNW of Frosinone, and 8 m. S of Palestrina.

MONTE-FOSCOLI, or MONTE-FUSCO, a town of Naples, in the Principato-Ultra, 7 m. SSE of Benevento. Pop. 2,200. It has manufactories of woollen stuffs. There is a large prison here, in which political offenders are confined. Its galleys or cells are 50 palmi, or nearly 25 ft. beneath the square of San-Giovanni, and beneath the public sewer.

MONTE-FRIO, a town of Spain, in the prov. and 21 m. WNW of Grenada.

MONTEGALDO, a town of Austrian Lombardy, in the prov. of Padua, on the Bacchiglione, 7 m. NW of Padua.

MONTE-GARDO, a mountain of the island of San Nicolas, in the Cape-de-Verde group, which rises to the height of 4,380 ft. above sea-level. Its ascent is regular and even on all sides; and it is well-clothed with vegetation even to the summit. The *Euphorbium balsamifera* reaches an elevation of 3,700 ft. upon it. It is thickly covered with volcanic soil. At its foot lies the v. of Ribeira-de-Calhao.

MONTE-GEORGIO, a town of the Papal states, in the deleg. and 12 m. S of Macerata.

MONTE-GIORDANO, a town of Naples, in the prov. of Calabria-Citra, 4 m. SSW of Rocca-Imperiale, and within 4 m. of the coast of the gulf of Taranto. It rises from the base of a conical hill, which it covers to the summit.

MONTEGLIO, a town of Piedmont, in the prov. of Asti, 20 m. W by N of Turin.

MONTEGO BAY, a bay on the NW coast of the island of Jamaica, having its N point in N lat. 18° 31′, W long. 77° 59′. It gives name to a port of the island, made a legal port in 1758, and now a flourishing town with a pop. of 4,000, 17 m. W of Falmouth.

MONTEGNE'E, a canton and village of Belgium, in the prov. of Liege, dep. of Grace-Montegnée. Pop. 1,905.

MONTEGO KEY, a small island in the bay of Honduras, near the coast of Mexico, in N lat. 17° 50′, W long. 88° 48′.

MONTE-GORDO, a decayed village of Portugal, in the prov. of Algarva, at the mouth of the Guadiana.

MONTEGRANARO, a town of the Papal states, in the deleg. and 9 m. ESE of Macerata.

MONTE-GRANDE, a town of Piedmont, prov. of Biella, on the small river Vionna. It has manufactures of linen and cotton.

MONTE-GROSSO-D'ASTI, a town of Piedmont, in the prov. of Asti, on the Tion. Pop. 2,600.

MONTE-GUASCO, or MONTE-CIRIACO, a promontory on the E coast of Italy, in the States of the Church, stretching out into the Adriatic, near Ancona.

MONTEGUT-SUR-CHAMPEIX, a town of France, in the dep. of Puy-de-Dome, 6 m. S of Clermont.

MONTE-HERMOSO, a town of Spain, in the prov. and 32 m. N of Caceres. Pop. 2,860.

MONTEILS, a village of France, in the dep. of Aveyron, cant. of Najac. Pop. 800.

MONTEITH, MONTEATH, or MENTEITH, a district occupying the SW part of Perthshire. Excepting Balquidder, which anciently belonged to the stewartry of Strathern, the district of M. comprehends all the lands W of the Ochils in Perthshire, whose waters discharge themselves into the Forth. The vale of the Teith, whence the name is derived, occupies the central and larger part, but is flanked on the one side by the Perthshire section of the upper vale of the Forth, and on the other side by the lower part of the vale of the Allan. The entire district is about 28 m. in length from E to W, and 15 m. in extreme breadth. It anciently gave the title of earl to a branch of the noble family of Graham. The earldom was created in 1428; became conjoined with the earldom of Airth; and since 1694 has been dormant.

MONTEITH (LOCH OF), a fine sheet of water in the parish of Port-of-Monteith, Perthshire. It is of a circular form, and about 7 m. in circumf. It contains three islands, two of which, from the noble wood that adorns them, add greatly to the beauty of its

expanse; a long, narrow, wooded promontory, which runs far into the water, diversifies the S shore. The larger island is called Inchmahome or Inchmahoma.

MONTEITH (Port of), a parish in the district of Monteith, Perthshire. Area about 32 sq. m. The lochs of Monteith and Vennachoir give great brilliance to its landscape. The N district, comprising about one-third of the whole area, is wildly upland. The SE corner comprises a part of Flanders moss. Pop. in 1801, 1,569; in 1831, 1,664; in 1841, 1,446.

MONTEJAQUE, a village of Spain, in the prov. of Malaga, 4 m. W of Ronda, near the Guadiaro. Pop. 1,360. It is inhabited by "a horde of half-tamed Saracens," who foiled all the attempts of the French to make themselves masters of the place in 1810.

MONTEJICAR, a town of Spain, in the prov. and 43 m. ENE of Grenada. Pop. 2,400.

MONTEJO, a town of Spain, in the prov. and 45 m. NE of Segovia.

MONTELANICO, a town of the Papal states, in the deleg. and 18 m. W of Frosinone.

MONTELEONE, a town of Naples, in Calabria-Ultra-2da, near the gulf of Santa-Eufemia, 12 m. NNE of Nicotera. Pop. 10,000. It is placed in an airy commanding situation, which, with its fine old castle, gives it an imposing aspect from without; its streets however are narrow and crooked, and its houses low and mostly of wood. Lofty mountains covered with forests rise close to the town, and protect it from N winds. It was almost entirely overthrown by the great earthquake of 1783. It has manufactories of silk produced in the neighbouring country; and its local position between the two richest plains in the kingdom, and at no great distance from the sea, confers a certain degree of prosperity and importance upon it. Its situation is supposed to be the same with that of the ancient *Hipponium* or *Vibona*.—Also a town in the Capitanata, 6 m. SW of Bovino. Pop. 2,500.

MONTELEONE, a village of the Papal states, in the deleg. and 12 m. SW of Fermo.—Also a v. in the leg. and 18 m. SE of Forli.—Also a v. in the deleg. and 12 m. SE of Spoleto.—Also a v. in the deleg. and 38 m. N of Viterbo.

MONTE-LERNO, or Monte-Lerno-de-Paltada, a mountain-ridge in the N part of the island of Sardinia, in N lat. 39° 40′, about 7 m. NE of Ozieri. It divides the head-streams of the Coguinas flowing NNW, from those of the Tirso flowing SSW. Its craggy summit attains an alt. of 3,586 ft. above sea-level. It is finely clothed with wood, and forms a rich preserve to the sportsman, full of deer, muffloni, boars, quails, partridges, and woodcocks.

MONTELIMART, an arrondissement, canton, and town of France, in the dep. of Drome.—The arrond. comprises 5 cants., and has an area of 113,167 hect. Pop. in 1841, 65,689.—The cant. comprises 11 com. Pop. 14,841.—The town is beautifully situated at the junction of the two small rivers Jabron and Roubion, on the l. side of the Rhone, 26 m. S of Valence, on the railway from Lyons to Aveyron. It is built in the form of a crescent, whose extremities, turned towards the E, are closed by an eminence and a citadel which overlooks and commands the town. Pop. in 1821, 7,161; in 1841, 8,245. It has manufactories of silk, woollen, cotton, and leather. The environs are beautiful, and fertile in wine and silk. The Reformed religion was early introduced here, and it still contains many Protestant families.

MONTE-LINAS, a mountain in the SW part of the island of Sardinia, in N lat. 39° 25′, 12 m. E of Cape-Pecora. Alt. 4,092 ft. above sea-level.

MONTELLA, a town of Naples, in the prov. of Principato-Ultra, 9 m. ESE of Avellino. Pop. 5,800. It was the birthplace of Bartoli, a physician, commonly considered the inventor of the thermometer.

MONTELLANO, a town of Spain, in the prov. and 30 m. SW of Seville. Pop. 3,900.

MONTELLIER, a town of France, in the dep. of Drome, 6 m. E of Valence. Pop. 1,373.

MONTELUPO, a town of Tuscany, on the Arno, 11 m. WSW of Florence. Its chief manufacture is of large vases and urns for the decoration of gardens.

MONTE-LUPONE, a town of the Papal states, in the deleg. and 4 m. NNE of Macerata. Pop. 4,000.

MONTELOVEZ. See Monclova.

MONTE-MAGGIORE, a town of Sicily, on the great road from Palermo to Catania, in the Val-di-Mazzara, 25 m. SE of Palermo. Pop. 4,000.

MONTEMAGNO, a town of the Sardinian states, 14 m. S of Casale. Pop. 2,200.

MONTEMAGRE, a village of Lombardy, in the prov. and 15 m. NW of Vicenza. Pop. 750.

MONTEMARANO, a town of Naples, in the Principato-Ultra, 40 m. E of Naples. Pop. 1,800.

MONTE-MAYOR, a town of Spain, in the prov. of Salamanca, 38 m. SE of Ciudad-Rodrigo, on the r. bank of the Cuerpo-de-Hombre.

MONTEMBŒUF, a canton and town of France, in the dep. of Charente, 18 m. SSW of Confolens. Pop. 1,237.

MONTEMIGLIANO, or Montmelian, a small town of the Sardinian states, in Savoy, on the Isere, 22 m. NE of Grenoble.

MONTEMILETTO, a town of Naples, in the Principato-Ultra, 12 m. SE of Benevento. Pop. 3,000.

MONTE-MILONE, a town of the Papal states, 5 m. WSW of Macerata. Pop. 4,684.—Also a town of Naples, in the prov. of Basilicato, 9 m. N of Paluzzo. Pop. 1,400.

MONTEMOLIN, a town of Spain, in the prov. and 60 m. SW of Badajoz.

MONTE-MONACO, a town of the Papal states, in the deleg. and 12 m. WNW of Ascoli.

MONTEMOR, a town of Brazil, in the prov. of Parahiba, near the l. bank of the Mamanguape, and 6 m. from the coast.

MONTEMOR-NOVO, a town of Brazil, in the prov. of Ceara, 68 m. S of Fortaleza.

MONTEMOR-O-NOVO, a town of Portugal, in the prov. of Alemtejo, on the river Canha, 55 m. E of Lisbon. Pop. 2,945.

MONTEMOR-O-VELHO, a walled town of Portugal, in the prov. of Beira, on the Mondego, 108 m. N by E of Lisbon. Pop. 2,525.

MONTEMURIO, a town of Naples, in the prov. of Basilicato, 27 m. S of Potenza. Pop. 5,000.

MONTEMURLO, a town of Tuscany, 12 m. NNW of Florence.

MONTENACH. See Montagny.

MONTENAY, a town of France, in the dep. of Mayenne, 10 m. W of Mayenne. Pop. 2,693.

MONTENDRE, a town of France, in the dep. of Charente-Inferieure, 12 m. S of Jonzac. Pop. 1,023.

MONTENEGRO, [Turkish, *Kara-dagh;* Illyrian, *Zerna-gora,*] a district of Western Turkey, between the parallels of 42° 5′ and 42° 55′ N, so called from the mountains clothed with dark pine-forests which cover the greater part of its surface. It is an elevated plateau, separated by a narrow strip of territory from the Adriatic, and bounded on the NW and N by the Bosnian Herzegovina, and the sanj. of Novibazar; on the E and S by the Albanian pash. of Scutari; and on the SW by the Austrian frontier of Dalmatia at the Bocca-di-Cattaro. Its E border is only from 1 to 3 m. distant from the W banks of the Moratsha, and its tributary the Zenta. Its most elevated part lies to the N of the lake of Scutari, between the parallels of 42° 10′ and 42° 40′.

Its declivity towards the sea and the bays of Cattaro and Traste is very steep, and its mountains, at a short distance from the sea, attain an alt. of upwards of 1,000 ft. The interior is elevated probably 2,000 ft. above sea-level. Its surface is divided by short ridges running in every direction, and forming valleys rarely more than 3 or 4 m. long, or more than 1 m. wide. The highest summits in the interior, taking them in succession from N to S, are Pusti-Lissaz, Stavor, Doberstik, Zeklinsta, and Virayl. A few inconsiderable streams issue from its eastern gorges, and join the Zenta, the Moratsha, and the lake of Scutari. It does not exceed 50 m. in length, by 30 m. in breadth; and contains between 200 and 300 villages, the largest of which, however, has not a pop. exceeding 1,200. These villages are principally situated in hollows and on the slopes of mountains; none of them are fortified, and few of them can be said to have any streets; the houses are not unfrequently so scattered and distant from each other, that they appear rather to be farm-houses or hamlets than the component parts of one village. [*Wilkinson.*] The country is ill-adapted for agricultural purposes, wild, and destitute of roads, without either fertile plains, or access to the sea. The woods are mostly composed of oak and beech. The places which are not clothed with wood are covered with a thick turf, thickly interspersed with aromatic plants. The climate is rude, and the soil rocky. Indian corn and potatoes are grown, but the inhabitants live principally on the produce of their flocks. Their manufacturing industry is limited to the production of coarse cloth and linen, with which each household supplies itself, and the repairing of guns, swords, and pistols. Timber, sheep, goats, cattle, mutton-hams, tallow, bees'-wax, sumach, charcoal, silk in cocoons, poultry, and cheese, form its only exports; and its principal commerce is with Cattaro and Badua.—Niegush or Niegussi is called the only town in M.; but the palace of the Vladika is at Cettigne or Zettinie, which is merely a fortified convent.

Inhabitants.] The inhabitants of this region, called by the Italians Montenegrini, and in their own language Zernagorzi, [*i. e.* 'Black mountaineers,'] are a mixed race of Slaves and Slavonians, in number about 100,000. They are armed shepherds, living with their flocks, but ever ready for plunder, and delighting in war. M. Broniewski, a Russian naval officer, who travelled in M., thus describes them: "A Montenegrin is always armed, and carries about, during his most peaceful occupation, a rifle, pistols, a yatagan, and a cartouch-box. They spend their leisure time in firing at a target, and are accustomed to this exercise from their boyish years. Inured to hardships and privations, they perform without fatigue very long and forced marches, climb the steepest rocks with facility, and bear with patience, hunger, thirst, and every kind of privation. Inhabiting mountains which present at every step passes where a handful of brave men may arrest the progress of an army, they are not afraid of a surprise, particularly as they have on their frontier a constant guard; and the whole of their force may be collected within twenty-four hours upon the threatened point. When the country is in danger, the Montenegrins forget all personal feelings of private advantage and enmity, obey the orders of their chief, and consider it a happiness and a special grace of God to die in battle. It is in such a case that they appear as real warriors; but beyond the limits of their country they are savage barbarians. They cut off the heads of those enemies whom they take with arms in their hands, and spare only those who surrender before battle. A Montenegrin himself never craves for mercy; and when one of them is severely wounded, and it is impossible to save him from the enemy, his own comrades cut off his head. Like the Circassians, they are constantly making forays in small parties, for the plunder of cattle, and consider such expeditions as feats of chivalry. Arms, a small loaf of bread, a cheese, some garlic, a little brandy, an old garment, and two pair of sandals made of raw hide, form all the equipage of the Montenegrins. In rainy weather the Montenegrin wraps his head with the *strooka*, lies down on the ground, and sleeps very comfortably. Their usual manner of fighting is as follows:—If they are in great force, they conceal themselves in ravines, and send out only a small number of shooters, who, by retreating, lead the enemy into the ambush; here, after having surrounded him, they attack him, usually preferring on such occasions swords to fire-arms. When their numbers are inferior, they choose some advantageous position on high rocks. Their attacks are mostly made during the night, because their principal system is surprise. However small their force may be, they always try to wear out the enemy by constantly harassing him. The best French *voltigeurs*, on the advanced posts, were always destroyed by them; and the enemy's generals found it more advantageous to remain under the cover of their cannon. Their tactics are confined to being skilful marksmen. A stone, a hole, a tree, offer them a cover from the enemy. Firing usually in a prostrate position on the ground, they are not easily hit, whilst their rapid and sure shots carry destruction into the closed ranks of a regular army. They have, besides, a very practised eye for judging of distance; thoroughly understand how to take advantage of the ground; and are so cautious, that the most skilful manœuvres cannot deceive them. They cannot withstand regular troops beyond the mountains; because, destroying every thing with fire and sword, they cannot long keep the field. During the siege of Ragusa, it was never possible to know how many of them were actually under arms, because they were constantly going to their homes with spoil, whilst others would join the army in their places, and after a few days of indefatigable exertion return to the mountains to carry away some insignificant trifle. In one respect they have a great advantage over regular troops, by their skill in mountain warfare, although they are completely ignorant of the military art. In the first place they are very lightly dressed, are exceedingly good marksmen, and reload with much more rapidity than regular soldiers. The Montenegrins dispersed, and deliberately firing from a lying position on the closed rank of the enemy, are not afraid to attack columns composed of 1,000 men, with numbers not exceeding 100 or 150. In a pitched battle their movements can be ascertained only by the direction of their standards. They have certain signal-cries, which are uttered when they are to join in a compact body for attacking the weaker points of the enemy. As soon as such a signal is given, they rush furiously onwards, break into the squares, and, at all events, create great disorder in the enemy's ranks. The Russian commander-in-chief had much difficulty in persuading them not to cut off the heads of their prisoners. He finally succeeded, not only in this (chiefly by paying them a ducat for every prisoner), but, what was more difficult, in persuading them, with the assistance of the Vladika, to embark for an expedition on board ship; a thing which they had never done before. Notwithstanding that they were treated with the greatest kindness, they proved very troublesome guests."—The language of the Montenegrins is a dialect of the Servian, and is considered the nearest of all the Slavonian dialects to the original Slavonic tongue into which the Scriptures were translated in the 9th cent. Reading and writing is considered amongst them a high degree of learning.

Government.] The Montenegrins are governed by a *Vladika* or prince-bishop, who until the accession of the present chief combined in his person the episcopal dignity also, and seemed to support his temporal power mainly on his ecclesiastical authority. He was styled 'Monsignore,' or 'Eminenza;' and in official documents 'Metropolitan of Skenderia' or Scutari. This dignity has been hereditary in the Petrovitsch family for at least a century and a half. The present Vladika succeeded, at the age of 18, to his uncle's functions and authority, in October 1830; and in 1831 he created a senate of 16 principal chiefs, which was henceforth not only a council of deliberation but also the supreme court of justice, and an inferior tribunal of 135 for the decision of minor affairs. He also organized a small revenue, which with an annual subsidy of 40,000 florins = £4,000, received from Russia, not only covers all the expenses of state and the tribute due to the Porte, but enables the Vladika to exercise considerable influence over the other leading families. The country is divided into 4 *nahias* or districts, each of which is under a military governor; and each district is subdivided into communes. These nahias are called Katunska, Rietshka, Zermnitshka, and Lieshanska. Each village elects its *glavar* or headman. That the Porte has not hitherto been able to enforce its claim to sovereign power in M. does not admit of denial, but no historical notice, no state-document, warrants the assertion that M. is *de jure* independent of Turkey. In 1688, M. placed itself under the protection of the Venetian republic; but by the treaty of Passarowitz (1718) it again became subject to the Porte. In 1791 it still formed part of the Turkish empire; for by the treaty of peace concluded in that year at Sistowa between Austria and the Porte, it was expressly stipulated that none of the inhabitants of M. should be "disquieted, molested, or punished for having declared against their proper sovereign." In

1796 the Montenegrins waged a successful war against the Porte, and in the same year they *de facto* proclaimed their independence by placing themselves under the protection of Russia, from which Power, as all writers on the subject agree, "they received considerable sums under the form of a contribution towards the proper maintenance of the national church." It is notorious that this contribution has ever since been regularly paid by Russia. "But the truth is, that although the inhabitants of M. are scarcely known beyond the line of their own fastnesses, and are still living in a condition of barbarism that has probably undergone no sensible alteration for three or four hundred years, they are the occupants of a natural citadel which has long attracted the attention of some of the chief Powers of Europe. It is scarcely possible to exaggerate the importance which the Russian cabinet has avowedly attached for nearly a century to the species of protectorate she has exercised over the Montenegrins. The chief families of the mountain have been educated in St. Petersburg, and appointed to grades in the Russian army. The religion and rude literary instruction of the people is entirely Russian in its form. The tribute due from the district to the Porte has been long paid by a remittance from the emperor. A series of patents from the Russian emperors beginning with Peter the Great, to the Vladikas of M., and a variety of Russian ornaments, the only wealth of this simple people, are preserved with religious veneration in the monastery at Cettinye [Cettigne]; and nothing can exceed the enthusiasm and veneration inspired in these mountaineers by the very name or image of a Russian sovereign. It was for the maintenance of his relations with this people that the emperor Alexander disavowed his plenipotentiary Oubril in 1806, and refused to ratify a treaty of peace with France which had surrendered the Bocca-di-Cattaro to the kingdom of Illyria; and, in conjunction with the Montenegrins, the Russian forces shortly afterwards attacked Marshal Marmont and the French in the position of Ragusa, from which that officer took his title. The motive of this connection is twofold. The relations of M. with the court of Russia have become traditional, after nearly a century of benefits conferred by the greater Power on the less; and a momentary inspection of the geographical position of M. explains the interest felt towards it at St. Petersburg. The independence of the Montenegrins is admitted to be due mainly to the inaccessible aspect of their country; but they are within reach of the finest harbour on the Adriatic or the Illyrian coast, and, in the hands of a great Christian Power, the natural advantages of that position over the adjacent territory could not fail to make their importance felt in the future revolutions of Eastern and of Southern Europe. This state of things is equally distasteful to the Porte and to the Austrians. The Bocca-di-Cattaro and the whole Ragusan territory (with two small exceptions) are now part of the Austrian dominions; but the Montenegrin territory is a wedge commanding to a great extent this country, and especially formidable in the hands of an adversary. The Turks have retained, it appears, two small points upon the coast, which were ceded to them by the treaties of Carlowitz and of Passarowitz, as if for the purpose of isolating what was then the territory of the seignory of Ragusa from the Venetian frontier. In 1806 Ragusa lost her independence, and in 1815 the former possessions of Venice on that coast were definitively annexed to Austria; but, singularly enough, these tongues of land to the N and to the S of Ragusa,—known by the names of the Leck and the Sutorina,—are still held by the Turks; even though an Austrian military road [leading from Castelnuovo towards Ragusa] crosses one of them." [*Times.*] The present ruler of M., on succeeding to his uncle, refused to accept the spiritual power with the temporal, which had been until that time united with it. His motive in this appears to have been to escape from the obstacles to an energetic ruler desirous of founding a family which the canon of the Greek church enforcing celibacy on its bishops presents.

History.] In the latter half of the 15th cent., Ivan Czernojevich, leaving his paternal mountains near the lake of Scutari, fixed himself, with a few followers, in the fastnesses of M. Of his two grandsons, one embraced Islamism, the other, professing the Greek religion, governed M. under the protectorate of Venice. Soliman the Magnificent subdued the hardy Montenegrins. In 1623, Suleiman Pasha, of Scutari, in spite of a most desperate resistance, took possession of Cettigne, and long afterwards the Montenegrins paid *haratsch* or capitation tax to the Turks. In 1700 the Vladika Daniel induced his countrymen to put the Mahommedans to death, and accordingly "one Christmas-eve all were killed, excepting a few who embraced Christianity." In 1712, in order to obtain the protection of Russia, they declared themselves the subjects of Peter the Great, who received their oath of allegiance. In 1714, the Turks, under Duman Pasha Kjuprelich, again took Cettigne, and a fearful massacre occurred: 2,000 Montenegrins were also led away as slaves. In 1767 "the Turks and Venetians determined to extirpate" the restless Montenegrins, but they failed in the attempt to reach Cettigne. In 1785 Mahmud Pasha, of Scutari, penetrated into the very heart of the land, plundering and destroying many villages. After laying several tribes under contribution, he evacuated M., "as an army cannot find sustenance in such a poor country." In 1796 Mahmud undertook a second expedition against M., but was defeated, and lost his head. In 1799, when the united forces of Russia and Turkey took the Ionian islands from the French, the Russians sent a political agent into M., who succeeded in engaging their active hostilities against the French. It does not appear, however, that they took any part in the Russo-Turkish war in 1828-29. In the year 1832 Reshid Pasha, after he had subdued Albania and Bosnia, talked of reducing M. to obedience, but he subsequently gave up the idea. In 1852 the young prince of M., at the head of 2,000 men, attacked and carried by a *coup-de-main* the fortress of Zablijak, at the head of the lake of Scutari. The Turkish government thereupon determined not only to meet these aggressions, but to attempt the complete subjugation of M.; and a force of 50,000 men under Omer Pasha was ordered to advance against M. by land; while the Capudan Pasha should blockade the Montenegrins by sea. The British and French governments advised Turkey, without departing from her *de jure* title to the sovereignty of M., to respect the *quasi* independence which that territory had hitherto preserved; but the invasion of M. gave Austria an opportunity of complaining that a large force had been assembled on her frontiers without due notice given her, and of demanding by her envoy the instant evacuation of that province by the Turks, and the re-establishment of the *status quo ante bellum*, both of which points were conceded. The important question concerning the territories of Kleck and Sutorina, the only points of land where Turkish Herzegovina touches the Adriatic, was also concluded entirely in favour of Austria. It is true these places are not ceded to the latter Power, but they are not to be in any way made use of by Turkey; the *mare clausum* is to be observed, and no Turkish vessels to approach them. Austrian consulates are to be established in Bosnia, Servia, Herzegovina, and other parts of Romelia; and indemnities for several real or imaginary grievances towards Austrian subjects, amounting to a large sum of money, were also demanded and obtained on this occasion. A Russian note demanding the evacuation of M. arrived just when that evacuation had been accorded to Austria. If the Turks had refused to yield to the demands of Vienna, General Leiningen, its envoy, had instructions to stay at Cattaro, and to order the advance of Austrian troops into M. At the same time Austrian troops, already concentrated on the frontier, would have invaded Bosnia and called to arms all the Christian population of Turkey in Europe.

MONTENEGRO, a town of Spain, in Old Castile, in the prov., partido, and 23 m. ENE of Soria, and 5 m. NNW of Obega, in a mountainous locality. Pop. 619. It has a parish-church, a custom-house, and a public granary. The manufacture of common woollen fabrics, and the rearing of cattle, form the chief branches of local industry.

MONTENERO, a town of Naples, in the prov. of Sannio, district and 14 m. NNW of Larino, cant. and 6 m. N of Palata. Pop. 2,500.

MONTENEUF, a commune of France, in the dep. of Morbihan, and cant. of Guer, 12 m. ESE of Ploërmel. Pop. 1,043.

MONTENOISON, a town of France, in the dep. of the Nièvre, cant. and 5 m. ENE of Prémery, and

29 m. ESE of Cone, on a mountain of the same name, which rises to the height of 560 yds. above sea-level, and on the summit of which are the remains of a fortress. Pop. 706.

MONTENOTTE, a village of Sardinia, in the div. and 26 m. W of Genoa, prov. and 9 m. N of Savona, on the E side of a summit of the Apennines of the same name. It is divided into an upper and lower village. It is noted for a victory over the Austrians by the French in 1796; and was constituted the cap. of a French dep. of the same name.

MONTE-NUOVO, a town of the Pontifical states, in the delegation and 26 m. W of Ancona, and 12 m. SW of Sinigaglia. Pop. 2,749.

MONTE-ODORIBIO, a town of Naples, in the prov. of Abruzzo-Citra, district and 4 m. WSW of Il-Vasto. Pop. 1,200.

MONTE-ORTONE, a hamlet of Austria, in Lombardy, in the prov. and dist. and 8 m. SW of Padua, in the Euganean mountains. It has a mineral spring.

MONTE-OTTONE, a village of the Pontifical states, in the deleg. and 9 m. SW of Fermo.

MONTE-PEGANO, a town of Naples, in the prov. of Abruzzo-Ultra, district and 17 m. E of Teramo, cant. and 5 m. E of Noteresco. Pop. 2,000.

MONTE-PELOSO, a walled town of Naples, in the prov. of Basilicata, district and 23 m. WNW of Matera, and 26 m. ENE of Potenza. Pop. 3,100.

MONTE-PENNECCHIO, a mountain of the Papal states, lying between Licenza and Moricone, and united with the range of Monte-Genaro. It reaches an alt. of 4,000 ft. above sea-level.

MONTEPIANO. See MONPIANO.

MONTEPORZIO, a village of the Pontifical states, in the deleg. and 18 m. S of Pesaro, and 9 m. W of Sinigaglia. Pop. 1,000. It is finely situated on a hill nearly detached from the Tusculan range.

MONTE-PULCIANO, a town of the grand-duchy of Tuscany, capital of a communita, in the comp. and 27 m. SSW of Arezzo, and 54 m. SE of Florence. Pop. in 1839, 2,814. It stands on a mountain, is enclosed by an embattled wall, and contains several churches and convents, a college, a seminary, and an hospital. It has manufactories of fine china and of soap, several oil-mills and tallow-works. The wine of the surrounding district is reputed the best in the duchy.—Also a lake on the confines of the grand-duchy of Tuscany and of the Pontifical states, 9 m. E of Monte-Pulciano, and 8 m. W of the lake of Perugia. It is 6 m. in length from N to S, 2 m. across its widest part, and averages about 100 ft. in depth. It is intersected by the Chiana-Toscana, which flows to the Arno.

MONTERADO. See MONTRADOC.

MONTERBLANC, a village of France, in the dep. of Morbihan, cant. and 5 m. W of Elven, and 8 m. NE of Vannes. Pop. 850.

MONTE-REALE, a town of Naples, in the prov. of Abruzzo-Ultra, district and 15 m. NNW of Aquila, and 18 m. ENE of Civita-Ducale. Pop. 5,600.

MONTEREAU, a village of France, in the dep. of the Loiret, cant. and 8 m. NNE of Ouzouer-sur-Loire, and 14 m. NNW of Gien. Pop. 1,048.

MONTEREAU, or MONTEREAU-FAUT-YONNE, a canton, commune, and town of France, in the dep. of the Seine-et-Marne, and arrond. of Fontainebleau. The cant. comprises 14 com. Pop. in 1831, 10,400; in 1841, 11,017.—The town is 13 m. E of Fontainebleau, and 18 m. SE of Melun, at the confluence of the Seine and Yonne, each of which rivers is here crossed by a stone bridge. Pop. in 1841, 4,450. It is divided by the above-named rivers into 3 parts, the principal of which is on the l. bank of the Yonne. That to the r. of the Seine rises on the slope of a hill. It is well-built, and contains a fine Gothic church, a town-house of modern structure, and an hospital. It has extensive manufactories of china, pottery, pipes, paving and common tiles, roman-cement, and of hosiery, and several tanneries, and carries on an active trade in grain, flour, and faggots. In the environs are extensive quarries of potters' clay. The bridge across the Yonne is noted as the scene of the assassination of the duke of Burgundy in 1419. In 1437 it was taken and sacked by Charles VII.; and in 1814 Napoleon defeated the allied forces of Austria and Russia under its walls. The Paris and Lyons railroad passes this town; and the Troyes branch here leaves that line, and follows the valley of the Seine.

MONTERET, a village of France, in the dep. of the Saone-et-Loire, 8 m. WNW of Louhans. Pop. 1,500.

MONTEREY, or SAN-CARLOS-DE-MONTEREY, the capital, under Mexican rule, of New California, in S lat. 36° 36′ 24″, W long. 121° 51′ 46″ [*Beechey*], situated upon a broad gentle slope of land between the coast and a range of hills covered with woods of pine and oak, in the S corner of a large indentation of the coast, and about 2 m. from Point-Pinos, which the American surveyors place in N lat. 36° 37′ 59″, W long. 121° 54′ 25″. The hills in the rear of the town increase in height as they run to the SE, till they are merged in the high mountains of the coast-range. The N point of the bay curves so far to the W, that the Pacific is not visible from any part of the town. Towards the E, a high rocky ridge called the Toro mountains is a prominent object. In 1846 M. was described as "a straggling village built of stone and whitewashed, with red-tiled roofs to most of the houses." Its pop. in 1836 did not exceed 500, of whom 15 or 20 were Americans engaged in exchanging European goods for hides and tallow. Its fort, previous to its capture by the Americans, was of little value. It had been taken by a small party of seamen, who landed from a Buenos Ayrean pirate vessel in 1819, destroyed the greater part of the guns, and pillaged and burnt the town. In 1836 the inhabitants of M. declared themselves independent, attacked the Mexican garrison, and forced the commandant to capitulate. Two parties, however, soon sprung up in the provisional government, one of which declared for entire independence, and the other adhered to Mexico on certain conditions. The latter prevailed for the time; but the submission of the community to a power so feeble as to be unable to protect them from the Indians, and whose rule was at the same time intolerant, was little more than nominal. In October 1842 Commodore Jones, of the United States, appeared before M. and took possession of the place; but finding that he had been too precipitate in his measures, restored it within 24 hours to its former rulers. This affair, however, greatly increased the irritation already existing. In the latter part of the summer of 1845, Captain Fremont, of the United States topographical corps, who had for the last five or six years been employed by his government in surveying the country between the Missouri and the Rocky mountains, made his appearance at M. with five or six trappers, and waiting upon General Castro, governor of the department, asked and obtained leave to remain for a week on the banks of the river Sacramento, in order to recruit his men and horses after his long overland journey. Having purchased a few supplies, and had an interview with the United States' consul, he returned to his troop, who were supposed to be near San Francisco. He was not again heard of till October, when, with 35 followers, he encamped about 15 m. from M. On hearing this, Castro collected 200 men, and advanced so boldly that Fremont

thought it best to decamp during the night; and eluding the pursuit of the Mexicans, retired to the northernmost parts of California. Previous to his retreat, however, he managed to get on board an American merchant-barque Moscow, and with the assistance of her crew, captain, and boat, to spike the five or six brass 24-pounders which were lying unwatched and uncared-for in an old battery on the S side of the harbour's mouth. On the 2d of July 1846, Commodore Sloat arrived at M. in the United States frigate Savannah. He had heard of the first difficulties between the Mexicans and the United States forces on the Rio Grande [see article MEXICO], and on the 7th of July he landed with a party of 250 marines and seamen, and hoisted the American flag at M. without opposition. Since its occupation by the Americans, M. has rapidly increased, numerous houses have been built, stores opened, hotels established, and a handsome two-story edifice of yellow sandstone erected for the offices of the federal government.

The bay of M. extends, in the segment of a circle, from Punto-Pinos (*a*) on the N, to Point Ano-Nuevo (*b*) on the S. It is a spacious sandy bay about 18 m. across, with anchorage near the shore in almost every part. On its N side is the town of Santa Cruz (*c*), whose inhabitants, Americans chiefly, are actively engaged in the lumber trade; and about 17 m. to the NE of which, at the sources of the Guadaloupe river, which flows into the harbour of San Francisco, are the celebrated cinnabar mines of Forbes & Co. (*d*). The Rio-Paguro, which passes San Juan (*e*), flows into the E side of the bay (at *f*); and 5 m. to the S of its embouchure, is that of the larger river, the San-Buenaventura (*g*). The roadstead is at the S end of the bay, about 2 m. SE of Point Pinos, which partially protects it from the W winds, in from 4 to 6 fath. The points of coast which form the bay, and the land a short distance back, are all elevated, but the beach is sandy, and a heavy swell rolls into it from the W. The water deepens towards the N; and the soundings are yellowish mud mixed with sand. The tides are regular, and rise 7 ft., but are not felt at the usual place of anchorage, the current flowing inside and around the bay. The ordinary winds are from the SW and WSW in the morning; towards 10 o'clock they veer to the W, and WNW, from which quarter it freshens till 3 or 4 o'clock, when it begins to decrease, and becomes calm until midnight, when light winds come off shore till daylight. In November there are frequent short gales from the SE. Fogs generally prevail in the morning to seaward, but do not extend into the bay. It always clears about 10 o'clock, and remains so till near sunset; but vessels frequently run below Point Pinos in attempting to enter the bay during these fogs. From the S point of the bay to the entrance of San Francisco bay, a distance of 53 m., the appearance of the coast, skirting along the foot of the sandy and barren San-Bruno hills, is uninviting. The bay of M. was discovered in 1602, and named in honour of Don Gaspar de Zuniga, Conde de Monte-Rey, at that time viceroy of Mexico. The Manilla galleons bore away for this bay when driven to the N by contrary winds.—*Wilkes.—Beechey.—Taylor.*

MONTEREY, a town of Mexico, the capital of Nuevo-Leon, on the l. bank of the Tigre. Pop. 15,000. It is built of stone, and well-fortified, and offered considerable resistance to the American invading army under General Taylor. The streets were barricadoed, the walls of the houses pierced for musketry, and the heights by which it is commanded strongly fortified. The assault lasted three days, and honourable terms of capitulation were granted to the garrison under Ampudia.

MONTERODUNI, a town of Naples, in the prov. of Sannio, district and 5 m. S of Isernia, and 9 m. ENE of Venafro. Pop. 1,740.

MONTERONI, a town of Naples, in the prov. of Terra-d'Otranto, district and 5 m. WSW of Lecce, and 23 m. NNE of Gallipoli. Pop. 1,890.

MONTE ROSA. See ROSA (MONTE).

MONTE-ROSSI, a village of the Pontifical states, in the comarca and 24 m. NNW of Rome, and 5 m. SE of Sutri, on the banks of a small lake at the foot of a woody hill. Pop. 500. The Rossi mountains, so called from the reddish colour of the soil and volcanic tufa of which they are composed, exhibit extensive excavations, forming subterranean chambers which are often found to contain vases and tombs bearing Etruscan inscriptions.

MONTE-ROSSO, a town of Naples, in the prov. of Calabria-Ultra, district and 11 m. ENE of Monteleone, and 23 m. SW of Catanzaro. Pop. 2,200. —Also a town of Sicily, in the prov. and 33 m. W of Syracuse, district and 18 m. N of Modica. Pop. 6,500.

MONTE-ROTONDO, a town of the Pontifical states, in the deleg. and 32 m. SSW of Rieti, and 15 m. NNE of Rome. Pop. 1,000. Alumina and sulphur are found in its environs.

MONTEROT-SENARD, a village of France, in the dep. of the Haute-Vienne, cant. and 7 m. SSE of Mézières, and 8 m. SSW of Bellac. Pop. 1,146.

MONTERRAY, a fortified town of Spain, in Galicia, in the prov. and 39 m. SE of Orense, and partido of Santa-Maria-Verin, on a height commanding a fine valley of the same name, and near the Portuguese frontier. Pop. exclusive of the garrison, 240. It contains a palace, a convent, and an hospital. The valley, which is 9 m. in length, and 8 m. in breadth at its widest part, is extremely fertile, producing corn, maize, flax, and wine—the latter however of inferior quality—in great abundance. The mountains by which it is enclosed are richly wooded, and contain mines of tin, sulphur, and marcasites.

MONTERRUBIO, a town of Spain, in the prov. and 60 m. ESE of Badajoz. Pop. 2,622. Its vicinity produces an esteemed wine.—Also a village in the prov. and 15 m. WSW of Segovia, near the l. bank of the Moros. Pop. 320.—Also a village in the prov. and 42 m. NW of Seria.

MONTE-RUBBIANO, a town of the Papal states, in the deleg. and 6 m. S of Fermo.

MONTESA, a town of Spain, in the prov. and 9 m. WNW of San-Felipe. Pop. 1,050. It is the

head-quarters of a military order instituted in 1317. Its castle was destroyed by an earthquake in 1748.

MONTE-SAN-ANGELO. See ANGELO (SAN).

MONTE-SAN-GIOVANNI, a town of the Papal states, in the deleg. and 9 m. E of Frosinone.

MONTE-SAN-GIULIANO. See GIULIANO.

MONTE-SAN-MARTINO, a village of the Papal states, in the deleg. and 18 m. E of Camerino.

MONTESANO, a town of Naples, in the prov. of Principato-Citra, 9 m. SE of La Sala. Pop. 4,600.

MONTE-SAN-POLO, a village of the Papal states, in the deleg. and 12 m. ENE of Ascoli.

MONTE-SAN-SAVINO, a town of Tuscany, in the prov. and 43 m. SE of Florence. Pop. 2,800.

MONTE-SANTA-MARIA, a town of the Papal states, in the deleg. and 27 m. NNW of Perugia. Pop. 2,000.

MONTE-SANTO, a town and small port of the Pontifical states, in the deleg. and 11 m. ENE of Macerata, and 21 m. S of Ancona, on a hill, near the Adriatic. Pop. 5,718.—Also a headland of Turkey in Europe, in Rumelia, in the sanj. of Saloniki, at the SE extremity of the peninsula, formed by Mount Athos, in N lat. 40° 7′, and E long. 24° 24′. It is the *Acro-Athos* of the ancients.—Also a gulf of the Archipelago, on the coast of Turkey in Europe, in Rumelia, in the sanj. of Saloniki, between the peninsulas of Mount Athos and Monte-Santo, on the NE, and the peninsula terminating in Cape Drepano on the SW. Its entrance between Capes St. George and Drepano is 21 m. in width, and the depth of its embrasure about 30 m. Its average breadth is 12 m. It contains several islands, of which Muillain or Muliani, and Diaporo or Demetrio, are the principal. To the NW is the port of Vurvuru, or St. Nicolas. This gulf is the *Singiticus Sinus* of the ancients. See also ATHOS.

MONTE-SAN-VITO, a town of the Pontifical states, in the deleg. and 14 m. W of Ancona, and 24 m. NNW of Macerata.

MONTE-SARCHIO, a town of Naples, in the prov. of the Principato-Ultra, district and 15 m. NW of Avellino, and 8 m. SW of Benevento. Pop. 4,600.

MONTE-SARDO, a town of Naples, in the prov. of the Terra-d'Otranto, district and 26 m. SE of Gallipoli, cant. and 1½ m. SE of Alessano. Pop. 570.

MONTE-SCAGLIOSO, a town of Naples, in the prov. of the Basilicata, district and 9 m. S of Matera, and 17 m. WSW of Castellanata. Pop. 6,100.

MONTES-CLAROS, a town of Spain, in Old Castile, in the prov. and 51 m. WNW of Toledo, and 11 m. NW of Talavera-de-la-Reina, on a hill. Pop. 230. In the environs are several lime-kilns and quarries of jasper.

MONTE-SCUDOLO, a town of the Pontifical states, in the leg. and 35 m. SE of Forli, and 5 m. E of St. Marin. Pop. 1,915.

MONTESE, a town of the duchy, and district and 27 m. S of Modena, and 9 m. N of Poretta.

MONTE-SECCO, a village of the Pontifical states, in the deleg. and 18 m. SE of Urbino, and 33 m. W of Ancona.

MONTE-SICURO, a village of the Pontifical states, in the deleg. and 6 m. SW of Ancona.

MONTESPAN, a commune of France, in the dep. of the Haute-Garonne, and cant. of Salies, 10 m. E of Saint-Gaudens, on the r. bank of the Garonne. Pop. 1,087.

MONTESPERTOLI, a town of Tuscany, in the emp. of Florence. Pop. in 1839, 1,274.

MONTESQUIEU, a village of France, in the dep. of the Ariège, cant. and 4 m. ENE of St. Lizier, and 4 m. NE of St. Girons. Pop. 540. In the environs are mines of coal.—Also a commune in the dep. of the Lot-et-Garonne, cant. and 11 m. E of Lavardac, and 11 m. NE of Nerac. Pop. 1,481.—Also a commune in the dep. of the Tarn-et-Garonne, cant. and 7 m. N of Moissac. Pop. 1,437.

MONTESQUIEU-LAURAGAIS, a commune and town of France, in the dep. of the Haute-Garonne, cant. and 6 m. WNW of Villefranche-de-Lauragais, and 18 m. SSE of Toulouse, near the Canal-du-Midi. Pop. 1,320.

MONTESQUIEU-DE-VOLVESTRE, a canton, commune, and town of France, in the dep. of the Haute-Garonne, and arrond. of Muret. The cant. comprises 9 com. Pop. in 1831, 7,480; in 1841, 8,050. The town is 20 m. S of Muret, and 30 m. SSW of Toulouse, on the r. bank of the Arize. Pop. in 1841, 3,745. It has manufactories of cloth and other woollen fabrics, and of saltpetre.

MONTESQUIOU, a canton, commune, and town of France, in the dep. of the Gers, and arrond. of Mirande. The cant. comprises 17 coms. Pop. in 1831, 10.444; in 1841, 10.321. The town is 7 m. NW of Mirande, near the r. bank of the Losse. Pop. in 1841, 2,015.

MONTESSON, a village of France, in the dep. of Seine-et-Oise, cant. and 6 m. ESE of Argenteuil, near the r. bank of the Seine. Pop. 1,200.

MONTESTRUCQ, a village of France, in the dep. of Basses-Pyrenees, cant. and 9 m. WNW of Lagor. Pop. 520.

MONTET-AUX-MOINES (LE), a village of France, in the dep. of Allier, 9 m. NNE of Montmarault. Pop. 472. Coal is mined in the vicinity.

MONTEU-DA-PO, a village of the Sardinian states, in the prov. and 18 m. NE of Turin, near the r. bank of the Po, and supposed to mark the site of the ancient *Industria*.

MONTEUX, a town of France, in the dep. of Vaucluse, arrond. of Carpentras, near the l. bank of the Auzon, 12 m. NE of Aveyron. Pop. 5,450.

MONTE-VAGO, a village of Sicily, in the prov. of Girjenti, 18 m. N of Sciacca.

MONTEVAL (CAPE), a cape on the Arabian coast, in N lat. 17° 25′, E long. 55° 36′.

MONTEVALLO, a village in Shelby co., in Alabama, U. S., 58 m. E of Tuscaloosa.

MONTEVARCHI, a town of Tuscany, in the prov. and 32 m. SE of Florence. Pop. 3,602.

MONTEVECCHIO, a village of the Papal states, in the leg. and 18 m. S of Forli.—Also a v. in the deleg. of Urbino-et-Pesaro, 12 m. SE of Urbino.

MONTE-VERDE, a town of Naples, in the prov. of Principato-Ultra, 21 m. ENE of San-Angelo-de-Lombardi, near the r. bank of the Orfanto. Pop. 2,200. It is the see of a bishop.

MONTE-VERDE ISLANDS, a group of 29 low isles in the Pacific, to the S of the Caroline archipelago, in N lat. 3° 27′, E long. 155° 48′.

MONTE-VETTOLINI, a town of Tuscany, in the prov. and 21 m. WNW of Florence.

MONTE-VIDEO, or SAN FELIPE-DE-MONTEVIDEO, the capital of the Banda-Oriental, or republic of Uruguay, situated on a low tongue of land which forms the E side of a small bay, on the N side of the river Plata, in S lat. 34° 53′, W long. 56° 0′, 130 m. from Cape St. Mary, the N entrance of the La Plata, and 105 m. ESE of Buenos-Ayres. It derives its name from a hill on the opposite side of the bay (M) called the Cerro, or the Green mount, which rises to the height of 450 ft. above sea-level. The harbour, which is 4 m. long, and more than 2 m. wide, although shallow, and quite open to the *pamperos* or SW winds, which blow with incredible fury over the vast plains of the interior, is the best on the Rio-de-la-Plata; yet when the wind continues for some time at NE, ships drawing 12 ft. water are frequently aground

for several days, so that vessels above 400 tons cannot enter this port with perfect safety, and even merchant ships are confined to one side of it, and frigates generally anchor about 5 m. from the landing-place. The bottom of the bay, however, is a soft mud.—The town occupies the whole of the peninsular promontory, and is about ¾ m. in length from E to W, and a ½ m. in breadth. The houses are built closely together, but the streets are in general straight, and provided with pavements for foot-passengers. The houses are generally two stories high, and built of brick after the Spanish fashion, with low grated windows and flat roofs. The fortifications to the N are regular works built of stone, enclosing the whole of the peninsula, and mounted with brass cannon. The barracks are bomb-proof. The Cerro, on the other side of the bay, has a fortress with 8 guns on the summit. Rat island is also fortified. In the accompanying chart of the harbour Point Clara is marked *a;* Point Caleta,

b; Point San Josef, *c;* the Mole, *d;* Point Fondo, *e;* Point Piedros, *f;* Point Colorada, *g;* Point South-East *h;* Point Cerro, *i;* Rat or Rabbit island, *k;* and Piedra Blanca, *l.* The great square contains the cathedral, which is a large brick building in the Norman style, the *cabildo* or town-hall, and the public prison. An English church has recently been erected. The market is held in an open area at the W end of the town, and is tolerably well supplied; but the inhabitants experience great inconvenience from the want of water, the spring which furnishes the place being 2 m. distant.—The climate is moist; in summer and autumn the heat is very great, and the sky is frequently overcast by storms of thunder, lightning, and heavy rain, which not unfrequently terminate in a pampero; but the winter is cold; and the air, during the months of June, July, and August, keen and piercing. The mean temp. of winter is 55°. M. is upon the whole a much healthier place than Buenos-Ayres.—The vicinity of the city is in general flat, the only eminence being the Cerrito, a hill about 3 m. inland, but much lower than the Cerro. Very little of the undulating grassy plains is enclosed. Near the town are a few scattered hedge-banks covered with agaves, cacti, and fennel; but it wants trees; so scarce, indeed, is wood, that almost all the houses are floored with brick. The soil of the vicinity is productive, yielding fine wheat, beans, Indian corn, melons, apples, and peaches; but the inhabitants do not attend to the cultivation of the fertile country that surrounds them, their principal property consisting in the herds which feed in the plains towards the Brazilian frontier. The chief trade of M. is in hides, tallow, and dried beef; the two former are exported to Europe; the latter is sent to the W. Indies, especially to the Havannah. The other articles of export are horns, horse-hair, wool, sheep-skins, seal-skins, tongues, mules, horses, and bones. Coarse copper from Chili is sometimes shipped here, as well as the herb called *matte* from Paraguay, the infusion of which is a common beverage in S. America. Attempts are now making, since the fall of Rosas, to raise a capital of £20,000 to £25,000 in this place and Buenos-Ayres, to purchase two iron steam-vessels to run between the two ports, and it is expected they will pay well. If passports were abolished, and other vexatious restrictions to prompt movement removed, there is no doubt there would be ample employment for them. An Englishman, who is secured for a period of 12 years in the exclusive privilege of navigating the Uruguay with steam-vessels in the coasting-trade, is about to offer it to capitalists in England. The vessels are to run under the British flag. The pop., previous to the late desolating struggle, was about 45,000. It is of a very mixed nature, but chiefly of Spanish descent. The remainder is made up of French, English, Basques, Italians, and manumitted Negroes. The ladies are generally fond of dress, and neat and cleanly in their persons. They adopt the English costume at home, but go abroad usually in black, and covered with a large veil or mantle. An opera affords the chief public amusement, besides gambling and horse-racing.

History.] The first settlements in the neighbourhood of M. took place in 1724. In 1731, a few families from Palma, one of the Canary islands, were located here, and laid the foundation of the city. In 1806, a British force which had been despatched to make an attack on the Spanish territories in this quarter, took M. by assault, after a desperate conflict, in which one-third of the troops engaged were either killed or wounded. After the unsuccessful attack on Buenos-Ayres in 1807, Monte-Video was evacuated with all the other Spanish settlements. When the Spanish provs. threw off the yoke of the mother-country, the court of Rio-de-Janeiro, taking advantage of some alleged incursions made on its territory by Artigas and other chiefs, seized on the town of M., and occupied the l. bank of the Rio-de-la-Plata and Uruguay. Against this proceeding the Buenos-Ayreans protested, and after a long and disastrous siege, they succeeded in recovering M. in 1814. In 1821 the Brazilians retook it, and the better to preserve it from again falling into the hands of the republicans, they forthwith declared it to be an independent republic, federatively allied to Brazil. This arrangement, of course, dissatisfied the Buenos-Ayreans, who immediately blockaded the town from the land side. Betwixt its two belligerent protectors M. was threatened with utter destruction, until a treaty was concluded, by which its independence of either party was expressly stipulated. In 1838, the Monte-Videans declared war against Rosas, the dictator of Buenos-Ayres, and a sanguinary struggle ensued, in which, but for the interference of France and Britain, the Monte-Videans must have been annihilated. In 1842, Rosas despatched General Oribe against the Banda Oriental, and that general contrived to maintain his footing in the country, and to shut up the Monte-Videans straitly within their lines. In 1845, the British minister at Buenos-Ayres was instructed to insist on the independence of Monte-Video and the free navigation of the river Plate; and concurrently with France, a large fleet was kept in that river, and Buenos-Ayres was blockaded. In 1849, Rosas was induced to listen to certain propositions, which provided that he should at once unite with France and England to put an end to the hostilities between the city of M. and the besieging forces by an armistice; that the foreigners bearing arms in M. should be disarmed, and that the whole of the Argentine troops, officers and soldiers, should be simultaneously withdrawn from every part of the Oriental territory; that the blockade should be raised; the island of Martin-Garcia evacuated; the Argentine flag saluted, prizes restored, and the navigation of the river Parana admitted to be an inland navigation of the Argentine confederation so long as the republic continued to occupy both banks of the river. After these conditions were fulfilled, a new election for the presidency of the Banda Oriental was to take place according to the forms prescribed by the constitution, and without influence or restraint, Oribe agreeing to abide by the result, with a general amnesty. Such was the tenor of Mr. Hood's propositions, which had been approved by Lord Aberdeen in May 1846, and which the Argentine government affected to accept on the 27th August of the same year. Unfortunately, when an attempt was made to carry them completely into effect, some unforeseen difficulty was raised by the foreigners in M. which induced Lord Howden to abandon their cause so abruptly as to consign them exclusively to French protection. In the conferences which subsequently took place with the Argentine minister for foreign affairs, that plenipotentiary showed no disposition on the part of Rosas to adhere to the assurances which had been given in his name. It ap-

pears, moreover, that the intrigues of Louis Philippe were secretly directed to creating a predominant French influence on the N side of the Plate. The French admiral on the station negotiated a similar treaty with Rosas; but his government refused to ratify it; and after a desperate struggle, Rivera, who had been elected president of the Oriental or Uruguay republic, was obliged to give way before the combined forces of Rosas, and his representative Oribe, who had been chosen president. The latter being in want of money, proceeded to levy contributions on the proprietors on the debatable lands on the frontiers of Brazil, and even made forays into the Brazilian prov. of Rio-Grande. For these depredations Brazil demanded of the Uruguay republic satisfaction and compensation. At the instigation of Rosas those demands were rejected. Rosas withdrew his minister from Rio; and the emperor of Brazil, who had never recognised the government of Oribe in Uruguay, "resolved, as a measure of security justly due to his own dominions, to expel that aggressive marauder from the state, in which he was only maintained by foreign arms and domestic ruffians. Scarcely had this determination been come to by Brazil, when allies and succour arose in the Plate. For the last twenty years the Argentine confederation has been but a name; it never was much more. Each of the states supposed to belong to it ruled themselves as best they could; federal government or centre of unity there was none; there was, indeed, no pretence of such a thing. Nominally Rosas had been foreign minister to a confederation that continued to endure only his annual addresses to the fictitious legislature of his own state. But he had neither actual nor delegated authority from the other provs. of the old Spanish vice-royalty. Monte-Video being *hors de combat* and in the hands of Oribe, he had, however, command over the mouth of the Plate; at Buenos-Ayres he levied import duties in the name of the whole confederation, which he appropriated entirely to himself; and as his general policy was externally one of isolation from European connection, and internally one of conquest, the upper states of the Plate and its tributaries suffered deeply. They were, however, of themselves unable to attack successfully the superior military power of Rosas. About the period when Brazil came to this decision, Rosas had performed his annual farce of affecting to resign power. The chiefs of Entre-Rios and of other upper states accepted his mock resignation of the office of foreign secretary of the Argentine confederation: declared their determination to abate pretensions which injured their prosperity and retarded their growth; and, seizing the golden opportunity, effected an alliance with Brazil, to secure the expulsion of Oribe from Uruguay, and to defend each other from any retaliation of Rosas." [*Daily News.*] Their combined military operations were successful; Oribe was driven from the Oriental republic, and a regularly constituted native government formed at M.; means were taken to secure and fortify the islands which command the higher navigation of the Plate; and the policy of the offensive and defensive alliance which was formed is to render free that river, which it was the design of Rosas to keep either in a perpetual state of disturbance or closed. It appears, however, that the capitulation of Oribe, as agreed to by Urquiza, was an act of clemency on the part of the latter hardly consistent with a sound discretion, and the subsequent hurrying forward of the elections before any reorganization had taken place, has been productive of serious inconveniences. During eight years past, Oribe held the country-districts under a military domination, and appointed all the local authorities from the ranks of his adherents. These kept the people subservient by the terror of the sword; and when the elections took place, they were still in office. It is easy to perceive that under such circumstances the *Blancos*, the party of Oribe, though few, and not possessed now of any physical force, would have a majority in the chamber of representatives, and being bitterly opposed to the *Colorados*, or liberating party, would offer every obstruction possible to measures brought forward by them, and especially to such as concern amicable relations with Brazil, and with the public creditors whose money was borrowed by the late government to defend the state from the aggressions of Oribe's followers. The ratification of the Brazilian treaties was ungraciously clogged with a hope that further modifications would be admitted by the imperial government; and the demand of the government to be authorized to make arrangement with its creditors, and to raise the means for settling their claims, was altered by the legislative body to a mere authority to initiate both. A bill also passed the two chambers virtually abolishing the legal right to interest on any unpaid bill, mortgage bond, or other written instrument or obligation, whether entered into between private individuals or on the part of the government, from the period of the invasion in Dec. 1842, to the raising of the siege on the 8th of Oct. 1851. The government, however, to its honour, refused to ratify it. See articles PARANA, PLATA, and URUGUAY.

MONTE-VIDEO, a hill about 2 m. from Watchman's cape, on the E coast of Patagonia, in S lat. 48° 18′, W long. 66° 18′, so called from its resemblance both in shape and colour to the Cerro of Monte-Video on the Plate.

MONTE-VIDEO (REPUBLIC OF). See URUGUAY.

MONTEZUMA, a village of Cayuga co., in the state of New York, U. S., 162 m. W by N of Albany, at the junction of the Cayuga canal with the Erie canal. Pop. 650. The M. marshes extend 14 m. along the outlet of Cayuga lake and Seneca river, and are from 2 to 3 m. wide. In summer they are covered with grass from 3 to 4 ft. high.—Also a v. in Parke co., in Iowa, 72 m. W of Indianapolis, on the E side of Wabash river.—Also a v. in Pike co., in Illinois, 60 m. W by S of Springfield.—Also the cap. of Corrington co., in Alabama, on the E bank of the Conecul.

MONTFA, a village of France, in the dep. of Ariege, cant. and 4 m. WNW of Mas-d'Azil. Pop. 300.

MONTFARVILLE, a commune and village of France, in the dep. of Manche, 10 m. NE of Valognes. Pop. 1,543.

MONTFAUCON, a canton, commune, and village of France, in the dep. of Haute-Loire, arrond. and 12 m. ENE of Issingeaux. Pop. of cant. 11,161; of com. 1,129.—Also a cant., com., and v., in the dep. of Maine-et-Loire, arrond. and 10 m. S of Beaupreau, on the r. bank of the Moine. Pop. of cant. 14,398; of com. 653.—Also a cant., com., and v., in the dep. of Meuse, arrond. and 22 m. SSE of Montmedy. Pop. of cant. 9,554; of com. 1,224.

MONTFERMEIL, a commune and village of France, in the dep. of Seine-et-Oise, cant. and 9 m. SE of Gonnesse. Pop. 1,064.

MONTFERMY, a village of France, in the dep. of Puy-de-Dome, cant. and 4 m. NNW of Pont-Givaud, on the l. bank of the Sioule. Pop. 400.

MONTFERRA, a commune and village of France, in the dep. of Isère, cant. of Saint-Geoire, 12 m. SE of La Tour-du-Pin. Pop. 1,326.

MONTFERRAND, an ancient town of France, formerly the strongest place in the prov. of Auvergne, now united as a suburb to Clermont, cap. of the dep. of the Puy-de-Dome, and named Clermont-Montferrand, or by abbreviation Clermont-Ferrand.—Also a town in the dep. of the Gers, cant. and 6 m. WSW of L'Ile-en-Jourdain, and 10 m. N of Lombes. Pop. 930.

MONTFERRAT, a village of France, in the dep. of the Var, cant. and 4 m. NW of Callas, and 7 m. N of Draguignan. Pop. 800.

MONTFERRAT, or MONTEFERRATO, an ancient duchy of Italy, which was bounded on the N and W by Piedmont; on the S by the republic of Genoa; and on the E by the Milanais; now comprised in the Sardinian divs. of Alessandria, Coni, Genoa, Novare, and Turin. Casale was its cap. In 980 we have notice of a marquis of M., great-grandson of Otho II. In 1305, M. passed by inheritance into the family of the Paleologi; and on the extinction of the male branch, was given in 1536 by Charles V. to the duke of Mantua. In 1575 it was erected by Maximilian II. into a duchy. In 1631 a portion of the duchy was ceded by the duke of Mantua to the dukes of Savoy; and in 1803 the latter were invested with the remainder by Napoleon.

MONTFERRET, a village of France, in the dep. of the Pyrenees-Orientales, cant. and 3 m. W of Arles, and 10 m. WSW of Ceret. Pop. 892.

MONTFERRIER, a commune and town of France, in the dep. of the Ariege, cant. and 4 m. SW of Lavelanet, and 12 m. ESE of Foix, on the Touire. Pop. 1,751. It has quarries of fine marble.

MONTFLANQUIN. See MONFLANQUIN.

MONTFLEUR, a village of France, in the dep. of the Jura, cant. and 5 m. S of St. Julien, and 27 m. S of Lons-le-Saunier. Pop. 600.

MONTFOORT, a town of Holland, in the prov. and arrond. and 9 m. SSW of Utrecht, cant. and 5 m. WNW of Ysselstein, on the l. bank of the Yssel. Pop. 1,752. It is well-built, and formerly possessed a strong fortress, built on an adjacent hill in 1157, and destroyed by the French in 1672.

MONTFORD, a parish of Salop, 5 m. W by N of Shrewsbury. Area 2,180 acres. Pop. in 1841, 490.

MONTFORT, a parish in Shropshire, 5 m. WNW of Shrewsbury, on the Severn. Area 2,180 acres. Pop. in 1831, 566; in 1841, 490.

MONTFORT, a village of France, in the dep. of the Aude, cant. and 6 m. E of Roquefort, and 23 m. S of Limoux, on the l. bank of the Boulsane. Pop. 904.—Also a town in the dep. of the Gers, cant. and 6 m. NNW of Mauvesin, and 15 m. SE of Lectoure, near the r. bank of the Orle. Pop. 1,150.—Also a canton, commune, and town in the dep. of the Landes, and arrond. of Dax. The cant. comprises 22 coms. Pop. in 1831, 14,049; in 1841, 13.654. The town is 12 m. E of Dax, and 23 m. SW of Mont-de-Marsaw, near the l. bank of the Loutz. Pop. 1,727. It has a considerable trade in wine.—Also a village in the dep. of the Var, cant. and 4 m. S of Cotignac, and 6 m. NNE of Brignolle. Pop. 924.

MONTFORT-L'AMAURY, a canton and town of France, in the dep. of Seine-et-Oise, arrond. of Rambouillet.—The cant. in 1841 had a pop. of 14.787.—The town is 16 m. NW of Rambouillet. It is a well-built place, and finely situated. Pop. in 1841, 1,760.

MONTFORT-LA-CANNE, or MONTFORT-SUR-MEU, an arrondissement, canton, and town of France, in the dep. of Ille-et-Vilaine.—The arrond. comprises 5 cants., and has an area of 94,671 hects. Pop. in 1841, 57,576.—The cant. comprises 11 coms. Pop. in 1841, 14,612.—The town is situated on the Meu, at the confluence of the Chailloux, 16 m. W of Rennes. It is surrounded by ancient walls, and a ditch. It has manufactures of linen and thread, and a trade in grain, butter, lint, and other agricultural produce of the environs.

MONTFORT SUR-RILLE, a canton and town of France, in the dep. of Eure. The town is 9 m. SE of Pont-Audemer, on a branch of the Rille. Pop. in 1841, 571; of cant. 9,322.

MONTFRANC, a village of France, in the dep. of Aveyron, cant. of Saint-Sernin, 18 m. S of Saint-Affrique. Pop. 300.

MONTFREIN, a town of France, in the dep. of Gard, arrond. of Nismes, cant. and 5 m. WSW of Aramont, on the l. bank of the Gard. Pop. in 1841, 2,516. There are mineral springs in the vicinity.

MONTGAILLARD, a commune and village of France, in the dep. of Landes, cant. and 5 m. E of Saint-Sever, on the Canal-du-Midi. Pop. 2,122.

MONTGERON, a commune and village of France, in the dep. of Seine-et-Oise, cant. of Boissy-Saint-Leger. 6 m. NW of Corbeil. Pop. 923.

MONTGISCARD, a canton and commune of France, in the dep. of Haute-Garonne, 8 m. NW of Lauragais. Pop. of cant. in 1841, 10,721; of com. 1,475.

MONTGIVRAY, a village of France, in the dep. of Indre, cant. and 1 m. N of La Chatre, on the r. bank of the Indre. Pop. 900.

MONTGOMERY, a central county of the state of New York, U. S., comprising an area, generally mountainous, of 356 sq. m., terminating in the N in the valley of the Mohawk, and drained by East Canada, Otsquake and Schoharie creeks, all affluents of the Mohawk. The banks of the rivers are extremely fertile. Pop. in 1840, 35,818; in 1850, 31,913. Its cap. is Fonda.—Also a county in the SE part of the state of Pennsylvania, containing a surface of 425 sq. m., bordered on the S by the Schuylkill river, and drained by Manatawney, Perkiomen, Wissihickon, and Pennypack creeks. The surface is undulating, but the soil, especially in the valley of the Schuylkill, is generally fertile. Pop. in 1840, 47,241; in 1850, 58,000. Its cap. is Norristown.—Also a county in the W part of the state of Maryland, containing a superficies of 576 sq. m., bordered on the NE by the Patuxent, and on the SW by the Potomac, and drained by branches of the latter river. The surface is hilly, and the soil, except on the streams, possesses little fertility. Pop. in 1840, 15,456, of whom 5,377 were slaves; in 1850, 15,860. Its cap. is Rochville.—Also a county toward the SW part of the state of Virginia, containing a surface of 1,000 sq. m., bordered on the E by Blue Ridge, and drained by New river and by the head-waters of Bannister river. The surface is hilly, but the banks of the streams are very fertile. Pop. in 1840, 7,405; in 1850, 8,357. Its cap. is Christianburg.—Also a county in the SW part of the state of N. Carolina, containing an area of 500 sq. m., drained by Yadkin river and its branches. The surface is to a great extent mountainous, but the soil is fertile. Pop. in 1840, 10,780; in 1850, 6,821. Its cap. is Lawrenceville.—Also a county in the SE part of the state of Georgia, containing an area of 1,100 sq. m., bordered on the S and SW by the Ocmulgee and Auchenahatchee, and drained by Oconee river and its branches, and by Pendleton creek. Pop. in 1840, 1.616; in 1850, 2,145. Its cap. is Mount Vernon.—Also a central county of the state of Alabama, containing an area of 900 sq. m., bordered on the N and W by the Coosa and Tallapoosa rivers, and drained by their branches. Pop. in 1840, 24,574; in 1850, 29,779.—Also a county in the NW part of the state of Tennessee, containing an area of 500 sq. m., drained by Cumberland river and its branches. Pop. in 1840, 16,927, of whom 7,059 were slaves; in 1850, 21,049. Its cap. is Clarkesville.—Also a central county of the state of Kentucky, containing an area of 260 sq. m., drained by Red river and its tributaries, and by branches of Kentucky and Licking rivers. Pop. in 1840, 9,332; in 1850, 9.904. Its cap. is Mount Sterling.—Also a county in the SW part of the state of Ohio, containing an area of 480 sq. m., drained by Miami river and its branches. Its surface is undulating, and its soil generally fertile. Pop. in 1840, 31,938; in 1850, 38,218. Its cap. is Dayton.—Also a central county in the state of Indiana, containing an area of 504 sq. m., drained by Sugar, Big and Little Racoon creeks. The surface is undulating, and the soil very fertile. Pop. in 1840, 14,348; in 1850, 18,227. Its cap. is Crawfordsville.—Also a central county of the state of Illinois, containing an area of 684 sq. m., drained by Shoal creek and its branches, the head-waters of Macoupin creek, and a branch of the S fork of Sangamon river. The surface is elevated and undulating, and the soil fertile. Pop. in 1840, 4,490; in 1850, 6.325. Its cap. is Hillsboro.—Also a county in the E part of the state of Missouri, containing an area of 576 sq. m., bordered on the S by Missouri river, and drained by Au Cuivre and Loutre creeks. The surface is undulating, and the soil considerably diversified. Pop. in 1840, 4,371, of whom 827 were slaves; in 1850, 5,489. Its cap. is Danville.—Also a township of Franklin co., in the state of Vermont, 61 m. N of Montpelier, drained by Trout river, a branch of Missisque river, and by its tributaries. It is partly mountainous, but contains a tract of fertile land. Pop. in 1840, 548.—Also a township of Hampden co., in the state of Massachusetts, 108 m. W by S of Boston, on the N side of Westfield river. Pop. 740.—Also a township of Orange co., in the state of New York, 95 m. SSW of Albany. It has a hilly surface, and is drained by Wall-kill river. The soil consists of clay and gravelly loam. Pop. 4,100. The village is on the E bank of the Wallkill river. Pop. 1,000.—Also a township of Somerset co., in the state of New Jersey, 12 m. SW of

Somerville. It has a hilly surface, and is drained by Boden's brook and its tributaries, and by Stoney Brook. The soil consists of clay, sandy loam, and red shale. Pop. 1,482.—Also a township of Franklin co., in the state of Pennsylvania, 16 m. SW of Chambersburg. It has a level surface, and is drained by Conecocheague and its tributaries. The soil consists chiefly of sandy loam. Pop. 4,360.—Also a township of Montgomery co., in the same state, 20 m. N of Philadelphia. It has a level surface, and is drained by Wisahickon and Neshaminy creeks. The soil consists of red shale and loam. Pop. 1,000. The village, named Montgomery Square, contains about 10 dwellings.—Also a township of Indiana co., in the same state. Pop. 787.—Also a township of Franklin co., in the state of Ohio. It has an undulating surface and a fertile soil. Pop., exclusive of that of Columbus, the cap. of the state, which is situated in its western part, 1,449.—Also a township of Marion co., in the same state. Pop. 552.—Also a township of Richland co., in the same state. Pop. 2,445.—Also a township of Wood co., in the same state. Pop. 609.—Also a township of Benton co., in the state of Missouri. Pop. 633.—Also a town, cap. of the co. of the same name, in the state of Alabama, 200 m. NE of Mobile, and 112 m. SE of Tuscaloosa, on the E side of Alabama river, on a high bluff at the head of steam-boat navigation. Pop. 2,250. It is connected by a railroad with West Point, in the state of Georgia, at a distance of 87½ m.

MONTGOMERY, a parish and borough, the capital co. of Montgomeryshire, North Wales, situated 20 m. SW of Shrewsbury, and 168 m. NW by W of London, on the E bank of the river Severn. The parish and borough boundaries, which are co-extensive, comprehend an area of about 10 m. in circumf. Pop. in 1801, 972; in 1831, 1,188; in 1841, 1,208; in 1851, 1,248. The town is pleasantly situated on an acclivity commanded by a higher eminence, whence there is a rich and extensive prospect of the vale of Montgomery, bounded by the hills of Salop. The streets are steep; the houses in general are built of brick. The situation is healthy and inviting; but, from want of either thoroughfare, trade, or manufactures, few country towns are more secluded or inanimate. The chief buildings are the church, the guild hall, the jail, and the house-of-correction. The castle of M. stood upon the extremity of an eminence on the N side of the town. From what remains, it is difficult to ascertain either its original shape or extent. With the contributory-boroughs of Llanfyllen, Llanidloes, Machynlleth, Newtown, and Welshpool, it sends a member to parliament. The number of electors in 1848, in a total pop. returned in 1851 at 17,942, was 960; in 1837 it was 915.

MONTGOMERYSHIRE, a county of North Wales; bounded on the N by the cos. of Merioneth and Denbigh; on the E by Salop; on the S by Radnor and Cardigan; and on the W by Merionethshire. Its form is nearly quadrangular, extending, from NE to SW, about 35 m., by 30 m. in breadth, from NW to SE. Its area is variously estimated at from 450,000 to 500,000 acres. Of these it is computed that about one-half is in course of cultivation; 70,000 acres being arable, and 180,000 under pasturage. The remainder, besides waste and uncultivated land, includes woodlands and other plantations.

Physical features.] The greater portion of this district assumes a mountainous aspect, with marked indications of sterility. A line commencing at Plinlimmon, on the SW boundary of the co., and running NW between Llanbrynmair and Carno, to Llyn-gwyddior lake; then to Drws-y-nant, between Bala and Dolgelleu, and crossing the mountains to Llyn-trywerin, and terminating near Festiniog, being about 50 m. in extent, forms the parting range to the E and W of the water-courses in this co. and Merionethshire. The Freiddin hills form a striking group upon the E side of the co. Of these, Moel-y-Golfa is the most conspicuous, and Cefn-y-Castell is not much inferior in height. Upon the S, the Biga mountains, on the N side of the valley above the Severn, and a collateral branch of the Plinlimmon ridge, form a line of high table-land several miles in extent. Plinlimmon rises 2,463 ft.; while the table-land occupying the centre generally averages 1,000 ft. above the level of the sea. The more favoured and fertile spots lie chiefly in the S and E parts of the co., intersected by the Severn and its numerous tributary streams.—The main streams on the W side of the ridge above noticed are, the Dovey, passing through the valley of Machynlleth; the Maw, watering the valley of Dolgelleu; and the Traethbach river, flowing through the valley of Festiniog. Upon the E side of the back-bone ridge are the sources of the Wye, Severn, Fyrnwy, Tanat, Rhaiadyr, Ceiriog, Dee, and other secondary streams. The Wye rises upon the S side of Plinlimmon, and taking an E course, is joined by the Bedw rivulet at Llangerrig. The Severn does not much assimilate with its mountainous origin, and soon loses its native rapidity, forming large vales, and generally burying itself within deep banks. Its colour is less transparent than that of the Wye, nor does it equal that river in picturesque beauty or variety of scenery. Even at Lanidloes it ceases to be a torrent, and thence flows through a rich valley, to commence its early commercial importance at Welshpool. The Fyrnwy, or Vyrnyw, rising in the vicinity of Bwlch-y-groes, takes an E direction to Llanfair, where it suddenly turns to the NE, and at Llanymynech changes its course again, to join the Severn near Llandrinio. The Tanet, after having been joined by the Rhaiadyr, a little below the village of Llanrhaiadyr, continues its course in a similar direction, and then turns suddenly to the S, and becomes confluent with the Fyrnwy.

Minerals, soil, and produce.] The soil rests chiefly on a basis of slaty strata which spread throughout almost the whole co. The mineral treasures of the district are hence comparatively of no great value. Lead and zinc, however, are procured near Llangynog and Llanfyllin. Millstones are quarried in the Breiddin hills, and slates in various quarters, especially near the confluence of the Fyrnwy and the Severn. Coal and lime in small quantities are worked near Coedwae and Llanymynech, on the Shropshire border.—The soil in the vales is chiefly argillaceous, becoming more and more loamy and rich in the course of their descent; that on the mountains is of a more schistose nature.—The native breed of cattle are brindled, short-legged, and deep in the carcase. The Devonshire breed has been introduced, and latterly the Herefordshire. There are two kinds of sheep reared in the co., the one in request for its wool, and the other, which is black-faced, for its mutton. The Welsh pony, celebrated for its hardihood and sureness of foot, is still found here in its unsophisticated condition, though now in general crossed with a large and handsomer breed. Sheep, however, form the principal riches of the co., the mountains being wholly occupied as sheep-walks. The flocks during the summer months, like those of Spain, are driven to feed at a great distance, and the farms in the valleys are mostly held as appendages to the sheep-walk, for winter-habitations, and for raising provisions and fodder. The greater part of the flannels in the English market are supplied by this co. Cattle, butter, and cheese are also exported in considerable quantities. The oak of the co. is in

high repute for shipbuilding, and it yields considerable quantities, vast plantations of oak being formed by the landed proprietors to meet the increasing demand.

Canals and roads.] The M. canal begins at Newtown, in the Severn, and runs along the valley of that river to Welshpool, whence it quits the course of the Severn, and is continued to Llanymynech on the border of Salop, crossing the river Fyrnwy by an aqueduct of 5 arches, each 40 ft. in span, and 25 ft. above the ordinary level of the water. The Llanymynech branch unites it with the Ellesmere canal. A short branch to this canal runs from the main line N of Welshpool, SW to Guilsfield.—The roads from London by Shrewsbury to Carnarvon, Barmouth, Towyn, and Aberystwith, are the principal roads traversing this co. The highway returns for 1839 show an expenditure of £2,557 on 824 m. of road; and the returns of turnpike trusts an expenditure of £13,554.

Manufactures and trade.] As above remarked, this county supplies the English market with the greater part of the celebrated Welsh flannels. The flannel trade in 1838-39 was considered to be in a steady condition; but the Lancashire imitation flannels, though not so good as the Welsh, had for seven years militated considerably against the Welsh trade. The hand-loom is considered preferable for the production of the finer qualities: the power-loom has been unsuccessfully attempted at Welshpool and Newtown. The native Welsh wool is said to have much improved in quality; but the Radnorshire or South Devon wool, which is of a short quality, is best adapted for the flannel manufacture.

Population, &c.] The pop. of this co. in 1801 was 49,978; in 1831, 65,700; in 1851, 67,447.—It is divided into 9 hundreds, viz. Llanfyllin, Deuddwr, Pool, Cawrse, Mathrafal, Machynlleth, Llanidloes, Newtown, and Montgomery, comprising 47 parishes, 1 borough, and the 5 market-towns and contributory boroughs of Welsh-Pool, Llanfyllin, Machynlleth, Newtown, and Llanidloes.—It is in the prov. of Canterbury, and chiefly in the ancient dio. and archd. of St. Asaph. The poor-rate returns for 3 years to Easter 1750 show an average expenditure of £1,383 on the poor of this co.; for 1803, of £37,399; for 1833, of £36,723; and for 1847, of £28,172, being at the rate of 1s. 10¾d. in the pound, that for all Wales being 1s. 11¾d. The proportion of paupers annually relieved, to the whole pop. in the unions, as at Lady-day 1840, was 12 per cent.; in 1847, 14·6 per cent. —The county returns one member to parliament, who is polled for at Montgomery, Llanidloes, Machynlleth, Llanfyllin, and Llanfair; the principal places of election being Montgomery or Machynlleth. The number of electors registered in 1837 was 2,819; in 1848, 3,065. The borough of Montgomery returns one member; and Newtown, Welshpool, Llanidloes, Machynlleth, and Llanfyllin, are contributory to it. —The co. is included in the North Wales circuit. The spring assizes are held at Welshpool; those of the winter at Newtown.

History.] During the period of British independence, this district was included in the territory occupied by the *Ordovices;* under the Romans it was comprised in the province of *Britannia Secunda.* The borders long formed a continual scene of rapine; the Mercians and Powysians alternately making depredations into each other's dominions. Offa drove the Britons into the mountains, and threw up a boundary rampart, the famous dyke of Offa, which still traverses the co. from N to S, by Welshpool and Montgomery. After the Conquest, the castle of Montgomery was erected by the Normans, and that of Powys, near Welshpool, by the Welsh, during the continuance of their warfare. In the civil war these castles were objects of contest.

MONTGOMERY'S FERRY, a village of Perry's co., in the state of Pennsylvania, U. S., 19 m. NW of Harrisburg, on the Susquehanna, which is here crossed by a bridge.

MONTGOMERY-VILLE, a village of Montgomery co., in the state of Pennsylvania, 101 m. E of Harrisburg, consisting in 1840 of about 15 dwellings.

MONTGUYON. See MONGUYON.

MONTHERME', a canton and town of France, in the dep. of Ardennes, arrond. of Mezières. Pop. of cant. in 1841, 9,561; of town, 1,976. The town is situated on the l. bank of the Meuse, 7 m. N of Charleville. It has manufactories of glass, pottery ware, and bricks.

MONTHEY, or MONTHAY, a town of Switzerland, in the cant. of Valais, 4 m. NW of Saint-Maurice, near the l. bank of the Rhone, at the entrance of the Val-de-Lie. Pop. in 1850, 1,841, nearly all Catholics; of the *dizain* or circle, 8,267, of whom only 110 were Protestants.

MONTHIERENDER, a canton, commune, and town of France, in the dep. of the Haute-et-Marne, and arrond. of Vassy. The cant. comprises 15 com. Pop. in 1831, 8,271; in 1841, 8,424.—The town is 12 m. W of Vassy, on the Voire. Pop. 1,432.

MONTHION, a commune of France, in the dep. of the Seine-et-Marne, and cant. of Dammartin, 4 m. NW of Meaux. Pop. 1,068.

MONTHOIS, a canton and commune of France, in the dep. of the Ardennes, and arrond. of Vouziers. —The cant. comprises 18 com. Pop. in 1831, 6,955; in 1841, 9,561.—The village is 6 m. S of Vouziers. Pop. 673.

MONTHOUMET, a village of France, in the dep. of the Aude, 11 m. SSW of La-Grasse, and 21 m. SSE of Carcassonne. Pop. 320.

MONTHUREUX-SUR-SAONE, a canton, commune, and town of France, in the dep. of the Vosges, and arrond. of Mirecourt. The cant. comprises 12 com. Pop. in 1831, 8,073; in 1841, 8,137.—The town is 30 m. SSW of Mirecourt, on the r. bank of the Saone. Pop. 1,618.

MONTI, a village of the island of Sardinia, at the foot of Monte-Niddu, on a head-stream of the Coghinas, 20 m. NE of Ozieri. The pop., about 800, consisting of shepherds and *viandanti*, lives in a most abject state of poverty, ignorance, and idleness. Some years since an infant school—the only one of the district—was established, but the number of pupils in its Augustan age of literature never exceeded 12; and it was found in 1833 that not a soul in the whole parish could either read or write. Their chief commerce is in honey and wax, of which latter the dist. produces to the annual value of 12,000 lire, or about £480 sterling. Perfectly unacquainted with the system of pasturage or agriculture, the cultivated lands do not return a ninth part of what they might; and the rest are said to be capable of supporting fourteen times their present pop. So grossly mismanaged are the pastures that the shepherds take their flocks and herds to the neighbouring districts of Ala and Berchidda; and this encroachment being stopped by the Berchiddese, some disturbances lately took place, in which the huts and *stazii* were burnt and destroyed, and the Montini driven back into their own district. —*Tyndale.*

MONTICELLE, a village of Austrian Lombardy, in the prov. and 21 m. ESE of Pavia, district and 6 m. ESE of Corte-Olona, near the l. bank of the Po. Pop. 1,300.—Also a village of the duchy and 30 m. NW of Parma, and district of Borgo-San-Donino.

MONTICELLO, a village of Sullivan co., in the state of New York, U. S., 110 m. SW of Albany, in Thompson township. Pop. in 1840, about 500.—Also a village of Jasper co., in the state of Georgia, 35 m. WNW of Milledgeville. Pop. 60.—Also a village of Jefferson co., in the state of Florida, 29 m. ENE of Tallahassee, on a ridge, 4 m. E of the Mickatoosy lake, and 10 m. S of the Georgia line.—Also a village of Pike co., in the state of Alabama, 169 m. SE of Tuscaloosa, on a small branch of Pea river.—Also a village of Lawrence co., in the state of Mississippi, 85 m. S of Jackson, on the W side of Pearl river.—Also a village of Wayne co., in the state of Ken-

tucky, 110 m. S of Frankfort, on the N side of Beaver creek, a branch of Cumberland river. Pop. 142. —Also a village of White co., in the state of Indiana, 73 m. NNW of Indianapolis, on the W bank of Tippecanoe river.—Also a village of Piatt co., in the state of Illinois, on the E side of Sangamon river. Pop. about 100.—Also a village of Lewis co., in the state of Missouri, 145 m. N by E of Jefferson city, on the NE side of Fabias river.

MONTIEL, a town of Spain, in the prov. and 53 m. ESE of Ciudad-Real, partido and 8 m. SE of Villa-Nueva-de-los-Infantes, on the l. bank of the Jabalon, on the border of a plain of the same name. Pop. 1,165. It has a church, the tower of which is remarkable and was formerly fortified. Sheep and mules are extensively pastured in the surrounding district.

MONTIERI, a town of the grand-duchy of Tuscany, in the prov. and 20 m. SW of Sienna, capitanate and 17 m. S of Casale. Pop. in 1839, 1,047. It has a mine of argentiferous lead.

MONTIER-SUR-SAULX, a canton and commune of France, in the dep. of the Meuse, and arrond. of Bar-le-Duc. The cant. comprises 14 com. Pop. in 1831, 6,645; in 1841, 6,816. The village is 12 m. S of Ligny, and 18 m. S of Bar-le-Duc, on the Saulx. Pop. 1,204. It has several blast-furnaces and founderies.

MONTIGLIO, a town of Sardinia, capital of a mandemento, in the div. and 27 m. WNW of Alessandria, prov. and 15 m. SW of Casale. Pop. 2,550.

MONTIGNAC, or MONTIGNAC-SUR-COMTE, a canton, commune, and town of France, in the dep. of the Dordogne, and arrond. of Sarlat. The cant. comprises 14 com. Pop. in 1831, 15,356; in 1841, 15,489. The town is 12 m. N of Sarlat, on the Vezere. Pop. in 1841, 3,752. The locality affords good wine.

MONTIGNAC-SUR-CHARENTE, a village of France, in the dep. of the Charente, cant. and 1 m. SSW of St. Amans-de-Bouexe, on the Charente. Pop. 530.

MONTIGNE', a commune of France, in the dep. of the Maine-et-Loire, cant. and 8 m. NW of Baugé, and 22 m. NW of Angers. Pop. 1,600. It has quarries of freestone and lime, and carries on a considerable trade in tiles and bricks, both of local manufacture.—Also a commune in the same dep., in the cant. of Montfaucon, 15 m. SSW of Beaupreau, on the Moine. Pop. 1,010.

MONTIGNOSO, a village of the duchy and 21 m. NW of Lucca, in the district and 14 m. N of Vareggio. It forms, with the district belonging to it, an enclave 5½ m. in length, and about 1½ m. in breadth, lying between the duchy of Massa Carrara on the N, the Tuscan enclave of Pietra-Santa on the SE, and the gulf of Genoa.

MONTIGNY, a village of France, in the dep. of the Meuse, cant. and 4 m. NNW of Dun, and 12 m. SW of Montmedy. Pop. 570. It has a quarry of freestone.—Also a village in the dep. of the Oise, cant. and 5 m. NE of St. Just, and 14 m. NNE of Clermont. Pop. 1,050. It has manufactories of woollen fabrics.—Also a village in the dep. of the Seine-et-Oise, cant. and 5 m. NNW of Argenteuil, and 14 m. N of Versailles, on the slope of a woody hill, near the r. bank of the Seine. Pop. 380. It contains a number of pretty villas, and has two tile-kilns. In the environs are several gypsum quarries.

MONTIGNY (LES), a commune of France, in the dep. of the Jura, cant. and 1½ m. N of Arbois, and 8 m. NNE of Poligny, near the source of the Larine. Pop. 1,054. It produces excellent wine.

MONTIGNY-AUX-AMOGNES, a village of France, in the dep. of the Nievre, cant. and 6 m. W of St. Benin-d'Azy, and 8 m. NNE of Nevers, in the plain of the Amognes, on a small stream of the same name, an affluent of the Nievre. Pop. 474. It has a large blast-furnace, and carries on a considerable trade in grain and cattle.

MONTIGNY-SUR-AUBE, a canton, commune, and town of France, in the dep. of the Cote-d'Or, and arrond. of Chatillon-sur-Seine. The cant. comprises 16 com. Pop. in 1831, 8,674; in 1841, 8,949. The town is 12 m. NE of Chatillon-sur-Seine, on the l. bank of the Aube. Pop. 840. It has a fine paper-mill, and several iron-works. Sheep of the merino breed are reared in the locality.

MONTIGNY-SUR-AURE, a town of France, in the dep. of the Eure-et-Loir, cant. and 4 m. NW of Brezolles, and 18 m. W of Dreux, on the r. bank of the Aure. Pop. 500. It has a paper-mill.

MONTIGNY-SUR-CANNE, a village of France, in the dep. of the Nievre, cant. and 9 m. S of Chatillon-en-Bazois, and 17 m. SW of Château-Chinon, in a narrow valley, on the Quenn, an affluent of the Aron. Pop. 684.

MONTIGNY-LE-CHARTIF, a village of France, in the dep. of the Eure-et-Loir, cant. and 8 m. ESE of Thiron-de-Gardais, and 17 m. E of Nogent-le-Rotrou. Pop. 1,450.

MONTIGNY-LEUCOUP, a commune of France, in the dep. of the Seine-et-Marne, and cant. of Donne Marie, 16 m. SW of Provins. Pop. 1,172. It has a manufactory of pottery, and extensive tile and brick kilns.

MONTIGNY-LES-METZ, a commune of France, in the dep. of the Moselle, cant. and 2 m. SW of Metz, on the r. bank of the Moselle. Pop. 1,189. It has manufactories of hair-cloth and of animal black, and several nursery-gardens.

MONTIGNY-LE-ROI, a canton, commune, and town of France, in the dep. of the Haute-Marne, and arrond. of Langres. The cant. comprises 15 com. Pop. in 1831, 6,468; in 1841, 6,700. The town is 12 m. NE of Langres, near the source of the Meuse. Pop. 1,211. It has manufactories of iron-ware.

MONTIGNY-LES-TILLEUL, a department and commune of Belgium, in the prov. of Hainault, arrond. and 4 m. SW of Charleroi, and 4 m. SE of Fontaine-l'Evêque. Pop. 1,374.

MONTIGNY-SUR-VINGEANNE, a village of France, in the dep. of the Cote-d'Or, cant. and 4 m. NE of Fontaine-Francaise, 29 m. NE of Dijon, on the Vingeanne. Pop. 400. It has excellent iron-forges.

MONTIJO, a town of Estremadura, in the prov. and 17 m. E of Badajoz, partido and 17 m. W of Merida, in a plain, on the r. bank of the Guadiana. Pop. 4,150. It has a fine parish-church, a convent, a palace, and a public granary, and possesses manufactories of linen, sackcloth, and coarse woollen fabrics.

MONTILLA, a judicial partido and town of Spain, in Andalusia, in the prov. of Cordova. The partido comprises 3 pueblos. The town is 20 m. NNW of Cordova, and 14 m. NNE of Don-Gonzalo, on a hill. Pop. 13,224. It is well-built, and has 2 parish-churches, several convents, 3 hospitals, several schools, and several charitable institutions. It has manufactories of pottery, oil, and coarse cloth, and several mills. The environs are noted for their wine, and pasture large numbers of cattle. M. was formerly fortified, and possessed a strong castle, which was destroyed by Ferdinand the Catholic in 1508.

MONTILLIERS, a village of France, in the dep. of the Maine-et-Loire, cant. and 3 m. NNE of Vihiers, and 22 m. WSW of Saumur. Pop. 1,100.

MONTILLY, a village of France, in the dep. of

the Orne, cant. and 4 m. W of Athis, and 17 m. N of Domfront, near the r. bank of the Noireau. Pop. 1,500.

MONTILS, a village of France, in the dep. of the Charente-Inferieure, cant. and 6 m. NNE of Pons, and 10 m. SSE of Saintes. Pop. 1,186.

MONTILS (Les), a commune of France, in the dep. of the Loir-et-Cher, cant. and 8 m. S of Blois, on the r. bank of the Beuvron. Pop. 578.

MONTIRAT, a commune and village of France, in the dep. of Tarn, 18 m. N of Albi. Pop. 2,026.

MONTIVILLIERS, a canton and town of France, in the dep. of Seine-Inferieure, on the small river Lézarde. Pop. of cant. 13,636; of town, 3,920. The latter has manufactories of cottons, leather, paper, woollens, and lace; also oil-mills, breweries, and beet-root sugar-works.

MONTJALERA, a town of Russia, in the gov. of Poltawa, 21 m. NNE of Krementshug.

MONTJAUX, a commune and village of France, in the dep. of Aveyron, cant. of Saint-Bauzeley. Pop. 1,511.

MONTJAY, a village of France, in the dep. of Hautes-Alpes, cant. and 6 m. ESE of Rozans, on the Blasance. Pop. 837.

MONTJEAN, a commune and town of France, in the dep. of Maine-et-Loire, cant. of Sanct-Florent-le-Viel, on the l. bank of the Loire. Pop. 2,404.

MONTJOIE, or Montshau, a town of the Prussian prov. of the Rhine, in the duchy of Juliers, 16 m. SSE of Aix-la-Chapelle, on the Roer. Pop. in 1840, 2,756. It has a castle on an eminence, and is surrounded by steep rocks. It has extensive woollen manufactories, dye-works, and iron forges.

MONTJOIRE, a village of France, in the dep. of Haute-Garonne, cant. and 9 m. SE of Fronton. Pop. 812.

MONT-JOUY, a strong fortress of Spain, in the prov. and 1 m. SW of Barcelona, on a hill of the same name. It commands the town, citadel, and harbour of Barcelona.

MONTJOYE, a village of France, in the dep. of Ariege, cant. and 1 m. E of Saint-Lizier. Pop. 1,300.—Also a village in the dep. of Lot-et-Garonne, cant. and 4 m. E of Francescas, on the Saolle. Pop. 684.—Also a village in the dep. of Manche, cant. and 2 m. NE of Saint-Pois. Pop. 970.—Also a village in the dep. of Tarn-et-Garonne, cant. and 7 m. N of Valence, on the r. bank of the Saone. Pop. 850.

MONTLAUR, a village of France, in the dep. of Aveyron, cant. and 6 m. NE of Pontarlier. Pop. 400.

MONTLEBON, a commune and village of France, in the dep. of Doubs, cant. and 1 m. SE of Morteau.

MONTLEHE'RY, a town of France, in the dep. of Seine-et-Oise, 15 m. SE of Versailles, at an alt. of 446 ft. above sea-level. Pop. 1,653. It has a very ancient hotel-de-ville.

MONTLIEU, a town of France, in the dep. of Charente-Inferieure, 18 m. SSE of Jonzac. Pop. 2,030.

MONTLIGNON, a village of France, in the dep. of Seine-et-Oise, cant. and 2 m. WNW of Montmorency. Pop. 300.

MONT-LOUIS, a town of France, in the dep. of Indre-et-Loire, near the Loire, 3 m. E of Tours. Pop. 2,300.—Also a strongly fortified town in the dep. of Upper Pyrenees-Orientales, situated near the r. bank of the small river Tet, 18 m. WSW of Prades. Pop. 1,100. It is regularly built, and has a citadel constructed by Vauban, with good barracks.

MONLUÇON, an arrondissement, canton, and town of France, in the dep. of the Allier.—The arrond., comprising 6 cant., has an area of 208.916 hect. Pop. in 1841, 75,703; of cant. 19.095.—The town is situated on the r. bank of the Cher, at the entrance of the canal of Berry, and at an alt. of 564 ft. above sea-level. Pop. 5,740 in 1841; in 1831, 4,991. It has manufactories of lace, ribbons, serge, and woollens.

MONTLUEL, a commune and town of France, in the dep. of Ain, 24 m. SE of Trevoux, near the r. bank of the Rhine. Pop. 2,946. It has manufactories of army clothing and of packing cloth.

MONTMARAULT, a town of France, in the dep. of Allier, 22 m. SSW of Moulins. Pop. 1,419. It has manufactures of machinery and cutlery. Coal is wrought in the vicinity.

MONTMARTIN-EN-GRAIGNES, a town of France, in the dep. of La Manche, near the mouth of the river Vire, 9 m. N of St. Lô. Pop. 1,466.

MONTMARTIN-SUR-MER, a commune and town of France, in the dep. of Manche, arrond. and 4 m. SW of Coutances. Pop. 1,470: of cant. 12,493.

MONTMARTRE, a village of France, immediately to the N of Paris, on a hill of the same name which commands a great part of the city, 4 m. S of Saint-Denis, and now within the enceinte of the city fortifications. Pop. in 1841, 7,802. It has extensive chemical works, scagliola works, oil-cloth factories, and bronze foundries. It was the scene of some sharp fighting between the French and Allies on the 30th March 1814, the day before the surrender of Paris to the Allies.

MONTMAUR, a village of France, in the dep. of Aude, near the canal of Languedoc, 6 m. NW of Castelnaudary. Pop. 655.—Also a village in the dep. of Hautes-Alpes, cant. of Vergne, 9 m. W of Gap. Pop. 200.

MONTMEDY, an arrondissement, canton, commune, and town of France, in the dep. of the Meuse. The arrond. comprises an area of 128,650 hect., and contains 6 cants. Pop. in 1831, 66,947; in 1841, 69.664. The cant. comprises 27 coms. Pop. in 1831, 14,113; in 1841, 15.796. The town is 27 m. N of Verdun, and 57 m. N of Bar-le-Duc, on the r. bank of the Chiers, which is here crossed by a bridge, a little above the confluence of the Othain. Pop. in 1789, 1,886; in 1841, 3,169. It consists of two parts, one of which is situated on a steep height, and is defended by advanced works of considerable extent. The other lies on the river, in a plain, and possesses as its only defence a wall flanked with bastioned towers. The houses are ill-built, and the streets irregular, and, with the exception of a military hospital, the barracks, and a prison, it contains no public buildings worthy of notice. It has manufactories of hosiery, of nails, and of vinegar, several tanneries, a brewery, and several oil, flour and saw-mills. The trade consists principally in leather, hides, gloves and other articles in leather, nails, and grain. In the vicinity are quarries of freestone, and at the distance of 6 m. is the abbey of Orval, in which Louis XVI. and his family took refuge on their arrest at Varennes. M. is a town of considerable antiquity. Its walls were built in 1220. In 1541 it was taken by the French; again in 1552; and again from the Spaniards in 1657.

MONTMEILLAN. See Montmellan.

MONTMELARD, a commune of France, in the dep. of the Saone-et-Loire, cant. and 4 m. WNW of Matour, and 22 m. W of Macon, on a height a little to the NW of the mountain of Crozaut. Pop. 1,139.

MONTMELLAN, Montmeillan, or Montemigliano, a town of Sardinia, in the dio. of Savoy, cap. of a mandemento, in the prov. of Savoy Proper, 11 m. SE of Chambery, and 27 m. NE of Grenoble, at an alt. of 295 yds. above sea-level, on the r. bank of the Isère, which is here crossed by a bridge, and on the roads from Italy by Mont Cenis and the Little St. Bernard. Pop. 1,500. The situation it occupies

is no less strong than beautiful, but the town itself consists of only a long, wide street, almost circular, and extremely steep. It has little trade, but its wines are esteemed the best in Savoy. M. is supposed to occupy the site of the ancient *Mantala*, which was burned in the 4th cent. On being rebuilt it was fortified and defended by a good citadel, and became an important boulevard of the states of Savoy. In 1691 it was entered by Catinat, and partly destroyed, and it has twice subsequently fallen into the hands of the French.

MONTMERLE, a commune and town of France, in the dep. of the Ain, cant. and 8 m. S of Toissey, and 11 m. N of Trevoux, on the l. bank of the Saone, near a height on the summit of which is a convent. Pop. 1,801. It has a manufactory of earthenware, and a tile-work; and carries on a considerable trade in fruit, horses, cattle, staves, and wood-ware. The locality affords wine and fruit.

MONTMEYRAN, a commune of France, in the dep. of the Drome, cant. and 6 m. SSW of Chabeuil, and 9 m. SSE of Valence. Pop. 1,842.

MONTMIRAIL, a canton, commune, and town of France, in the dep. of Marne, arrond. of Epernay.—The cant., comprising 24 coms., had a pop. of 9,396 in 1841. The town is situated near the r. bank of the Petit-Morin, 20 m. SW of Epernay. Pop. 2,545. It has an active trade in the agricultural produce of the surrounding district, and in mill-stones which are quarried in the vicinity.—Also a cant. and v. in the dep. of Sarthe, arrond. and 30 m. SE of Mamers, near the Braye. Pop. of cant. in 1841, 8,964; of com. 912.—Also a com. in the dep. of Drome, cant. of Romans. Pop. 1,958.

MONTMIREY-LA-VILLE, a canton and commune of France, in the dep. of Jura, 8 m. N of Dole. Pop. of cant. 7,153; of com. 544.

MONTMOREAU, a canton and town of France, in the dep. of Charente, arrond. and 15 m. ESE of Barbezieux, on the r. bank of the Tude. Pop. of cant. 10,119; of com. 436.

MONTMORENCY, a river of Canada, which falls into the St. Lawrence about 9 m. below Quebec. It runs in a very irregular course, first through a thickly wooded country, and then over a bed of broken rocks, through a richly cultivated country, until, not far from the spot where it discharges itself into the St. Lawrence, it comes to the brink of a precipice, down which it descends in one uninterrupted and nearly perpendicular fall of 220 ft. The stream of water, except at the time of floods, is not great, but broken into foam, and much dilated in its swift descent, in its fall appears to be a sheet of water of no inconsiderable magnitude. The breadth of the river from bank to bank is about 50 ft. only. In summer, the volume of water is greatly reduced, but before winter sets in it is immense.

MONTMORENCY, a canton and town of France, in the dep. of Seine-et-Oise, 8 m. N of Paris. Pop. 1,900. There are hot sulphureous springs here.—Also a town in the dep. of Aube, 23 m. N of Troyes.

MONTMORILLON, an arrondissement, canton, and town of France, in the dep. of Vienne.—The arrond. has an area of 164,622 hect. Pop. in 1841, 57,219. It comprises 6 cants.—The pop. of the cant. in 1841 was 11,319.—The town is situated on the river Gartempe, 17 m. ESE of Poitiers. Pop. 3,658. It has manufactories of paper, and a considerable traffic in wool and in cattle.—Also a commune and village in the dep. of Puy-de-Dome, 20 m. ESE of Clermont-Ferrand. Pop. 1,200.

MONTMORIN, a town of the United States, on the Ohio river, 18 m. below Pittsburg.

MONTMOROT, a village of France, in the dep. of Jura, 1 m. W of Louis-le-Saulnier. Pop. 1,617. It has salt springs, of which the annual produce is about 10,000 cwt.

MONTMORT, a canton and commune of France, in the dep. of Marne, arrond. and 8 m. SW of Epernay, on the l. bank of the Surmelin. Pop. of com. 609; of cant. 8,037.

MONTODINE, a town of Austrian Lombardy, in the deleg. and 10 m. ESE of Lodi, on the Serro, 2½ m. above its junction with the Adda. Pop. 2,000.

MONTODORISIO, a town of Naples, in the prov. of Abruzzo-Citra, 3 m. WSW of Il Vasto. Pop. 2,500.

MONTOIRE, a town of France, in the dep. of Loire-Inferieure, 30 m. WNW of Nantes. Pop. 4,500. It has manufactories of vitriol.—Also a town in the dep. of Loir-et-Cher, 24 m. WNW of Blois. Pop. 2,475. It has manufactories of linens and woollens, hosiery, paper, and leather.

MONTOIRON, a village of France, in the dep. of the Vienne, cant. and 5 m. E of Vouneuil-sur-Vienne, and 7 m. SSE of Chatellerault.

MONTOIZON, a village of France, in the dep. of the Drome, cant. and 7 m. NW of Crest, and 11 m. S of Valence.

MONTOLIEU, a commune and town of France, in the dep. of the Aude, cant. and 5 m. NNE of Alzonne, and 11 m. NW of Carcassonne, in a valley, at the confluence of the Durre with the Rougeaune. Pop. 1,727. It has an old castle, supposed to have been built in 1146 by Roger, Viscount Carcassonne. It possesses manufactories of common cloth, Tunis caps, hosiery, and a spinning and several fulling-mills, and in the environs several tanneries and iron-works. This town bore in the Middle ages the name of *Castrum Malasti*, and was celebrated for its manufacture of fine cloth for the markets of the Levant. Its present appellation (*Mons Oliveti*) is derived from an adjacent olive-planted hill.

MONTON, a town of France, in the dep. of the Puy-de-Dome, cant. and com. and 1 m. W of Veyre, and 9 m. S of Clermont-Ferrand. Pop. 1,600. It has several tanneries.

MONTONA, a town of Austria, in Illyria, in the gov. and 30 m. S of Trieste, circle and 10 m. NW of Pisino, on the Quieto, and near a forest of the same name, reserved for the imperial marine. Pop. 1,000.

MONTONCELLO (Puy-de), a mountain of France, in the dep of the Puy-de-Dome, cant. of St. Remy, 6 m. NE of Thiers. It belongs to one of the E ramifications of the Auvergne chain.

MONTONE, a river of Italy, which has its source in the grand-duchy of Tuscany, and prov. of Florence, near San Benedetto-in-Alpe, on the N side of the Apennines; runs NE; enters the States-of-the-Church, in the leg. of Ravenna; and 5 m. from the town of that name throws itself into the Adriatic, after a course of 48 m.—Also a town of the Papal states, in the deleg. and 19 m. N of Perugia, and 13 m. W of Gubbio.—Also a town of Sicily, in the prov. of Syracuse, district and 7 m. WSW of Modica. Pop. 4,000.

MONTOPOLI, a town of the grand-duchy of Tuscany, in the prov. and 24 m. WSW of Florence, vicariat and 4 m. W of S. Miniato. Pop. in 1839, 3,020.

MONTORFANO, a village of Austria, in Lombardy, in the prov. and 3 m. SE of Como, on the E bank of a small lake of the same name.

MONTORIO, a town of Naples, in the prov. of Abruzzo-Ultra, district and 7 m. SSW of Teramo, and 36 m. NW of Chieti. Pop. 2,300.—Also a town in the prov. of Sannio, district and 5 m. S of Larino, and 5 m. E of Casacalenda. Pop. 1,500.

MONTORO, a judicial partido and town of Spain, in Andalusia, in the prov. of Cordova. The partido

comprises 3 pueblos. The town is 24 m. ENE of Cordova, and 9 m. NNE of Bujalance, on a height encircled by the Guadalquivir, which is here crossed by a fine bridge. Pop. 10,732. It is of ancient foundation, but is well-built, and contains several fine fountains, a parish-church, a convent, 2 hospitals, and several other charitable institutions. It has manufactories of cloth, linen, and pottery, and several fulling, oil, and flour mills. The surrounding district produces fruit, oil, and figs in great abundance.—Also a town in Aragon, in the prov. and 32 m. NE of Teruel, and partido of Aliaga.—Also a town of Naples, in the prov. of the Terra-di-Lavoro, district and 12 m. N of Salerno. Pop. 6,200.

MONTORY, a village of France, in the dep. of the Basses-Pyrenees, cant. and 3 m. SE of Tardets, and 11 m. SW of Mauleon. Pop. 1,000.

MONTOUR, or MONTOURS, a village of France, in the dep. of the Ille-et-Vilaine, cant. and 4 m. NE of St. Brice-en-Cogles. Pop. 1,351.

MONTOURNAIS, a commune of France, in the dep. of the Vendée, cant. and 5 m. SE of Pouzanges. Pop. 1,528.

MONTOURTIER, a village of France, in the dep. of the Mayenne, cant. and 5 m. N of Montsurs, and 15 m. NE of Laval. Pop. 1,050.

MONTOUTO, a town of Portugal, in the prov. of Alemtejo, comarca and 19 m. E of Evora, and 36 m. WSW of Elvas.

MONTPAON, a commune of France, in the dep. of the Aveyron, cant. and 4 m. SW of Cornus, and 14 m. ESE of St. Affrique, near the l. bank of the Sorgues. Pop. 2,102.

MONTPAZIER. See MONPAZIER.

MONTPELLIER, a town of France, the cap. of the dep. of the Herault, situated between the rivers Masson and Lez, in N lat. 44° 17′, E long. 3° 33′, 75 m. WNW of Marseilles, and 368 m. direct distance S by E of Paris. It stands on the declivity of a low hill, which renders the streets in many places steep and irregular; in the interior of the town they are in general winding and narrow; but in the suburbs, which are as large as the town itself, they are laid out with tolerable regularity. The houses generally are of stone, and substantially built. The squares, or open places, are numerous, but none are remarkably spacious or elegant. It has still some fortifications, viz. an old stone wall, and a citadel built by Louis XIV. Of the gates, the finest is that which leads to the Place-du-Peyrou, a promenade outside of the town, said to be one of the finest public walks in Europe, consisting of a grassy platform, raised 10 or 12 ft. above another exterior terrace, surrounded with balustrades, and planted at intervals with trees. The view from it embraces the city, the surrounding country, the Mediterranean, and in very clear weather extends to the SW as far as the Pyrenees. The number of the public buildings, coffee-houses, baths, and other such establishments, owing to its having long been the seat of the states of Languedoc, give M. the look of a larger city than it really is: yet none of these structures are remarkable for elegance. The principal structures are the cathedral, partly in ruins, the hotel-de-ville, the prefecture, the exchange formerly the anatomical theatre, the public hospital, the central prison, the barracks, and the hotel-des-monnaies. The theatre is a neat and even elegant building; but an object of still greater interest is a magnificent aqueduct composed for a length of 880 metres, or 962 yds., of three rows of arches, which conveys the water from a mountain 3 m. distant, to a grand reservoir, from which the water is plentifully conveyed in pipes to supply the different quarters of the city. —The pop. in 1789 was 33,202; in 1831, 35,825; in 1841, 40,746. The reputation of M. for a pure air and mild climate long made it a favourite residence of invalids from England, particularly of consumptive patients. Its merits in this respect have of late been questioned. It is said to have a variable climate, and to be exposed to the *mistral*. The mean temp. of the year is 59° 5′; of winter 44° 2′; of summer 76°.

M. is the seat of a college royal, or one of the great provincial schools, which was attended by 310 pupils in 1842, and likewise a normal school. In 1801 a school of medicine was erected here, and the bishop's palace, a large building with several fine apartments, given to the professors for their lectures. It has 14 chairs, and 16 professors. Its anatomical theatre is a large building, capable of containing 2,000 persons; and its library contains 35,000 vols. The botanical garden, situated near the Place-du-Peyrou, is divided into two parts, the one for plants, the other for trees; the latter is always open, and serves for a public promenade. It was founded in 1593, and was long superintended by the celebrated M. de Candolle. The other public institutions are a library with 38,000 vols., a museum with cabinets of natural history and anatomy, and the observatory. There is here likewise a literary society of some note, a society of agriculture, and a museum of painting and sculpture founded in 1825 by Baron Fabre, which possesses a large collection of paintings and engravings, and a library of 15,000 vols.

M. is only 5 or 6 m. from the sea, and communicates with it through the medium of the Canal-de-Grave; the commodious little harbour of Cette, 17 m. to the SW, serves as its port, and is connected with it by the railway from Nismes to Cette, which passes M. The principal trade is in the products of the neighbouring country, particularly in wine, flax, and dried fruits, oil, and wool. A brisk trade is also based on its local manufactures, particularly in verdigris, saltpetre, brandy, liqueurs, chemical compositions, and essences and perfumery, a branch of industry common in the S of France, and here carried to a great length. Blankets, cottons, paper-hangings, cutlery, and surgical instruments are also made here. This part of France is hilly, and the sheep pasturage extensive; wool is consequently abundant, and woollen manufactures extensive. M. is the seat of the different branches of the departmental administration, and the see of a bishop, a suffragan of Avignon, whose diocese comprehends the dep. of Herault.—M. is said to have been founded so far back as the age of Charlemagne. It was the *Mons Pessulanus* or *Mons Puellarum* of the Middle ages. In the 12th cent. it was one of the chief commercial places in France. It was acquired by Philip-de-Valois in 1349. The Calvinists held it in 1622, when it was taken, after a long siege, by Louis XIII. —The cant. of M. comprises 16 coms., with a pop. in 1841 of 51,637.—The arrond., comprising 12 cants., has an area of 201,253 hect., with a pop. of 131,815 in 1841.

MONTPELLIER, a township of Washington co., in the state of Vermont, of which it is the capital, on an alluvial plain, at the junction of the N and S branches of Winooski, or Onion river, and surrounded by hills, in N lat. 44° 16′, and W long. 71° 33′, 38 m. ESE of Burlington, 60 m. N of Windsor, and 150 m. NNE of Albany. Pop. in 1830, 1,792; in 1840, 3,725. The surface is hilly. The principal v. is in the SW part of the township, and 10 m. NE of the centre of the state, on Onion river, and intersected by the road through the Green mountains. Pop. 1,700. It has a fine state-house.—Also a village of Monroe co., in the state of Georgia, 17 m. W of Macon.—Also a village of Blackford co., in

the state of Indiana, 81 m. NE of Indianapolis, on the S side of Salamanie river.

MONTPENSIER, a commune of France, in the dep. of the Puy-de-Dome, cant. and 1½ m. NE of Aigueperse, and 12 m. NNE of Riom. Pop. 638. Louis VIII. died here in 1226, on his return from Guyenne.

MONT-PERDU. See PERDU (MONT).

MONTPEYROUX, a commune of France, in the dep. of the Aveyron, and cant. of Laguiole, 9 m. NNE of Espalion. Pop. 2,032.—Also a com. and town in the dep. of the Herault, cant. and 5 m. NNW of Gignac, and 11 m. ESE of Lodève. Pop. 1,713. It has manufactories of olive-oil, brandy, and soap; and has a considerable trade in linen, oil, almonds, and drugs. Silk and almonds are extensively cultivated in the environs.

MONTPEZAT, a canton, commune, and town of France, in the dep. of the Ardeche, and arrond. of Largentiere. The cant. comprises 7 coms. Pop. in 1831, 9,900; in 1841, 9,706. The town is 14 m. NNW of Largentiere. Pop. in 1841, 2,902. It has several silk-mills, and carries on a considerable trade in chestnuts, grain, timber, cattle, cloth, and linen.—Also a com. in the dep. of the Lot-et-Garonne, cant. and 5 m. N of Prayssas, and 12 m. NNW of Agen. Pop. 1,687.—Also a cant., com., and town in the dep. of the Tarn-et-Garonne, and arrond. of Montauban. The cant. comprises 6 coms. Pop. in 1831, 7,556; in 1841, 7,741. The town is 18 m. NNE of Montauban. It has quarries of limestone.—Also a town in the dep. of the Gers, cant. and 6 m. SSE of Lombes, near the l. bank of the Gradou. Pop. 450.

MONTPINCHON, or MONTPINSON-LA-SALLE, a commune of France, in the dep. of the Manche, and cant. of Cerisy-la-Salle, 6 m. E of Coutances. Pop. 1,936. It has several flour-mills.

MONTPONT, a canton, commune, and town of France, in the dep. of the Saone-et-Loire, and arrond. of Louhans. The cant. comprises 5 coms. Pop. in 1831, 6,264; in 1841, 6,993. The town is 6 m. S of Louhans, and 26 m. NE of Maçon, on the Saone. Pop. 2,259. It has manufactories of earthenware and hardware, and an oil-mill. See also MONPONT.

MONTQUHITTER, a parish in Aberdeenshire, 6 m. E of Turiff. It extends about 9 m. from N to S, by 6 m. from E to W. Pop. in 1831, 2,004; in 1841, 2,074. It comprises the villages of Cumineston and Garmond.

MONTRADOCK, a town of Borneo, in the kingdom and about 60 m. SW of Sambas, finely situated in the midst of a plain. It is about 3 m. in length, and is built in the Chinese style. In the environs are mines of gold.

MONTREAL, an island of Lower Canada, at the confluence of the Grand Ottawa river with the St. Lawrence, 580 m. from the mouth of the latter river. It is of a triangular shape, 32 m. long, by from 5 to 10½ m. broad. The Rivieres-des-Prairies separates it on the NW from Isle Jesus, which is 21 m. long, and 6 m. wide, and is connected with it by a wooden bridge. The island forms the county of M., and is divided into the 9 parishes of St. Ann, St. Genevieve, Pointe-Claire, La Chine, Sault-au-Recollet, St. Laurent, Rivieres-des-Prairies, Pointe-aux-Trembles, and Longue Pointe. In the neighbourhood of the city there are two or three considerable elevations of hornblende rock: Mont-Real, the largest of these, stands at the distance of about 1 m. from the town. The base of this mountain is surrounded with country-houses, orchards, and gardens; the remainder is covered with lofty trees. The view from this elevation embraces a prodigious expanse of country, with the river St. Lawrence winding through it, and flowing with a smooth stream, after passing the tremendous rapids above the town. On the l. appears the city, with its lofty dwellings of dark limestone, its painted wooden edifices, churches, monasteries, glittering spires, and shipping. With the exception of the mountain, the ridge of the Coteau-St.-Pierre, and one or two smaller ones of no great elevation, the island exhibits a level surface watered by several little rivers and rivulets, as La Petite-Rivière-St.-Pierre, Rivière-Dorval, Ruisseau-de-l'Orme, Ruisseau-de-Notre-Dame-des-Neiges, La Coulée-des-Roches, Ruisseau-de-la-Prairie, Ruisseau-Migeon, and a few others of inferior note. These streams turn numerous grist and saw-mills in the interior, while many more around the island are worked by the great rivers. From the city to the eastward the shores are from 15 to 20 ft. above the level of the St. Lawrence; but in the opposite direction, towards La Chine, they are low; between the Coteau-St.-Pierre and the river the land is so flat, and particularly near the little lake St. Pierre so marshy, as to induce a conjecture that it was once covered by water. Over this place a canal has been opened, by which a direct communication between the city and La Chine is formed, and the difficult passage of the rapid of St. Louis avoided. The soil of the whole island, if a few insignificant tracts be overlooked, can scarcely be excelled in any country, and is highly productive in grain of every species, vegetables, and fruits of various kinds; there is hardly any part of it but what is in the most flourishing state of cultivation, and may justly claim the pre-eminence over any other of Lower Canada. Several roads running from NE to SW, nearly parallel to each other, are crossed by others at convenient distances, so as to form a complete and easy communication in every direction. There is a good turnpike-road from M., almost in a straight line, to the village of La Chine, a distance of 8 m., by which the constant intercourse between these places is rendered easy. By this route all the commodities intended for Upper Canada were formerly conveyed to the place of embarkation; but the canal has superseded the turnpike, as regards at least the transport of heavy articles of trade. Between the city and the village there is a great variety of prospects, some of which are very romantic. A mile or two from the town, near the tanneries, the road ascends a steepish hill, and continues along a high ridge for more than 3 m., commanding a beautiful view over the cultivated fields below, the rapid of St. Louis, the islands in the St. Lawrence, and the varied woodland scenery on the opposite shore; descending from the height, it passes over a flat country until it reaches La Chine. [*Bouchette.*] This island is a seignory belonging to the seminary of St. Sulpice, by which order the island was originally settled about the year 1657.—The surrounding islands and river-channels may be here briefly noticed. About midway of the Riviere-des-Prairies is the strong rapid called the Sault-au-Recollet. The rafts of timber brought down the Ottawa from the upper townships descend this river into the St. Lawrence at the Bout-de-l'Isle. The communication between Isle-Jesus, and the islands of M. and Bizard, and the mainland, is kept up by several ferries in convenient situations for maintaining a continual and sure intercourse.—Isle Bizard, separated from the SW end of Isle Jesus by the Riviere-des-Prairies, is nearly of an oval form, rather more than 4 m. long, by 2 m. broad. It is a place of great fertility, wholly cleared and cultivated. A good road passes round it near to the river, and another crosses it about the middle; by the sides of these the houses are pretty numerous, but there is neither village, church, nor mill upon it.—Isle Perrot lies off the SW end of the island of M.

It is 7 m. or a little more in length, and nearly 3 m. in breadth at its widest part. The soil is of a light sandy nature generally.

MONTREAL, a district of Lower Canada, bounded on the NE by the district of Three Rivers; on the S by the states of New York and Vermont; on the SW by the prov. of Upper Canada and the Grand or Ottawa river; and on the N and NW it may be supposed to run as far as the limits of the prov. in that direction, which is about the 52d parallel of N lat. The perpendicular breadth from St. Regis, along the general course of the river, is 73½ m. The area of the district is 44,711 sq. m. It was divided in 1844 into the following counties:

	Pop. in 1844.
Berthier,	26,859
Leinster,	25,533
Terrebonne,	20,646
Two Mountains,	26,835
Ottawa,	12,434
Montreal,	64,306
Vaudreuil,	17,063
Beauharnois,	28,746
Huntingdon,	36,204
Chambly,	17,155
Vercheres,	13,167
Richelieu,	20,888
St. Hyacinthe,	21,937
Rouville,	22,898
Shefford,	10,105
Missisquoi,	10,865
	375,637

MONTREAL, a city of Upper Canada, on the S side of the island of Montreal, on the river St. Lawrence, in N lat. 45° 30′, W long. 73° 25′, 142 m. SW of Quebec. It covers above 1,200 acres, including the suburbs; stretches along the river from N to S about 2 m.; and has above 100 streets, and 6,200 houses. Seen at a distance it appears a compact mass of buildings confined within narrow boundaries. It is divided into an upper and a lower town, although the elevation of one above the other is scarcely perceptible. The streets are airy, the new ones particularly of a commodious width, some of them running the whole length of the town, parallel to the river, and they are kept in excellent repair. The houses are for the most part built of a greyish stone, many of them large, handsome, and in a modern style, and from 3 to 4 stories high. Sheet-iron or tin is the universal covering of the roofs. Some travellers remark a heavy sameness of appearance which pervades all the streets, and is aided by the darkness of the stone and the custom of painting the iron-covered doors and window-shutters of a similar colour. The only open place or square in the town, except the two markets, is the Place-d'Armes, which under the French government was the place where the garrison troops paraded. The principal street of the lower town extends from N to S, the whole length of the city, near the river's edge. Here are situated the wholesale and retail stores of the merchants and traders, the lower market-place, the post-office, and the Hotel-Dieu; and though narrow, this street, called Paul-street, presents a scene of greater bustle than any other part of the town, and is the chief mart of trade and commerce. Several short streets proceed westward from Paul-street, and communicate with that of Notre-Dame, which runs in a parallel line to Paul-street, the whole length of the city. The dwelling-houses of the principal merchants are mostly situated in Notre-Dame street, and other parts of the upper town. These two streets are considerably lengthened to the N by the suburb of Quebec, and to the S by the suburbs of St. Antoine and Recollet. In the centre of Notre-Dame street a long street branches off to the W, and forms the suburb of St. Lawrence. It is also the high road to the interior of the island. Along the bank of the river is an extensive line of quays and warehouses of massive and solid masonry. Opposite to the town is St. Helen's isle, which is fortified; and beside it the isle of Nuns, and several others. Among the edifices which attract notice are the Hotel-Dieu, established in 1644, for the purpose of administering relief to the destitute sick, and administered by a superior and 36 nuns, who attend and nurse the patients; the convent of Notre-Dame, composed of a superior and 60 sisters, distinguished as *Sœurs noir* or Black nuns, founded in 1650, for the instruction of females in all the necessary branches of their education; the general hospital, or convent of the *Sœurs gris* or Grey sisters, a refuge for invalids, and for such of the poor as are afflicted with the infirmities of age, founded in 1752. The Roman Catholic cathedral church, in the Place-d'Armes, is a large substantial stone building, 255 ft. in length, by 134 ft. in breadth. It was built in 1824-9; and comprises 7 chapels, and 9 spacious aisles; and can accommodate 10,000 persons. In the same square stands the bank of M., which cost 200,000 d.; and the seminary of St. Sulpice, for the education of youth, a large and commodious building, adjoins the cathedral. It occupies three sides of an oblong area, and is surrounded by spacious gardens. The new college in Recollet suburbs is a handsome edifice, built for the purpose of extending the plan of education beyond the original establishment. The Macgill college was founded in 1821. The principal English church is a handsome building in the Grecian style. The court-house in Notre-Dame street is a plain handsome building, where the courts of civil and criminal judicature are held. The jail of the district stands near the court-house, in a healthy situation, on the site of the old one which was destroyed by fire in 1803. The government-house, on the S side of Notre-Dame street, is an old building, of rude architecture, and little entitled to notice. At the W extremity of the same street stands the old monastery of the Recollets; and at the upper end of the new market-place is a handsome monument, erected in honour of Nelson. The general hospital, erected in 1821-2, is a large edifice. — The natural history society of M. established in 1826, has a good library, and a very extensive museum.—The mechanics' institute, incorporated in 1845, numbers 569 members.

The pop. of M. in 1825 was 22,357; in 1831, 27,297; in 1844, 44,093, of whom 29,280 were Roman Catholics. "The signs of progression and of stationary habits," says a recent traveller, "are nowhere more strikingly conspicuous than at Quebec and M.; and nowhere, perhaps, are domestic contrasts of almost every kind exhibited in more varied shapes. Side by side are seen the modern commercial store and the ancient secluded convent. Here appears the harbour enlivened by an array of British shipping; there, the lingering remnants of primitive inactive life. Jostling each other on the narrow causeway, or grouped in the wider square or market-place, are the red-coated soldier of England and the cowled priest of France; the antiquated *habitant* of the country in his homespun suit of grey, and the spruce denizen of the town attired in the latest European fashion; the swarthy aborigine of the soil enveloped in his blanket, with his squaw carrying her *papoose* at her back, and the British artisan or labourer in his peculiar garb; while, to crown the whole, the alternate sound of two conflicting languages breaking on your ear at every step you take, leaves you momentarily undecided as to whether you be not in some provincial town of France or England; the first impression, moreover, being strengthened by the general appearance of the streets and houses, and the last by the British designation of many of the

thoroughfares, and the preponderance of British names along their line of frontage."

The principal manufacturing establishments in M. are cast-iron foundries, engine-making yards, distilleries, breweries, soap, candle, and tobacco manufactories, and ship-building yards. It was formerly the grand depot of the principal trading company of North America who conduct the fur trade. It is also the channel through which is carried on the commerce between Canada and the United States, by Lake Champlain and the Hudson. In winter its trade is not suspended, but is actively conducted with the interior by means of sledges. The harbour is not large, but always secure for shipping during the time the navigation of the river is open. Vessels drawing 15 ft. water can lie close to the shore to receive or discharge their cargoes. The general depth of water is from 3 to 4½ faths., with good anchorage everywhere between Market-gate island and the shore. In spring, this island is nearly submerged by the rising of the river; but it is always useful in protecting ships anchored within it from the violent currents of that period. The greatest disadvantage to the harbour is the rapid of St. Mary, about 1 m. below it, the current of which is so powerful, that, without a strong NE wind, ships cannot stem it, and are sometimes detained even for weeks, about 2 m. only from the place where they are to deliver their freight. To obviate this difficulty the La Chine canal was executed. The number of first-rate ships from Great Britain and the Colonies, from the West Indies, Africa, and various ports of Europe, with the steamers to Quebec, Bytown, and various places on the river, and steam-propellers from the lakes, barges, scows, batteaux, and timber-rafts, give the port unusual animation and activity. From the end of November until the middle of May, all intercourse with the ocean by means of the river is closed. This disadvantage will be in a great measure obviated when the railroad from Portland, in the state of Maine, U. S., by Andover, Hereford, and Sherbrooke, is completed. This line is now in operation from M. to Richmond on the St. Francis river, which will be the point of junction with the line from Quebec. From Richmond to Sherbrooke it follows the bank of the St. Francis. Another line, the M. and St. John's, has been prolonged to Rouse's Point, where it joins the line from Boston to Ogdensburg. By this route the traveller can reach Boston in 12, and New York in 16 hours. Another line, now in progress, commences at the Indian village of Caughnawaga opposite to La Chine, and entering the state of New York, in the township of Mooers, unites with the line to Plattsburg on Lake Champlain. Great efforts are being made to render the city approachable by ships of large tonnage, and deepening the channel of communication between this port and Quebec. The shallows of Lake St. Peter have hitherto compelled vessels drawing more than 11 ft. to transfer a sufficient portion of their cargo to lighters to enable them to pass the bars during the summer-season, when the waters are low. In the month of May, when the navigation opens, the depth of water is often 16 and 17 ft.; gradually lessening until it declines to 11 ft., in the months of August, September, and October. The character of Lake St. Peter—which commences 45 m. below M., and extends 40 m. in a NE direction, with a breadth varying from 10 to 15 m.,—is that of a sluggish stream. It is, in fact, an enlargement of the river St. Lawrence, which spreads over the depressed alluvial bottoms. The bed of the lake, where the operations of deepening have been conducted, is a yellow adhesive clay, with occasional deposits of sand. The machinery employed to excavate the bed, consisting of dredging machines and a harrow worked by steam-power, have been found efficient instruments, inasmuch as the engineer predicts that the channel will contain 13 ft. 6 in. of water at the most unfavourable season. The funds provided for these various ameliorations, including quays, steam-dredges, lighthouses, &c., are secured by an impost upon shipping.—The commerce of M. is exhibited in the article CANADA. The comparative value of exports and imports from Quebec and Montreal between the years 1841 and 1848, is shown in the subjoined tables:

VALUE OF EXPORTS FROM QUEBEC AND MONTREAL.

	QUEBEC.	MONTREAL.
1841,	£1,727,726	£700,070
1842,	991,489	728,729
1843,	1,367,651	388,199
1844,	1,486,848	754,231
1845,	2,056,851	720,797
1846,	1,866,456	658,338
1847,	1,831,399	848,982
1848,	1,357,326	391,841

VALUE OF IMPORTS AT QUEBEC AND MONTREAL.

	QUEBEC.	MONTREAL.
1841,	£217,916	£2,068,135
1842,	216,669	2,021,106
1843,	402,227	1,289,571
1844,	655,868	2,475,084
1845,	712,398	2,620,252
1846,	750,982	2,303,908
1847,	796,917	2,063,440
1848,	625,845	1,481,418

In 1850, the value of goods imported at this port was £1,726,350; the entire imports of Canada in the same year being £4,245,217. The exports in 1850 from M. were valued at £436,193; the entire exports from Canada, in the same year, being £2,990,428. The number of ships which entered inwards was 304 = 56,312 tons; of which 88 = 33,140 tons, were from Great Britain, and 92 = 7,912 tons, from British colonies. The number of steamers registered at the port of M. in 1850, was 14 = 1,239 tons, and of sailing-vessels 31 = 3,717 tons. The total registered tonnage of the port being 4,956 tons; and that of all Canada 36,133 tons. The revenue of the port in 1849–50 was £4,272; in 1850–51, £6,732.

History.] In 1640 a few log-houses built close together, on the site of an ancient Indian village called Hochelaga, formed the nucleus of this city, and bore the name of Villemarie,—a name afterwards changed to that of Mont Real from the eminence of that name which commands the city. The convenience of the situation causing a rapid increase, its pop. soon amounted to 4,000. In consequence of the hazards to which the newly established town was exposed from the hostility of the Iroquois, a barrier was drawn round it with palisades, and it was afterwards surrounded by a high wall with battlements. All danger of Indian hostility having long ago ceased, the wall was allowed to fall into decay, and the last remains of the ancient fortification were removed to make way for the introduction of some important improvements for the convenience and embellishment of the place. M. was taken by the English, under the command of General Amherst, in 1760. In 1775 it was taken by the Americans under General Montgomery, but was soon after evacuated. In July 1852, M. was devastated by a dreadful fire, which destroyed from 1200 to 1500 houses, chiefly in Quebec suburb, and consumed property to the value of 4,000,900 d.

MONTREAL, a small island in Lake Superior, near the E coast, in N lat. 47° 9′.—A river of the same name runs into it.

MONTREAL, an island of the Yellow sea, in the Amherst group, archipelago of the Corea, in N lat. 34° 20′, E long. 126° 15′.

MONTREAL, a canton, commune, and town of France, in the dep. of the Gers, and arrond. of Condom. The cant. comprises 9 coms. Pop. in 1831, 11,205; in 1841, 10,401. The town is 9 m. W of Condom, and 32 m. NW of Auch, on the r. bank of the Lauson. Pop. 2,877. It has a wool spinning-mill, a distillery of brandy, lime, brick, and tile-kilns, and a manufactory of hardware.—Also a cant., com., and town in the dep. of the Aude, and arrond. of

Carcassonne. The cant. comprises 9 coms. Pop. in 1831, 7,022; in 1841, 6,839. The town is 12 m. W of Carcassonne, on a height bathed by the Rebenty. Pop. in 1841, 3,062. It contains a fine church and an hospital, is of great antiquity, and was formerly of much greater extent. It was destroyed by the Prince of Wales in 1355, by the Protestants in 1594, and in 1632 was taken by the duke of Montmorency. —Also a town in the dep. of the Yonne, cant. and 4 m. NW of Guillon, and 8 m. NE of Avallon, on the slope of a mountain near the l. bank of the Serein. Pop. 592. It formerly possessed a castle, in which it is said, Francis I. resided.—Also a village in the dep. of the Ain, cant. and 4 m. NW of Nantua. Pop. 645.

MONTREDON, a canton, commune, and town of France, in the dep. of the Tarn, and arrond. of Castres. The cant. comprises 4 com. Pop. in 1831, 7,092; in 1841, 7,609.—The town is 28 m. NNE of Castres, and 26 m. E of Alby. Pop. in 1841, 5,213. —See also SALINELLES.

MONTREDON (NOTRE-DAME-DE), a village of France, in the dep. of the Bouches-du-Rhone, cant. and 4 m. from Marseilles, near the sea. Pop. 550. It has a manufactory of soda.

MONTREGARD, a commune of France, in the dep. of Haute-Loire, cant. and 2 m. SE of Montfaucon. Pop. 1,936.

MONTREGEAU, a canton, commune, and town of France, in the dep. of the Haute-Garonne, and arrond. of Saint-Gaudens. The cant. comprises 16 com. Pop. in 1831, 11,313; in 1841, 11,722.—The town is 9 m. W of St. Gaudens, and 60 m. SW of Toulouse, on the l. bank of the Garonne, which is here crossed by a bridge, and at the confluence of the Neste. Pop. in 1841, 3,081. It has manufactories of hosiery, bonnets, liqueurs, wax and tallow candles, and nails, several tanneries and dye-works, and carries on an active trade in grain, cattle, horses, mules, pigs, wool, leather, hides, timber, and staves.

MONTRELAIS, a commune of France, in the dep. of the Loire-Inferieure, cant. and 3 m. E of Varades, and 12 m. NE of Ancenes, near the r. bank of the Loire. Pop. 2,480. It has manufactories of hosiery and of leather. The environs contain extensive coal-mines, and produce excellent wine.

MONTREN, a village of France, in the dep. of the Dordogne and cant. of Grignols, 9 m. SW of Perigueux. Pop. 1,050.

MONTRESOR, a canton, commune, and town of France, in the dep. of the Indre-et-Loire, and arrond. of Loches. The cant. comprises 10 com. Pop. in 1831, 8,835; in 1841, 8,340.—The town is 10 m. E of Loches, and 32 m. SE of Tours, on the r. bank of the Indroye. Pop. 731. It has an ancient castle, and has manufactories of common cloth.

MONTRET, a canton, commune, and town of France, in the dep. of the Saone-et-Loire, and arrond. of Louhans. The cant. comprises 9 com. Pop. in 1831, 6,379; in 1841, 6,711. —The town is 8 m. NW of Louhans. Pop. 792.

MONTREUIL, a village of France, in the dep. of the Haute-Marne, cant. and 1½ m. SE of Vassy, on the l. bank of the Blaise. Pop. 127.—Also a village in the dep. of the Mayenne, cant. and 3 m. W of Horp, and 8 m. NE of Mayenne. Pop. 600. It has a large forge.

MONTREUIL - L'ARGILLE', a commune of France, in the dep. of the Eure, cant. and 5 m. SSW of Broglie, and 12 m. SSW of Bernay, on the l. bank of the Charentonne. Pop. 842. It has several paper-mills.

MONTREUIL - SOUS - BOIS, a commune of France, in the dep. of the Seine, cant. and 1½ m. N of Vincennes, and 5 m. E of Paris. Pop. in 1841, 5,337. It has manufactories of porcelain, leather, hardware, and turnery, and several tile and brick kilns. Gypsum is wrought in the locality.

MONTREUIL-BELLAY, a canton, commune, and town of France, in the dep. of the Maine-et-Loire, and arrond. of Saumur. The cant. comprises 15 com. Pop. in 1831, 11,841; in 1841, 11,559.—The town is 11 m. SSW of Saumur, and 33 m. SE of Angers, on the r. bank of the Trouet. Pop. 1,907. This town was formerly fortified; and sustained a long siege by Geoffroy Plantagenet, count of Anjou, by whom it was eventually taken and its fortifications destroyed.

MONTREUIL-BONNIN, a commune of France, in the dep. of the Vienne, and cant. of Vouille, 12 m. W of Poitiers, on the Boivre. Pop. 1,346.

MONTREUIL - LE - CHETIF, a commune of France, in the dep. of the Sarthe, cant. and 4 m. SW of Frenay-le-Vicomte or Fresnay-sur-Sarthe. Pop. 1,228. In the vicinity are several iron-works.

MONTREUIL - SUR - MER, an arrondissement, canton, and town of France, in the dep. of the Pas-de-Calais.—The arrond., comprising 6 cants., has an area of 112,688 hect. Pop. in 1841, 79,711; of cant. 17,455.—The town is situated on the l. bank of the Canche, 9 m. from its embouchure in the Channel, and 21 m. SSE of Boulogne-sur-Mer. It has a pretty strong citadel; and is a well-built place, conducting some commerce in wines and brandies by means of its river. The vicinity is marshy.

MONTREUX, a village of Switzerland, in the cant. of Vaud, 10 m. SE of Vevay, on the N bank of the lake of Geneva. Pop., with that of Chatelard, in 1850, 2,278. mostly Protestants.

MONTREVAULT, a canton and commune of France, in the dep. of Maine-et-Loire, arrond. of Beaupreau, on the r. bank of the Evre. Pop. of cant. 13,537; of com. 579.

MONTREVEL, a town of France, in the dep. of Ain, arrond. of Bourg-en-Bresse, on the l. bank of the Reyssouce, 12 m. SE of Pont-de-Vaux. Pop. 1,408; of cant. 13,537.—Also a village in the dep. of Isère, cant. and 5 m. W of Virieu. Pop. 1,075.

MONTRICHARD, a canton and town of France, in the dep. of Loir-et-Cher, arrond. and 18 m. SSW of Blois. Pop. of cant. in 1841, 14,396.—The town, situated on the r. bank of the Cher, has a trade in wine and wood. Pop. 2,369.

MONTRICOUX, a town of France, in the dep. of Tarn-et-Garonne, cant. and 4 m. E of Negrepelisse, on the r. bank of the Aveyron. Pop. 1,641. Marble is quarried in the vicinity.

MONTRIGAUD, a town of France, in the dep. of Drome, cant. and 4 m. SSE of Grand-Serre, on the r. bank of the Herbasse. Pop. 1,689.

MONTROLLET, a village of France, in the dep. of Charente, cant. and 12 m. ESE of Confolens. Pop. 865.

MONTROND, a village of France, in the dep. of Jura, cant. and 6 m. NW of Champagnoles. Pop. 600.

MONTROSE, a parish in the NE extremity of the maritime district of Forfarshire, bounded on the E by the German ocean, and on the W by Montrose basin. Area, about 3,080 Scottish acres. M. basin is an expanse of nearly ellipsoidal outline, and about 7 m. in circumf. At high water it washes the walls of the gardens which subtend the whole W side of the town of M., and by the regular and rapid rush of waters which it occasions in the action of the tide, both promotes the cleanliness of the borough and prevents the formation of a bar injurious to navigation across the mouth of the river. The beach along the sea-coast is pure sand. A low bank of bluffs and sandy knolls, thinly clad with belt, flanks the line of floodmark from Esk to Esk. Behind this bank, and

parallel to its whole length, stretches a belt of undivided common,—a sandy or very light-soiled tract. A low bank of round water-worn stones, only a few yards in breadth, and used as the line of the Great North mail-road, runs for a mile parallel with the sea, and flanks the sandy grounds. West of this mound the lands are all powerfully fertile, and under prime cultivation. The surface slowly rises toward the NW. Pop. in 1831, 12,055; in 1841, 15,096.

MONTROSE, a royal borough, a seaport, and an important town, stands in 56° 34′ N lat., and 2° 10′ W long.; 8 m. E of Brechin; 30 m. from Dundee; and 70 m. from Edinburgh; in the peninsula which forms the S end of its cognominal parish. The town stretches N and S along Montrose basin, and expands a large wing to the SE along the South Esk. The ground around it, excepting three hillocks or knolls on the basin, and the low sand-bank along the margin of the links, is nearly all a dead-level; but the dryness of the soil, the absence of all marsh and stagnant water, and the sweeping action of the current between the basin and the sea, act favourably on the climate. The town-house has an arcade below, and makes a fine termination to a long spacious area in the centre of the town. The jail is a neat and substantial structure. The M. academy, standing on the links, is an elegant structure surmounted by a neat dome. Near the academy stands the school of the seven incorporated trades, built in 1832. Dorward's house-of-refuge, built in 1839, and affording accommodation for 200 inmates, is a neat building in the old English style of architecture. The lunatic asylum, situated on the links, a ¼ m. SE of the academy, and 250 yds. from the river, is an extensive and commodious edifice, originally built in 1780, and repeatedly enlarged. Till near the end of last cent., communication was maintained across the South Esk with the burgh and the great road to Aberdeen only by means of a ferry at Ferryden. A magnificent suspension-bridge across this river was founded in September 1828, and finished in December 1829, at a cost of about £20,000. The distance between the points of suspension is 432 ft. The roadway is 26 ft. broad between the suspending rails. Including all repairs, the whole cost of the erection has been nearly £27,000. The duties levied at the bridge yield an annual revenue of £1,500. The harbour of M. extends from the bridge 650 yds. down the South Esk, and is very commodious, and furnished with excellent quays. A good wet dock was constructed during last century; a patent slip for the repairing of vessels was provided at a later period; and a dry dock was a few years ago constructed on the opposite bank. Two lighthouses stand on a line, 400 yds. apart, between the harbour and the sea. The shipping belonging strictly to its own harbour, or exclusive of that belonging to subordinate ports, was in 1789, 53 = 3,543 tons; in 1838, 115 = 15,000 tons. In 1848, exclusive of that of the port of Arbroath, which was returned separately, the shipping of M. was 112 sailing-vessels = 14,326 tons. The number of sailing-vessels that entered coastwise in 1848 was 627 = 41,116 tons; of steam-vessels 68 = 8,702 tons; from the colonies, 9 = 2,403 tons; from foreign ports, 39 = 5,908 tons. The principal foreign import is flax, annually brought from the Baltic to the amount of about 2,500 tons. Timber, chiefly fir, is brought from the same quarter to the annual amount of between 1,500 and 1,600 loads. Hemp and tallow are the only other imports from abroad. Exports for home-markets consist, with the exception of some pavement or 'Arbroath stones,' of agricultural produce, fish, and pork. The grain sent from the port is said to be greater in quantity, and to be not lower in quality, than that sent from any other in Scotland. A great part of the produce of excellent salmon-fishings in the river, and along the coast, is sent in a fresh state to the London market, and to the same market and other parts of England are sent vast quantities of dried and salted cod.—The manufactures of the town are very considerable both in importance and in variety. Four flax spinning-mills are driven by steam-power aggregately equal to 129 horse-power, and produce nearly 900,000 spindles a-year. Three other mills connected with the town produce about half the quantity of the town-mills. Between 500 and 600 looms, five-sixths of which are in factories, are all employed on the heavier and finer linen fabrics,—dowlas, sheetings, sailcloth, and bagging. The largest article is bleached dowlas, and the next largest bleached ducks. The minor manufactories are two large tan-works, a foundry, two extensive rope-works and sail-making establishments, five breweries, a starch-work, two soap and candle works, and two large establishments for making machinery. Ship-building, both for the port of M. and for other ports, has long been carried on to a considerable extent, and with a ratio of increase nearly proportioned to the slow but steady prosperity of the town. Bricks and tiles are made in the vicinity. There are in the town a natural and antiquarian society established in 1837, and a museum of mineralogy, zoology, and antiquities; a commercial news-room, and an exchange coffee-room; a public subscription-library, founded in 1785, and containing between 7,000 and 8,000 volumes, a library belonging to the Montrose Reading society, and 2 parochial libraries. The burgh of M. is of high antiquity. The corporation revenue is about £3,000. M. unites with Arbroath, Brechin, Forfar, and Bervie in sending a member to parliament. Constituency in 1839, 387; in 1848, 457. Pop. estimated in 1709, at 6,000; in 1801, at 7,000; in 1821, at 9,000; in 1841, 15,094; in 1851, 15,238.—Montrose, according to Boethius, was anciently called *Celurea*. It is named in 1244 as one of the principal towns of the kingdom which in that year were destroyed by fire. In 1534, Erskine of Dun established a seminary in M. in which the Greek language was taught by persons brought by him from France. This seminary was the earliest appliance in Scotland for conveying a knowledge of Greek. In December 1715, the Chevalier, missing the Frith of Forth, sailed into M., and commenced there his preposterous expedition. The noble family of Graham have from M. the titles successively of Earl, Marquis, and Duke in the peerage of Scotland.

MONTROSE, a township and the capital of Susquehannah co., in the state of Pennsylvania, U. S., 175 m. NE of Harrisburg. Pop. 632.—Also a township of Columbia co., in Pennsylvania.—Also a village in Lee co., in Iowa.

MONTROSE ISLAND, an island in the gulf of Penas, in Western Patagonia. It is 11½ m. long, and 4 m. wide; high, and thickly wooded. Xavier bay, on its N coast, is in S lat. 47° 05′, W long. 74° 16′.

MONTROTIER, a town of France, in the dep. of Rhone, 17 m. W of Lyons. Pop. 1,808.

MONTROUGE, a commune and village of France, in the dep. of Seine, 4 m. SW of Paris. Pop. 7,125. The entrance to the catacombs extending under Paris is at this v.

MONTROUIS, a town in the W part of the island of Hayti, at the head of the bight of Leogane, 5 leagues SE of St. Mark.

MONTROZIER, a commune of France, in the dep. of Aveyron, cant. of Bozouls, on the Aveyron. Pop. 1,218.

MONTS, a town of France, in the dep. of Loir-

et-Cher, 6 m. SE of Blois.—Also a village in the dep. of Vienne, 8 m. SE of Loudun. Pop. 850.

MONTSALVY, a canton and town of France, in the dep. of Cantal, arrond. of Aurillac. Pop. of cant. in 1841, 11,201. The town is 18 m. S of Aurillac. Pop. 1,172.

MONT ST. JEAN, a petty hamlet of Belgium, in the prov. of S. Brabant, 11 m. SE of Brussels, and 6 m. NNE of Nivelles, near the scene of the battle of Waterloo, which has led some French writers to call it the battle of Mont St. Jean. See WATERLOO.

MONT ST. JEAN, a town of France, in the dep. of Sarthe, on the Sarthe, 9 m. E of Beaumont-le-Vicomte.—Also a town in the dep. of Cote-d'Or, 30 m. NW of Beaune. Pop. 1,200.

MONT ST. MICHEL, a strongly fortified village of France, in the dep. of La Manche, situated on a rocky island in Cancale bay, 6 m. SW of Avranches, in N lat. 48° 38′, W long. 1° 30′. Pop. 300, for the most part fishermen.

MONT ST. SULPICE, a large village of France, in the dep. of the Yonne, 6 m. SW of St. Florentin.

MONTSAUCHE, a canton and town of France, in the dep. of Nievre, 14 m. NE of Chateau-Chinon, near the Cure. Pop. of cant. in 1841, 14,207; of town, 1,425.

MONTSAUJEON, a town of France, in the dep. of Haute-Marne, on the Vigeanne, 17 m. S of Langres. Pop. 344.

MONT SAXONEX, a village of Savoy, in the prov. of Faucigny, 6 m. SE of Bonneville.

MONTSECRET, or MONSEGRET, a commune of France, in the dep. of Orne, cant. of Tinchelrai. Pop. 1,243.

MONTSEGUR, a village of France, in the dep. of Ariege, cant. and 4 m. S of Lavelanet, on the l. bank of the Lers. Pop. 587.—Also a v. in the dep. of Drome, cant. and 9 m. E of Pierrelatte. Pop. 760.

MONTSERRAT, or MONSERRAT, a mountain-group of Spain, in the district of Manresa, 28 m. NW of Barcelona, remarkable for its hermitages, and a rich monastery of Benedictines. It extends in the direction of E and W, on the r. bank of the river Llobregat, and is about 24 m. in circumf. It consists of an assemblage of conical calcareous hills rising above each other, and one of which, in N lat. 41° 38′ 59″, attains a height of 3,803 ft. above the level of the sea.

MONTSERRAT, one of the British West Indian islands, 27 m. SW of Antigua, discovered by Columbus in 1493. It is situated in N lat. 16° 45′, W long. 62° 20′. It is about 10 m. long, of an oval form, and is supposed to contain 35,000 sq. acres, or about 48 sq. m., of which almost two-thirds are mountainous, or very barren. It is well-watered and fruitful, at the base of the mountain-slopes, where a light volcanic soil produces excellent coffee and sugar, arrowroot, Indian corn, and cotton; it is also well-suited to the growth of the vine and mulberry; and the planters formerly raised a great deal of indigo. Firewood is shipped to Barbadoes, and timber for mill-works and ship-building to Antigua. In 1844 the value of exports was £26,724; in 1849, £15,048; in 1850, £8,577. The imports in 1844 were £25,994; in 1848, £10,218. The export of sugar in 1845 was 656 hhds.; in 1848, 426 hhds.; of rum in 1845, 36 pun.; in 1848, 11 pun.; of molasses in 1845, 316 pun.; in 1848, 126 pun. The entire relinquishment of cultivation on some estates must account for the falling off in exports and imports. In 1832, this island exported 1,288 hhds. of sugar; 640 pun. of rum; and 289 pun. of molasses; amounting in total value to £32,838. Its chief town is Plymouth, on the SW coast. The island is divided into two parishes. Pop. in 1838, 7,600, of whom six-sevenths were Blacks; in 1846, 7,365; in 1851 nearly 8,000, of whom not above 150 were Whites. The number of schools in 1849 was 87; of pupils, 1,015.—The government is conducted by a governor, a board of council, and a house-of-assembly. The revenue in 1847 was £3,563; in 1848, £2,673; in 1850, £3,171. The expenditure in 1847 was £3,316; in 1848, £2,693; in 1850, £3,073. The amount of taxes per head of the pop. is about 8s. 3½d., but this includes a temporary taxation to pay off debt. In 1668, after the French had made themselves masters of Antigua, M. de la Barre made a descent upon M., which he reduced. In 1712 the French took and burnt all the shipping in the road.

MONTSERRAT, a small island in the gulf of California, situated near the coast, between the islands of Carmen and La Catalina.

MONTSESTIN, a small town of the Sardinian states, in Piedmont, 3 m. SE of Crescentino.

MONT-SEVEROUX, a village of France, in the dep. of Isere, 9 m. SE of Vienne. Pop. 800.

MONTSOREAU, a town of France, in the dep. of Maine-et-Loire, on the Loire, 14 m. ESE of Saumur. Pop. 987.

MONTS-PELE'ES (CAPE DES), a promontory on the N coast of the St. Lawrence, in N lat. 49° 35′.

MONTSURS, a canton and town of France, in the dep. of Mayenne, arrond. and 16 m. NE of Laval, on the Dinard. Pop. of cant. in 1841, 7,975; of town, 1,405.

MONT-TENDRE, one of the Jura mountains, in the Swiss cant. of Vaud, on the SE side of the lake of Joux. Alt. 5,538 ft.

MONT-TORO. See MINORCA.

MONTU-DE-GABBI, a town of the Sardinian states, in the division of Alessandria, 15 m. ENE of Voghera. Pop. 1,400.

MONTUIRI, a town of the island of Majorca, 17 m. E of Palma.

MONTUOSA, a small island in the Pacific ocean, near the coast of Mexico, in N lat. 8° 15′.

MONTURANO, a village of the Papal states, in the deleg. and 4 m. NW of Fermo.

MONTUREUX-SUR-SAONE, a village of France, in the dep. of Vosges, 24 m. SSW of Mirecourt, on the r. bank of the Saone. Pop. 1,200.

MONTURQUE, a town of Spain, in the prov. and 24 m. SSE of Cordova. Pop. 770.

MONTUSCLAT, a village of France, in the dep. of Haute-Loire, cant. and 3 m. ESE of Saint-Julien-de-Chapteuil. Pop. 1,000.

MONTVENDRE, a village of France, in the dep. of Drome, cant. and 2 m. S of Chabeuil. Pop. 780.

MONTVIGNEMAL, a mountain of France, situated in the highest part of the Pyrenean chain, between Mont-Perdu and the Pic-du-Midi, about 8 m. S by E of the former. It attains an alt. of 10,500 ft. above sea-level.

MONTVILLE, a commune of France, in the dep. of Seine-Inferieure, cant. of Cleres, on the Cailly, 10 m. N of Rouen. Pop. 2,581. There are several large spinning-establishments here.—Also a village of France, in the dep. of Seine-Inferieure, cant. and 3 m. SW of Cleres. Pop. 760.

MONTVILLE, a township of New London co., Connecticut, U. S., 36 m. SE of Hartford. Pop. 1,990.—Also a township in Waldo co., in Maine, U. S., 26 m. ENE of Augusta. Pop. 2,153.—Also a village in Medina co., in Ohio.

MONTZEN, a commune and village of Belgium, in the prov. of Liege, 8 m. NE of Verviers. Pop. 1,070.

MONUBLES, a river of Spain, which rises in the prov. of Soria, in the valley of Lenar, and flows SSE to the l. bank of the Jalon.

MONUMENT ISLAND, one of the New Hebrides, to the N of Montague island. It appears to be a rock in the form of a pyramid, inaccessible to every animal but birds.

MONUMENT (Point), a cape of the state of Massachusetts, in Cape Cod bay, in N lat. 41° 55′.

MONY-CREEK, a river of the United States, in Maryland, which joins the Wicomico, a little above its entrance into the Chesapeake.

MONYMUSK, a parish of Aberdeenshire, 19 m. WNW of Aberdeen, between the rivers Don and Oyne. Pop. 895.

MONZA, a considerable town of Austrian Italy, on the river Lambro. 9 m. NNE of Milan. Pop. in 1840, 15,382. It is a place of antiquity, and was once fortified, but is now an open town regularly laid out and well built. It has manufactories of silk, coarse cotton stuffs, hats, and leather, and is connected with Milan by a railway. There is a royal villa here, the usual residence of the viceroy. It is a building in the old Italian style, situated in a park of 9 or 10 m. in circuit. In a huge cross placed over the altar of the church of St. John the Baptist is preserved the iron crown of the kingdom of Lombardy, so called from an iron ring on the inside, made, as is pretended, of a nail of the cross; the rest of the crown is of gold, set with jewels, though without points, rays, or any other ornament. Charlemagne was crowned here with it in 774, as were the emperors of Germany in subsequent ages when they wished to assert their rights as kings of Lombardy; and Bonaparte followed this example in 1805.

MONZAMBANO, a town of Austria, in Lombardy, in the prov. and 17 m. NW of Mantua, district and 5 m. N of Volta, on the l. bank of the Mincio. Pop. 2,448. The Austrians were here defeated by the French in 1800.

MONZE (Cape), or Ras Mursari, a headland on the coast of Sind, in N lat. 24° 46′, E long. 66° 38′.

MONZIE, a parish of Perthshire, 3 m. NE of Crieff. Area 48 sq. m. Pop. 1,261.

MONZINGEN, a town of Prussia, in the prov. of the Rhine, reg. and 40 m. S of Coblenz, circle and 10 m. W of Kreusenach. Pop. 945.

MONZON, a town of Spain, in Aragon, in the prov. and 39 m. SE of Huesca, and partido of Barbastro, on the l. bank of the Cinca, a little below the confluence of the Sosa, and on the slope of a hill, the summit of which is surmounted by a fortress. Pop. 2,880. It is a place of considerable strength, but is commanded by the hill of Santa-Quiteria. It contains 2 parish-churches, 3 convents, and an hospital; and has manufactories of soap, earthenware, and pottery. This town is by some identified with the *Mendiculeia* of Antoninus; by others with the ancient *Tolous*. It was ceded to the Templars in 1143, and received important privileges from Charles V.—Also a town in Leon, in the prov. and 8 m. N of Palencia, and partido of Astudillo, on the Carrion. Pop. 586. On the S it is commanded by an old castle. It contains an hospital, and has manufactories of common woollen fabrics.

MOOER'S, a township of Clinton co, in the state of New York, U. S., 18 m. N of Plattsburg. It has a hilly surface, and is drained by Chazy and English rivers. It possesses considerable diversity of soil. Pop. in 1840, 1,703. The Montreal and Plattsburg railway here intersects and crosses the Ogdensburg line.

MOOKI, a town of Japan, in the island of Nifon, and prov. of Kadsusa, about 45 m. SE of Jedo.

MOON, a village of France, in the dep. of the Manche, cant. and 1½ m. NNW of St. Clair, near the l. bank of the Elle. Pop. 700. It has a manufactory of pottery, and a coal-mine. See also Moen.

MOON, a township of Beaver co., in the state of Pennsylvania, U. S. Pop. in 1840, 748.—Also a township of Alleghany co., in the same state, bounded on the NE by the Ohio, and drained by Raveden's, Flaugherty's, and Monture's run. It has a hilly surface. The soil is chiefly loam. Pop. 1,281. The v. is on the Ohio, 10 m. below Pittsburg.

MOONE, a parish in co. Kildare, 1 m. SSW of Timolin. Area 7,280 acres. Pop. in 1841, 1,591.

MOONEY, a township of Polk co., in the state of Missouri, U. S. Pop. 864.—Also a township of Phillips co., in the state of Arkansas. Pop. 348.

MOOR, a town of Arabia, in Yemen, 18 m. E of Loheia.

MOOR, an island in Magelhaen's archipelago, in N lat. 31° 27′, E long. 145° 30′.

MOOR, or Mor, a town of Hungary, in the comitat of Stuhl-Weissenburg, 41 m. SE of Raab, and 29 m. S of Komorn. Pop. in 1845, 7,000. It is well-built, and has 2 churches, cavalry barracks, a citadel, and a Capuchin monastery. Its trade consists chiefly in wine. It has suffered severely from earthquakes.

MOORBURG, a village 5 m. S of Hamburg, on the l. bank of the Elbe. Pop. 1,616.

MOORBY, a parish of Lincolnshire, 4 m. SSE of Horncastle. Area 950 acres. Pop. in 1841, 152.

MOORDRECHT, a village of Holland, in the prov. of Holland, arrond. and 10 m. NE of Rotterdam, cant. and 2 m. SW of Gouda, on the r. bank of the Yssel. Pop. 1,904.

MOORE, a parish in co. Roscommon, 4¼ m. ENE of Ballinasloe. Area 21,013 acres. Pop. in 1831, 4,379; in 1841, 4,608.—Also a township in Runcorn p., in Cheshire, 4 m. SW of Warrington. Pop. in 1831, 298; in 1841. 317. The Grand Junction section of the North-Western railway has a station here, 3½ m. from Warrington.

MOORE, a central county in the state of North Carolina, U. S., comprising an area of 740 sq. m., drained by Deep and Haw rivers, and by the sources of Lumber river. The soil on the margins of the streams is generally fertile. Pop. in 1840, 7,988; in 1850, 9,341. Its cap. is Carthage.—Also a township of Northampton co., in the state of Pennsylvania. It has an undulating surface, drained by the head-waters of Hookendogue and Monokissy creeks, and bounded on the N by Blue mountain. The soil is chiefly gravel. Pop. in 1840, 2,389.—Also a township of Upper Canada, in the co. of Kent, skirted on the W by the St. Clair river. Pop. 780.

MOORE-CHURCH, a parish in co. Meath, 4½ m. E of Dnleek. Area 5,290 acres. Pop. in 1841, 1,007.

MOOREFIELD, a village of Hardy co., in the state of Virginia, U. S., 178 m. NW of Richmond, on the E bank of the S branch of Potomac river, at the junction of the S fork, and in one of the richest valleys in Virginia. Pop. in 1840, 300.—Also a v. of Nicolas township, in the state of Kentucky, 58 m. E by N of Frankfort, on a small branch of Licking river.

MOORESBORO, a village of Cleveland co., in the state of North Carolina, U. S., on the W side of Sandy run, 16 m. from Rutherfordton.

MOORESTOWN, a village of Chester township, Burlington co., in the state of New Jersey, U. S., 26 m. S of Trenton, near the N branch of Pensauken creek. Pop. in 1840, 300.

MOORESVILLE, a village of Morgan co., in the state of Indiana, U. S., 16 m. SW of Indianapolis, on the E side of White Lick river.

MOORGAGA, a parish in co. Mayo, 2 m. NNW of Shrule. Area 1,789 acres. Pop. in 1841, 627.

MOORGHAUB. See Murghab.

MOORHOUSE, a township in Burgh-upon-Sands p., in Cumberland, 5 m. W by N of Carlisle. Pop. in 1831, 277; in 1841, 271.

MOORLINCH, a parish in Somersetshire, 6 m. E of Bridgewater. Area 8,520 acres. Pop. 2,281.

MOORSEELE, a town of Belgium, in the prov. of W. Flanders, 4 m. W of Courtrai, on the r. bank of the Heuellebeke. Pop. 4,256.

MOORSHAM (GREAT), a township in Skelton p., in Yorkshire, 6 m. E by S of Guilsborough. Pop. 316.

MOORSHEDABAD. See MURSHEDABAD.

MOORSLEDE, a commune and village of Belgium, in the prov. of W. Flanders, 8 m. ENE of Ypres. Pop. 6,333, of whom a large proportion are employed in linen-weaving.

MOORSLEY, a township in the p. of Houghton-le-Spring, Durham. Pop. 821.

MOORTHWAITE, a township in Cumwhitton p., in Cumberland, 8 m. SE of Carlisle, on the Eden. Pop., with Northreach, 291.

MOORWINSTOW, a parish of Cornwall, situated upon the Bristol channel, 7 m. NNW of Stratton. Area 7,780 acres. Pop. in 1841, 1,050.

MOORZAN, a town of Bambarra, in Central Africa, 75 m. NE of Sego.

MOOS. See Moss.

MOOSBURG, a town of Bavaria, in the circle of Upper Bavaria, 10 m. SW of Landshut, on the l. bank of the Isar. Pop. in 1838, 1,700. It is an old but well-built place, with 3 churches, and a fine hotel-de-ville.

MOOSE HILLOCK, a granite mountain of New Hampshire, U. S., 14 m. E of Haverhill. Alt. of N peak 4,636 ft. above sea-level.

MOOSE ISLAND, an island of the Lucayos group, 27 m. SE of the E extremity of Great Bahama island, in N lat. 26° 17′.—Also an island of the state of Maine, U. S., on the W side of Passamaquoddy bay. At its S end is an excellent harbour.

MOOSE LAKE, a lake of N. America, in N lat. 52° 40′, W long. 93°.

MOOSE RIVER, a small river of Lower Canada, one of the head-waters of the St. Francis, which falls into the St. Lawrence at the entrance of Lake St. Peter.—Also a river of N. America, which issues from Lake Misenabe, and enters James's bay, in conjunction with the Abulibbe, after a NE course of 250 m.—Also a river of New Hampshire, U. S., which runs NE from the White mountains to the Androscoggin, in Shelburne.—Also a river of New York, which enters Black river a little above the High falls.

MOOSEHEAD LAKE, a lake of the state of Maine, U. S. It is of an irregular shape, being about 35 m. long, and from 10 to 15 m. broad, and containing 100,000 acres. It gives rise to the E branch of the Kennebec.

MOOSETUCMAGUNTIC, a lake of the state of Maine, U. S., a little NE of Umbagog lake, with which it communicates. It is 24 m. in length from NE to SW.

MOOSH. See MUSH.

MOOSSI, or MOOSSIDU, a city of Central Africa, reported to Park as the cap. of the kingdom of Gotto, which is situated to the SW of Bambarra.

MOOSSO. See MASHOW.

MOOTAPILLY. See MUTAPILLY.

MOOUPTI, a river of Asiatic Russia, in the gov. of Omsk, which flows in a SW course into the lake of Balkhash.

MOOZTAGH. See MUZ-TAGH.

MOPEHA. See HOWE'S ISLAND.

MOQATTAM. See MOKATTAM.

MOQUEHUA, a province and town of Peru, 16 leagues from the Pacific. The prov. is bounded on the N by the prov. of Lampa; on the NE by Paucarolla or Puno; on the E by Chucuico; on the S and SE by Arica; and on the W by Arequipa. It is of a cold temperature, from its being situated on the Cordillera. The lower districts, however, are fertile, and produce great quantities of wine and brandy, which constitute its chief commerce, and with which it supplies all the country as far as Potosi on the Andes, by land-carriage, or by sea to Lima.—The town is situated at the foot of the Cordillera, in a pleasant and fertile valley, 80 m. SE of Arequipa. Pop. 6,000. It has a good church, and several convents. It suffered severely in 1715 by an earthquake.

MORA, a town of Piedmont, in the prov. of Alba, situated near the river Tanaro, 7 m. SW of Alba.—Also a river of Silesia, which rises on the borders of Moravia, and falls into the Oppa near Troppau.—Also a town of Spain, in the prov. and 20 m. ESE of Toledo. Pop. 5,267. A manufactory of sword-blades here was formerly celebrated, but has fallen into decay.—Also a town in the prov. of Tarragona, on the Ebro, 23 m. N of Tortosa. Pop. 3,500.—Also a town of Portugal, in the prov. of Alemtejo, 21 m. WSW of Avis, on the r. bank of the Odivor.

MORA, a town of Central Africa, the cap. of Mandara, in N lat. 10° 20′, E long. 14° 48′.

MORACCA. See MORATSHA.

MORAD. See MURAD.

MORADABAD, a district of Hindostan, in the Doab. Area 2,405 sq. m. Pop. 861,146. Its soil is sandy, but produces rice, wheat, and sugar.—Its cap., of the same name, is delightfully situated on the W bank of the Ramgunga, which is here, in December, "a sluggish river, as wide nearly as the Severn at Shrewsbury." It has some good streets; the principal one is paved with bricks. The houses are generally built of stone or brick, and are two or three stories high. Pop. 32,600. It has an active trade.—Also a town in the prov. of Ajmir, in N lat. 26° 40′, E long. 75° 28′.

MORAD-DAG, or MURAD-TAGH, a mountain-ridge of Asiatic Turkey, 30 m. SW of Kutahiyah, intersecting the W side of the eyalet of Kutahiyah and Kermiyan, and enclosing by its numerous ramifications the valleys of the *Rhyndacus*, *Macestus*, *Hermus*, and *Mœander*.

MORADNAGUR, a town of Hindostan, in the prov. of Delhi, 18 m. SW of Merut.

MORAD-SU-GOLU, a salt lake of Asiatic Turkey, in the pash. of Koniyeh, adjoining the lake of Tuz-Goli on the W. It is about 8 m. in length, and 4 m. in breadth.

MORAH, a town of Hindostan, in the prov. of Ajmir, 48 m. ESE of Jypur.

MORALJE, a range of mountains in Africa, on the road from Augila to Murzuk.

MORAINVILLE, a village of France, in the dep. of Calvados, 11 m. E by N of Lisieux. Pop. 1,067.

MORAISA, a small sea-port of Tunis, anciently called *Maxula*, 24 m. ESE of Tunis.

MORAITES, a tribe of wandering shepherds, who inhabit certain parts of the Morea, and particularly the mountainous districts in the E of the peninsula adjacent to Napoli-di-Malvasia. They are said to correspond, in a striking degree, to the shepherds described by Theocritus, having preserved the garments of antiquity in all their original simplicity.

MORAL, a township of Shelby co., in Iowa, U. S. Pop. 1,146.

MORAL (EL), a village of Spain, in the prov. and 27 m. SSE of Segovia, on the Caravias, a tributary of the Riaza.

MORAL-DE-CALATRAVA (EL), a town of Spain, in the prov. and 18 m. SE of Ciudad-Real. Pop. 4,972.

MORAL-DE-LA-REYNA, a town of Spain, in the prov. and 24 m. NNW of Valladolid. Pop. 417.

MORALEJA, a town of Spain, in the prov. and 50 m. NNW of Caceres, between the river Arrago and Gata. Pop. 900.

MORALEJA-DE-EUMEDIO, a village of Spain, in the prov. and 12 m. SW of Madrid. Pop. 400.

MORALES, a settlement of New Granada, situated on the Rio Magdalena, in N lat. 8° 15′.

MORALES, a village of Spain, in the prov. and 21 m. E of Zamora. Pop. 900.—Also a village in the prov. and 4 m. S of Zamora. Pop. 1,280.

MORALES-DE-CAMPOS, a village of Spain, in the prov. and 24 m. NW of Valladolid. Pop. 450.

MORAL-ZARZAL (El), a village of Spain, in the prov. of Madrid, 9 m. W of Colmenar-Viejo. Pop. 420.

MORANGE, a commune and village of France, in the dep. of Moselle, cant. of Gros-Tenquin. Pop. 1,284.

MORANNES, a town of France, in the dep. of Maine-et-Loire, 5 m. N of Chateauneuf. Pop. 2,841. It stands on the l. bank of the Sarthe, and has paper-mills.

MORANO, a town of Piedmont, on the Po, 5 m. WNW of Casale. Pop. 2,204.—Also a town of Naples, in Calabria-Citra, 6 m. NW of Castrovillari. Pop. 8,500. It has manufactories of silk, cotton, and woollen fabrics.

MORANT, a river of the island of Jamaica, which runs into Morant bay, 22 m. ESE of Kingston.

MORANT KEYS, or Ranas, a few islets or rocks in the Caribbean sea, about 36 m. SE of Jamaica.

MORANT POINT, or East Point, a cape of the island of Jamaica, forming its E extremity, in N lat. 17° 56′, W long. 76° 11′. An iron lighthouse has been erected upon it.

MORAR (Loch), an inlet of the sea, on the E coast of the sound of Slate, in Inverness-shire, 8 m. in length, a little to the S of Loch Nevis.

MORARIA (Cape), a cape on the coast of Valencia, in Spain, in N lat. 38° 40′.

MORAS, a commune and town of France, in the dep. of Drome, 38 m. N of Valence. Pop. 4,229. It has grain and oil mills, and a considerable manufactory of agricultural implements.

MORAT, or Murten-See, a lake of Switzerland, in the cants. of Friburg and Vaud, 2 m. SE of the lake of Neufchatel, with which it is connected by the Broye. It is 7 m. in length, and 2 m. in breadth. It is 27 toises in depth, and abounds in fish. On the N it receives the Biberenbach. On its SE bank is the town of M., 8 m. NW of Friburg. Pop. 1,853. It has an hospital, and an old castle, and was anciently walled. It sustained a severe siege in 1032, and again in 1292; but is chiefly memorable as the scene of the glorious defeat of Charles-the-Bold's army of 60,000 men by a handful of Swiss, on the 22d June, 1476.

MORATA, a small island in the bay of Honduras, near the E coast of Ruatan, in N lat. 16° 25′.

MORATA, a town of Spain, in the prov. and 20 m. SE of Madrid, on the r. bank of the Taguna. Pop. 2,500.

MORATA-DE-XALON, a town of Spain, in the prov. and 9 m. NE of Calatayud, on the r. bank of the Xalon. Pop. 1,986.

MORATALLA, a town of Spain, in the prov. and 48 m. WNW of Murcia, on a river of the same name, an affluent of the Segura. Pop. 7,988. It has 8 monasteries and 2 hospitals, and a large square fort.

MORATILLA, a town of Spain, in the prov. and 30 m. NW of Madrid. Pop. 1,086.—Also a town in the prov. and 12 m. NE of Guadalajara.

MORATSHA, or Moracca, a river of Albania, which rises in the Dinaric Alps, to the S of Mount Dormitor, not far from the sources of the Narenta, and flows in a SSE course through the Berdas territory, at first in a very narrow elevated valley or glen, as far as Ritshani, where it is joined by the Malarieka; it then turns S, gradually striking to the SW, till it enters the plain of Scutari, a few miles N of Podgorizza, and is soon afterwards joined, on the r. bank, by the Zenta. Near Gerlic, 5 m. below Podgorizza, it is joined by the Zievna or Sim-sin, descending in a SSW course from Mount Troizza; and about 8 m. below this point it flows into the NW extremity of the lake of Scutari, at the fortress of Zabliak.

MORAVA, a river of Servia, formed by the union of two streams of that name, one of which descends from Mount Tschermene in Bosnia, the other from the Kara-dagh near Ghilan in Albania. The former has a N and E course of 150 m., and receives the Ivar; the other has about the same length of course N and W, and is swelled by the Toplitza and the Nissava. After the junction of the two main streams, the M. flows N to the Danube at Kullica, 6 m. NE of Semendria, a course of 116 m. It receives the Ravenatz and the Ressava on the r.; and the Zevasna, Osavnitza, Lepenitza, and Lemirvatz on the l. In contemplating the possible execution of a prolongation of the railway lines of Germany and Hungary across Turkey, the valley of the M. offers considerable facilities, and would probably be selected for the course of the line through Servia towards Vrana, and thence into the valley of the Vardar.

MORAVA, a small town of European Turkey, in Romania, situated on a small lake formed by the river Morava, 40 m. NNW of Nizza.

MORAVIA AND AUSTRIAN SILESIA, a province of the Austrian empire, lying between the parallels of 48° 35′ and 50° 15′ N lat.; and bounded on the N by Prussian Silesia, from which it is separated by the Oppa, the Oder, and the Vistula; on the NE by Galicia; on the E and SE by Hungary, from which it is separated by the Carpathian chain and the river March or Morawa; on the S by the archd. of Austria, from which it is separated, for a short distance, by the Taya; and on the W by Bohemia. It has an area of at least 10,600 sq. m. The two Silesian circles, which are separated from M. proper by the Sudetic chain running NW and SE, are the remnants of the duchy of Silesia, which Austria kept, on yielding the rest to Prussia in 1742. M. is administratively divided into 8 circles, namely,

	Area in Austrian sq. miles.	Pop. in 1837.
1. Brunn {Chief town} {Circle}	82	37,183 329,043
2. Olmutz	85	430,739
3. Prerau	54	259,164
4. Hradisch	65	248,101
5. Iglau	48	181,957
6. Znaim	52	157,752
7. Troppau	48	237,156
8. Teschen	42	193,151
		Troops 42,996
	476	2,117,242

Physical features.] The country is intersected by several ranges of mountains, of which the highest are on the side of Bohemia. A branch of the Sudetic chain extends from the NW to the centre of the province; a branch of the Carpathians occupies a considerable part of the E and NE; while another less lofty Carpathian branch extends across the S part of the province. The lofty ridges are interspersed with fertile valleys; and a considerable part both in the S and N is composed of extensive plains. The rivers are numerous, but the greatest is the March or Morawa, which gives name to the county through which it flows from N to S, and, after absorbing most of the other rivers, in particular the Theya or Taya, falls into the Danube above Presburg. The general inclination of the surface is to-

wards the Danube; that of Austrian Silesia, however, is towards the N. Towards the centre of M.-Proper, and in the E part of Silesia, a number of small lakes occur. The general elevation of the surface is from 480 to 900 ft. above sea-level.—The soil is in general of great fertility, particularly in the S. Fine wheat, rye, barley, and oats are grown; but little corn is raised for exportation. Flax is cultivated in the circles of Brunn and Olmutz, and is noted for its fineness and length. In certain favourable situations the soil and climate are well-adapted to the grape, and the average yearly produce of wine is 440,000 *eimers*. Fruit is very abundant. The pasture-grounds are extensive in the mountains; and a great proportion of the Austrian heavy cavalry is or was furnished from this province. Horned cattle are not largely reared; but the case is otherwise with some of the humbler objects of the agriculturist's care, such as hogs, geese, and poultry. An estate of average size in this country comprises from 800 to 1,400 acres of arable land, from 150 to 300 acres of meadow-land, and from 1,000 to 3,000 acres of wood. The size of the peasants' holdings—of whom about two-thirds hold land—is about 24 acres. Distilleries and breweries are common on the farms.

Climate.] M., though remote from the sea, is subject, from the unevenness of its surface, to considerable variations in the temp. The mean temp. of Olmutz is about 47° 50′. The summer-heat sometimes reaches 95°. The prevailing winds are from the NW or SE. The NW winds are cloudy; the SE render the air pure and serene; which is the general characteristic of the climate.

Productions.] The mines of M. are of great antiquity, those of Iglau having been discovered in the 8th cent. Some gold and silver mines were formerly wrought, but they were lost sight of during the troubles of the 15th and 16th cent., and have never been resumed. At present, the most productive mines are those of iron and lead. The working of coal is little practised, but the strata are supposed to be rich. A kind of clay [*meerschaum*] used in making the bowls of tobacco-pipes, occurs in various quarters. It is so soft as to admit of being moulded by the hand; but soon hardens, and loses a great deal of its specific gravity.

Manufactures.] This prov. has made considerable progress in manufactures, and has become, since the close of last cent., one of the most thriving portions of the Austrian empire. Woollens, linen, and cotton are manufactured on a large scale; the two former consuming not only all the wool and flax raised in the country, but requiring a large importation from other parts. Wool is brought from Hungary; flax from Silesia and Austrian Poland. The oldest woollen manufactures are in the neighbourhood of Iglau. Woollens are also manufactured on a large scale at Fulnek and Maehrisch-Neustadt in the N, and at Brunn and Peltsch in the S. Dyeing is conducted in great perfection at Brunn, almost all the cloth made in M. being sent thither for that purpose. Machinery on the English plan has of late come into extensive use. Cotton-works also are extensively diffused. The other manufactures of M., such as leather, paper, potash, beet-root sugar, and glass, are comparatively of small importance. The imports consist chiefly of oil, flax, cotton, and silk, or the raw materials of manufacture; besides cattle, wine, and hardware, for consumption.—The only navigable river is the March or Morawa; goods are almost always conveyed in waggons. There are two great commercial roads, both leading from Vienna; the one passing by Prague, Znaim, and Iglau, in the W; the other by Brunn and Olmutz, through the centre of the country. The traffic of the country has been vastly facilitated by the execution of two great lines of railway; one entering the country at Zwittau on the NW, and running down the valley of the Zwittawa to Brunn, and thence bending SSE to Kostel, a little beyond which it crosses the Taya, and enters the archd. of Austria; the other crossing the NE frontier at Mahr, and running down the valleys of the Oder, and the Becsawa, to Prerau; thence S to Napagedl; and thence SSW down the valley of the Morava to its junction with the former line near Lundenburg, in the S extremity of the country. A third line runs from Prerau, up the valley of the Morava, and joins the first-mentioned line at Trubitz. By these lines, M. is connected with Dresden, Breslau, Cracow, and Vienna.

Population.] The great bulk of the pop. consists of Slavonians, who were once nearly wholly Protestant in their form of worship; but the emperor Ferdinand introduced the Roman Catholic worship after the fatal battle of Prague in 1620; and the pop. is now almost wholly Catholic, and subject to the ecclesiastical jurisdiction of the bishop of Olmutz. In 1840 the Catholics numbered 1,983,402; the Lutherans 77,606; and the Calvinists 28,935. The doctrines of Huss, Luther, and the Anabaptists, were early received in this country; and these sects formed the union of Herrnhut negociated by the celebrated Count Zinzendorff. When the toleration edict of Joseph appeared in 1788, a number of the inhabitants left the Catholic church; and in Silesia, the Lutherans, by right of ancient treaties, have always enjoyed the free exercise of their religion. The pop. of M. and Austrian Silesia amounted in 1818 to 1,749,486 souls; in 1837, to 2,117,242, being an increase of 21 per cent. on 20 years; on 1st January 1840, the pop. was 2,166,638; in 1850, 2,238,424, of whom 1,799,838 were returned as the pop. of M. proper, and 438,586 as that of the Silesian portion of the prov. The Germans settled here in the 9th and following centuries, and their descendants now form about a fourth of the whole pop. They form the majority of the pop. in the mountain-districts. The Slavonians, the aborigines of the country, are divided into a number of tribes who differ greatly in language, manners, and dress. They are generally located in the plains. The Moravian language is of course a Slavonic dialect, and seems to have been first reduced to writing by Cyrillus, a Christian missionary, who was sent by the emperor Michael, in the 9th century, to convert this uncivilised race from Paganism.

Government, &c.] M. has, like the other provs. of the Austrian empire, an assembly of states or representatives, but their influence is little more than nominal. They meet once a-year to determine, not the amount of their taxes, but their repartition and mode of levy. The sessions of the collective body are short, but a deputation or committee sits the whole year for the despatch of business. The civil administration is conducted by a governor and court of appeal; the military, by a general and other officers.—As to education, there are in M. 7 gymnasia or classical schools, and about 1,500 elementary schools. A university was founded at Olmutz in 1567; in 1782 it was converted into a lyceum or academy; and in 1827 was re-established as a university, with 7 professors of theology, 5 of jurisprudence, 7 of medicine, and 6 of philosophy. The number of pupils attending it in 1849 was 946.—The revenue of M. is stated by Zimmerman to amount to 5,793,120 florins, and that of Austrian Silesia to 557,209, making a total of 6,350,329 fl. or £740,880. —In 1850 there were 117 towns, 186 market-towns, and 3,691 villages in the prov.

History.] M. bore in ancient times the name of Quadia, and formed part of the territory possessed by the *Quadi* and *Marco-*

manni, two tribes who were for several centuries the terror of the Roman frontier, and found means to preserve their independence till overpowered in the 5th cent. by Attila. The Slavonians whom that rude invader had hurried away, retreating after his defeat by Œtius, founded a republic here, and assumed the title of *Slavi Maravani* from the name of their principal river. They preserved a precarious independence, sometimes at the expense of an annual tribute to the Franks, the Bohemians, and the Saxons, till a chieftain of the name of Swatopluk, or Zventibaldus, had the address to unite the whole of the Slavonic republics into one state, and founded the kingdom of *Moravia* or *Marahania*, which, if we may put faith in the traditions of that age, comprehended not only the present Moravia, but Bohemia, the Voightland, Misnia, Lusatia, Brandenburg, Pomerania, Silesia, with part of Upper and Lower Pannonia, and Dalmatia. Swatopluk died in 894, and left his possessions among his three sons; but dissensions arising among them, the *Boii*, ancestors of the Bohemians, conquered a part of their dominions; and soon after a more formidable enemy appeared in the Magyars, who gave the Moravians a complete defeat in 907, and put an end to their independence. After being reduced to little better than a desert by this barbarous invasion, M. was seized by the dukes of Bohemia, who kept it till 1182, when it again became a separate government, and was erected into a marquisate. It fell next into the hands of the Hungarians, but was not finally subdued till 1527, when, Ferdinand I. succeeding to the crowns of Hungary and Bohemia, M. was added to the possessions of the house of Austria, and has ever since been subject to the same sovereign. In 1805 it was the theatre of the war between the French and the Austro-Russian armies.

MORAVIA, a township of New York, U. S., 158 m. W of Albany. Pop. 2,010.

MORAVICZA, a large village of Austrian Illyria, in the maritime circle of Fiume, 32 m. E of Fiume.

MORAWA, or MARCH, a large river of the Austrian states, which has its source at the foot of the Schneeberg, a lofty mountain situated at the junction of the territories of Bohemia, Moravia, and the co. of Glatz, near Altstadt. It flows, from N to S, through Moravia, separates Lower Austria from Hungary, and falls into the Danube above Presburg. It is joined by several streams of considerable size, such as, on the r., the Hanna, Taya, Zaya, and Rust; and, on the l., the Beczwa, Miava, and Bodawa. It was the *Mora* or *Marus* of the Romans.

MORAWKA, a town of Moravia, in the circle and 9 m. SW of Teschen. Pop. 2,930.

MORAY (PROVINCE OF), an ancient division of Scotland, which comprehended the shires of Nairn, Moray proper, or Elgin, and a great part of the shire of Banff.

MORAYSHIRE. See ELGINSHIRE.

MORAZES, a name by which the Ostiaks who inhabit the N part of the gov. of Tomsk, in the environs of Narym, in Asiatic Russia, are distinguished. They are, like the Samoiedes, from whom they have sprung, idolaters, and are governed by their shamans.

MORBAT, or MIRBAT, a village of 30 or 40 mud and stone houses on the SE coast of Arabia, in N lat. 16° 59′ 15″, E long. 54° 47′ 40″, situated in the centre of a small but well-sheltered bay, open only to the S and W. A rocky point to the S, in N lat. 16° 57′ 50″, E long. 54° 47′ 26″, is known as Ras-Morbat. Its sheikh levies a small anchorage-fee proportioned to the size of the vessels using the anchorage. Indifferent bullocks and brackish water may be obtained here.

MORBECQUE, a commune of France, in the dep. of the Nord, cant. and 2 m. S of Hazebrouck. Pop. in 1841, 3,975. It has a brewery, an oil-mill, and distilleries of gin, and carries on a considerable trade in cloth.

MORBEGNO, or MORBEN, a town of Austria, in Lombardy, in the gov. of Milan, delegation and 14 m. WSW of Sondrio, and 35 m. NE of Como, on the r. bank of the Bitto, near its confluence with the Adda, and at the foot of Mount Legnone. Pop. 3,300. It is one of the largest and finest towns in the Valteline, and has an ancient cathedral. It possesses numerous silk-mills. Cheese is extensively manufactured in the adjacent valley of Bitto.

MORBEYA, MORBEA, OMER-BEGH, or UMM-ER-R'BIEH, a river of Marocco, which has its source in Mount-Magran, in the Great Atlas, to the E of Tadla; runs WNW between the provinces of Marocco and Fez; and throws itself into the Atlantic near Azamor, and after a rapid course of 180 m. It possesses considerable depth; but its bar is dry at low water, and its entrance dangerous.

MORBIER, a commune of France, in the dep. of the Jura, cant. and 2 m. N of Morez, and 14 m. NNE of St. Claude. Pop. 2,042. It has manufactories of watches and clocks, and various kinds of iron ware, and has a considerable trade in wine.

MORBIHAN, a maritime department in the W of France, lying between the parallels of 47° 15′ and 48° 10′ N; and bounded on the N by the dep. of Cotes-du-Nord; on the E, by that of Ile-et-Vilaine, from which it is separated by the Aff; on the SE by Loire-Inferieure; on the W by Finistere; and on the S by the Atlantic, which here forms the gulf which gives name to the dep. Its length from E to W is about 70 m.; its breadth varies from 25 to 45 m. Its area is 681,935 hectares. Its coast-line is very sinuous, and a number of islets are scattered along it, the principal of which are Belle-Ile, Groix, Houat, Hoëdie, Ile-aux-Moines, and Ile-d'Arz.—The principal rivers are the Vilaine in the E, and the Blavet and Ille on the W. The next in importance are the Oust and the Aff, both affluents of the Vilaine; and the Scorf, an affluent of the Blavet. The canal of the Blavet, from Hennebon to Pontivy, is wholly in this dep., and a portion of that from Nantes to Brest. The surface is low; but in the N, a few spurs of the Montagnes-Noires diversify the face of the country.—The soil is thus classified: 271,191 hect. wastes and heaths; 318,028 h. gravelly or stony; 1,541 h. sandy; 60,373 h. clayey. Towards the coast, the fertility generally increases. Agriculture is in a backward state, yet more corn is grown than is required for home-consumpt. Wheat, oats, rye, maize, potatoes, turnips, hemp, and flax are the chief productions. Cattle and horses are reared in considerable numbers. The live stock in 1839 was returned at 42,399 horses, 294,461 horned cattle, 254,948 sheep, 59,495 pigs, and 10,353 goats. Bees are extensively reared, the annual export of honey amounting to 450,000 kilog., and of wax to 30,000 kilog., worth together about £15,000. Cyder is extensively made; but little wine is produced. Iron and salt are the chief mineral productions. The pilchard fishery employs about 500 boats on the coast; and its produce is estimated at 1,400,000 fr. yearly. At Josselin and Malestroit are large woollen factories. Ship-building is conducted at Lorient, and several other ports.—The pop. of the dep. in 1801 was 401,215; in 1831, 433,522; in 1841, 446,331; in 1851, 478,171. In 1840, the dep. possessed a royal college, 5 communal colleges, 10 secondary establishments, and 253 elementary schools, attended by 14,032 pupils in winter.—The dep. is administratively divided into 4 arrondissements: viz. Lorient, Ploermel, Pontivy, and Vannes; which were subdivided in 1851 into 37 cantons, and 234 communes. It sent 6 deputies to the legislature under the late regimé, who in 1839 were chosen by 1,452 electors. In 1835 of 96,602 properties subject to the *contribution fonciere*, 45,234 were assessed at less than 5 fr., and only 163 at about 500 fr. The chief towns are Lorient and Vannes. The dep. forms the dio. of the bishop of Vannes.

MORBORN, a parish of Huntingdonshire, 2¼ m. NW of Hilton. Area 1,070 acres. Pop. in 1831, 94; in 1841, 93.

MORCHANSK, a district and town of Russia in Europe, in the gov. of Tambov. The district occupies the central part of the gov., and is very fertile,

producing grain, fine pasturage, and excellent timber. Pop. 105,000.—The town is 60 m. N of Tamboy, on the l. bank of the Tsna, an affluent of the Wolga. Pop. 5,500. It contains 3 churches, two of which are built of wood, and has manufactories of sailcloth and of vitriol and of tallow, a large ropework, a fine paper-mill, and several saw and fulling mills. The trade consists chiefly in corn, honey, and cattle.

MORCHARD-BISHOP, a parish of Devonshire, 6 m. NW of Crediton. Area 6,910 acres. Pop. in 1831, 2,003; in 1841, 1,880.

MORCO, or MORCOVICO, a village of Switzerland, in the cant. of Tessino, district and 6 m. SSW of Lugano and circle of Carona, on the lake of Lugano.

MORCONE, a town of Naples, in the prov. of Sannio, district and 17 m. SSW of Campobasso, and 15 m. E of Piedimonte, on a height. Pop. 5,000. It is walled round and defended by a fort, and has manufactories of woollen fabrics.

MORCOTT, a parish in the co. of Rutland, 4½ m. W by N of Duddington, on a branch of the river Chatter. Area 2,010 acres. Pop. in 1841, 516.

MORDEIRA, a bay of the island of Sal, in the group of the Cape Verd islands, in N lat. 16° 41′, and W long. 23°.

MORDELLES, a canton and commune of France, in the dep. of the Ille-et-Vilaine, and arrond. of Rennes. The cant. comprises 7 com. Pop. in 1831, 7,432; in 1841, 7,413. The village is 9 m. WSW of Rennes, on the l. bank of the Meu, which is here crossed by a bridge. Pop. 2,687.

MORDEN, a parish in the co. of Dorset, 5¼ m. N by E of Wareham. Area 7,670 acres. Pop. in 1831, 819; in 1841, 1,001.

MORDEN-STEEPLE, a parish in Cambridgeshire, 4¾ m. W by N of Royston. Area 3,000 acres. Pop. in 1831, 645; in 1841, 797.

MORDIFORD, a parish in Herefordshire, 4½ m. SE of Hereford, on the river Frome, at its junction with the Wye. Area 1,660 acres. Pop. in 1841, 595.

MORDINGEN, a village of the grand-duchy of Baden, in the circle of the Upper Rhine, bail. and 5 m. E of Breisach. Pop. 1,640.

MORDINGTON, a parish on the coast of Berwickshire, 4½ m. NW of Berwick. Area 3,523 acres. Pop. 392.

MORDON, a township in Sedgefield parish, co.-palatine of Durham, 7¾ m. SE of Bishop-Auckland, on the Sherne. Area 1,390 acres. Pop. in 1831, 174; in 1841, 161.—Also a parish in Surrey, 9½ m. SW of London. Area 1,700 acres. Pop. in 1831, 655; in 1841, 685.

MORDOVSKAIA-BOGOROSLANE, a town of Russia in Europe, in the gov. of Orenburg, district and 10 m. N of Bogoroslane.

MORDVINOV, a bay of the SE coast of the peninsula of Sagalin, enclosed on the E by Cape Tonin.

MORDWINS, one of the many uncivilized tribes who inhabit the Russian empire. They are of Finnish descent, and are spread over the NE part of European Russia, in the govs. of Nizni-Novgorod, Simbirsk, Kasan, and Orenburg. They are pretty numerous, and are divided into two classes.—the Mokshans, and Ershans. A portion have embraced Christianity; the rest are pagans. They cultivate the ground with more industry than the Russian peasantry in general do.

MORDY, a town of Poland, in the woiwodie, obwodie and 11 m. ENE of Siedlec. Pop. 450.

MORE, a parish in Salop, 2½ m. N by E of Bishop's-Castle, on the river Osmy. Area 3,170 acres. Pop. in 1831, 272; in 1841, 246.

MOREA. See article GREECE.

MOREA, a group of lofty mountains, in the island of Java and prov. of Japara.

MOREAC, a commune of France, in the dep. of Morbihan, cant. and 2 m. N of Locmine, and 15 m. SE of Pontivy. Pop. in 1841, 3,075.

MOREBAR, a town of Hindostan, in the presidency and 45 m. ENE of Bombay, prov. of Aurungabad, district and 18 m. E of Kallianee.

MOREBAT. See MORBAT.

MOREBATH, a parish in Devonshire, 2 m. N by W of Bampton, on the river Exe. Area 4,130 acres. Pop. in 1831, 436; in 1841, 466.

MOREBATTLE, a parish in Roxburghshire, 6 m. SE of Kelso. Pop. 1,051.

MORECAMBE-BAY, a large inlet of the Irish sea, between the coast of the main body of the N division of Lancashire, and the district of Furness. Including Lancaster bay, its entrance lies between Rossal-point, the NW point of Amounderness hundred, and S point of Lancaster bay, and the SE point of Walney isle. Between these two points, the distance is 8 m. N by W ¾ W; and a line drawn nearly perpendicular to this line to the mouth of the river Kent, at the extreme head of the bay, measures 19 m. The average breadth of the bay is 10 m. On the S side of Lancaster bay lies the newly formed port of Fleetwood, in N lat. 53° 57′, W long. 3° 1′. On the opposite side of Lancaster bay is Sunderland harbour, at the mouth of the Lune. On the same side of the larger bay, about 4 m. N by E of Sunderland-point, is the rising village of Morecambe, which is connected with Lancaster by railway. On the NW side of the bay the river Leven discharges itself by a broad estuary. Walney lighthouse is in N lat. 54° 2′, W long. 3° 10′, 36 m. NE by N from the NW lightship in Liverpool bay, and 55 m. NE by E ½ E from the Menai lighthouse. Within the S point of Walney island lies the Piel or Foudray harbour; and from Roe island, on the l. side of the harbour, a railway is now carried upon piles into Walney island, and thence to Dalton, Ulverstone, and the Lake district.—The upper part of M. bay is quite dry at low water. See articles DUDDON, FLEETWOOD, and LANCASHIRE.

MOREDA, a town of Spain, in Andalusia, in the prov. and 29 m. ENE of Granada, and partido of Iznalloz, on a height. Pop. 660.—Also a town in Old Castile, in the prov. of Alava, Hermandad, and partido and 10 m. ESE of La Guardia. Pop. 546.

MOREE, a canton, commune, and town of France, in the dep. of the Loir-et-Cher, and arrond. of Vendôme. The cant. comprises 14 com. Pop. in 1831, 8,710; in 1841, 9,670. The town is 12 m. NE of Vendôme, on the l. bank of the Loir. Pop. 1,218. It is enclosed by an old wall flanked with bastions, but now much dilapidated. It has a tile-work.

MOREFIELD, a township of Clark co., in the state of Ohio. Pop. in 1840, 1,071.—Also a township of Harrison co., in the same state. Pop. 1,505.

MOREHOUSE, a township of Hamilton co., in the state of New York, U. S., 82 m. NW of Albany. It has a diversified surface, and contains numerous lakes and ponds. The soil consists chiefly of sandy loam. Pop. in 1840, 169.

MOREHOUSEVILLE, a village of Morehouse township, Hamilton co., in the state of New York, U. S., 117 m. NW of Albany.

MOREIRA, a town of Portugal, in the prov. of Beira, comarca and 4 m. NNE of Trancoso, and 32 m. E of Viseu, on the r. bank of the Sobrado. Pop. 702.

MOREISHWAR, a town of Hindostan, in the prov. of Aurungabad, 34 m. SE of Punah, in N lat. 18° 16′.

MORELAND, a township of Montgomery co., in the state of Pennsylvania, U. S., 14 m. NE of Norristown, and 16 m. N of Philadelphia. It has a hilly surface, and is watered by Pennypack river and its tributaries. The soil is chiefly loam. Pop. in 1840, 2,162.—Also a township of Lycoming co., in the same state, 94 m. N of Harrisburg. It has a hilly surface, and is drained by Little Muncy creek. The soil is gravelly. Pop. 682.—Also a township of Philadelphia co., in the same state. Pop. 469.—Also a township of Scott co., in the state of Missouri. Pop. 1,318.

MORELEIGH, a parish of Devonshire, 5½ m. SSW of Totness. Area 1,470 acres. Pop. 202.

MORELLA, a judicial partido and town of Spain, in Valencia, in the prov. and 44 m. NNW of Castellon-de-la-Plana. The partido comprises 26 pueblos

The town is 28 m. NW of Peniscola, built amphitheatrally, on a steep eminence, the summit of which is crowned with a castle. Pop. 6,211. It contains 3 parish-churches, several convents, numerous fountains, and a public granary; and has manufactories of woollen and linen fabrics. Cattle are extensively reared in the environs.

MORENA (Sierra), [*i. e.* 'Brown mountains,'] a mountain-chain or region extending ENE and WSW, along great part of the S of Spain and Portugal, between the parallels of 37° 5′ and 39° 30′ N lat., forming the S buttress of the great table-land of Spain, and separating the two basins of the rivers Guadiana and Guadalquivir. It begins to the W of Albucete, near the E border of La-Mancha, in the Sierra-de-Alcaraz, and runs W, separating La-Mancha and Estremadura from Jaen, Cordova, and Seville. It sinks towards the borders of Portugal, so as to admit the passage of the Guadiana; but it soon reappears to the W, and separating Alemtejo from Algarva, terminates in Cape St. Vincent on the Atlantic. It may be regarded as a mountainous tract covered with short ridges, running SW in its E part, and SE as they approach the W extremity. Towards its E extremity this mountain-tract is from 30 to 40 m. in breadth; but it increases to double the latter breadth as it approaches the frontiers of Portugal. The most eastern section of the Sierra M. stretches from the Sierra-Consuegra, by which it is connected with the great Iberian chain, SW to the sources of the Guadiana. The next section, which is the largest, and the most elevated, is comprised between the sources of the Guadiana and those of the Bembezar and Matachel. It runs WSW, and forms the Sierra M. properly so called, and sometimes is known in its W part as the Sierra-de-Cordova. The third section is the Sierra-de-Constantina, which, bending towards the N, describes the arc of a circle around the sources of the Biares. The most western section extends from the source of the Huelva, in a SW direction, under the name of the Sierra-de-Aroche. From the first or eastern section a spur is propelled NW between the sources of the Guadiana and its affluent the Zaneara. The Sierra M. proper throws off 4 spurs from its N flank, of which the most eastern runs in a low chain between the Guadiana and the Azuer; the next, between the Azuer and the Jabulon; the third runs along the r. bank of the Guadalmez; and the W separates the basins of the Zuga and the Matachel. The spurs on the S flank of this division are 10 in number, and respectively run between the rivers Guadarmena, Guadalen, Almudiel, Herrumblar, Jandula, Yeguas, Arenoso, Guadamellato, Cuzna, Guadiato, and Bembezar. Among the chief branches of the Sierra-de-Constantina are one running N between the Matachel and the Guajira; the Sierra-de-los-Santos or los-Caballeros, which separates the upper courses of the Guajira and Ardilla; and the Sierra-de-Guadalcanal, between the Bembezar and Biares, on the S. From the Sierra-de-Aroche a branch runs NW between the basins of the Chanza and the Ardilla; and from its SE flank, two chains run between the Rio-San-Lucar, the Tinto, and the Odiel, towards the Atlantic.—The most important pass over the Sierra M. is that of Despena-Perros, formed by the Almudiel, and along which the road from Madrid to Andujar, "one of the finest high-roads in Europe" [*Bourgoing*], passes.—It has been inferred by recent geologists, that the Sierra M., though a low range, is the most ancient of the three chains of mountains which form the nucleus of Central Spain, from the fact that, on both its sides, the tertiary strata in contact with the old rocks are horizontal. The Sierra M., though of so great extent, in point of altitude cannot be compared to several even of the inferior chains of the peninsula. Its elevation never exceeds 3,000 ft.; and in many places, particularly in its E and W extremities, it is much less. Few parts are covered with snow more than three months. Its central part is broad, and covers nearly the whole of the prov. of Cordova. It owes its chief celebrity to the romantic and gloomy scenery of many spots, particularly on the great roads; and its extensive forests, rocks, precipices, and valleys, still afford a secure retreat to lawless banditti, particularly in times of political agitation. Many parts of the chain, though capable of cultivation, are totally deserted even on the great roads. The Spanish minister Olivade, about the middle of last cent., conceived the idea of settling colonies of foreigners, particularly French and Germans, on these mountains. The plan at first met with considerable success; and in 1767, the *nuevas poblaciones* or colonies consisted of about 10,000 individuals, spread over a space of 1,350 sq. m.; but on the removal of Olivade from office, they were neglected, and soon decayed. Many of the settlers were cut off by disease and want, others returned to their own countries. Their places were, however, in part occupied by native Spaniards; and in 1791, the number of settlers still amounted to 6,200. They are employed partly in tillage, partly in manufacturing glass, linen, and woollen. The district which they inhabit is reckoned part of the prov. of Jaen, and the chief place is Carolina.

MORENTE, a town of Spain, in Andalusia, in the prov. and 21 m. E of Cordova, partido and 2 m. NNE of Bujalance. Pop. 314.

MORERA (La), a town of Spain, in Estremadura, in the prov. and 32 m. SSE of Badajoz, partido and 14 m. NNW of Zafra. Pop. 686.

MORES, a town of Spain, in the prov. and 40 m. WSW of Zaragoza, partido and 8 m. NNE of Calatayud, on the r. bank of the Xalon, at the foot of a hill. Pop. 509. It possesses a castle, and has several oil-mills.

MORESBY, a parish of Cumberland, 2¾ m. ENE of Whitehaven. Area 2,340 acres. Pop. 1,175.

MORESNET, a department and commune of Belgium, in the prov. of Liege, and arrond. of Verviers, watered by the Gueule. Pop. of dep. 524. The v. is 21 m. ENE of Liege, and 6 m. SW of Aix-la-Chapelle. Pop. 152.

MORESTEAD, a parish of Hampshire, 3 m. SE of Winchester. Area 2,390 acres. Pop. in 1831, 90; in 1841, 86.

MORESTEL, a canton, commune, and town of France, in the dep. of the Isère, and arrond. of La-Tour-du-Pin. The cant. comprises 20 coms. Pop. in 1831, 17,735; in 1841, 20,419. The town is 9 m. N of La-Tour-du-Pin, and 39 m. NW of Grenoble. Pop. 1,326. It has a manufactory of beet-root sugar.

MORET, a canton, commune, and town of France, in the dep. of the Seine-et-Marne, and arrond. of Fontainebleau. The cant. comprises 15 com. Pop. in 1831, 9,916; in 1841, 10,338. The town is 6 m. ESE of Fontainebleau, and 14 m. SSE of Melun, on the l. bank of the Loing, at the junction of the canal of that name, and near the l. bank of the Seine. Pop. in 1841, 1,672. It is enclosed by old walls, and contains a fine Gothic church, and a castle, now in ruins, which belonged to Sully, and which was purchased in 1604 by Henry IV. for Jacqueline-de-Beuil. It has three gates, and a suburb extending between the river and the canal; its streets are straight and well-kept, and the houses generally well-built. It possesses numerous corn and tan mills, and carries on a considerable trade in wine, corn, wood, potatoes, flour, and paving-stones. This town was taken by the English in 1420, and held by them

for 10 years. Its fortifications were constructed by Charles VII.

MORETON, a township in Bidston p., co.-palatine of Chester, 9½ m. NW of Great Newton. Area 1,160 acres. Pop., with Lingham, in 1831, 247; in 1841, 330.—Also a township in Astbury p., co.-palatine of Chester, 2½ m. SW of Congleton. Area 710 acres. Pop., with Alcumlow, in 1831, 141; in 1841, 148.—Also a parish in Dorset, 7 m. E by S of Dorchester, on the river Frome. The SW railway has a station here. Area 2,380 acres. Pop. in 1831, 304; in 1841, 294.—Also a parish in Essex, 11 m. W of Chelmsford, on a branch of the Roding. Area 1,670 acres. Pop. in 1831, 430; in 1841, 513.—Also a parish in the liberty of Southwell, Nottinghamshire, 2 m. SE of Southwell, on the Trent. Area 1,340 acres. Pop. in 1831, 156; in 1841, 131.—Also a chapelry in Llanyblodwell p., Salop, 3½ m. S by E of Oswestry, in the line of the Montgomery canal.—Also a hamlet in Gnosall p., Staffordshire, 3 m. ESE of Newport. Pop. in 1821, 754.

MORETON BAY, an inlet on the coast of Stanley co., New South Wales, between the parallels of 27° and 28° S, enclosed by the mainland on the W, and Stradbroke and Moreton islands on the E, but open to the N. It is 45 m. in length, by 20 m. in greatest width. The river Brisbane enters the bay about the middle of its W side, and is the means of opening up an immense extent of fine pastoral country in the interior. Its entrance, however, has only a depth of 10 or 11 ft. at high water, with 18 ft. over the bar on both sides; and is both guarded and concealed by a small island called Bird island, the position of which is in S lat. 27° 1′, E long. 153° 26′. The rivers Logan, Tweed, and Scott, also flow into the bay. The townships of North and South Brisbane, are 14 m. from the mouth of the river.—The W shores of the bay, from the entrance of Pumice-stone river to Red-cliff point, are faced by a reef of considerable breadth. The *dugong* frequents the mud-flats of the harbour and the river Brisbane. The species of fish most common in the bay are mullet, bream, whiting, cod, turtle, and *puddinha*, a species of fish resembling a mullet.—The M. bay district is bounded on the S by the ranges which separate the sources of the Brisbane and Logan from those of the Richmond and Clarence; on the W by the water-shed dividing the rivers flowing W into the interior from those which flow towards the coast; and on the N by the present limits of New South Wales, namely the parallel of 26°. Its soil and climate are admirably adapted for the production of every species of European grain, as well as of those peculiar to warmer climates; for as vegetation goes on without interruption all the year round, the farmer has only to select for the growth of any description of grain the particular season that will insure the temp. required to bring it to maturity. Maize returns on alluvial land in good condition, 80 bushels an acre; wheat, from 30 to 34 bushels, of from 62 to 65 lbs. per bushel. Coffee has been produced, and cotton, sugar, and tobacco. Among the fruits are the bananas, pine-apple, orange, wild fig, and the cabbage and bangolo palms.

MORETON-CORBET, a parish in Salop, 4¾ m. SE of Wem, on the river Roden. Area 1,930 acres. Pop. in 1831, 247; in 1841, 248.

MORETON-HAMPSTEAD, a parish and market-town in Devonshire, 12 m. WSW of Exeter. Area 7,370 acres. Pop. in 1801, 1,768; in 1831, 1,864; in 1841, 2,037. The town is situated on a gentle eminence near the verge of Dartmoor, and is nearly surrounded by lofty hills. It consists of one principal street, and two or three smaller ones; the houses are generally ancient, and irregularly built. The woollen trade, which formerly flourished here, is now confined chiefly to worsted spinning. Tanning and rope-making are carried on to some extent; in the vicinity are quarries of granite.

MORETON ISLAND, an island off the coast of New South Wales, on the E side of Moreton bay. It is 19 m. in length, and 4½ m. in greatest breadth; and consists for the most part of a series of sand hills, one of which, Mount Tempest, is said to be 910 ft. in height. On the NW, it has a large tract of swampy ground. The soil is poor; the grass coarse and sedge-like; all the timber of small size.

MORETON-MAIDS, or Maidsmorton, a parish in Bucks, 1 m. NE of Buckingham. Area 1,260 acres. Pop. in 1831, 474; in 1841, 570.

MORETON-IN-THE-MARSH, a parish and market-town in the co. of Gloucester, 26 m. ENE of Gloucester. Area 900 acres. Pop. in 1831, 1,331; in 1841, 1,345. The town, which consists chiefly of one long street, is pleasantly situated in a valley, on the Roman fosse way. The manufacture of linen cloth is carried on here.

MORETON (North), a parish in Berks, 3 m. W of Wallingford. Area 1,140 acres. Pop. in 1831, 362; in 1841, 397.

MORETON-SEA, a parish in Salop, 3 m. W by N of Drayton-in-Hales, on a branch of the Tern. Area 5,350 acres. Pop. in 1831, 679; in 1841, 770.

MORETON (South), a parish in Berks, 3½ m. SW of Wallingford, on a branch of the Thames, and nearly separated from North M. by the line of the Great Western railway. Area 1,470 acres. Pop. in 1831, 410; in 1841, 417.

MORETON-VALENCE, a parish in Gloucestershire, 4½ m. WNW of Stroud. Area 1,510 acres. Pop. in 1801, 265; in 1831, 324; in 1841, 344.

MORETOWN, a township of Washington co., in the state of Vermont, U. S., 13 m. W of Montpellier. It has a mountainous surface to a great extent unfit for cultivation, and is watered by Mad river, an affluent of Winooski river. Pop. in 1840, 1,128.

MORETTA, a town of Sardinia, in the div. of Coni, capital of a mandemento, in the prov. and 9 m. N of Saluccio, and 15 m. SE of Pignerol, on the r. bank of the Po. Pop. 3,387. It is well-built, and has a church dedicated to the Virgin, which attracts large numbers of pilgrims.

MOREUIL, a canton, commune, and town of France, in the dep. of the Somme, and arrond. of Montdidier. The cant. comprises 25 com. Pop. in 1831, 13,668; in 1841, 14,743. The town is 11 m. NNW of Montdidier, and 14 m. SE of Amiens, on the r. bank of the Avre. Pop. in 1841, 2,222. It has manufactories of hosiery, a brewery, and a brick work.

MOREVI, a town of Hindostan, in the prov. and peninsula of the Gujerat, capital of the Muchukaunta, 120 m. WSW of Ahmedabad, on the Mechu, 27 m. from the gulf of Kutch.

MOREVSKOE′, a town of Russia in Asia, in the gov. and 240 m. SW of Tobolsk, district and 24 m. E of Kurgan.

MOREWAURA, a town of Hindostan, in the prov. of the Gujerat, near the E bank of the Run, and 24 m. NW of Rahdupur. It is the capital of a small state, which is governed by a khan.

MOREY, a town of France, in the dep. of Cote-d'Or, 8 m. SW of Dijon. Pop. 660.

MOREZ, a commune and town of France, in the dep. of Jura, 25 m. ESE of Lons-le-Saulnier. Pop. 2,804.

MORFIL, or Morvil, a parish in Pembrokeshire, S. Wales, 6½ m. SE by E of Fishguard or Abergwain. Pop. in 1801, 125; in 1841, 188.

MORFIL (Ile a), an island formed by the Senegal river of Western Africa, in the Fulah territory, by its dividing into two arms at the junction of the Guilum, in about 16° 12′ N lat., and 13° 15′ E long. These arms, of which the northern and largest retains the name of the Senegal, while the southern is called the Morfil, or 'River of Ivory,' enclose first the island of Bilbos, and then that of M, and reunite at the W extremity of the latter island, after having been separated for about 100 m. The length of Bilbos is about 28 m.; of M. 72 m. They have an average width of 6 or 7 m.

MORGAB. See Murgab.

MORGAN, a county in the N part of the state of Virginia, comprising an area of 350 sq. m. It has an irregular and rocky surface, and is drained by Cacapon river and Sleepy creek, both affluents of the

Potomac. In the valleys the soil is generally fertile. Pop. in 1840, 4,253; in 1850, 3,557. Its cap. is Bath.—Also a central co. of the state of Georgia, containing a superficies of 320 sq. m., drained by branches of Oconee river. Pop. in 1840, 9,121, of whom 5,646 were slaves; in 1850, 10,743. Its cap. is Madison.—Also a co. in the N part of the state of Alabama, comprising an area of 720 sq. m., bounded on the N by Tennessee river, and drained by Flint river and Cotaco creek and their branches. Pop. in 1840, 9,841, of whom 3,216 were slaves; in 1850, 10,125. Its cap. is Summerville.—Also a central co. of the state of Tennessee, containing an area of 640 sq. m., drained by Emery river and its branches, affluents of Tennessee river, and by branches of the S fork of Cumberland river. It is traversed by Cumberland mountains, and is generally hilly. Pop. in 1840, 1,660; in 1850, 4,330. Its cap. is Montgomery.—Also a co. in the E part of the state of Kentucky, containing an area of 890 sq. m., drained by Licking river and its branches, and by a branch of Kentucky river. Pop. in 1840, 4,603; in 1850, 7,622. Its cap. is West Liberty.—Also a co. in the SE part of the state of Ohio, containing an area, generally hilly, of 500 sq. m., and drained by Muskingum river and its branches, and by Duck creek. The soil is fertile, and on the Muskingum are extensive salt-works. Pop. in 1840, 20,852; in 1850, 28,326. Its cap. is Macconnelville.—Also a central co. of the state of Indiana, containing an area of 453 sq. m., drained by the W fork of White river and its branches. It has a hilly surface, but is very fertile. Pop. in 1840, 10,741; in 1850, 14,654. Its cap. is Martinsville.—Also a central co. of the state of Illinois, containing an area of 510 sq. m., bordered on the W by Illinois river, and drained by Indian, Mauvaiseterre, Apple, and Sandy creeks. The soil is extremely fertile, and is generally well-cultivated. Pop. in 1840, 19,547; in 1850, 16,065. Its cap. is Jacksonville.—Also a central co. of the state of Missouri, containing an area of 792 sq. m., drained by the S fork of La Mine river and Moreau creek, and by branches of Osage river. Its surface consists of woodland and prairie, and on the streams possesses considerable fertility. Pop. in 1840, 4,407; in 1850, 4,648. Its cap. is Versailles.—Also a township of Orleans co., in the state of Vermont, 50 m. NE of Montpellier. The surface is hilly, and is drained by a head-branch of Clyde river. It contains also a lake of considerable size. The soil is generally fertile. Pop. in 1840, 422.—Also a township of Greene co., in the state of Pennsylvania. Pop. 1,094.—Also a township of Ashtabula co., in the state of Ohio, 195 m. NE of Columbus, and watered by Grand river. Pop. 643.—Also a township of Butler co., in the same state. Pop. 1,726.—Also a township of Gallia co., in the same state. Pop. 744.—Also a township of Knox co., in the same state. Pop. 912.—Also a township of Morgan co., in the same state. Pop. 1,518.—Also a township of Scioto co., in the same state, on the W side of Scioto river. It is hilly, with fertile valleys, and is intersected by the Ohio canal. Pop. 265.—Also a township of Livingston co., in the state of Missouri. Pop. 178.—Also a township of Polk co., in the same state. Pop. 870.—Also a village of Morgan co., in the state of Tennessee, 156 m. E of Nashville, on the W side of Emery's river.

MORGANFIELD, a village of Union co., in the state of Kentucky, 221 m. WSW of Frankfort, and 10 m. S of Ohio river.

MORGANS, a parish in co. Limerick, 1¾ m. NNW of Askeaton. Area 1,228 acres. Pop. 564.

MORGAN'S ISLAND, a small island on the N coast of Australia, in the gulf of Carpentaria, in S lat. 13° 27½′.

MORGANTOWN, a village of Caernarvon township, Berks co., in the state of Pennsylvania, U. S, 56 m. E of Harrisburg. Pop. in 1840, 300.—Also a village of Monongahela co., in the state of Virginia, 295 m. NW of Richmond, on the E bank of Monongahela river. Pop. 700.—Also a village of Burke co., in the state of North Carolina, 197 m. W of Raleigh, on the S side of Catawba river.—Also a village of Butler co., in the state of Kentucky, 143 m. SW by W of Frankfort, and on the S side of Green river.—Also a village of Morgan co., in the state of Indiana, 39 m. S of Indianapolis, on the N side of Big Indian creek.

MORGAP, a town of Persia, in Farsistan, 72 m. NE of Shiraz. Pop. 500.

MORGARTEN, a mountain of Switzerland, in the cants. of Schwytz and Zug, 5 m. N of Schwytz, near the E border of Lake Egeri, known as the scene of the most celebrated efforts of the Swiss in defence of their liberties, in 1315 against the Austrians, and in 1798 against the French.

MORGE, a river of France, in the dep. of Puy-de-Dome, which rises to the S of Manzat, and joins the Allier on the l. bank, after a sinuous course of 34 m.

MORGENE, a mountain of the Sardinian states, in Savoy, situated to the E of St. Jaire.

MORGENITZ, a village of Prussia, in the reg. of Stettin, circle of Usedom. Pop. 155.

MORGENSTERN, a large village of Bohemia, 56 m. NE of Prague. Pop. 1,900. Here are several glass-manufactories and flax-spinning works.—Also a village of Prussia, in the reg. of Cöslin, circle of Lauenburg-Butow. Pop. 249.

MORGES, or MORSEE, a town of Switzerland, in the cant. of Vaud, on the N shore of the lake of Geneva, 7 m. W of Lausanne. Pop. in 1850, 3,241, of whom 161 were Catholics. It is well built, and has a harbour on the lake, and a castle which was formerly the residence of the bailiff appointed by the cant. of Berne. The environs produce good wine. A railway from M. to Yverdon on the lake of Neufchatel, a distance of 29 m., was projected in 1852.

MORGESTEL, a large village of Holland, in N. Brabant, 17 m. E by S of Breda. Pop. 1,200.

MORGEX, a town of the Sardinian states, in the prov. and 18 m. W of Aosta, on the l. bank of the Dora-Baltea.

MORGINENVAL, a small town in the north of France, dep. of the Oise, 6 m. SE of Compiegne. Pop. 1,100.

MORGOW, a village of Prussia, in the reg. of Stettin, circle of Cammin. Pop. 164.

MORHAM, a parish of Haddingtonshire, 3 m. SE of Haddington. Pop. 287.

MORHANGE, a commune of France, in the dep. of Moselle, 24 m. SW of Sarreguemines. Pop. 1,200.

MORHINGEN, a town of Baden, on the l. bank of the Danube, in the circle of the Lake.

MORI, a mountain-summit of the S. Himalaya, in about N lat. 32° 10′, on the NE of the Punjab.—Also a village of the Tyrol, 3 m. SW of Roveredo.

MORIAH, a township of Essex co., New York, U. S., on Lake Champlain. Pop. 2,595.

MORIATTU, a mountain of New South Wales, in the district of Lachlan, the northernmost point of the Goulburn range.

MORIC, a hamlet of France, in the dep. of Vendée, 20 m. ESE of Les Sables, at the embouchure of the Lay. Pop. 350.

MORICE-TOWN, a suburb of Devonport, in Devonshire, beyond the lines with which the town and arsenal are surrounded, but included within the boundaries of the parl. borough. It is inhabited chiefly by those who find employment in the docks, &c. The

military hospital is situated on the NE, and the powder-magazine on the W, of this suburb.

MORIENNE-BAY, a bay on the E coast of the island of Cape Breton.

MORIENVAL, a village of France, in the dep. of Oise, cant. and 6 m. NNE of Crepy. Pop. 700.

MORIERES, a town of France, in the dep. of Vaucluse, 4 m. E of Avignon. Pop. 500.

MORIES, a town of France, in the dep. of Basses-Alpes, 9 m. NNW of Castellane. Pop. 900.

MORIKEN, a village of Switzerland, in the cant. of Aargau, 9 m. E of Aarau.

MORILA, a walled village of Central Africa, 4 days E of Diecura, and WSW of Kankari.

MORILLAS, a village of Spain, in the prov. and 12 m. SW of Vitoria, on the r. bank of the Bayas.

MORILLEJO, a village of Spain, in the prov. and 45 m. E of Guadalajara. Pop. 700.

MORILLON, a village of France, in the dep. of Seine-et-Loire, cant. and 7 m. SW of Gueugnon.—Also a village of the Sardinian states, in the prov. of Faucigny, 12 m. E of Bonneville. Pop. 850.

MORIN, a village of Prussia, in the reg. and 36 m. NNW of Frankfort, on a small lake.—Also a town of Russia, in the gov. and 52 m. ENE of Grodno, on the l. bank of the Niemen.

MORIN (Grand), a river of France, which rises to the N of Sezanne, in the dep. of the Marne; passes Coulommiers and Crecy; and flows into the Marne, on the l. bank, near Ebly, 3 m. SW of Meaux, after a W course of about 70 m.

MORIN (Petit), a river of France, which rises near Baye, in the dep. of Marne; passes Montmirail; and flows into the Marne, on the l. bank, after a W course of 50 m.

MORING, a village of Bavaria, 7 m. S of Friedberg. Pop. 1,200.

MORINGEN. See Möhringen.

MORINIGO, a village of Spain, in the prov. and 15 m. E of Salamanca. Pop. 260.

MORISON'S-HAVEN, a harbour 5 furl. W of the v. of Prestonpans, Haddingtonshire. Though small, and possessing only 10 ft. water at spring-tides, it is one of the safest harbours on the Forth.

MORISTON, a river, partly of Ross-shire, but chiefly of Inverness-shire. It rises at the head of Glen-Clunie, in the former co.; runs 5 m. E to Loch Clunie, and, while traversing that lake, passes into Inverness-shire; thence it has a course of 17 m. prevailingly E to Loch Ness, at Invermoriston. It gives the name of Glenmoriston to all the vale below Loch Clunie, and to the p., which consists principally of that vale, and is now united to Urquhart. Its chief tributary is the Luing, which, 2 m. below Loch Clunie, comes down upon its r. bank from Loch Luing.

MORITZ (Saint), a small town of the Swiss cant. of the Grisons, in the Upper Innthal, 27 m. SSE of Coire. At some distance from the town is an acidulous mineral spring, much in vogue both among Italians and Germans. The v. stands at the extraordinary elevation of 4,800 ft. above sea-level, near a small lake from which the Inn flows. It is in the neighbourhood of the Bernina and other glaciers; and the climate is so cold that snow falls not unfrequently at midsummer.

MORITZ (Saint). See Maurice (Saint).

MORITZBERG, a town of Hanover, in the gov. and to the W of Hildesheim, of which it is a suburb.

MORITZFELDE, a village of Prussia, in the reg. of Liegnitz, circle of Landshut. — Also a village in the reg. of Stettin, circle of Greifenhagen. Pop. 332.

MORJA, a village of Russia, in the gov. and 27 m. NE of Saint Petersburg, at the embouchure of a small river of the same name, which flows into Lake Ladoga.

MORKE, or Morkowo, a village of Prussia, in the reg. of Posen, circle of Fromstadt. Pop. 320.

MORKO, an island of the Baltic, in N lat. 58° 57′.

MORKOWITZ, a town of Moravia, on the Hanna, 21 m. S of Olmutz. Pop. 1,000.

MORLAAS, a town of France, in the dep. of Basses-Pyrénées, 7 m. ENE of Pau. Pop. 1,680.

MORLACHIA, a district belonging to Austria, lying between Dalmatia and Croatia. It is about 100 m. in length, and 25 m. in breadth; and seems not at any period of its history to have formed an independent or even a distinct prov. It takes its name from its inhabitants, an uncivilized tribe, who call themselves *Vlassi* or *Moro-Vlassi*, *i. e.* 'Wallachians of the sea-coast.' While the Dalmatians of the coast, and the principal families in the large towns of the interior, are mostly of Venetian extraction, and those who are of Hungarian origin have adopted the customs and language of the Italians, so that there is little worthy of notice in their notions or mode of life, the Morlacchi differ much from the other inhabitants, far more than the peasantry generally do from the people of the towns; which is readily explained by their having come into the country at a comparatively recent period. Many of their customs are singular, and of these their superstitions are not the least remarkable. They believe that when a man dies who has led a bad life, he comes out of the tomb about forty days after his death, and haunts his neighbours as a vukózlak or vampire. Dreams are of great importance among them. Belief in a good and bad genius is universal. Charms against the evil eye and various calamities are used by them, as in the East; and they have the same Oriental belief of men and women being liable to possession by devils. On meeting any one on the road, their uniform salutation is, '*Hvalien isus*,' 'Jesus be praised!' the answer to which is, '*Vazda*,' or '*Vazda budi i Maria*,' 'always,' or 'He always is, and Maria!' No one, however callous to crime, would omit the most extravagant signs of devotion on passing a cross by the road-side. See Dalmatia.

MORLAIX, a town of France, in the dep. of Finistere, 36 m. NE of Brest, about 5 m. from the sea, on the small river Morlaix, which forms a harbour, and by which coasters or small vessels of 100 tons can come up to the town at high water. Pop. in 1821, 9,781; in 1841, 10,539. It is well-built, and has two large and handsome streets. The trade, though not great, embraces a diversity of articles, cattle, flax, hemp, and linen. Its manufactures are also various, comprising tobacco, paper, leather, chemical substances, and linen. This place was appropriated to the reception of flags of truce from England during the war in the peninsula.—The cant. of M., comprising 5 coms., had a pop. of 18,086 in 1841.—The arrond. of M., comprising 10 cants., has an area of 131,102 hectares. Pop. in 1841, 139,912.

MORLAND, a parish in Westmoreland, 5 m. WNW of Appleby, including the townships of King's-Meaburn, Newby, Sleagill, Strickland Great, and Strickland Little, and the chapelries of Bolton-in-the-Sands, M., and Thrimby. Area 15,260 acres. Pop. in 1831, 1,942; in 1841, 1,923.

MORLANE, a town of France, in the dep. of the Basses-Pyrénees, cant. and 6 m. W of Arzac, and 14 m. E of Orthez. Pop. 1,000.

MORLAS, a river in Carmarthenshire, which falls into the Tave.

MORLE (Ober), a village of the grand-duchy of Hesse-Darmstadt, in the prov. of Upper Hesse, bail. and 5 m. S of Butzbach, and 18 m. N of Frankfort-on-the Maine. Pop. 1,593.

MORLENBACH, a town of Hesse-Darmstadt, in the prov. of Starkenburg, ldbz. and 6 m. from Lindenfels, at the confluence of the Morlenbach with the Weschnitz. Pop. (Cath.) 683.

MORLEY, a parish and township in Derbyshire, 4¼ m. NE by N of Derby. Area 3,530 acres. Pop. in 1831, 1,064; in 1841, 1,132.—Also a chapelry in Batley p., W. R. of Yorkshire, 4½ m. SW by S of Leeds. Area 2,590 acres. Pop. in 1831, 3,819; in 1841, 4,087, chiefly employed in the woollen manufactory. The Leeds and Manchester railway has a station here.

MORLEY, a village of France, in the dep. of the Meuse, cant. and 3 m. N of Montier-sur-Saux, and 17 m. SSE of Bar-le-Duc, on the l. bank of the Saux. Pop. 472. It has a large iron-work.

MORLEY ST. BOTOLPH, a parish of Norfolk, 3 m. SW of Wymondham. Area 760 acres. Pop. in 1831, 339; in 1841, 328.

MORLEY ST. PETER, a parish in Norfolk, 3½ m. SW of Wymondham. Area 950 acres. Pop. 191.

MORLHON, a village of France, in the dep. of the Aveyron, cant. and 1½ m. S of Villefranche.

MORLOCK, a river of Western Australia, which has its source in the co. of Victoria; runs through that of Fork; and falls into the Avon at the town of Northam.

MORMANNO, a town of Naples, in the prov. of Calabria-Citra, district and 15 m. NW of Castrovillari, and 11 m. NE of Scalea. Pop. 5,800.

MORMANT, a canton, commune, and town of France, in the dep. of the Seine-et-Marne, and arrond. of Melun. The cant. comprises 29 com. Pop. in 1831, 10,012; in 1841, 9,938. The town is 13 m. ENE of Melun, and 33 m. SE of Paris. Pop. 861. It possesses a fine chateau. Cider apples are extensively cultivated in the environs.

MORMAR, a station of the Sahara, on the road from Fezzan to Yen, in the Tibbus territory, 360 m. SE of Tegherry.

MORMOIRON, a canton, commune, and town of France, in the dep. of Vaucluse, and arrond. of Carpentras. The cant. comprises 10 coms. Pop. in 1831, 10,489; in 1841, 11,288. The town is 8 m. E of Carpentras, and 13 m. WSW of Sault, on the r. bank of the Auzon. Pop. 2,416. Coal and sulphate of iron are found in the environs.

MORMOND-HILL, a small but conspicuous conical hill in the district of Buchan, Aberdeenshire, 6½ m. SSW of Kinnaird-head. Though possessing an alt. of only 810 ft. above sea-level, it is a good land-mark to mariners.

MORNA, a bay of New South Wales, in the co. of Gloucester, and p. of Tomaree.

MORNAC, a commune of France, in the dep. of the Charente, cant. and 9 m. E of Angouleme. Pop. 1,146.—Also a com. in the dep. of the Charente-Inferieure, cant. and 6 m. N of Royan, on the Seudre, in a saline marsh. Pop. 688. It has a small port.

MORNANT, a canton and commune of France, in the dep. of the Rhone, and arrond. of Lyon. The cant. comprises 12 coms. Pop. in 1831, 10,021; in 1841, 10,041. The v. is 14 m. SW of Lyon, on the Mornancet, an affluent of the Rhone. Pop. 2,147. It has manufactories of coarse cloth, and of hats.

MORNAS, a commune and town of France, in the dep. of Vaucluse, cant. and 6 m. S of Bollene, on the l. bank of the Lez, and near its confluence with the Rhone. Pop. 1,688. It has several spinning-mills. M. is supposed to occupy the site of the *Forum-Neronis* of the Romans, and is commanded by a rocky height, on which are the ruins of a castle.

MORNE (Le Gros), a town of the island of Hayti, in the dep. of the Nord, 21 m. SSW of the Port-de-Paix, on the Three-Rivers.

MORNE-A-L'EAU, a quarter of the island of Guadalupe, in the E part of La Grande-Terre, and to the E of La Pointe-a-Petre. Pop. 3,023, of whom 2,293 are slaves.

MORNING-THORPE, a parish in Norfolk, 7¾ m. NW of Bungay. Area 1,040 acres. Pop. 192.

MORNINGTON, an island on the N coast of Australia, at the head of the gulf of Carpentaria, in S lat. 16° 24′, E long. 139° 37′, the most northern of the group of the Wellesley islands. It is 35 m. long, and 90 m. in circumf., not including the sinuosities of the coast.

MORNINGTON, a village of co. Meath, in the p. of Colpecum-Mornington, on the r. bank of the Boyne. Pop. 1,841.

MORO, or Montemort, a summit of the Lepontine Alps, 12 m. ENE of Rosa. It has an alt. of 1,600 toises = 3,410 yds. above sea-level.

MOROCCO. See Marocco.

MOROGNES, a commune of France, in the dep of Cher, cant. of Les Aix-d'Angillon. Pop. 1,440.

MOROKAI, or Morokoi, one of the Sandwich islands, in the Pacific, to the NW of Mawi, and N of Ranai, in N lat. 21° 9′, E long. 157°. It is formed by a chain of volcanic mountains 40 m. in length; but is not above 7 m. in breadth. There is little level land in it, and consequently little cultivation. Its pop. was estimated in 1828 at 3,000.

MOROKINI, or Morotinni, one of the Sandwich islands, between the SW coast of Mawi and the island of Tahurawe, in N lat. 20° 36′. It is a mere rocky islet.

MOROLO, a town of the Papal states, in the deleg. and 9 m. W of Frosinone.

MORON, a town of Spain, in the prov. and 33 m. ESE of Seville, with a castle on an eminence. Pop. 9,445. It stands on a fine plain, and has a trade in wool and oil.—Also a town of Spain, in the prov. and 18 m. S of Soria.—Also a settlement of Buenos-Ayres, 20 m. SW of Buenos-Ayres.

MORONA, a river of New Granada, which, after receiving a variety of tributary streams, enters the Tunguragua, with a large stream, 41 m. S by E of San Borja, between the Pastaza and Santiago.

MORONE, a town of Naples, in the prov. of Molise, and 8 m. SW of Larino. Pop. 3,200.

MOROSAGLIA, a commune and canton of the island of Corsica, 8 m. NE of Corte. Pop. of com. 820: of cant. 3,782.

MOROSQUILLO BAY, a bay on the coast of New Grenada, and in the bight of coast coming out of Darien gulf, in N lat. 9° 30′.

MOROZZO, a commune and village of Piedmont, 12 m. NE of Coni, on an affluent of the Tanaro. Pop. 1,685.

MORPETH, a parish and parl. borough in the W division of Morpeth ward, Northumberland, 18 m. S by E of Alnwick, and 15 m. N of Newcastle, intersected by the river Wansbeck, and the post-road from Newcastle to Edinburgh. The p. includes the townships of M., Buller's-Green, Catchburn, Hepscott, Newminster-Abbey, Shilvington, Tramwell and High-church, and Twizell. Area 7,600 acres. Pop. of the p. in 1801, 3,707; in 1831, 4,797; in 1841, 4,237. Pop. of the old borough in 1801, 2,951; in 1831, 3,890. The new parliamentary boundaries include a large agricultural district, stretching between the Wansbeck on the N, and the Blyth on the S, eastward to the German ocean, and including various villages and hamlets, as Bedlington, Netherton, Hepscott, Sleekburn, and Cambois. Pop. of parl. borough in 1851, 10,012. This district is traversed by railroads, one of which extends from the town of M. to collieries at Netherton, and another runs through the township of Bedlington to the navigable part of the

river Blyth. The York and Newcastle railway also intersects the p., and has a station here. The Wansbeck flows E to the boundary of the municipal borough, which it skirts on the W, S, and E, and then running through a succession of narrow but fertile vales, falls into the sea at Cambois, about 7 m. E of M. It is a shallow and rapid stream, and flowing in a rocky channel, it is very improbable that it will ever be rendered navigable. On the S side of the town this small river is crossed by a bridge, erected in 1831, immediately below a strong but narrow and steep old bridge of 2 arches, and connecting the castle with the town. On the W it is crossed by a suspension foot-bridge. A little to the E of the first bridge, on the river-bank, is a public promenade or terrace, tastefully laid out. The town chiefly consists of two spacious and well-built streets, with a market-place in the centre. On the W side of the market-place stands the town-hall. The church, a plain structure with 3 aisles and 2 galleries, stands on an eminence called Kirkhill, S of the town. The Independents, Primitive and Wesleyan Methodists, Presbyterians, and Roman Catholics, have places of worship in the town and p. —The revenues of the corporation amounted in 1831 to £268; in 1850 to £733. M. returned 2 members to parliament until the Reform act reduced the number of representatives to 1. Electors in 1837, 368; in 1848, 428.—M. is of no note for manufactures. It has a small woollen-mill, a brewery, and two or three corn-mills worked by steam. The chief dependence of the town is on its cattle and corn-market, which is held weekly. In the first week of September, horse races are run on a race-course N of the town.

MORPETH, a town of New South Wales, in the p. of Maitland, and co. of Northumberland, at the head of the navigation on Hunter river, and 29 m. by water from Newcastle. Steamers ply between this place and Sydney. Coal is wrought in the vicinity.—Also a village of Upper Canada, in Howard township, 1½ m. from Lake Erie.

MORPHIL. See MORFIL.

MORRA, a town of Naples, in the prov. of Principato-Ultra, 30 m. SE of Benevento. Pop. 3,300.

MORRA. See MORA.

MORRAGE, a township of Ipstones p., in Staffordshire, 4 m. NNE of Cheadle. Pop. in 1831, 403.

MORRE, a village of France, in the dep. of Doubs, cant. and 2 m. E of Besançon. Pop. 320.

MORRION (EL), a mountain in the W part of Patagonia, in S lat. 53° 33′, W long. 72° 32′.

MORRIS, a county in the N part of the state of New Jersey, U. S., comprising an area of 500 sq. m., drained by Rockaway and Whippany rivers, affluents of the Passaic, and by the head-branches of Raritan river, and intersected by Morris canal. It is hilly towards the N, and abounds in iron ore. Pop. in 1840, 25,814; in 1850, 30,173.—Also a township of Morris co., in the state of New Jersey, 28 m. W of New York. It is partly hilly, is bounded on the W and S by Passaic river, and watered by tributaries of that river, and by Whippany river. Pop. in 1840, 4,013.—Also a township of Tioga co., in the state of Pennsylvania, 133 m. N by W of Harrisburg. Its surface is hilly, and the soil chiefly gravel and clay. Pop. 120.—Also a township of Greene co., in the same state. Pop. 1,162.—Also a township of Huntingdon co., in the same state. Pop. 1,516.—Also a township of Washington co., in the same state. Pop. 1,683.—Also a township of Knox co., in the state of Ohio. The three upper branches of Vernon river unite in this township, and form a tract of 6,000 acres of dry fertile bottom land. Pop. 1,072.

MORRISONIA, a village of Westchester township, Westchester co., in the state of New York, U. S., on the NE side of Harlem river. It consisted in 1840 of about 15 dwellings.

MORRISTON, a chapelry in the p. of Langefelach, Glamorganshire, 2½ m. ENE of Swansea, on the r. bank of the Taw. Pop. in 1831, 1,530. In the vicinity are copper-mines, and extensive potteries.

MORRISTOWN, a township of Lamoille co., in the state of Vermont, U. S., 28 m. N by W of Montpellier. It has a diversified surface; and the soil, particularly on Lamoille river, is very fertile. Pop. in 1840, 1,502.—Also a township of Lawrence co., in the state of New York, 199 m. NNW of Albany, on the SE side of St. Lawrence river. It has an undulating surface, and is bordered on the SE by Black lake. Its soil is chiefly clay loam. Pop. 2,809. —Also a village of Morris co., in the state of New Jersey, 53 m. N by E of Trenton, on an elevated plain. Pop. 2,500.—Also a village of Union township, Belmont co., in the state of Ohio, 105 m. E of Columbus, on the national road, 9 m. W of St. Clairsville. Pop. 300.—Also a village of Shelby co., in the state of Indiana, 26 m. E by S of Indianapolis, on the E side of Blue river.—Also a village of Henry co., in the state of Illinois, 141 m. NNW of Springfield, 4 m. S of Green river.—Also a village of Jefferson co., in the state of Tennessee, 226 m. E of Nashville, on the road from Greenville to Knoxville.

MORRISVILLE, a village of Morristown township, Lamoille co., in the state of Vermont, U. S., 26 m. N of Montpellier.—Also a v. of Eaton township, Madison co., in the state of New York, 102 m. W by N of Albany, on Cherry Valley turnpike. Pop. 700. —Also a town of Bucks co., in the state of Pennsylvania, 125 m. E of Harrisburg, on the W side of Delaware river, opposite Trenton. The Delaware is here crossed by a fine bridge.—Also a village of Fauquier co., in the state of Virginia, 88 m. N by W of Richmond. Pop. 50.

MORRITO (POINT), a point on the coast of the dep. of Ystmo, in New Grenada, 1 m. S 65° W from Point Arenas, at the mouth of the Chagres.

MORRO, a village of the Papal states, in the deleg. and 15 m. W of Ancona.—Also a lofty and steep islet, 4 leagues N 78° W of Point Mono in Trinidad.

MORRO-ACARI, a sugar-loaf shaped hill on the N side of the bay of San Juan, on the coast of Peru.

MORRO-DE-BENGUELA, or OLD BENGUELA HEAD, a steep, black, rugged point, on the W coast of Africa, forming the S point of Bahia-Songa.

MORRO-BO, an insulated mountain on the E coast of Brazil, in S lat. 20° 47′, W long. 40° 41′.

MORRO-DE-BONIFACIO, a cape on the coast of Chili, in S lat. 39° 25′.

MORRO-CAINVA, a hill on the E coast of Brazil, in S lat. 25° 49′, W long. 48° 34′.

MORRO-DE-CAMBORELLA, a summit of the Eastern Cordilheiras, on the coast of Brazil.

MORRO-DE-CARAPUCHO, a headland on the coast of Peru, in S lat. 19° 35′.

MORRO-CHICO, a cape on the coast of Honduras, in N lat. 15° 35′.

MORRO-COBIR, a cape on the E coast of Africa, in Zanguebar, in S lat. 8° 5′.

MORRO-COLORADO, a hillock on the coast of New Grenada, in N lat. 9° 34′, W long. 79° 9′.

MORRO-DE-COPIAPO, a round topped hill to the N of the port of Copiapo, on the coast of Chili.

MORRO-DE-LOS-DIABOLOS, a headland on the coast of Peru, in S lat. 18°.

MORRO-DAS-LAGOSTAS, a projecting headland, on the Angola coast of Africa, 7 m. W of the entrance of the Bengo river.

MORRO-DE-PICA, a mountain of Peru, in the prov. of Tarapaca, in S lat. 21° 28′, E long. 68° 42′.

MORRO-DE-PUERCOS, a cape on the W coast of Mexico, in N lat. 7° 35′.

MORRO-DE SAN-JOAO, a hill on the N bank of the San João river, which flows into the bay of St. Ann, on the E coast of Brazil. It is in S lat. 22° 32′, W long. 41° 59′.

MORRO-DE-SAN-JOSEF, a headland on the coast of Peru, in S lat. 24°.

MORRO-DI-VALLE, a town of the Papal states, in the marquisate of Ancona, 4 m. N of Jesi.

MORRO HERMOSO, a projecting promontory on the W coast of Old California, in N lat. 27° 52′. —Also a hill on the coast of New Grenada, in N lat. 10° 58′, W long. 75° 2′.

MORRO ITACOLUMI, a mountain on the W side of Maranhao bay, on the N coast of Brazil.

MORRO-MORENA, a cape on the coast of Chili, in S lat. 23° 10′.

MORRO-MORRO, a town of Buenos Ayres, 40 m. NE of Cocha.

MORRO POINT, a steep abrupt point on the coast of Chili, to the N of Port Yngles.

MORRO-QUEMADO, a headland on the coast of Peru, in S lat. 14° 20′.

MORRO-SOLAR, a remarkable cluster of hills standing on a sandy plain to the N of Chorillo bay, on the coast of Peru, in S lat. 12° 11′, W long. 77° 06′.

MORRO-TICONDIBA, a hill on the N coast of Brazil, in S lat. 3° 10′, W long. 40° 34′.

MORRONE. See MORONE.

MORROPE, a settlement of Peru, in the prov. of Sana, 105 m. NW of Truxillo, near the coast.

MORROPON, a river of Peru, in the prov. of Piura, which runs SW, and enters the Piura, in S lat. 5° 24′.

MORROS (POINT), a headland on the coast of Yucatan, in N lat. 19° 45′, W long. 90° 40′.

MORROS-DE-COMMANDATUBA, the southernmost of a group of mountains on the E coast of Brazil, in about S lat. 15° 19′.

MORS. See MEURS.

MORS, or MORSOE, an island of Denmark, in the Lymfiord gulf, in the N of Jutland, bail. of Thisted, in N lat. 56° 41′. Its area is 136 sq. m. With the adjacent islands of Jegondöe and Ageröe, it had a pop. of 13,500 in 1848. The surface is in general level, except on the S side. In several places the sea has gradually formed subterranean excavations, and the ground has sunk. The climate is variable; but the soil is fertile, and about two-thirds of the whole are under cultivation. The inhabitants, who speak a peculiar dialect, are a simple race, strangers equally to luxury and extreme poverty. From Nykiöbing, the only town in the island, N lat. 56° 47′, W long. of Copenhagen 3° 43′, there is a considerable export of corn. There are several villages and hamlets.

MORSCH, a village of Baden, near the Rhine, 6 m. NW of Carlsruhe. Pop. 1,209.—Also a village of Hesse-Cassel, 5 m. SE of Melsungen. Pop. 848.

MORSCHANSK. See MORCHANSK.

MORSEE. See MORGES.

MORSPURG, a town of Baden, on the lake of Constanz, 6 m. NE of Constanz, formerly the residence of the bishop of Constanz. It is surrounded with walls, and has some traffic by means of the lake.

MORSTON, a parish of Norfolk, 6 m. E of Wells. Area 1,570 acres. Pop. 173.

MORSUM, a village of Denmark, on the E extremity of the island of Sylt, in the bail. and 18 m. W of Tondern in Sleswick. Pop. 1,000.

MORT (LOC-LA), a lake of Upper Canada, 40 m. NNW of Sturgeon lake.

MORTAGNE, an arrondissement, canton, and town of France, in the dep. of Orne. The arrond., comprising 11 cants. and an area of 195,963 hects., had a pop. in 1841 of 125,050.—The town is situated 21 m. ENE of Alençon, on a hill near the small river Huine. Pop. 4,392. It has some manufactories of linen, thread, leather, and cyder.—Also a town in the dep. of La Vendée, 27 m. ESE of Nantes, on the Sevre-Nantaise, remarkable as the scene of an engagement in 1793, between the royalists and republicans, in which the former suffered a heavy loss. Pop. 1,404.—Also a town in the dep. of Charente-Inferieure, on the r. bank of the Gironde, 12 m. SSW of Pons. Pop. 1,436.—Also a town in the dep. of Vosges, with large iron works.—Also a town in the dep. of Nord, 9 m. NNW of Valenciennes. Pop. 1,318.—Also a river of France, an affluent of the Meurthe, which it joins on the l. bank, 3 m. SW of Luneville, after a course of about 40 m.

MORTAGOA, a village of Portugal, in the prov. of Beira, 24 m. WSW of Viseu. Pop. 800.

MORTAIN, a town of France, in the dep. of La Manche, situated on the small river Lance, 16 m. E of Avranches. Pop. in 1841, 2,523. It has manufactories of lace and linen. The arrond., comprising 8 cants., has an area of 87,408 hectares. Pop. in 1841, 74,615.

MORTANO, a town of the Papal states, in the leg. and 21 m. S of Forli.

MORTANSVELS, a village of Belgium, in the prov. of Hainault, cant. and 6 m. NE of Bineh, on the r. bank of the Haine. Pop. 1,450.

MORTARA, a town of the Sardinian states, in the Milanese prov. of Lomellina, between the rivers Agogna and Terdopio, 25 m. SW of Milan, and 7 m. SE of Vigevano. It contains 382 houses, 1,051 families, and 5,316 inhabitants. In ancient times it had a castle of such importance that it excited the jealousy of the Milanese, who dismantled it in the 13th cent.; after which it was twice rebuilt and destroyed by contending factions; now little remains of its fortifications but a circumvallation or fosse. There are 2 parochial and 5 other churches in the town; one of the former, dedicated to San Lorenzo, is a handsome structure, and has some fine pictures. To the other parish-church was attached a large Augustine convent, which was suppressed by the French; and the buildings are now used as the residence of the intendent of the prov., and for his offices. Among the public edifices are the municipal palace, schools, &c. There are markets and fairs of some importance here; and hence radiate six provincial roads, to Vigevano and Milan, Novara, Pavia, Alessandria, Casale, and by Lumello to Genoa.

MORTARO, or MORTERO, commonly called MORTAR, a small island of the Adriatic, on the coast of Austrian Dalmatia, to the NW of the town of Sebenico. It is only 13 m. in circumf. The inhabitants cultivate the olive and the vine, and manufacture the fibres of a particular kind of broom produced on the W side into coarse canvass. This island has a beautiful village of the same name, the ruins of a town supposed to be the *Colentum* of Pliny, and some small hamlets.

MORTAVAIA, a town of Russia, in the government and 36 m. E of Charkov, on the l. bank of the Donetz.

MORTEAU, a town of France, in the dep. of Doubs, situated on the river Doubs, 12 m. SE of Pontarlier. Pop. 1,550, engaged in linen and cotton weaving.

MORTEFONTAINE, a commune and village of France, in the dep. of Oise, cant. and 6 m. S of Senlis. Pop. 387. There is a fine chateau here.

MORTEMART, a village of France, in the dep.

of Haute-Vienne, cant. and 6 m. SSE of Mezieres. Pop. 550.

MORTERO, or Mortori, a small islet on the E coast of the island of Sardinia, with a village inhabited by fishermen, in N lat. 41° 12′ 46″.

MORTES (Rio-das), a river of Brazil, in the prov. of Matto-Grosso, the highest western branch of the Rio-Grande.

MORTHOE, a parish in Devonshire, 4½ m. WSW of Ilfracombe. Area 3,480 acres. Pop. in 1831, 338; in 1841, 379.

MORTIER, a village and fort of France, in the dep. of Haut-Rhin, 2 m. ENE of Neu-Brisach.

MORTIER-BANK, a fishing-bank near the S coast of Newfoundland, in N lat. 47° 5′.

MORTIMER'S CROSS, a township in Amestry p., Herefordshire, 5½ m. NW of Leominster, on the W bank of the Lugg. Here, on Candlemas eve 1461, a severe conflict took place between the partisans of the rival houses of York and Lancaster, the issue of which was the settlement of Edward IV. on the throne of England. A Tuscan pillar of white stone, placed in an angle formed by the junction of two roads, marks the scene, and records the issue of this memorable battle.

MORTIMER (West), a tything in Strathfield-Mortimer p., Hants, 8 m. N of Basingstoke. Area 1,810 acres. Pop. in 1831, 348; in 1841, 334.

MORTIZABAD, a district of Hindostan, in the prov. of Bijapur, situated principally between the 17th and 18th parallels of N lat.; and skirted on the W by the Western Ghauts, which separate it from Concan. It is intersected from NW to SE by the river Krishna. Its chief towns are Merritch, Sattara, and Sangli.

MORTIZANAGUR. See Guntur.

MORTLACH, a parish in the Moray district of Banffshire, bounded on the N by Boharm, and on the S by Inveraven. It is of an oblong form, and its superficial extent is about 35,000 acres. From a mountainous line of water-shed across the S end of the parish, two glens extend 7½ m. NE at the distance from each other of from 2 to 2½ m. The stream of the W glen is the Dullan; and that of the E and of the united glen is the Fiddich,—giving the name of Glenfiddich to all the district which forms its basin. The screen of much of the W side of the W glen is the huge and broad-based Benrinnes, whose vast mass fills a large part of the neighbouring p., and whose summit rises 2,747 ft. above sea-level. The uplands are clothed to the extent of about 600 acres with wood; elsewhere they are variously moorland and coarse pasture, but are in general duskily dressed out in heath. The soil of the arable grounds is almost all loamy, deep, and fertile. Pop. of p. in 1801, 1,876; in 1831, 2,633; in 1841, 2,594.—The old village of M. stands on the Dullan, a ½ m. above its confluence with the Fiddich; but has dwindled away to insignificance. The modern thriving village of Dufftown stands a ½ m. N of M., and is distant 9 m. from Keith. It was commenced in 1817, and has at present a pop. of nearly 850.—Malcolm II., immediately after his victory at M. over the Danes, in 1010, got the parish church converted into a cathedral, and the village into the seat of a dio. Nectan, the 4th and last bishop, was removed by David I. to Aberdeen, and became by translation the first bishop of that city. The bishopric of Mortlach, thus transmuted into that of Aberdeen, lasted from 1010 to 1139. In the order of precedence it was next to St. Andrews, or ranked as the second dio. in Scotland.

MORTLAKE, a parish in Surrey, 8 m. WSW of London, on the S bank of the Thames, and intersected by the London and Richmond railway. The parish includes East Sheen. Area 1,910 acres. Pop. in 1831, 2,698; in 1841, 2,778.

MORTLESTOWN, a parish in co. Tipperary, 3 m. NE of Cahir. Area 1,839 acres. Pop. 573.

MORTLOCK ISLANDS, a group in the Pacific, in S lat. 4° 55′, E long. 156° 10′.

MORTO ISLAND, an island on the coast of Peru, about 2 m. in length, 13 m. NW of the river Tumbez.

MORTON, a parish in Derbyshire, 2¾ m. N of Alfreton. Area 2,800 acres. Pop. in 1831, 501; in 1841, 646.—Also a parish in Lincolnshire, 2½ m. N of Bourne, including the hamlet of Hanthorpe or Harmthorpe. Area 3,390 acres. Pop. in 1831, 842; in 1841, 952.—Also a hamlet in Gainsborough p., Lincoln, 1¾ m. NW of Gainsborough, on the E bank of the Trent. Area 2,570 acres. Pop. in 1831, 543; in 1841, 569.—Also a township in Ainderby-Steeple p., Yorkshire, 3¼ m. SW of North-Allerton, on the E bank of the Swale. Area 1,250 acres. Pop. in 1831, 258; in 1841, 252.

MORTON, a parish in Upper Nithsdale, Dumfries-shire. Area 6,496 Scottish acres. Much of the surface shoots up in bold pastoral heights, forming part of the southern Alps of Scotland, and attaining altitudes of 2,500 ft. and under, between the two grand basins of the Lowlands. Nearly in the centre of the parish, 2½ m. N of Thornhill, on the brink of a glen traversed by a little tributary of Cample, stands Morton-castle, one of the least dilapidated ruins of its class in Nithsdale. Pop. of p. in 1801, 1,255; in 1831, 2,140; in 1841, 2,161.

MORTON-BAGGOTT, a parish in Warwickshire, 2¾ m. WSW of Henley-in-Arden. Area 1,160 acres. Pop. in 1831, 170; in 1841, 170.

MORTON (East and West), a township in Bingley p., Yorkshire, 3 m. NE of Keighley, crossed by the Leeds and Liverpool canal. Area 3,290 acres. Pop. in 1831, 1,219; in 1841, 1,693.

MORTON-GRANGE, a township in Houghton-le-Spring p., co.-palatine of Durham, 5½ m. NE of Durham. Area 580 acres. Pop. in 1841, 185.

MORTON-ON-THE-HILL, a parish in Norfolk, 8½ m. NW of Norwich, on the W bank of the Winsum. Area 1,220 acres. Pop. in 1841, 165.

MORTON-JEFFRIES, a parish in Herefordshire, 5½ m. SW of Bromyard. Area 660 acres. Pop. 53.

MORTON-MORRELL, a parish in Warwickshire, 3½ m. NW of Kington. Area 1,710 acres. Pop. 253.

MORTON-PINKNEY, a parish in Northamptonshire, 8 m. W by N of Towcester. Area 2,460 acres. Pop. in 1831, 581; in 1841, 565.

MORTON'S BAY, a bay on the W coast of the island of Nevis, 2 m. N of Charleston.

MORTREE, a town of France, in the dep. of Orne, 13 m. N of Alençon. Pop. 1,590; of cant. 7,301.

MORTUGARA, a settlement of Brazil, in the prov. of Para, 20 m. SW of Para.

MORTY, an island in the N part of the Molucca archipelago, in N lat. 2°, E long. 128° 30′, separated from the NE part of the island of Gilolo, by a channel about 25 m. wide, called the strait of Morty. It is estimated to be 65 m. long, and from 10 to 25 m. in breadth. The sultan of Ternate formerly claimed the sovereignty of this island.

MORTZO, a lake of Independent Tartary, in the Kirghiz territory, within 30 m. of the l. bank of the Ural.

MORUES BAY, a bay on the S shore of the river St. Lawrence, southward of Gaspè bay, and W of Bonaventura and Miscan islands, in N lat. 48° 35′.

MORUGA, a small river to the NW of the gulf of Essequibo, on the coast of Surinam.

MORUL, a village of Ladakh, in N lat. 34° 43′,

E long. 76° 9′, on the r. bank of the Indus, opposite the confluence of the Dras.

MORUMBATEMAN, a creek of New South Wales, in the co. of Murray, an affluent of the Yass.

MORUMBIDGEE. See MURRUMBIDGEE.

MORUMGEN. See MOHRUNGEN.

MORUNDAVA, a port on the W coast of Madagascar, in S lat. 20° 16′, where some trade is carried on, and refreshments may be procured.

MORUNG, a district of Northern Hindostan, tributary to the rajah of Nepal, extending from the river Cosi to the Tista. The surface is very mountainous, some parts of it being 7,000 ft. higher than Bengal; but it is extremely unhealthy, and has been little explored.

MORUNGEN. See MOHRUNGEN.

MORUYA, a river of New South Wales, flowing into the sea 20 m. N of Bateman's bay.

MORVAH, a parish of Cornwall, 6 m. WNW of Penzance. Area 2,060 acres. Pop. in 1841, 407.

MORVAL, a parish of Cornwall, 3 m. N of East Looe. Area 3,750 acres. Pop. 733.

MORVAN (MONTAIGNES DES), a chain of mountains in France, which separate the basin of the Seine from that of the Loire, traversing the dep. of the Nievre, and the SW portion of that of Yonne. They are of small elevation, and covered with wood.

MORVEN, a township of Marion co., in Ohio, U. S. Pop. 980.—Also a village of Ansan co., N. Carolina.—Also a village of Shelby co., Iowa.

MORVEN, or MORVERN, a mountainous parish on the coast of the mainland of Argyleshire, forming a large peninsula extending SW between Lochs Suinart and Linnhe, to the Sound of Mull, and connected with the district of Ardgour by a peninsula of 6 m. Its greatest length from E to W is 20 m.; its greatest breadth, 15 m.; and its superficial extent, 65,000 acres. A chain of lakes, partly marine and partly fresh-water, commencing with Loch-Teagus on the N, and terminating with Loch-Aline in the SW, nearly isolates most of the district lying along the Sound of Mull. All the waste parts abound with deer and other game. Such arable ground as exists lies at the bottom of the hills, and principally along the Sound of Mull. Morven, as to its geognosy, consists principally of gneiss, which has been originally covered by a deposit of secondary rocks consisting of limestone and sandstone, with coal occasionally interspersed; a deposit so overwhelmed by trap, which in its turn has been much abraded and worn away, as to present to an observer a confused and obscure object of geognostic study. The situation of the coal is, on certain occasions, very remarkable; and occurring as it does on the summits of primary mountains exceeding 2,000 ft. in elevation, it is quite fitted to startle a geologist nearly as much as a coal-surveyor. Pop. in 1801, 2,083; in 1831, 2,137; in 1841, 1,774.

MORVEN, a very high hill in the S district of the p. of Latheron, Caithness-shire, not far from the boundary with Sutherlandshire. One account says, it is "elevated about a mile above the level of the sea;" another says it is "supposed to be more than a mile above the level of the sea;" but both, we suspect, over-estimate its alt.—Also a summit of the Grampians in the p. of Logie-Coldstone, Aberdeenshire. Alt. above sea-level 2,880 ft.

MORVIEDRO. See MURVIEDRO.

MORVILE, a parish of Salop, 3 m. W of Bridgenorth. Area 5,650 acres. Pop. in 1841, 542.

MORVILLARS, a village of France, in the dep. of Haut-Rhin, cant. and 4 m. NW of Delle. Pop. 350.

MORVILLIERS, a town of France, in the dep. of Vosges, cant. and 6 m. SW of Neufchateau. Pop. 1,460.

MORWARA, a town of Hindostan, in the prov. of Gujerat, 30 m. SSW of Theraud.

MORZINE, a town of the Sardinian states, in the prov. of Chablais, 15 m. SE of Thonon. Pop. 1,600.

MORZ-ZUSCHLAG, or MURZ-ZUSCHLAG, a small town of Styria, 20 m. ENE of Bruck. Pop. 800. A valley called the Murz-thal, extending from this place along the Murr to Bruck, contains the best pasturage in Styria.

MOS, a town of Spain, in the prov. and 12 m. SE of Vigo, on the l. bank of the Louro.

MOSALSK, a town of European Russia, in the gov. of Kaluga, on the Mosolka, 55 m. W of Kaluga. Pop. 1,200.

MOSAMBIQUE. See MOZAMBIQUE.

MOSBACH, a town of Bavaria, 5 m. N of Schweinfurt. Pop. 900.—Also a small town of Nassau, pleasantly situated near Wisbaden. — Also a town of Baden, in the principality of Leiningen, situated on the river Elzbach, 16 m. N by W of Heilsbronn. Pop. 2,200. It is surrounded with walls, and has a salt-work and several oil and saw mills.

MOSBACK, a village of Bavaria, near Sonthofen. Pop. 800.

MOSBURG, or MOSPURG, a town of Bavaria, on the river Iser, 24 m. NE of Munich. Pop. 1,400.

MOSCHE (PUNTA DELLE), a headland in the Adriatic, in N lat. 45° 29′, on the W coast of the Illyrian circle of Istria.

MOSCHELHORN, a summit of the Lepontine Alps, on the frontiers of the Grisons and the Valais, at the head of the valleys of St. Peter and the Rheinwald. Alt. 9,600 ft. above sea-level.

MOSCHENIZZA, a town of Austrian Illyria, in the maritime district of Istria, on the gulf of Quarnero. Pop. 2,000. Wine, olive-oil, and honey are produced by the neighbouring district.

MOSCHO. See MOCHI.

MOSCIANO, a town of Naples, in Abruzzo-Ultra 1ma, 9 m. ENE of Teramo. Pop. 2,500.

MOSCISKA, a small town of Austrian Poland, in Galicia, 17 m. E of Przemysl.

MOSCOLURI, a town of Livadia, 30 m. ESE of Trikala.

MOSCOW, a central government of European Russia, lying between 34° 50′ and 38° 50′ E long., and 54° 50′ and 56° 40′ N lat.; and bounded by the gov. of Tver on the N; Vladimir on the E; by Riazan, Tula, and Kaluga on the S; and Kaluga and Smolensk on the W. It has a superficial area of 11,688 sq. m., with a pop. in 1842 of 1,398,977. It presents an undulated surface, diversified only in a few points by small ridges or hills. The soil is for the most part clay and sand. Heaths and marshes intersect various parts of the country, the fertility of which is on the whole very indifferent. The soil reposes on granite, of which large blocks, as in the north of Germany, here appear scattered over the surface of the ground. Storch enumerates 2,610 streams, and 109 lakes in this gov., but none of them are of any considerable extent. The Volga, the Oka, and the Moskva—from which latter the gov. and the capital take their name—are the only important rivers. The climate is temperate and healthy, and nowise distinguished from the other provs. of Russia which lie within the temperate zone. The winter, including the broken days of spring and autumn, lasts about five months. Agriculture is the principal branch of industry; yet, as this prov., though the best cultivated, is inferior in soil, and the capital consumes a vast quantity of provisions, the harvest is insufficient for the bare consumption. Fruit is rare; flax, hemp, and hops are only cultivated for domestic consumption. There are manufactories of

cloth, silk, hats, cotton, linen, leather, copper, glass, china, and vitriol: almost every family of peasants, in the circle of M., conducts some branch of manufacture. On account of its natural situation, this prov. can only engage in land-commerce; but this is very considerable, Moscow being to the interior commerce what Petersburg is to the exterior. The roads are excellent, and the rivers Oka and Moskva offer important channels of communication. The great road from M. to St. Petersburg is continued, for a space of 500 m., almost in a straight line cut through a forest. It is of uniform breadth, and formed of trunks of trees laid in rows parallel to each other, and bound down in the centre and at each end by long poles or beams fastened into the ground; these trunks are sometimes covered with boards, and sometimes with layers of boughs strewed over with sand or earth. Where the road is new, it is remarkably good; but as the trunks decay, or sink below the level of the adjoining parts, it becomes very uncomfortable for travellers. The scenery along this route is far from pleasing; but the great high-road itself is ever crowded with caravans loaded with merchandise, droves of oxen from the plains of the Ukraine, and bands of travellers. The adjacent country, however, presents throughout the same melancholy aspect of interminable swamp, studded with plantations of abortive birch-trees and thinly-scattered firs. The eye seeks in vain for refreshing varieties of cultivation, or well-grown timber trees with thick foliage, and encounters nothing save an impoverished soil and patches of stunted forest. The horizon seldom bounds the view of the plain, as the obstacle of a bush or fence on the dreary level conceals miles of its extent, without a rise or undulation to mark the distance beyond; in fact, there is no scenery to fix the memory, no bits of landscape to gladden the eye. Even the Valdai hills, among which the Volga takes its source, are of inconsiderable elevation, and present no new feature in the scene. The signs of pop. are scanty, and the appearance of villages unfrequent. The houses are entirely formed of the rough stems of trees, with the interstices stuffed with moss and lime; but, uncouth as they are, they are not unsightly, nor without some pretensions to a kind of rustic elegance. The general aspect of the villages is monotonous; they consist invariably of two rows of houses removed to some little distance from the road, already too wide; and as the distance from St. Petersburg increases, they look more impoverished and neglected. [*Thompson.*] This state of things, however, improves for the last 50 m. before entering the city of Moscow. There the country is so well-cultivated that it might almost be called beautiful: meadows and corn-fields stretch back as far as the eye can reach, with villages, churches, and fine mansions on the soft heights. [*Bremner.*] The railroad from M. to Petersburg, finished in Nov. 1851, intersects this gov. It is 397 m. in length; and has been pushed onward to Kolomna, at the junction of the Moskva and Oka, 65 m. SE of Moscow.—The archb. of this gov. is chief of the Russian Greek church. Next to Moscow, the principal towns are Kolomna and Dmitrov.

Moscow, — written Moskva, and pronounced Maskva by the natives,—the capital of the above gov., and formerly the capital of the empire, 487 m. SE of Petersburg, in N lat. 55° 45′ 13″, E long. 37° 37′ 54″, is situated at an alt. of 781 ft. above sea-level, upon a number of gentle elevations, valleys, and plains,—the hills branching from an elevated region on the E and SE, and the lower grounds skirting the Neglina and the Yausa, streams which here join the Moskva. It covers an immense extent of ground; and measures more than 25 English m. in circuit. In its greatest diam. it has an extent of 8 m.; in its least, 5 m. Its appearance is not less varied than the character of its inhabitants; and as the rivers flow between the chief elevations of the city, they give a beautiful relief to its extended range, which spreads with a certain degree of openness and irregularity over a finely undulating hollow, embosomed amid a circle of broken heights fringed with wood or green with cultivation. "Moscow," says Dr. Lyall, "is an ancient, Petersburg a modern city; the chief beauty of the latter consists in regularity,—the beauty of the former in irregularity. In Petersburg, the triumph of art over nature is everywhere visible; in M. these appear still engaged as it were in the attempt to excel each other, forming the finest combinations, or the greatest discordances." "The streets of St. Petersburg," observes Kohl, "are so broad, the open places so vast, the arms of the river so mighty, that, large as the houses are in themselves, they are made to appear small by the gigantic plan of the whole; and this effect is increased by the extreme flatness of the site on which the city stands; no building is raised above the other; whereas in M. the streets are seldom sufficiently long to form a perspective, for the greater number of them wind like the paths of an English park or like rivers meandering through fields. St. Petersburg, again, rests upon a flat surface; M. is built upon hills; and presents, instead of the rigid regularity of the modern capital, a labyrinth of courts, shrubberies, and gardens,—a mass of streets which nowhere take a direct business-like course, and give to it more the character of a suburb than of a city." The houses are in general low; in very rare cases containing more than two stories. In the part of the town called the Zemlenoi-gorod, and in the faubourgs, they are usually built of wood; but everywhere else brick is the material, interspersed with deals; for the foundations, however, stone is used. The houses do not stand in straight rows, nor are they all of similar height and dimensions; one house will be large and magnificent, another small and paltry; one is painted white, another green, a third yellow; one stands boldly forward seeking notice, another retreats within its little garden, or stately courtyard in which coaches-and-four are constantly circling. The low wooden houses which formerly encircled all the gardens, and appeared scattered among the stone buildings, are now confined chiefly to the suburbs; but the roofs of many of the houses are painted green, and from a distance completely blend with the groups of tall trees in their vicinity. The gardens of the palaces and churches, the public squares and open places, occupy a very considerable portion of the spacious area within the supposed limits of the city. A city in the sense of an assemblage of human dwellings pressed closely together, till they seem as if hewn out of one rock, M. is not, excepting perhaps the square verst contained in the Kremlin and Kitai-gorod. Mr. Maxwell thus describes the view of the city from the Prigorok-Notorago, or Sparrow-hills, very trifling elevations 4 m. from the Kremlin, but quite conspicuous in the vicinity of the city. "The day was radiant, and the city of the Muscovites lay spread out beneath us like a gilded toy. A thousand burnished domes and cupolas in blue and gold, glittering with silver stars and clusters of graceful minarets and spires, white terraces and towers, roofs and walls of every colour, all confused and shapeless, yet all gay and curious, sparkled in the light of the declining sun. The white buildings of the Kremlin, the gaudy eminences of St. Basil, the red and white enclosures of the Donskoi convent, the antique battlements of the Devitchei, were below us; beyond, as far as the eye could reach, infinite in variety and almost endless in succession, arose other fantastic forms

arrayed in the same brilliant colours,—the whole exciting more wonder than admiration, more surprise than pleasure. Far away toward the S and W extended a fertile plain, and meandering through the meadows flowed the shining Moskwa, 'a line of silver in a fringe of green.' The gardens and orchards, the grain and cattle, and the bountiful appearance of the environs, were pleasant to the sight. Both city and country, seen at noonday from the Sparrow-hills, conveys the most lively impression it is possible to conceive of Moscow."

Quarters.] The Kremlin-hill, the nucleus around which the city is built, is to M. what the Acropolis was to Athens, or the Capitol to Rome. The walls which encircle it are approached from the W and the NW through the new and well-built streets of the Kitai-gorod; on the E and SE, the hill extends to the cliff at the foot of which the Moskva and Neglina unite their waters. It contains the imperial palace, a portion of which consists of what remains of the ancient palace of the czars. This hill has also a highly sacred character, no fewer than 32 churches, including several cathedrals, resting upon it. The cathedral of St. Michael encloses the tombs of the Russian sovereigns, from the time that M. became the capital (in 1147) till the demise of Peter the Great. In this quarter also is the imperial museum, the arsenal, the palace of the patriarch, a nunnery, and a monastery. The term *Kremlin* is derived from the Slavonic word *krim*, which signifies 'a fort.' "Taken as a whole," says Dr. Lyall, "the Kremle is one of the most original, beautiful, and magnificent objects I have ever beheld. Its commanding situation on the banks of the Moskva river,—its high and venerable white walls, with numerous battlements, and variously coloured towers and steeples,—the number and the magnitude of some of its fine edifices, with their differently painted roofs,—the variety of its cathedrals, churches, monasteries, and belfries, with their almost innumerable domes, gilt, tin-plated, or green: indeed, the whole picture presents at the same time a varied unity, a consonance and incongruity of objects,—a contrast of ancient and modern works of art and taste,—a beauty, grandeur, and magnificence indescribable and altogether unique." Its walls are from 12 to 16 ft. thick. Externally their height varies at different places from 30 to 60 ft.; and they are furnished with battlements and embrasures, numerous towers and steeples, and a number of gates. There are no regular streets within the walls; all the edifices have stone foundations, or foundations faced with white calcareous tufa, while the superstructures are formed of brick, stuccoed and painted white, orange, yellow, blue, green, &c. The interior presents a crowd of government-offices, churches, and monasteries.—The second quarter, or Kitai-gorod, is the centre of trade; and appears to have received its name in early times as being the centre of the Chinese trade. At present it contains two *gostinie-doori*, or bazaars, to be afterwards noticed.—The Bieloi-gorod, or third division, is the seat of learning and education, and is also the residence of the governor and the troops. Its most remarkable building is an enormous covered military parade, or exercise-house, within which the evolutions of 2,000 foot and 1,000 horse soldiers can be conveniently performed.—Zemlianoi-gorod, [*i. e.* 'earthen-town,' so called from an earthen rampart which once surrounded the city,] is a miscellaneous assemblage of spirit stores, schools, public offices, handsome public promenades, and houses of all grades.—The fifth division is the Slobodi or suburbs, which form an immense irregular polygon, completely surrounding the Zemlianoi-gorod, and are in fact an aggregate of some 40 suburban villages.

Principal edifices.] In 1835, M. numbered between 9,000 and 10,000 houses, 60 principal streets, 25 squares, places, and markets, upwards of 500 cross streets, 7 cathedrals, 21 monasteries, 245 Greek, 2 Roman Catholic, 3 Protestant, 2 English, 3 Armenian chapels, and a Turkish mosque. The churches, most of which have survived without injury the great fire of 1812, give to M. a most picturesque appearance. Each has a small cupola rising from the roof, shaped like a bulb or onion, painted exteriorly of the gaudiest colours the palette can afford, and often silvered or gilt. From their "interior a gigantic picture looks down, whose enormous ugliness is much better calculated to scare than to assist devotion: it is generally the figure of the Redeemer, the Virgin, or of John. In the centre cupola is the pictured form of an old grey-headed man, meant to represent the Father. The walls are usually painted from top to bottom with grotesque-looking saints and angels; and the centre cupola is generally supported by 4 pillars, so immoderately thick that they diminish the space of the church very considerably.—In the cathedral of St. Michael, in the Kremlin, the sovereigns of Russia were formerly interred. Their bodies are deposited in raised sepulchres, mostly of brick, in the shape of a coffin, above the pavement. Upon great festivals these tombs are covered with rich palls of gold or silver brocade, studded with pearls and jewels.—The cathedral of the Assumption of the Virgin Mary, also in the Kremlin, has been long appropriated to the coronation of the Russian sovereigns. The Treasury in the Kremlin contains some splendid halls in which are preserved the state jewels. "The intrinsic value of these relics," says Bremner, "glistening as they are with gems of great size, is immense. The history of many of them is so obscure, that men of learning have lately been expressly commissioned to make careful researches concerning them, and the other treasures with which the halls of the Kremlin once groaned. The crowns alone would furnish materials for a volume. They are twelve or fifteen in number, each of a splendour and value far outshining those of the crowns made now-a-days. Some of them are supposed to have been gifts from the Greek Emperor Comnenus to the great Vladimir; but this is one of the points which the learned are now trying to clear up. Several are entirely covered with the costliest diamonds, some with large turquoises, and often on the top is a ruby of great size. The shapes are all different—some low and simple, some high and conical, with stout ribs of gold. The work is generally most exquisite. Never, perhaps, throughout the whole of his sojourn in Russia is the foreigner more forcibly struck with her immense power than while walking about among these crowns. Almost every one of them formerly belonged to an independent king; now they might be melted down into the one massive diadem of him whose empire has swallowed up the fair kingdoms whose majesty they separately adorned. Here stands the crown of fallen Poland, side by side with that worn by Nicholas when crowned at Warsaw. Next come the ancient crowns of the kingdoms of Kasan, Astracan, Georgia, Siberia, &c. Then follow imperial sceptres massive with gold and gems. In short, apart even from all consideration of the power which it represents, this rich collection really amazes the visitor by its intrinsic value. There is no great anxiety displayed about locking up these treasures. They are placed in a room of beautiful proportions and well lighted, most of them under bells of crystal, elegantly shaped, ranged by the wall on one side, and the principal ones placed on handsome pedestals on the floor. Rich, however, as this collection is, the jewels now remaining in Moscow are of trifling

value compared with those described by ancient travellers: in fact, this city has so often suffered by fire, that not only its treasures but its very records have disappeared; all the ancient documents have been burnt; so that now, very strangely, the Russians themselves are forced to go to the books of Olearius, or of English travellers, in order to get information about these very jewels and their ancient Kremlin."—Boris Godonof, who ascended the throne by usurpation and multiplied murders, could conceive no better way of atoning for his crimes than by bestowing on a church a bell of unprecedented size. He accordingly gave one to the cathedral of St. Nicholas weighing 312,480 pounds; and 'died in peace.' The Empress Anne recast this bell, and added to it 2,000 poods of metal. It is the largest in the world, that of Pekin being lost in the comparison. Its circumference is 63 ft. 11 inches; its height 19 ft.; its greatest thickness 23 inches; and its weight 443,772 pounds. It is doubtful whether the bell was ever actually suspended: at all events none of the Russian sovereigns have been so pious as to recast it, and replace it in its tower. Erman says: "that a peculiar expertness in the casting of metal had been handed down by uninterrupted tradition, from the earliest ages in this part of the world, is proved by the bells suspended in the still remaining portion of the tower of Ivan Welíkoi, which were all made about the same time, when the church was erected in 1600. The largest of them weighs about 400 poods, or 133,684 French pounds, or more than five times the famous bell at Erfurth, and nearly four times that of Rouen. Perhaps the early proficiency of the Chinese in works of this kind,—for already, in 1403, in the reign of the Emperor Yum lo, they cast a bell weighing 120,000 pounds—may help to account for the skill of the Scythians and their Russian descendants. The Siberian nations learned most of their arts from the Chinese, and the Russians have been but slowly estranged from Southern Asia by their intercourse with Western Europe."—The new city has wider streets, and greater uniformity in its private buildings, than that which existed before the French invasion, and its destruction by fire; but in its churches and public edifices the Asiatic taste is still preserved. Before the fire even private houses were overloaded with ornaments of architecture, such as bas reliefs, statues, vases, and columns; many of the churches were surmounted, not only by a high and pointed spire, but by five or six turrets with gilded crosses; but those lately erected are distinguished by a more simple and regular architecture, occupying, however, the same sites, and many painted in the same colours as before. The streets are paved partly with stone, partly, as in other Russian towns, with trunks of trees.

University, &c.] The University having been rebuilt in a magnificent form by aid from the public treasury, was opened on 11th November, 1818, and the former course of study resumed. The present edifice is of great extent and beauty, in the Italian style, containing the new library, museums, lecture-rooms, &c., all of the most complete description. The museum has again become one of the richest in Europe —not as a whole, but in some of the departments of natural history. The collection of zoophytes is very complete, and that of minerals even more so; but the most singular portion of it is the collection of Siberian fossils, among which, as is well known to the learned, there are things not paralleled in any other museum. The library is recovering rapidly. It already contains about 30,000 volumes; but being formed from general contributions, the collection is not very select. The catalogue is on a principle seldom employed in England. In place of keeping a folio for entering each work as it arrives, the title is written on a loose slip of paper, which is placed, under its proper letter, in a line of open boxes, five inches square, along the side of a desk containing a box for each letter of the Russian alphabet. This, though a very mechanical system, is found very convenient for the librarians. In addition to this flying catalogue, there is an admirable *Catalogue Raisonnée* now in the course of being printed. The University of M., though the oldest in Russia, was founded only in the year 1755. Among its professors may be reckoned many names of great eminence. Fischer, the naturalist, and others still living, enjoy a high reputation. The number of students in 1808 was only 135, but is now generally about 700; of whom one-third belong to the faculty of medicine, about the same number to the ethico-political faculty, and the remainder to the two other faculties, mathematics and literature.—Of the new buildings, one of the most remarkable is the Exercier-haus, a vast hall erected near the Kremlin, and more than twice the size of Westminster-hall. It is intended for the parade of troops, when the weather does not admit of their exercising out of doors; and has a length of 560 ft., with a width of 168 ft. The walls are partly of stone, but more of brick; and the roof, 506 ft. 10 in. long, and 133 ft. broad, is not supported by pillars. —Among other public buildings, M. contains a general post-office for the interior of Russia; also several military hospitals. No public institution in M. is more remarkable than the foundling-hospital, erected by Catherine II. in 1764, and amply supported by legacies and voluntary contributions. The building is of a square form, and stands on the banks of the Moskva, where it has the advantage of good air. It is fitted for the reception of 8,000 children. The children who have been received into this hospital, as they advance in years, are distributed into three classes. For the two first years they are under the care of the nurses. They are then admitted into the lowest or first class. The boys and girls are educated indiscriminately, till they are seven years of age; and both sexes are taught not only reading, writing, and arithmetic, but the knitting of stockings, and the carding of flax, hemp, and wool. To these the girls add needle-work, spinning, cooking, baking, and such arts as are necessary to housewifery. Those who evince more than ordinary capacity, are instructed in the French and German languages; and some of the boys are taught music, dancing, drawing, and Latin. Fourteen is the age at which they are admitted into the last class. They have at this period the liberty of choosing the profession in which they are to be instructed. And for this purpose it is not necessary that they should quit the hospital, as several manufactures are established within it for the sole purpose of training the youth to particular professions. At the age of twenty they receive a sum of money, and are at liberty to settle in any part of the empire which they think proper. The number of children supported by this establishment is about 30,000; and its annual outlay nearly £800,000.

Manufacture and commerce.] The commercial importance of M. is very considerable: as, from its central situation, it is the entrepot for most of the internal trade of the empire. The bazaar, or principal market of M., is a colossal building of three stories; three rows of pillars and three rows of shops stand, one above another, connected together by countless passages and steps. "In these courts and galleries, from year's end to year's end, is the greatest standing warehouse of the empire, and a continual fair. Hither, from the Black sea, streams all that

the Levant can produce; from the Baltic, the produce of Western Europe; from Siberia, what China and Tartary yield. Along the galleries long-bearded Russians and black-robed Persians, with their pointed sheep-skin caps, roam about; silken-clad Bokharians rustle by, and Tartars and Greeks sit on the balustrades reckoning their gains. The *gostinnoi dvor* has magazines and shops for the most considerable merchants of M., who are more than 900 in number." The retail trade is carried on in the Ryädi, which signifies, literally, rows of shops. The number of shops in the Ryädi is not less than 1,200, all united under one common roof. The whole range of shops is plentifully adorned with pictures of saints nailed to the beams, with lamps burning before them, singing birds in cages, and flights of pigeons, which nestle under the eaves of the shops, and are cherished and fed by the owners as a kind of sacred bird. The merchandise is arranged here, as elsewhere, in masses; here a range of 30 shops for paper, another range for spices, a third for ornamental articles, a fourth for pictures of saints. M. boasts of 30 booksellers' shops, some of which have a stock of not less than 100,000 volumes. In 1806, there were only three booksellers of any consequence in the city; in 1808, four; and in 1810, six. After 1812, however, the number of the venders of literature increased rapidly. Woollens and cottons are largely manufactured in the city and the surrounding country. The totals were estimated a few years back at nearly 32,000,000 yds., value £1,200,000. In 1851 the district of M. possessed 107 woollen factories employing 20,900 hands. A large quantity of cotton-yarn is spun. Several large machine-factories have been established of late years within the city.

Railroads.] M., as already noticed, is connected by railway with St. Petersburg.—Another projected line of communication, the importance of which cannot be contested, is one from M. to Odessa, the most important commercial city of the S. The distance between the two cities is about double that from M. to St. Petersburg; but the country being generally very level, it is calculated that the cost of the railway would not exceed 37,000,000 d. At present the whole distance from Odessa to two stages from M. is a mere tract marked by verst-posts about 10 ft. high on each side, and goods are generally from 30 to 35 days on the entire road. The expense of carriage is from 1 ruble 50 copecks, to 3 rubles per 40 lbs., according to the time of the year.—A third railway is that from M. to Kolomna, on the river Oka, a distance of 66⅔ m. From the terminus of this railway, steam-boats conduct the passengers to Nishni-Novgorod, on the confluence of the Oka and Volga, where annually the celebrated great fair is held for the merchants of Europe and Asia.

Population.] The pop. of M. was estimated by Dr. Lyall, in 1817, at 312,000. It was returned in 1831 at 305,631, of whom 4,946 belonged to the clergy, 22,394 to the nobility and higher classes of public officers, 2,691 as foreigners, and 16,210 were described as merchants. In 1842, the district of M. had 455,644 inhabitants. The M. dialect is said to be superior to all the other dialects of the Russian language.—The great distinctive feature of M. is its religious character. It is the residence of two archbishops, and contains the most important ecclesiastical establishments in the empire. Thus, the Russo-Greek Christian regards M. with the same veneration that Mecca is looked on by a Mahommedan. By a kind of political fiction, it is still considered the capital; and it is here that the splendid coronation-ceremony of the Russian emperors takes place.—A native writer says that when Petersburg took the place of M. as the centre of administration to the empire, it left her another distinction,—in losing her political position, she maintained her moral. This distinction, allowed her, he says, by latest history, "is acknowledged not only by Russians, but by foreigners, at the head of whom may be placed the great conqueror of modern times. Wishing to humble Russia, he sought, in accordance with his usual tactics, to pierce her through the heart; and only to Napoleon's sense of the national pre-eminence of M. do we owe the undesired honour of his memorable visit. The same relations existed between M. and Petersburg as had formerly existed between the former city and Kieff; and M. became the centre of Russia's mental and spiritual activity. The foundation of the Slavonic Greek and Latin academy, and subsequently of the university, made M. to a certain degree what the Pecherchaia monastery and the academy there had formerly made Kieff. M. at this time educated the greater part of our first-rate writers and statesmen; she dispersed to all the ends of the Russian empire, beginning at Petersburg, the flower of Russian youth, the best pledges of Russia's future weal. In course of time many amongst us grew accustomed to look upon Petersburg as the representative of European life, and upon M. as the cradle of national life. The perpetual existence in Russia of two centres, one administrative and outwardly civilizing, the other intellectual and spiritual, belongs to us only of all European states. It is universally allowed that the relations of Rome to Catholic countries are quite unlike the relations existing between Kieff and the Russian cities; that, on the other hand, the distinctive marks of, for instance, Oxford and Cambridge in England, or Upsal in Sweden, are very different from what characterized Kieff during the Muscovite monarchy, or M. at the present day. The position of Kieff formerly, and M. now, relative to the administrative centre of Russia, reminds us rather of the relation between the right and left halves of Paris,—that is, between the Sorbonne and the university, and the other parts of the city. But there only a river divides the spiritual and temporal hemispheres of France, whilst in our case they are not only separated by a vast space, but by all the peculiarities of local development, all the polarity in the process of Russian society. Novgorod and Kieff,—Kieff and Moscow,—Moscow and Petersburg,—these are the two poles on whose unceasing action the history of Russia revolves; one city is the complement of the other, and the indispensably mutual need of each other is most remarkably manifest in times of crisis and general misfortune. Kieff, whilst she kept secure within her walls the national faith and orthodoxy, was not able to save the nation from intestine war or from the Tartar invasion; M. did save her. In 1612 the imperial capital of the Muscovite dominions was saved, not by Kieff, but by the second Russian monastery, the living inheritor of the first. The pulse of Russia ceasing to beat for a time in M., throbbed within the walls of Troitzka-Sergeivskaia monastery. In 1812 a new calamity overtook M. Had she been alone,—had there been no other capital where the machinery of government could continue to work without interruption,—who can tell what miseries Russia might have had to pass through! The Sergeivskaia monastery had now no longer power to save her. Russia was saved,—not solely by the noble self-devotion of M., and the national spirit, and the Russian army,—but by Petersburg, which preserved inviolable the administration of government. Whoever is acquainted with Amsterdam and Berlin, must acknowledge that Petersburg is a combination—on a larger scale—of those two cities,—one-half reminds us of the capital of Prussia, the other of the capital of Holland: M. recalls no other place; it is like nothing but itself. This proceeds from the fact that

Petersburg is a city that was made—M. one that has made itself. To be convinced of the latter fact, without the necessity of comparison with history, we will only glance at a plan of the city. M. herself is of a moderate size; her cradle is her centre; around this centre, the Kremlin, history has drawn four circles more or less accurate; the *Kitai-gorod* [China town] or city by privilege; beyond this, at some distance from its walls, comes the *Bieloi-gorod* [White town], which is succeeded at a considerable distance by the *Semlanoi*, a wide ribbon of boulevard; the *Semlanoi-gorod* is surrounded by the so-called ramparts, and by the *Sadovia* [Gardens], which are again succeeded by suburbs locked in on every side by mounted ramparts. In such a way does the genius of history seem to have thrown the Kremlin like a stone into the wide ocean of Russian life, and produced circles ever widening. This is not all; if we raise our glance from the plan of M. to the map of European Russia, we shall see that the circles round the Kremlin do not stop with the outline of the city; new circles are described around it, or rather wreaths of cities, at 30, 60, 90, 180, and 360 versts distance. Further, the central power of M. is not limited to this. If we remember that the city lies in the middle of an elevated flat, so to speak, at no great distance from which flows the Volga, Okka, and Dnieper, with other rivers of less consequence; that in its navigable, and consequently mercantile relations, spite of the insignificance of its own river, M. forms one of the most favourable and natural knots of junction, where are seen converging and diverging roads to every corner of Russia; we cannot sufficiently admire the happy choice of such a capital, and the true national feeling that prompted that choice. Volumes might be written on the central importance of M., with regard to its historical, physical, industrial, and philological relations. Contrasted with the central position of M., Petersburg, standing on the verge of the empire, offers to view an extensive point that may be called the key, rather than the centre of Russia. Its remote situation imparts to it something of a colonial character. The augmentation of its pop. does not proceed from within, but from accumulation of new arrivals. According to the most recent statistics, the number of deaths in Petersburg exceeds that of births, yet the total pop., instead of decreasing, is largely increased every year. The centripetal force of Petersburg lies in its service. One in every five passengers in the favourite street of Petersburg is sure to be in a uniform, whilst in M. scarcely one uniform is to be met with in fifty passengers. Matuschka [Moscow] is the mother of modern, as she was the bride of ancient Russia. A century and a half has elapsed since she formed an union with Petersburg, and the ribbon of iron in course of construction will soon bind them together in closer and firmer bonds. Yet it will be no more than a connection between the greatest Russian village and the first Russian burgh. The words of the poet which style M. widow,—

> 'And before the new built city
> Ancient Moscow bends her head;
> And before the young tzarina,
> The widow of the imperial dead,'

will have then less meaning than ever. The railway from Petersburg, together with other lines talked of from Kolomna, Saratov, and perhaps in time from Odessa, will rather carry living sap to M. than carry any away. The railway, instead of converting M. into a mere Petersburg suburb, will make it a centre of fresh vitality. Even for those remote extremities of the empire which formerly did not acknowledge her sovereignty, and even now incline but feebly towards her, M. will acquire a more important significance. Being constituted, through her railways, the entrepot for the produce of the middle and southern tracts, she will literally feed the far-north and the semi-foreign west of Russia. The railway will make her acquainted with the inhabitants of Archangel, of White and of Little Russia. Every cold and unfriendly feeling that they may have nourished towards her will vanish under the influences of increased intercourse, and a better acquaintance with her great moral and political features. Yet for all this M. will continue as much as ever a village, as Petersburg will a town. In these two words, in fact, is comprised the radical distinction between the Slavonic and the German elements. There is not the slightest doubt that the cities of Western Europe are tending to acquire, in course of time, a ruralized character. The multiplication of gardens, and of wide and shady walks, in place of the level fortifications of former times; an effort in many places to erect detached dwelling-houses, tenements for single families,—all exhibits a growing desire to draw town and country life together, to cease to live in masses in order to live in families. Within the walls of M. there are not more than 350,000 or 360,000 inhabitants; whilst her circumf. is second only, and that by very little, to London, whose population numbers 1,600,000. At M., as in Russia herself, every thing is wide and spacious; her fields are fields indeed, and such a place as the historic Devitchie Pole is not likely to be built over, though it may one day be paved. The Sadovia boulevard, and some of our principal streets, occupy as much space in breadth as many of the capitals of German principalities."

Temperature.] Though M. does not lie further to the N than Edinburgh, the cold in winter is nearly three times more intense than that felt in the Scottish capital. This seeming anomaly is thus accounted for:—"In islands, and on the sea-coasts of Europe, the mean temperature of the year is higher, and the heat is more equally distributed through the different seasons, than in any of the other great divisions of the world in the corresponding latitudes. As we advance from the W eastward, the mean annual temp. diminishes; but the heat of summer and the cold of winter increase. Thus London has the same mean annual temp. as Vienna; but it has the summer of St. Petersburg, and the winter is warmer than at Milan. The Mediterranean, the Baltic, and inland lakes of Europe, produce the same effect as the ocean in an inferior degree. The following table, taken from Humboldt's *Memoir on the Distribution of Heat* shows the temp. of the year, and the various seasons, in places having the same latitude:

MEAN TEMPERATURE.

Places in lat. 56.	Of the year.	Warmest month.	Coldest month.
Edinburgh,	47·3	59·4	38·3
Copenhagen,	45·6	65·	27·2
Moscow,	40·2	70·6	6·

Copenhagen is about 620 m. E of Edinburgh; Moscow about 1,000 m. farther." [*Ency. Brit.*]—The following table exhibits the comparative temp. of Petersburg and M. in the years 1836 and 1837, in degrees of Reaumur:

	1836.		1837.	
	Petersburg.	Moscow.	Petersburg.	Moscow.
January,	— 7·47	— 5·03	— 7·37	— 7·79
February,	— 4·35	— 3·27	— 3·11	— 5·73
March,	+ 1·45	+ 4·35	— 3·75	— 0·61
April,	+ 5·46	+ 7·79	+ 2·70	+ 8·15

History.] M. is not of great antiquity, having been founded in the middle of the 12th cent., previous to which Kief or Kiev was the residence of the sovereigns of Russia. It was progressively enlarged in the 13th and 14th cents.; but in 1382 was taken after a short siege by Tamerlane, and though soon evacuated it subsequently fell more than once into the hands of the Tartars. The last attack by these rude invaders took place in 1571. They gave the city to the flames; but were unable to force the Kremlin, to which the czar had retired. M. was afterwards rebuilt with augmented splendour, and remained for a century and a half the sole capital of the empire. Though the building of St. Petersburg dates from the early part of the 18th cent., M. continued the frequent residence of the court until the commencement of the reign of Catherine II. in 1760. The plague has often produced great mortality here, the last time in 1771. In 1831 M. was severely ravaged by cholera morbus. Under Catharine II., M. was extended and embellished. It comprised in 1812 a circuit of about 25 m. When Napoleon advanced, in that year, with the most numerous army which Europe had seen since the great migration of the nations, into the interior of the Russian empire, and her armies had in vain attempted to stay his course at the Moskwa, near Borodino, Kutusoff determined, in spite of the opposition of many members of the council of war, to sacrifice the city in order to save the empire. The stores from the arsenal, together with the public treasures, had been already transported from M. and secured. The greater part of the inhabitants followed, with their moveable property; 17,000 wounded were conveyed in 4,000 waggons, leaving only 2,000 severely wounded and sick in the hospitals of Moscow. The army retired to Kaluga. Count Rostopschin, governor of M., in the meantime prepared to prevent the enemy from maintaining himself in the heart of the empire. He set fire to his country seat near M.; others, equally determined not to see their property in the hands of the enemy, did the same; and many citizens loudly exclaimed that it would be better to burn Moscow than to give it up to the French. But Rostopschin could only effect the departure of all the civil and military authorities, together with the officers of the fire department, and 2,100 firemen, with 96 fire-engines. These, as belonging to the military, were despatched from M. a day before the entry of the enemy. The prisons were not opened, but cleared; and 810 prisoners were conveyed to Nishni-Novogorod, under an escort, two days before the arrival of the French. Half of the inhabitants remaining at M. were a mere mob, many of whom may have profited by the universal disorder to set fire to several houses that they might the better plunder. The conflagration, which in the course of three days consumed three-fourths of all the houses, was, according to universal opinion, not accidental, but a preconcerted plan under Rostopschin. The latter repelled the charge in a tract entitled *La Vérité sur l'Incendie de Moscau* [Paris 1823], and contradicted the reports of the French army, disclaiming the honour of this great act; but he acknowledged that incendiaries had been taken in the act by the French. According to the printed reports of the examinations, 30 persons were arrested by the French, 13 of whom were shot, being convicted of having put fire to different parts of the city by Rostopschin's command. In the first night after the arrival of the French, the large warehouses in the neighbourhood of the Kremlin were in flames; the fire afterwards broke out in several parts of the city. The fifth day after the French had entered, a high wind carried the flames in every direction, so that in the course of three days 7,932 houses were consumed to ashes. The Russians maintained that the conflagration was entirely the work of the French, which added to the exasperation of the people. Even Kutusoff declared to Lauriston that he had only given orders to destroy several magazines. The rest had been done by the French. On the 15th of Sept. Napoleon entered with his guards, and took up his abode in the Kremlin. But volumes of smoke soon rose from 500 different quarters: all Moscow was on fire. It being found impossible to subdue the conflagration, Napoleon left the Kremlin, and retired to Petrowskoi, a league from the city. Horrors upon horrors now succeeded: Moscow was burning till Sept. 21. At last order and tranquillity were restored on the 1st of October. But the destruction of 'the holy city' roused the people to vengeance against the French; and the army, in the midst of plundered treasures, was soon deprived of the very necessaries of life. Of 150,000 soldiers who had entered M., Napoleon in five weeks had lost 40,000: thus retreat became unavoidable. From the 19th to the 22d of October preparations were made for retiring. On the last day it was resolved to destroy the Kremlin, but this only partly succeeded. Of 2,600 stone houses but 525, and of 6,600 wooden buildings only 1,797, were preserved. The entire loss which the fire and the war occasioned to the city and the government of M. was estimated at 321,000,000 of rubles. After the recovery of the country, the Russians were so actively employed in rebuilding M. that in the course of 9 years it had risen from its ruins in greater beauty than before the conflagration.

MOSCOW, a township of Somerset co., in the state of Maine, U. S., 58 m. N of Augusta. Pop. 562.—Also a v. in Leicester township, New York.—Also a v. in Clermont co., in Ohio, 129 m. SW of Columbus.—Also a township in Hillsdale co., in Michigan, 84 m. WSW of Detroit. Pop. 758.—Also a v. in Hickman co., in Kentucky, 309 m. SW by W of Frankfort.—Also a v. of Fayette co., in Tennessee, 194 m. SW of Nashville.—Also a v. of Rush co., Iowa.

MOSE, a river of England, which runs through the counties of Leicester, Derby, and Stafford, and falls into the Trent near Croxall.

MOSE, an island in the eastern seas, in S lat. 6° 20′, E long. 131° 30′, to the N of Timor-Laut.

MOSEIRAH, an island off the SE coast of Arabia, 38½ m. in length, and 15 m. in breadth. Its surface rises to 600 ft. above the sea. Its N end, Ras Jei, is in N lat. 20° 43′ 30″, E long. 58° 57′; its S end, Ras Bir-Resas, in N lat. 20° 8′, E long. 58° 38′. Parts of it are cultivated, and its pop. appears to be considerable.

MOSELLE, a frontier department in the NE of France, including part of Lorraine, lying between the parallels of 48° 54′ and 49° 34′ N lat.; and bounded on the N by Belgium, Prussia, and Bavaria; on the SE by the dep. of Bas-Rhin; on the S by the dep. of the Meurthe; and on the W by that of the Meuse. Its area is 534,385 hect. Its surface is traversed on the E by branches of the great range of the Vosges; on the W by the Eastern Ardennes. The general declination is towards the N. It is watered by the Moselle, the Sarre, the Seille, the Nied, and the Orne. In several places occur extensive tracts of marshy ground. The soil is silicious between the Nied and the Vosges; argillaceous in the mountainous district of Bitche; and calcareous in other parts. The quantity of corn raised is not equal to the consumption of the inhabitants: the lower orders live in a great measure on barley bread and potatoes. The pastures too are in general poor; and the breed of cattle small and stunted, in comparison with those of the level country. In 1839, the live stock consisted of 63,733 horses, 109,200 horned cattle, 183,314 sheep, 108,089 pigs, and 9,934 goats. Fruit, especially prunes, flax, hemp, and rapeseed, are produced in considerable quantities; to the cultivation of the vine leading attention is given. Quills and honey are important articles of production. The mineral productions are iron, lime, salt, and coal.—The manufactures consist of glass, paper, leather, woollen cloths, and linen.—The pop. in 1801 was 348,141; in 1841, 421,258; in 1851, 459,684, of whom two-thirds speak German, and the rest a provincial dialect of German and French. It is administratively divided into 4 arrondissements, viz., Metz, the cap., Brieg, Thionville, and Sarreguemines; which are subdivided into 27 cants., and 628 coms. The total public revenue of the dep. in 1831 was 13,577,481 fr.; in 1848, 16,523,000 fr. The dep. forms the dio. of the bishop of Metz.

MOSELLE, the Mosel of the Germans, and Moezel of the Dutch, a river of Europe which takes its rise in Mount Faucilles, in the French dep. of Vosges, to the E of Bussang, at an alt. of 725 metres = 792 yds. above sea-level; flows NW past Remiremont, Epinal, Metz, and Thionville; and, quitting the French territory at Aspach, forms for a short distance the boundary between the extreme frontier of Prussia and Belgian Luxemburg, traverses the Prussian prov. of the Lower Rhine, and falls into the Rhine, on the l. bank, at Coblenz, after passing Remich and Grevenmacher in Belgium, and Treves and Traben in Prussia. It becomes navigable at Pont-a-Mousson, above Metz, and in its course of nearly 270 m., receives in France the waters of the Valogne, the Meurthe, and the Seille, on the r., and the Madon, the Math, and the Orne, on the l.; and in Prussia, the Sure, the Kill, and the

Elz, on the l., and the Sarre on the r., and a number of smaller rivers, which render it a large stream in the lower part of its course. Its average breadth is about 170 yds.; mean depth 6 ft.; ordinary current 1½ m. per hour. Wood, charcoal, wine, iron, salt, potash, slates, and coal, are largely transported upon it. Its situation between France and Germany has often rendered its banks the scene of hostile operations.

MOSELWEIS. See Coblenz.

MOSENIA, a village of Khusistan, in Persia, 36 m. SW of Shuster.

MOSERADA, a small town of Austrian Italy, in the prov. and 8 m. NE of Treviso.

MOSES (Point), a head of land on the E side of the entrance into Bonavista bay, on the E coast of Newfoundland island, 5 m. SW of Cape Bonavista.

MOSFEIA, a village of the Mandara territory, in W. Africa, 90 m. S of Mora.

MOSHAK, a village of Yemen, in Arabia, 20 m. NW of Doran.

MOSI, a territory of Nigritia, to the NE of the kingdom of Kong, and NW of Dagomba.

MOSKENASOE, or Moskoe, an island of Norway, at the SW extremity of the Loffodin group, in N lat. 67° 50′, E long. 12° 5′. It is 15 m. in length, by 8 m. in breadth.

MOSKIRCH, a small town of Baden, in the principality of Furstenberg, 18 m. N of Constanz. Here the French, under Moreau, obtained a victory over the Austrians, in the beginning of the campaign of 1800. Pop. 1,200.

MOSKIRCHEN, a small town of Styria, 10 m. SW of Gratz, on the r. bank of the Kainach.

MOSKONISI, an island of Asiatic Turkey, in the gulf of Adramytti, in N lat. 39° 20′, 10 m. NE of Mitylene. It is 6 m. in length, and produces fruits and cotton. On its S coast is a small port called Mosko.

MOSKOUSKAIA, a fortress of Asiatic Russia, in the gov. of Caucasus, 104 m. WNW of Ekaterinograd.

MOSKVA, a river of Russia, which rises near Gjatsh, in the gov. of Smolensk, and running E, traverses the gov. of Moscow from W to E, passing Moscow, Mojaisk, and Borodino; and joining the Oka, on the l. bank, 3 m. SE of Kolomna, after a course of 210 m. Its tributaries are the Iskona, Rouza, and Istra, on the l.; and the Pakhra on the r. It communicates with the Volga by means of a canal from its affluent the Istra, to the Sestria, an affluent of the Doubna, which latter river joins the Volga.

MOSLACHE, a village of Senegambia, in the kingdom of Cayor, 24 m. E of Saint Louis.

MOSLEY, a chapelry in the p. of Bromsgrove, Worcestershire, 3 m. S of Birmingham, on the Gloucester and Birmingham railway.—Also a chapelry in the p. of Ashton-under-Lyne, in Lancashire, 9 m. ENE of Manchester.

MOSOCZ, a town of Hungary, in the com. of Thurotz, 15 m. N of Kremnitz.

MOSONGO, a province of Anziko, in Africa, in the interior from Congo.

MOSQUERUELA, a town of Spain, in the prov. and 36 m. ENE of Teruel. Pop. 2,400.

MOSQUITIA. See Mosquito Territory.

MOSQUITO BAY, a bay on the E coast of the island of St. Christopher.—Also a bay on the N coast of the island of Cuba, between the port of Havannah and Mariel bay.—Also a bay on the coast of Nicaragua, close to Cape Gracias-a-Dios.—Also a bay on the coast of Labrador, in N lat. 60° 40′.

MOSQUITO COVE, a bay on the N coast of the island of Jamaica, in N lat. 18° 28′.—Also a bay on the W coast of the island of Antigua, in N lat. 17° 12′.—Also a bay on the coast of West Greenland, in N lat. 65°.

MOSQUITO ISLAND, one of the smaller Virgin islands, near the N coast of Virgin Gorda.

MOSQUITO ISLANDS, small islands on the coast of Maine, U. S., in N lat. 43° 55′.

MOSQUITO POINT, a cape at the entrance of Port Royal harbour, Jamaica.—Also a cape on the coast of Guayana, at the mouth of Essequibo.

MOSQUITOS, an island near the E coast of Florida, just without the Bahama channel.

MOSQUITOS, or Mosquito Bank, a cluster of small islands, near the coast of Honduras, in N lat. 14° 30′, which gives name to the Mosquito shore or territory.

MOSQUITO TERRITORY, a district of Central America, on the shores of the Caribbean sea, situated between 16° 10′ and 10° 25′ N lat., and 85° 50′ and 83° 20′ W long.; bounded by Honduras on the W, from which it is separated by the river Roman, and touching on the states of Nicaragua and Costa-Rica on the S and W, with which its frontier is the Colorado and the San Juan rivers to the lowest rapid on the latter, and thence a line running along the heights dividing the waters which flow to Lake Nicaragua from those which flow to the Caribbean sea. In magnitude, this country exceeds Portugal. It is well-watered, and fertile; but its coasts are marshy and unhealthy. The chief rivers, enumerating them eastwards from the Roman, are the Tinto, which falls into the sea by two deltoid branches, known as Cape river and Black river, and the upper part of which is called the Poyais; Plaintain river, and Patouk river, the Carataska forming a large lagune at its mouth, and the Wanks or Segovia flowing into the sea at Cape Gracias-a-Dios; all these rivers belong to the N coast of the territory. On the E coast, we meet in succession the Sicapulca, Sandy river, Dockwarra, Twappie, Wara, Wongta, Walpa-Sisca, Prinza-Palka, Aoula-Tara, Pearl river flowing into Pearl Kay lagune, Bluefields, Ramas, Rama, Corn river, Indian river, and the San Juan. Wild horses scour the savannas in countless herds; the Indians catch them with the lasso, but use them only for riding. The cattle are of great beauty, but such a thing as a drove is not to be seen in the possession of an Indian throughout the entire coast.—The town and territory of Poyais, where, some years ago, some adventurers from this country attempted to establish an independent colony, are situated near the N coast on the Tinto or Black river, which discharges itself into the Atlantic near Cape Camaron. The town of Soohee lies about 50 m. SW of Cape-Gracias-a-Dios, near the r. bank of the Segovia; Adam's Town lies on the point of land called Bluefields Bluff, nearly under 12° N lat.; and Bluefields town, on the opposite or SW side of Bluefields lagune. The following account of the M. territory and its inhabitants is given in a document published at Berlin in 1845, purporting to be the report of a commission of examination sent out by the Prussian government in 1844.—"The entire region," say the reporters, "is inhabited by several races, differing much in external appearance, and but little as regards manners and customs. Their chief divisions are three: the tribe of Sambos, the original Indians, and the Karaibees. The former comprehend the reigning power. All live in established dwellings, passing their days in hunting and fishing, and cultivating just so much of the land as is necessary for their existence. There are, of course, no means of rightly estimating the amount of population. Their history is absolutely buried in darkness. Their months are reckoned by the moon; but of years they keep no account, and

no man knows his own age; consequently, whatever they relate is marked by disorder and confusion. It is, however, well known that they resisted the arms of the Spaniards under Alonzo-de-Ojada and Diego-di-Nicuesca, yielding neither to their force and cruelty, nor to the mandate of the Pope, which enjoined them to 'deliver themselves peacefully to the dominion of the lawful ruler of the world.' To this day their hatred to the Spaniards is intense; tales of their horrid barbarity are transmitted from father to son; and this quiet and gentle people become violently excited at the idea of subjection to, or friendship with, a Spaniard. The first colony laid here was in the year 1730, when some English settled near the Black river, Cape Gracias-a-Dios, and at Blewfields. During the war between England and Spain in 1739, a few forts were built for the protection of the young colony, which, with the exception of some disasters, continued in a flourishing condition until, in consequence of the peace of Paris (1783), the colonists were commanded to evacuate the country. Some few, however, in Blewfields, remained in their possessions; and the Indians, left once more to themselves, were attacked by the Spaniards, who were anxious to secure the deserted fort at the mouth of the Black river. This unsuccessful attack was the last made upon the unfortunate Indians by their ancient enemies. Much has been attempted by their late kings, who have had the advantage of education among the English in Jamaica, to improve the condition of their people. The inhabitants of the M. country, with the exception of some European settlers, are aboriginals, giving themselves the general name of Misskĭtŏs, and are called by Europeans Indianos, Bravos, Moscos, Mosquitos, Mosquito Indians. It has frequently been the question, to what circumstance this country owes the designation of Mosquito Coast, seeing that the insects known by that name are here far less numerous than in many other coasts of America. Some time since the opinion was current that the name had been acquired from the numberless small islands, lying near the coast, which have been said to have the appearance of innumerable flies swimming on the water. Upon a map, perhaps, one's fancy may discover some truth in this resemblance, but hardly in looking upon the reality, where the islands, viewed either near or at some distance, have, if possible, less resemblance to flies than to any thing else. It may be permitted to add one more conjecture to the many that have been broached on this subject. Let us then suggest that the name of the coast is derived from that of the inhabitants, and that the latter is originally an Indian name, corrupted by the Spaniards; for it must strike all who hear them that the Indians, who, from their intercourse with the Spaniards, are perfectly well acquainted with the expression mosquitos for flies, and are also in the constant habit of using it, never call themselves Mosquitos, or Mŏskĭtŏs, but on the contrary style themselves distinctly and uniformly Mueskitos (Miskĭtŏs); and if the other word is applied to them, they correct it carefully, adding, 'Mosquitoes are flies,—we are Miskito men,' as has more than once occurred to us. If now, the race originally living on the coast were called Misskitos or Misskos, it is highly probable that, naming themselves thus to the first Spaniards arriving in their territory, these latter gradually corrupted it, and applied to them, instead of Misskito, Mosquito, the name of the numerous insects on the coast." The ethnological position of these Indians is a difficult question. "With nothing in Honduras to compare them with,—with nothing tangible, or with an apparently incompatible affinity in Nicaragua,—with only very general miscellaneous affinities in Guatemala,—their ethnological affinities are as peculiar as their political constitution. Nevertheless, isolated as their language is, it has undoubted general affinities with those of America at large; and this is all that it is safe to say at present. But it is safe to say this. We have plenty of data for their tongue, in a grammar of Mr. Henderson's, published at New York, 1846. The chief fact in the history of the M. is that they were never subject to the Spaniards. Each continent affords a specimen of this isolated freedom —the independence of some exceptional and impracticable tribes, as compared with the universal empire of some encroaching European power. The Circassians in Caucasus, the Tshuktshi-Koriaks in North-Eastern Asia, and the Kaffres in Africa, show this. Their relations with the buccaneers were, probably, of an amicable description. So they were with the negroes—maroon and imported. And this, perhaps, has determined their *differentiæ*. They are intertropical American aborigines, who have become partially European, without becoming Spanish. Their physical conformation is that of the South rather than the North American; and, here it must be remembered, that we are passing from one moiety of the new hemisphere to the other. With a skin which is olive-coloured rather than red, they have small limbs and undersized frames; whilst their habits are, *mutatis mutandis*, those of the intertropical African. This means, that the exuberance of soil, and the heat of the climate, make them agriculturists rather than shepherds, and idlers rather than agriculturists, since the least possible amount of exertion gives them roots and fruits, whilst it is only those wants which are compatible with indolence that they care to satisfy. They presume rather than improve upon the warmth of their suns, and the fertility of the soil. When they get liquor, they get drunk; when they work hardest, they cut mahogany. Canoes and harpoons represent the native industry. *Wulasha* is the name of their evil spirit, and *Liwaia* that of a water-god. I cannot but think that there is much intermixture amongst them. At the same time, the data for ascertaining the amount are wanting. Their greatest intercourse has, probably, been with the negro; their next greatest with the Englishman. Of the population of the interior we know next to nothing. Here their neighbours are Spaniards. They are frontagers to the river San Juan: this gives them their value in politics. They are the only well-known extant Indians between Guatimala and Veragua: this gives them their value in ethnology. The populations to which they were most immediately allied have disappeared from history. This isolates them; so that there is no class to which they can be subordinated. At the same time, they are quite as like the nearest known tribes as the American ethnologist is prepared to expect. What they were in their truly natural state, when, unmodified by either Englishman or Spaniard, Black or Indian, they represented the indigenous civilization (such as it was) of their coast, is uncertain." [*Latham.*]

Historical notice.] This region, it is alleged, has belonged to an independent race of Indian kings ever since the fall of Montezuma, having a recognised territory appertaining to themselves. It never formed part of Nicaragua, nor even of the viceroyalty of Guatimala. The country it embraces is constantly spoken of by Spanish historians as being in the occupation of unsubdued Indians. Moreover, it is an undoubted fact that, for 200 years or more, Great Britain has been in intimate relation and friendship with its chiefs and people. Articles of agreement were signed between the governor of Jamaica and the M. chief in 1720; and, on many occasions in the last cent., these tribes were shown to be not subject to the crown of Spain, but under the protection of this country. Upon examination of the historical evidence collected by the British missions on the spot, Lord Palmerston instructed the British agents to inform the authorities of the several states of Central America bordering on the kingdom of M. that her ma-

jesty's government consider the king of M. to be entitled to the extent of coast reaching from Cape Honduras to the S mouth of the river San Juan. In spite of this announcement, the Nicaraguan government declared, in October 1847, that it did not recognise any king of M., or any such territorial pretensions; and formally laid claim to the northern coast and the port of St Juan as a part of its own dominions, declaring that it would receive as war on the part of the British government any occupation of the port of San Juan effected by the Mosquitos under its protection! The council of state of M. responded to this defiance by a resolution for "practically establishing the full rights of sovereignty of the king of M. over all the mouths of the St. John, and over the navigation of the lower part of that river, on the appearance of the first British ship-of-war with orders to co-operate with the M. government." Shortly afterwards, her majesty's ships Alarm and Vixen arriving off Bluefields, the Nicaraguan establishment was removed from the mouth of the St. Juan, the British forces stormed Serapaqui, and entered the lake of Nicaragua, where, on the 7th of March, 1848, a treaty was signed by Captain Loch and the Nicaraguan ministers, by which the government of that state promised not to disturb the peaceful inhabitants of San Juan, understanding that any such act would be considered by Great Britain as an open declaration of hostilities, and that the M. tariff established in that port should be respected. At the same time, the Nicaraguans refused altogether to forego their claims upon the port of San Juan: whilst the British government treated that port as a part of the M. territory, recognised, protected, and defended for more than a century by Great Britain; and this protectorate, it appears, has ceased to be a mere abstract or honorary function. The San Juan is the inlet to the most practicable line of water-communication across the isthmus, and on the possession of its port of Greytown depends the command of the passage. The Nicaraguans therefore proceeded to make a concession of the passage, with very visionary powers and privileges, to citizens of the United States with a view to obtaining, if possible, the countenance and guarantee of the United States' government to their pretended rights over the M. territory. The great object of the inter-oceanic Nicaraguan canal being common to all nations, it would be absurd, illiberal, and impolitic to take advantage of our ancient relations with the M. Indians to frustrate such a scheme. But precisely because it is a great public object, the little state of Nicaragua has no right to claim sole possession of such a passage by a direct violation of the territories of an independent neighbour. If, however, the canal is to be made, it may fairly be the subject of a treaty or equitable convention between the different states through whose territories it may pass, and the terms of such a treaty ought to be of the most liberal kind. In conformity with these views, a treaty was negotiated on the 19th of April 1850, between the United States and Great Britain, for the settlement of the Mosquito and other boundary questions, of which the main provisions are as follows: The M. territory is to be pushed back northward, from the San Juan to the rivers Rama and Segovia, and the king of M. is to receive in consideration the net proceeds of an import duty of 10 per cent. *ad val.*, to be levied at Greytown for three years. Any existing grants of land within the ceded district are to be recognised, provided they shall not interfere with the privileges of the Ship Canal company. The boundaries between Nicaragua and Costa Rica are to begin on the S side of the Colorado, from its mouth on the Caribbean sea to its confluence with the San Juan, and to proceed thence along the S bank of the San Juan and Lake Nicaragua till it reaches that part of the strip of land between the lake and the Pacific nearest to the river La Flor, which flows into that ocean, and to the mouth of which a straight line is to be drawn. Costa Rica is to enjoy in common with Nicaragua the right to navigate the Colorado, the San Juan, and the lake, by any vessels excepting steamers, subject to the paramount right of the Canal company to appropriate these waters in any way they may find necessary. It is also stipulated that the Canal company are to have the privilege of locating on the S bank of the San Juan four of their eight sections of land, and that neither Nicaragua nor Costa Rica shall erect any works or in any way interfere either with the rivers or the harbour of Greytown so as to obstruct that company or the Accessory Transit company. The next clause fixes 25 m. from the termini of the canal on the Atlantic and Pacific as the distances to be exempt during war from blockade, detention, or capture for vessels of the United States and Great Britain. By the first article of the treaty, the two parties agree that neither the one nor the other will ever erect or maintain any fortification commanding the canal, nor in the vicinity thereof, or fortify, or colonize, or assume, or exercise any dominion over Nicaragua, Costa Rica, the M. coast, or any part of Central America. But the relations of Great Britain to M. and the M. Indians, over whom she claims to have exercised a protectorate for a long course of years, remained until this treaty somewhat indeterminate. The port of San-Juan-del-Norte, or Greytown, though claimed as within the limits of a protectorate, has for some time been really governed in the name of the titular king of M. by a committee of 5 American citizens chosen by the people. The British government subsequently came to the conclusion, that since Great Britain first assumed the protection and defence of the M. Indians, the position of all parties had changed. Spain, instead of exercising absolute sovereignty over Central America, and prohibiting all commerce on the coasts under her sway, has entirely lost her dominion over all parts of this continent; and the M. Indians, instead of governing their own tribe according to the custom of their race, furnish only a name and title, by which foreigners trading at Greytown and along the M. coast, according to the usages of civilized states, exercise the effective government of the country. In consequence of those changes, Great Britain, instead of having as formerly an interest in the defence of the M. Indians, for the sake of exempting a part of the territory of Central America from Spanish control, and thereby obtaining admission for her commerce, has no other interest in M. but such as she derives from an honourable regard to her old connections with the M. Indians. The British government regards the committee of government of Greytown or San-Juan-del-Norte, above referred to, as in fact the only real power which exercises authority in that part of Central America. It would be a matter of indifference to Great Britain whether that authority was exercised in the name of the king of M. or in the name of the city of San-Juan-del-Norte itself; but it is desired by the British government that the apparent state of things should be made to conform to the reality, which is not now the case, the government being nominally carried on in the name of the king of M., while it is really exercised by the committee organized at San-Juan-del-Norte or Greytown under a popular election. What the British government would consider a good and final adjustment would be:—First, that San-Juan-del-Norte or Greytown should be a free and independent port, connected with M. by such relations of friendship and alliance as may be agreed upon. Secondly, that indemnification or advantages equivalent to those laid down in the project of convention of the 13th April 1852, should be assured to M. in return for its withdrawal from its present position in reference to San-Juan-del-Norte. Thirdly, that the United States and Great Britain, without formally guaranteeing San-Juan-del-Norte, should be ready to act in concert to defend the independence of the free city or port, in whatever quarter it may be attacked. The British government deem it essential that the city and port of San-Juan-del-Norte or Greytown should be established either in a state of unqualified independence, with an engagement to defend M., or of qualified independence, owing allegiance and support to M. In lieu of an indemnity in money to M. for relinquishing her claims to San-Juan-del-Norte, it is suggested by the British government that a greater security for a certain fixed territory should be the consideration for that object.

MOSS, a port of Norway, in the bail. of Smalehnen, 38 m. S of Christiania, in N lat. 59° 26′, on a large bay, which forms a harbour of sufficient depth to allow ships of considerable size to come close to the town. Pop. 3,132. It has a brisk trade, chiefly in the export of deals and timber. There are sawmills at the mouth of a neighbouring stream, and also a large iron-work and cannon-foundry.

MOSSALSK. See MOSALSK.

MOSSAMBIQUE. See MOZAMBIQUE.

MOSSAMEDES, a village of Brazil, in the prov. and 20 m. SW of Goyaz.

MOSSAMEDES (NOVO-PORTO-DE), a Portuguese settlement and port in Lower Guinea, in the kingdom of Benguela, on a bay of the same name, at the entrance of the Rio-das-Mortes into the Atlantic, 225 m. SSW of St. Philippe-de-Benguela. The bay bears also the names of Rio-das-Mortes and of Little Fish bay.

MOSSARANGA. See MONOMOTAPA.

MOSSEGUEYOS, a people of Zanguebar, who inhabit the locality between 2° and 5° S lat., but of whom little is yet known.

MOSSEL BAY, an indentation of the S coast of the Cape of Good Hope, in the district of George, to the NE of the embouchure of the Gauritz, and enclosed on the W by Cape St. Blaise. It is 9 m. in depth, and 18 m. in breadth, at the entrance.

MOSSET, a commune and town of France, in the dep. of the Pyrenees-Orientale, cant. and 6 m. NW of Prades, and 31 m. W of Perpignan. Pop. 1,297. In the environs are several marble quarries.

MOSSIDU, a town of Nigritia, in the kingdom of Gotto, to the S of Timbuctu.

MOSSIG, a river of France, in the dep. of the Lower Rhine, which has its source in the cant. and 9 m. WSW of Wasselonne; runs E; and throws itself into the Bruche, on the l. bank, 1½ m. N of Mutzig, and after a total course of 21 m.

MOSSINGEN, a market-town of Würtemberg, in the circle of the Schwarzwald, bail. and 8 m. SE of Rottenburg, and 9 m. SW of Reutlingen, on the Steinbach. Pop. 2,744. It has a distillery of brandy. In the vicinity are the sulphureous baths and wells of Sebastiansweiler.

MOSSKIRCH, a town of Baden, in the circle of the See, 24 m. N of Constanz, on the Ablach. Pop. 1,636. The Austrians were here defeated by the French in 1800.

MOSSON, a river of France, in the dep. of the Herault, which has its source in the cant. and 6 m. ENE of Aniane, near St.-Jean-de-Combajargues; runs 3 m. W of Montpellier; and throws itself into the Lez, by the r. bank, 1½ m. above the entrance of that river into the Mediterranean, and after a course, in a generally SE direction, of 27 m. See also WEISELBURG.

MOSSORIL, or MESURIL, a village of the captaingen. and gov. of Mozambique, a little to the N of the town of that name, and on the peninsula of Caboceiro.

MOSSO-SANTA-MARIA, a village of the Sardinian states, in the div. of Turin, prov. and 9 m. NE of Biella. Pop. 1,200. It has manufactories of linen and woollen stuffs.

MOSS-SIDE, a township of Lancashire, in the p. and 2 m. S by E of Manchester. Pop. in 1841, 436.

MOSTADMARKEN, a village of Norway, 12 m. ESE of Drontheim, the seat of large iron-works.

MOSTAGAN, or MUSTAGAUM, a town of Algeria, the capital of the second subdivision of the prov. of Oran, situated on the coast, in N lat. 25° 95′, 21 m. E of Arzew. Its pop. in 1850 was 7,050, of whom 3,900 were Europeans, and 3,150 natives. It is built on a rising ground at the foot of which runs the Wad-Safra, flowing towards the gulf of Arzew. The lower part of the town is Moorish in character; the upper presents a French aspect in its buildings and the names of its streets. Its chief trade is in cattle and grain, the vicinity being highly fertile. The French have extensive magazines here, and a large military hospital.

MOSTAR, a town of Bosnia, the cap. of the Herzegovina, in N lat. 43° 24′, 52 m. SW of Bosna-Serai. It is situated chiefly on the r. bank of the Narenta, or, as it is frequently called, the Marentovo, over which there is here a remarkable bridge erected by the Romans, to whom likewise is attributed the formation of the small harbour on the river. The pop. is estimated at 8,000, of whom two-thirds are Turks. It has a celebrated manufactory of arms; also a brisk traffic in cattle, corn, wine, fruit, wax, and tallow.

MOSTAZA, a village of Marocco, in the prov. and 72 m. N of Fez.

MOSTAZAL, a river of Chili, in the prov. of Coquimbo, which enters the Limari, on the r. bank, near Hamilla, after a W course of 90 m.

MOSTEROE, an island off the W coast of Norway, in N lat. 59° 42′.

MOSTERTON, a parish in Dorsetshire, 4 m. NNW of Beaminster. Area 1,100 acres. Pop. 391.

MOSTOLES, a town of Spain, in the prov. and 30 m. NE of Toledo. Pop. 1,200.

MOSTON, a township of Lancashire, in the p. and 4 m. NE of Manchester. Pop. in 1831, 615; in 1841, 671.—Also a township in Warringham p., in Cheshire, 2½ m. NW of Sandwich.

MOSTONI, a town of Tibet, near the source of the Gundok, in N lat. 29° 52′.

MOSTY, a town of Russia, in Lithuania, in the gov. of Grodno, 58 m. W of Novogrodek.

MOSTYN, a township of Flintshire, at the mouth of the Deer, 4½ m. NW of Holywell. Pop. 209.

MOSUL, a pashalik and town of Asiatic Turkey, in the W part of Kurdistan. The pash. lies between the parallels of 35° 30′ and 37° 55′ N; and is bounded on the N and E by the eyalet of Shebezar, and on the S and W by that of Bagdad. It is traversed from N to S by the Tigris, which here receives the Great and Little Zab. The country to the W of the Tigris is almost a desert; on the E it is, where watered, fertile in corn, legumes, and cotton. The pash. was governed for many generations by the Abdul-Jelils. This family was originally Christian. The first Abdul-Jelil emerged from obscurity in the war which the Porte waged against Austria and Hungary in the beginning of the last cent. He removed the bar to further distinctions by embracing the faith of Islam, and received as the reward of his services and apostacy, the hereditary pash. of M. The mutinous outbreaks of the Janissaries, which kept the empire in a perpetual state of anarchy until their destruction, seem to have raged with peculiar fury at M. In many parts of the town the walls are covered with bullet-marks, especially in the neighbourhood of the towered archways across streets by which the principal families maintained their communications; and the dents of the ball-showers, which hailed about each arrow-slit in these, and each window in the adjoining houses, still attest the furious assaults of this fierce democracy, and the galling fire of their besieged adversaries. The last Abdul-Jelil was deposed about 1837, and the destruction of the Janissaries by Sultan Mahmud allowed free play to the energies of Mehemet, surnamed Inji Bairactar, or Mohammed Pasha, who was appointed by the Porte governor of M. in 1838. Mohammed began by building a serai or rather castle for himself, outside the city-walls, half-a-mile lower down the river. To this he annexed a strong barrack capable of holding several thousand men, and from this position he completely controlled the insubordinate pop. of the town, and put down their lawless spirit with a strong hand. The law was vindicated; and had the rights of property been respected by the pasha himself as much as he made them to be respected by others, the six years of his government might escape censure. But the praise due to his vigour is more than cancelled by his immoderate greed of wealth, and the unscrupulous means by which he gratified this passion. Mohammed was succeeded in the government of M. by Sherif Pasha in May 1844. The oppressive exactions of the new governor occasioned his recall before the end of the year; and he was succeeded in 1845 by Mehemet, Kirtli-Oglow, or son of the Cretan. This pasha, during his short and infamous misgovernment, outdid all that has been known, even in Turkey, of cruelty and extortion. In less than eight months he succeeded in reducing to utter ruin no less than 85 villages; while the horrible number of murders that he committed, to possess himself of the wealth of individuals, deprived the pashalik of its most respectable citizens. This monster affected to despise European influence; but the representations of the consuls procured an inquiry, and he was displaced. The enormities disclosed by the commission appointed by the Porte to collect evidence against him were such that his first sentence was death. Tayar Pasha received the prov. in a state of ruin and utter exhaustion. But he preferred being out of pocket by his bargain to employing a cruel pressure on the beggared people. He remitted the taxes of many villages that had suffered severely, and left his memory unstained by any tyrannical act. Essaad Pasha succeeded Tayar. "Any one," says a writer in 1847, "who has travelled through this waste and depopulated prov. must feel convinced that only the most tender treatment of that pop. which furnishes its remaining resources can keep them from abandoning altogether the cultivation of the soil, and taking to the wild life of the Arab and Kurdish hordes, or emigrating to the mountainous districts, where they may be out of reach of the oppressor's gripe. It is this forced emigration that has

swollen the power of Bederhan Bey to such a dangerous pitch, and enabled him to execute a project, no doubt long cherished by the Kurds, of destroying the Christian tribes, who were until lately sufficiently strong to keep their murderous designs in check. The Chaldean villagers also emigrate to Bederhan Bey's territory; but these are content to pay the haratch to him, which the Nestorians, as a free, independent tribe, have always refused. Of course these are spared as profitable. It is the high and brave spirit of resistance of the Nestorians to a demand which has been never legalized by compliance that has exasperated the Mussulmans, to whom no spectacle is more offensive than a Christian who holds up his head, and whose courage they fear."

The cap. of the pash. stands on the W or r. bank of the Tigris, in so low a situation that the river, which is here 300 ft. wide, and flows with great rapidity, rises often to the level of the houses. Its principal edifices are a college, the tomb of Abdul-Kassin, and the remains of a beautiful mosque, the minaret of which, built by Nureddin of Damascus, has a fine appearance from a distance. The coffee-houses, baths, khans, and bazaars are handsome buildings. The Kara-Serai, or Black palace, is now in ruins, and the pasha resides in a cluster of insignificant little buildings. The castle, on a small artificial island in the Tigris, is now much decayed. The city has a stone wall and 7 gates, but the wall is broken down in many places, and most of the buildings are crumbling into ruins. The houses are built partly of brick and partly of stone; as timber is scarce and dear, the roofs and even the ceilings of the apartments are vaulted. The inhabitants, numbering about 20,000 families, are a mixture of Turks, Kurds, Jews, Armenians, Nestorians, and Arabs. They carry on some commerce with Kurdistan, Diyarbekir, and Bagdad, by caravans. Its principal article of manufacture is that of muslin. On the opposite side of the river, both above and below the town, are ruins, extending about 3,000 yds. along the river, and nearly the same distance into the interior, supposed to mark the site of the ancient *Nineveh*.

MOSULLA, a town of Persia, in the prov. of Ghilan, 35 m. W of Reshd.

MOSZIN, or Moschin, a town of Prussia, in the reg. and 12 m. SSW of Posen. Pop. 900.

MOTA-DEL-CUERVO, a town of Spain, in the prov. and 57 m. SSW of Cuenca, and partido of Belmonte. Pop. 3,712. It has manufactories of linen and of common cloth. The surrounding country is flat and destitute of wood, and is but scantily supplied with water.

MOTA-DEL-MARQUES, a partido and town of Spain, in Old Castile, in the prov. of Valladolid. The partido comprises 39 pueblos. The town is 22 m. W of Valladolid, and 9 m. SW of Torrebobaton, between two streams affluents of the Duero. Pop. 1,290. It has manufactories of linen.

MOTAGUA, a river of Central America, which rises near Sacualpa, in about N lat. 15° 10′, W long. 91°, in the centre of the state of Guatimala, and flows E to Zacapa, where it turns NE, towards the bay of Honduras which it enters at a point 15 m. W of Omoa. Its mouth is barred, but it has been making a new channel of discharge for itself for some years past, and now forms a junction in the lower part of its course with the Cuyamel or Tinto, on the bar of which there is always 10 ft. of water. Its tributaries on the r. are the Piscaya, the Sacatipeques, the Platanos, the Chiquisimula, and several smaller streams; on the l. its tributaries are few and insignificant. During the rainy season, it carries a great volume of water to the sea.

MOTALA, a river of Sweden, which flows out of Lake Wetter near the village of the same name; pursues an E course through lakes Boren and Roxen; turns N, and traverses Lake Glan, issuing from which it flows in an E and very winding course through East Gothland, and joins a bay or deep creek of the Baltic at Norrkioping.—The town of M., on the E bank of the Wetter lake, is 9 m. NNE of Wadstena, and 23 m. WNW of Linkoping. Pop. 2,000. It has a harbour on the lake, at the outlet of the Gotha canal; and machine-works employing 800 men.

MOTAPA. See Monopotapa.

MOTATAN, a large river of Venezuela, which rises in the mountains of Merida, and enters Lake Maracaibo on the E side, in N lat. 9° 45′.

MOTCH, a village in the Punjab, on the l. bank of the Indus, in N lat. 32° 47′.

MOTCHA, a river of Russia, which joins the Volga, on the l. bank, near Samara, after a NW course of 120 m.

MOTCOMBE, a parish of Dorsetshire, 1½ m. NW of Shaftsbury. Area 4,780 acres. Pop. 1,538.

MOTHE-FENELON (La), a village of France, in the dep. of Lot, cant. and 4 m. NW of Peyrac, on an affluent of the Dordogne. Pop. 800.

MOTHE-MONTREVAL (La), a town of France, in the dep. of Dordogne, on the river Dordogne, 22 m. W of Bergerac. Pop. 1,100.

MOTHE-ST.-HERAY (La), a town of France, in the dep. of Deux-Sevres, on the Sevre Niortaise, 18 m. E of Niort. Pop. 2,500. It has manufactories of cotton stuffs and leather, and a traffic in corn, cattle, and horses.

MOTHEL, a parish in co. Kilkenny, on the Dinane river. Area 7,091 acres. Pop. in 1841, 2,586.

MOTHELL, a parish in co. Waterford, 3 m. S of Carrickbeg. Area 20,740 acres. Pop. in 1831, 3,709; in 1841, 3,723. Much of the surface is alpine, and in the Cummeragh mountains reaches an alt. of 2,597 ft.

MOTHERWELL, a village in the p. of Dalziel, Lanarkshire, near the line of the Caledonian railway, 7 m. NW of Carluke. Pop. 726.

MOTHONE. See Modon.

MOTHVEY, a parish of Carmarthenshire, 4½ m. NE of Llangadock. Pop. 1,073.

MOTI, a village of Sistan, in Persia, 60 m. N of Zareng.

MOTIDU, a town of Hindostan, in Mysore, in N lat. 13° 39′, E long. 76° 25′.

MOTIERS, a village of Switzerland, in the cant. of Neufchatel, district of Val-de-Travers, 16 m. SW of Neufchatel. Pop. in 1850, 927, Protestants, and chiefly watch and lace makers.

MOTIKLEI, a small bay of Asiatic Russia, on the sea of Okhotsk, about 40 m. N of Okhotsk.

MOTILLA-DEL-PALANCAR (La), a town of Spain, in the prov. and 39 m. SSE of Cuenca. Pop. 2,890. It has coarse woollen factories.

MOTINES, a town of Mexico, in the state of Michoucan, 210 m. SW of Valladolid, near the coast of the Pacific.

MOTIR, a small island in the Eastern seas, of a triangular form, about 24 m. S of Ternate, in N lat. 0° 32′.

MOTORCA, a lake of Peru, in the prov. of Callahuas, near Huanibo. It is about 9 m. in circuit.

MOTOVILEIKHINSK, a mining town of Russia, in the gov. and 3 m. from Perm. Rich copper mines are wrought in the vicinity.

MOTREF, a village of France, in the dep. of Finistere, cant. and 6 m. S of Carhaix. Pop. 1,218.

MOTRICO, a small sea-port of Spain, in the prov. of Guipuzcoa, on the bay of Biscay, at the embouchure of the Deva, 18 m. W of San Sebastian. Pop 2,590.

MOTRIL, a fortified town of Spain, in Granada, with a harbour on the Mediterranean, 4 m. E of Malaga. Pop. in 1845, 12,690. It has some export trade in wine, linen, and chestnuts. The environs produce sugar, of which the cultivation has been carried on here from very early times.

MOTRIV, a river of Little Wallachia, which rises in Mount Mozla; runs S, and SE; and joins the Shyl on the r. at the village of M., 21 m. NW of Craiova.

MOTSKI, a town of Russia, in the gov. and 167 m. SSW of Voronetz, on the l. bank of the Borovaïa. Pop. 1,800.

MOTTA, a town of Austrian Italy, in the prov. of Treviso, on the r. bank of the Livenza, at the junction of that river with the Mottegano, 22 m. ENE of Treviso. It has dye-works and hat-manufactories.

MOTTA-CARNASTRA, a town of Sicily, 36 m. SW of Messina, and 15 m. S of Castroreale. Pop. 1,400.

MOTTAFERNO, a town of Sicily, 4 m. NW of Mistrella. Pop. 2,000.

MOTTA-SAN-GIOVANNI, a town of Naples, in the prov. of Calabria-Ultra 1ma, 7 m. SE of Reggio. Pop. 1,200.

MOTTA-SANTA-ANASTURIA, a town of Sicily, in the prov. and 6 m. WNW of Catania. Pop. 1,500.

MOTTA-SANTA-LUCCA, a town of Naples, in the prov. of Calabria-Ultra 2da, 9 m. NNW of Nicastro. Pop. 3,200.

MOTTA-VISCONTI, a town of Austrian Italy, in the prov. and 9 m. NW of Pavia.

MOTTE, a river of France, in the dep. of Nievre, which flows out of an etang near La Tournelle, and joins the Proye on the r.

MOTTE ISLE, a small island in Lake Champlain, at the entrance of Richlieu river, near the tongue of land which forms Missiqui bay. It is about 8 m. in length, and 2 m. in breadth; and is 2 m. W of North Hero island. It constitutes a township in Franklin co., Vermont.

MOTTE-CANILLAC, a town of France, in the dep. of Haut-Loire, on the Allier, 3 m. NE of Brioude.

MOTTE-CHALENÇON (La), a town of France, in the dep. of Drome, 20 m. S of Die, on an affluent of the Aigues.

MOTTE-D'AVILLANS (La), a village of France, in the dep. of Isère, cant. and 5 m. NNW of La Mure. Pop. 720.

MOTTE (St. Jean-de-la), a town of France, in the dep. of Saone-et-Loire, 15 m. NW of Charviles. Pop. 1,000.

MOTTE-LANDERON, a town of France, in the dep. of Gironde, 6 m. SE of La Reolle, and 32 m. SE of Bourdeaux.

MOTTE-ST.-MARTINS (La), a village of France, in the dep. of Isère, cant. and 4 m. NNW of La Mure, near the r. bank of the Drac. Pop. 600.

MOTTE-SERVILLEX (La), a town of the Sardinian states, in the prov. of Savoy Proper, 6 m. NW of Chambery. Pop. 2,800.

MOTTEGANO, a small river of Austrian Italy, which runs into the Livenza at Motta.

MOTTEN, a village of Hesse-Cassel, on the road from Fulda to Wurzburg.

MOTTER. See Moder.

MOTTIER, a village of France, in the dep. of Isère, cant. and 4 m. NE of Cote-St.-Andre. Pop. 1,100.

MOTTISFONT, a parish of Hants, 4 m. NW of Romsey. Area 2,270 acres. Pop. 578.

MOTTISTON, a parish of the isle of Wight, 5 m. SE of Yarmouth. Area 1,070 acres. Pop. 176.

MOTTLAU, a river of Western Prussia, which rises near Stargard, flows through the town of Dantzic, and falls into the Rodaune near its junction with the Vistula, after a N course of 30 m. It is navigable to Dantzic.

MOTTLING, a town of Austrian Illyria, in Carniola, near the l. bank of the Culpa, 13 m. SE of Neustadtl.

MOTTNIG, a village of Styria, in the circle and 21 m. W of Cilly.

MOTTOLA, a town of Naples, in the Terra-di-Otranto, 15 m. NW of Taranto. Pop. 2,500.

MOTTRAM (St. Andrew), a township in Prestbury p., co.-palatine of Chester, 4 m. NW of Macclesfield. Area 1,600 acres. Pop. in 1841, 380.

MOTTRAM-IN-LONGDEN-DALE, a parish and township in the co.-palatine of Chester, 7 m. NE by E of Stockport, on the line of the Manchester and Sheffield railway, which crosses the turnpike road from Hyde to Mottram, and then fetches a circuit at the distance of 1½ m. from the village of M., crossing the Etherow, and entering Yorkshire in the valley of that river. The parish includes the townships of Godley, Hattersley, Hollingworth, Matley, Mottram-in-Longden-Dale, Newton, Stayley, and Tintwistle. Area 26,260 acres. Pop. in 1801, 6,234; in 1831, 15,536; in 1841, 21,215.—The village of M. stands on an eminence in the Dale, a little W of the Etherow. It is the site of extensive manufactories for cotton and woollen goods. Coal is wrought in the vicinity.

MOTTSVILLE, a village of Onondago co., in New York, U. S., 149 m. W by N of Albany. Pop. 350.—Also a township of St. Joseph's co., Michigan, U. S., 154 m. WSW of Detroit.

MOTUARA, or Moturoa, an island off the coast of New Zealand, in Queen Charlotte's sound, in S lat. 41° 4′.

MOTUGU, an island of the Pacific, in S lat. 19° 10′, E long. 179° 40′, visited by D'Anville, in 1827.

MOTUTABU, one of the smaller Friendly islands, 3 m. NW of Tongatabu.

MOUBARIK. See Bombarak.

MOUCHAMP, a town of France, dep. of La Vendee, 24 m. NNW of Fontenay-le-Comte. Pop. 1,720.

MOUCHIN, a village of France, in the dep. of Nord, cant. and 6 m. E of Templeuve. Pop. 1,180.

MOUDANIA, a town of Asiatic Turkey, in the sanjak of Khodavendika, 2 m. NW of Brusa, on the S coast of the gulf of the same name. It is a large town, chiefly inhabited by Greeks, and may be considered as the port of Brusa. It occupies the site of the ancient *Apamea* and *Myrlœa*.

MOUDON, or Milden, a town of Switzerland, in the cant. of Vaud, on the small river Broye, 13 m. NNE of Lucerne. Part of it stands on the declivity of a steep hill, from which a rivulet descends and runs through the lower town with great rapidity into the Broye. The town contained 2,443 inhabitants in 1850, chiefly Protestants. It is of great antiquity, being the *Moledunum* of Antoninus.

MOUGUERRE, a commune and village of France, in the dep. of Basses-Pyrenees, cant. and 4 m. SE of Bayonne. Pop. 1,363.

MOUHILLY. See Mohilla.

MOUILLAGE, a small river of the island of Guadaloupe, on the NW coast.

MOUILLERON, a town of France, in the dep. of Vendee, 17 m. N of Fontenay. Pop. 1,200.

MOUILLERON-LE-CAPTIF, a village of France, in the dep. of Vendee, cant. and 4 m. NNW of Bourbon-Vendee.

MOUJGHUR, a town of Hindostan, in the prov. of Ajmir, situated in the desert of Bicanir, in N lat

28° 57′, and surrounded on all sides by sand. It is encircled by a high wall with towers, and contains some handsome mosques and tombs.

MOUL HEAD, a cape of Scotland, on the N coast of the island of Papa Westra, in N lat. 59° 13′, W long. 2° 45′.—Also a cape on the E coast of the island of Pomona, in N lat. 58° 52′, W long. 2° 34′.

MOULAHA, a village of Egypt, 9 m. S of Minieh.

MOULDSWORTH, a township in Tarvin p., Cheshire, 6 m. NE of Chester. Pop. 200.

MOULE (Le), a large bay or port on the NE coast of the island of Guadaloupe, with a village of the same name upon its coast, 16 m. ENE of La-Pointe-a-Petre.

MOULEY-DIER, a commune and village of France, in the dep. of Dordogne, on the r. bank of the Dordogne, 6 m. E of Bergerac. Pop. 1,115.

MOULIDARS, a town of France, in the dep. of the Charente, 2 m. WSW of Hiersac. Pop. 950.

MOULIHEINE, a village of France, in the dep. of Maine-et-Loire, cant. and 9 m. NE of Longue.

MOULIN, a parish of Perthshire, 6 m. SSW of Dunkeld. Area 65,000 acres. Pop. in 1831, 2,022; in 1841, 2,070.—The Garry traverses the celebrated pass of Killicrankie in this p. The parish consists of a congeries of hills cloven down by vales or glens along the course of the streams. The highest ground is the pyramidal and very conspicuous Benvrackie. The arable land in general gently declines towards the rivers; and aggregately amounts to about 2,700 acres. The fields around the village of Moulin, constituting 'the How,' a space of 1½ m. long, and a ½ m. broad, are among the most fertile in the Highlands of Perthshire. About 2,000 acres are under wood. The principal rocks are mica-slate, interveined by quartz. Limestone occurs in boulders. The parish is traversed by a road up the Tummel and the Garry; by another up the Ardle and the Briarachan; and by a third which connects them.

MOULINETTE, a village of Cornwall township in Upper Canada, on the St. Lawrence, 7 m. from Cornwall. Pop. 120.

MOULINS, an arrondissement, canton, and town of France, in the dep. of Allier.—The arrond., comprising 9 cants., has an area of 259,310 hectares. Pop. in 1841, 90,323; of cant. 25,893.—The cap. of the dep. of the Allier is pleasantly situated on an extensive plain on the r. bank of the Allier, in N lat. 46° 34′ 4″, E long. 3° 19′ 40″. Pop. in 1831, 14,672; in 1841, 15,377. It is divided into an Old and New town, and has two suburbs. The streets are broad and well-paved; the houses are built of brick. The public edifices present nothing remarkable except the cavalry barracks, which are well-built. There are a town-hall, a college, and a public library of 20,000 vols. The manufactures consist of silks, woollens, and glass. The manufacture of hardware, particularly of scissors, forms one of the chief occupations of the inhabitants.

MOULINS (Les), a village of France, in the dep. of Ille-et-Vilaine, 6 m. NW of La Guerche.

MOULINS-ENGILBERT, a town of France, in the dep. of Nievre, 9 m. SW of Chateau-Chevron, at the confluence of the Gaza and Guignon, affluents of the Aron. Pop. 2,937; of cant. 12,053. It has manufactories of linen, serge, and other coarse stuffs.

MOULINS-LA-MARCHE, a town of France, in the dep. of Orne, 15 m. N of Mortagne-sur-Huine. Pop. 1,030; of cant. 8,059. It has a manufactory of needles.

MOULMEIN. See Maulmain.

MOULONGE ISLANDS, a cluster of small islands in the Indian sea, near the E coast of Africa, in S lat. 10° 45′.

MOULSEY (East), a parish in Surrey, 3 m. ENE of Walton-upon-Thames, on the W bank of the Mole, near its junction with the Thames. Area 730 acres. Pop. in 1831, 546; in 1841, 690.

MOULSEY (West), a parish in Surrey, 2½ m. NE by E of Walton-upon-Thames. Area 650 acres. Pop. in 1831, 441; in 1841, 469.

MOULSFORD, a parish in Berks, 3½ m. SW of Wallingford, on the W bank of the Thames, crossed by the Great Western railway, which has a station at Moulsford-bridge. Area 1,210 acres. Pop. in 1831, 169; in 1841, 144.

MOULSOE, a parish in Bucks, 3 m. SE of Newport-Pagnell. Area 1,190 acres. Pop. in 1841, 297.

MOULTON, a township in Davenham p., co.-palatine of Chester, 2½ m. S of Northwich. Area 730 acres. Pop. in 1831, 243; in 1841, 318.—Also a parish in Lincolnshire, 3 m. W by S of Holbeach. Area 13,450 acres. Pop. in 1831, 1,850; in 1841, 2,038.—Also a parish in Norfolk, 11 m. E by S of Norwich. Area 870 acres. Pop. in 1831, 209; in 1841, 235.—Also a parish in Northamptonshire, 4 m. NNE of Northampton. Area 2,130 acres. Pop. in 1831, 1,334; in 1841, 1,368.—Also a parish in Suffolk, 3½ m. E by N of Newmarket. Area 3,510 acres. Pop. in 1831, 366; in 1841, 379.—Also a township in Middleton-Tyas p., N. R. of Yorkshire, 5 m. NE of Richmond. Area 2,720 acres. Pop. in 1831, 190; in 1841, 209.

MOULTON, a town of Laurence co., in Alabama, U. S., 103 m. N of Tuscaloosa, on the E side of Big-Nance creek.—Also a township of Niagara district, in Upper Canada. Pop. in 1841, 628.

MOULTON ST. MICHAEL, a parish in Norfolk, 7⅞ m. SSE of Wymondham. Area 1,430 acres. Pop. in 1841, 235.

MOULTON (North). See Molton (North).

MOULTONBOROUGH, a township of Carroll co., in New Hampshire, U. S., 46 m. N of Concord, on the NW shore of Winnipiseogee lake. Pop. 1,752.

MOUNA-ROA. See Mona-Roa.

MOUNESS-NESS, a cape on the SE coast of the island of Unst, one of the Shetland islands.

MOUNT, a river of Van Diemen's Land, a branch of the Huon, in the co. of Buckingham.

MOUNTAIN, a rivulet of co. Monaghan, which rises among the Slieve-Beagh mountains, on the W verge of the co., and flows 10½ m. E, to the Blackwater, 1½ m. SW of Caledon.

MOUNTAIN, a village in Walton co., Georgia, U. S., 70 m. NW of Milledgeville.—Also a v. in Hot Spring co., in Arkansas.—Also a township in Washington co., in Arkansas.—Also a township in the Eastern district of Upper Canada, intersected by the Petite Nation river. Pop. 1,316 in 1842.

MOUNTAIN-ISLAND, a village in Leicester co., in N. Carolina, 155 m. W by S of Raleigh.

MOUNT ALEXANDER, a cluster of hills in the Australian Alps, or that series of mountain-ranges which encircle the SW corner of Australia, running in a line nearly parallel to the coast, and from 50 to 80 m. from the sea, and forming a part of the main chain of the continent. This mountain-chain, in Victoria, consists of clay slates, mica slates, and flinty slates, together with granite, in a successional arrangement, forming collectively a recurring series. The strata, Mr. G. H. Wathen says, are nearly or quite vertical, with a N and S strike, and are intersected by numerous quartz veins, running at an acute angle with the slate. Vast plains of trap, forming high table-lands, run up to the base of the mountains, and probably cover their lower slopes. It is in the valleys and gullies of these mountains, and not very far from their junction with the trappean plains, that the rich deposits of gold are found. Gold has been discovered at several points along this zone of mountains; but the richest deposits opened in the colony of Victoria are those of Ballarat and Mount A.: the former about 55 m. NW of Geelong, and the latter about 75 m. NW of Melbourne. The enormous amount of gold which the latter district has yielded has chiefly been derived from two valleys with their gullies and ravines known by the names of the streams or 'creeks' that run through them. One of these, Forest-creek, takes its rise in the granite forming the central mass of Mount A.; the other has its source in the high and broken ranges of slate that environ the

mount; both creeks are tributaries of the river Loddon, on the banks of which also gold is found in small quantities. The Ballarat goldfield lies at the junction of the slate with a trappean tract, about 7 m. from an extinct volcano, known as Mount Beninyong. The original matrix of the gold seems to be the above-mentioned quartz veins that traverse the slate generally in a N and S direction. The wearing away of the slate rocks and their quartz veins by the action of the weather and by aqueous agency, has given rise to the auriferous beds of gravel and clay occupying the beds of the ravines and valleys at the present day. Occasionally the gold is found at or near the surface of the soil, diffused through the gravel; sometimes it lies as much as 30 ft. beneath the surface, imbedded in clay, either immediately upon the rough rock surface below, or just above a white clay, known by the miners as 'the pipe-clay;' it may be met with in other localities at every intermediate depth. In some places boulders of quartz and beds of hard concrete of quartz and slate pebbles occur in the auriferous clays. These different conditions of the auriferous beds depend upon the physical characters of the gullies and the valleys down which the drifted materials have been carried, and upon the varying force of the water-power that at different times and in different places has been brought to bear upon this shingle, sand, and mud. Thus in the creeks the deposits in their channels are richest at points where the stream has been impeded in its course either by frequent sinuosities or by being crossed by a bar of rock; this holds good with the deserted channels of streams also. When auriferous clays and gravels occur in the dry gullies descending from the higher ranges, the richest deposits are always found in the ancient channel or bed of the gully, often occupying a very narrow area; but when these gullies contract at their junction with the larger valleys, the auriferous clays are often continued up the sides of the enclosing hills, even to their crests, and the distribution of the beds and of the gold is very variable under these circumstances, as though the beds had been here deposited by means of strong conflicting eddies and currents. It appears that, with regard to Victoria, the gold has been arrested in the small mountain-ravines and gullies, and was not washed down to the larger streams. Auriferous sands in river banks, or in alluvial plains of the low lands, are unknown in this colony. The methods of working the gold-bearing alluvia, either at the surface or by pits and 'holes,' vary of course according to the depth to be attained and the means at the command of the miners. The methods of separating the gold from the gravels and clays are the same as those used elsewhere in New South Wales and California. Thus far we are indebted to Mr. Wathen's paper on the gold-fields of Victoria for our information respecting this extraordinary locality. The president of the Melbourne chamber of commerce, in his anniversary address in 1852, says: "Around Mount A. the diggings present much the same geological features as those presented at Ballarat. In most places where gold has been found throughout the world, it is met with either imbedded in or associated with the older rocks. The quartz, one of those ancient formations of our earth, appears to be the prevailing matrix in this colony. The precious metal, in a variety of forms and dimensions, is found either in or near the masses of quartz rock that frequently obtrude upon the surface, or it is mixed with and subjacent to quartz in another form, namely, that of the gravel, into which, by water-wearing and other accidents of time, the masses of the rock have been reduced. As compared with most gold in the native state, that from Ballarat and Mount A. is remarkably pure and dense. In general it appears to be even purer than standard gold. Standard gold is gold artificially blended with certain other metals to render it harder for purposes of coinage, and made, in technical phraseology, '22 carats fine,' 24 carats being, by custom and for convenience in comparison, taken as the representation of pure gold. The greatest density of gold is 19·3 to water as 1. The usual density of native gold varies from about 13 to 17½. That of the Victoria gold is generally towards the higher of these numbers. Some difference has arisen as to the party entitled to claim the merit of this grand discovery. Mr. Hargreaves, and the Rev. W. B. Clarke, have both asserted their claims. The latter stands forth as a man of science, who during the last ten years has repeatedly intimated to the world the auriferous character of this country. But as regards practical effect, there will ever be a wide difference between the mere scientific intimation of the existence of gold and the announcement of an available gold-field. The intrinsic merits of individuals are another consideration. Government, recognising such a distinction, have presented Mr. Hargreaves with a pecuniary reward; and his name is undoubtedly to be associated with the discovery of commercial gold-fields in these colonies, and with the important consequences that must result from this circumstance to the destinies of Australia."

In March 1852, according to Mr. Latrobe, the pop. scattered over the surface of the country in the Mount A. district, or thickly congregated at various points within an area of 10 or 15 sq. m., could not then be estimated at less than 30,000, including men, women, and children, and since that time it has been almost doubled. The yield of the Mount A. gold fields was estimated at 2 tons more or less a-week at that time, despite the partial failure of water, and the additional labour consequently entailed on the miners. The character of the workings, comparatively superficial in the first instance, had in some places changed considerably, many parties mining 30 or 40 ft. below the surface with great profit; the whole of the mining operations, however, were characterised as slovenly and wasteful in the extreme. The largest yield which had come officially to his knowledge within the month of January 1852 was 28 lbs. of gold obtained by four men in a single day; but in the course of that month a piece of solid gold of 27½ lbs. weight, with only a few minute quartz pebbles embedded in the hollows, was brought down and exhibited in Melbourne. At that time the field had become the general rendezvous of a mixed multitude among whom the expiree pop. of Van Diemen's Land, returned Californians, and the most profligate portion of Victoria and the adjacent colonies, had become broadly conspicuous. The health of the crowd at Mount A., despite the habits of the pop., the unwonted style of living, the indifferent accommodation, and the heat of the season, was upon the whole good in 1851. Low fever, dysentery, and inflammation of the eyes had been common, but no disease of an epidemic and more serious character had prevailed. In a subsequent despatch on the 10th of April 1852, Mr. Latrobe states that the protracted dryness of the season had for the time broken up some of the larger assemblies of adventurers in the Mount A. district, and scattered them far and wide over a far larger tract of country than formerly. The yield of the gold field at Ballarat was then but moderate, although the pop. had increased; that at Mount A., notwithstanding a check from the failure of water, remained pretty much the same as before reported, whilst the works at Bendigo creek and other localities in that quarter were decidedly taking the lead. "To give any accurate idea of the appearance of the diggings," says the special commissioner of the *Melbourne Argus*, "would be next to impossible. Situated in the heart of a rather densely timbered country, the town resident would on his arrival naturally anticipate seeing long ranges of snow-white tents crowded together, or picturesquely grouped in a scene of delightful verdure, the long tangled grass forming a living carpet under his feet, and cool umbrageous shrubs interspersed around. How different, however, is the reality from the picture thus drawn by fancy! The road which winds along the creek through the diggings is, from the constant traffic, ten times more dusty than even dusty Melbourne; and the heavy gusts of wind, which pour through the valleys with great violence, whirl it up in clouds, and scatter it far and near upon everything around. The newly erected tent does not therefore long retain its brilliant whiteness; a few blasts powder it effectually, and give it the same sombre, indescribable, dusty hue that distinguishes its neighbours, and soon take off its freshness. In the same way, such trees as have escaped the axe are dusted to an unnatural brownness, and look more like the desperate attempts at vegetation made by the stunted shrubs of a Hackney roadside villa than the giant growth of an Australian forest. Even off the road, the earth is so trodden and worn by the thousands of feet that are constantly passing and re-passing, that not the faintest sign of verdure remains upon the ground, all being bare and dusty; while on the S side of the creek the hills are so pierced, and the subsoil so tossed and tumbled about upon their face, that they look like nothing but gravel or chalk pits and stone quarries. When to this is also added the constant feeding of the innumerable horses which throng the diggings, eating off the grass on the few hills which have not been ransacked, and even cropping the shoots of the few shrubs that grow amongst the roots, baring them of every particle of verdure, and the rude rough look of the jagged rocks which protrude from the bare surface, anything but a refreshing picture meets the eye. In fact, the very first sight of the Forest creek gives to the traveller a very distinct impression of the parching aridity which now prevails. I have said that the ranges were heavily timbered; but in this I wish to be understood to allude to the quantity rather than to the size of the timber, there being but very few trees of more than 3 ft. diam., and these only on the flats of the creek, being principally spotted gum and bastard box. The majority of the stringy bark, which is the prevailing timber of the hills, range from 10 to 14 inches through, and having their outside bark blackened by the action of frequent fires, form a sombre background to what is now anything but a lively picture."

MOUNT-ANY, a village in Pittsylvania co., in Virginia, U. S., 145 m. SW by W of Richmond.—Also a village in Surrey co., in N Carolina.

MOUNT-BARKER. See BARKER.

MOUNT-BELLEW, a village in the p. of Moylough, co. Galway, 3 m. NNE of Castle-Blakeney. Pop. in 1841, 335.—There is a series of bogs in the NW and SW vicinity of the v., around the sources and head-streams of the rivulet Shivon, comprising an area of 1,939 acres.

MOUNT-BETHEL, a township of Northampton co., Pennsylvania, U. S., 123 m. ENE of Harrisburg.—Also a village in Newbury district, in S. Carolina.

MOUNT-BOLUS, a village in the p. of Killoughy, 3¼ m. ENE of Frankford, King's co. Pop. 186.

MOUNT-BULKA, one of the highest mountains in the Australian Alps. Estimated alt. 8,000 ft.

MOUNT-CAPE. See CAPE-MOUNT.

MOUNT-CARMEL, a township of Randolph co., in Virginia, U. S.—Also a village in Clermont co., in Ohio.—Also the cap. of Wabash co., in Illinois, 166 m. SE of Springfield. Pop. 1,200.

MOUNT-CHARLES, a village in the p. of Inver, co. Donegal, on the N sea-board of the upper part of Donegal bay, 3 m. E of Inver. It gives the title of Viscount to the Marquis of Conyngham. Pop. 539.

MOUNT-CLEMENS, a village of Macomb co., in Michigan, U. S., 18 m. NE of Detroit.

MOUNTCOIN, or MOONCOIN, a village in the p. of Poleroan, co. Kilkenny, 3 furl. SW of Ballytarsna. Pop. in 1831, 495; in 1841, 629.

MOUNT-DESERT, an island and township on the coast of Maine, U. S., in Hancock co. It is 15 m. long and 12 m. broad; and is situated between Frenchman's and Bluehill bays. Pop. 1,887.

MOUNT-DILLY, a hill on the Malabar coast of Hindostan, in N lat. 12° 1′. It is separated from the continent by a narrow arm of the sea, and forms a promontory useful to navigators.

MOUNT-EGMONT. See EGMONT.

MOUNT-EDGECOMBE. See EDGECOMBE.

MOUNT-ELLIOT, an island of E. Australia, at the mouth of the Hawkesbury.

MOUNT-ELLIOT. See ELLIOT (MOUNT).

MOUNTFIELD, a parish in Sussex, 3 m. N by W of Battle. Area 2,740 acres. Pop. in 1841, 601.

MOUNT-GARRET, a lofty hill in the p. of St. Mary, co. Wexford, overhanging the E side of the river Barrow, 1 m. N of the town of New Ross. It gives the title of Viscount, in the peerage of Ireland, to the second eldest branch of the house of Butler.

MOUNT-GEORGE, a conspicuous hill on the coast of Arctic Victoria land, about 2 leagues inland from Cape Franklin.

MOUNT-FELIX, a lofty cape at the entrance of the Arabian gulf, 40 m. WNW of Cape Guardafui.

MOUNT-HOLLY, the capital of Burlington co., New Jersey, U. S., near Rancocus creek, 18 m. S of Trenton. It is a flourishing town.—Also a township of Rutland co., in Virginia, U. S., 79 m. S of Montpellier. Pop. 1,356.

MOUNT-HOOD, a mountain of Oregon, in N lat. 44° 30′, reputed to be the highest summit in North America, having an alt. of 18,361 ft. above sea-level, according to the approximative estimate of Messrs. Travallot and Hallar, who ascended it in 1854. These gentlemen commenced their ascent by its SE declivity, along a narrow natural dike, having Dog river on one side, and a tributary of the Falls river on the other. Attaining the SE summit, they found it of a narrow crescent-like form, opening towards the SW. The principal summit is composed of a succession of cones, from 20 to 50 ft. high, and small craters of a diam. varying from 3 inches to 2 ft., which sent forth a smoke strongly impregnated with sulphur. The party report that they saw Mounts Jefferson, St. Helena, Rainier, and Adams from the summit, and even Fremont's Peak and Mount Shaste in California! On the W their view was bounded by the coast chain; on the SSE by the Sierra Nevada; on the E by the Blue and the Rocky mountains. The summit is composed of black and red granite and lava.

MOUNT-HOPE, a mountain in S. Australia, in about 36° 10′ S lat., and 144° 20′ E long. It is the W extremity of a granitic range extending to the SE.—Also a hill of Australia Felix, to the SW of Goulburn river, in S lat. 35° 52′. It is of singular shape, and was discovered by Mitchell in 1836.

MOUNT-ITAMO, a remarkable double-topped peak, on the N frontier of Greece, E of the Mongari river. Alt. 5,789 ft.

MOUNT-JACKSON, a village of Beaver co., in the state of Pennsylvania, U. S., 239 m. N of Harrisburg, on Hickory creek, 3 m. W of Mahoning river. Pop. in 1840, 300.—Also a village of Shenandoah co., in the state of Virginia, 146 m. NW of Richmond. Pop. 30.

MOUNT-JOY, a township of Adams co., in the state of Pennsylvania, 6 m. S of Gettysburg. It has a level surface, and is bounded on the W by Rock creek, and on the E by Willoways creek. Pop. in 1840, 1,031.—Also a township of Lancaster co., in the state of Pennsylvania, 25 m. SE of Harrisburg. It has a hilly surface, and is bounded on the E by Chiques creek and on the NW by Conewago creek. The soil consists of calcareous loam, red shale, and gravel. Pop. 2,375.

MOUNT-LEINSTER, the N part of the Blackstairs and Mount-Leinster range of mountains, on the mutual border of the cos. of Carlow and Wexford, Leinster. The loftiest summit, or Mount-L. proper, is situated 5½ m. ENE of Borris, and has an alt. of 2,610 ft. above sea-level.

MOUNT-LIBERTY, a village of Liberty township, Knox co., in the state of Ohio, U. S., 41 m. NE of Columbus, consisting in 1840 of about 15 dwellings.

MOUNT-LINDESAY, a mountain-summit in New South Wales, about 60 m. SSW of Moreton bay. Alt. 4,750 ft. above the surrounding plain, which is 953 ft. above sea-level: total, 5,700 ft.

MOUNT-LOFTY. See LOFTY (MOUNT).

MOUNT-LUCAS, a bog in King's co., S and SE of Philipstown, and the Grand Canal. Area 6,582 acres. Its highest point lies 30 ft. below the summit level of the Grand Canal, and 294 ft. above high-water level in Dublin.

MOUNT-MACEDON, a summit of Australia Felix, on the confines of the co. of Bourke, forming with Mounts Campbell and Byng the figure of a triangle. It has an alt. of 3,000 ft. above sea-level, and is covered with trees to the summit.

MOUNT-MARCY, a summit of the state of New York, U. S., in Keene township, Essex co., in the range of the Adirondach mountains. It has an alt. of 5,467 ft. above sea-level.

MOUNT-MELLERAY, an establishment of Monks of La Trappe, in the p. of Lismore and Mocollop, co. Waterford. It is situated on high ground, among the S declivities of the Knockmeledown mountains, 3 m. N of Cappoquin, a little W of the mountain-road from that town to Cahir. In 1831, when the monks of La Trappe were dispersed by the French government, about 50 of them, all of Irish or English birth, came to Ireland, and obtained from Sir Richard Keane, at a nominal rent, and for a period of 99 years, a tract of 575 acres of brown, heathy, stony, waste mountain-ground. Their land was emphatically a useless and barren waste; and, besides being poor and excessively churlish in soil, it was so exceedingly stony that, in breaking it up, a dozen men required to go before each plough to pick up the stones. Two summits immediately on its E and N sides have alts. above sea-level of respectively 1,003 and 1,096 ft.; and the bed of a stream about 1 m. below the centre of the establishment has an elevation above sea-level of 325 ft. Yet, in spite of the extraordinary disadvantageousness of the ground, about 250 acres of it are now reclaimed, and either yield abundant crops or produce sweet grass, and very superior butter. The monks have also planted a considerable extent of wood. Their buildings, comprising a chapel, a dormitory, a refectory, and numerous farm-offices, are constructed of the stones which were picked off the land. The chapel is 160 ft. long, with a steeple about 170 ft. high. The monks, about 70 in number, make their own butter and bread, and subsist wholly on these and on vegetables; they rise every morning at 2 o'clock, eat only two meals in the day, and maintain constant silence in one another's presence. They wear a white cloth robe, and over this a black cape, with long ends reaching to the feet, and a pointed hood of the same dark hue.

MOUNTMELLICK, a post and market town, partly in the p. of Ardea, but chiefly in the p. of Rosenallis, Queen's co., on the Owenass rivulet, at the W terminus of the Portarlington branch of the Grand Canal, 3 m. ESE of Rosenallis. The town has a neat appearance, and presents indications of being the seat of a comparatively large amount of trade. A community of Quakers, who have long been settled in the town, carry on cotton-spinning and various departments of trade, maintain a large school for the educating of the children of the poor

and are distinguished for their general promotion of industry and of moral improvement. Among the town's appliances of manufactures and general productive industry, are a woollen factory, an iron and brass foundry, a machine manufactory, a tan-yard, a distillery, and breweries, corn-mills, soap-houses, and potteries. Considerable quantities of manufactured goods, and especially of agricultural produce, are conveyed along the Mountmellick and Portarlington branch of the Grand Canal. Area of the Rosenallis section of the town, 163 acres; of the Ardea section, 58 acres. Pop. of the whole, in 1831, 4,577; in 1841, 4,755.

MOUNT-MERIDAN, a village of Augusta co., in the state of Virginia, U. S., 125 m. WNW of Richmond, consisting, in 1840, of 10 dwellings.—Also a village of Putnam co., in the state of Indiana, 36 m. W by S of Indianapolis, on the National Road.

MOUNT-MORRIS, a township of Livingston co., in the state of New York, 10 m. S of Genesee, and 242 m. W of Albany. It rises in the centre to a high table-land, and is drained by Genesee river. Pop. in 1840, 4,576.—Also a village of Whately township, Greene co., in the state of Pennsylvania, 228 m. W by S of Harrisburg, on the S side of Dunkard's creek.

MOUNT-MURRAY, a mountain of New South Wales, in the co. of Murray. It rises to a great height, and is usually covered with snow.

MOUNTNESSING, a parish in Essex, 2 m. S of Ingatestone, on a branch of the Wid. Area 1,940 acres. Pop. in 1831, 796; in 1841, 925.

MOUNT-NICHOLSON, a summit of N. Australia, in Expedition range. It lies in about 24° 52′ 30″ S lat., and forms an excellent landmark. It was discovered by Dr. Leichhardt.

MOUNT-NORRIS, or Fort-Norris, a village in the p. of Loughgilly, co. Armagh, 3½ m. SSE of Markethill. Pop. in 1841, 132.

MOUNT-NUGENT, a post-village in the p. of Kilbride, co. Cavan, 3¾ m. SSW of Ballyjamesduff. Pop. in 1831, 171; in 1841, 162.

MOUNTON, a parish in the co. of Monmouth, 1¾ m. WSW of Chepstow, on a small stream which flows into the Bristol channel, at the mouth of the Severn. Area 380 acres. Pop. in 1831, 58; in 1841, 76.—Also a parish in Pembroke, 2 m. SW of Narberth. Pop. in 1831, 41; in 1841, 38.

MOUNT-PLEASANT, a parish in the co. of Bathurst, New South Wales, bounded on the N by Macquarie river.

MOUNT-PLEASANT, a township of Westchester co., in the state of New York, U. S., 6 m. N of White Plains, and 125 m. S of Albany. The surface is hilly, and the soil fertile and well-cultivated. It contains marble of good quality. Pop. in 1840, 7,367.—Also a village of Alexandria township, Hunterdown co., in the state of New Jersey, 38 m. N by W of Trenton, on Hakehokake creek. Pop. about 60.—Also a town of Tioga co., in the state of Pennsylvania. Pop. 554.—Also a township of Adams co., in the same state, 170 m. W of Harrisburg. It has a hilly surface, and is drained by Sewickly and Jacobs creeks. The soil consists of loam and gravel. Pop. 2,123. It contains a village with about 554 inhabitants.—Also a township of Columbia co., in the same state. Pop. 609.—Also a township of Wayne co., in the same state, drained by the head-branches of Lackawaxen, Dyberry, and Great Equinunk creeks. Pop. 1,359.—Also a township of Washington co., in the same state. Pop. 1,203.—Also a village of Monroe co., in the state of Alabama, 156 m. S of Tuscaloosa, on a small stream, 3 m. E of Alabama river.—Also a township of Jefferson co., in the state of Ohio, 131 m. E by N of Columbus. Pop. 1,676. It contains a village with about 700 inhabitants.—Also a village of Harlan co., in the state of Kentucky, 165 m. SE of Frankfort, on the N side of the Clover fork of Cumberland river, near its junction with Martin's Fork.—Also a village of Martin co., in the state of Indiana, 106 m. SSW of Indianapolis, on the W side of the E fork of White river. Pop. about 150.—Also a township of Van Buren co., in the state of Missouri. Pop. 694.—Also a township of Barry co., in the state of Missouri, 212 m. SW of Jefferson city. Pop. 519.—Also a village of Henry co., in the state of Iowa, on the N side of Big creek. Pop. about 400.—Also a village of Racine co., in the state of Wisconsin, 106 m. ESE of Madison, about 8 m. W of Lake Michigan.—Also a village in Titus co., in Texas, in N lat. 33° 15′, W long. 95° 00′.—Also a village in the township of Brentford, in Upper Canada.

MOUNT P. P. KING, a volcano of North Australia, in S lat. 25° 9′ 10″, and E long. 147° 37′ 40″.

MOUNTRATH, a market-town in the p. of Clonenagh, Queen's co., on a small affluent of the Nore, 6¼ m. NE of Borris-in-Ossory. Its public buildings are a handsome parish-church; a large Roman Catholic chapel; a monastery of the order of St. Patrick, and a classical school superintended by the monks; a Bridgetine nunnery, with two attached schools for respectively the children of the poor and the children of the higher classes; a large schoolhouse; a court-house and a bridewell, erected since 1838; and a respectably edificed market-house. The principal existing appliances of manufacture and trade are some looms for cotton and worsted fabrics, an oil-mill, a malt-house, an extensive brewery, and a large weekly market. Charles, eldest son of Sir Charles Coote, acquired from the Commonwealth grants of land to an unexampled extent, and was created Earl of Mountrath in 1660; but the title became extinct on the decease of Charles-Henry, the seventh earl, in 1802. Pop. in 1831, 2,593; in 1841, 3,000.

MOUNTS-BAY, an extensive bay in the English channel, near Penzance, Cornwall. It derives its name from St. Michael's Mount, which stands in the bay near Marazion. There is reason to believe that at one time the channel of this bay was beyond sea-mark, and covered with wood. The towns of Penzance and Marazion are situated in this bay, which is much used as a safe and spacious harbour in NNE and E winds. A breakwater was recently proposed to be erected in this bay for the protection of shipping, the estimated expense of which was £230,995.

MOUNT-SEWARD, a group of mountains, in the state of New York, in the SE part of Franklin co., in the range of the Adirondack mountains. They have an alt. of 4,000 ft. above sea-level.

MOUNT-SHANCK, a volcanic mountain near the coast of Discovery bay, in SE. Australia, in about S lat. 37° 55′, E long. 140° 50′, which attains an alt. of 900 ft. above sea-level. It has three distinct craters. Mount-William, the highest point in the range of mountains which form the chief physical feature in the SE angle of Australia, Dr. Lhotsky states that the temp. of boiling-water on the summit was 196°, indicating an elevation of about 8,200 ft. above the level of the sea.—Also a mountain on the newly discovered Antarctic continent, in S lat. 64° 45′, W long. 53° 51′.

MOUNT-SHANNON, a village in the p. of Inniscaltra, co. Galway, on the road from Scariff to Portumna, 4 m. NE by E of Scariff, on the shore of Lough Derg, nearly opposite Inniscaltra island, and at the base of Knockeven, whose summit soars to the alt. of 1,242 ft. above sea-level. Pop. 361.

MOUNT-SIDNEY, a village of Augusta co., in the state of Virginia, 127 m. WNW of Richmond. Pop. in 1840, 200.

MOUNT-SORREL, a chapelry and market-town, partly in Rothley p., but chiefly in that of Barrow-upon-Soar, Leicestershire, 7 m. N by W of Leicester,

a little to the W of the Midland Counties railway. Area 680 acres. Pop. in 1801, 1,233; in 1831, 1,602; in 1841, 1,536. The town is situated on a steep hill rising from the river Soar, over which there is here a bridge. Many of the houses are built of a remarkably hard stone found in the vicinity, the quarrying of which affords employment to a number of the inhabitants. The inhabitants are chiefly employed in hosiery and frame-work knitting.

MOUNT-STERLING, a village of Muskingum co., in the state of Ohio. Pop. in 1840, 177.—Also a village of Montgomery co., in the state of Kentucky, 59 m. E of Frankfort, on a small branch of the S fork of Licking river. Pop. 585.—Also a village of Brown co., in the state of Illinois, 77 m. W by N of Springfield, on a small branch of Crooked creek.—Also a township of Pettis co., in the state of Missouri. Pop. 1,246.—Also a village of Washington co., in the state of Alabama, 109 m. SSW of Tuscaloosa, on the N side of Schuckeba river.

MOUNT-TABOR, a township of Rutland co., in the state of Vermont, U. S., 36 m. NE of Bennington. It is situated in the Green mountain-range, but has some good soil. Pop. in 1840, 227.—Also a village of Monroe co., in the state of Indiana, 45 m. SSW of Indianapolis, on the N side of Bean-Blossom creek.

MOUNT-TALBOT, a village in the p. of Tisrara, co. Roscommon, on the river Suck, 2¾ m. SSW of Athleague. The Suck is here about 240 ft. broad, and is spanned by a bridge of 12 arches.

MOUNT-TOM, a summit of the state of Massachusetts, U. S., a little to the W of Connecticut river.

MOUNT-UPTON, a village of Guilford township, Chenango co., in the state of New York, U. S., 99 m. W of Albany, on the W side of Unadilla river. Pop. 225.

MOUNT-VERNON, a township of Kennebec co., in the state of Maine, U. S., 15 m. NW of Augusta. Pop. 1,471.—Also a township of Hillsboro co., in the state of New Hampshire, 32 m. SSW of Concord. It has an elevated surface, and is drained by a branch of Souhegan river. Pop. 720.—Also a village of Montgomery co., in the state of Georgia, 112 m. SE by S of Milledgeville.—Also a v. of Mobile co., in the state of Alabama, 184 m. S by W of Tuscaloosa, and 3 m. W of the Mobile river.—Also a v. of St. Francis co., in the state of Arkansas.—Also a v. of Rock Castle co., in the state of Kentucky, 75 m. SSE of Frankfort.—Also a v. of Knox co., in the state of Ohio, 51 m. NE of Columbus, on Vernon river, or Owl creek. Pop. 2,362.—Also a v. of Posey co., in the state of Indiana, 188 m. SW by S of Indianapolis, on a high bank on a bend in the Ohio river. Pop. 900.—Also a village of Jefferson co., in state of Illinois, 129 m. SSE of Springfield. Pop. 200.

MOUNTVILLE, a village of London co., in the state of Virginia, U. S., 139 m. N of Richmond. Pop. in 1840, 80.

MOUNT-VISION, a village of Laurens township, Oswego co., in the state of New York, U. S., 79 m. W of Albany. Pop. in 1840, 20.

MOUNT-WASHINGTON, a township of Berks co., in the state of Massachusetts, U. S. It is intersected by the Taghkanic range, the principal summit of which has an alt. of 3,000 ft. above sea-level. Pop. in 1840, 438.—Also a v. of Bullet co., in the state of Kentucky, 59 m. WSW of Frankfort, 2 m. NE of Salt river. Pop. about 300.—Also a v. of Copiah co., in the state of Mississippi, 43 m. SSW of Jackson, on a branch of Bayou Pierre river.

MOUNT-WEDGE, a summit of Tasmania, at the head of the river Boyd, in S lat. 42° 48′, E long. 146° 22′.

MOUNT-WILLING, a village of Edgefield district, in the state of South Carolina, U. S., 41 m. W of Columbia, on a branch of Little Saluda river.—Also a v. of Lowndes co., in the state of Alabama, 120 m. SSE of Tuscaloosa, on Cedar creek.

MOUNT-WINGEN, a burning mountain of Australia, on the SE side of the dividing range between Hunter's river and the Liverpool plains, in S lat. 31° 54′, E long. 150° 56′.

MOUNT ZION, a village of Hancock co., in the state of Georgia, U. S., 30 m. NE of Milledgeville. Pop. in 1840, 100.

MOUR, a village of Nubia, 180 m. W of Syene.

MOURA, a town of Portugal, in the prov. of Alemtejo, near the l. bank of the Guadiana, 34 m. SSE of Evora. Pop. 4,000. It has a strong castle. Its public buildings are two parish churches, several convents, and an hospital.

MOURAFA, a town of Russia, in the gov. of Podolia, 52 m. N of Jampol.

MOURAO, a fortified town of Portugal, in the prov. of Alemtejo, near the Guadiana, 18 m. NNE of Moura, 29 m. SE of Evora. It stands on a hill, in a rugged but fertile district.

MOURASHKMO, a town of Russia, in the gov. and 52 m. SE of Nijni-Novgorod. Pop. 6,000. It has manufactories of soap, gloves, and jewellery.

MOURI, a town on the Gold coast of Africa, 5 m. NE of Cape Coast castle.—Also a village of Futa-Dialon, in W. Africa, 66 m. W of Labbe.

MOURIES, a commune and village of France, in the dep. of Bouches-du-Rhone, 6 m. SSE of St. Remy. Pop. 1,850.

MOURNE, a river of co. Tyrone, formed by the confluence of the Moyle and the Strule. It runs 8 m. NNW to unite with the Finn in forming the Foyle at Lifford. It receives the Derg on its l. bank, 2 m. below Newtown-Stewart.—Also a grand congeries of mountains in co. Down, occupying an area of 11½ m. from E to W, by 9½ m. from N to S. On the E side they immediately and stupendously overhang the Irish sea, and on the S sublimely screen the N side of Lough Strangford. One road runs round their sea-base from Rostrevor to Newcastle, a distance of 18 m.; and two run across them from Hilltown to respectively Kilkeel and Rostrevor. Their principal summits, together with their respective alts. above sea-level, are, in an order from N to S, Slievenaman, 1,053; Hen mountain, 1,187; Cock mountain, 1,667; Butter mountain, 2,137; Slievebeg, 2,384; Slievemore, 2,443; Slieve-Donard, 2,796; Pigeon rock, 1,735; Slievemuck, 2,198; Slievenaglogh, 1,450; Slieve-Bingan, 2,449; Eagle mountain, 2,081; Finlieve, 1,868; a height behind Kilkeel, 1,013; and Slievebane, 1,595 ft. See articles Rostrevor, Carlingford, and Down.—Also a lake in the p. and co. of Carrickfergus, 3 m. N of the town of Carrickfergus, co. Antrim, on the summit of an eminence about 500 ft. above the level of the sea. It is about 1 m. in diam.—Also a lake in co. Donegal, about 1¼ m. in length, 1¾ m. NNE of the Gap of Barnesmore.

MOURNE-ABBEY, or Temple-Michael, a parish of co. Cork, 3 m. S by W of Mallow. Area 11,436 acres. Pop. in 1831, 4,148; in 1841, 4,154.

MOURNEBEG, a rivulet of co. Donegal, issuing from Lough Mourne, a little N of the Gap of Barnesmore, and running in an ESE course of 9½ m. to the river Derg, at a point 1¾ m. above the v. of Castle-Derg.

MOUROM, a town of Russia, in the gov. and 72 m. ESE of Vladimir, on the l. bank of the Oka. It is an ancient town; and has a cathedral, and several public edifices, besides a Kremlin or citadel. It carries on a considerable commerce by means of the Oka, which connects it with the Volga.

MOURON, a village of France, in the dep. of Nievre, 21 m. SE of Clamecy.

MOUROUX, a town of France, in the dep. of Seine-et-Marne, cant. and 2 m. WNW of Coulommiers, on the r. bank of the Grand-Morin. Pop. 2,200.

MOURTASA, a lake of Russia, in the prov. of Bessarabia, 36 m. SW of Akermann. It discharges itself, by a stream issuing from its SW side, into Lake Sasik.

MOURZUK, or Murzuk, the capital of the African state of Fezzan, in N lat. 25° 54′, E long. 14° 12′. Pop. 3,500. It is one of the greatest seats of the inland commerce of the African continent, and the rendezvous of most of the caravan-intercourse which takes place between its northern and eastern regions. It keeps up the communication of Egypt and Tripoli on the one hand, with Bornu and Cassina on the other. A caravan occupies from 24 to 30 days between M. and Tripoli. M. is surrounded with a high wall, making a circuit of 3 m., but constructed less for purposes of defence than for levying duties upon all commodities which enter the city: these duties forming a large part of the revenue of the sovereign. The town itself chiefly consists of one large broad street, and several smaller narrow ones. On the W side is the castle of the bashaw, consisting of several buildings, court-yards, and barracks. The garrison consists of 550 men, officered by Turks. M. appears to have been anciently built of stone, and still retains the appellation of a Christian town. It presents to the eye a strange and grotesque medley of the vast ruins of ancient buildings, with cottages of earth and sand, or of sun-dried bricks, which form the miserable dwellings of its present Arab inhabitants. A small river passes its walls, and it is well supplied with water from numerous springs. The suburbs present considerable cultivation: wheat, barley, flax, and dates are the principal articles of cultivation. Intermittent fever and ague prevail in and around it. Richardson pronounces it to be "a sink of vice and disease within, and sere foliage of palms and vegetation without, overhung with an ever-forbidding sky of dull red haziness."

MOUSA, one of the smaller Shetland isles, in N lat. 60° 24′.

MOUSAC, a town of France, in the dep. of Haute-Garonne, near Castel-Sarrazin.

MOUSAR, a village of Laristan, in Persia, 48 m. NW of Lar.

MOUSE, a small river of Lanarkshire, which, after a circuitous course, falls into the Clyde at Lanark bridge.

MOUSE-HARBOUR, a harbour on the E coast of the island of St. John, in the gulf of St. Lawrence.

MOUSEWALD, a parish of Dumfries-shire, between 4 and 5 m. in length, and 2 m. in breadth. Pop. 683.

MOUSH. See Mush.

MOUSSAC-SUR-VIENNE, a village of France, in the dep. of La-Vienne, 15 m. SW of Montmorillon. Pop. 1,000.

MOUSSYRE. See Egatko.

MOUSTER, a village of France, in the dep. of La-Vienne.

MOUTA, a town of Portugal, in the prov. of Estremadura, comarca and 12 m. N of Setubal. Pop. 1,300.

MOUTAHORA, a small lofty island in the Pacific ocean, near the E coast of the Middle island, New Zealand, in S lat. 37° 59′.

MOUTERHAUSEN, a village of France, in the dep. of La-Moselle, cant. and 4 m. S of Bitche, on the Moder. It is the seat of very extensive iron-works.

MOUTHE, a town of France, dep. of the Doubs, on the Bief, 13 m. SW of Pontarlier. Pop. 1,044.

MOUTHIER-MALIARD, a commune and village of France, in the dep. of Creuse, cant. of Bonnat, 18 m. N of Guéret. Pop. 1,797.

MOUTIERS, or Moustiers, a town of France, in the dep. of Basses-Alps, 15 m. S of Digne. It has celebrated manufactories of porcelain.—Also a village of France, dep. of Doubs, cant. of Ornans, 22 m. SE of Besançon.

MOUTIERS-AU-PERCHE, a town of France, in the dep. of Orne, cant. of Remalard, 16 m. ESE of Mortagne-sur-Huine. Pop. 1,589.

MOUTIERS-EN-TARANTAISE, a town of the Sardinian states, in Savoy, the chief place of the district of Tarantaise. It is situated on the Isere, where it is joined by the small river Doron, at an alt. of 643 yds. above sea-level, 28 m. SE of Chambery; and though not fortified, the approaches to it are extremely difficult, the road passing through narrow defiles on the sides of precipices. Pop. 2,000. Near the town there is a considerable salt-work, supplied by springs of the temp. of 99°, which rise at the bottom of a limestone-rock in the deep gorge of the Doron; salt is dug also from the neighbouring mountains.

MOUTIER-VENTADOUR (Le), a village of France, in the dep. of Corrèze, cant. and 3 m. ESE of Egletons. Pop. 725.

MOUTNI, a deltoid branch of the Sata branch of the Indus.

MOUTZA, a town of Ava, 22 m. NW of Umerapura, in N lat. 22° 3′.

MOUVAUX, a village of France, in the dep. of Nord, 6 m. NE of Lille. Pop. 1,500.

MOUX, a village of France, in the dep. of Nievre, cant. and 7 m. SE of Montsauche. Pop. 1,370.

MOUY, a town of France, in the dep. of the Oise, 12 m. SE of Beauvais. Pop. 2,600. It has considerable manufactures of serge.

MOUZANGAIE, a town on the W coast of Madagascar, under the dominion of the Seclaves. It conducts a considerable commerce, chiefly by Arab settlers.

MOUZON, a town of France, in the dep. of the Ardennes, on the r. bank of the Maese, 14 m. NW of Montmedy. Pop. 2,400.

MOVIDDY, a parish in co. Cork, 5¾ m. NNW of Bandon. Area 6,133 acres. Pop. in 1831, 2,718; in 1841, 2,262. The surface is drained by the upper part of the river Bride.

MOVILLE, a town in the p. of Lower Moville, co. Donegal, on the shore of Lough Foyle, 4½ m. SW of Innishowen-head. Pop. in 1841, 595.

MOVILLE (Lower), a parish in co. Donegal, containing the small town of Moville. Area 15,950 acres. Pop. in 1831, 5,785; in 1841, 6,016. The coast extends from the town of M., round Innishowen-head, to the head of Tramore-bay. Craignamaddy, near the centre, is the highest ground, and has an alt. of 1,054 ft. above sea-level.

MOVILLE (Upper), a parish on the coast of co. Donegal. Area 19,081 acres. Pop. in 1831, 4,902; in 1841, 5,069. It contains the village of Carrowkeel, on the shore of Lough-Foyle; and extends thence to the immediate vicinity of the town of Moville.

MOW, a town of Hindostan, in the prov. of Allahabad, 53 m. NE of Benares.—Also a town in the prov. of Malwah, 10 m. S of Indore, in N lat. 22° 33′, E long. 75° 50′, at an alt. of 2,009 ft. above sea-level. It is a military cantonment of importance.—Also a town in the prov. of Allahabad, on the W

bank of the Surjew river, celebrated for its manufacture of cottons.

MOWAH, a town of Hindostan, in the prov. of Bahar, 37 m. E of Patna.—Also a town of the Birman empire, in the prov. of Ava, on the N bank of the Irawaddy.

MOWEE. See Maui.

MOWNA-ROA. See Mona-Roa.

MOWNEY, or Mawney, a parish of co. Tipperary, 4¼ m. E of Killenaule. Area 1,521 acres. Pop. in 1841, 428.

MOXHE, a department and commune of Belgium, in the prov. of Liege, and arrond. of Huy, watered by the Mehaigne. Pop. 617.

MOXHERONT, a commune of Belgium, in the prov. of Liege, and dep. of Moxhe. Pop. 249.

MOXHYRY, a commune of Belgium, in the prov. of Liege, and dep. of Avin. Pop. 232.

MOXOS, a subdivision of Bolivia, in the dep. of Santa-Cruz-de-la-Sierra, extending between 12° and 18° S lat., and between 63° and 71° W long., bounded on the N by Peru and Brazil, on the E by Brazil, on the S by the dep. of Chiquitos and Cochabamba, and on the W by the dep. of La Paz, and comprising an area 540 m. in length from E to W, and 240 m. in medium breadth. It is intersected in the S by ramifications of the Andes; in the N it consists chiefly of marshy plains. The principal rivers are the Mamore, which runs N, and joins the Guapore on the confines of Brazil, and forms for some distance the boundary-line between that country and Bolivia, the Ubahy, Magdalena, Brano or San Miguel, on the W, and the Beni. Near the NW confines is Lake Rogagualo. The chief productions of the soil are rice, cotton, cacao, cinnamon, vanilla, &c.; cedar and almond-trees are common. The climate is warm, damp, and unhealthy. The interior is inhabited chiefly by Indians, from a tribe of whom the territory derives its name.

MOXOTO, a river of Brazil, in the prov. of Alagoas, which has its source in the Serra-Araripe; runs S; and, after a course of about 150 m., throws itself into the l. bank of the São-Francisco.

MOY, a river of the cos. of Sligo and Mayo, rising on the S side of the watershed of the Ox mountains. It runs 3 m. ESE, and 10¼ m. SSW, within the co. of Sligo, receiving in its progress the tributes of the Mad river, the Owenaher, and the Lough Talt river; and then proceeds 2¼ m. SW, 8¼ m. WSW, and 15 m. N, to the head of Killala bay. It washes the town of Foxford, and divides the town of Ballina from its suburb of Ardnaree. Its tributaries within Mayo are the Yellow river on the r. bank, and the Sonnah, the Spaddagh, the Guishden, the Clonlee, and the Lough Conn river on the l.; and its chief tributary from the co. of Sligo is the Bunree. It is tidal to Ballina, and navigable to within 1 m. of that town.—Also a market-town in co. Tyrone, on the river Blackwater, 2¾ m. NNE of Benburb. It forms strictly one town with Charlemont, being separated from it only by the Blackwater, and communicating with it by a stone-bridge. Pop. in 1841, 857.

MOY, a canton and commune of France, in the dep. of the Aisne, and arrond. of Saint-Quentin. The cant. comprises 19 coms. Pop. in 1831, 12,741; in 1841, 13,536. The town is 8 m. SSE of Saint-Quentin, and 20 m. NW of Laon. Pop. in 1841, 2,693. It has extensive manufactories of linen and carpets, and has also an active trade in flax, which is cultivated in the environs.

MOY and DALAROSSIE, a parish forming the district of Strathdearn, partly in Nairn-shire, but, as to far the greater part of its extent, in Inverness-shire. Its length from NE to SW is about 30 m.; and its mean breadth is about 5 m. It entirely consists of two glens,—that of the upper part of the river Findhorn, extending from end to end of the p., and constituting its main body,—and that of Loch Moy, and the rivulet Funtack, opening into the S part of the former, and coming down upon it from the NNW. Loch Moy is about 1½ m. long, and a ½ m. broad. The mountain-ranges have tame outlines, and nowhere rise more than 2,500 ft. above sea-level. They consist almost wholly of gneiss and granite. Upwards of 90,000 imperial acres on these heights are either waste ground or sheep-pasture; and about one-fourth of that area is held in common by the tenants of different farms. All the land subject to the plough measures considerably less than 3,000 imperial acres, and probably not more than one-third of this area is under constant or regular tillage. Birch, aspen, and mountain-ash, are indigenous over the whole p., and at one time covered its hills and glens with a continuous sheet of forest. Pop. in 1841, 967.

MOYA, a town of Spain, in New Castile, in the prov. and 48 m. E of Cuenca, and partido of Canete, on a hill. Pop. 1,396. It is the cap. of a marquisate of the same name, and is enclosed by an old wall. It has also the remains of a fort, and contains 6 parish-churches, 3 convents, an hospital, and a public granary. It has manufactories of common woollen fabrics. In the environs are mines of copper and silver.—Also a town of Catalonia, in the prov. and 27 m. N of Barcelona, and partido of Manresa, on a height. Pop. 2,649. It has a parish-church, a convent, and a custom-house; and possesses manufactories of woollen fabrics, a cotton spinning-mill, and distilleries of brandy. This place, the *Mediolanum* of the ancients, was formerly fortified.

MOYACOMB, or Clonegal, a parish, partly in co. Carlow, partly in co. Wexford, and partly in co. Wicklow. The Carlow section contains the v. of Clonegal, and the Wexford section contains the v. of Watch-house. Area of the Carlow section 5,945 acres; of the Wexford section 5,810 acres; of the Wicklow section 5,678 acres. Pop. of the whole in 1831, 4,877; in 1841, 4,933.

MOYAGHER, a parish in co. Meath, 3 m. NE of Athboy. Area 1,362 acres. Pop. in 1831, 565.

MOYALIFFE, or Midliff, a parish in co. Tipperary, 5 m. SW of Thurles. Area 8,021 acres. Pop. in 1841, 3,372.

MOYALLEN, a village in the p. of Tullylish, co. Down, on the river Bann, 1½ m. NNW of Gilford.

MOYAMENSING, a township of Philadelphia co., in the state of Pennsylvania, U. S. Pop. in 1840, 14,573. See Philadelphia.

MOYANNA, a parish in Queen's co., 2¾ m. NNE of the town of Stradbally. Area 6,824 acres. Pop. in 1831, 1,659; in 1841, 1,708.

MOYARTA, or Moyferta, a parish in co. Clare, containing the villages of Carrigaholt, Bellina, Doonaha, and Lisheen. Area 15,613 acres. Pop. in 1831, 7,441; in 1841, 8,697. The Atlantic coast includes the small headlands of Castle-point and Foohagh-point; the Shannon coast, the headlands of Kilcredaun-point and Queerin-point.

MOYAUR, a river of Hindostan, which has its source in the Western Ghauts, between Malabar and Coimbatur, and joins the Bhavani near the v. of Pungaur.

MOYAUX, a village of France, in the dep. of Calvados, cant. and 8 m. ENE of Lisieux. Pop. 1,250.

MOYBOLOGUE, a parish in co. Cavan, 3½ m. S of Bailieborough. Area 6,760 acres. Pop. 3,715.

MOYCARKEY, a parish in co. Tipperary, 3½ m. SSE of Thurles. Area 3,835 acres. Pop. 1,493.

MOYCULLEN, a parish in co. Galway, 5¾ m. NW of Galway. Area 35,824 acres, of which 3,258 acres are in Lough Corrib. Pop. in 1831, 5,695; in

1841, 6,420. Lough Corrib lies on the E boundary; Lough Ross on the N boundary; and Loughs Ballycuerke and Knocka, and a large number of loughlets and ponds, in the interior. The surface-elevation of Lough Corrib above sea-level is 28 ft.; of Ballycuerke lake, 18 ft.; and of Knocka lake, 325 ft.

MOYDART, a territorial district and a marine loch in the SW extremity of Inverness-shire. Its greatest length from E to W is 18 m.; its mean breadth, 7 m. Its coast-line, everywhere irregular, is very deeply indented by pieces of the sea, particularly by Lochs Ailort, Na-Nua, and M. Loch M. is situated on the S boundary, and continues the narrow communication from Loch Shiel outward to the sea. It penetrates 5 m. into the land, but over two-thirds of its length it is split into two channels by the island of Shona.

MOYDOE, or Moydow, a parish in co. Longford, 3¼ m. W of Ardagh. Area 4,626 acres. Pop. 1,919.

MOYEN, a commune of France, in the dep. of the Meurthe, and cant. of Gerbeviller, 10 m. SSE of Luneville. Pop. 1,185.—Also a com. of Belgium, in the prov. of Luxemburg, and dep. of Izel. Pop. 362.

MOYENMOUTIER, a commune of France, in the dep. of the Vosges, cant. and 4 m. SW of Senones, and 8 m. N of Saint Die, on the l. bank of the Ravodoh. Pop. 2,249.

MOYENVIC, a commune and town of France, in the dep. of the Meurthe, cant. and 1½ m. E of Vic, and 4 m. SE of Chateau-Salins, on the l. bank of the Seille. Pop. 1,252. This town was formerly a place of considerable importance. It was ceded to France in 1648 by the treaty of Munster. Its fortifications were dismantled by Louis XIV. At the distance of about 3 m. from the town are extensive salt-works.

MOYENVILLE, a canton, commune, and town of France, in the dep. of the Somme, and arrond. of Abbeville. The cant. comprises 14 coms. Pop. in 1831, 10,504; in 1841, 10,536. The town is 5 m. W of Abbeville, and 30 m. NW of Amiens. Pop. 1,025.

MOYEUVRE-LA-GRANDE, or Moderen-Gross, a commune of France, in the dep. of the Moselle, cant. and 11 m. SW of Thionville, at the confluence of the Couroy and Ornes. Pop. in 1841, 1,578. It has 2 blast-furnaces, 3 fineries, saw-mills, &c. In the vicinity are several iron-mines.

MOYGLARE, a parish in co. Meath, 2¼ m. E of Kilcock. Area 4,558 acres. Pop. in 1841, 363.

MOYLAGH, or Moylough, a parish in co. Meath, 3 m. S by W of Oldcastle. Area 7,457 acres. Pop. in 1831, 2,401; in 1841, 2,769.

MOYLARY, or Mullary, a parish in co. Louth, 2 m. S of Dunleer. Area 3,635 acres. Pop. 1,078.

MOYLE, a river of co. Tyrone, identical with the last 2½ m. of the Monterlony rivulet, or with the portion of that stream which intervenes between the influx of the Glenelly rivulet, and the formation of the Mourne at the confluence of the Struel.

MOYLGROVE, a parish in the co. of Pembroke, 4 m. W of Cardigan. Pop. in 1841, 453.

MOYLISKER, or Molyscar, a parish in co. Westmeath, 3¼ m. S of Mullingar. Area 2,183 acres, of which 457 acres are in Loch Ennel. Pop. in 1831, 255; in 1841, 240.

MOYLOUGH, a parish in co. Galway, containing the villages of Mount-Bellew and Newton-Bellew. Area 23,386 acres. Pop. in 1841, 7,248.

MOYMET, a parish in co. Meath, 2¾ m. NNW of Trim. Area 3,255 acres. Pop. in 1841, 554.

MOYNALTY, or Owenroe, a rivulet of cos. Cavan and Meath. It rises in the vicinity of Bailieborough, and flows SE to the Blackwater at a point 3 m. below the town of Kells. Its length of course is about 13 m.

MOYNALTY, a parish, containing a village of the same name, in co. Meath. Area 12,678 acres. Pop. in 1831, 5,917; in 1841, 6,279. Pop. of the v. in 1831, 220; in 1841, 130.

MOYNALVY, a village in the p. of Kilmore, co. Meath, 2 m. E of Summerhill.

MOYNE, a rivulet in co. Galway, formed by the confluence of the Abbert river with other streams, a little above the celebrated ruin of Abbeyknockmoy. It is noted for performing part of its course below ground; and it runs about 4 m. W to Turloughmore, or the great periodical expansion of the Clare river, at a point 5 m. S of Tuam.—Also one of a series of three bogs, situated on the E side of the Abbert river. Area of bogs, 4,449 acres; height above high-water level of Galway bay, 173⅓ ft.—Also a parish, containing a village of the same name, in co. Tipperary, 4¾ m. NE of Thurles. Area 9,514 acres. Pop. in 1831, 2,224; in 1841, 2,584. The v., near the centre of the p., had a pop. in 1841 of 156.—Also a parish in co. Wicklow, 4 m. E of Hacketstown, Leinster. Area 8,461 acres. Pop. in 1831, 1,175; in 1841, 1,100. Lugnaquilla lifts its soaring summit on the N boundary; and two summits of respectively 1,754 and 1,186 ft. above sea-level, are situated in the interior.

MOYNOE, a parish in co. Clare, 1½ m. E by N of Scariff. Area 9,848 acres, of which 388 acres are in Lough Derg, and 132 acres in Lough Atorick. Pop. in 1831, 1,268; in 1841, 1,475. Lough Atorick, with a surface-elevation of 450 ft. above sea-level, lies on the N boundary; the Corra river rises on the E boundary at an alt. of 837 ft. above sea-level.

MOYNTAGHS, Mointaghs, or Montiaghs-and-Islands, a parish in co. Armagh, 4¼ m. NW of Lurgan, containing the village of Charlestown, and including a large section of the S part of Lough Neagh. Area 18,098 acres, of which 12,178 acres are in Lough Neagh. Pop. in 1831, 2,891; in 1841, 3,480. The surface is all low and flat, and requires to be protected by an embankment from the overflowing of the Bann.

MOYOBAMBA, a river of Peru, in the intendancy of Truxillo, which has its source 45 m. ENE of San-Juan-de-la-Frontera; runs first S, then E; passes Lamas; and 15 m. from that town joins the Huallaga, on the l. bank, and after a course of about 120 m.—Also a town in the intendancy and 210 m. ENE of Truxillo, and prov. of Chacapoyas, 75 m. SE of San-Juan-de-la-Frontera, on a steep plateau, the base of which is washed by the river of the same name. Pop. 5,000. The manufacture of a coarse species of calico, locally named *tucuya*, forms the chief employment of the inhabitants.

MOYON, a commune of France, in the dep. of the Manche, cant. and 4 m. NW of Tessy, and 9 m. S of St. Lo. Pop. 1,469.

MOYRAZES, a commune of France, in the dep. of the Aveyron, cant. and 12 m. W of Rodez, on the l. bank of the Aveyron. Pop. 2,118.

MOYRUS, a parish in co. Galway, containing the v. of Roundstone. Area 101,510 acres, of which 528 acres are in Lough Ina, and 5,942 acres in small lakes. Pop. in 1841, 11,969. Both the interior and the coast contain the larger portion of the most characteristic districts of Cunnemara. All the summits, and most of the declivities of the alpine group of Binabola, are within the N district. Loughs Ina, Derryclare, and Ballinahinch unitedly form a demi-semicircular sweep of lacustrine water round the E and S sides of Binabola; and almost innumerable lakes chequer the other districts of the parish. The principal headlands are Gorteen-point, Earawallapoint, Mace-head, and Ardmore-point; and the principal islands, exclusive of those in Kilkerran bay, are Innismuskerry, Birmore, Birbeg, Horse-rocks,

Finish, Muinish, Mason-Island, Innistraghonmore, Wherroon, Illanamorlaght, St. Macdarra's-Island. Croaghnakeela, Illaunnacroaghmore, Illaunnacroaghbeg, Innisbigger, Freaghillaun, Innislackan, Illaungorn, Illaunagraghnut, Seal-Island, Innisnee, Mutton-Island, and Smotaun.

MOYS, a village in the p. of Tamlaghtfinlagan, co. Londonderry. Pop. in 1841, 161.

MOYUMBUB, a village of the Punjab, on the r. bank of the Ravi, 35 m. SSW of Kott-Kumalia.

MOYVILLY, a rivulet of co. Connaught, which rises 2 or 3 m. S of Monivea, and runs 12 m. SE past Clareenbridge, to the middle of the head of Galway bay.

MOYVORE, or TEMPLEPATRICK, a parish in co. Westmeath, 3½ m. NNE of Ballymore. Area 2,151 acres. Pop. in 1831, 765; in 1841, 627.

MOZ, a town of Portugal, in the prov. of Tras-os-Montes, comarca and 8 m. E of Torre-de-Moncorvo. Pop. 555. In its vicinity are mines of iron.

MOZABAD, a district of Hindostan, in the prov. of Multan, bounded on the NW by the Gharra river, which is here navigable. Its principal town is Mozgurrah.

MOZABIS, a people of North Africa, who inhabit the district of Beled-el-Jerrid, near the S frontiers of Algeria. They have light complexions, are very intelligent, and exhibit considerable skill in some species of industry and in commerce. Their religion differs considerably from Islamism, and it is only from prudential motives that they are occasionally found professing Mahommedanism. They speak a peculiar dialect.

MOZAMBIQUE, MOSAMBIQUE, or MOZAMBICO, an island on the E coast of Africa, containing the capital of the Portuguese settlements in that quarter. Its form resembles a crescent, with the hollow part towards the sea, measuring about 1½ m. in length, and a ¼ m. in breadth. Its substratum is madrepore; and the ground on which the city of M. is built rises from 20 to 50 ft. above sea-level. It is situated, with two other islets, in the mouth of a bay nearly 5½ m. broad, and 6 m. long, which furnishes a safe and convenient haven for shipping. On the NE extremity of the island is a fort of an octagonal form, furnished with 6 bastions, containing 80 pieces of cannon, besides a large howitzer capable of casting stones of 100 lbs. weight. The SW battery is in S lat. 15° 02′, E long. 40° 58′. The SW point of the bay, Cape Sunkul, is in S lat. 15° 4′, E long. 40° 44′. The anchorage is on the NW side of the island, on a flat level sand well-protected from the sea, and within musket-shot of the shore. Immediately opposite to the anchorage lies the town, occupying the central part of the island, and presenting in the appearance of its buildings and inhabitants a strange mixture of Indian, Arabian, and European costume. The governor's palace is an extensive stone-building, and there are 3 churches, and an hospital, besides prisons, tanks, and storehouses. The streets are narrow; the houses generally lofty and well-constructed. The soil of the island is sandy, and tolerably fertile, yielding rice, millet, pulse, and roots; but the settlement depends for its supplies on the peninsula of Cabaceiro, a tract of land about 11 m. long, and 4 m. broad, connected with the continent by an isthmus. On this peninsula are several villages and plantations. The principal trees are the cocoa-nut, cashew, mango, papaw, and orange; the chief article of cultivation is the manioc root; a small quantity of excellent coffee is also grown. A great part of the land still remains uncultivated; but numerous herds of cattle and vast droves of swine are reared. —The climate of M., from its oppressive heat and heavy atmosphere, is extremely unhealthy, especially in the months of September, October, and November; and would be more so but for the heavy rains which occasionally fall, and sweep into the sea the accumulated filth.—With the exception of the governor and his staff, the greater part of the European settlers are culprits who have been sentenced to banishment. A few years ago there were only 7 white women in the colony. Another class consists of the descendants of the old Arab settlers, most of whom are engaged in a seafaring life, and Banian traders and artisans. The remainder of the inhabitants is composed of the free blacks and native soldiers. The whole pop. is calculated at little more than 3,000, of which the last-mentioned class composes one-half, and the two other classes about one-fourth each. The slave-merchants of M. used formerly to supply the Cape of Good Hope, the Isle of France, and Batavia, with almost the whole of their slaves; besides sending a considerable number to the East and West Indies. Many of the existing residents at M. have amassed their fortunes in this trade. To the Portuguese colonies in India it sent annually four or five vessels loaded with gold, ivory, and slaves, which brought back cottons, teas, and other kinds of eastern produce. The Arab ships bring from Surat piece-goods and rice; and their returns are ivory, gold-dust, rhinoceros' horns, and dollars. A few years ago, a duty of 25 per cent. was levied upon all imports at M. Vegetables, fruits, pigs, and goats can be obtained here. The garrison amounts to 200 men, either black or creole sepoys. — The natives who occupy the country behind Mozambique are the Makua or Makuana, comprising a number of powerful tribes, extending N as far as Melinda; S to the mouth of the Zambeze; and in a SW direction almost to the neighbourhood of the Caffres. They are an athletic race of people, of ferocious aspect, and savage disposition. Messengers have occasionally been despatched from M. across the country to Angola, and other settlements on the opposite coast; "But we were informed," say the officers of Captain Owen's expedition, "that these Mercuries were always of the sable description, as the inhabitants of the interior would, on no account, admit white persons within their dominions. This," they add, "was recently confirmed to us at Angola, though it appears that the custom has more than once been departed from." The Portuguese and African slave-merchants have often conducted convoys of negroes from Angola to Sena, and from Sena to Angola. The two ports of Pedras-Negras in the interior of Angola, and Chicova in the interior of Monomotapa, are the respective points of departure. The distance is said to be 325 leagues, and its performance occupies a whole season. Wandering hordes are frequently encountered; and elevated plateaus are crossed where gold-dust is collected.

History.] This coast had been known to the Arabs, and its ports frequented by their traders, for centuries before its discovery by Europeans: all the information possessed by the latter on the subject, was chiefly drawn from the vague accounts of Ptolemy and the Periplus of the Erythrean sea. When first visited by the Portuguese in 1497, the whole coast was in the possession of the Arabs; but the fame of its gold mines, and the convenience of its ports, as resting-places for the Indian trade, led them to attempt the expulsion of the original settlers. This was easily accomplished; and in 1508 they had conquered Quiloa, gained a footing in Sofala, and built the fort which still stands on the island of M. In 1570, Francis Baretto, governor-general of M., penetrated the country of Monomotapa, and burnt its capital; but, after losing a number of men, was obliged to retreat with no other fruit of victory than permission to pass through the territories of Monomotapa upon condition of paying an annual tribute of 200 pieces of cloth. Another attempt was soon after made to penetrate through the country of the Mongas, or Monjou; and, after a hard fought battle with the natives, the armament passed the forest of Lupata, and marching eastward along the line of the Zambeze, made every exertion to reach the silver mines of Chicova; but their efforts proved fruitless. Since this event the Portuguese have contented themselves with acting on the defensive, occupying the coast along the line of the river Zambeze, and maintaining their influence in the country by exciting the native powers against one another. The value of this colony to Portugal has always been overrated, but was probably greater

in former times than it can be at present. It furnished large supplies of gold and ivory, and enriched at least a number of private individuals, whose wealth ultimately proved beneficial to the state. It likewise afforded, in the earlier voyages to the East, an important resting-place, and supplied most of the Portuguese colonies with slaves. The M. territory is understood to extend from Cape Delgado to Delagoa bay, an extent of coast-line of 1,400 m. The Portuguese jurisdiction, however, does not extend 10 m. in any direction: beyond these limits, the natives are in nowise subject to their government or control except in the actual presence of a detachment from the garrison of M. To the S of Makemba, and almost to the N shores of the Zambese, the natives are decidedly inimical to the Portuguese authority. The slave-trade, it is to be feared, is still actively carried on from the M. portion of the E coast of Africa, and with the connivance, in most instances, of the Portuguese officials. In 1846, Governor Abreu de Madeira was relieved from Quillemane, for this reason: his successor abandoned his post, and escaped in a slave-ship with a large cargo of slaves. Two governors of Ibo were also disgraced. In 1847, Governor-general de Lima was superseded at M. for malpractices, although an old officer, who had formerly been attached to the English army under Marshal Beresford. To the increased integrity, then, of the Portuguese governors alone we must look for any material means of suppressing the slave-trade from the E coast. Another subject involved in the consideration of the suppression of the slave-trade on this coast, is the encouragement of lawful trade thereon. The E coast of Africa abounds with eligible rivers for trade; and articles of commerce are not less wanting. The beds of the rivers abound with hippopotami which yield the finest ivory; their shores are washed with gold dust, and even now render good supplies; the vast plains in the interior abound with elephants, lions, and other wild animals, from which ivory of the choicest kind, and skins of value, may be obtained. Large tracts of this country are also under cultivation, yielding rice in abundance; and the forests supply woods of the most beautiful colours and texture. Yet, by the provisions of the treaty of the triple alliance, all these advantages are monopolized by the Portuguese, who have not the ability of availing themselves of them.

MOZDOK, a town of Russia, in the gov. of Caucasus, on the l. bank of the Terek, 8 m. E of Ekaterinograd, and 168 m. SE of Stavropol. Pop. 5,000, chiefly Armenians, Georgians, and baptized Circassians. They manufacture Morocco leather, wines, and brandy, and grow silk, but their principal commerce is with the mountaineers of Caucasus.

MOZE', a village of France, in the dep. of Maine-et-Loire, cant. and 6 m. SSW of Ponts-de-Ce. Pop. 1,620.

MOZGURRAH, a town of Hindostan, in the prov. of Multan, district of Mozabad.

MOZINGEN, a town of Würtemberg, 5 m. NNE of Reutlingen. Pop. 900.

MOZYR, an ancient town of Russian Lithuania, in the gov. of Minsk, on the l. bank of the Pripetz, 150 m. SSE of Minsk. It has some trade through the medium of that river, which is navigable.

MRAKOLIN, a small town of Moravia, 15 m. SSW of Iglau.

MRI, a village of Lower Egypt, on the W branch of the Nile, 7 m. S of Fuah.

MRIN, a town of Russia, in the gov. and 30 m. S of Chernigov, on the r. bank of the Oster.

MROCZEN, or MORSZA, a small town of Prussian Poland, 17 m. W by N of Bromberg. Pop. 1,380.

MRZEC, a river of Russian Lithuania, which flows into the Niemen, 4 m. NW of Grodno.

MRZYGLOD, a town of Austrian Poland, in Galicia, on the l. bank of the Sanok, 6 m. NNW of Sanok.—Also a town in the woivode of Cracovia, 21 m. N of Olkusz.

MSCHENO, a town of Bohemia, 11 m. W of Jung-Bunzlau. Pop. 1,814.

MSTA, a navigable river of the N of Russia, which rises in Lake Mstino, in the gov. of Tver; flows N and W through the govs. of Tver and Novgorod; and, after a course of 250 m., runs into Lake Ilmen, near Lipinskoi. A canal, dug in the reign of Peter the Great, joined it to the Tvertza; and a second canal, finished in 1804, connected it with the Volkhov.

MSTISLAVL, a town of Russian Lithuania, in the gov. and 54 m. ENE of Mohilev, on the r. bank of the Vekhra, a river which falls here into the larger stream of the Soj or Sosha. It contains 4,300 inhabitants; and has a Jesuits' college, a monastery, 6 Greek churches, and a synagogue of Jews. It was formerly the cap. of a palatinate.

MSTOV, a town of Poland, in the obwodie and 45 m. SE of Wielun.

MSZANICE, a village of Austrian Poland, in the circle of Sambov.

MSZCZONOW, a small town of the central part of Poland, 23 m. SW of Warsaw.

MTKVARI. See KUR.

MTSKHETHA, a town of Russian Georgia, on the l. bank of the Kur, near the confluence of the Aragvi, 15 m. N of Tiflis. It was in remote ages the cap. of Georgia, but was laid in ashes by Timur, and is now a mere heap of ruins.

MTZENSK, a town of the interior of European Russia, in the gov. and 32 m. NNE of Orel. Pop. 4,000. It is situated on two small branches of the Oka. It is tolerably well-built, and presents an imposing display of gaudily painted churches and monasteries, but the houses are mostly of wood. The environs are productive in hemp and corn, which give rise to a considerable traffic.

MUAKISIN, a village of Diyarbekir, in Asiatic Turkey, 10 m. W of Kerkesieh.

MUAR, a small state to the S of the Malacca territory, from which it is divided towards the coast by the Kessang river, and interiorly by a line drawn between Bankon, Chondong, and Mount Ophir. The Serting river separates it from Pahang; Parit Siput from the tract of Dattu-Kaya-Padang; and the Murbowe-sa-ratus from Johole.—The interior is generally termed Segamet. The pop. is stated not to exceed 2,400, which appears extremely small compared with the extent of territory, and is probably due to the misgovernment and apathy of the feudal sovereign, the sultan of Johore. The whole country appears to be one almost uninterrupted mass of jungle and swamp, with the exception of a few straggling villages and clearings. The once cultivated rice-grounds have degenerated into barren marshes; an enormous forest, abounding with wild elephants, overshadows a soil naturally rich and prolific; while the gaunt rhinoceros and uncouth tapir stalk unmolested over spots which, if tradition belies them not, were once the sites of large and populous towns.—The principal villages are Bokko, Langkat, Gressik, Ring, Segamet, Pagoh, and Pangkalang-Kota, the residence of the chief, on the river.—The produce of the country consists of rice, sago, ivory, ebony, gold-dust, tin, wax, aloe-wood, gum-benzoin, camphor, ratans of the kinds battu and jagga, Dammer-battu, Dammer-miniak, jaggery, and Lakka wood. M. is under the sway of a chief bearing the title of *tumungong*, a vassal of Johore. The M. river at the mouth has an apparent width of about 600 yds.; at Gressik, 18 m. up the stream, it is about 100 yds. broad, and 7 fath. deep. The soundings on the bar vary from $\frac{3}{4}$ to 4 fath. at low water. It has its rise, according to the natives, among the mountains of Jellabu, and falls into the sea about 30 m. SE of Malacca. The general direction of the river, from its mouth to Gressik, is NE. Its course is tortuous, and the banks are for the most part low, muddy, and covered, with the exception of the vicinity of villages and a few clearings, with dense jungle. By this river there is a communication, almost all the way by water, with the E coast of the peninsula, which is frequently adopted by the Pahang traders. In former days the mouth of the river was a noted place of rendezvous for the fleets of the Siamese, and in later times of the Malay princes in their attacks on Malacca during the Portuguese and Dutch administrations. Gold-dust

is found a short distance from the l. bank of the river.—*Newbold.*

MUCARE, a village of Hedjas, in Arabia, 80 m. SW of Mecca.

MUCARES, a small island of the Bahamas, surrounded with rocky shoals, in N lat. 22° 13′.

MUCCULLAH. See MACULA.

MUCHACHOS (PICO-DE-LOS), a mountain in the island of Palma, in the Canary group. Alt. 1,195 toises = 2,547 yds. above sea-level.

MUCHAMIEL, a town of Spain, in the prov. and 6 m. NNE of Alicante, on the r. bank of the Castalca. Pop. 4,000. Excellent wine is made.

MUCHELN, a village of Prussian Saxony, in the reg. and 9 m. WSW of Merseburg.

MUCHELNEY, a parish of Somersetshire, 2 m. SSE of Langport. Area 1,530 acres. Pop. 349.

MUCHNI, a ferry in Afghanistan, over the Cabul river, on the Abkhana route, and to the N of the Tatara and Khyber passes. The river, which runs here with great impetuosity, is crossed on inflated skins.

MUCHO-MA. See MOEN.

MUCHUNDERGUR, a fortress of Hindostan, in the prov. of Bejapur, on a mountain at some distance from the l. bank of the Krishna, and 45 m. SSE of Satara.

MUCIDAN. See MUSSIDAN.

MUCIENTES, a town of Spain, in Leon, in the prov. and 6 m. N of Valladolid, and partido of Valoria, on a height near the Pisuerga. Pop. 973. It has a parish-church, an hospital, a custom-house, and a public granary. The manufacture of linen and the rearing of cattle form the chief branches of local industry.

MUCK, an island of Argyleshire, 3¼ m. SSW of the island of Eig, about 2 m. in length, and less than 1 m. in breadth. Its surface is undulated, and presents in every part the rocky faces of the basaltic terraces which occasion its undulations. Near the W extremity it attains an alt. of about 600 ft. Pop. 200. The fishing of cod and ling is a chief occupation, and very productive. On the N side of the island lies Eilan-nan-each, or 'the Island of horses,' an islet of inconsiderable extent, but swathed in excellent pasture.—Also an islet of co. Antrim, 1¾ m. SE of Point-Skeenaghan.

MUCKAIRN, a parish in the N part of Mid-Lorn, Argyleshire, on the S shore of Loch Etive. A large proportion of the pop. is segregated in the v. of Bunawe. Pop. 960.

MUCKALEE, a parish in co. Kilkenny, 3¾ m. S of Castlecomer. Area 3,706 acres. Pop. 1,101.

MUCKART, a parish in the SE division of Perthshire, 4,500 acres in superficial extent. A spur of the Ochil hills, in the N extremity, terminates in a conical summit called Seamab, rising 1,350 ft. above sea-level. Two little villages, called the Pool and the Yetts of M., have jointly, with a hamlet or two, about 220 inhabitants. Pop. in 1841, 706.

MUCKENBERG, a market-town of Prussia, in the prov. of Saxony, and reg. of Merseburg, circle and 18 m. ESE of Liebenwerda, and 32 m. N of Dresden. Pop. 560. It has manufactories of cloth and of linen, and iron-works.

MUCKENSTURM, a village of the duchy of Baden, in the circle of the Middle Rhine, bail. and 3 m. NE of Rastadt, and 10 m. SSW of Carlsruhe. Pop. 1,425.

MUCKERN, a village of Saxony, in the circle and bail. and 11 m. SSE of Leipsig.

MUCKING, a parish in Essex, 5 m. N by E of Gravesend. Area 2,430 acres. Pop. in 1841, 199.

MUCKISH, a mountain in the p. of Clondehorky, co. Donegal, 4¾ m. S of Dunfanaghy. Its summit appears at a distance to be acute and linear, but comprises a tableau of several acres, situated at an alt. of 2,190 ft. above sea-level. The white silicious rock of which the upper portion of the mountain is formed, is in some places disintegrated by the action of the elements into fine sand, capable of being manufactured into crown and plate glass.

MUCKLESTON, a parish in the co. of Stafford, 4 m. NE of Market-Drayton. Area 8,120 acres. Pop. in 1831, 1,854; in 1841, 1,688.

MUCKLOO. See AGHOR.

MUCKNO, a lake in co. Monaghan, adjacent to the E side of Castle-Blaney. Its extreme length is 2¾ m.; extreme breadth, 1¼ m. Area 1,013 acres. Surface-elevation above sea-level 302 ft. Its softly swelling shores are, in general, richly wooded; and their numerous peninsulæ, jointly with pretty isles and islets, dissever the sheet of water into an intricate texture of very beautiful landscape.—Also a parish in co. Monaghan, containing the town of Castle-Blaney. Area 17,194 acres, of which 577 acres are in Lough M. Pop. in 1831, 9,716; in 1841, 9,902. Mullyash, the highest ground, has an alt. above sea-level of 1,034 ft.

MUCKROSS, or MUCRUSS, a peninsula in co. Kerry, projecting W between the Middle and the Lower lakes of Killarney. On the N side of the isthmus of the peninsula, or on the SE shore of the Lower lake, immediately S of the village of Cloghereen, stand the ruins of an abbey, founded in 1440 for Conventual Franciscans, and re-edified in 1602, but soon after permitted to go to ruin; but it is still so entire that were it more so the ruin would be less pleasing.

MUCKSA (CAPE), a headland of Beluchistan, in Mekran, 30 m. ESE of Cape Jask.

MUCKUNDGUNGE, a town of Hindostan, in the presidency of Bengal, and prov. of Bahar, district and 21 m. NNW of Ranghur, and 96 m. S of Bahar. In its vicinity is a lead mine.

MUCKUNDRA, a village of Hindostan, in the prov. of Malwah, district and 28 m. SSE of Kota, in a valley nearly circular in shape, about ¾ of a mile in diameter, enclosed by steep hills, and accessible only by a defile which crosses the mountains from N to S, either extremity of which is defended by a gate, and which forms the only place within many miles through the mountain-ridge which separates Malwah from Haruti.

MUCKWANPUR, a district and fortress of Northern Hindostan, belonging to the Nepalese. The district, which was formerly much more extensive, is now limited to the tract immediately S of the Nepal valley, and of the San Cosi river. The soil is generally good, but is to a great extent uncultivated. The hills which bound the level portion of the district are covered with pines. The inhabitants consist chiefly of the Tharu, Demivar, and Murmi tribes. The latter are found chiefly on the hills. A class of Rajputs named Khas, Magars, and Kirauts are found in considerable numbers in the forts. Of these the principal are Muckwanpur, Harriapur, Seedly, Cheesapany, and Chaynpur. The customs are collected at Hethaura, Seedly, and Becchiaco, but the district contains no town of importance. The fortress of M. is on a high hill about 17 m. S of Katmandu. It commands a large portion of the Terriani, and is a place of considerable strength.

MUCOANHOCAS, a people of Lower Guinea, who inhabit the W part of the kingdom of Benguela, between the Rio-dos-Mortes and the Quianhecua, and to the S of the territory of the Mocorocas.

MUCUAMBUNDOS, a people of Lower Guinea, in the S part of the kingdom of Benguela, between the Cobal and Bambarogue.

MUCUIXES, a people of South Africa, who, with the Macasses, inhabit the territory to the N of Hottentotia, and to the S of Benguela. They are still but little known.

MUCURI, a river of Brazil, which has its source in the E part of the prov. of Minas-Geraes; flows thence into the prov. of Porto-Segura; and after a course, in a generally E direction, of about 150 m., throws itself into the Atlantic at Portalègre. Its principal affluent is the Todos-os-Santos, which it receives on the r.

MUD, a village of Sinde, near the l. bank of the Indus, 22 m. NE of Roree, on the road thence to Mittun-Kote.

MUD, a river of New South Wales, in the district of Liverpool Plains, near the river Nammoy.

MUDA, a small town of Austrian Italy, in the prov. of Belluno, on the river Cordevole, 12 m. N of Feltre.

MUDAMANU. See Bird's Island.

MUDARIE, a village of Afghanistan, on the r. bank of the Indus, 7 m. S of Attock.

MUDAU, a town of the grand-duchy of Baden, in the circle of the Lower Rhine, bail. and 5 m. W of Buchen, and 29 m. E of Manheim, on the Mudbach, and at an alt. of 1,602 ft. above sea-level. Pop. (Cath.) 1,329.

MUDANIA. See Moudania.

MUD-CREEK, a river of Ontario co., in the state of New York, U. S., which joins the Canandaigua after a course of 40 m.

MUD-ISLAND, a fortified island in the Delaware, U. S., 6 m. below Philadelphia.

MUD-LAKE, a lake of Steuben co., in the state of New York, U. S., SE of Crooked lake.

MUDDI, a fortified town of Hindostan, in the prov. of Gujerat, situated near the morass called the Run, in N lat. 22° 5′. The soil is good in the vicinity.

MUDDUNGHUR, a fortress of Hindostan, in the prov. of Bejapur, and district of Concan, 80 m. SSE of Bombay.

MUDDY-CREEK, a town of Butler co., Pennsylvania, U. S. Pop. 1,998.—Also a river of Pennsylvania, which runs into the Susquehannah.—Also a river of Pennsylvania, which runs into the Delaware a little above Easton.—Also a river of Green co., Pennsylvania, which runs into the Monongahela.—Also a river of Kentucky, which runs into the Ohio.—Also a village of Preston co., in Virginia.

MUDDY-LAKE, a lake of Upper Canada, between Lake George and Lake Huron.—Also a lake or marsh, 15 m. in circuit, through which the Mississippi runs, shortly after issuing from Leech lake.

MUDDY-POINT, a cape on the W coast of Africa, in S lat. 11° 40′.

MUDDY-POND, a river of Kentucky, which runs NE into Green river, below Vienna.

MUDDY-RIVER, a river of Louisiana, which empties itself into the Missouri, 115 m. W of the Mississippi.

MUDDY-RIVER (Big), a river of Illinois, U. S., which runs SW into the Mississippi, about 25 m. above Cape Girardeau. It is navigable for boats 40 m.—The Little M. is a branch of it.

MUDEENGHUR, a town of Hindostan, in the prov. of Lahore, 30 m. NNE of Belaspur, and at an alt. of 6,168 ft. above sea-level.

MUDEN, a village of Sistan, in Persia, 110 m. NW of Zareng.

MUDFORD, a parish of Somersetshire, 3 m. NNE of Yeovil. Area 1,710 acres. Pop. 436.

MUDGE (Point), a projecting cape in the SE extremity of an island in the gulf of Georgia, on the W coast of North America, in N lat. 50°.

MUDGEE, a village of New South Wales, in the co. of Wellington, on the Cudgegong river, 150 m. from Sydney. Pop. 131. — Also a police district, embracing the whole of the county of Phillip, and the N portion of the co. of Wellington. Pop. 955.

MUDGUL, or Mugdala, a small district of Hindostan, in the prov. of Bejapur, to the S of the Krishna. It has an undulating surface, and possesses little cultivation. The inhabitants live in walled villages; the principal of these, also named Mudgul, is 55 m. N of Bijanagur. This town, and a considerable portion of the district, still belong to the Nizam.

MUDGUNGOMAR, a creek of New South Wales, in the co. of Argyle.

MUDIE, a mountain of Western Australia, in the co. of York, near the river Avon, and to the NW of York.

MUDIK-YOU-MTHSO, a lake of Tibet, in the N part of the prov. of Wei, and the ESE of the Bouka-Nor. The Mudik-dzangbo or Kartchja issues from its S extremity; runs SSW; and throws itself into the Galdjao, an affluent of the Tsampou or Yarou-dzangbo.

MUDKI, a large village of Lahore, 16 m. from Bhoga-Purana, and 13 m. from Sultan-Khan-Walla. It contains about 600 houses, and 4,000 inhabitants, Sikhs, Mahommedans, and Hindus.

MUDMESUR, a temple of Northern Hindostan, 32 m. NE of Serinagur.

MUDNISKA, a village of Irkutsk, in Asiatic Russia, on the Lena, 92 m. NE of Kirensk.

MUDUDA, a village of the Punjab, on the r. bank of the Raree river, and 50 m. SW of Lahore.

MUDUEX, a town of Spain, in New Castile, in the prov. and 23 m. NE of Guadalajara, and partido of Brihuega, in the valley of Iruega, on the Vadiel. Pop. 353.

MUEL, a town of Spain, in Aragon, in the prov. and 16 m. SSW of Zaragoza, and partido of Almunia-de-Dona-Godina, on the Huerba. Pop. 1,109. It has an hospital, and possesses some manufactories of pottery.

MUELAS, a town of Spain, in Leon, in the prov. and partido of Zamora, and 17 m. ENE of La Puebla-di-Sanabria, on the r. bank of the Vega. Pop. 108. In the vicinity is a mine of iron.

MUESA. See Moesa.

MUFF, a parish of co. Donegal, 6 m. NE of Londonderry. Area 15,030 acres. Pop. in 1831, 4,009; in 1841, 4,037.—Also a village in the p. of Inniskeen, in co. Cavan, 2 m. W of Kingscourt.—Also a v. in the p. of Taughanvale, co. Londonderry, 2 m. S of Lough Foyle, and 5¼ m. ENE of Londonderry. Pop. in 1831, 192; in 1841, 127.

MUFFETO, a mountain of Lombardy, in the N of the prov. of Brescia, a ramification of the Rhætian Alps, rising to an alt. of 1,100 toises = 2,344 yds., above sea-level. It is rich in metals of various kinds.

MUGA, a town of Spain, in the prov. and 18 m. N of Girona, on the l. bank of a small stream of the same name. Pop. 1,200.

MUGARDOZ (San-Julian-di), a town of Spain, in the prov. and 12 m. NE of Corunna, on the S coast of the bay of Ferrol. Pop. 2,000.

MUGE, a town of Portugal, in the prov. of Estremadura, comarca and 9 m. S of Santarem, on the l. bank of a stream of the same name, which flows into the Tagus. Pop. 876. Rice is cultivated in the vicinity, which is marshy and unhealthy.

MUGELN, a town of Saxony, 30 m. ENE of Leipsic. Pop. 1,200.

MUGERES, or Mohair Kay, a small island in the bay of Honduras, near the coast of Yucatan, in N lat. 21° 18′.

MUGGA, a town of Abyssinia, in the prov. of Enderta, between Dexan and Antalo.

MUGGENDORF, a village of Bavarian Franco-

nia, on the river Wiesent, and 18 m. SE of Bamberg. Pop. 400. It stands in a deep valley.

MUGGIA, or Muglia, a small town of Austrian Illyria, on the Adriatic, 2 m. N of Capo-d'Istria. Pop. 1,100. It has a castle, and a small harbour.—Muggia Vecchia lies 2 m. E of it.

MUGGIO, a village of Switzerland, in the cant. of Ticino, 9 m. SE of Lugano. Pop. in 1850, 591.

MUGGREBINES. See Mogrebbins.

MUGI-DAS-CRUZES, a town of Brazil, in the prov. and 36 m. E of São Paulo.

MUGIMIRIM, a town of Brazil, in the prov. and 72 m. NW of São Paulo.

MUGIQUICABA, a river of Brazil, in the prov. of Bahia, which issues from the E side of the Lagoa-do-Braço, and flows into Concha bay.

MUGLEY, a celebrated pass of Southern Hindostan, in the mountains which divide Mysore from the Carnatic, 95 m. from Madras, in N lat. 13° 10′.

MUGLITZ, a small river of Saxony, which rises on the borders of Bohemia, and flows NE to the Elbe, which it joins, after a course of 30 m., below Pirna.

MUGLITZ, or Mohelnice, a small town of Moravia, 19 m. NNW of Olmutz, on the r. bank of the March. Pop. 3,000.

MUGNANO, a town of Naples, in the Terra-di-Lavoro, 6 m. E of Noles. Pop. 3,060.—Also a v. 4 m. NNW of Naples.

MUGRON, a town of France, in the dep. of the Landes, 15 m. SW of Mont-de-Marsan, near the l. bank of the Adour. Pop. 2,600. It has a considerable trade in wines and brandy. Pop. of cant. 10,038.

MUGRU, a village of Northern India, in the prov. of Lahore, 27 m. ENE of Bilaspur.

MUGUL, a village of Senaar, 50 m. S of Senaar.

MUHALITSH, a river of Turkey in Asia, in Anatolia, which has its source in the sanjak of Kutaya, on the N side of Ak-Dagh; flows first NNE, passing the ruins of the ancient *Aezani* at the modern village of Chauvder; then bends NW, and, skirting the SW base of the Keshish-Dagh or *Olympus*, sweeps into the SW side of Lake Bullionte, the ancient *Apolloniatis-ad-Rhyndacum;* issuing thence at the NW extremity, and a little to the NE of Ulubad, it runs a distance of about 5 m., when it is joined by the Susuglerli-su or *Macestus*, and the Kara-Dere-su; the latter flowing from Lake Maniyas. It now exchanges the name of Edrenos, which it bears in the previous part of its course, for that of Muhalitsh, and, taking a NNE direction, falls into the sea of Marmora, opposite the island of Kaldimno, the ancient *Besbicus*. At its mouth is a small port, which has a considerable export trade with Constantinople in grain and fruit. This river is the *Rhyndacus* of the ancients.—Also a town, a little above the junction of the Susuglerli-su with the Edrenos, 5 m. W of Ulubad, on Lake Bullionte, and 67 m. SW of Constantinople.

MUHAR, a village of the Punjab, in N lat. 31°, 10 m. from the l. bank of the Chenab.

MUHIDPUR, a village of the Punjab, near the l. bank of the Jelum, 12 m. above its confluence with the Ghara.

MUHL, a circle or one of the four divisions of Upper Austria, comprising that part which lies between the Danube and Bohemia, and taking its name from the Upper and the Lower Muhl rivers. Area 57·5 German sq. m. Pop. in 1837, 203,633. In the S and E, the soil is productive of corn; in the N, which is mountainous, the common occupation of the inhabitants is the culture and manufacture of flax and hemp. Its cap. is Freystadt.

MUHL, a river of Austria, which rises in Mount Pleckenstein, on the confines of Bohemia; flows S, passing Haslach and Neufelden; and falls into the Danube, near Neuhaus. It consists of two streams, the Upper and Lower Muhl, which unite near Haslach.

MUHLBACH, a small town of Tyrol, in the circle of Botzen, on the Rienz, 15 m. W of Prunecken.—Also a village of Prussia, in the reg. and 38 m. ESE of Frankfort. Pop. 400.

MUHLBERG, a town of Prussian Saxony, in the principality and 12 m. SW of Erfurt. Pop. 1,000. It has manufactories of vitriol, alum, and indigo, and in the vicinity is a coal mine.

MUHLBERG, a small town of Prussian Saxony, in the gov. of Merseburg, on the E side of the Elbe, 34 m. NNW of Dresden. Pop. 2,650. The adjoining country is fertile, but is liable to be overflowed by the Elbe. Near this place, on the heath of Lochau, the elector John Frederic of Saxony was defeated and taken prisoner, in 1547, by Charles V.

MUHLBURG, a village of the grand duchy of Baden, in the circle of the Middle-Rhine, bail. and 1½ m. W of Carlsruhe, at an alt. of 410 ft. above sea-level. Pop. 920. It has manufactories of linen, of chicory, and of vinegar, and several breweries.

MUHLDORF, a town of the archduchy of Austria, in the upper circle of the Manhartsberg, 48 m. W of Vienna, on the l. bank of the Danube.—Also a town of Bavaria, capital of a landgericht-bezirk of the same name, in the circle of Upper Bavaria, 17 m. WNW of Burghausen, and 45 m. ENE of Munich, on the l. bank of the Inn. Pop. in 1838, 1,590. It is enclosed by a wall, and has 2 suburbs and an hospital. It has a mineral spring and a brewery, and carries on a considerable trade. The culture of hops, hemp, and corn, form important branches of local industry.

MUHLEN, a village of Prussia, in the regency of Königsberg, on the Muhlen-see, to the SE of Osterode.

MUHLENBACH, Mulhenbach, or Szasz-Sebes, a town of Transylvania, on the Muhlbach, 12 m. S of Alba Julia. It contains nearly 4,200 inhabitants of very mixed origin, comprising individuals of most of the tribes that inhabit Transylvania. The chief employment is brewing for the adjacent country.—The district of M. is enclosed by the districts of Reismarkt and Broos, and the county of Lower Weissenburg. It has an area of 115 sq. m. Pop. in 1837, 20,787.

MUHLENBACH, a village of Baden, 2 m. SSE of Haslach. Pop. 1,363.

MUHLENBERG, a village of the duchy of Brunswick, 4 m. SSE of Holzminden.

MUHLENBURG, a county in the E part of Kentucky, U. S. Area 490 sq. m. Pop. in 1840, 6,964; in 1850, 9,808. Its cap. is Greenville.—Also a v. in Luzerne co., in Pennsylvania.—Also a township in Pickaway co., in Ohio, 12 m. NW of Circleville. Pop. 650.

MUHLHAUSEN, a town of Prussian Saxony, in the gov. of Erfurt, at the confluence of the Unstrut and the Schwemmotte, in N lat. 51° 12′ 59″. Pop. in 1837, 12,051. It is surrounded by high walls flanked with towers, and presents every mark of antiquity. It has breweries, distilleries, manufactories of linen and woollen cloth and yarn, and extensive dye-works and fulling-mills. Leather, starch, and oil are also made here in considerable quantities; and in the vicinity are mines of copper and iron. M. was one of the oldest free towns of Germany. Its inhabitants boasted that their town had preserved the democratic form until 1802, when it shared the fate of other free cities, the town and territory being ceded to Prussia, and in 1814 definitively confirmed to that power.—Also a small town

of East Prussia, in the gov. of Königsberg, on the Donne, 13 m. E by N of Elbing. Pop. 1,172.

MUHLHAUSEN, or Milirzko, a small town of Bohemia, 46 m. S of Prague. Pop. 870.—Also a v. of Bavaria, 6 m. NNW of Hochstadt.

MUHLHAUSEN. See Mulhausen.

MUHLHEIM. See Mulheim.

MUHLINGEN (Gross), a village of the principality of Anhalt-Bernburg, on the Elbe, 12 m. N of Bemburg.

MUHLSTURZ-HORN, a mountain of Upper Austria, in the circle of Salzburg, one of the Noric Alps. It attains an alt. of 7,000 ft. above the sea.

MUHLTROF, a town of Saxony, in the Voigtland, on the river Golsch, 10 m. W by N of Plauen. Pop. 1,200, whose chief employment is cotton-weaving.

MUHOTAI, a village of the Punjab, on the l. bank of the Jelum, 25 m. below the junction of the Ravi.

MUHR, or Mur, a river of Austria, which rises in the N flank of the Noric Alps, and flows through Styria and Hungary to the Drave, which it joins on the l. bank near Legrad, after an E and SE course of 230 m. Its principal affluents are the Lissing, the Mürz, and the Lendra, on the l.; and the Sulm on the r.

MUHRAU, a town of Styria, 30 m. WSW of Judenburg, on the Muhr, at an alt. of 984 yds. above sea-level, in N lat. 47° 4′ 11″.

MUIDEN, a town of Holland, in the prov. of N. Holland, 8 m. ESE of Amsterdam, at the influx of the Vecht into the Zuyder-zee. Pop. 1,000. It has a small harbour.

MUIDERBERG, a village of Holland, in the prov. of N. Holland, 13 m. E of Amsterdam, cant. and 4 m. ENE of Weesp, on the Zuyder-zee.

MUILREA, a lofty mountain on the N side of the lower part of Killery harbour, in the p. of Kilgeever, co. Mayo. It has an alt. of 2,688 ft. above sea-level.

MUIRAVONSIDE, a parish of Stirlingshire, 5 m. ESE of Falkirk, intersected by the Edinburgh and Glasgow railway. Area 14¾ sq. m. Pop. 2,249.

MUIRKIRK, a parish and village of Ayrshire, 25½ m. NE by E of Ayr, with which it is connected by railway; 43 m. NNW of Dumfries; and 30 m. SE by S of Glasgow. Area of p. 58 sq. m. Pop. in 1831, 2,816; in 1841, 3,125. The v. is of modern date, and was brought into existence and nursed by the discovery and smelting of iron-ores. It at present numbers about 2,000 inhabitants, all dependent on the iron-works established here, which comprise 3 large blast-furnaces for making pig-iron, an extensive forge for making bar-iron, a foundry, works for the manufacture of British or coal-tar, and extensive works for tiles and lime.

MUJA (Santa-Maria-de), or Mugia, a town of Spain, in Galicia, in the prov. and 53 m. WNW of La Corunna, and partido of San-Marcos-de-Corcubion, 12 m. N of Cape Finistere, on a peninsula. Pop. 660. It has a small fishing-port, and contains a church and several other ancient edifices. Lace forms the chief article of local manufacture.

MUJAOS, a people of Central Africa, who inhabit the district to the NW of the prov. of Mozambique, and to the SE of Mulona, to which state they are tributary.

MUKADDEM, a nomade tribe in Persia, who inhabit the S part of the Azerdbijan. They speak the Turkish language, and are remarkable for their bravery.

MUKALI, a range of hills in the delta of Sind, extending a distance of about 20 m. from the vicinity of Tattah on the N, to Pir-Putta on the S. They consist of coral or limestone, and do not exceed 100 ft. in height.

MUKAM, a station in the Pishin valley, Afghanistan, on the road from Candahar to Quetta.

MUKATTEB. See Mokatteb.

MUKER, a chapelry in Grinton p., N. R. of Yorkshire, 17 m. W by S of Richmond, on the Swale. Area 32,170 acres. Pop. in 1841, 1,241.

MUKHMAS, a village of Syria, in the pash. of Damascus, 7 m. NNE of Jerusalem. It is large and populous, and is surrounded by extensive fig and olive-plantations. It is supposed to be the *Michmash* of Scripture.

MUKKUD, a town of the Punjab, on the E bank of the Indus, and near the base of the Salt range.

MUKLU, or Hingol, a river of Beluchistan, which has its source on the confines of Jhalavan; runs SSW; and flows into the sea of Oman, 18 m. E of Arbu-Humara, after a course of about 120 m. It bears in the upper part of its course the name of Noundru.

MUKRAN. See Mekran.

MUKTAN, a tribe of Bedouins, in Algeria, who inhabit the prov. of Titteri, and the vicinity of the lake of that name.

MUKTUL, a town and military station of Hindostan, in the prov. and 88 m. SW of Hyderabad, to the N of the Kistna. It is a place of considerable importance, but stands in an unhealthy locality.

MULA, a judicial partido and town of Spain, in the prov. of Murcia. The partido comprises 12 pueblos. The town is 21 m. E of Murcia, and 29 m. NNE of Lorca, at the base of a group of hills nearly surrounded by water, and on one of which are the ruins of an old castle. Pop. 6,228. It contains 2 parish-churches, 2 convents, an hospital, and a public granary, and has several manufactories of pottery, numerous oil-mills and distilleries, a paper-mill, and 3 brick-kilns. In the environs are several thermal springs and baths.

MULA, a river of Beluchistan, which rises to the S of Kelat; flows SE, NE, and E; and ultimately disappears in the Runn or desert of Shikarpur, after a course of about 140 m.—A pass descends along the upper part of the course of this river from the elevated plateau of Kelat to Cutch-Gundava, the descent being 4,650 ft. in 100 m. Masson says that, in a military point of view, this pass, presenting a succession of open spaces connected by narrow defiles, is very defensible, and at the same time affords convenient spots for encampment.

MULAHACEN. See Mulhacen.

MULATAS, an archipelago of islands, kays, shoals, and reefs, in the Caribbean sea, near the isthmus of Darien, skirting the coast from the Isla-de-Pinos to Punta-de-San-Blas.

MULATRE (Point), a cape of the island of Hayti, on the E coast, in N lat. 15° 25′.

MULAYNE, a town of Hindostan, in the prov. of Oude, in N lat. 27° 4′, E long. 80° 10′.

MULAZZANO, a town of Piedmont, in the prov. of Mondovi, 18 m. S by E of Alba. Pop. 2,250.

MULBERRY, a river of Alabama, U. S., the main branch of the Tuscaloosa.—Also a village in Clermont co., Ohio, 108 m. SW of Columbus.—Also a v. in Wilkes co., in N. Carolina.—Also a township in Franklin co., in Arkansas. Pop. 614.—Also a township in Johnson co., in Arkansas. Pop. 242.

MULDAU. See Moldau.

MULDE, or Mulda, two considerable rivers of Saxony. The Freyburg-M. rises among the Sudetic mountains, near Neustadt; passes through the circle of the Erzgebirge; and joins the Schneeberg-M. near Colditz. The Schneeberg or Zwickau-M. rises also in the Sudetic chain, to the S of the former; runs through part of the Voigtland, the circle of Leipsic, and the Prussian gov. of Merseburg; and joins the Elbe, in the duchy of Anhalt-Dessau, between Dessau and Zerbst, after a course of 72 m.

MULDONICH, one of the Barra islands, at the S end of the Hebridean archipelago, 1¾ m. S of the

mainland of Barra, and 2 m. W of Vatersa. It measures only about 2½ m. in circumf., is composed wholly of gneiss, and consists of a single hill, which rises 600 or 700 ft. above sea-level.

MULGOA, a village and parish in Cumberland co., New South Wales, skirted by the Nepean river on the W and S.

MULGRAVE ARCHIPELAGO, the general appellation given to the various groups of islands in the Pacific, lying between the parallels of 3° S and 12° N, and the meridians of 160° and 177° E; and comprising the Radak, Rajik, Scarborough, and Kingsmill groups.

MULGRAVE (Fort), a military position on the river Derwent, in Van Diemen's Land, on the S point of Sullivan cove, in S lat. 42° 53′ 35″.

MULGRAVE (Point), a point on the W coast of N. America, in N lat. 67° 50′, W long. 165°.

MULGRAVE (Port), an inlet on the coast of Behring's bay, in Russian America, in N lat. 59° 36′, W long. 139° 20′.

MULHACEN, the highest summit in the Sierra-Nevada, in Spain, in the prov. and 24 m. ESE of Grenada. It attains an alt. of 2,127 toises = 4,534 yds. above sea-level.

MULHARA, a town of Hindostan, in the prov. of Allahabad, in N lat. 25°.

MULHAUSEN, Muhlhausen, or Mulhouse, a town of France, in the dep. of Haut-Rhin, between two arms of the river Ill, on the railway line from Strasburg to Basle, by which it is 19¼ m. distant from Basle, 27 m. from Colmar, and 70 m. from Strasburg. It is situated in a plain, which is productive of corn, wine, and fruit. Its pop., amounting to 28,715 in 1846, is partly French, but chiefly German, and almost all Protestants. The town is surrounded with walls, and is in general old and irregularly built, but contains several public edifices worth notice, such as the hotel-de-ville, the arsenal, the hospital, and the churches. The manufactures of the town and neighbourhood are very considerable, comprising printed cottons, woollens, linen, silk, leather, stained hanging papers, watchwork, beet-root sugar, chemical substances, soap, and machinery. The cotton-prints and muslins of M. are second only, for the perfection and variety of their patterns, to the silk-goods of Lyons. There is a branch-railroad from M. to Thann, 13 m. in length.—M. was formerly a free town, in alliance with the Swiss confederacy, but was united to France in 1798.

MULHEGAN, a river of Vermont, U. S., which runs into the Connecticut at Brunswick.

MULHEIM, or Muhlheim-am-Ruhr, a town of the Prussian prov. of Cleves-Berg, 15 m. NNE of Dusseldorf, on the Ruhr, or Roer, which becomes navigable here. Pop. 8,172 in 1837. It has manufactories of cotton and woollen goods, and of paper. In the neighbourhood is a coal-mine.

MULHEIM-AM-RHEIN, a town of the Prussian duchy of Berg, 3 m. N of Cologne, situated at the influx of the Strunderbach into the Rhine, across which there is here a flying bridge. Pop. in 1837, 4,843. It has manufactories of woollen stuffs, velvet, silk, leather, soap, and tobacco, and carries on an active inland trade.

MULHEIM, or Mullheim, a market-town of Baden, 3 m. W of Badenweiler, in a pleasant and fruitful district. Pop. 2,542. — Also a village of Hesse-Darmstadt, bail. of Steinheim, on the Rodanbach, an affluent of the Rhine. Pop. 1,233.—Also a village of Würtemberg, 4 m. NE of Tuttlingen. Pop. 920. — Also a village of Switzerland, in the cant. of Thurgau, 6 m. NE of Frauenfeld.

MULIGRACH, the most northerly of the Summer islands, lying between the promontory of Rumone and the entrance of Loch-Broom, on the W coast of Cromartyshire. It has a circumf. of probably not more than 2½ m.

MULL, a large island of Argyleshire, the third in magnitude of all the Hebrides, separated from Ardnamurchan on the N, by the lower part of Loch-Suinart; from Morven on the NE by the Sound of Mull; and from Lorn on the W by the lower part of Loch-Linnhe; and washed on all other sides either by the main body of the Deucaledonian sea, or by brief sounds flanked on the outer side by islands of inconsiderable size. So much is M. indented by bays and marine lochs, that, though measuring, in extreme diam., not more than 35 m., it possesses a circumf. along sinuosities of its coast of upwards of 300 m. Its greatest length WSW from the point of Dowart, opposite the S extremity of Lismore, to the small headlands on the sound of Icolmkill, is about 30 m.; its greatest breadth, in a line from the N extremity over the summit of Benmore, to a point in the Ross of Mull, is about 25 m.; and its superficial extent, as estimated by Mr. M'Donald, is 420 sq. m., or 210,000 Scottish acres.—M. may be summarily characterized as having a boisterous coast, a wet and stormy climate, and a rough, unpromising, and trackless surface, redeemed only by fine spots 'few and far between' in sheltered valleys, or more frequently at the head of bays and the bolder inlets of the sea. "Of an alt. exceeding 3,000 ft., the central group of mountains—among which Benmore rises supreme—vie in height with the Cuchullins of Skye, and, like that chain, bring down immense volumes of rain and vapour on the island." The various modifications of trap rocks which prevail over the island, give place, in the Benmore region, to syenite and a blue claystone; and elsewhere have interspersed among them, in positions of much distortedness, beds of limestone and sandstone belonging to the lias and oolitic series. A fine red granite is found at the promontory of Ross. Excepting on the small rocky district at the point of the Ross, and on a few of the summits in the mountainous tract, the soil is both deep and fertile, and bears a considerably larger crop of pasture in a given space than that of Skye; yet M., of all the Hebrides, is least adapted for the cultivation of grain. Both proprietors and tenants have, for a considerable series of years, occupied themselves principally as graziers.—Of several fresh-water lakes, the largest are Loch-Erison in the N, Loch-Uisk in the S, and Loch-Ba near the head of Loch-na-Keal. The island contains three interesting examples of the semi-ancient fortalice,—the castle of Aros, overhanging the sound of Mull in the vicinity of the cognominal hamlet,—Duart-castle, looking up Loch-Linnhe, and garrisoned till lately by a detachment from Fort-William,—and the castle of Moy standing in the vicinity of the modern mansion at the head of Loch-Buy. The only town is Tobermory: which see. M., together with the adjacent small islands of Gometra, Ulva, Iona, Staffa, and some others, is divided into the three parishes of Kilfinichen, Kilninian, and Torosay. Pop. of Mull, including all the territory within its parishes, in 1801, 8,367; in 1831, 10,538; in 1841, 10,064; in 1851, 8,369.

MULL (Sound of), a long band of sea between the island of Mull and the continent of Scotland. It is identified at its N end with the lower part of Loch-Suinart, and on the S with the lower part of Loch-Linnhe, and is uniform in designation only between the headlands at Bloody-bay and Duart-castle,—a distance of about 19 m. As thus limited, it measures from 11 fur. to 3¼ m. in breadth, and possesses five or six islets, all of them quite inconsiderable. But regarded as including the whole band of sea which divides Mull from the continent, it may be viewed as commencing on the S between the headland at Loch-Buy and Macmarquesas point in Seill island, and cannot measure less than 36 m. in length, while it has occasionally a breadth of from 8 to 10 m., and possesses the large island of Kerrara, besides various

minor islands. It has depth enough to bear vessels of the largest burden.

MULL OF GALLOWAY. See GALLOWAY.

MULL OF KINTYRE. See KINTYRE.

MULLA, a river of Wales, in Montgomeryshire, which falls into the Severn at Castle-Dolvern.

MULLACREW, a village in the parish and co. of Louth, 1 m. S of Louth, and 6½ m. SW of Dundalk. Pop. in 1831, 596; in 1841, 627.

MULLA GHAT, a pass in the Syhadri range, in Hindostan, 9 m. S of Kumburli ghat, leading from Kurar to Makjun, in the Concan. The ghat itself is about 3 m. in extent.

MULLAGH, a village in the parish of Kilmurry, co. Clare, 3½ m. S of Milltown-Malbay. Pop. in 1831, 96; in 1841, 131.—Also a parish, containing a village of the same name, in co. Cavan, 5 m. ESE of Virginia. Area 12,872 acres. Pop. in 1831, 5,960; in 1841, 6,526.

MULLAGHBRACK, a parish in co. Armagh, containing the village of Hamilton's-Bawn, and part of the town of Market-hill. Area 11,557 acres. Pop. in 1831, 8,490; in 1841, 8,570.

MULLAGHCARN, a mountain of co. Tyrone, 5½ m. NE by N of Omagh. It has an alt. of 1,778 ft. above sea-level.

MULLAGHDERG, a lake in the p. of Templecrone, from 4 to 5½ m. N of Dunglo, co. Donegal. It is about 1½ m. in length, and lies very near the sea-shore.

MULLAGHMORE, a peninsula of 1¾ m. in length, and about ¾ m. in mean breadth, projecting northward into Donegal bay, in co. Sligo. Its N part has an extreme alt. above sea-level of 209 ft.

MULLAHIDDART, or MALAHIDERT, a parish in co. Dublin, 5½ m. NW by W of Dublin. Area 4,067 acres. Pop. in 1831, 471; in 1841, 595.

MULLAHPORE, a town of Hindostan, in the prov. of Oude, on the SW side of the river Gogra, in N lat. 27° 40′.

MULLBUY, or MILBUY, a broad-based ridgy hill in that district on the E coast of Ross and Cromarty which is called Ardmeanach, or 'the Black isle.' The hill—though only about 500 ft. high—extends from the moor of Ord to the town of Cromarty, a distance of about 16 m., and forms the spine of the peninsula between Beauly frith and all the upper part of the frith of Cromarty.

MULLET, a double peninsula in co. Mayo, connected with the mainland by the isthmus on which stands the small town of Belmullet. It extends from Erris head on the N, to the entrance of Blacksod bay on the S, and is very nearly identical with the p. of Kilmore-Erris.

MULLEKOVEN, a village of Prussia, in the reg. of Coln, circle of Sieg. Pop. 316.

MULLENBACH, a village of Prussia, in the reg. of Coblenz, circle of Cothem. Pop. 552.

MULLENBORN, a village of Prussia, in the reg. of Treves, circle of Daun. Pop. 203.

MULLEN'S ISLAND, a small island in the gulf of Mexico, near the coast of East Florida, in N lat. 28° 1′.

MULLICA, a township of Atlantic co., in the state of New Jersey, U. S. Pop. 1,056.

MULLICAS, a river of New Jersey, U. S., which runs E into Little-Egg harbour, 4 m. E of Leeds. It is navigable 20 m. for vessels of 60 tons.

MULLICO-HILL, a village of Gloucester co., New Jersey, U. S., 45 m. S of Trenton.

MULLINACUFF, a parish in co. Wicklow, 3 m. W by S of Tinahely. Area 6,616 acres. Pop. 2,131.

MULLINAHONE, a town in the p. of Kilvemnon, co. Tipperary, Munster, 5¾ m. SW of Callan. Pop. in 1831, 1,175; in 1841, 1,306.

MULLINAVAT, a village in the p. of Kilbeacon, co. Kilkenny, on the rivulet Blackwater, 1¾ m. S by E of Lukeswell. Pop. in 1831, 195; in 1841, 529.

MULLINGAR, a parish of co. Westmeath. Area 22,322 acres. Pop. in 1831, 8,845; in 1841, 9,903. The post and market town of M., the capital of Westmeath, and formerly a parl. borough, stands on the river Brosna, on the summit-line of the Royal canal, and on the Midland Great Western railway from Dublin to Galway, by which it is 50 m. WNW of Dublin. A considerable proportion of the houses in the N outskirts, and a few in the E and the SW, are mere cabins; but most of the houses in all other parts of the main body of the town are built of stone and covered with slate. The parish church is a handsome structure, with a neat tower and spire. The Roman Catholic chapel is a large and imposing pile, with a considerably enriched exterior. The co. court-house is a handsome and quite modern edifice. The infantry barracks are a large series of buildings, constructed upon three sides of a square of about 150 yds. in width, and constitute M. an important military station. The market-house is a neat and commodious building in the centre of the town. The county jail is a large and commodious semicircular pile, built on the improved system of prison-construction. The infirmary contains 32 beds. M. enjoys great advantages for inland trade, in being so large a military station, and in commanding so great an extent of rich surrounding country, besides facilely communicating with Dublin and the W by the Royal canal. It also possesses wool, horse, and cattle fairs, inferior in greatness and celebrity only to those of Ballinasloe. Pop. in 1831, 4,295; in 1841, 4,569. Families employed chiefly in agriculture, 240; in manufactures and trade, 492; dependent chiefly on property and professions, 44.—The ancient family of Le Petit formerly bore the title of Barons of M., in the palatinate of Meath; and Count Mainhard de Schomberg was created by William III. Duke of Leinster and Baron of M.

MULLINS (ST.), a parish partly in co. Wexford, but chiefly in co. Carlow, containing the villages of Tinnahinch and Ballymurphy. Area 21,190 acres. Pop. in 1831, 6,452; in 1841, 6,769. A large portion of the surface consists of summits and masses of the Blackstairs mountains. The principal summits belonging to the parish are all on the co. boundary line; and, together with their respective altitudes above sea-level, are Blackstairs-proper, 2,409 ft.; White-mountain, 1,679 ft.; and Carriglead, 1,053 ft.

MULLION, a parish of Cornwall, 6 m. S by E of Helstone. Area 4,450 acres. Pop. in 1841, 808.

MULLOCHMEEN AND MULLOCHMORE, two hills in co. Westmeath, screening the SE side of the basin of Lough Sheelin, and constituting a remarkable feature in the midst of a bleak and boggy plain. The loftiest summit has an alt. of 849 ft. above sea-level.

MULLROSE, or MUHLOSE, a town of Prussia, in the prov. of Brandenburg, regency and 11 m. SW of Frankfurt, circle and 15 m. SSW of Lebus, on the S bank of a canal of the same name, and between two small lakes through which the Schlaube flows. Pop. 1,830. It has manufactories of cotton fabrics.

MULLUBA PLAINS, a level tract in the district of Liverpool plains, New South Wales, in the valley lying between the Maule and Muluerinde rivers.

MULLYASH, a small group of lofty hills, in co. Monaghan. The loftiest summit is situated 3¾ m. NE of Castle-Blaney, and has an alt. of 1,034 ft. above sea-level.

MULMEN, a village of Prussia, in the regency of Oppeln, circle of Neustadt. Pop. 564.

MULMUR, a township of Upper Canada, in the Simcoe district. Pop. in 1842, 218.

MULOFFSKY, a headland of Japan, on the E coast of the island of Saghalien, in N lat. 47° 57′ 45″.

MULRANKIN, or MULRANCAN, a parish in co. Wexford, 6¾ m. SSW of Wexford. Area 2,433 acres. Pop. in 1831, 996; in 1841, 1,188.

MULROY BAY, a long, intricate, and ramified sea-lough, in co. Donegal. It enters between Pointahomash on the W, and Ballyroosky-point on the E; penetrates the land in three successive sweeps; sends off, about midway between Carrickart and Carrowkeel an arm 3½ m. N; and while possessing sinuous shorelines, numerous coves and anchoring-grounds, and a great variety of coast-character, it nowhere has a breadth of more than 1⅝ m.

MULSEN, a village of Saxony, in the circle of the Erzgebirge, and seignory of Schoburg, 3 m. S of Glauchau. Pop. 1,000. It has extensive manufactories of linen.

MULSUM, a village of Hanover, in the gov. and 11 m. SW of Stade, duchy and 41 m. NE of Bremen, and bail. of Harzefeld.

MULTAN, a city of India, in the Punjab, in a fertile plain 3 m. from the l. bank of the Chenab, in N lat. 30° 8′, E long. 71° 28′. It is built upon a mound of considerable height, formed of the accumulated debris of successive cities which have occupied the same site. Its bazaars are extensive; silks, cottons, brocades, and tunics are manufactured here; and the position of the town is highly favourable to the mercantile and industrial spirit of its inhabitants, whose numbers were estimated, previous to its recent capture, at 80,000. It is famous for its silks and carpets, made in imitation of those of Persia. The fort or citadel is an irregular hexagon, constructed on a considerable eminence, and encompassed by a ditch 25 ft. deep, and 40 ft. wide. The city surrounds the hill on which the citadel is built on its S side only, so that on the N the defences of the fort are exposed to immediate attack, though their strength has of course been calculated accordingly. The city itself is admirably fortified throughout the whole circuit of its walls, which are pierced by six gates; two on the N, close to the junction of the defences of the town with those of the fort, two on the S, and two on the E and W sides, called the Delhi and the Buhur gates respectively. The streets leading from these several gates converge upon a central street, terminating with the single gate called the Dowlut gate, which leads from the town across the moat into the citadel. Outside the walls of the town are populous suburbs. The citadel was stormed in 1818 by Runjit Singh, with a severe loss of men; and on the 2d of January, 1849, after having been battered and bombarded by nearly 150 guns for a week, the city and citadel were captured by the British troops. On this occasion immense depots of merchandise, grain, and arms were found in M. In the month of August, 1849, an inundation of the Chenab river nearly completed the ruin of the citadel.—M. is supposed to be the *Malli* of Alexander. Of its Hindu history we have no information; but it was taken by the Arabs in 712. It is thus described by Iben Haukal, who travelled in the middle of the 10th cent.: "The city of M. is about half the size of Mansureh-Buckhur, and is called the Golden-house; for there is in this city a certain idol, to which the natives of the country come on a religious pilgrimage every year, and bring great riches with them. This temple is situated in the middle of the city; and over the centre of the temple there is a great cupola or dome. All around this building are various houses, in which the servants and attendants of the idol reside. The idol is made in the form of a man sitting upon a square throne, the hands resting on the knees. All the riches which are brought to this idol are taken by the amir, who distributes a portion among the servants of the temple. Whenever the Indians come against M. in a hostile manner, the amir threatens to destroy the idol, which causes them to desist. This amir is a Coreishy Arab, and a descendant of Sam, who first conquered M." In 1010 M. was taken by Mahmud of Ghizni. It was subsequently recovered by the Afghans, and again captured by Mahomed Ghori in 1176. From that period it was subject to the kings of Delhi till 1398, when it was captured by Timur. After his retreat from Hindostan, it became the cap. of an independent dynasty, and continued so till the middle of the 16th cent., when they were subdued by the Mogul emperor Homayun.

MULTIFARNHAM, a parish, containing a village of the same name, in co. Westmeath. Area 4,895 acres. Pop. in 1831, 1,473; in 1841, 1,366.—The village of M. is situated 1¼ m. S of Lough Dereveragh, and 6 m. NNW of Mullingar. Pop. 275.

MULTNOMAH. See WILLAMETTE.

MULTONA SPRINGS, a watering-place in Attala co., in the state of Mississippi, U. S., 13 m. N of Kosciusko.

MULUERINDE, a river of New South Wales, in the district of Liverpool Plains, which joins Peel river, near Wallumburra.

MULWAREE, a river of New South Wales, which has its source in the co. of Murray, to the E of Lake George, flows N into the co. of Argyle, and joins the Wollondilly.

MULWÏA, or SOURB-OU-HERB, a river of Marocco, which has its sources in the Great Atlas, in about N lat. 31° 57′, and W long. 4° 18′; runs NE; and throws itself into the Mediterranean in the gulf of Melillah, near the confines of Algeria, after a course of upwards of 300 m. Its principal affluents are the Muloulo on the r., and on the l. the Tha or Enza. In winter it possesses a large volume of water, but in summer it becomes almost dry, and is consequently commonly designated the Bahr-bilama. Its waters are reddish and muddy, but when filtered become pure and wholesome.

MUMBAÇA, a parish of Brazil, in the prov. of Ceara, and district of São-João-do-Principe, on the Banabuïhu. It contains a mixed population of whites, Indians, and half-cast, who find their chief employment in the culture of cotton and of ordinary articles of provision, and in the rearing of cattle.

MUMBARAK. See MIRZA-MOMBAROK.

MUMBOS, a people of Central Africa, who inhabit the territory on the frontier of the prov. of Mozambique, to the N of the Monomotapa, and to the l. of the Zambeze.

MUMEL-SEE, or MUMMEL-SEE, a lake of the grand-duchy of Baden, in the circle of the Middle Rhine, bail. and 8 m. SE of Achern, and 17 m. NE of Offenburg, on the Seekopf, a mountain of the Schwarzwald. It is about 1½ m. in circumf., and is of great depth. It is supposed to be the *Lacus Mirabilis* of the Romans.

MUMLING, a river of Hesse-Darmstadt, in the prov. of Starkenburg, which issues from the Odenwald; runs first SE, then N, and afterwards ESE; and joins the Main, in Bavaria, on the l. bank, 15 m. SSE of Aschaffenburg, and after a course of 30 m. Erbach and Michelstadt are the chief places on its banks.

MUMLISWYL, a village of Switzerland, in the cant. and 12 m. NNE of Soleure, bail. and 3 m. N of Ballstale. Pop. 860. It has a paper-mill, and is noted for its cheese.

MUMPELGARD. See MONTBELIARD.

MUMSDORF, a village of the duchy of Saxe-Altenburg, SW of Lucka. Pop. 220.

MUNAAR, a town of Hindostan, in the prov. of

Malabar, and district of Valatra, 57 m. ESE of Calicut, and at the foot of the Western Ghauts.

MUNASSA, a town of Hindostan, in the prov. of Ajmir, 26 m. SSE of Ruttunghur, and at an alt. of 1,440 ft. above sea-level. It consisted in 1820 of 1,030 houses.

MUNCHBERG, a town of Bavaria, capital of a landgericht-bezirk, in the circle of Upper Franconia, 23 m. NNE of Bayreuth, on the Palsnitz, and on the Neumarkt and Hof railway. Pop. 2,260. It is enclosed by walls, and has an hospital, numerous breweries, and manufactories of linen and cotton fabrics.

MUNCHEBERG, a town of Prussia, in the prov. of Brandenburg, regency and 23 m. NW of Frankfurt, circle and 19 m. WNW of Lebus, between two small lakes. Pop. 1,580. It has manufactories of silk and woollen fabrics, established by the French refugees after the revocation of the edict of Nantes in 1815.

MUNCHEHOFE, a village of Prussia, in the reg. of Potsdam, circle of Teltow. Pop. 271.—Also a v. in the circle of Nieder-Barnim. Pop. 126.

MUNCHEN. See MUNICH.

MUNCHENBERNSDORF, a town of the grand-duchy of Saxe-Weimar, in the principality of Weimar, circle and 13 m. ENE of Neustadt, and 8 m. WSW of Gera. Pop. 1,833. It has manufactories of silk and woollen fabrics and of sail-cloth.

MUNCHENBUCHSEE, a village of Switzerland, in the cant. and 6 m. N of Berne, bail. and 6 m. SSW of Fraubrunnen. Pop. 2,216. It has a normal school, and in the vicinity is the agricultural establishment of Hofweil.

MUNCHENGRATZ, or HRADISSTEN - AD - CIZERAU, a town of Austria, in Bohemia, in the circle of Bunzlau, 8 m. NNE of Jung-Bunzlau, on the l. bank of the Isar. Pop. 3,000. It has a castle, with a chapel in which is the tomb of Wallenstein, and a theatre and park; and possesses manufactories of printed calico.

MUNCHENSTEIN. See MONCHESTEIN.

MUNCHENHOLZEN, a village of the duchy of Saxe-Weimar, to the W of Weimar. Pop. 211.

MUNCHHOFEN, a village of Bohemia, in the circle and 7 m. NNE of Elnbogen, and 19 m. WSW of Schlakenworth. It has manufactories of vitriol and alum.

MUNCHICAR (RAS-EL). See SERRAT.

MUNCHINGEN, a market-town of Würtemberg, in the circle of the Neckar, bail. and 6 m. NE of Leonberg, and 8 m. NW of Stuttgart. Pop. 1,428.

MUNCHWYLER. See VILLARS-AUX-MOINES.

MUNCSEL (KIS), or MUNCSUL-MIK, a village of Transylvania, in the comitat of Hunyad, 8 m. SSE of Dobra, and 11 m. WNW of Vajda-Hunyad.

MUNCY, a town of Muncy-creek township, Lycoming co., in the state of Pennsylvania, U. S., 85 m. N of Harrisburg, about a mile E of the Susquehanna river, and 1 m. S of Muncy-creek. Pop. in 1840, 662.—Also a township of Lycoming co., in the state of Pennsylvania, 13 m. NE of Williamsport. It has a mountainous surface, and considerable diversity of soil; and is watered by Mercy and Loyalsok creeks. Pop. 912.

MUNCY-CREEK, a township of Lycoming co., in the state of Pennsylvania, U. S., 13 m. SE of Williamsport. It has a hilly surface; and is drained by Big and Little Muncy creeks, affluents of the W branch of Susquehanna river.

MUNCYTOWN, a village of Delaware co., in the state of Indiana, U. S., 58 m. NE of Indianapolis, on the S bank of White river. Pop. in 1840, 400.

MUNDA, a town of Lower Guinea, in Benguela, 230 m. ENE of San-Felippe-de-Benguela.

MUNDAÇA, a town of Spain, in the prov. and 21 m. NE of Bilbao, on the l. bank and at the embouchure of a stream of the same name. Pop. 2,000, chiefly fishermen.

MUNDATAFAL, or MUNDATTA, a town of Hindostan, in the prov. of Candeish, on a small island formed by the Nerbudda river, in N lat. 22° 15′.

MUNDAWUL, a town of Hindostan, in the prov. of Malwah, 17 m. NW of Mahidpur, in N lat. 23° 35′.

MUNDELLSVILLE, a village of Shenandoa co., Virginia, U. S.

MUNDELSHEIM, a small town of Würtemberg, in the bail. and 5 m. N of Marbach. Pop. 1,782.

MUNDEN, a parish of Hertfordshire, 3 m. WNW of Puckeridge. Area 2,690 acres. Pop. 477.

MUNDEN (LITTLE), a parish of Hertfordshire, 1 m. NNE of Hertford. Area 3,200 acres. Pop. 612.

MUNDEN, a town of Hanover, at the confluence of the Werra and the Fulda, whose united streams take here the name of Weser, 15 m. WSW of Gottingen. Pop. 4,500. It has one Calvinist and two Lutheran churches, an hospital, and a pro-gymnasium. Its position gives it a brisk carrying-trade, both by land and by water. Numerous barges or lighters arrive by the Weser, the Werra, and the Fulda; while with Hanaú, Frankfort, and Mentz there is active land-communication. The value of the linen annually sold here is computed at £100,000. Tobacco, soap, leather, and stoneware are manufactured. This place was taken and plundered by Count Tilly in 1626, and occupied by the French in the war of 1756, and again in 1805.

MUNDER, a small town of Hanover, in the principality of Kalenberg, on the river Hameln, 18 m. SW of Hanover. Pop. 1,500. It has coal mines and a salt-work in its neighbourhood. It suffered greatly in the war preceding the treaty of Westphalia in 1648.

MUNDERAR, a district and town of Cabul, in N lat. 34° 11′, E long. 70° 35′.

MUNDERKINGEN, a town of Würtemberg, 20 m. WSW of Ulm, on the r. bank of the Danube. Pop. 1,600.

MUNDERLEY, a parish of Norfolk, 5 m. NNE of North Walsham. Area 530 acres. Pop. 454.

MUNDESSOR, a district of Hindostan, in the prov. of Malwah, situated principally between the 24th and 25th parallels of N lat., and intersected by the river Chumbul. Its principal town, of the same name, is 80 m. NW of Ujein.

MUNDFORD, a parish of Norfolk, 5 m. NNE of Brandon. Area 2,160 acres. Pop. 437.

MUNDI, a town of the Punjab, 120 m. E of Amritsir, near the Beas.

MUNDLAH, a town of Hindostan, in the prov. of Gundwana, on the Nerbudda river, 152 m. NNE of Nagpur. It was formerly the capital of the prov., and is well fortified.

MUNDLEYSIR, a town of Hindostan, in the prov. of Malwah, 5 m. E of Mishwar, in N lat. 22° 10′. It is a populous town, with good bazaars.

MUNDO, an island at the entrance of Lake Alexandrina, in S. Australia.

MUNDON, a parish of Essex, 4 m. SSE of Maldon. Area 3,340 acres. Pop. 309.

MUNDRA, a port of Cutch, in N lat. 22° 47′, E long. 69° 55′.

MUNDRUCANIA, a district of Brazil, in the prov. of Para, skirted by the Amazon river on the N, and by the Madeira on the W.

MUNDHAM, a parish of Norfolk, 5 m. N of Bungay. Area 1,500 acres. Pop. 303.

MUNDHAM (NORTH), a parish of Sussex, 2 m. SSE of Chichester. Area 1,800 acres. Pop. 495.

MUNDY, a township of Genessee co., in Michigan, U. S. Pop. 440.

MUNEBREGA, a village of Spain, in Aragon, in the prov. of Zaragoza, partido and 8 m. SW of Calatayud, on the brow of a hill. Pop. 1,280. It has a handsome church.

MUNEIARA, a village of the Punjab, on the r. bank of the Ravee, 20 m. SW of Lahore.

MUNERA, a town of Spain, in the prov. of Albacete, and partido of Roda, 29 m. N of Alcaraz. Pop. 2.690. It has a parish-church and a custom-house, and possesses manufactories of linen.

MUNEVILLE-LE-BINGARD, a commune of France, in the dep. of the Manche, cant. and 3 m. E of Saint-Sauveur-Lendelin, near the Ay. Pop. 1,502.

MUNFORDSVILLE, a village of Hart co., in the state of Kentucky, U. S., 111 m. SW of Frankfort, on the N bank of Green river. Pop. in 1840, 274.

MUNG-CHING, a district and town of China, in the prov. of Keang-se, and div. of Ying-chu-fu, in N lat. 33° 22′ 50″, and E long. 116° 37′ 30″.

MUNGDU, a town of India-beyond-the-Ganges, in the prov. and 65 m. WNW of Aracan, on the bay of Bengal, at the embouchure of the Naaf river.

MUNGKUANUM, a tribe of the island of Sumatra, in the district of Pasummah-Lebar. They are governed by 4 pasirahs, collectively sovereigns of the locality.

MUNGRETT, a parish in co. Limerick, 3 m. SW of the city of Limerick. Pop. in 1831, 3,475; in 1841, 3.293.

MUNG-SZE, a district and town of China, in the prov. of Yun-nan, and div. of Lin-gan-fu, in N lat. 23° 24′, and E long. 103° 36′ 10″.

MUNG-TSIN, a district and town of China, in the prov. of Ho-nan, and div. of Ho-nan-fu, in N lat. 34° 52′, and E long. 112° 38′.

MUNGUI, a town of Spain, in the prov. of Bilboa and partido of Bermeo. Pop. 1,303. It has several churches.

MUNGUIA, a town of Spain, in the prov. and 11 m. NE of Bilboa, and partido of Bermeo, in a plain, on the r. bank of a river of the same name. Pop. 1,868. It has several churches and convents. The river has a course of about 9 m. In the vicinity are several flour-mills and iron-works.

MUNGULGHERI, a town of Hindostan, in the presidency of Madras, in the Northern Circars, district and 15 m. NE of Guntur, and 45 m. NW of Musilipatam, at some distance from the l. bank of the Kistna. The principal street is capacious, and the houses generally are neatly built. On an adjacent hill is a pagoda of great reputed sanctity, and at its base is a temple with a lofty gateway.

MUNGULHAUT, a town of Hindostan, in the presidency and prov. of Bengal, district and 21 m. NNE of Rungpur, near the r. bank of the Durlah, and opposite Cutch-Bahar. This is a large and flourishing place; the streets are spacious, and the houses, which are of bamboo, well-built and commodious. It is noted for its manufacture of coarse cotton fabrics; and carries on active trade with Butan. the caravan from that prov. to Rungpur periodically passing through Mungulhaut.

MUNGULWARRA, or MANGALAVARA, a fortified town of Hindostan, in the prov. and 60 m. NNW of Bejapur. It has a well-stocked bazaar, and possesses an active trade. The environs are stony, and generally uncultivated.

MUNG-WHA, a district and town of China, in the prov. of Yun-nan, 150 m. W of Yun-nan-fu, in N lat. 25° 18′, and E long. 100° 30′ 5″. The locality is noted for its musk.

MUNG-YIN, a district and town of China, in the prov. of Shan-tung, and div. of E-chu-fu, in N lat. 35° 50′, and E long. 118° 10′ It is enclosed by walls, and has a fort in the centre. The town itself is of small extent, but it has a large suburb.

MUNICH, in German MUNCHEN, the capital of the kingdom of Bavaria, situated on the W bank of the Isar or Iser, which touches the city on the S side, and flows close along its E boundary from S to N. It stands in a plain, 225 m. W of Vienna, in N lat. 48° 8′ 20″, E long. 11° 34′ 42″, at an alt. of 1,690 ft. above sea-level, and was until recently surrounded with a rampart. Three-fourths of the buildings were within the circuit of this rampart; the remainder, on the outside, constituting the suburbs. Within the last 35 years, from a small crowded city, mostly of old buildings, M. has risen to an eminence that may fairly vie with the most celebrated cities of Europe, magnitude only excepted. The old city forms nearly a circle of 1 m. diam.; and contains several irregular *plutzen* or open places. The streets of M. are in general broad and straight; the houses are high, and of good appearance, and the public edifices are numerous. It is divided into four quarters, by two broad streets which cross in the principal square called the Haupt-Platz; and contains 22 churches, 2 or 3 theatres, all the public offices, 3 or 4 splendid barracks, and several public granaries. Among the public buildings, the old palace holds the first rank. It is a large edifice, consisting of various irregularly disposed buildings, plain on the outside, but in its interior magnificent. Its most remarkable apartment is the kaiser-saal or emperor's hall, one of the noblest apartments in Germany, about 100 ft. in length by 60 ft. The treasury contains a large collection of diamonds, rubies, emeralds, and other costly articles. The royal chapel has also precious deposits, and the cabinet is remarkable for the value of its miniatures. The apartments now appropriated to state purposes occupy a modern edifice on the S side of the old one; their S front forming the N side of Max. Joseph's square. At the back of the palace is the Hof-garten. The old electoral palace, and that once inhabited by Eugene Beauharnois, formerly viceroy of Italy, are fine buildings. The Koenigsbau or new palace, in imitation of the Palazzo Pitti, is a fine modern building. Next come the landhaus where the states hold their meetings, the council-house, the arsenal, and the new opera-house. Among the churches, the principal is that of Notre-Dame, which contains 30 altars, and a monument of Louis IV., who was of the house of Bavaria. It is a large massive structure with two high towers. The church of the Theatines; the church belonging formerly to the Jesuits, remarkable for its wide roof unsupported by pillars; the modern church of All-Saints; the churches of the Augustines; of the knights of Malta and St. Peter; and that called the Basilica, founded in 1835 and completed in 1850, are among the chief ecclesiastical buildings. The latter edifice is a revival of the basilicas of the 5th and 6th cents. It is built of dark red brick. Its interior is divided into 5 naves by 64 columns of grey marble, and richly ornamented with frescoes, while the interior walls are covered with a rich mosaic of marbles. The college occupied by the Jesuits before their expulsion, was one of the richest establishments of that order in Europe. The other buildings that deserve notice are the palace of Maximilian, the barracks, a large hospital, the workhouse, new mint, and the mansions of several Bavarian noblemen.—In the Caroline Platz is a lofty quadrangular obelisk of yellow bronze, erected to the memory of the 30,000 Bavarian soldiers who fell in the Russian campaign.—The splendour of M. consists mainly in its new city, which has risen up in the suburbs, converting three-fourths of them, chiefly on the NW and NE of the old city, into a cluster of magnificent edifices, palaces, private villas, and public gardens.

Institutions.] The scientific and literary establishments of this city are numerous. The Bibliothek or national library, for which a splendid edifice has recently been erected, has been enriched of late years by the addition of collections from suppressed monasteries, and now contains upwards of 600,000 vols., and 18,600 manuscripts. The academy of sciences, erected in 1759, has an extensive collection of specimens of natural history, models, and instruments. The schools are numerous, and on a good footing. Those of a higher class are the military academy, the lyceum, the gymnasium, the veterinary and surgical schools, and the seminary for training teachers. The university, removed from Landshut to M. in 1826, has 4 faculties, with 20 regular professors, and 1,300 students, and a library of 200,000 vols. The other establishments of a scientific nature are the antiquarium, the observatory, the cabinet of medals, the Pinakothek or picture gallery, a modern building in the Baier-strasse, calculated to contain 1,500 large pictures, and the botanical garden. The court-theatre is in the royal palace; it is a miniature of the Odeon at Paris, and its interior is richly decorated. The Glyptothek, in the König's-Platz, is an unrivalled museum of sculptural antiquities. The edifice itself, built in 1816-30, is a quadrangular building covering 3 acres.—The charitable institutions are numerous and liberal. They were rendered effectual for the abolition of mendicity, not only here, but throughout the Bavarian states, by the exertions of the well known Count Rumford. The Krankenhaus or town's-hospital, on the outside of the Sendlingen-Thor, is a vast edifice, with 50 salles or wards.

Environs.] The environs of M. are pleasant, and enlivened by gardens and a variety of places of public resort. The Englisher Garten, or English garden, in the NE suburbs, is a park from 3 to 4 m. in extent, on the banks of the Isar. The Begrabniss Platz or necropolis, in many parts resembles a fine garden. A mile from the city is a royal country seat with fine gardens, known as the Nymphenburg. The suites of rooms in this vast semilunar shaped chateau are very splendid, and the park has a circuit of 8 m.

Population, &c.] The pop. of M. in 1840 was 106,537, inclusive of the military; in 1846 it was returned at 94,830, exclusive of military. It is the seat of the higher courts of justice, and of the government offices; also the place of meeting of the Bavarian parliament. It is to these establishments, to the expenditure of the court, and to the residence of a number of landed proprietors, that the inhabitants chiefly owe their support; for the trade of M. is very limited. The manufactures of M., though diversified, are of small extent, and not likely to increase, as the raw materials must be brought by a long land-carriage. The chief articles made are furniture, tapestry, wine, piano-fortes, telescopes, mathematical and surgical instruments, stained glass, cards, pencils, snuff, cloth, leather, and hardware. The art of lithography owes its origin to M.; but the inventor, Sennefelder, removed to Paris, where the art received its chief improvements. M. possesses none of the extensive manufacturing establishments which we find in other cities of Germany. Its fame rests upon its works in modern art, and these are of a transcendent order. The royal foundry has produced greater works than any similar establishment, as the twelve statues of the throne-room, the monument of Maximilian, the statue of Schiller at Stuttgard, that of Goethe at Frankfort, of Mozart at Salzburg, besides a host of others, and finally, the crowning work, the great 'Bavaria.' At the government works in glass painting at M. the art is caried to a high degree of excellence and minute finish. The articles of furniture manufactured in inlaid work at M. are extensively known and highly appreciated.

History.] M. was founded in 962. In 1632 M. surrendered to the Swedes and German Protestants, under Gustavus Adolphus. In the war of 1704, between the Austrians and Bavarians, it fell into the hands of the former after the battle of Blenheim. It shared likewise in the vicissitudes of the war of 1741, when the elector made his unfortunate attempt to attain the imperial crown. In 1796, the French under Moreau approached the city, and obliged the elector to make a separate treaty. In 1800 Moreau again occupied Bavaria, and secured his superiority by the victory of Hohenlinden. From that time to 1813 Bavaria remained in alliance with France.

MUNILLA, a town of Spain, in Old Castile, in the prov. and 29 m. SE of Logrono. Pop. 1,817. It has a parish-church and a custom-house, and possesses extensive manufactories of common cloth.

MUNIPUR, or MOUNNAPURA, a town of India, in the Cassay territory, in N lat. 24° 20′, E long. 94° 30′, 230 m. NW of Ava. The town and territory are under British protection.

MUNKACS, a town of Hungary, in the comitat of Beregh, 78 m. ESE of Kaschau, and 48 m. N of Szathmar, on the l. bank of the Latorcza. Pop. 3,223. It has a strong fortress, situated on a steep rock and now used as a state-prison, a Greek, a Catholic, and a Calvinist church, and possesses manufactories of hosiery, and saltpetre and alum works. In the environs are mines of iron, and of a species of rock crystal locally named Hungarian diamonds. The fortress was built in 1360 by Theodore Keriatowitsh, duke of Munkacs.

MUNKHOLM, a small island of Norway, in the Trondhjem fiord, opposite the town of Trondhjem or Drontheim, about 1 m. from the shore. It has an ancient castle upon it.

MUNMURRA, a river of New South Wales, in the co. of Bligh, an affluent of the Goulburn.

MUNNERSTADT, a town of Bavaria, in the circle of Lower Franconia, 48 m. NW of Bamberg, and 39 m. N of Wurtzburg, on the Lauer. Pop. 1,400. The vine and hops are extensively cultivated in the environs.

MUNO, a department and town of Belgium, in the prov. of Luxemburg and arrond. of Arlon, 15 m. SW of Neufchateau, on the French frontier. Pop. of dep. 1,487; of com. 938.

MUNOTELLO, a town of Spain, in Old Castile, in the prov. and 20 m. W of Avila, and partido of Piedrahita, on the r. bank of the Adaja, at the foot of a mountain. Pop. 823.

MUNOZ, a town of Spain, in Leon, in the prov. and 32 m. WNW of Salamanca, partido and 27 m. NE of Ciudad-Rodrigo, in a valley near the Guebra. Pop. 485.

MUNSINGEN, a bailiwick and town of Würtemberg, in the circle of the Danube, 8 m. SE of Urach, and 26 m. W of Ulm. Pop. in 1840, 1,527. It has manufactories of linen, plain and damask, hosiery, and pottery.—Also a village of Switzerland, in the cant. and 7 m. SE of Berne, and bail. of Konolfingen, 1½ m. S of the Aar.

MUNSLEY, a parish of Herefordshire, 4 m. NW by W of Ledbury. Area 1,140 acres. Pop. in 1831, 178; in 1841, 238.

MUNSLOW, a parish of Salop, 8 m. N by E of Ludlow. Area 4,410 acres. Pop. in 1841, 773.

MUNSON, a township of Geauga co., in the state of Ohio, U. S., 166 m. NE of Columbus. Pop. in 1840, 1,263.

MUNSTER, one of the four provinces of Ireland; bounded on the N by Connaught; on the E by Leinster; and on the S and W by the Atlantic. Its greatest length, westward, in a straight line from Credan-head in Waterford-harbour to Dunmore-head at the extremity of Corkaguiney peninsula, is 112½ m.; its greatest breadth, southward, in a straight

line from Black-head on Galway-bay to the E side of the entrance of Baltimore harbour, is 103¼ m. The area of the whole prov. comprises 3,874,613 acres of arable land, 1,893,477 of uncultivated land, 130,415 of plantations, 14,693 of towns, and 151,381 of water,—in all, 6,064,579 acres. The surface is much more diversified than that of any of the other three provs.—The coast of all the SW of the prov., or of the greater part of both Cork and Kerry, is rendered intricate by a multiplicity of aggregately long and ramified sea-loughs and bays. The coast of the other portions of the prov. is, for the most part, little indented, and free from curvature.—M. possesses a large proportion of both the natural inland navigation, and the river and lake beauty of Ireland. It shares the navigation of the Suir with Leinster; commands the navigation of the Barrow, possesses all the navigation of the Blackwater, the Bride, the Lee, the Bandon, the Ilen, and the lower Shannon, partly possesses and partly commands the navigation of the middle Shannon, and commands the navigation of both the upper Shannon and its far-extending, artificial ramifications. The known mineral wealth of M. is both varied and comparatively great.—The only canals in M. are the brief one from Tralee harbour to the town of Tralee, and various short stretches upon the line of the Middle-Shannon navigation. The railways of M. are the Great Southern and Western main-trunk, from Dublin, passing Thurles, Holycross, Dundrum, Kilmallock, and Mallow, to Cork; a line from the preceding to Limerick, and another to Tipperary; a line from the city of Cork to Bandon; and a line from Mallow to Killarney.—The extent of roads in M. under the care of county-surveyors, in 1842—exclusive, however, of the county of Waterford—was 9,151 m.

M. is divided into the counties of Clare, in the NW; Tipperary, in the NE and E; Waterford, in the SE; Cork, in the S; Kerry, in the SW; and Limerick, in the centre.—The political prov. of M. is nearly identical with the ecclesiastical prov. of Cashel, now included within the archiepiscopal jurisdiction of Dublin. Pop. in 1792, 1,068,000; in 1821, 1,935,612; in 1831, 2,227,152; in 1841, 2,396,161; in 1851, 1,831,817. Houses in 1792, 184,546; in 1821, 306,995; in 1831, 330,444; in 1841, 364,637; in 1851, 285,726. First-class inhabited houses, in 1841, 10,392; second-class, 65,024; third-class, 125,108; fourth-class, 164,113. Families residing in first-class houses, 16,262; in second-class houses, 86,187; in third-class houses, 137,185; in fourth-class houses, 175,477. Families employed chiefly in agriculture, in 1841, 292,983; in manufactures and trade, 78,989; in other pursuits, 43,182. Families dependent chiefly on property and professions, 9,816; on the directing of labour, 132,674; on their own manual labour, 259,903; on means not specified, 12,761. Of 1,013 agrarian outrages in Ireland in 1851, 251 were committed in the prov. of Munster.

History.] The aboriginal tribes who inhabited the various parts of what now constitutes M., were the *Velabri*, the *Uterini*, the *Vodiæ*, the *Coriondi*, the *Iberni*, and the *Luceni*. The Irish kingdoms or principalities which existed within the prov. prior to the Anglo-Norman conquest, were of fluctuating extent and uncertain stability; and a considerable time previous to the actual descent of the Anglo-Normans, all became consolidated into the two kingdoms of North M. and South M.,—the former not much extended beyond its former limits or the present co. of Clare, and the latter including the greater part of the other five cos. of the present prov. of Munster. During several centuries, beginning in the eighth, the Danes or Osthmen, with various fortune, harassed the most fertile parts of Munster, but were often encountered by the natives with distinguished bravery. In the 11th cent. the celebrated Brian Boromh, king of North M., seized the sovereignty of Ireland, which had been previously possessed by the kings of Meath; but both Brian Boromh's descendants, and the MacCarthys, kings of S. Munster, acknowledged the sovereign ascendency of Roderic O'Connor, king of Connaught. Brief notices of subsequent history will be found in the articles Clare, Cork, Kerry, Limerick, Waterford, Desmond, and Kilmallock: which see. In the reign of Elizabeth, upwards of 574,000 acres of M. were forfeited to the Crown by rebellion, a special governor was appointed over the prov., subordinate to the Lord-lieutenant of Ireland, and called the President of Munster, and a strenuous but futile attempt was made to alter the social tone of the prov., and to ameliorate its condition, by an extensive scheme of English colonization.

MUNSTER, a canton, commune, and town of France, in the dep. of the Upper Rhine, and arrond. of Colmar. The cant. comprises 14 com. Pop. in 1831, 16,816; in 1841, 15,805. The town is 12 m. W of Colmar, in a valley of the same name, at the foot of the Monchsberg, on the Fecht, and at an alt. of 1,266 ft. above sea-level. Pop. in 1841, 3,350. It has a Lutheran consistorial church, and possesses manufactories of plain and printed calico, muslin, and paper, several dye-works, tanneries, and a brewery. The trade consists chiefly in *kirchenwasser*, cheese, butter, and cattle. This town owes its origin and name to a Benedictine abbey founded here in the 7th cent. It was destroyed by fire in 1354, and suffered severely during the 30 years' war. It was ceded to France by the treaty of Westphalia in 1648. —Also a village in the dep. of the Meurthe, cant. and 3 m. SE of Albestroff, and 21 m. ENE of Chateau-Salins. Pop. 585. It has a church remarkable for its architecture.—Also a village of Switzerland, in the cant. of the Grisons, and jurisdiction of Münster-thal, 48 m. SE of Coire, and 4 m. NE of Santa-Maria, near the l. bank of the Rham. Pop. (Cath.) 500.

MUNSTER, a regency or government of Prussia, comprising the NW portion of the prov. of Westphalia. Its area is 132·17 German sq. m. It is divided into the 10 circles of M., Tecklenburg, Warendorf, Beckum, Lüdinghausen, Koesfeld, Recklinghausen, Borken, Ahaus, and Steinfurt. The soil is not in general productive of corn; but flax and hemp are much cultivated. Linen is the chief manufacture. Many of the lower classes go to Holland in summer, in search of employment, returning in winter to their homes; in a few places even females adopt this plan. The chief rivers are the Lippe, which forms the greater part of the S boundary, and the Ems, which flows through the NE part of the gov. A canal of considerable length goes from the city of M. to the Vechta.—The pop. in 1837 was 402,144; in 1849, 421,935.—The greater part of this gov. is composed of the ancient bishopric of the same name, founded by Charlemagne in 802. On the secularization and partition of church-property in 1802, the duke of Oldenburg had 1,000 sq. m. of the bishopric; Prussia had the capital, with 1,485 sq. m. of territory; the rest was divided among different princes, but ultimately was obtained by Prussia in 1815.

Munster, the capital of the above prov., is situated on both sides of the small river Aa, an affluent of the Ems, and about 6 m. from the latter river. It stands in a fertile plain, and was surrounded with a double mound and a moat until 1765, when the moat was drained off, and the mounds laid out in public walks and gardens; the citadel was also demolished at that time, and the materials applied to the erection of an episcopal palace. The houses are lofty but irregular, with painted roofs; and the streets, in some instances, have arcaded walks. The façade of the Rath-haus is very fine. Of the churches the most entitled to notice are the cathedral, the church of St. Lambert and the Liebfrauen-kirche. The bishop's palace is a neat building, with extensive and beautiful gardens. M. had a university, which was suppressed when the new university of Bonn was established in 1818. It is now, however, the seat of a Roman Catholic university, with 10 professors in ordinary, and about 250

students. It has also a Catholic gymnasium, several normal schools, a school of surgery, a deaf-and-dumb school, a school of design, and a botanical garden, with 3 gymnasia for education in its earlier stages. The pop. in 1837 was 19,763. The manufactures of M. have never been considerable; but there are some establishments for weaving coarse linen, and the traffic consists in linen, woollen, wine, refined sugar, and a few other commodities.—John Bockels of Leyden, having the command of a band of fanatics, in 1536 penetrated into Westphalia, announcing himself as a messenger from heaven to reform mankind, and obtained possession of M., where he established his headquarters. The bishop having collected troops, laid siege to the town, which was at last taken by assault, when John of Leyden, as he is called, with two of his chief accomplices, were tortured to death with red hot pincers, and their bodies hung up in three iron cages on the steeple of the church of St. Lambert. In 1648, M. was remarkable for the conclusion of the treaty which put an end to the Thirty years' war. In 1756, M. was besieged first by the French, and afterwards by the Hanoverians.

MUNSTER, a village of Alleghany township, Cambria co., in the state of Pennsylvania, U. S., 133 m. W by N of Harrisburg. Pop. in 1840, about 150.

MUNSTER, Munster-in-Aargau, or Bero-Munster, a town of Switzerland, in the cant. and 13 m. NNW of Lucerne, amt and 5 m. NE of Sursee, near the l. bank of the Winna or Winnen. Pop. 1,600. It was here that the printing-press was first established in Switzerland.

MUNSTERBERG, a walled town of Prussia, in the prov. of Silesia, cap. of a circle of the same name, in the reg. and 38 m. S of Breslau, and 23 m. E of Glatz, on the r. bank of the Ohlau. Pop. in 1837, 3,776. It is ill-built, and, with the exception of the churches, of which there are 2 Catholic and 3 Lutheran, it contains no edifices worthy of note. It has several breweries and distilleries. Pop. of circle 23,594.

MUNSTERBILSEN, a department and commune of Belgium, in the prov. of Limburg, and arrond. of Tongres, watered by the Demer. Pop. 904. It has several breweries.

MUNSTERDORF, a parish of Denmark, in the duchy of Holstein, district and 1½ m. SE of Itzehoe, and 33 m. NW of Hamburg.

MUNSTEREIFEL, a town of Prussia, in the prov. of the Rhine, reg. and 29 m. SSW of Cologne, circle and 10 m. WSW of Rheinbach, on the Erft, at the foot of the Eifelberg. Pop. 1,800. It has a gymnasium, and possesses manufactories of cloth and potash.

MUNSTERHAUSEN, a market-town of Bavaria, in the circle of Suabia, 23 m. W of Augsberg, on the r. bank of the Mundel. Pop. 1,033.

MUNSTERMAYFELD, a town of Prussia, in the prov. of the Rhine, reg. and 14 m. SW of Coblenz, circle and 9 m. SE of Mayenne. Pop. 1,650.

MUNSTERTHAL, a valley of Switzerland, at the SE extremity of the cant. of the Grisons, watered by the Thal, a head-stream of the Adige.—Also a district and town of the grand-duchy of Baden, on the confines of the Schwarzwaldes. Pop. 1,175.

MUNSTERWALDE, a village of Prussia, in the reg. and to the W of Marienwerder, near the Weichsel. Pop. 240.

MUNSUR, a village of the Punjab, on the l. bank of the Chenab, 5 m. W of Doda.

MUNSUR-KARIZ, a group of hamlets in Afghanistan, on the W shore of Lake Ab-istada, and 83 m. S of Ghuzni, on the road from that town to Shawl.

MUNSUR-KHAN-GUNDI, a village of Afghanistan, on the r. bank of the Dori, 20 m. S of Candahar.

MUNTENDAM, a village of Holland, in the prov. and 15 m. SE of Groningen, arrond. and 8 m. W of Winschoten. Pop. 1,050.

MUNTER-CONNAUGHT, a parish in co. Cavan, 4½ m. SW of Virginia. Area 7,432 acres. Pop. in 1831, 2,969; in 1841, 3,167.

MUNTOK. See Mintow.

MUNTZBACH, a town of Austria, in the reg. and 18 m. E of Lintz, and circle of the Muhl, 19 m. SSE of Freystadt. It has a Dominican convent and an hospital.

MUNZENBERG, a town of the grand-duchy of Hesse-Darmstadt, and prov. of Upper Hesse, bail. and 5 m. E of Butzbach, and 11 m. S of Giessen, near the l. bank of the Wetter. Pop. 825. On an adjacent mountain of the same name are the ruins of a fortress.—Also a mountain of Styria, in the circle of Bruck, near Leoben.

MUNZESHEIM, a market-town of Baden, in the circle of the Middle Rhine, bail. and 6 m. N of Bretten, on the Kraichback, at an alt. of 17 yds. above sea-level. Pop. 1,145.

MUNZINGEN, a village of Baden, in the circle of the Upper Rhine, and SW of Freyburg. Pop. 830. It has a castle and baths.—Also a village of Switzerland, in the cant. and to the SE of Berne.

MUNZTHAL-SAINT-LOUIS, a hamlet of France, in the dep. of the Moselle, cant. and 7 m. SW of Bitche, com. and 2 m. SW of Lemberg. It has a large glass-work.

MUONIO, a river which has its source in Lake Kilpis, in N lat. 69°, E long. 20° 40′; runs first SE along the confines of Sweden and Russia, between the prefecture of N. Bothnia and the grand-duchy of Finland to Muoniska, where it forms the cataract of Eianpaika; thence directs its course to the S; and, after a total course of about 180 m., throws itself into the Tornea on the l. bank, at Paialokengis, and 120 m. N of Tornea. It bears in the upper part of its course the name of Koengaernae-elf.

MUONISKA, a village of Russia in Europe, in the grand-duchy of Finland, gov. and 225 m. N of Uleaborg, on the l. bank of the Muonio, which here forms the cataract of Eianpaika.

MUOTTA, a village of Switzerland, in the cant. and 6 m. ESE of Schwytz, in the upper valley, and on the r. bank of a river of the same name, an affluent of Lake Waldsetten. It has a convent and a saw-mill. An engagement took place here in 1799, between the French and the Russians under Suwarrow.

MUPPERG, a village of the duchy of Saxe-Meiningen, S of Sonneberg. Pop. 317.

MUR, a canton, commune, and town of France, in the dep. of the Cotes-du-Nord, and arrond. of Loudeac. The cant. comprises 5 coms. Pop. in 1831, 5,797; in 1841, 5,653. The town is 11 m. WNW of Loudeac, and 26 m. SSW of St. Brieuc, near the l. bank of the Blavet. Pop. in 1841, 5,653.—Also a village in the dep. of the Loir-et-Cher, cant. and 11 m. NNE of Selles-sur-Cher. Pop. 730.

MUR. See Muhr.

MURACH, a town of Bavaria, in the circle of Regen, presidial and 6 m. N of Neuburg, and 24 m. E of Amberg.

MURAD-SHAI. See Euphrates.

MURAFA, a market-town of Russian Poland, in the gov. of Podolia, 37 m. N of Jampol. Pop. 1,800.

MURA-KOZ, or Murakös, a district of Lower Hungary, of a triangular form; having the Muhr on the N; the Drave on the S; and its SE angle formed by the confluence of these rivers. On the W it adjoins Styria. It is about 30 m. in its greatest length. Pop. 50,000.

MURAMUR, a creek of New South Wales, in the co. of Bathurst, an affluent of the Belubula.

MURANGULLA, a creek of New South Wales, in the co. of Bathurst, an affluent of the Belubula.

MURANO, a town of Austria, in Lombardy, in the gov. and deleg. and 1½ m. N of Venice, on the N side of an island of the same name. Pop. 4,000. It possesses extensive manufactories of glass, beads, &c. The pop. of the island in the 15th cent. is said to have been 30,000.—In the vicinity is another island named Santo-Michielo-di-Murano, with a fine church, and formerly noted for its abbey.

MURANY-VAR, a village and fortress of Hungary, in the comitat of Gosmöre, 25 m. WNW of Rosenau, and 22 m. ESE of Briesen, near the sources of the Jolsva. It has manufactories of hardware, a paper-mill, and iron-mines. Little now remains of its vast castle, except some of the outer walls and a few dilapidated towers. Hemp is extensively cultivated in the environs.

MURAS, a tribe of Indians, who inhabit a large village on the r. bank of the Madeira, in the prov. of Para, Brazil, above the town of Borba. The men adorn their arms and legs with feathers, and wear, in incisions which they make in the nose, ears, and lips, shells or the teeth of animals. Some of them allow the beard to grow, and cover their bodies with paintings of different figures. Polygamy is practised by the chiefs only.

MURASSON, a commune and town of France, in the dep. of the Aveyron, cant. and 5 m. S of Belmont, and 17 m. SSW of Saint-Affrique. Pop. 2,631.

MURAT, an arrondissement, canton, commune, and town of France, in the dep. of the Cantal. The arrond. comprises an area of 84,101 hect., and contains 3 cant. Pop. in 1831, 35,364; in 1841, 35,676. The cant. comprises 13 com. Pop. in 1841, 13,657. The town is 26 m. NW of Aurillac, and 14 m. NW of St. Flour, at the foot of the Cantal, near the l. bank of the Alagnon.. Pop. in 1789, 1,910; in 1846, 2,394. This town is one of considerable antiquity, but is small and ill-built. It is commanded by a conical-shaped basaltic hill, on the summit of which was the castle of Bonnievic, demolished by order of Louis IX. It has manufactories of lace, coarse cloth, several saw-mills and lime-kilns, and has some trade in cattle, horses, and cheese. In the environs are several slate-quarries.—Also a canton, commune, and town in the dep. of the Tarn, and arrond. of Castres. The cant. comprises 2 com. Pop. in 1831, 4,224; in 1841, 4,384. The town is 35 m. E of Castres, near the Viaur, an affluent of the Agout. Pop. 2,942. It has manufactories of coarse woollen fabrics, and of cheese. The trade consists chiefly in cattle and poultry.

MURAT-LE-GUAYRE, or MURAT-DE-GUAIRE, a commune of France, in the dep. of the Puy-de-Dome, cant. and 8 m. SSW of Rochefort, near the r. bank of the Dordogne. Pop. 1,023.

MURATO, a canton, commune, and town of Corsica, and arrond. of Bastia. The cant. comprises 4 com. Pop. in 1831, 1,653; in 1841, 1,972. The town is 12 m. SW of Bastia. Pop. 673. It has an oil-mill.

MURAU, a town of Austria, in Styria, in the ldgb. of Gratz, circle and 24 m. W of Judenberg, on the Muhr. Pop. 1,000. It is noted for its iron and steel-works, and has a fine castle belonging to the prince of Schwarzenberg.

MURAVERA, a village of Sardinia, in the dio. of Capo-Cagliari, prov. and 36 m. S of Lanusei, and 36 m. NE of Cagliari. Pop. 1,825.

MURAZ (LA), a village of Sardinia, in the dio. of Savoy, and prov. of Carouge, mand. and 4 m. W of Reignier, and 7 m. S of Geneva. Pop. 1,109. It has a tile work.

MURAZZANO, a town of Sardinia, in the dio. of Coni, capital of a mandemento, prov. and 14 m. NE of Mondovi, and 18 m. S of Alba. Pop. 2,257.

MURCA-DI-PANOYAS, a town of Portugal, in the prov. of Tras-os-Montes, comarca and 15 m. ENE of Villa-Real, and 34 m. NW of Torre-de-Moncorvo, in a mountainous locality, watered by the Tinhela. Pop. 887. It has several churches, a convent, and a palace, and possesses an active trade in charcoal.

MURCHEBOLUC, a parish of Australia-Felix, in the co. of Grant, bounded on the S by the Barwon river.

MURCHISON, a river of Western Australia, in the co. of Victoria, which flows into Gantheaume bay.—Also a mountain of New South Wales, in S lat. 21° 25′, E long. 143° 25′.

MURCHISON'S STRAIT, a strait at the head of Baffin's bay, the entrance of which has long been known to navigators as Whale sound, but which Captain Inglefield, in his recent voyage to the Arctic regions in search of Sir John Franklin, has discovered to be an entrance into the Polar basin, thus apparently defining Greenland as an island. At the entrance of this strait is a cluster of islands, to the principal of which Capt. Inglefield gave the name Northumberland island. Leaving this sound, as it had hitherto been termed, he sailed N in the direction of Smith sound, and there found a great extent of sea stretching far before him. On the 27th of Aug. he attained the lat. of 78° 35′, nearly 120 m. farther N than any former voyagers. He was then in a great sea, the entrance of which was 35 m. across, only partially encumbered with ice, and which upon the E shore seemed perfectly navigable. He had thus entered the great Polar basin; and he believed that he would have pushed through in the direction of Behring strait had not a gale arisen which fairly blew him out of it and defied his utmost efforts, for the small high-pressure engine with which the Isabel was fitted was only equal to pushing the vessel in calms or light winds. Captain Inglefield, taking into consideration the strong current which he found setting from the S into the Polar basin and through M. strait, could not but feel sure that he had discovered and entered that Polar basin, and that probably this strait and Smith sound were both entrances into that basin. The formation of the land and other circumstances induced him to believe that Baffin bay could no longer be considered as a mere bay, but rather as an arm of communication, and that the Polar sea might be said to commence from Lancaster sound on the W, and from Whale sound on the E.

MURCIA, a province in the SE of Spain, bounded on the N and NW by Castile; on the E by Valencia; on the S by the Mediterranean; and on the W by Andalusia; and now divided into the two provs. of M. and Albacete. It is 130 m. long and above 60 m. broad, with a total area of 7,877 sq. m., and a pop. in 1833 of 474,315, of whom 283,540 belonged to the new prov. of M. Its aspect is in general mountainous. Its mountains are almost all branches of the *Montes Orospedani* of the Romans. The most remarkable are the Sierras-de-Penas, de-Chinchilla, d'Orihuela, d'Almanza, and de-Carascoy. The prov. is watered by the rivers Segura, Guadalentin, Benamor, and Guardavar. The climate is delicious, but the soil is in general light and sandy. The Huerta, or tract watered by the Segura, is highly fertile; in the Campos, it is of equal fertility, but not so well-watered. The little farms in these districts look clean and thriving; the corn raised in them is excellent, but silk is the great staple. Wheat, barley, hemp, rice, vines, olives, mulberries, saffron, citrons, pomegranates, and almonds, are freely grown in this quarter of Spain. The mountains contain good pasturages, but are neglected and wild; and in some parts infested by wild boars and wolves. Among the mineral productions are lead, copper, sulphur, nitre, alum, crystal, and marble; but there is little or no mining industry. The only fabrics manufactured in the prov. are a few coarse cloths and silk stuffs in the town of Murcia; mats made from the *esparto* rush, and some earthenware, soap, and cutlery, in other parts of the prov. The extent of coast is considerable, and presents Carthagena, one of the best harbours in the Mediterranean: but the roads leading to the interior are bad. The exports are cutlery, hemp, silk, ribbons, wine, corn, soda, saffron, and bassweed. The inland trade is

promoted by three great fairs held in the month of September, at Murcia in the centre, at Lorca in the S, and Albacete in the N. The chief towns are Carthagena, Murcia, Lorca, Chinchilla, Albacete, Villena, and Almanza.—The inhabitants of this prov. are proverbial, even in Spain, for indolence and apathy. An exception to this remark, however, is found in one town, Carthagena, the majority of whose inhabitants are of French, English, or Italian descent. It is also asserted that more deeds of violence are committed in this prov. and in Valencia than in any other part of Spain. M. formed part of the caliphate of Cordova till 1144, when it was united to the kingdom of Granada, with which it remained incorporated till 1266.

MURCIA, the cap. of the above prov., is situated on the N bank of the Segura, 250 m. SE of Madrid, and 28 m. NNW of Carthagena, at an alt. of 446 ft. above sea-level. Pop. in 1845, 43,488. It is built in the midst of a large and beautiful valley, bounded at the distance of nearly 4 m. to the E by lofty and naked mountains. The town was formerly surrounded with walls, but is now open. It is divided into the Old and New towns, and on the S side of the river is a suburb. It is ill-built throughout; the streets are irregular, crooked, and so narrow that there are hardly three or four in which two carriages could pass. The only good square is that in which the bull-fights are exhibited, which is spacious, and surrounded by neat houses; the two best streets, the Plateria and the Traperia, and the quays along the Segura, are the only parts of the city that present any degree of animation. M. has 11 parish-churches, 10 monasteries, 9 convents, 3 colleges for seculars, and 3 hospitals. There are two public libraries, consisting almost entirely of old books on scholastic theology. The bishopric of Carthagena was transferred hither in 1291. The dio. comprehends almost the whole prov. of M., and the bishop's revenue is said to exceed £20,000 a-year. The only public buildings deserving notice are the churches, and in particular the cathedral, which stands in the same square as the episcopal palace, with a number of columns, statues, and other decorations; the interior has at the entrance a large dome, beyond which are three aisles separated by enormous pillars formed of groups of slender columns. The churches of Santa Olalla and San Juan are on the same plan, but in better taste; those of La Caridad and St. Peter, and the Franciscan and Dominican convents, are all richly decorated. The manufactures of M. are trifling. The working of bassweed employs a number of hands, and furnishes mats for export. There is here a refinery of saltpetre, and at the distance of 4 m. from the town are several powder-mills worked for account of government. An establishment for twisting silk supplies the weavers of Granada, Talavera, and other places; but the manufacture of silks in M. does not now employ above 300 hands.—M. is first mentioned in history in 713, when it was taken by the Moors after a desperate resistance. In 1236 it became the capital of a separate kingdom belonging to the Moors. In 1265 it was taken by Alphonso X. of Castile, who fortified it and peopled it with Catalans, Aragonese, and emigrants from France. In the beginning of the 18th cent. M. declared for the Bourbon branch.

MURCIELAGOS, a tribe of Indians who inhabit the banks of the Rio-de-los-Enganos, an affluent of the Yapura, in the SE part of New Granada.

MUR-DE-BARREZ, a town of France, in the dep. of the Aveyron, 25 m. N of Espalion, on the r. bank of the Pleaux. Pop. 1,200. It has manufactories of caddis and of several kinds of cloth.

MURDER-KILL, a hundred of Kent co., in the state of Delaware, U. S. Pop. in 1840, 4,768.

MURE (LA), a canton, commune, and town of France, in the dep. of the Isere, and arrond. of Grenoble. The cant. comprises 20 com. Pop. in 1831, 11,220; in 1841, 12,241. The town is 24 m. S of Grenoble. Pop. in 1841, 3,106. It has manufactories of sailcloth, nails, and leather, and several tileworks. In the vicinity are the thermal baths of La-Motte-Saint-Martin.

MURE (LA), or MURE-SUR-AZERGUES (LA), a commune of France, in the dep. of the Rhone, cant. and 2 m. SSE of St. Nizier, and 13 m. WNW of Villefranche. Pop. 1,111.

MURECK, a town of Styria, in the ldgb. and circle and 33 m. SSE of Gratz, and 15 m. NE of Marburg, on the l. bank of the Muhr. Pop. 845.

MURELAGA, a town of Spain, in the prov. and 26 m. ENE of Bilboa, partido and 6 m. W of Marquina. Pop. 1,107. It has a parish-church, a convent, and sulphureous baths.

MURET, an arrondissement, canton, commune, and town of France, in the dep. of the Haute-Garonne. The arrond. comprises an area of 155,484 heet., and contains 10 cant. Pop. in 1831, 86,709; in 1841, 89,082.—The town is 12 m. SW of Toulouse, on the l. bank of the Garonne, at the confluence of the Longe, and at an alt. of 168 yds. above sea-level. Pop. in 1789, 3,000; in 1821, 2,316; in 1831, 3,787; in 1841, 4,000; and in 1846, 2,320. It occupies a pleasant situation in a fine valley, and is tolerably well built. The manufacture of a few coarse woollen fabrics, earthenware, and leather, a distillery of brandy, and a tile-work, form the chief branches of local industry. The Garonne is here crossed by a fine bridge. This town is noted for the battle which took place under its walls in 1213 between the Count de Montfort and the king of Aragon, in which the latter was killed and his army put to the rout.

MURFJELD, a mountain of Norway, in the prefecture of N. Trondheim, on the confines of Sweden.

MURFREESBOROUGH, a village of Hertford co., in the state of North Carolina, U. S., 142 m. ENE of Raleigh, on the S side of Chowan river.—Also a village of Rutherford co., in the state of Tennessee, 34 m. SE of Nashville, on a branch of Stone creek. Pop. 1,500. This village was formerly cap. of the state.

MURG, a river which has its source in Würtemberg, in the circle of the Schwarzwald, near the Kniepass defile; passes Freudenstadt; runs N; enters the grand-duchy of Baden; bends NW past Gernsbach and Rastadt; and 5 m. from the latter town, throws itself into the Rhine, on the r. bank, and after a course of 48 m.—Also a village of Baden, in the circle of the Upper Rhine, 35 m. S of Friburg, on the r. bank of the Rhine. Pop. 1,006.—Also a river of Switzerland, which has its source on the SE confines of the cant. of Thurgau, in the Hornli, and flows NNW; passes Frauenfeld; and 3 m. below that town joins the Thur.

MURGADOS, a town of Spain, in Galicia, in the prov. and 11 m. WSW of La Corunna, and 3 m. SSE of Ferrol, between the bay of that name and Sada bay.

MURGAIN, or COW-BAY, a bay on the E coast of Cape Breton, near Nova Scotia, a little to the N of Miray bay, and 15 m. E of Sydney. It is 6 m. in length from E to W, and 1½ m. in medium breadth.

MURGHAN, a village of Afghanistan, on the l. bank of the Turnuk, 23 m. E of Candahar.

MURGHAUB, a river of Afghanistan, which has its source in the Hazareh country; runs W through a district of the same name; then curves WNW; passes Merochak or Meru-Rud; enters Turkin; and is lost in the sands of the desert of Kharasm or Khiva, after a total course of 250 m.

MURGIAN, a town of Persia, in the prov. and 51 m. NNW of Kirman.

MURGORE, a town of Hindostan, in the presidency of Bombay, and prov. of Bejapur, 21 m. N of Darwur. It is enclosed by a brick wall and deep ditch, and is a place of considerable importance.

MURGUIA, a town of Spain, in the prov. of Alava, partido and 12 m. E of Orduna, and 11 m. NW of Vittoria, in a marshy but fertile locality. Pop. 208.

MURHIR, a parish in co. Kerry, 4 m. NE by N of Listowel, containing the village of NEWTOWNSANDS: which see. Area 10,699 acres. Pop. 3,293.

MURI, a parish and village of Switzerland, in the cant. of Aargau, 17 m. SE of Aarau, and 12 m. SW of Zurich, on the Bänz. Pop. 1,000. It has a celebrated Benedictine abbey, founded in the 11th cent., the abbot of which bore the title of a prince of the empire, containing a fine library, and possesses manufactories of silk fabrics.—Also a village in the cant. and bail. and 3 m. SE of Berne, on the road from that town to Thun.

MURIAHE, a river of Brazil, in the prov. of Rio-de-Janeiro, which has its source in the Serro-do-Pico; runs SE; and joins the Parahiba, on the l. bank, near San Antorio, and after a course of about 45 m. Its principal affluent is the Morto. On its bank are numerous sugar-manufactories.

MURIALDO, a town of Sardinia, in the div. of Genoa, prov. and 17 m. W of Savona, mandemento and 5 m. WSW of Millesimo, on the l. bank of the Bormedo. Pop. 2,500.

MURIAS-DE-PAREDES, a judicial partido and town of Spain, in Leon. The partido comprises 160 pueblos. Pop. of town 252.

MURIBICA, a village of Brazil, in the prov. of Espirito-Santo, and district of Itapé-Mirim. It has a church, and possesses a sugar-house and a distillery of rum. See also BORRACHA and CABAPUANA.

MURICHOM, a village of Butan, 60 m. S of Tassisudon, on a mountain near the r. bank of the Tchintchieu river. In 1783 it consisted of only 24 houses, of two stories, built of stone cemented with clay, and roofed with planks of fir. The lower story is appropriated to the use of cattle and other animals. The surrounding district is well-cultivated, and produces different kinds of grain. The slopes of the hill are formed into terraces on which *tizpaut* or native cinnamon, peaches, raspberries, and strawberries, are grown in great abundance.—*Turner.*

MURIEL-DE-LA-FUENTE, a town of Spain, in Old Castile, in the prov. and 17 m. W of Soria, partido and 17 m. ENE of El-Burgo-de-Osma, on the r. bank of the Tajala. Pop. 258. It contains a palace, and a fine fountain from which it derives its name.

MURIELVIEJO, a town of Spain, in Old Castile, in the prov. and 20 m. W of Soria, and partido of El-Burgo-de-Osma, near Muriel-de-la-Fuente. Pop. 200. It has a considerable trade in wood.

MURILLO-DE-GALLEGO, a town of Spain, in Aragon, in the prov. and 42 m. N of Zaragoza, and partido of Egea-de-los-Caballeros, on the l. bank of the Gallego, at the foot of a steep mountain. Pop. 857.

MURILLO-DE-RIOLEZA, or MURILLO-DE-RIO-LIEZA, a town of Spain, in Old Castile, in the prov. and partido and 8 m. SE of Logrono. Pop. 1,146. It has a parish-church and a custom-house.

MURILLO-EL-CUENDE, a town of Spain, in the prov. of Navarra, and partido of Tafalla, 21 m. SSE of Pamplona, on the r. bank of the Cidaco-de-Navarra. Pop. 189. It is supposed to occupy the place of an ancient fortress.

MURILLO-EL-FRUTO, a town of Spain, in the prov. of Navarra, and partido of Tafalla, 22 m. SE of Pamplona, in a plain, on the r. bank of the Aragon. Pop. 696. It has an hospital, and possesses 2 oil-mills and a distillery of brandy.

MURIMBULA, a chain of mountains, in the territory of Mozambique, to the N of Sena, between the Zambese and Shire.

MURIZ, or MURITZ, a lake of Mecklenburg-Schwerin, 19 m. in length from N to S, and connected on the S with Lake Flesen. It is formed by the Elde, and is the largest lake in the N of Germany.

MURLIN, a village of France, in the dep. of the Nievre, cant. and 9 m. ENE of La Charité. Pop. 324. It has a nail-manufactory and several forges.

MURMUR, a village of Nigritia, in Haoussa, 15 m. WSW of Katagum, near the l. bank of the Shashum.

MURNAU, a town of Bavaria, in the circle of Upper Bavaria, ldgr. and 12 m. SSW of Weilheim, and 38 m. SSW of Munich, between lakes Staffel and Rieg. Pop. 1,500. It has a large slate-work.

MURO, a town of the island of Majorca, and partido of Inca, 27 m. NE of Palma, in a fertile plain. Pop. 2,300.—Also a town of Valencia, in the prov. and partido of Alicante. Pop. 3,654. It has a parish-church, an hospital, an elementary school, and a custom-house.—Also a town of Naples, in the prov. of the Basilicate, district and 18 m. SW of Melfi, and 17 m. NW of Potenza. Pop. 2,000.—Also a town in the prov. of the Terra-d'Otranto, dist. and 21 m. ENE of Gallipoli, cant. and 3 m. ESE of Maglie. Pop. 1,600.

MURO-DE-AMBAS-AGUAS, a town of Spain, in Old Castile, in the prov. and 36 m. SE of Logrono, and partido of Cervera-del-Rio-Alhama, in a fine fertile plain. Pop. 660. It has 2 churches and an hospital, and possesses a fulling and a spinning-mill.

MURO-DE-CAMERAS, a town of Spain, in Old Castile, in the prov. and 17 m. SSE of Logrono, and partido of Torrecilla-de-Cameros, on a height. Pop. 295. It contains 2 churches and an hospital, and has manufactories of coarse woollen fabrics, and in the environs are quarries of fine stone.

MUROL, a town of France, in the dep. of the Puy-de-Dome, cant. and 5 m. N of Besse, and 15 m. W of Issoire. Pop. 600.

MURON, a commune of France, in the dep. of the Charente-Inferieure, cant. and 8 m. NNE of Tonnay-Charente, and 10 m. NE of Rochefort-sur-Mer. Pop. 1,094.

MUROS (SAN-PEDRO-DE), a judicial partido and town of Spain, in Galicia, in the prov. of La Corunna. The partido comprises 35 parishes. The town is 60 m. SW of La Corunna, and 38 m. W of Santiago, on the W side of a small bay of the Atlantic of the same name. Pop. 3,912. It contains 2 churches, numerous chapels, and a custom-house. The houses are old, and many of them greatly dilapidated. The harbour is small, and capable of receiving small vessels only, but it is defended by a good fort. Fishing and navigation form the chief employments of the inhabitants.

MUROWANE, a town of Galicia, in the circle and 14 m. W of Sambor, and 8 m. ESE of Dobromil, on the r. bank of the Striwiaz.

MURPHY, a village of Cherokee co., in the state of N. Carolina, U. S., 367 m. W by S of Raleigh, at the junction of the Hiawassee and Valley rivers.

MURR, a river of Würtemberg, in the circle of the Neckar, which has its source in the district of Murrhard, and flows into the Neckar.

MURR. See MUHR.

MURRA, a town of Arabia, in Yemen, 15 m. NW of Zebid, and 102 m. SW of Sana, in a plain. It contains some handsome tombs, and a large caravanserai.

MURRAGH, or MORAGH, a parish 3½ m. WNW of Bandon, co. Cork. Area 8,755 acres. Pop. 3,175.

MURRAIE, a mountain-torrent of Sind, which has its source in the Kirlar range, and after a course, in a generally E direction, of about 25 m., falls into the Dhurwul, an affluent of the Sind.

MURRA-KAIL, a village of Afghanistan, 55 m. E of Cabul.

MURRAY, a harbour of the Yellow sea, on the coast of one of the principal islands of the Amherst group, in the Corean archipelago. It affords good anchorage.

MURRAY, a county of Western Australia, bounded on the N by the co. of Perth; on the E by that of Grantham; on the S by the co. of Wellington; and on the W by the Indian ocean. It is intersected from N to S by the Darling range, and traversed by several rivers, the principal of which, bearing the same name, is formed by the confluence of the Hotham and William rivers, in the NW corner of Wicklow co., and flows through Peel inlet into the ocean. Its highest summit, Mount William, has an alt. of 3,500 ft. above sea-level. The chief town is Peel, situated at the extremity of the peninsula, by which Peel inlet is enclosed on the W.—Also a co. of New South Wales, bounded on the N by the co. of King, from which it is separated by the Yass river; on the E by the cos. of Argyle and St. Vincent; on the S by the district of Moneroo; and on the W by the Murrumbidgee. It is 78 m. in length, and 44 m. in breadth, and comprises an area of 1,458,080 acres. Pop. in 1846, 2,721. Its chief town is Queanbeyan, on a river of the same name. In the NE is Lake George.—Also a district of Australia Felix, bounded on the S and W by the Goulburn to its junction with the Murray; on the N and NE by the Murray and its tributaries; and on the SE by the Australian Alps. It comprises an area of about 8,000,000 of acres, and 1,558 inhabitants.—Also a mountain of New South Wales, in the district of Murrumbidgee, near Orungal.

MURRAY, the largest known river of the Australian mainland, formed by the union of the Darling, the Murrumbidgee, and the Hume or Murray, and draining, by means of their great head-branches, a vast extent of country, probably exceeding 550,000 sq. m. The united stream, or Lower Murray, flows first W to the meridian of 139° 42′, and then turns S, and after forming a large lagune called Lake Alexandrina, discharges itself by several mouths into Encounter bay, to the SE of Adelaide, in about S lat. 35° 20′, E long. 139°. The Murray or Hume rises on the N flanks of the Australian Alps, in Manes creek, descending from Mount Tamburambu, Swampy and Inde rivers descending from Mount Kosciusko, and Kurriong creek flowing N to unite with these streams in about S lat. 36° 15′, E long. 148° 10′. The Murray then flows in a prevailingly W course, with an inclination northwards, to the meridian of 145° E, where it receives the Goulburn coming from the S, and then turns NE; receives the Logan coming from the E, under the parallel of 34° 50′ S, and in 143° 20′ E long.; and about 25 m. below the junction of that river, receives on its r. bank the Murrumbidgee, coming from the E, and bearing with it the tribute of its large affluent the Lachlan. The Upper M. or Hume appears to have a perennial supply of water, maintaining the constancy of its stream against all casualties of climate; but the Murrumbidgee has been known to cease running during seasons of long-continued drought. At the junction of the latter river, the M. has an average breadth of from 300 to 400 ft.; and it pursues a NW course, through a country covered with dense scrub, to the meridian of 142° E, where it receives the Darling coming from the NE. Below the junction of this great river, which, when seen by Sturt in January 1831, had a width of 100 yds., and depth of 12 ft., at its point of influx, the M. expands to a breadth of 600 or 700 yds., and flows in a prevailingly W course under the parallel of 34° S, to its great South band, in 139° 42′ E long. The scenery of this great river is of a varied character; now it traverses low and monotonous plains, sweeping between steep cliffs and with occasional rapids; again it winds amidst undulating grassy banks and picturesque hills, beneath which lie rich alluvial flats, subject to frequent and sudden inundations. In 1813, after a lapse of 25 years from the first settlement in Australia, Mr. Evans, a government-surveyor, laid open to our knowledge the country to the W of the Blue mountains, when the Lachlan and the Macquarie were supposed to flow into an extensive inland sea. In 1828, the discovery of the river Murray, and the connection with it of its great affluent the Darling, gave immortality to the enterprise, the fortitude, and the sagacity of the courageous and humane Sturt. The swamp in which the Lachlan and the Macquarie have hitherto been known to flow, had now disappeared under severe drought, and the track of the Macquarie was followed until it united with the Darling. "It is not easy," says Sir Charles Napier, "to express the anxiety with which we read of the determination taken by Sturt to retrace his steps, and return by the sources of the M. and Murrumbidgee. One thousand miles had he floated down these rivers encompassed by many dangers; he had at last reached the sea, with the strength and the provisions of his party nearly exhausted; they were also surrounded by tribes threatening hostility. In this fearful crisis Sturt formed the hazardous resolution to remount the river. If to descend with the current was an enterprise of difficulty, what must have been the labour of ascending? It was descended in the full enjoyment of physical strength and ample supplies of food; it was ascended with the increased difficulty of an opposing current, under severe privations, and with exhausted muscular power. The sufferings which these men experienced produced temporary insanity in one of them, and blindness in Capt. Sturt himself. Eighty-eight days were expended in the execution of this arduous and successful achievement." In 1850—another epoch of 25 years—hastening to completion from the date of his own great discovery—Sturt, being now colonial secretary of S. Australia, affixed his official signature to an announcement that the legislature of the colony offered a premium from the local treasury of £2,000 to each of the first and second iron steamers of 40 horse power, not drawing more than 2 ft. of water, which shall, from and after October 1851, successfully navigate the Murray, from the Goolwa, near the sea, to the junction of the Darling in the colony of New South Wales. In the months of September and October 1850, lieutenant-governor Sir Henry Young, by personal examination, established the practicability of this great river for steam-navigation for at least 700 m. From the Rufus creek, flowing from Lake Victoria into the Murray at a point 150 m. above Murundi, and 240 m. from Adelaide, seventy soundings were taken to the mouth of the Darling; the deepest 3½ fathoms, the shallowest 8 feet. The soundings for the most part gave 2 fathoms. At the Darling the flood-mark on the trees was 11 ft. high; at its junction with the Murray it was 100 yds. wide, and 2 fath. deep. The Murray at the Darling was 290 yds. wide, and this width was reported to be not materially altered onwards to the Murrimbidgee and Lachlan. The Rufus creek rose 10 inches in 7 days. The flood-mark on the trees

was 9 ft. high. The creek itself is 9 m. in length, with a depth varying from 8 to 2 ft., the water shallowing near its entrance into lake Victoria. This lake is about 14 m. by 6 m., with 3 ft. water in the middle. Lake Alexandrina from Point-Pomond to Point-Sturt is 25 m. across, with a channel of 1½ fath. From Point-Sturt to the Goolwa the distance is 15 m., with a breadth of water generally exceeding a ½ m., a channel of 300 yds., and a depth of 1½ fath. Close to the Goolwa, alongside of a limestone formation projecting into the water, 19 ft. of water are obtained. This is a good site for a contemplated jetty; and the basin here, sheltered by Hindmarsh island, is about as spacious as the commodious harbour at the north arm of Port Adelaide creek. In September the water was observed to run out from the Rufus creek into the river; in Oct. it was running up the creek from the river. Towards the middle of October the river was rising at the rate of about 2 inches a-day. The flood usually occurs in Oct., and shows itself on the Darling earlier than in the M. Between Murundi and Reedy Creek mine, when the severest gale of wind occurred that has ever been known in S. Australia, the river rose upwards of 2 ft. in the course of the night, on October 13th, and on the Tuesday following subsided to its former level. This effect was supposed to be caused by the wind driving the waters of Lake Alexandrina up the river. In the upper part of the river shoals were visible every three or four miles; the water being, however, invariably deeper than usual opposite to them. The channel of the river, throughout its entire course, is easy to be discerned from the great difference generally between the height of the bank on either side; and of course the high bank indicates the deep channel. The distance from the Goolwa to the Darling is about 680 m., throughout which there are no falls, or rapids, or other impediments of any kind, except the insignificant ones already alluded to; and throughout the entire distance there is a channel most amply deep and wide for steamers of a greater draught of water than that of the limit prescribed by the legislature of S. Australia to the competitors for the premium for the successful navigation of the river Murray from the Goolwa to the Darling." The alluvial land from the Goolwa to the Darling varies in depth from a ½ m. to 3 m. on the border of the river. There is abundance of timber, and particularly fine above Murundi. "It may safely be conjectured," says Governor Young, "that the necessities of a denser population would soon induce a resort to expedients for preventing the inundation of the river and its tributary creeks, and for raising and retaining supplies of water for irrigation of both the alluvial and sandy land along the extensive course of this noble river." The climate on the river was sharply cold in the early morning; cool and pleasant after sunset; and fiercely hot at mid-day in the scrub and on the water. The game on the river is abundant. Black swans, various species of ducks, bitterns, and bustards are numerous; and fine cod and golden perch are caught by the natives, who supply the Burra-Burra mines with fish. The natives were seen in great numbers—unoffending, useful, and obliging. Six natives rowed from Wellington to the Darling, and from the Darling to the Goolwa, nearly 1,400 m. A tram-way is now in progress connecting Port Elliot with the elbow of the Murray at the mouth of the Goolwa. The navigation of this river has become an object of vast and pressing importance from the fact that the gold diggings, hitherto reported, are chiefly connected with the basin of the Murray. The locality of the diggings first reported is in the upper basin of the Macquarie. On the head-stream of the Fish river is Bathurst, and to the l. of it a stream, about 40 m. long, which runs from the Bathurst road to Lewis ponds: this is the Lewis river. Its western feeder is the Summerhill creek, from which the first exports were obtained. The width of these creeks, at their junction, is reputed to be about 50 or 60 yds., and the water sometimes rises suddenly 20 ft. The diggings extend downwards all the way to the Macquarie, and are called Ophir. Gold is also reported in the feeders of the Lachlan. Besides the indications in the valleys of the Murray, on the western side of the Rocky mountains, there are reports of gold on the E side, more particularly in several parts of the Hunter river, several of the heads of which rise close to those of the Macquarie. Gold is likewise reported at Bondi, 6 m. from Sydney, and in the neighbourhood of Melbourne.

MURRAY, a harbour of Prince Edward's island, in King's co., to the S of George town. It receives the Murray, Fox, and South rivers, and is well-sheltered and commodious, but it is difficult of ingress.

MURRAY, a township of Upper Canada, in the Newcastle district, bounded on the S by Lake Ontario and the bay of Quinte. Pop. in 1842, 2,765.

MURRAY, a county in the NW part of the state of Georgia, U. S., comprising an area of 650 sq. m., drained by Oostanaulan river and its branches. The surface is mountainous, but the soil is to a great extent fertile. Pop. in 1840, 4,695, of whom 798 were slaves.—Also a township of Orleans co., in the state of New York, 243 m. W by N of Albany. The surface is level, and is drained by Sandy creek, an affluent of Lake Ontario. Pop. in 1840, 2,675.

MURRAY BAY, or Malbay, a seignory of Lower Canada, in the co. of Saguenay, extending along the St. Lawrence to the Malbay river, by which it is divided from Mount Murray. This locality is remarkable for the frequency of earthquakes.

MURRAY ISLANDS, a group of islands, 4 in number, in Torres straits, in S lat. 9° 50′, and E long. 143° 50′. These islands appear from a distance to be surrounded with inaccessible rocks. The largest does not exceed 3 m. in length, and is about 700 ft. high at its highest point. The whole of its lower portion is covered by cocoa-nut trees. They were discovered by Edwards in 1791, and were afterwards visited by Flinders, by whom they were found to be inhabited.

MURRAY (Mount), or Mount Murray, a seignory of Lower Canada, in the co. of Saguenay, extending along the St. Lawrence from Malbay river to the river Noire or Black river, and is 3 leagues in depth. It has a mountainous surface, but possesses some good soil.

MURRAYSVILLE, a village of Franklin township, Westmoreland co., in the state of Pennsylvania, U. S., 181 m. W of Harrisburg.

MURRHARD, a town of Würtemberg, in the circle of the Neckar, bail. and 8 m. ENE of Backnang, and 26 m. NE of Stuttgart, on the l. bank of Murr. Pop. 2,400. It has a church, belonging to a Benedictine convent founded in the 9th century, and carries on a considerable trade in wood and wooden ware. This town was to a great extent destroyed by fire in 1765.

MURROES, or Muirhouse, a parish in Forfarshire, 5 m. NE of Dundee. Pop. in 1841, 736.

MURROGHTWOHY, a hamlet in the p. of Glaninagh, co. Clare. Pop. in 1831, 212.

MURROW-KUSTUK, a village of Beluchistan, in the district of Cutch-Gundava, 30 m. E of Pulagi, in a fine plain, at the base of the Kahun mountains.

MURS, a commune of France, in the dep. of the Maine-et-Loire, cant. and 3 m. SW of Ponts-de-Cé, on the r. bank of the Lubancy. Pop. 1,704.—Also

a village in the dep. of Vaucluse, cant. and 4 m. NNE of Gordes, and 11 m. NW of Apt. Pop. 400.

MURSHEDABAD, a city of Hindostan, from 1704 till 1757 the capital of Bengal. Including Cossimbazar, it extends 8 m. along the E bank of the Bhagiretti river, about 120 m. above Calcutta. Most of the houses are only of one story, with tiled roofs, and built of earth mixed with chopped straw, or of mud and bricks. There are some curious old mosques; but the only public edifices of any magnitude are the Imamhara, and the new palace built for the newab or nabob of Bengal. The streets are narrow and dirty. M. is the residence of the British civil establishment, and has a judicial court of circuit. It is an open town, and was plundered by the Mahrattas in 1742; but still carries on a considerable trade, principally in silk, both raw and manufactured. Although the river is nearly dry during six months of the year, and consequently its intercourse by water is then cut off, the surrounding district during the rainy season is subject to inundation, which has frequently injured the city and rendered it unhealthy. The pop. of M. is estimated at 150,000, of whom the greater number are employed in the cultivation of rice and indigo, and the various processes of silk manufacture. It is also an important mart for cotton. About two-thirds are Mahommedans; the rest are Hindus. The lower orders speak Bengali, and the better classes Hindustani, while the language of the court is Persian. Since the British conquest the newabs of Bengal are nothing more than titular princes, who receive from the British government £160,000 annually, which, with the revenue of their private estates, amounting to about £40,000, constitutes their whole income. These sums have heretofore been almost entirely expended in maintaining the barbaric pomp and splendour characteristic of Oriental courts; but the present newab lays out large sums in relieving the poor. The late newab, who died in 1837 or 1838, was the last person on whom the Guelphic order of knighthood was conferred. His successor attained his majority 7 or 8 years ago. He has a son by each of his 3 wives, with whom he lives in his harem, about a ¼ m. from the new palace, which is only used on *durbar* or levee days, of which there are six or eight yearly. On such occasions he is generally borne by 8 men in a palki or howdah, escorted by the principal officers of his household on foot, and followed by a numerous train mounted on elephants, camels, and horses, all gorgeously caparisoned. The natives who attend the *durbar* leave their shoes at the entrance of the reception-hall, and, with head covered according to the eastern custom, advance with a series of salaams to his highness, who is surrounded by his attendants and guards, and on whose left—the place of honour in the East—sits the agent for the governor-general. They then present him with a mohur —a gold coin £1 12s. in value—and if the person offering it enjoys his favour, he accepts the coin and pours a few drops of attar of roses on his handkerchief. After this ceremony it is the custom to retire backwards with a repetition of the salaams. Besides the respect and affection with which the present nazim is regarded on account of his personal qualities, he is also held in great consideration as the head of the sect of Shiahs, who are highly venerated in Lower Bengal.

MURSLEY, a parish of Buckinghamshire, 3 m. ENE of Winslow. Area 2,840 acres. Pop. 479.

MURSTON, a parish in Kent, 1 m. E of Milton. Area 920 acres. Pop. in 1831, 166; in 1841, 167.

MURTEN. See MORAT.

MURTON, a township in the p. of Bongate, or of Appleby-St.-Michael, 3 m. ENE of Appleby, on a branch of the Eden. Pop. in 1831, 193; in 1841, 172.

MURTON, or MARTON, a township in the p. of Osbaldwick, N. R. of Yorkshire, 3 m. NE of York. Area 1,060 acres. Pop. in 1831, 156; in 1841, 161.

MURTON, or MOORTOWN, a township in the p. of Tynemouth, Northumberland, 3 m. NW of South Shields. Pop. in 1831, 451; in 1841, 503.—Also a township in the p. of Lamplugh, Cumberland, 8 m. ENE of Whitehaven.

MURUSURA, a river of Central Africa, in the Cazembes territory, which has its source in a district of the same name; runs NNE; passes the capital of the state, and joins the Zambesi. It receives the waters of a considerable lake, and forms in its course a series of small islands. The district is said to contain gold-mines.

MURU-WURDWUN, a narrow defile in the Punjab, watered by a river of the same name, flowing from the N, an affluent of the Chenab. It is of considerable length, extending two days' march from Muru to Wurdwun, and is enclosed by steep mountains covered with jungle and formed of gneiss and slate. It contains also a village of log-houses of the same name, opposite the Nabog-Nge pass.—*Vigne.*

MURUZABAL, a town of Spain, in the prov. of Navarra, partido and 6 m. SW of Pamplona, in the valley of Ilzarbe, on the r. bank of the Robo. Pop. 379. The environs afford large quantities of wine.

MURVIEDRO, a judicial partido and town of Spain, in the prov. of Valencia. The partido comprises 28 pueblos. The town is 17 m. NNE of Valencia, and 12 m. S of Artana, at the foot of a mountain of the same name, on the Palencia, 3 m. above the entrance of that river into the Mediterranean. Pop. in 1845, 7,476. It is enclosed by lofty walls, flanked with small round towers, and has several gates, the greater number of which are defended by square towers. The streets are narrow, steep, and tortuous, and the houses mean-looking; but the suburbs are extensive, and, compared with the town, cheerful in aspect. The only modern buildings worthy of note are the churches and convents. It has manufactories of linen, common woollen fabrics, and hempen sandals, and several distilleries of brandy. Fruit and oil are produced in great abundance in the environs, and with brandy form the chief articles of trade. The harbour, which is at the mouth of the river, is defended by a tower and batteries. This town derives its name from the words *mure veteris*, because of its having been reared on the ruins of the ancient *Saguntum*, which, after a protracted siege, was destroyed by the Carthaginians. The Romans, by whom it was rebuilt, adorned it with numerous handsome edifices, the ruins of some of which, notwithstanding the devastations of the Moors, are still to be seen. Of these, the principal are a theatre, a circus, and a fortress. Many fine ancient sculptures are also to be found in the walls of the churches and other buildings. In the adjacent mountain are beds of marble of different colours, and a fine species of clay, for the manufacture of which into vases the early *Saguntum* was celebrated.

MURVIEL, a canton, commune, and town of France, in the dep. of the Herault, and arrond. of Beziers. The cant. comprises 11 com. Pop. in 1831, 7,766; in 1841, 8,187. The town is 9 m. NW of Beziers, and 42 m. WSW of Montpellier, on a hill planted with olives. Pop. in 1841, 1,595. It has several distilleries of brandy.

MURWUT, a territory of Eastern Afghanistan, bounded on the E by the Khuttuk hills; on the S by the Buttunni hills, separating it from the Derajat; and on the W by the Buttunni and the Viziri hills. On the N it is open to Bunnu. Elphinstone, having

probably visited it in a year of drought, describes it as "composed of sandy and arid plains;" Masson, who probably saw it in a year of rain, speaks of its numerous villages marked by their several groups of trees, and the yellow tints of the ripe corn fields. Its triennial harvest of wheat, barley, and grain is overflowingly abundant in good seasons. The inhabitants are a tall muscular race. The cap. is Lukki, now on the l. bank of the Gambela.—*Edwardes.*

MURZSTEG, a village of Austria, in Styria, in the ldgb. of Grätz, circle and 9 m. NE of Bruck, on the Murz. In the vicinity are the iron-mines of Niederalpel, several blast furnaces, and manufactories of arms.

MURZUK. See MOURZUK.

MURZZUSCHLAG, a town of Austria, in Styria, in the ldgb. and 38 m. NNE of Grätz, circle and 23 m. E of Bruck, at the l. bank of the Mürz, an affluent of the Muhr, and on the railway from Vienna to Cilly. Pop. 900. It has several iron-works and manufactories of hardware. The valley of the M. is noted for its pastures, which are reputed the finest in Styria.

MUSA, a fortified town of Arabia, in Yemen, 24 m. E of Mocha. It is ill-built. This town is the ancient sea-port of the same name, the waters of the Red sea having formerly extended to its locality.

MUSA (WADI), a valley of Arabia, on the E side of the Wadi-Arabah, in about 30° 15′ N lat., extending from N to S about 1,500 yds., with a breadth of 500 yds. at its N end, and 250 yds. at the S. It is traversed from E to W by a small stream, called Es-Syk, and is surrounded on all sides by nearly perpendicular rocks rising to a height of from 200 to 1,000 ft. These rocks are of the new red sandstone, and present almost every variety of colour and hue, —red, purple, yellow, azure, sky-blue, black, and white. The barriers at the N and S extremities of the valley are not so steep, but admit of the passage of camels across them, through an abrupt and somewhat difficult ravine, into the valley. A number of small recesses or side-valleys open into the principal one, but are abruptly terminated by cliffs. The ancient entrance to this valley is on the E side, through a deep narrow gorge called Wadi-Syk, varying in width from 12 to 30 ft., and bounded by overhanging cliffs of from 70 to 300 ft. in height, between which the streamlet flows in a sinuous bed encumbered with fragments of rock, and choked with a rank growth of oleanders, shrubs, and creeping plants. About 50 paces below the entrance of the Syk, on the E side of the Wadi, a bridge of one arch, about 80 ft. high, thrown over the top of the chasm, is still entire; immediately below it, on both sides, are large niches worked in the rock, destined probably for the reception of statues. The bridge appears to have been connected with an aqueduct. Continuing along the winding passage or defile of the Syk, small niches appear cut in the rock, some of which are single; in other places there are three or four together; some are mere holes, others have short pilasters on both sides; they vary in size from 10 inches to 4 or 5 ft. in height; and in some of them the bases of statues are still visible. "After proceeding for 25 minutes between the rocks, we came," says Burckhardt, "to a place where the passage opens, and where the bed of another stream coming from the S joins the Syk. On the side of the perpendicular rock, directly opposite to the issue of the main valley, an excavated mausoleum came in view, the situation and beauty of which are calculated to make an extraordinary impression upon the traveller, after having traversed for nearly half-an-hour such a gloomy and almost subterraneous passage as I have described. It is one of the most elegant remains of antiquity existing in Syria; its state of preservation resembles that of a building recently finished, and on a closer examination I found it to be a work of immense labour." The Bedouins call this monument El-Khazrah-Faraun, or 'Pharaoh's Treasury.' It was rather the sepulchre of a prince; and great must have been the opulence of a city which could dedicate such monuments to the memory of its rulers. Continuing a little farther among the sepulchres, the valley widens to about 150 yds. in breadth. Here to the left is a theatre cut entirely out of the rock, with 33 rows of benches. It may be capable of containing about 3,000 spectators: its area is now filled up with gravel, which the winter-torrent brings down. The entrance of many of the sepulchres is in like manner almost choked up. There are no remains of columns near the theatre. Following the course of the stream about 150 paces further, the rocks open, and we issue upon a plain 250 or 300 yds. across, bordered by heights of more gradual ascent than before. Here the ground is covered with heaps of hewn stones, foundations of buildings, fragments of columns, and vestiges of paved streets,—indicating that a large city once existed here. On the l. side of the river is a rising ground extending westwards for nearly a quarter of an hour, covered with similar remains. On the r. bank, where the ground is more elevated, ruins of the same description are also seen. On the S side of the Syk, near the W side of the valley, are the remains of a very sumptuous building, 34 paces square, looking towards the N, called Pharaoh's house. On both sides of the defile by which the Syk emerges from the Wadi, on its W side, are numerous excavations, obviously tombs. A short distance from the House of Pharaoh is the commencement of a rough steep ascent which leads to the temple of El-Deir, on the NW side of the valley. These ruins, thus first described by Burckhardt, are now clearly identified with those of the ancient *Petra*, the capital of Arabia Petræa, and probably the *Selah* of the Scriptures. This point is argued in the preface to Burckhardt's *Travels in Syria*, by the editor, Col. Leake, who observes that the country of the *Nabatæi*, of which *Petra* was the chief town, is well-characterized by Diodorus as containing some fruitful spots, but as being for the greater part desert and waterless. With equal accuracy, the combined information of Eratosthenes, Strabo, and Pliny, describes *Petra* as falling in a line, drawn from the head of the Arabian gulf to Babylon; as being at the distance of three or four days from Jericho, and of four or five from *Phœnicon*, a place now called Moyeleh, on the Nabatæan coast, near the entrance of the Ælanitic gulf; and as situated in a valley of about 2 Roman m. in length, surrounded with deserts, enclosed within precipices, and watered by a river. The lat. of 30° 20′, ascribed by Ptolemy to *Petra*, agrees moreover very accurately with that which is the result of the geographical information of Burckhardt. The vestiges of opulence, and the apparent date of the architecture at Wadi-Musa, are equally conformable with the remains of the history of *Petra* found in Strabo; from whom it appears, that previous to the reign of Augustus, or under the latter Ptolemies, a very large portion of the commerce of Arabia and India passed through *Petra* to the Mediterranean; and that armies of camels were required to convey the merchandise from *Leuce-Come* on the Red sea, through *Petra* to *Rhinocolura*, now El-Arish. But among the ancient authorities regarding *Petra*, none are more curious than those of Josephus, Eusebius, and Jerom, all persons well acquainted with these countries, and who agree in proving that the sepulchre of Aaron on Mount Hor was near *Petra*. Hence it seems evident that the present object of Mussulman devotion, un-

der the name of the tomb of Harun, stands upon the same spot which has always been regarded as the burying-place of Aaron; and there remains little doubt, therefore, that the mountain to the W of *Petra* is the Mount Hor of the Scriptures, *Musa* being perhaps an Arabic corruption of *Mosera*, where Aaron is said to have died. The Crusaders gave the name *Petra* to Kerek; and thus introduced much uncertainty regarding the actual site of the ancient city.

MUSAL, a village of Asiatic Turkey, in the pash. of Brusa, 15 m. SE of Yeni-Ghieul, on a torrent descending from the Ak-Daghlar or White mountains.

MUSALA, an island of Russia in Europe, in the gulf of Finland, off the S coast of the duchy of Finland, and co. of Kymmenegard, in N lat. 60° 27′, E long. 26° 52′.

MUSART. See Moussour.

MUSAY, or Queen's Island, a small island in Shetland, probably not more than 2½ m. in circumf., about a ½ m. E of the Sandwick part of Mainland, and about 7 m. S by W of Bressay.

MUSBURY, a parish of Devonshire, 2 m. E by N of Colyton. Area 2,660 acres. Pop. in 1831, 156; in 1841, 495.—Also a township of Bury parish, Lancashire, 3 m. SW of Haslingden. Area 1,170 acres. Pop. in 1831, 1,231; in 1841, 1,386.

MUSCALA, or Mescala, a village of Mexico, in the state of Mexico, on the l. bank of a large river of the same name, which, in the lower part of its course, is more generally known as the Balsas, and 10 m. below Totalsintla, at an alt. of 1,600 ft. above sea-level.

MUSCAT, Mascat, or Meschet, a city of Arabia Felix, situated on the SW side of a small semicircular bay, at the entrance of the Persian gulf, in N lat. 23° 38′, E long. 59° 15′. It is the most considerable town, though not the capital of the prov. of Oman; and the authority of its imam, or prince, extends about 300 m. along the gulf, and nearly as far inland; his naval force is considerable. The town of M. is built on a level spot, between two rocky hills on which are erected several well-placed batteries, capable of making a formidable defence against any attack from the sea; but the place itself may be cut off from the interior, and easily blockaded from without. M. is one of the filthiest towns in the world. It forms one immense bazaar, inhabited by every caste of Indian merchants, who dwell in narrow alleys, partly covered by open mats of palm-leaves which admit the rain freely. The houses are in general only one story high, with flat roofs covered with earth. The sultan's palace, and the houses of the wealthier merchants, are in good style. The harbour—which resembles the figure of a horse-shoe, with the entrance at the SE point—is remarkably well-sheltered from the prevailing winds, and so capacious that several hundreds of ships might ride in it with perfect safety and convenience; but N winds sometimes bring in a heavy sea. Adjoining the cove itself is the fine bay of Mutterah. About 20 sail of ships and 40 or 50 dhows belong to the port. The tide rises here from 5 to 6 ft. The Portuguese, after their expulsion from Ormus, took possession of this town in 1508, and besides strengthening its fortifications, adorned it with many public buildings. During a century and a half they here carried on a profitable trade with the Arabs for gums, drugs, hides, bees'-wax, cattle, and sheep, in exchange for which they supplied them with tobacco, coffee, India and European goods. But about the middle of the 17th cent. they were expelled by the Arabs, and all their attempts to regain the place only served to improve the military and maritime power of the natives. M. carries on a very extensive trade, and sends a number of large ships to the ports of the Red sea and of Malabar. The goods brought from these places are again transferred to trading vessels from both sides of the Persian gulf, and from the coast of Caramania as far as the river Indus. The inhabitants also maintain a large inland trade, not only with the subjects of their own prince, but with the tribes of independent Arabs in the interior, to whom they send India piece-goods, pepper, ginger, rice, tobacco, coffee, sugar, with other kinds of India produce, besides English cutlery, cloth, and toys; and receive in return gold-dust, gums, drugs, ostrich-feathers, tamarinds, hides, sheep and lamb-skins, honey, bees'-wax, live cattle, and sheep. "The imam or sultan himself is the chief merchant, and can borrow money largely from the Banyans, to whom he farms certain revenues. Besides the facility the sultan has in thus obtaining money, he comes into the market on much easier terms than other merchants, who are subjected to a duty of 5 per cent. on all their transactions; but, unlike most princes of his faith, he is said to be contented with this profit. The expenses of protection and government are paid by him from his possessions on the E coast of Africa, which may be considered as his private property, at least so far as their revenues, which are levied arbitrarily. The good faith of the sultan, the security he derives from his connection with the government of Bombay, and the advantageous situation of the port—at the entrance of the Persian gulf—has rendered it a sort of emporium for the coasts of Africa, Madagascar, the Red sea, the Persian gulf, and India in general; and in being so, it has rather added to than diminished the trade of Cutch, Surat, Bombay, &c. The imam employs his frigates as merchant-vessels, the officers and crews of which are Lascars of India. It does not appear that he ever uses them for hostile purposes, as he has learned that warlike equipments are not only the most expensive but the least productive; they are, therefore, engaged in collecting cowries and other articles of commerce on the E coast of Africa, at Quiloa, Zanzibar, and Lamo, with which he traffics to Calcutta and the Persian gulf. In 1824, he fitted out the Liverpool at Bombay for a voyage to Mecca, when, it is said, he presented the richest offering that had been made at the shrine of his prophet for many years. This may be inferred to have been more the effect of policy than religious zeal, for his title to dominion required the high sanction of the Porte before the name of sultan could be assumed; that of imam is conferred by the shireef of Mecca, but is never granted without the assistance of a pilgrimage and a considerable donation. Until his power had these great warrants, he was always open to intrigues and plots, while his dethronement or assassination would have been deemed less criminal." [*Owen.*] The inhabitants, about 10,000 in number, are described as the most liberal minded of all Mahommedans, polite in their conduct to strangers, upright in their mercantile transactions, temperate in their mode of living, chaste in their manners, and rarely guilty of crimes requiring the cognizance of the laws. Their principal food is dates and fish. Hindustani is the *lingua franca* of the place, Arabic being only spoken by the few native Arabs.—The climate of M. is extremely hot, dry, and unhealthy. The rainy season extends from November to February; heavy dews fall throughout the whole year, and supply the moisture requisite for vegetation. The mountains immediately behind the city are stony and barren, but the adjoining valleys are extremely fertile, and produce a variety of excellent fruits and grains. Wheat and barley are sown in December, and reaped in March. Oranges, lemons, grapes, apricots, and peaches, are abundant. The mango is

grown here to great perfection; but the fruit most extensively cultivated, and for which the district is most celebrated, is the date, of which large cargoes are regularly exported. A variety of excellent roots and pot-herbs, sheep, cattle, and especially fish, may be purchased here at a cheap rate.

MUSCATINE, a central co. of the Iowa territory, U. S., comprising an area of 440 sq. m., bordered on the SE by the Mississippi, and watered by Red Cedar river and its branches, and Pine creek. The soil on the rivers is very fertile. Pop. in 1740, 1,942; in 1850, 5,646. Its cap. is Bloomington.

MUSCATINE SLUE, an island formed by the Mississippi, in Muscatine co., Iowa territory, U. S. It is nearly 20 m. in length, and about 10 m. in breadth; and consists of alluvium. It is extremely fertile, and its surface, which is but little elevated above the river, is nearly a dead level. The name is a French corruption of the Indian word Mascotin or Prairie island.

MUSCHAU, a town of Bavaria, in the circle and 22 m. S of Brünn, near the confluence of the Iglawa and Taya. Pop. 408.

MUSCHBACH, a village of Bavaria, in the circle of the Pfalz, bail. and 13 m. W of Spire. Pop. 1,100.

MUSCOGEE, a county in the W part of the state of Georgia, comprising an area of 410 sq. m., drained by Upotoi creek and its branches, tributaries of Chattahoochee river, by which it is bordered on the W. Pop. in 1840, 11,699, of whom 4,701 were slaves; in 1850, 12,112. Its cap. is Columbus.

MUSCOS, a group of small islands, in the Bay of Bengal, to the N of the Mergui archipelago, and near the coast of Tavoy, in N lat. 13° 50′, and E long. 97° 45′.

MUSCULDY, a village of France, in the dep. of the Lower Pyrenees, cant. and 5 m. WSW of Mauleon. Pop. 600. In its vicinity are mines of iron and lead.

MUSEROS, a village of Spain, in the prov. and 6 m. N of Valencia, and partido of Moncada, in a plain. Pop. 1,019. The streets are handsome; and it contains some good houses, a convent, an hospital, and an ancient castle now in ruins.

MUSFEIA. See Mosfeia.

MUSGRAVE (Great), a parish of Westmoreland, 1½ m. WSW of Brough. Area 2,940 acres. Pop. 167.

MUSGRAVE (Little), a township in Crosby-Garrett parish, Westmoreland, 2 m. WSW of Brough. Area 1,110 acres. Pop. in 1831, 75; in 1841, 72.

MUSH, a town of Asiatic Turkey, in the pash. of Van, 120 m. NW of Van, on an affluent of the Murad-shai. It is picturesquely situated upon the side of an eminence, within a deep mountain-recess; but its streets are filthy and irregular, and a few mean stalls compose its bazaar. It has 5 mosques, 10 medressehs or colleges, and 3 schools. The pop. is estimated at 5,000, of whom one-half are Armenians. The principal mosque is the finest building in the town. One of the Armenian churches is said to be 1,300 years old. A brawling stream runs down from the mountains, through a deep gorge on the E side of the town, to the Kara-su.

MUSHED, Meshid, or Mesched, the capital of the Persian prov. of Khorassan, about 12 m. from the ruins of the ancient city of Touse. Its walls enclose a circuit of nearly 7 m.; but 5 of its 12 quarters are in ruins, and its pop. does not exceed 30,000. It is distinguished by a very splendid sepulchre, in which repose the ashes of the imam Ruza, and of the caliph Haroun Al-Raschid. The sepulchre rests under a gilded dome, with twin minarets of burnished gold; and a spacious mosque of azure blue rears a still loftier dome and minarets close to the tomb. M. is hence considered throughout Persia as a holy city. The sacred tomb forms the centre of the city, and three streets branch out in different directions from the shrine, two of them wide and spacious, and shaded by trees. The bazaar is 3 m. in length, and is well supplied with fruits and vegetables produced in the rich and well-watered plain which surrounds the city. The houses are meanly built, and 'the ark' or palace is a poor building; indeed the city has no important buildings but its shrine. There are a few medressehs, and a spacious but unfinished caravanseray. M. carries on a considerable trade with Bokhara, Balkh, Candahar, Yezd, and Herat. Velvet of the finest quality is manufactured here; and the fur pelisses made in M. are much esteemed.—The river which passes by the city bears the same name, and falls into the Tedzen, the ancient *Ochus*.

MUSHED, Mechid-Ali, or Nejiff, a town of Irak-Arabi, 90 m. S of Bagdad, supposed to be the burial-place of the caliph Ali. It is well-built; and is defended by a good wall, a deep ditch, and lofty towers. The most conspicuous object is the tomb and mosque of Ali,—a handsome structure, encircled by a high wall. The town is entirely supported by the constant influx of Persian pilgrims and devotees, who regard it with a veneration little inferior to Mecca. The environs are arid and barren, and are rendered gloomy by the number of graves which cover them, as persons of consequence are brought here for interment from the most remote parts of the Persian empire.

MUSHED-I-SIR, a village of Persia, the only part of Mazanderan, consisting of about 150 meanly built houses, within 1 m. of the mouth of the Bawbil or Babul. Its trade is principally with Russia, through Astrakhan. The goods imported are iron, copper, hardware, sugar, dyewoods, glass, china, and paper. The exports are naphtha from Baku, cotton, rice, sugar, galls, dried fruits, and prints from Ispahan. The trade employs from 4 to 5 ships of from 130 to 160 tons burden, which however must remain about 2 m. distant in the offing, and land their cargoes by means of boats. There is a sturgeon fishery at the mouth of the river.

MUSIE'GE, a mountain of Sardinia, in the div. of Savoy and prov. of Carouge, to the E of the mountain of Vuache, from which it is separated by the Fornant, which here flows through a deep and narrow gorge, and forms a fine cascade. It is surmounted by an old castle.

MUSINENS, a village of France, in the dep. of the Ain, cant. and 2 m. SSE of Châtillon-de-Michaille, near the r. bank of the Rhône. Pop. 160.

MUSKAU, or Mu'zakow, a town of Prussia, in the prov. of Silesia, regency and 69 m. WNW of Liegnitz, circle and 21 m. NNW of Rothenburg, on the Neisse. Pop. 2,037. It is the capital of the seignory of Pukler-Muskau, and has a fine palace belonging to the prince of that name. It has manufactories of pottery and of woollen fabrics, and alum-works. In the vicinity are the baths of Hermannbad.

MUSKEGAT, an island of the state of Massachusetts, U. S., between Nantucket and Martha's Vineyard.

MUSKEGO, a township of Milwaukee co., in the state of Wisconsin, U. S. Pop. in 1840, 130.

MUSKHAM (North), a parish of Nottinghamshire, 3¾ m. NNW of Newark, on the Trent. Area 2,180 acres. Pop. in 1831, 681; in 1841, 825.

MUSKHAM (South), a parish in Leicestershire, 5½ m. W by N of Grantham, on the Devon, and intersected by the Grantham canal. Area 1,440 acres. Pop. in 1831, 261; in 1841, 262.

MUSKINGUM, a river in the state of Ohio, U. S., formed by the junction of the Tuscarawas and White

Woman's rivers, which unite at Coshocton. The united streams here become navigable; run S; pass Zanesville, where they are joined by the Licking; turn SE; and throw themselves into the Ohio, at Marietta, on the r. bank, by a mouth 225 yds. wide, and after a course from Coshocton of 100 m., or from the source of the Tuscarawas, in Medina co., of 180 m. At Zanesville the navigation, being interrupted by falls, is effected by means of a canal.—Also a co. in the SE part of the state, comprising an area of 665 sq. m., drained by the river of the same name and by its branches. It contains numerous ancient mounds, and has extensive salt-works. Pop. in 1840, 38,749; in 1850, 45.043. Its cap. is Zanesville.—Also a township in the above-named co., 61 m. E of Columbus. Pop. in 1840, 1,252.

MUSK-OX LAKE, a small lake, or expansion rather of Great Fish river, in N lat. 64° 40′, W long. 108° 20′, to the NE of Lake Aylmer.

MUSLIMIS. See Mouselmines.

MUSO-DI-PORCO, Morro-di-Porco, or Lungo, a cape on the E coast of Sicily, in the prov. and 5 m. SE of Syracuse, in N lat. 37° 20′, E long. 17° 20′.

MUSON, or Musone, a river of Austria, in Lombardy, which has its source in the prov. of Treviso, in a range of hills to the S of Asolo; runs S past Castelfranco, into the prov. of Padua; bends SE; and divides at Mirano into 2 branches. On entering the prov. of Venice, one of these branches flows S, and joins the Brenta; the other directs its course to the E, and flows into the lagunes opposite Venice. This river has a total course of about 42 m.

MUSONE, or Moscione, a river of the Papal states, which has its source in the deleg. of Macerata, 5 m. SW of Cingoli, and at the foot of Monte S. Vicino; runs ENE into the deleg. of Ancona; returns to the confines of that of Macerata; and falls into the Adriatic 3 m. NE of Loretto, and after a total course of about 36 m. During the period of the kingdom of Italy, the M. gave its name to a dep. of which Macerata was the capital.

MUSQUASH, or Missiquash, a harbour of New Brunswick, in the co. and 12 m. S of St. John, in N lat. 45° 10′, and W long. 66° 20′. It is 2 m. long, and a ½ m. wide, is easy of access, with deep water and good anchorage. It receives on the N a river of the same name.

MUSQUILLO. See Odia.

MUSSAIN, a commune of Belgium, in the prov. of Brabant, and dep. of Saintes. Pop. 553.

MUSSANGANI, a district of Central Africa, between the Cazembes dominions and the district inhabited by the Changamiras, in about 15° S lat.

MUSSELBURGH, a parliamentary burgh, in the parish of Inveresk, Edinburghshire, on the r. bank of the river Esk, 3 furs. S of the frith of Forth, and 5½ m. E of Edinburgh. Its site is a flat expanse only a few feet above sea-level, fringed on the N by fine sandy downs, and flanked on the S by a ridge of rising grounds, which is picturesquely crowned with the church and village of Inveresk. The town has a large proportion of self-contained houses, and presents a fair array of good shops, and of municipal and marketing appliances; it is well and somewhat regularly built. The main communication across the river, and that which carries over the Edinburgh and London mail-road, is an elegant stone-bridge of 5 elliptic arches, erected in 1807. About 220 yds. higher up stands a venerable stone-bridge, supposed to have been built by the Romans, and remarkable as the grand thoroughfare for ages between the SE of Scotland and the metropolis, as an important pass during English incursions and invasions undertaken in the international wars, and as the bridge by which armies poured along to neighbouring fields of fatal and memorable conflict. The links of M., long noted for promenading, golfing, and archery-ground, were, in 1816, adopted as the scene of horse-racing for the district environing Edinburgh. The tanning and currying of leather is carried on in three large establishments here; a sail-cloth manufactory, established in 1811, has gradually increased to a large extent. Three factories, one of them very large, are employed in the weaving of hair-cloth for chair and sofa-covers. A manufactory of fishing nets employs about 20 looms, and produces about 2,500 yds. of net per week.—The harbour of M., or more properly that of Fisherrow, is situated more than a ½ m. W of the mouth of the Esk, and dates so high as the period of the Roman prov. of *Valentia*. It has only 4½ ft. water at neap tides. Though no vessel belongs to the port, several coasting-vessels and vessels of Norway, Prussia, and Holland, resort to it in preference to Leith. The number annually clearing from it is between 200 and 250, averaging each between 60 and 70 tons. A rich coal-field around Musselburgh, perforated with numerous shafts, and plied by swarms of miners, furnishes a chief article of export, as well as of local enrichment: the other exports are principally bricks and tiles. The imports coastwise are miscellaneous, and from abroad are chiefly timber, bark, skins, bones, rape, and oil-cake.—The town unites with Leith and Portobello in sending a member to parliament. The parliamentary constituency amounted in 1840 to 297; in 1847 to 208. Pop. in 1831, including Fisherrow and Newbigging, 7,024. Pop. of the parl. burgh, in 1841, 6,328; in 1851, 7,092.

MUSSEN, a village of Prussia, in the prov. of Westphalia, regency and 32 m. SSW of Arensburg, circle and 9 m. N of Siegen. It contains mines of silver and copper, and several founderies.

MUSSENDOM, Mussunndom, or Mocendom (Cape), a headland of Arabia, in Oman, at the entrance of the Persian gulf, in N lat. 26° 24′, and E long. 56° 34′. It consists of a cluster of basaltic barren islands, which rise abruptly to the height of 200 ft. above sea-level, and appear to have been rent from each other, and from the high promontory of the continent behind them, by some great convulsion. The water is of great depth all around and between these islands. The actual point of the cape is difficult to fix with precision. It is the *Maketa* of Nearchus, and *Asabo* of Ptolemy. Its distance from the opposite point, on the Persian shore, Ras-Moburrack or Bomburrack, is about 10 leagues.

MUSSEY, a village of France, in the dep. of the Upper Marne, cant. and 1½ m. NW of Donjeux, and 14 m. SE of Vassy. Pop. 480. It has a manufactory of earthenware.—Also a village in the dep. of the Meuse, cant. and 5 m. ESE of Revigny, and 5 m. WNW of Bar-le-Duc, near the Ornain. Pop. 150. It has a quarry of freestone.

MUSSIDAN, a canton, commune, and town of France, in the dep. of the Dordogne, and arrond. of Riberac. The cant. comprises 11 com. Pop. in 1831, 8,902; in 1841, 8,755. The town is 17 m. S of Riberac, and 21 m. SW of Perigueux, on the l. bank of the Isle, in a fertile plain. Pop. in 1841, 1,744. It contains a number of handsome houses, and has several tanneries, and in the environs several iron-mines and forges. It was taken and fortified by the Calvinists in 1563, but was afterwards captured by the Catholics, and the garrison put to the sword.

MUSSOMELI, a town of Sicily, in the prov. and district and 20 m. NW of Catanisetta, and 14 m. SE of Castronuovo. Pop. 9,290. It has an old castle. Agate, jasper, azure-stone, sulphur, and salt, are found in the environs.

MUSSON, a department and commune of Belgium, in the prov. of Luxemburg, and arrond. of Arlon, watered by the Batte. Pop. 1,355.

MUSSY, a river of Hindostan, in the Deccan, in the prov. of Hyderabad, which has its source in the district of Coilconda; traverses that of Golconda; separates the district of Bonghir from those of Dawurconda and Nalgonda; intersects the latter; and after a total course of about 180 m., first in a generally E, then S direction, joins the Krishna, on the l. bank. Hydrabad and Golconda are the chief places on its banks.—Also a river in the presidency of Madras, in the Carnatic, and district of Ongole, which issues from the mountains of Elgonda; runs SE; and throws itself into the gulf of Bengal, to the NE of Singraconda, and after a course of 75 m.

MUSSY-L'EVEQUE, or Mussy-sur-Seine, a canton, commune, and town of France, in the dep. of the Aube, and arrond. of Bar-sur-Seine. The cant. comprises 8 com. Pop. in 1831, 7,191; in 1841, 7,239. The town is 12 m. SSE of Bar-sur-Seine, on the Seine. It is well-built, has several distilleries of brandy, and carries on a considerable trade in wine and brandy. Marble is wrought in the environs.

MUSSY-SOUS-DUN, or Mussy-le-Vieux, a village of France, in the dep. of the Saone-et-Loire, cant. and 2 m. N of Chauffaelles, and 15 m. S of Charolles, near the r. bank of the Mussye, an affluent of the Sornin. Pop. 1,470. It has several coal-mines.

MUSSY-LA-VILLE, a department of Belgium, in the prov. of Luxemburg, and arrond. of Arlon. Pop. 895. Cutlery forms its chief branch of manufacture.

MUSTAFA, a headland of Tunis, on the E coast, and about 50 m. ENE of Tunis.

MUSTAFA-PASHA, a town of Turkey in Europe, in Rumelia, in the sanj. and 10 m. S of Shirmen, and 15 m. NW of Adrianople, on the Maritza. Pop. 2,000. It has numerous mosques.

MUSTAFA-PASHA-PALANKA, a fortress of Turkey in Europe, in Bulgaria, in the sanj. of Sophia, on the Nissava. Pop. 2,000.

MUSTAFABAD, a town of Hindostan, in the prov. and 111 m. N of Delhi. It is of considerable extent, and is defended by walls flanked with towers, and a ditch.

MUSTAPHANAGUR. See Condapilly.

MUSTON, a parish in Leicestershire, 5½ m. W by N of Grantham, on the river Devon, and intersected by the Grantham canal. Area 1,500 acres. Pop. in 1831, 310; in 1841, 351.—Also a p. in the E. R. of Yorkshire, 9½ m. NW by N of Bridlington, on the Hartford. Area 1,860 acres. Pop. in 1841, 417.

MUSTREE, a village of Afghanistan, in the Daman, on an offset of the Indus, 50 m. S of Dera-Ghazi-Khan.

MUSTUNG, a town of Beluchistan, in the prov. of Sarawan, 70 m. N of Kelat, and at an alt. of about 5,700 ft. above sea-level. It contains about 400 houses, and is enclosed by a crenated mud wall. On an adjacent mound are the ruins of a citadel. The surrounding country is reputed the richest and most salubrious in Beluchistan.—Also a town in Tibet, in the prov. of Dzang, near the source of the Gunduck, 60 m. NNE of the mountain of Dhawalagiri, and 180 m. NW of Katmandu.

MUSZYNA, a town of Galicia, in the presidial of Lemberg, circle and 20 m. SSE of Sandec, and 42 m. SW of Jaslo, on the r. bank of the Poprad. Pop. 1,687. Linen forms its chief article of trade.

MUTCHU, a river of Hindostan, in the prov. of Gujerat, which has its source in the central part of the peninsula of that name, in the Surdhar mountains; runs NNW; and throws itself, near Mallia, into the E part of the gulf of Cutch. Its bed is rocky, and its banks low. Its course does not exceed 75 m., but the volume of its waters is considerable.

MUTEODU, a town of Hindostan, in the prov. of Mysore, and soubah of Patana. It has extensive manufactories of glass trinkets.

MUTFORD, a parish in Suffolk, 4½ m. SE by E of Beccles, on a branch of the Eastern Counties railway. Area 1,400 acres. Pop. in 1841, 415.

MUTHILL, a parish in the S of Perthshire, intersected by the Earn and by Allan-water. Pop. in 1831, 3,297; in 1841, 3,067, of whom about 1,300 are in the v. of M., 4 m. S of Crieff. The Scottish Central railway has a station at Greenloaning, 40½ m. from Glasgow, and 21½ m. from Perth.

MUTHVEY, a river in Carmarthenshire, which falls into the Towy at Llangadock.—Also a river in Merionethshire, which unites with the Avon at Kemmer-abbey.—Also a river in Cardiganshire, an affluent of the Towy.

MUTIGNANO, a town of Naples, in the prov. of Abruzzo-Ultra, district and 21 m. ESE of Teramo, cant. and 3 m. E of Atri. Pop. 1,500.

MUTILOA, a town of Spain, in the prov. of Guipuscoa, and partido of Aspeitia, 26 m. SW of San Sebastian, between two mountains. Pop. 478. It has 2 churches. Iron and copper are found in the environs.

MUTON, a village in Sind, on the l. bank of the Indus.

MUTRA. See Mathura.

MUTTARI, a town in Sind, on the l. bank of the Indus, 15 m. N of Hyderabad.

MUTTEH, a village of Afghanistan, on an offset of the Indus, 10 m. N of Dera-Ghazi-Khan.

MUTTERHORN, or Mutthorn, a mountain of Switzerland, in the S part of the cant. of Uri, near the Ursernthal. It has an alt. of 9,000 ft. above sea-level.

MUTTERSDORF, Mutina, Muticnim, or Muticrow, a town of Bohemia, in the circle and 27 m. WNW of Klattau. Pop. 994. It has 2 glass-works, and extensive manufactories.

MUTTERSHOLZ, or Mutterschultz, a commune and town of France, in the dep. of the Lower Rhine, cant. and 8 m. N of Marckolsheim, near the r. bank of the Ill. Pop. in 1841, 2,102. It has a manufactory of indigo.

MUTTERSTADT, a town of Bavaria, in the circle of the Pfalz, district and 10 m. NNW of Spire, and 6 m. SW of Manheim, on the Flossgraben. Pop. 2,700. Tobacco is cultivated in the environs.

MUTTON-ISLAND, an islet of co. Galway, in the p. of Moyrus, 3 m. SW of Roundstone.—Also an island of the same co., in Galway bay, ¾ m. S of the town of Galway, having a lighthouse upon it, in N lat. 53° 15′ 4″, W long. 9° 3′ 26″.

MUTTRA, Matarah, or Mattrach, a town of the Arabian prov. of Oman, 3 m. SW of Muscat, on the Persian gulf. It has a good and capacious port, at the bottom of a small cove, and contains a number of well-built houses.

MUTTRA. See Mathura.

MUTUALIS. See Metualis.

MUTZIG, a commune and town of France, in the dep. of the Lower Rhine, cant. and 1½ m. W of Molsheim, on the l. bank of the Bruche, and on a canal of the same name, in a wide valley. Pop. in 1841, 3,424. It has a manufactory of fire-arms, and a paper-mill. The environs afford good wine.

MUTZSCHEN, a bailiwick and town of Saxony, in the circle and 26 m. ESE of Leipsig, on a river of the same name. Pop. 1,522. The environs are noted for their fine rock crystals.

MUXAGATA, a town of Portugal, in the prov.

of Beira, comarca and 23 m. NE of Trancoso, and 14 m. SW of Torre-de-Moncorvo.

MUY (Le), a commune of France, in the dep. of the Var, cant. and 10 m. W of Frejus, at the confluence of the Artaby and Argens. Pop. in 1841, 2,197. It has numerous oil, flour, and saw-mills.

MUYKEM, a commune of Belgium, in the prov. of East Flanders, and dep. of Assenide. Pop. 441.

MUYLEBEEK, a commune of Belgium, in the prov. of Brabant, and dep. of Thollembeek. Pop. 292.

MUYSBLOEK, a commune of Belgium, in the prov. of Antwerp, and dep. of Eekeren. Pop. 397.

MUYSELAERE, a commune of Belgium, in the prov. of West Flanders, and dep. of Pitthem. Pop. 1,577.

MUYSEN, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Brussels, watered by the Dyle. Pop. of dep. 1,732; of village, 390.—Also a department and commune in the prov. of Liege, and arrond. of Hasselt, watered by the Beek. Pop. 132.

MUYT, a commune of Belgium, in the prov. of Hainault, and dep. of Biévène. Pop. 440.

MUYTEM, a commune of Belgium, in the prov. of East Flanders, and dep. of Appelterre-Eychem. Pop. 120.

MUYZERHOL, a commune of Belgium, in the prov. of East Flanders, and dep. of Astene. Pop. 127.

MUZAFFERNAGUR, a town of Hindostan, in the prov. and 60 m. NE of Delhi, and district of Saharunpur. It is of considerable extent, and is chiefly built of brick. It contains an old fort and two large bazaars.

MUZARI, a village of Sinde, 7 m. W of Sukkur, on the r. bank of the Indus.

MUZIFFERABAD, or Mazufurabad, a district and town of the Punjab. The town is at the confluence of the Kishen-gunga with the Jelum. It is stated by Vigne to contain not more than 200 flat-roofed houses, while on the authority of Moorcroft their number has been estimated at 3,000. According to Hugel the pop. does not exceed 2,100. The Kishen-gunga is here crossed by a bridge of ropes, and there is a ferry also across the Jelum.

MUZILLAC, a canton, commune, and town of France, in the dep. of Morbihan, and arrond. of Vannes. The cant. comprises 7 com. Pop. in 1831, 10,224; in 1841, 10,523. The town is 16 m. SW of Vannes, 3 m. N of the embouchure of the Vilaine. Pop. 1,891. Its trade is chiefly in rural produce.

MUZIMBA, a district of Africa, in the Mukaranga territory, intersected by the Suabo.

MUZ-TAGH, an immense range of mountains in Chinese Tartary, which commences on the W in the Muz or Mussar-Tagh, sometimes called Mussart, to the N of Khashgar, and S of the head-streams of the Syr or Sihon, in about 40° 30′ N lat. and 73° E long., and runs in a continuous chain till it strikes the meridian of 85°, under the 43d parallel. From this point it is continued in a succession of somewhat detached chains eastwards 600 m. to beyond the meridian of Khamil or Hami. The Chinese call it Ting-Shan or Tien-Shan, and Seme-Shan. Several of the summits of this chain are volcanic; and many of them attain an immense altitude; and as they stand on a much more elevated base than the Himalaya, the absolute elevation of their highest points must greatly exceed that of the latter chain. Their colour, which partakes of the azure of the high regions of the atmosphere, and of that golden light which lies upon distant objects, announces that their summits inhabit a region of perpetual serenity, and justify their title of Tien-Shan, or 'Mountains of heaven.' The M. stretches a space of 27 degrees, or more than 1,500 m., forming in its whole length the N frontier of Tibet, as the Himalaya is the S.

MUZUFFERPUR, a town of Hindostan, in the prov. of Bahar, and district of Tirhut, 35 m. N of Patna.

MY, a department and commune of Belgium, in the prov. of Luxemburg, and arrond. of Marche. Pop. of dep. 411; of com. 183.

MYA, or Maya, an island of the Molucca archipelago, to the N of the island of Oby, in S lat. 1° 15′, E long. 127° 25′. It is about 9 m. in length.

MYALL, a lake of New South Wales, in the co. of Gloucester, at the mouth of the river of the same name, 198 m. from Sydney. It is about 17 m. in length.—The river M. flows into Port Stephen's harbour.—Also a creek in the co. of Durham, which flows into William's river.

MYAN-AONG, Meyah-un, or Lun-zay, a town of Burmah, in the prov. of Pegu, on the r. bank of the Irawaddi, 180 m. above the entrance of that river into the gulf of Martaban, and about 300 m. SSW of Ava. It was formerly a place of great importance, and was said to have extended 2 m. along the river. It contained several temples and convents, a large grain store, and carried on an extensive trade in rice, the produce of the country,—the number of vessels belonging to its port being 200, and each of 60 tons burden. In 1809 the number of its inhabitants did not exceed 1,000, and that of its vessels had sunk to 40. In 1810, it was entirely destroyed by fire. This town was famous during the wars between the Burmese and Talliens or Peguens.

MYAYDAY. See Maeaday.

MYCENÆ, or Kharvati, a village of Greece, 8 m. NE of Argos, and 22 m. S of Corinth, consisting of 15 or 20 houses, with a small tower, near the ruins of the ancient city of M., which is said to have been founded by Perseus 1,300 years before the Christian era. In the age of the composition of the Iliad, M. figures as the capital of the leading sovereign. The city itself was built upon a rugged height, in a recess of the mountains on the E side of the Argolic plain; but the plain between Sicyon and Corinth is still remarkable for its fertility, and was doubtless among the most early cultivated tracts in Greece. The ruins of the ancient city still remain nearly as described by Pausanias in the 2d cent. The most conspicuous object amongst them is a tumulus covering a subterranean dome built with huge blocks of stone put together without cement. The height of this dome is about 50 ft. The walls of the citadel still remain, and enclose an oblong space about 330 yds. in length. The gateway exhibits two lions standing as supporters, and probably the most ancient specimen of sculpture in Europe.

MYCH (Nowo), a town of Russia in Europe, in the gov. of Grodno, district and 36 m. S of Novogrodek, and 26 m. ENE of Slonim, on the r. bank of the Mychanka.

MYCHANKA, a river of Russia in Europe, in the gov. of Grodno, which has its source in the district and 21 m. S of Novogrodek; runs S; and joins the Chtchara, on the r. bank, 6 m. E of Rondina, and after a course of about 51 m.

MYCHEVSK, a mining-village of Russia in Europe, in the gov. of Kaluga, and district of Taronsa, on the Myehna, an affluent of the Oka. It has extensive iron-works.

MYCHKYR, a district of Russia in Europe, in Southern Daghistan, and khanat of Kuba. Nizova is one of its chief towns.

MYCONDA, a town and fortress of Hindostan, in the prov. of Mysore, 20 m. NW of Chitteldrug, and at the entrance to the valley of that name.

MYCONI, a small island of the Grecian archi

pelago, between Naxos and Tino, the *Mico*, or *Myconus*, of the ancients, in N lat. 37° 24′, E long. 25° 21′. It is of a triangular form, and about 21 m. in circuit, and is divided from Delos by a channel 1 m. in width. It is mountainous, and has a dry soil, but is productive in wine and fruit, which, along with orchilla and cheese, form its chief exports. Game is abundant on the island; but there is a scarcity of good water. The inhabitants, amounting to 4,000 Greek Christians, live chiefly in the town of M., a small port on the W side of the island, and are reckoned, along with the Hydriotes, the best navigators in those seas. About 1 m. off the E end of the island lies a rugged precipitous islet called Tragonesi.

MYDAN, a village of Afghanistan, in a valley of the same name, in the S part of the Hazareh country.

MYDAN, or Maidan, a village of Afghanistan, in a beautiful and fertile valley, on the l. bank of the Cabul river, and 22 m. SW of the city of that name. The Afghans were here defeated by General Nott in 1842.

MYDANI, a district of Beluchistan, in the S of Kohistan. It comprises an area of 210 m. from E to W, and 75 m. from N to S, and comprises in the W a portion of the desert of Bunpur.

MYDRECHT, a small but neat town of Holland, in the prov. of Utrecht, 12 m. NNW of Utrecht. Pop. 2,359.

MYDRIM, a parish of Carmarthenshire, 6½ m. N by W of Llangharn, on a branch of the Taff. Pop. in 1831, 983; in 1841, 1,110.

MYEENGNGA, or Myit-nge, a river of Burmah, which has its source in the NE extremity of the prov. of Mrelapshain, to the NE of Boduayn; runs SSW to Thounza; thence bends WNW; and, after a course of about 210 m., joins the Irawaddi at Ava. Its principal affluents are the Kaunne and Panlaung, the latter of which issues from a small lake another outlet of which, the Mobia, falls into Thanluyn.

MYE-OTTA, a village of Sinde, 10 m. N of Schwan, near the r. bank of the Indus.

MYER, a town of Hindostan, in the prov. and 111 m. SW of Allahabad, and district of Bundelcund, near the l. bank of the Tonsa. It is ill-built, but is of considerable extent, and contains a fortress in which the chief of the surrounding territory resides.

MYERSCOUGH, a township of Lancaster parish, 3 m. S of Garstang, on the Wyre. Area 2,740 acres. Pop. in 1831, 510; in 1841, 504.

MYESUR, a village of Cutch-Gundava, on the Bolan river, and on the road through the Pass of that name to Candahar.

MYLAU, or Muhlau, a town of Saxony, in the circle of the Voigtland, bail. of Plauen and Pausa, 11 m. NNE of Plauen, and 33 m. WSW of Chemnitz. Pop. 2,611.

MYLBEKE, a commune of Belgium, in the prov. of East Flanders, and dep. of Alost. Pop. 3,260.

MYLEEKWYK, a commune of Belgium, in the prov. of East Flanders, and dep. of Meerelbeke. Pop. 323.

MYLERSTOWN, a parish of Kildare co., 1¾ m. NNE of Carbery. Area 3,846 acres. Pop. in 1831, 874; in 1841, 925.

MYLL, a village of Prussia, in the prov. of the Rhine, regency and 25 m. N of Achen, circle and 5 m. ENE of Heinsberg. Pop. 1,253.

MYLOPOTAMO, a fort of the island of Candia, on the N coast, in the sanj. and 39 m. E of La Canée, at the mouth of the Mylo, a small river which has its source to the SW of Mount Stromboli; runs first W, then NW, and falls into the Archipelago.

MYLOR, a parish in Cornwall, 3 m. E of Penryn. Area 1,390 acres. Pop. in 1841, 2,569.

MYLORA, a creek of New South Wales, in the district of Lachlan.

MYMATGHUR, a town of Hindostan, in the presidency and 150 m. SSE of Bombay, in the prov. of Bejapur, district and 51 m. NW of Colapur, on the W side of Western Ghauts.

MYMUNIUT. See Meimunna.

MYMUNSINGH. See Momansing.

MYNISHMORE, an islet of co. Mayo, 5¾ m. W of Newportpratt, in Clew bay. It measures about a ½ m. in length.

MYNPAUT, a district of Hindostan, in the prov. of Gundwana, div. of Sumbulpur. It is an elevated table-land, and has much of its surface covered with dense jungle.

MYNSHEERENLAND, a village of Holland, in the S part of the prov. of Holland, arrond. and 8 m. W of Dordrecht, cant. and 5 m. NNW of Stryen. Pop. 733.

MYNYDDMAEN, a hamlet of Monmouthshire, 4 m. NNE of Caerphilly. Pop. 856.

MYNYDDSLWYN, a parish of Monmouthshire, 9 m. WNW of Newport. Area 15,510 acres. Pop. 5,385, chiefly colliers.

MYO. See Mya.

MYON, a village of France, in the dep. of the Doubs, cant. and 5 m. SE of Quingey, and 16 m. SSE of Besançon, near the l. bank of the Lison. Pop. 350. It has a manufactory of agricultural implements.

MYON. See Mion.

MYON (Saint), a commune of France, in the dep. of the Puy-de-Dome, and cant. of Comtronde, 6 m. N of Riom. Pop. 754. It has several mineral springs.

MYOSEN. See Miosen.

MYPORRA, or Meypura, a deltoid branch of the Mahanada, in Bengal, in the prov. of Orissa.

MYRA, a town of Asiatic Turkey, in the sanj. of Meis, 36 m. SE of Makri, on the river Andraki.

MYROSS, a parish in co. Cork, 1½ m. E of Castletownsend, containing the villages of Unionhall and Carrigillihy. Area 4,119 acres. Pop. in 1831, 3,459; in 1841, 3,741. The surface is nearly identical with the peninsula between Castlehaven and Glandore harbour.

MYSHALL, a parish and village in co. Carlow, 5 m. W by S of Clonegall. Area 9,459 acres. Pop. in 1831, 2,874; in 1841, 2,825. Kilbranish and two other heights on the S boundary, have alts. above sea-level of respectively 1,335, 1,499, and 1,399 ft.

MYSLENICE, a town and circle of Austrian Poland, separated from the territory of Cracow by the Vistula, here a navigable stream, and intersected by the Sola, the Skawa, and the Raba. Branches of the Carpathians traverse the S part of the district, and render the surface less level than that of most parts of Poland, but the soil is fertile.—The cap., of the same name, is situated on the l. bank of the Raba, 16 m. S of Cracow. Pop. 2,000.

MYSLOWITZ. See Mislowitz.

MYSOL, an island of the Molucca archipelago, situated under the parallel of 2° S, midway between the islands of Ceram and Papua. It is 50 m. in length, by 15 m. in average breadth. It is inhabited on the coast chiefly by Mahommedans, and in the interior by the original natives. Birds-of-paradise frequent this island in great flocks at certain seasons of the year, and being caught with bird-lime, are afterwards dried with the feathers on. The other articles of export are trifling.

MYSORE, properly Maisur, a state of Southern India, principally situated between the 11th and 15th

parallels of N lat., and surrounded by the British territories subject to the presidency of Madras. It has an estimated area of 27,000 sq. m. It consists of a high table-land, elevated from 2,000 to 4,000 ft. above the level of the sea, from which rise a number of lofty hills containing the sources of numerous rivers, the principal of which are the Cavery, Tumbuddra, Vadavati, Bhadri, Penar, Colair, and Colerun. On the E, W, and S, the table-land is flanked by the Ghauts; the surface slopes gently towards the N. Sevagunga, the highest summit in M., in N lat. 13° 10′, E long. 77° 20′, has an elevation of 4,600 ft. above sea-level. The climate of this elevated region is temperate and healthy. The rains are here more moderate than on either of the coasts of the peninsula, but of longer duration; during other seasons of the year the verdure is frequently refreshed by enlivening showers. The soil produces rice, sesamum, sugar, coffee, tobacco, and not only all the grains and vegetables of other parts of India, but also many of the fruits and vegetables of Europe. Extensive tracts are overrun with jungle. The pop. is estimated at 3,500,000. The majority are Hindus; but the country having been so often the scene of warfare, is not nearly so populous as Bengal and some other of the British provs. This prov. is governed by a native rajah, under a subsidiary treaty concluded with the British in 1799. It is divided into three districts, named Patana or Seringapatam, Nagara or Bednore, and Chatrakul. Each dist. is managed by an *amildar*, who is an officer of justice, police, and revenue; and who is accountable for his conduct to the ministers of the rajah, who are kept to their duty by the presence of the British resident. The annual revenue is estimated at £800,000. The chief towns are Seringapatam, Bangalore, Mysore, Bednore, and Chittledrug.

MYSORE, a town of the above prov., situated about 9 m. SW of Seringapatam, on the top of a lofty hill, in N lat. 12° 19′, E long. 76° 42′. In former times it was called Puragurry; but in the middle of the 16th cent. its name was changed to Mahesh Ajaur, now shortened to Mysore or Maisur. In 1593 it was taken by the sovereign of Bejapore. It was probably soon after this period that the seat of government was transferred to Seringapatam; but the fortress of M. was still kept in good repair, and considered as a place of refuge for the royal family in the event of any attack on the new capital. In the early part of the revolution effected by Hyder Ali in 1759, the expelled Dulwoy Nunjeraje got possession of M., and retained it for three months, in despite of all the efforts of Hyder at the head of a numerous army. In 1787 Tippu Sultan, wishing to obliterate all traces and memorial of the Hindu dynasty, ordered the fort and town of M. to be levelled with the ground, and the materials to be used in erecting another fortress on a neighbouring height, to be called Nuzerbar. The town was in consequence utterly destroyed, and the inhabitants compelled to emigrate either to Seringapatam or some of the adjacent villages; but the new situation having been found destitute of water, the removal of the fortress was only in part effected when the events of 1799 caused a revolution in the state of affairs, and the materials which had been removed were brought back and employed in rebuilding the citadel and palace of the young rajah. The town is now about 1 m. in length, and continues to increase yearly in size and pop. It is well supplied with water and provisions, and is considered much more healthy than Seringapatam.

MYSTIC, a river of Massachusetts, U. S., which rises in Lexington co.; runs SE; and flows into Boston harbour, 1 m. N of Boston. It is navigable for vessels of 400 tons to Mystic Bridge, 2 m. from its mouth.—Also a village in New London co., Connecticut, U. S., 52 m. SE of Hartford, on the E side of Mystic river.

MYSTIC BRIDGE, a village of Groton township, New London co., in the state of Connecticut, 56 m. SE of Hartford, on the W side of Mystic river, opposite Portersville, with which it is connected by a toll-bridge.

MYSZINIEC, a small town of Poland, 80 m. N by E of Warsaw, on the l. bank of the Roroga. Pop. 800.

MYTICHY, a village of Russia in Europe, in the gov. and district and 14 m. NE of Moscow. It is remarkable for the purity of its springs, the water of which is conveyed by means of an aqueduct and of subterraneous canals to Moscow. The aqueduct, which passes over the river Yaouza, consists of 21 arches, and forms a fine and substantial piece of architecture. It was commenced by Catherine, and finished by Alexander I.

MYTILENE. See Mitylene.

MYTO, a town of Russia in Europe, in the gov. and 57 m. ENE of Grodno, district and 9 m. SW of Lida.

MYTON-UPON-SWALE, a parish in the N. R. of Yorkshire, 2¾ m. E of Boroughbridge, on the E bank of the Swale. Area 1,480 acres. Pop. 188.

MY-VATN, a lake of Iceland, in N lat. 65° 30′, W long. of Copenhagen 29° 35′. It is of very irregular form; but is the largest lake in the island, being about 12 m. in length from N to S, and 8 m. in breadth, and contains numerous islands. Its waters, which never freeze, discharge themselves by the Laxa into the Skialfiord, a bay on the N coast.

MYWULLA, or Maoula, one of the Fiji group, in the S. Pacific, in S lat. 19°, E long. 178° 20′. It rises to a considerable height, and affords water and provisions. Pop. 700. M. was discovered by Bligh in 1792.

MZCHETHA. See Mtskhetha.

MZCZONOW, a town of Poland, in the woiwodie of Moscow, obwod. and 32 m. SW of Warsaw. Pop. 1,050, of whom 355 are Jews. It contains 2 churches, and on a small lake in the vicinity is the ancient castle of Radzielovice, famous in the history of Poland.

MZENSK. See Mtzensk.

N

NAAF, or NGAIT, a river of Trans-Gangetic India, dividing the prov. of Chittagong from Arracan, and flowing into the E side of the bay of Bengal, in about N lat. 21°, at the town of Mungdu. Its banks are covered with deep jungles, interspersed with a few spots of cultivation.

NAAGHI, a village of Afghanistan, 17 m. SW of Bagur, in N lat. 34° 49′, E long. 71° 15′.

NAALDWYK, a village of Holland, in the prov. of S. Holland, 14 m. WNW of Rotterdam. Pop. of parish 3,365.

NAAM, a village of Arabia, in the Nedjid, 21 m. N of El-Haryk.

NAAMAN ISLES, or OSTRICHES, a group of islands in the Arabian gulf, in N lat. 26° 10′, E long. 34°. They have little vegetation, but afford good anchorage.

NAAMAN'S CREEK, a river of the state of Delaware, U. S., which runs into the Delaware on the frontier of Pennsylvania.

NAANGO, or KING GEORGE'S TOWN, a town of Upper Guinea, on the Gabon coast, in about 0° 30′ N lat., on a small creek which flows into the l. side of the estuary of the Gabon river.

NAARDEN, or NAERDEN, a small port of Holland, on the Zuyder-zee, 11 m. ESE of Amsterdam. It is fortified, and its situation renders it of importance for the defence of Amsterdam. Pop. 2,590. It exports grain, spirits, honey, and wax.

NAAS, a parish in co. Kildare, containing the town of Naas, and part of the v. of Sallins. Area 5,526 acres. Pop. in 1831, 4,891; in 1841, 4,863. The surface is low and flat; the highest ground is on the E border, and has an alt. above sea-level of 365 ft.—The town of N., one of the two assize-towns of co. Kildare, and formerly a parl. borough, stands on a branch of the Grand canal, 4½ m. S by E of Clane, and 15¼ m. SW of Dublin. As a whole it presents a character beneath its advantages of situation. A large moat at the upper end of the town is a remarkable object. A large new barrack stands in the W outskirts of the town, and the jail and court-house stand between the town and the barrack. Pop. in 1831, 3,808; in 1841, 3,571.

NAASDORF, a village of Prussia, in the reg. of Oppeln, circle of Neisse. Pop. 386.

NAAST, a commune and village of Belgium, in the prov. of Hainault, 9 m. NE of Mons. Pop. 1,343.

NAB, or NAAB, a river of Bavaria, formed of three streams, viz., the Böhmische-Nab which rises on the borders of Bohemia, the Heide-Nab and the Wald-Nab which descend from the Fichtelberge mountains. These streams unite at Au, and fall into the Danube, below Ratisbon, after a S course of 90 m. It is navigable for boats in the lower part of its course. Its chief affluents are the Vils on the r., and the Luhe, Pfreimt, and Schwarzach, on the l.

NABAHOA, NABAJOA, or NAVAHOA, a river of Upper California, which falls into the Rio Colorado, in N lat. 37°, after a course of 250 m.

NABAHOAS, NAVAHOS, or NAVIJOS, a numerous tribe of Indians occupying that vast portion of the territory of New Mexico lying between the Rio Grande on the E, and the confines of California on the W; its N and S limits being approximately those of New Mexico. This extensive region is represented by those few adventurous Americans who have either passed through or deeply penetrated into it as the most picturesque and romantic part of Western America. The soil of the valleys and plains is said to be very fertile, and where not covered with timber, bears ample harvests of nutritious grasses. The climate is cool and delicious in summer, and so mild in winter as not to make travelling disagreeable at any time. This interior unknown region abounds in mineral wealth, especially the precious metals. The N. are represented as semi-civilized, and to have become so without the instrumentality of those agencies which commonly civilize the savage. They work, it is said, in cotton and in wool in a very superior manner. The 'Navaho blanket' is a far-famed fabric, remarkable for brilliancy of colours, closeness of texture, and durability of material. They also cultivate their rich valleys with industry, and obtain abundant crops of corn, wheat, melons, and peaches. They make frequent forays into the country of their neighbours, the New Mexicans. In Mr. Farnham's late work on California, is a notice of the N. from Dr. Lyman's report. The author begins by saying that "they are the most civilized of all the wild Indians of North America." Their extensive cultivation of maize and all kinds of vegetables,—their rearing of "large droves of magnificent horses, equal to the finest horses of the United States in appearance and value,"—and their large flocks of sheep are also noticed. From the fleece of the sheep, which is long and coarse, resembling mohair, "they manufacture blankets of a texture so firm and heavy as to be perfectly impervious to water." They make a variety of colours, with which they dye their cloths, besides weaving them in stripes and figures. They are constantly at war with the Mexicans, but stand in fear of the American trappers, with whom they have had some severe skirmishes, which resulted much to their disadvantage. It is believed by Humboldt and others, that in the N., and Mawkeys, a tribe of Indians occupying the Sierra-de-los-Mimbres, we see the descendants of the same race of Indians which Cortez and the Spanish conquerors found in Mexico, in a semi-civilized state. The whiteness of their skins, their knowledge of the useful arts and agriculture, and the mechanical skill exhibited in their edifices at the present day, bear a striking analogy with the Mexican people at the period of the conquest, and as M. Humboldt observes, "appear to announce traces of the cultivation of the ancient Mexicans." The Indians have a tradition that 20 leagues N from the Moqui, near the mouth of the Rio Zaguananas, the banks of the Nabahoa were the first abode of the Aztecs after their departure from Atzlan. "On considering the civilization," adds Humboldt, "which exists on several points of the NW coast of America, in the Moqui, and on the banks of the Gila, we are tempted to believe, that at the period of the migration of the Toltecs, the Acolhues, and the Aztecs, several tribes separated from the great mass of the people to establish themselves in these northern regions."

NABAKIYAH, or NABUGIR, a low sandy island in the Red sea, in N lat. 26° 43′, E long. 36° 6′.

NABAL, a town of Tunis, situated on the S side of a peninsula in the bay of Hamamet, 32 m. SSE of Tunis. At the distance of about a furlong are the ruins of *Neapolis*, anciently a large city, now in part swallowed up by the sea.

NABALE-SHEIK, a village of Lower Egypt, situated at the extremity of a peninsula on Lake Menzaleh, 5 m. N of Menzaleh.

NABALIA, a small island in Lake Menzaleh, about 6 m. from the shore, on which the ruins of Tennis or *Tennesas*, formerly on the Tanitic branch of the Nile, are situated.

NABAN, a village of Upper Egypt, on the l. bank of the Nile, 5 m. SSW of Benisuef.

NABAON, a river of Portuguese Estremadura, which passes by Tomar, and falls into the Zezere.

NABARI, a town of Nifon, in Japan, 15 m. S of Iga, on the W coast of the bay of Ovari.

NABBURG, a town of Bavaria, in the Upper Palatinate, 11 m. E of Amberg, on the r. bank of the Nab. Pop. 1,600.

NABERN, a village of Prussia, in the reg. of Frankfurt, circle of Custrin. Pop. 476.

NABHANA, a village of Tunis, 40 m. S of Kairwan.

NABLATH, a village of Prussia, in the reg. of Frankfurt, circle of Sorau. Pop. 218.

NABLOUS, Nabulus, or Naplous, a town of Syria, 34 m. N of Jerusalem, stretching along the NE base of Mount Gerizim. Its houses are in general well-built, and there is considerable animation and bustle in its streets; and its bazaars are well-supplied with silks, and with various kinds of cloth manufactured at Bagdad, Aleppo, and Damascus. A stream of clear water rushes down the whole length of the main street, in which are the remains of a church of fine Byzantine architecture, and a handsome arched gateway. Olin estimates the pop. at from 8,000 to 10,000, of whom 600 are Christians of the Greek church. About 20 minutes of ascent in a SW direction from the town, leads the traveller to the top of Mount Gerizim, a tract of high table-land stretching off to the W and SW. N. is the Shechem or Sychar of Scripture; its present name is the Arabic form of the Greek *Neapolis*, a name which it acquired under Vespasian, by whom it was restored.

NABOG-NYH, a pass in the range of mountains bounding Cashmere on the E, in N lat. 33° 43′, E long. 75° 20′.

NABON, or Nabont, a port of Laristan, in Persia, on the l. bank, and near the mouth of a river which runs WSW, and falls into a bay of the Persian gulf, after a course of 115 m., 70 m. W of Lar.

NABIRAC, a town of France, in the dep. of Dordogne, cant. and 6 m. SE of Domme. Pop. 750.

NABORD (Saint), a canton and village of France, in the dep. of Vosges, cant. and 2 m. N of Remiremont. Pop. 1,900.

NABTE, a small town of Hedjaz, in Arabia, 100 m. WNW of Medina.

NABUAPO, a river of Peru which enters the Amazon, a little above the river Tigre, in S lat. 3° 17′.

NABURN, a chapelry in Acaster-Malbis p., in the E. R. of Yorkshire, 4 m. S of York, on the E bank of the Ouse. Area 2,720 acres. Pop. in 1841, 439.

NABY-SAMUEL, a village of Syria, on the highest point of a ridge or terraced hill, 2 hours NW of Jerusalem, commanding a magnificent view on every side. It is supposed to mark the site of the *Ramah* of Scripture.

NABYSZYCE, a village of Prussia, in the reg. of Posen, in the circle of Adelnau. Pop. 316.

NACABA, a town of Nifon, in Japan, 40 m. E of Awa.

NACANTA, a town of Nifon, in Japan, 20 m. N of Mogani.

NACARI, a small river of Mexico, which rises near the town of San Miguel, and enters the Hiaqui.

NACATS, a town of Ximo, in Japan, 40 m. SE of Kokura.

NACHEEKA, or Nalatcheva, a river of Kamtchatka, flowing into a bay of the same name, on the E coast, under the parallel of 58° N. It has a wide mouth, and is reputed to afford a good harbour.

NACHEGO, a large lake of Ecuador, in the prov. of Mainas. It receives the two rivers Sungoto and Manguy, and flows by a narrow channel into the l. bank of the Cahuapanas, in S lat. 5° 23′.

NACHELO, or Nakhilo, a port of Laristan, in Persia, situated at the mouth of a river which falls into the Persian gulf, 50 m. SSW of Lar. It is defended by a square fort flanked by four towers. The anchorage is exposed to the NW.

NACHITSCHEVAN. See Nakshivan.

NACHO, or Puerto-de-Cavallos, a settlement of Honduras, 30 m. N of Cape-Gracias-a-Dios.

NACHOD, a town of Bohemia, on the Metau, 20 m. W of Glatz. Pop. 1,400.

NACKINGTON, a parish in Kent, 2½ m. S by E of Canterbury. Area 950 acres. Pop. in 1841, 113.

NACOGDOCHES, a county of Texas, intersected by the Neches, Angelina, and Attoyac rivers. Its soil is good, and well-adapted to the growth of cotton. Its cap., of the same name, is situated on an affluent of the Attoyac, 60 m. W of the Sabine, in N lat. 31° 36′, W long. 94° 37′. It is an old Spanish town.

NACONGO, a river of Western Africa, which falls into the Atlantic, in S lat. 5° 15′.

NACOOCHEE, a village of Habersham co., in Georgia, U. S., 152 m. N of Milledgeville.

NACRI, a small island of the Archipelago, in the Sporades, a little to the N of Lipso, in N lat. 37° 20′, and E long. 26° 45′.

NACTON, a parish in Suffolk, 4¼ m. SE of Ipswich, on the Orwell. Area 2,380 rivers. Pop. in 1831, 555; in 1841, 765.

NACUNG, a lake in the p. of Tullaghobegley, co. Donegal. It is 3 m. 3 furs. in length, and has an alt. of 188 ft. above sea-level.

NACZA, a town of Russia in Europe, in the gov. and 62 m. ENE of Minsk, district and 22 m. E of Borisov.

NADAILLAC-DE-RONGES, a village of France, in the dep. of the Lot, and cant. of Payrac, 9 m. NNE of Gourdan. Pop. 400.

NADALI, a village of Afghanistan, about 20 m. SW of Girishk.

NADANFOERE, a town of China, in Mandshuria, in the prov. of Kirin, 80 m. SSE of Kirin-Ula, on the Songari.

NADARZYN, a town of Poland, in the gov. of Masowie, obwod and 15 m. SW of Warsaw. Pop. 500.

NADASD, a village of Hungary, in the comitat of Baranya, 96 m. SSW of Bude, and 8 m. SSW of Bonyhad. It has a castle and fine park.

NADAUN, or Nadone, a town of the Punjab, in the prov. of Lahore, and division of Kangra, 90 m. ENE of Amritsir, on the l. bank of the Beah, which is here a deep and rapid river, 150 yds. in width, and on the route from Hindostan to Cashmere, in N lat. 31° 46′, and E long. 76° 18′. It was formerly a place of considerable importance. The surrounding district is noted for its beauty and fertility.

NADDER, a river which has its source near Donhead, on the confines of Dorsetshire, and falls into the Willy at Wilton.

NADEJDA, a colony of Russia in Europe, in the prov. of the Caucasus district, and 6 m. E of Stavropol, on the l. bank of the Ashla, an affluent of the Kalacus. Pop. 1,160.

NADELBURG, a village of Austria, in the prov. of Lower Austria, and lower circle of the Wienerwald, 5 m. NE of Neustadt, and 5 m. SW of Ebenfurt. It has manufactories of tin-ware.

NADENDAL, a town of Russia in Europe, in Finland, in the gov. and 9 m. WNW of Abo, and district of Masko, on the Baltic. Pop. 700. It has manufactories of hosiery, and has a considerable trade in articles of local produce and in cattle.

NADESHDA, a group of rocks in the North Pacific, near the SW coast of Kiu-siu, in N lat. 31° 42′ 20″, and E long. 129° 33′ 15′.

NADIEJDA, a headland of Japan, at the S extremity of the island of Yesso, and opposite Cape Sangar, in Nifon island, from which it is separated by the strait of Sangar, in N lat. 42° 45′, and E long. 140° 5′.—Also a strait of the Kurile archipelago, between the islands of Mataua and Rashau.

NADIR, a village of Turkey in Europe, in Bulgaria, in the sanj. of Silistria, on the S side of the Emineh-Dagh.—Also a village of Lower Egypt, in the prov. and 9 m. SW of Menouf, on the r. bank of the principal western branch of the Nile.

NADONE. See Nadaun.

NADOR, a town of Algeria, in the prov. and 60 m. SSE of Mascara, near Susellim.

NADRAMA, a station of the Sahara, near the confines of Algeria, and 210 m. N of Agably.

NADUDVAR, a town of Hungary, in the com. of Szabolcs, and 26 m. WSW of Debreczin, on the l. bank of the Kössely. Pop. 5,870.

NADWORNA, a town of Austrian Poland, in the circle and 22 m. S of Stanislawow, on the r. bank of the Strymba.

NADYM, a river of Russia, in the gov. of Tobolsk, which flows into the gulf of Obi, after a course of 120 m.

NAEFELS, a town of Switzerland, in the cant. and 4 m. N of Glaris, on the Linth. In 1388, a handful of Swiss, not exceeding 400, favoured by the ground, repulsed here a very numerous body of Austrians led on by Duke Leopold.

NAEKLEN-SICEN, a lake of Sweden, in Jamtland, about 21 m. in length from N to S, and 3 m. wide.

NAERIM, a village of Norway, in the bail. and 22 m. SW of Stavanger, on the coast.

NÆROE, an island off the W coast of Norway, in N lat. 64° 50′. It is 4 m. in length, and 1 m. broad.

NAES, a village and parish of Norway, 24 m. ENE of Christiania, at the confluence of the Glommen and the Vormen-elv. Pop. 5,000.—Also a village and p. in the bail. of Buskerud, 60 m. NW of Christiania.

NAESNE, a village and parish of Norway, 205 m. NNE of Drontheim, on the coast.

NAFF. See NAAF.

NAFFERTON, a parish of the E. R. of Yorkshire, 2¼ m. ENE of Great Driffield. Area 5,130 acres. Pop. 1,371.

NAFFOY, or NAFOOEY, a lake in co. Galway, among the mountains of Joyce-Country, 8¼ m. WNW of Cong, 2½ m. in length, with an elevation above sea-level of 96 ft. Its superfluent waters are carried off by the Finny rivulet to an arm of Lough Mask.

NAG'S HEAD, a cape on the S end of the island of St. Christopher, in N lat. 17° 20′, W long. 63° 33′.

NAGA, a town of Nifon, in Japan, 5 m. N of Nagasaki.

NAGA (CAPE), the NE point of Teneriffe, in N lat. 28° 37′, bearing 15½ leagues NW by W from the NE point of Canaria.

NAGAEV (CAPE), a headland of Japan, on the SE coast of Kiu-Siu, in N lat. 31° 15′, E long. 131° 10′.

NAGAEVA, a town of Russia, in the gov. and 72 m. NNW of Penza.

NAGAHS, or NAGAS, a general name borne by numerous tribes inhabiting the SE hills of Assam. They are of a dark complexion, with athletic sinewy frames, and wild visages: their faces and bodies being further disfigured by being tattoed in a frightful manner by pricking the juice of the bela nut into the skin in a variety of fantastic figures. They are reckless of human life; treacherously murdering their neighbours often without provocation, or for a trivial cause of offence; yet theft is held in great abhorrence amongst them, and is consequently so rare that they leave every thing exposed in the open fields. If any person is detected in committing the offence no mercy is shown: the khonbao pronounces sentence of decapitation without a moment's hesitation. The N. bordering immediately on the plains are, for the most part, amicably disposed towards the British government; those residing on the hills most remote from the valley are said to be fine, stout, athletic men, of fair complexions; and unincumbered with the smallest strip of covering in the shape of clothing for any part of the body. They amount, perhaps, to nearly 50,000 persons.

NAGAIBATSKAIA, a fort of Russia, in the gov. of Orenburg, on the r. bank of the Ik, 75 m. NNW of Belebei.

NAGAL, a town of Hindostan, in the prov. of Delhi, on the E side of the Ganges, in N lat. 29° 43′.

NAGAMANGALAM, a fortress of the south of India, in Mysore, in N lat. 12° 49′, E long. 76° 57′ It has a good citadel, in which are two Hindu temples, and public granaries and store-rooms.

NAGAR, a small state of Northern India, to the NW of Bultistan, intersected by an affluent of the Gilpt.

NAGARA, a town of Borneo, on the l. bank of a small river which flows into the sea of Londes, 60 m. SW of Banjarmassin.—Also a district in the NW of Mysore, of which Bednore is the cap.

NAGARA (CAPE), a headland on the coasts of Asiatic Turkey, on the strait of the Dardanelles, in N lat. 41° 11′.

NAGARAM, or NAGARUM, a town of Hindostan, in the Northern Circars, 45 m. NE of Masulipatam.

NAGARETH, a village of Mexico, in the state of Xalisco, 120 m. N of Guadalaxara.

NAGASAKI, or NANGASAKI, a city and principal port of Japan, on the SW side of the island of Kiu-Siu, in N lat. 32° 44′ 8″, E long. 129° 51′ 53″. It is regularly built, and consists of low houses, constructed of wood and a mixture of clay and chopped straw. Their walls are coated with cement, and the windows are filled with a fine strong paper, and protected from the weather by external wooden shutters. The front of the better class of houses is occupied by a large portico and entrance, where the palanquins, umbrellas, and shoes of visitors are left, and where servants and persons on business wait, which is connected with all the domestic offices. The back of the house is the part inhabited by the family, and generally projects into the garden triangularly, for the benefit of more light and cheerfulness. These gardens, however diminutive, are always laid out in the landscape-garden style, with rocks, mountains, lakes, waterfalls, and trees, and uniformly contain a family-chapel or oratory. Even the smallest habitations possess gardens, yet more in miniature, sometimes consisting of what may be called the mere corners cut off from the triangular back of the house, with the trees in flower-pots. But the most remarkable part of Japanese houses is the provision against fire. To each belongs a detached store-room, in which tradesmen keep their stock of goods, and private families their most valuable effects, as pictures, books, collections of rarities, &c. These store-rooms are built of the same materials as the houses; but the whole woodwork, doors and roof included, is covered with a foot-thick coating of clay; the apertures for the windows are closed with copper shutters; and, for further security, a large vessel of liquid mud is always at hand, with which to smear over every part of the building in case of danger,—that is to say, in case one of the conflagrations for ever occurring amidst such combustible houses should break out in the neighbourhood, or the wind drive the sparks and flames of a distant fire in a menacing direction.—The environs of N. are very beautiful. The most lovely sites are invariably selected for the temples, of which there are sixty-one within a short distance of N. These temples are built as plainly and unornamentedly as the houses; like them, encircled by a verandah, and often having many smaller temples, like chapels, surrounding the principal edifice. The whole, or the large temple, is called by Siebold a *yasiro;* the smaller chapel-temples, *miyas.* Every *yasiro* stands upon a hill, commands a fine view, and is enclosed in a garden. These gardens are the habitual resort of parties of pleasure, whether Japanese or Dutch; and, for the further enjoyment of their picturesque attractions, to almost all temples are attached large rooms, unconnected apparently with the service of the divinity there worshipped. In these apartments, in places destitute of inns, travellers are accommodated; and the priests usually let

them out as banquetting rooms. When a member of the Dutch factory at Desima indulges in such an excursion, the whole party collected by his official companions must be feasted at his expense at one of these temples. He himself, however, is not always required to do the honours of his banquet, which thus affords a short interval of comparative liberty. Whilst the police-officers are revelling with their friends on the good things the foreigner in their custody has provided for them, they are content to connive at his *nayboen* transgression of the rigid laws of seclusion and separation. Thus, at such an opportunity, and only such, can a member of the factory ramble about with a single interpreter, enter the shops, and make purchases at his own pleasure.—The bay of N. is 7 m. in length, by 1 m. in breadth; and affords excellent anchorage. The outer roads are formed by the two Cavallos islands on the W and S, and a small chain of islets on the N. A few brass guns are mounted on these points. The Dutch and Chinese traders who resort to it for the purposes of commerce are strictly confined to the island of DESIMA: see that article. Guards stationed on the coast keep a constant look-out for ships, and as soon as the approach of one is reported at N. a boat is instantly despatched to demand her name, country, equipage, and every other necessary particular. This is accomplished without the exchange of a word or any personal intercourse, by papers drawn up from the boat, and returned after inserting the proper answers. This done, the ship must wait further orders where she is, on pain of being considered and treated as an enemy; and the interval is occupied in packing up bibles, prayer-books, pictures or prints representing sacred subjects, should any such be on board—in short, every thing connected with Christianity—in a chest, which is duly locked and sealed. When the governor of N. has received these answers, a boat is again sent to demand hostages; and when these have been delivered and conveyed to their destined temporary abode, a Japanese deputation, headed by a police-officer of the highest rank called a *gobanyosi*, and accompanied always, at the express request of the governor of N., by one or two members of the Dutch factory, visits the ship, in order finally to ascertain that she is one of the two lawful annual merchantmen admitted from Batavia with Dutch consignments for Desima. Should she, at any stage of the proceedings, prove to be an interloper, she is at once ordered to depart; if in distress of any kind, is supplied with whatever she may need, and that gratuitously, the more strongly to mark the determination to suffer no trade; but she is not permitted to enter the bay, or to hold any communication with the shore beyond asking for and receiving the necessaries of which she is in want. If the investigation proves satisfactory, the Dutchmen return home, the *gobanyosi* takes possession of the guns, arms of all kinds, ammunition, &c., which, together with the chest containing religious objects, he removes to an appointed place on shore, where they remain in deposit during the vessel's stay, to be restored at her departure. The imports from Batavia consist of sugar, tin, cotton thread, black pepper, cloves, lead, sapan wood, Patna chintz, cloths, woollens, and camlets. The returns are chiefly copper and camphor. Ten Chinese junks are annually admitted into the port of N. In 1813, Sir T. S. Raffles, when governor of Java, despatched two ships to N. with cargoes of sugar, tin, spices, woollens, and chintzes, valued at 298,000 dollars. The returns showed a balance in favour of the voyage of 44,000 d. —The pop. of N. has been variously estimated at from 60,000 to 120,000.

NAGATO, or NANGATO, a province of Japan, forming the W extremity of the island of Nifon. It has a fertile soil, producing rice, grain, legumes, cotton, and tobacco.

NAGES, a town of France, in the dep. of Tarn, cant. and 5 m. ESE of La Caune.

NAGGAR, a town of Afghanistan, at the foot of the Kalobagh range, in N lat. 33° 10′.

NAGGHERY, a town of Hindostan, in the Carnatic, 56 m. WNW of Madras.

NAGGRI, or NAGGRI-KOTTE, a fort of N. India, in the principality and 24 m. SSE of Sikhim, in N lat. 26° 56′, E long. 88° 8′.

NAGIAH, a fortress of Hadramaut, in Arabia, 27 m. SSW of Shiras.

NAGJERY, a town of Hindostan, in the prov. of Khandeish, in N lat. 21° 25′.

NAGLES MOUNTAINS, a range of mountains in co. Cork, extending about 9 m. W from the town of Fermoy. They form part of the S screen of the valley of the Blackwater, and of the great backbone mountain-range of co. Cork. Their chief summits, named from E to W, are Rathcormack, Knockinskea, Sechane, and Nagles. The loftiest of these, Knockinskea, has an alt. of 1,388 ft. above sea-level.

NAGNE, a river of Hindostan, in Gujerat, which flows into the gulf of Cutch, after a course of 40 m.

NAGOES, a town of Hungary, in the com. of Schemek, 9 m. N of Igal.

NAGOJA, a town of Nifon, in Japan, 80 m. E of Meaco.

NAGOLD, a town of Germany, in Würtemberg, 24 m. WNW of Stuttgard. Pop. 1,800.—Also a river of Würtemberg, which flows NW, and falls into the Enz at Pfortzheim, after a course of 45 m.

NAGOLPANI, or NAGULPANI, a river of Nepal, which rises near Suhariah; runs E and SE; and joins the Rapti, on the r. bank, after a course of 120 m.

NAGORE, a port of India, in the district of Tanjore, 3 m. N of Negapatam, on the gulf of Bengal, in N lat. 10° 49′. It is a place of some consequence, and carries on a considerable trade with Ceylon.—Also a district of Hindostan, in the prov. of Ajmir, between Bikanir and Marwar. It is inhabited chiefly by Hindus, and governed by a prince who is tributary to the rajah of Jynagur. It is celebrated for a breed of fine cattle, highly esteemed for drawing heavy artillery. Its cap., of the same name, is in N lat. 27°.—Also a town of Bengal, formerly the cap. of Birbhum, in N lat. 23° 56′.

NAGOREBUSSY, a town of Hindostan, in the prov. of Bahar, district of Hajipur, pleasantly situated on the W bank of the Little Ganduk, in N lat. 25° 22′. There is another place of this name in the dist. of Tishut, in N lat. 25° 53′.

NAGOTAMA, a town of Hindostan, in N lat. 18° 30′, E long. 73° 16′, 37 m. SSE of Bombay, on the road to Punah.

NAGOYA, a town of Japan, in the island of Nifon, on the N coast of a bay of the same name, 90 m. E of Meaco.

NAGPORE, NAGPUR, or NAGAPURA, a large town of Hindostan, capital of the rajah of Berar's territories, in N lat. 21° 9′, E long. 79° 11′, situated on a low swampy plain, which is well cultivated, and is watered by a small river called the Nag or 'Serpent' from its numerous windings. It is a city of modern date, and although very extensive and populous is meanly built, few of the houses consisting of more than one story. When Ragoji Bhoonsla, about the year 1740, fixed here the seat of the Mahratta government, it was an insignificant village, but it is said now to contain 120,000 inhabitants, who manufacture silk and cotton goods, fire-arms, and cutlery, and conduct considerable trade with Benares and Mirzapore. See BERAR.

NAGPUR (CHUTA), a district of Hindostan, in the

prov. of Bahar, situated principally between the 22d and 23d parallels of N lat. It is mountainous and woody. It is well known to contain iron and coal, and it is probable some of the more valuable metals might be found. It is called Chuta or Little Nagpur to distinguish it from the Mahratta territory of the same name. It is dependent on the collectorship of Ramghur. Its principal towns are Doesa and Burwa.

NAGRACKA, a river of the state of Missouri, U. S., which falls into the Arkansas, in W long. 99° 20′. It is 100 yds. wide at its mouth, and is navigable 150 m.

NAGRAGINSKOI, a town of Asiatic Russia, in the gov. and 176 m. N of Tobolsk.

NAGU, an island of Russia, off the W coast of Finland, in N lat. 60° 12′. It is about 6 m. in length.

NAGUALAPA, or San-Pedro, a river of Mexico, which passes Colima, in the prov. of Mechoacan, and flows into the Pacific ocean, in N lat. 19° 30′.

NAGUARACHI, a settlement of Mexico, 45 leagues N of Chihuahua.

NAGY, a Hungarian word signifying *grand* or *great*, a frequent prefix in the topography of Hungary.

NAGY-ABAD, a town of Hungary, in the co. of Schumeg, 40 m. W by N of Funfkirchen.

NAGY-AG, a large village of Transylvania, in the Hunyad, near Deva, 15 m. NNE of Vajda-Hunyad. It stands in the midst of mountains, in a romantic position, and has a rich mine of tellurium in its vicinity.—Also a river of Hungary, which rises in the com. of Marmaros, on the borders of Poland, and falls into the river Theiss.

NAGY-ARANYOS. See Aranyos.

NAGY-BAJOM, a town of Hungary, in the com. of Bihar, on the river Berettyo, 26 m. SSW of Debreczin.

NAGY-BANYA. See Banya (Nagy).

NAGY-BERCZNA, or Welke Brezna, a village of Hungary, 18 m. N by E of Unghvar.

NAGY-ENYED. See Enyed (Nagy).

NAGY-IDA. See Ida (Nagy).

NAGY-KALLO. See Kallo (Nagy).

NAGY-KAPORNAK. See Kapornak (Nagy).

NAGY-KAPOS, a small town of Hungary, on the Latorcza, 12 m. WSW of Unghvar.

NAGY-KAROLY. See Karoly (Nagy).

NAGY-KATA. See Kata (Nagy).

NAGY-KORESCH, a town of Hungary, in the com. and 45 m. SSE of Pesth. Pop. 12,000, of whom the greater part are Magyars, and by religion Calvinists. The inhabitants are chiefly employed in the cultivation of vineyards, the sale of wine, and the rearing of sheep.

NAGY-MADA, a town of Hungary, in the com. of Saboltsch, 46 m. NNE of Debreczin.

NAGY-MAITHENI, a town of Hungary, in the com. of Szathmar, 13 m. SW of Szathmar-Nemethi.

NAGY-MEGYER. See Megyer.

NAGY-SZBON. See Hermannstadt.

NAHAN, a town of Hindostan, the cap. of Sirmur, in N lat. 30° 33′, E long. 77° 16′, at an alt. of 3,207 ft. above sea-level.

NAHANT, a peninsula of the state of Massachusetts, U. S., 14 m. NE of Boston. It is connected with the mainland by a narrow isthmus of firm sand, 1½ m. in length, and just high enough to prevent the waves flowing over it. The surface rises from 40 to 100 ft. above sea-level.

NAHANT (Point), the NE point of Boston harbour, in N lat. 42° 27′, W long. 70° 57′.

NAHE, a river of Germany, which rises at the small town of Naheweiler, in the territory of Treves; flows through the Lower palatinate; and runs into the Rhine, on the l. bank, at Bingen, after a prevailingly ENE course of 75 m. Its banks were the scene of military operations in November 1795.

NAHEL, a village of Oman, in Arabia, 120 m. NW of Muscat.—Also a village of Lower Egypt, 16 m. SE of Cairo.

NAHIA, a village of Kerman, in Persia, 70 m. S of Kerman.

NAHIL, a small river of Barcah, which falls into the Mediterranean, in N lat. 32° 10′, E long. 40° 10′.

NAHNPARA, or Nahanpara, a town of Hindostan, in the prov. of Oude, 21 m. N of Beraitsh.

NAHR, an Arabic word signifying 'river,' of frequent occurrence in Oriental topography. For words compounded with this prefix see the latter word.

NAHRAIN (Al), a village of Diyarbekir, in Asiatic Turkey, on the Khabur, 40 m. NE of Kerkesieh.

NAHREN, or Nehren, a village of Würtemberg, 6 m. S of Tubingen. Pop. 1,100.

NAHUELHUAPI, a lake to the E of the Chilian Cordillera, in about S lat. 41° 30′, W long. 73° 30′. It is about 36 m. in length from E to W, and is reputed to discharge itself into the Sicu-Leubu.

NAI. See Nay.

NAIBOUDOUNG, or Neubdoung, a town of Tibet, in the prov. of Wei, near the r. bank of the Yarou-dzangbo-tchu, and 75 m. SE of Lassa.

NAILA, a village of Bavaria, in the circle of Upper Franconia, 9 m. W of Hof, and 30 m. NNE of Bayreuth, on the l. bank of the Selbitz. Pop. 1,610. It has several spinning and saw mills, manufactories of linen and cotton fabrics, and breweries; and in the environs are mines of iron and copper, and quarries of marble.

NAILLAC, a village of France, in the dep. of the Dordogne, cant. and 3 m. S of Hautefort, and 23 m. N of Perigueux.

NAILLAT, a commune of France, in the dep. of the Creuse, cant. of Le-Dun-le-Palleteau, and 14 m. NW of Gueret, on the l. bank of the Brezentine. Pop. 1,881.

NAILLOUX, a canton, commune, and town of France, in the dep. of the Haute-Garonne, and arrond. of Villefranche-de-Lauraguais. The cant. comprises 10 com. Pop. in 1831, 8,317; in 1841, 8,616.—The town is 6 m. WSW of Villefranche, and 21 m. S of Toulouse. Pop. 1,353.

NAILLY, a village of France, in the dep. of the Yonne, cant. and 4 m. NW of Sens. Pop. 1,000.

NAILSEA, a parish in Somersetshire, 8 m. WSW of Bristol, and near the Bristol and Exeter railway. Area 2,960 acres. Pop. in 1831, 2,114; in 1841, 2,550.

NAILSTONE, a parish in Leicestershire, 3 m. NNE of Market-Bosworth. Area 3,000 acres. Pop. in 1831, 637; in 1841, 710.

NAILSWORTH, a hamlet partly in Minchinhampton parish, and partly in that of Avening, Gloucestershire, and 2 m. SW by W of Minchinhampton. Pop. 898.

NAIMAN, or Naymann, a Mongol tribe, who inhabit the E part of Mongolia, to the E of the Lokau, and S of the Sira or Shara-Muren.

NAIN, a district and town of Persia, in Khorassan, in the prov. of Irak-Ajemi. The town is 150 m. WNW of Yezd.—Also a Moravian establishment and port on the E coast of Labrador, to the N of Fraser's bay, in N lat. 56° 24′, W long. 61° 48′. The mean annual temp. here is 26° 6′.

NAINTIVU, Nayntivoe, or Haarlem, an island in the strait of Palk, to the W of the peninsula which forms the northern extremity of the island of Ceylon, NE of the island of Delft or Nedoentivoe, in N lat. 9° 30′, E long. 79° 54′. It is about 4 m. in circumf., is partially cultivated, and affords excellent pasturage. Its inhabitants, about 500 in number,

are chiefly Vellalas. It has a small Hindu temple, dedicated to Naga Tambiram, the god of serpents.

NAIPI, or NAIPIPI, a river of the prov. of Choco, in New Grenada, which flows into the Atrato, on the l. bank, about 118 m. above the mouth of the latter river. Its upper course is reported to be navigable to within 24 m. of the port of Cupica, on the Pacific, and the intervening distance is said to be nearly level. From the inner part of the gulf of Darien or Candelaria, up the Atrato, along the N, and thence across to Cupica bay, is a distance of 114 m., of which about 19 m. only are overland; and two-thirds of the distance by water are, it is affirmed, even now navigable for large ships, and the remaining third for loaded boats. In 1820, a detachment from the Chilian frigate Andes, dragged a six-oared boat belonging to that vessel from Cupica bay to the N. in 10 hours, though they had to cut their way through the bushes; and Colonel Cancino embarking in it, brought it as far as the city of Quibdo. Lieutenant Wood, who surveyed Cupica bay and other points on the Pacific coast of S. America in Her Majesty's steamer Pandora, walked from the bay to the *embarcadera* on the N. in the beginning of 1850. He states that he accomplished the distance in less than 2 hours; that his guides told him he could reach the place where loaded *bongos* stop in 4 hours more from the time of his arrival at the N.; and that he considers there are no difficulties to be overcome beyond what are presented by the intersection of from 5 to 6 m. of land, some part of it a dead level, and some part an eminence whose height does not exceed 300 ft. A paper published in the *Reverbaracio Mercantil*, a Quibdo newspaper, in 1834, contains the following statements. "The N. does not offer so good a navigation as the Atrato higher than 5 leagues from its mouth. The river of course decreases as we near its source, and is not navigable beyond the Tambo-de-Antado, about 12 leagues above its mouth; but below that point its waters continue flowing towards the Pacific till they are within 2½ leagues of the bay of Cupica. From Antado to the bay a man generally goes on foot in 6 or 7 hours; but it ought to be kept in mind that his journey is by a route on which the tracks of preceding travellers cannot be traced. Throughout the whole space that divides the Atrato from the Pacific the soil is naturally dry, fertile, and low, intersected only by a few mounds, so that an excellent railroad might be made at small expense." Consul-general O'Leary says: "The course of the Atrato is straight, and its bed deep and entirely free from snags and such like obstructions. The N. is equally well-adapted for steam-navigation. The country between this latter river and Cupica bay, though generally flat, is not, as generally stated, entirely level. I am told by a well-informed person who has traversed that district, that the elevation there may be from 100 to 150 yds." The Atrato, it appears, has a bar with only 5 ft. water upon it; but is within its bar navigable for the largest vessels to above the junction of the N.; and a short cut from the bottom of the bay of Candelaria to the Atrato will obviate the obstruction of the bar. From the junction of the N. with the Atrato, to the point at which the former river appears to attain its minimum distance from the Pacific coast, that river is as well-adapted for navigation as the Atrato. Writing in 1803, Humboldt expressed himself as follows: "To the SE of Panama, and following the coast of the Pacific ocean, from Cape San Miguel to Cape Corrientes, we find the small port and bay of Cupica. The name of this bay has acquired celebrity on account of a new plan of communication between the two seas. From Cupica we cross, for 5 or 6 leagues, a soil quite level and proper for a canal, which would terminate at the *embarcadera* of the Rio-N. This last river is navigable, and flows below the village of Citara into the great Rio-Atrato, which itself enters the Atlantic sea. We may almost say that the ground between Cupica and the mouth of the Atrato is the only part of all America in which the chain of the Andes is entirely broken." The opinion expressed by Humboldt in 1803 was entertained by him with increased confidence in 1850. The bar of the Atrato, the small rise of tide in the gulf of Darien—only 2 ft.—and the fact that Cupica harbour is exposed to the SW, are all considerations which have been urged against the Atrato and Cupica line of inter-oceanic communication. In that latitude, however, SW winds are seldom violent. The officers of the Spanish marine place the principal mouth of the Atrato in 8° 12′ N lat. Lieut. Wood has ascertained that the bottom of Cupica bay is in 6° 41′ 19″ N lat. The distance of the junction of the N. with the Atrato is said by some to be 60 leagues above the mouth of the latter; by others to be in 6° 33′ N lat.: it is probably nearly on the same parallel as Cupica bay. The junction of the N. may be about 120 m. above the mouth of the Atrato. The town of Quibdo or Citara, on the Atrato, is 120 m. in a direct line from the gulf of Choco, and vessels of 30 tons burden easily ascend to it; while loaded boats pass 20 or 30 m. up the N. even in the dry season. At present the ascent of the latter river is made in canoes in 2 days, after which another half-day's travel completes the route to Cupica.

NAIR, a town of Hindostan, in the prov. of Berar, and district of Gavelgur, 36 m. ESE of Ellichpur.—Also a town in the presidency of Bombay, and prov. of Candeish, on the r. bank of the Panzar, 39 m. SSE of Nandurbar.

NAIRN, a parish and town on the coast of Nairnshire. The p. lies within the champaign country or great plain of Moray, and the river Nairn bisects it north-eastward and northward to the frith. Pop. in 1801, 2,215; in 1831, 3,266; in 1841, 3,393.—The town, the capital of Nairnshire, is situated on the l. bank of the river Nairn, immediately above its embouchure, 11 m. E by S of Forres, and 86 m. NW by W of Aberdeen. Near the middle of High-street stand the town and county buildings, the principal public edifice and architectural ornament of the place. N. is distinguished for the dryness and healthiness of its situation, for its cheapness of provisions, and for the excellence of its beach and its artificial appliances for sea-bathing. It is, in consequence, a favourite summer resort of sea-bathers. The town was long noted for standing so exactly on the boundary-line between the Highlands and the Lowlands, and being so completely bisected by the mutual repulsion of the Moray men on the east, and the kilted Gael on the west, that the Lowland Scottish dialect was spoken at the one end of the street, and the Gaelic language at the other!—The trade of the town must always be very limited; as the Highlands commence at a short distance to the S, and Inverness and Findhorn supply the adjoining coast districts. The chief articles of export are fish and fir-timber. The burgh unites with Inverness, Forres, and Fortrose, in sending a member to parliament. The pop. within the borough boundaries in 1841 amounted to 2,687; in 1851 to 2,977. Nairn gave the title of Baron in the Scottish peerage to the ancient family of Nairn.

NAIRN, a river of Inverness-shire and Nairnshire, having its source near the central water-sheds of the boldly-mountainous district of Badenoch, at a point 9 m., in a straight line, E of the middle of Loch-Ness. Its course is with few and slight devia-

Constructed & Engd by

C.H. Swanston Edinr

tions toward the NE; and, measured in a straight line, extends to about 30 m. Its influx to the Moray frith occurs 8 m. E of the great contraction of the frith at Ardersier, and 9 m. WSW of the embouchure of the Findhorn.

NAIRNSHIRE, a small county of Scotland, consisting of a main body and several small detached districts in the province of Moray, and of a detached district in the ancient earldom of Ross. The main body is bounded on the N by the Moray frith; on the E by Morayshire; on the SE by the detached part of Inverness-shire; on the S by Morayshire; and on the SW and W by the main body of Inverness-shire. Its greatest length, from N to S, is 19 m.; its breadth at the coast and mean breadth over 9 m. into the interior is 8 m. One detached part lies among wild mountains 2½ m. E of the main body; another pendicle, about 1 m. long, lies 5 m. SE of the main body; another of not larger extent lies on the r. bank of the Spey, at the distance of about 19 m.; while another detached part lies immediately SW of the sources of Nairn river. The detached part in Ross lies along the river Conan and the E side of the head of the Cromarty frith. The area of the whole county is said to contain 200 sq. m., or 128,000 acres; and its acres are stated to be in the proportion of about 70,000 cultivated, 30,000 uncultivated, and 28,000 unprofitable. The first and the second detached portions are patches of wild upland; the pendicle on the Spey is a tiny contribution to the vale of that river; and the detached part near Loch-Ness is the upper part of the mountain-glen of Farigag-water. Of the main body of the co., between two-thirds and three-fourths of the area, from the S boundary downwards, are covered with Highland heights, but ploughed throughout by the romantic and picturesque vale of the Findhorn. The sea-board district is part of the fine large plain of Moray; and, over a breadth of from 1 m. to nearly 6 m. from the coast, is low and flat.—The river Nairn runs NE across the W wings of the uplands, and nearly the centre of the lowlands; and the Findhorn, at 7 or 8 m. distance, runs in a parallel direction through the uplands, achieving within the co. a run of 11½ m. The arable land in the hilly district, crossed by the Findhorn, bears a small proportion to the waste; and, except on the banks of the brooks, has a sandy soil full of gravel and small stones. The greater part of the co. is unenclosed. Natural woods cover 8,000 acres, and plantations at least 4,000.—The only manufacture is that of woollen-cloth. The low country is well-provided with roads; and the high district has one road up the Findhorn, and another at right angles with it which crosses the river at the bridge of Dulsie. N. contains the royal burgh of Nairn, the burgh-of-barony of Auldearn, and several small villages. It unites with Morayshire in sending a member to parliament. Constituency in 1838, 107; in 1848, 115. Pop. in 1801, 8,257; in 1811, 8,251; in 1821, 9,006; in 1831, 9,354; in 1841, 9,923; in 1851, 9,918, being an increase of 20 per cent. in 50 years, or at the yearly rate of 0·36 per cent.

NAIRS. See article MALABAR.

NAISEY, a village of France, in the dep. of Doubs, cant. of Roulans-l'Eglise. Pop. 700.

NAI-SOUNG, a town of Tibet, in the prov. of Wei, on the r. bank of the Yarou-dzangbo-tchu, and about 150 m. ESE of Lassa.

NAIZIN, a commune and village of France, in the dep. of Morbihan, 8 m. SE of Pontivy. Pop. 2,003.

NAJAC, a town of France in the dep. of Aveyron, 9 m. SSW of Villefranche, near the river Aveyron. It has copper and lead mines in the neighbourhood. Pop. 1,363.

NAJERA, or NAGERA, a town of Spain, in the prov. and 16 m. WSW of Logrono, on the l. bank of the Najerilla. Pop. 2,746. Its environs are fertile in grain.

NAJERILLA, a river of Spain, in the prov. of Burgos, formed by the union of the Nagera and the Millan, which joins the Ebro, on the r. bank, after a NNE course of 40 m.

NAJU, a small island in the Eastern seas, near the W coast of the island of Celebes, in S lat. 1° 29′.

NAKEL, or NAKLO, a small town of Prussian Poland, on the Netze, 16 m. W by N of Bromberg. Pop. 2,860.

NAKHITSCHEVAN, a town of Russia, in the gov. of Ekaterinoslav, on the Don, 18 m. SW of Novo-Cherkask. Pop. 10,000. It was founded by Catherine II. in 1780, and peopled by an Armenian colony. Its trade consists chiefly in silk and cotton goods, brandy, soap, and Morocco leather. This town, according to Dr. Clarke, offers an example of that enterprising commercial spirit which is characteristic of Armenian merchants. "They are not naturally a lively race of men; yet, instigated by commercial speculations, these men traverse all countries, and overcome surprising obstacles; frequently making journeys to India, and to the most distant regions of the earth. Their commodities and their manufactures, as far as we were enabled to judge of them at N., appeared to be Turkish, and of a nature to find a ready sale in Axay and in Tcherkask. They supply all the fairs of the neighbouring provs.; and these fairs afford the most extraordinary sights in Europe, because they are attended by persons from almost every nation: there is scarcely a nation, civilized or barbarous, which has not its representative at the fairs which are held along the sea of Azof, and upon the Don, but particularly at the great fair of N. The *Hamaxobii* of Herodotus then make their appearance, as in the days of the historian, travelling in vehicles, the coverings of which are their tents by night, and tilts for their cars by day."

NAKHODEH, a village of Persia, in the prov. of Azerdbijan, the capital of a fertile district to the SSW of Urumiyah.

NAKRA, a village of Khorassan, 9 m. E of Herat.

NAKRASH, a village of Lower Egypt, on a canal between the Nile and the Lake Mareotis, 10 m. NW of Shabur.

NAKSHIVAN, NAKHITSCHEVAN, or NAKHSHEVAN, a khanate of Russian Georgia, between the parallels of 38° 50′ and 40° N lat. It is of triangular form; and bounded on the N by the khanate of Erivan, from which it is separated by the Kutshilan mountains; on the E by Karabagh, from which it is divided by the Ala chain; and on the S and W by the Aras river, which divides it from Persia. From the Aras to the Sarial-Syrtshaei mountain, in the Ala range, at the junction of the Kutshilan range, or what may be regarded as the base of the triangle, it has a length from SW to NE of 50 m. Its extreme length from NW to SE is 80 m. The Arpa-shai, flowing W and SW to the Aras, and its branches, water the N part of the khanate. The Shagri-shai, Alindshai, and Bist-shai, all flowing SSW to the Aras, water its S part. The Arpa-shai gives fertility to a broad well-peopled tract of land. Rice is extensively cultivated. Cotton is also grown; and the *Palma Christi* is sown with it to provide a supply of oil for burning. Mineral salt occurs in some districts — Its cap., of the same name, is situated 73 m. SSE of Erivan, about 2 fursukhs from the Aras, on the edge of a higher level than that of the alluvial plain bordering upon the river. In 1830 it contained about 2,000 Moslem and between 800 and 900 Armenian families. Around and in the city are numerous gar-

dens, which are highly productive of quinces, pears, apples, melons, pomegranates, grapes, and almonds. The city was desolated during the last war between Russia and Persia.

NAKSKOW, or NASKOW, a town of Denmark, in the island of Laaland, on a small bay to which it gives name, in N lat. 54° 50′ 20″, 15 m. W by N of Marieboe. It has a convenient harbour, which has been deepened to the extent of 12 ft. by dredging, and has a shipping trade to England, Norway, Copenhagen, and Holstein. The export of grain in 1849 from this port was 144,600 tons. The total arrivals were 289 vessels = 2,168 lasts. Pop. 2,700.

NAL, a town of Beluchistan, in N lat. 27° 35′, E long. 65° 59′.

NALDA, a town of Spain, in the prov. and 9 m. SSW of Logrono. Pop. 1,800.

NALDRUG, a town of India, in the Nizam's dominions, 80 m. W of Bider.

NALDURUH, a town of Hindostan, in the prov. of Dowlatabad, in N lat. 17° 27′, E long. 76° 45′.

NALGONDA, a town of India, in the Nizam's dominions, 58 m. ESE of Hyderabad.

NALIKAN, a village of Asiatic Turkey, 32 m. E of Eski-Shehr, on a small affluent of the Saccaria.

NALLA-MALLA, or BLUE MOUNTAINS, a range of mountains in Southern Hindostan, lying between the meridians of 77° and 80° E; running NE and SW; and appearing to terminate in Naggery-Nose, on the Coromandel coast. Their highest points are situated between Cummum in the district of Cuddapah, and Amrabad in the prov. of Hyderabad, and vary in height from 2,000 to 3,500 ft. above sea-level. They appear to rest upon and are flanked by granite, but their main structure is singularly composite in its geological formation, consisting of clay-slate, slaty limestone, quartz, sandstone breccia, flinty slate, and hornstone slate. The breadth of the range varies, but never exceeds 50 m. The river Kistna pursues a tortuous passage for upwards of 70 m. through this chain, between lofty and precipitous banks which sometimes rise to 1,000 ft. above its bed. The river Pennaar also intersects the range by a similar gap or fissure. It is in the alluvial soil of the plains at the base of this range of mountains, and particularly on or near the banks of these two rivers, that the most celebrated diamond-mines of India occur, and among others the famous mines of Golcondah. Mr. Voysey regards the sandstone breccia of the clay-slate formation as the matrix of the diamonds procured in Southern India.

NALON, a river of Spain, which flows into the bay of Biscay, near Mures, after a NW course of 62 m.

NALLOES, a people of Western Africa, who inhabit the banks of the Rio Nunez. They are intelligent, and have made some progress in agriculture, and in the cultivation of rice, indigo, and cotton.

NAMACUL, a town of India, in the district of Baramahl, in N lat. 11° 22′, E long. 78° 5′. It possesses a strong fort situated on a rock.

NAMAGANG, a small island in the Eastern seas, in S lat. 6° 45′.

NAMANDA, a town of Nifon, in Japan, 32 m. SSW of Iga.

NAMAQUAS, a people of Southern Africa, forming a branch of the Hottentot race. The country, through which they are thinly scattered, lies between the 23d and 30th parallels of S lat., and is divided by the Orange river into Great and Little Namaqualand. Their language is also used by the Hill Damaras. See HOTTENTOTS.

NAMASKET, a river of Massachusetts, U. S., which joins Bridgewater river, N of Middleborough, to form the river Taunton.

NAMBALLA, a settlement of Ecuador, in the prov. and 40 m. NW of Jaen-de-Bracamores.

NAMBU, a seaport on the NE coast of Nifon, in Japan, 200 m. N of Jedo.

NAMBUDY, a town of Hindostan, in the prov. of Aurungabad, in N lat. 19° 15′, E long. 73° 3′.

NAMESZTO, a town of Hungary, 12 m. NNE of Arva, on the l. bank of the Weisse-Arva. Pop. 1,400.

NAMFIO, or ANAPHI, a small island of European Turkey, in the Grecian archipelago, 15 m. E of Santorin, in N lat. 36° 23′ 56″. It is about 15 m. in circumf., and has a few villages inhabited by about 800 Greeks. A great quantity of honey and wax is collected on this island; but its mountains are rocky and barren, and the soil yields only a little wheat and oil. —To the SSE of this island lie a group of islets called Namfi-Pulo.

NAMGHAN, a town of Khokan, 180 m. E of the city of that name, near the r. bank of the Sihun.

NAMIESCHT, a town of Austria, in Moravia, 25 m. NNE of Znaim, chiefly remarkable for its bridge over the Oslawa, ornamented with a number of statues. Pop. 2,200. It has manufactories of fine woollens and linen.—Also a village of Moravia, in the circle and 8 m. W of Olmutz. Pop. 800.

NAMINGATA, a town of Nifon, in Japan, 56 m. NW of Fitaqua.

NAMPUR, a town of Hindostan, in the prov. of Khandeish, 90 m. ESE of Surat.

NAMSEN-ELV, a river of Norway, which rises in Lake Naums-Vandet, in N lat. 65° 5′, E long. 13° 40′; runs SW; and falls into a fiord of the same name, between the island of Ottenoe and the mainland, in about N lat. 64° 25′. The coast of Norway and Lapland, from this place to Kola, is supplied with timber from the forests on the banks of the N. —The fiord, to which the river gives name, is about 20 m. in length from SE to NW, with an average breadth of 3 m.

NAMSLAU, a walled town of Prussian Silesia, on the Weida. 29 m. E by S of Breslau. Pop. 3,000.

NAMUR, one of the southern provinces of Belgium; bounded on the N by Brabant; on the E by Liege and Luxemburg; on the S by Luxemburg and France; and on the W by Hainault. Its superficial extent is 687,640 acres, of which 58,959 acres are waste. N. is one of the richest, most fertile, and most picturesque provs. of Belgium. The surface is hilly, but by no means unfruitful. It is watered by the Maese or Meuse, the Sambre, the Lesse, and the Homme; and has in the S part of the extensive forest of Ardennes. "Throughout the greater part of its N division you pass through vast tracts of agricultural country, rich plains slightly undulating, and not too thickly wooded, and covered in due season with crops of wheat, or oats, or barley, or forage. In the central part of the prov. the country assumes a more picturesque aspect. The beautiful scenery of the banks of the Meuse is already well-known to many English travellers. The river from Dinant to N., and lower down in the direction of Liege, is a sort of miniature Rhine. The precipitous banks on either side are clothed with rich wood, here and there diversified by vine plantations; and if you miss the fine old ruined towers and castles that lend to the Rhine so romantic an interest, and add so much to the picturesqueness of that noble river, the Meuse can boast of natural attractions in rocks and crags, not massive, indeed, or grand, but bold and beautiful. The interior of the country, towards the S, presents an aspect of alternate woodland and plain, and of well-cultivated fields fertile in crops and verdure. It is, however, in the N and NE parts of the prov. that the best agriculture is to be found, where grain of a superior quality is raised in great abundance, and exported to foreign countries, among others to Eng-

land, in a very large proportion. The S part of the prov. is of a less fertile character. The district bordering on France to the W, and on Luxemburg to the E, contains a very large quantity of waste land, heath, and prairie, and is comparatively unfit, at present at least, for any agricultural purposes. In N., as also in the prov. of Hainault, you find agriculture carried to very considerable perfection, according to the old system of cultivation. The farms are of considerable size, ranging from 80 to 100 or 150 hectares. The leases are for 3, 6, and 9 years; and the rent paid is about 100 fr. per hect. for the best land; and from 50 to 70 fr. for that of more inferior quality: a hectare is nearly 2½ English acres. In that part of the prov. which is included in the district of the Hesbaye, the rent paid frequently amounts to 150 fr. or £6 per hectare. Even on the largest farms the mode of cultivation is very clumsy and primitive. Drainage, until within about a year, was a thing unknown to the majority of the farmers in N." [Correspondent of *Morning Chronicle* in 1850.] The climate is temperate and agreeable; the chief productions are corn, potatoes, turnips, tobacco, and fruit. Of mineral products the most important are iron, lead, copper, coal, marble, and potter's clay.—The chief manufactures of the prov. are iron, copper, paper, leather, and woollens.—The province had in 1815 a pop. of 166,199; in 1830, of 212,725; in 1849, of 366,181, of whom 261,813 were French or Walloon. It sends 3 senators and 5 representatives to the legislature, and is under the jurisdiction of the high court of Liege. It is divided into 3 administrative arrondissements: viz., Namur, Dinant, and Philippeville; which are subdivided into 15 cantons, and 245 communes.—Before the French revolution, the greater part of this prov. belonged to the house of Austria, and the remainder to France; but in 1794, the whole was overrun by the French, and made to constitute, with the addition of part of Luxemburg, the dep. of the Sambre-et-Meuse. After remaining 20 years in their possession, that part originally belonging to Austria was incorporated in 1814 with the new kingdom of the Netherlands; and next year, after the battle of Waterloo, and the farther cessions by France, the French portion was added to the Belgic frontier.

Namur, the capital of the foregoing prov., is situated between two rising grounds, at the conflux of the Sambre and the Maese, 33½ m. SW of Liege, and nearly a like distance SE of Brussels, in N lat. 50° 28′ 30″, E long. 5° 0′ 7″. Pop. in 1836, 20,176; in 1843, 23,495. It is well-built, with wide and clean streets. The houses are tall and gaunt-looking, and in general built of stone of a blue colour with red and black veins. N. contains several edifices worthy of attention, in particular the cathedral, the church of St. Loup, the new town-hall, and the church of the Jesuits. Its bishop, who is a suffragan of Malines, has the provs. of N. and Luxemburg for his dio. Among its public institutions are an episcopal seminary, a Jesuit college, an athenæum, a deaf and dumb asylum, an academy of painting, a music-school, and a public library of 16,000 vols. From the vicinity of coal and iron, extensive manufactures of fire-arms, swords, knives, scissors, and other articles of iron, copper, and brass, are carried on; leather, paper, thread, and tobacco, are also fabricated here. N. is connected with Charleroi, Braine-le-Comte, and Brussels, by a railway 68 m. in length; and with Liege by a line connecting with Verviers and with Tirlemont. N., as an important military frontier, has strong outworks, and has been considerably strengthened since the last war. The citadel, which stands directly above the town, is constructed upon the shelves of a stupendous rocky escarpment that rises almost perpendicularly from the banks of the Meuse.—N. is noted in military history for the long siege which it sustained in 1692, against Louis XIV.; and again in 1695, against William III. of England. In the beginning of the 18th cent. it was seized by the French, but in 1713 was ceded to Austria; and was afterwards, in consequence of the Barrier treaty, garrisoned by Dutch troops. In 1746 it was taken by the French, but restored to the Dutch in 1748. In 1792 it was taken by the French; in 1793, retaken by the Austrians; and in 1794 again occupied by the French, who kept it till the general cession of the Netherlands in 1814. It was the scene of an obstinate conflict in June 1815, between the Prussians and the French under Grouchy, when retreating after the battle of Waterloo.

NAMUSA, a small island in the Pacific ocean, belonging to the cluster called Meanges, in N lat. 5° 1′.

NANAS, a town of Hungary, in the com. of Szabolcs, 23 m. NNW of Debreczin. It contains above 7,000 inhabitants, whose chief employment consists in cultivating the neighbouring country.—Also a mountain of Austrian Illyria, in the circle of Adelsberg, among the Julian Alps.

NANAY, a large and navigable river of Ecuador, in the prov. of Mainas, which enters the Amazon, in S lat. 3° 27′.

NANCAY, a village of France, in the dep. of Cher, 20 m. N of Bourges.

NAN-CHANG, a district and town of China, in the prov. of Ho-nan, and div. of Fang-yang-fu.

NAN-CHANG-FU, a division and town of China, in the prov. of Keang-se. The div. comprises 8 districts. The town, which is the capital of the prov., is 330 m. SW of Nan-king and 540 m. S of Pekin, in N lat. 28° 37′ 12″, E long. 115° 51′ 47″. It is situated on an island formed by the Kan-keang, an affluent of the Pho-yang. It is about 6 m. in circumf., and is nearly oval in form. It has extensive but ill-built suburbs, and has 6 gates. With the exception of a temple, it contains no edifices worthy of note; but it has numerous shops, and possesses an active trade in porcelain manufactured in the vicinity, straw-hats, brocade, fans, perfumery, furs, theatrical accoutrements, idols, &c. In the environs are several lime-kilns, and a triumphal arch of grotesque architecture. N. was laid waste by the Tartars, but is rapidly rising in importance. The surrounding district is extremely fertile, and richly cultivated.

NAN-CHANG-HEEN, a district and town of China, in the prov. of Keang-se, and div. of Nan-chang-fu.

NAN-CHAOU, a district and town of China, in the prov. of Ho-nan, and div. of Nan-gan-fu, in N lat. 33° 33′, E long. 112° 38′.

NAN-CHIN-HEEN, a district and town of China, in the prov. of Shen-se, and div. of Han-chung-fu.

NAN-CHING-HEEN, a district and town of China, in the prov. of Keang-se, and div. of Keën-ching-fu.

NAN-CHUEN, a district and town of China, in the prov. of Sze-chuen, div. and 54 m. SSE of Chun-king-fu, in N lat. 29° 8′, E long. 107° 13′.

NAN-CHUNG-HEEN, a district and town of China, in the prov. of Sze-chuen, and div. of Shun-king-fu.

NANCOWRY, or Noncowery, one of the Nicobar islands, situated in N lat. 7° 47′, E long. 93° 43′, to the S of Camorta, and E of Katchall. Between this island and those of Camorta and Trincutty is a very capacious bay in which ships may lie in great security. The best entrance to it is on the E side, the W entrance being only 100 fath. wide, and the tide setting through it with great force. The soil of the island is good, and produces cocoa-nuts and other

fruits. The inhabitants barter poultry for cloth, cutlery, tobacco, &c. The Danes had a small settlement here; but, as it was attended with no advantages, and the garrison proved sickly, it was withdrawn.

NANCY, a city of France, the capital of the dep. of the Meurthe, situated in a beautiful plain, on the l. bank of the Meurthe, 172 m. E of Paris, in N lat. 48° 41′, E long. 6° 11′, at an alt. of 646 ft. above sea-level. It is well-built, and accounted one of the handsomest though dullest towns in France. It is divided into an old and new town; the latter is by far the larger as well as more handsome of the two, the streets being broad and straight, and the houses elegant. The gates of N. are particularly fine; those on the E and W sides are similar, and terminate two fine streets, which unite with other two in the royal square, which is surrounded by some of the finest buildings in the town. The old town was founded in the 11th cent., and, though in a great measure rebuilt, has narrow and crooked streets; but it contains two good squares. N. has also two well-built suburbs. Of its public edifices the chief are the town-hall, the cathedral, a large modern edifice, the church of Bon Secours, and the theatre, all of which are situated in the new town. The *palais-de-justice*, the exchange, the arsenal, the cavalry and infantry barracks, and churches, are the principal buildings of the old town. N. contains several hospitals and other philanthropic establishments. During the latter half of the 18th cent., it was made the seat of several literary and scientific institutions. It is a bishop's see, and has a university-academy, a national college, a botanic garden, and a library of 26,000 vols.—The pop. of N. in 1789 was 33,432; in 1841, 40,582. N. has no manufactures of consequence, with the exception of those of linen and woollen, and a few chemical articles. A considerable number of hands find employment in embroidering muslin. The chief objects of its trade are corn and wine. Its fortifications were dismantled after the peace of Ryswick in 1697.—The arrond. of N. has an area of 142,264 hectares, and comprises 6 cantons with a pop. in 1841 of 140,899.—The cant. comprises 42 coms.

NANDAN-SAR, a lake of Cashmere, on the N side of the Pir-Panjal mountain, and to the N of a pass of the same name. It is one of a small chain of lakes, the collective waters of which form the Dumdum, or Huripur river. Nandan-Sar is a place of religious resort by the Hindus.

NANDA PRAYAGA, a place of pilgrimage in Hindostan, in the presidency of Bengal, and prov. of Gurwal, at the confluence of the Alacananda with the Nandakini, and 33 m. ENE of Sirinagur, at an alt. of 2,805 ft. above sea-level, and in N lat. 30° 20′, and E long. 79° 18′. This is the most northerly of the five *prayagas* or 'holy junctions.' There formerly existed a temple and village in the locality, but of the former only a few ruins are now to be seen, amid which some Hindu images are placed for the adoration of worshippers.

NANDELSTADT, a town of Bavaria, 10 m. NW of Moosburg. Pop. 500.

NANDERE, a town and district of Hindostan. The town is situated in N lat. 19° 6′, E long. 77° 35′, and has a good stone-built fort. The district is intersected by the river Godavery. It is 150 m. in length, and about 35 m. in breadth. The soil is fertile and well-watered. The principal towns are N., Candahar, and Balcundah.

NANDODE, a town of Hindostan, in the Deccan, 40 m. SSE of Baroda.

NANDOKANDO, or NANDAGAN, a lake of Burmah, in the district of Mranmapyi, 30 m. N of Ava. It is connected on the S with Lake Remiack, and discharges itself by a short outlet, which issues from its N extremity, and joins the Mukiung, an affluent of the Irawaddi.

NANDRIN, a commune and village of Belgium, in the prov. of Liege, 8 m. E of Huy. Pop. 856.

NANDUI, a river of Brazil, in the prov. of São-Pedro-do-Rio-Grande; runs S; and joins the Ibicui, an affluent of the Uruguay.

NANDUI-GUAÇU, or ANHANDUHI-AÇU, a river of Brazil, in the prov. of Mato-Grosso, which has its source in the Serra Galhano; runs ESE; and joins the Pardo, on the r. bank, 60 m. above the confluence of that river with the Parana, and after a total course of about 180 m. Its principal affluent is the Nanduï-Mirim, or Anhanduhi-Mirim.

NAN-FUNG, a district and town of China, in the prov. of Keang-se, and div. of Keen-chang-fu, 120 m. SSE of Nan-chang, in N lat. 27° 3′ 36″, E long. 116° 27′ 50″.

NANGA, a port of Japan, in the island of Nifon, situated in a bay on the S coast, 55 m. SW of Jedo.

NAN-GAN, a district and town of China, in the prov. of Fo-keen, div. and 3 m. NW of Tseuen-chu-fu, in N lat. 25° 7′, E long. 118° 20′.—Also a district and town in the prov. of Kwei-chu, and div. of Hing-e-fu.

NAN-GAN-FU, a division and town of China, in the prov. of Keang-se. The div. comprises 4 districts. The town is 258 m. SSW of Nan-chang-fu, and 60 m. WSW of Kan-chu-fu, on the road from Canton to Pekin, and at the foot of a mountain, in N lat. 25° 30′, E long. 113° 59′ 52″. It is intersected by the Chang, which is here crossed by a covered bridge, of which the piers are stone, but the upper part of which is constructed of wood, and lined with shops. The walls of the town are of little height, and the gates insignificant in appearance. The streets are narrow, but are paved with stone or brick. The resident pop. is not large, but the trade of the locality draws hither a considerable concourse of strangers, who perform the voyage from the Chang to Pekin in long deep boats, lined throughout with white paper, and having for sails mats made of reeds. In the vicinity are three towers, one of which is on the adjacent mountain, and is 7 stories in height. On the slope of the mountain are also a triumphal arch and several pagodas. The surrounding country is well-cultivated, and produces tobacco, rice, and sugar.—Also a div. and town in the prov. of Ho-nan.

NAN-GAOU. See LA-MOA.

NAN-GAOU-TING, a district and town of China, in the prov. of Kwang-tung, and div. of Chaouking-fu.

NANGASAKI. See NAGASAKI.

NANGAXIMA, a town of Xicoco, in Japan, 20 m. NNE of Tosa.

NANGIS, a town of France, in the dep. of Seine-et-Marne, 12 m. W of Provins. Pop. 1,719. It was the scene of an action between the French and Austrians on 17th February, 1814.

NANGOIA, a town of Ximo, in Japan, 65 m. N of Nagasaki.

NAN-HAE-HEEN, a district and town of China, in the prov. and dep. of Kwang-tung.

NANHEIM, a small town of Hesse-Cassel, in the principality of Hanau, 2 m. N of Friedberg.

NAN-HEUNG-CHU, a division and town of China, in the prov. of Kwang-tung. The div. comprises only 1 district. The town is 165 m. NNE of Canton, at the foot of a mountain-range which separates the prov. of Kwang-tung from that of Keang-se, and on the Pe-keang, which is here crossed by a bridge, in N lat. 25° 11′ 58″, E long. 113° 55′ 10″. The walls are crenulated, and surmounted with pavi-

lions. The streets are paved, but are narrow, and are lined with shops, generally mean in appearance, and the houses are all very old. Large spaces within the walls are either empty or covered with ruins. The most remarkable buildings are the temples, one of which, dedicated to Confucius, is used by examinators of young aspirants to literature. The town is populous, and possesses considerable trade, and the environs are noted for their fertility.

NAN-HO, a district and town of China, in the prov. of Chih-le, div. and 12 m. ESE of Shun-ti-fu, and 240 m. SSW of Pekin, in N lat. 37° 5′, and E long. 114° 51′.

NAN-HWAE, a district and town of China, in the prov. of Keang-su, and div. of Sung-keang-fu.

NANJEMOY, a port in Charles co., Maryland, U. S., on a small creek of the Potomac.

NANJIRA, or NEONJEE, a river of the United States, a southerly branch of the Osage, in Louisiana.

NANKA ISLANDS, three small islands in the Eastern seas, near the W coast of the island of Banca, in S lat. 2° 22′. Bears, monkeys, and wild hogs are found on them.

NAN-KANG, a district and town of China, in the prov. of Keang-se, and div. of Nan-gan-fu, 240 m. SSW of Nan-chang, in N lat. 25° 42′, and E long. 114° 35′.

NAN-KANG-FU, a department and town of China, in the prov. of Keang-se. The dep. comprises 4 districts. The town is 72 m. N of Nan-chang-fu, on the r. bank of Lake Pho-yang, in N lat. 29° 31′ 42″, and E long. 116° 1′ 53″. It is tolerably well-built, and although of small extent contains a considerable population. It contains a pagoda 7 stories in height, dedicated to Confucius, and numerous richly sculptured statues which are said to be 300 years old, and evince the ancient importance of the town. In the vicinity is a mole of granite, constructed for the defence of the town against the inundations of the lake, and connected by a bridge or arched causeway with the city gate.

NAN-KE, a district and town of China, in the prov. of Sze-chuen, and div. of Seu-chu-fu, 150 m. SSE of Ching-tu, and on the l. bank of the Kin-cha-kiang, in N lat. 28° 48′, and E long. 105° 3′.

NAN-KEANG, a district and town of China, in the prov. of Sze-chuen, and div. of Paon-ting-fu, 210 m. NE of Ching-tu-fu, in N lat. 32° 20′, and E long. 106° 55′.

NANKIN, a village of Wayne co., in Michigan, U. S., 20 m. W of Detroit. Pop. 1,100.

NANKING, NANKIN, or KIANG-NING-FU, a large city of China, the cap. of the prov. of Kiang-su, situated in N lat. 32° 2′, E long. 108° 49′, about 3 m. S of the Yang-tse-kiang river, and 90 m. from its mouth. Of the ancient city, while yet the cap. of the empire, it was affirmed that if two horsemen set out from the same gate in the morning to go round the wall, they would not meet till evening. The present exterior wall—which can be traced, it is said, for a circuit of 32 m.—encloses an irregular polygonic space, divided into two parts,—the inhabited and uninhabited. The NE corner of the outer wall reaches within 700 paces of the river. The western face runs along the base of wooded hills for part of its distance, and then sweeps round the S side of the city through low flat grounds. The great extent of the wall renders the defence of the city difficult, besides which it is overlooked from the hills on the E. From the outer gate to the inhabited part, a distance of about 6 m., is entirely covered with gardens and bamboo groves. In the more prosperous state of the city, this quarter contained numerous villas of the Mandarins and great men; but now it is chiefly occupied with vegetable and fruit gardens for the supply of the city. The E part of the city is entered by 3 gates which are approached by well-paved causeways: this quarter, however, is thinly populated. A deep canal or ditch runs up from the river directly under the walls on the W. The general arrangement of the city is in 4 rather wide and parallel avenues, intersected by others of less width, and bordered with handsome shops. About a third of its area is now supposed to be unoccupied. The river enables N. to communicate by boats with all the interior of the empire, while the great canal affords a navigation to Pekin. N. is still distinguished by its manufactures above the rest of the empire. The staple is silk, particularly that of plain and flowered satins. It is also noted for its crapes, and for the thin cotton stuffs which bear its name; but these cottons are made in every valley of the S part of Kiang-nan. Its inhabitants fabricate likewise excellent ink, and excel in the art of printing. N. is still the most literary city in the empire; it furnishes the greatest number of doctors; and its booksellers' shops are the best furnished of any. The streets are narrower than those of Pekin, but are kept very clean. The magnificent palace which formerly adorned Nanking was destroyed, in 1645, by the Mantchu Tartars. Its principal ornaments now are the gateways, which are very lofty and splendid, and have temples attached to them; and the Paou-gan-sze or Porcelain tower, which latter structure is situated beyond the S wall of the city. This celebrated pagoda is thus described by Colonel Cunynghame, its first European visitor: "Making a few turnings among the narrow streets, we came to a large space from which two gateways lead into the outer or lower court of the far-famed tower. Leaving our horses in this yard, we mounted a handsome flight of stone stairs, and in a few minutes were within the lower story of the tower. We mounted to the top of the tower, passing through each of the octagonal stories, of which there are nine, each of these the least degree smaller than the preceding: from one to the other was a very narrow staircase, the first few steps of brick, the remainder of wood. With perhaps this exception, their respective size and a small difference in regard to the deities enthroned in them, one was a fac-simile of the other. On arriving at the highest, we reached the broad grating with which the windows were provided, and some, whose heads could bear the giddy height, proceeded upon the balcony on the outside, which was without any railing. A few feet above our heads was the golden pear, set upon a light frame of iron-work, from each side of which descended a chain to every one of the eight angles of the roof. The views from the summit filled us all with admiration: the whole town of N. was now laid out before us. A gigantic city it appeared to be: the SW portion was one dense mass of habitations—so thickly inhabited did it seem, that I can readily believe the attendant priest spoke truly when he stated that it at present contained more than 1,000,000 of souls; the masts of some of our shipping appeared in the distance, beyond the Loo-Lung hills, about 6 m. from us. The entire circumf. of the wall I should guess at 21 m., including the Tartar portion, which is quite distinct, and situated at the SE angle of the whole. We next examined the beautiful porcelain with which the exterior of the building is covered, as well as the interior. The neat and finished way in which these tiles are joined together, gives to the whole, at a very short distance, an appearance of actually being made of one entire piece. The many-coloured tiles used in its manufacture are diversified into a thousand curious and grotesque patterns; the wood-work of the balconies with which each story is surrounded, together with

their corresponding roofs, being painted and carved so as to resemble porcelain. A woodcut of the tower, together with a short description of it, was sold to the visitors for a few cash. The paper stated that a pagoda had been, at various times, erected on the spot where the present porcelain tower stands. The credit of rebuilding the present edifice is ascribed to two very celebrated emperors. The usurper, Gong-Lo—a monarch of the Ming house—being about to remove his capital to the N, erected this pagoda in honour of his mother, the celebrated spouse of Hang-Woo, as a tribute to her worth, and calling it 'the Pagoda of Gratitude.' It was commenced in the tenth year of Gong-Lo, and was not finished till the seventh year of Lenatic, taking a period of 19 years for its accomplishment. It cost, says this chronicle, 2,485,484 taels of silver, or £621,371. It is 329 covils 4 inches in height, having 9 stories, with a golden globe on its top. The colours were given to the stones partly by a kind of gilt amalgam, and also by glazing, so as to be imperishable and lasting through future ages; and the best proof thereof is, that it has never required repair, with the exception of its having been struck with lightning about 42 years since, and that it still retains all the freshness of a recently-erected building."—N. suffered much during the Tartar invasion, and in the war with the pirates of Fo-kien. On the 9th of August, 1842, the English forces employed in the expedition against China appeared before this city, and ten days thereafter the treaty of N. was concluded. See Historical paragraph to article CHINA.

NAN-KUNG-HEEN, a district and town of China, in the prov. of Chih-le, div. and 21 m. SW of Kee-chu, and 195 m. SSW of Pekin, in N lat. 37° 27′, and E long. 115° 30′.

NAN-LING, a district and town of China, in the prov. of Gan-hwuy, and div. of Ning-kwo-fu, in N lat. 31° 3′, and E long. 118° 18′.—Also a range of mountains which traverses the S part of China, in an ESE direction, and forms the dividing-line between the basin of the Yang-tse-keang, on the N, and that of the Hong-chin-keang, Hong-keang, Long-keang, or Si-keang, on the S. It attaches itself on the E to the Meling mountains. From its N side descend the Ou-keang, Yonen-keang, Seang-keang, and Kan-keang.

NAN-LO, or NAN-YO, a district and town of China, in the prov. of Chih-le, and div. of Ta-nung-fu, in N lat. 36° 9′, and E long. 115° 26′.

NANNERCH, a parish of Flintshire and Denbighshire, 5 m. SW of Flint. Pop. in 1841, 376.

NAN-NING-FU, a division and town of China, in the prov. of Kwan-se. The div. comprises 6 districts. The town is 240 m. SW of Kwei-lin-fu, in N lat. 28° 37′ 12″, and E long. 115° 51′ 47″. It is nearly quite surrounded by rivers and small lakes, mountains containing mines of silver, and abounding with elephants.

NAN-NING-HEEN, a district and town of China, in the prov. of Yun-nan, and div. of Keuh-tsing-fu.

NAN-PE-HEEN, a district and town of China, in the prov. of Chih-le, and div. of Teën-tsin-fu, 135 m. S of Pekin, in N lat. 38° 8′, and E long. 116° 43′.

NAN-PING-HEEN, a district and town of China, in the prov. of Fo-keën, and div. of Yen-ping-fu.

NAN-PU, a district and town of China, in the prov. of Sze-chuen, div. and 18 m. S of Paou-ning-fu, in N lat. 31° 19′, and E long. 106° 6′.

NANS, a village of France, in the dep. of the Var, cant. and 8 m. SSW of St. Maximin, and 15 m. WSW of Brignolle. Pop. 750. In the environs are several coal-mines, and a marble quarry.

NANSEMOND, a county in the SE part of Virginia, U. S., comprising an area of 444 sq. m., drained by a river of the same name, and containing a portion of Dismal swamp. It possesses considerable fertility. Pop. in 1840, 10,795, of whom 4,530 were slaves; in 1850, 12,275.—The river N. issues from Dismal swamp; passes Suffolk; and after a course, in a generally N direction, of about 30 m., flows by a wide estuary into James river, a little above the entrance of that river into Chesapeake bay. It is navigable to Suffolk, a distance of about 20 m.

NANSORINA, a market-town, or rather group of villages, in the African territory of Haoussa, 50 m. SE of Kano. The environs are well cultivated.

NANT, a canton, commune, and town of France, in the dep. of the Aveyron, and arrond. of Millau. The cant. comprises 6 coms. Pop. in 1831, 9,737; in 1841, 10,245. The town is 14 m. SE of Millau, and 62 m. SE of Rhodez, on the Dourbie. Pop. in 1841, 10,245.

NAN-TAN-CHU, a district and town of China, in the prov. of Kwan-se, div. and 60 m. NW of King-yuen-fu, in N lat. 25°, and E long. 107° 23′.

NAN-TAO, a town on the N coast of the small island of Ni-tao, near the SW extremity of the peninsula of the Corea.

NANTASKET ROAD, one of the chief entrances into Boston harbour, U. S., S of the lighthouse. It has a depth of from 5 to 6 fath., and affords good anchorage.

NANT-BOURANT, a hamlet of Sardinia, in the div. of Savoy, and prov. of Faucigny, mand. and 8 m. S of St. Gervais, and 11 m. SSE of Sallanches, on the l. bank of the Bourant, an affluent of the Arve. It has a mineral spring, and a mine of argentiferous lead.

NANTDDU, a chapelry in the p. of Cantreffe, Brecknockshire, 9 m. S by W of Brecon, on the E bank of the Taff. Pop. in 1831, 102; in 1841, 411.

NAN-TEEN-TSEUEN-FU-TSE, a district of China, to the SW of the prov. of Fo-keën, in N lat. 24° 29′, and E long. 98° 50′.

NANTENLLEW, a parish in Cardiganshire, 7 m. N by W of Lampeter. Pop. in 1841, 774.

NANTERRE, a commune and town of France, in the dep. of the Seine, and cant. of Courbevoie, 8 m. W of Paris, and 10 m. SW of St. Denis. Pop. in 1841, 2,922. It contains two churches, one of which is a very ancient edifice, and a great many villas, and has manufactories of glue, animal oil, and a variety of chemical substances, several brick and tile-kilns, and a large abattoir for the supply of the pork market of Paris. Pork, fresh and salt, freestone, and gypsum, form its chief articles of trade. The name of this town is derived from the Celtic word *Neintor*, signifying the temple of Tor, the principal divinity of the Gauls. Its temple was destroyed in the 15th cent. N. was formerly surrounded with walls flanked with towers. It was burnt by the English in 1346, and in 1411 was pillaged by the faction of the Armagnacs.

NANTES, a city of France, the cap. of the dep. of Loire-Inferieure, situated on the r. bank of the Loire, about 27 m. from its mouth, and 208 m. SW of Paris, in N lat. 47° 13′ 8″. The river is in this part of its course a wide and copious stream, and opposite to the town is divided by a number of small islands into six separate branches, of which the one adjoining the S bank is by far the largest. The Loire is crossed at N. by a magnificent stone-bridge, or rather a succession of bridges, extending in nearly a straight line from the city to the opposite bank, a distance of fully a league. It traverses 5 islands, the space occupied by which is more than twice the collective width of all the branches of the river. Immediately below the town the different branches unite into a single channel. The Loire here receives from

the S the river Sevre, and from the N the Erdre. The town occupies the ascent and summit of a hill, from which it overlooks the winding course and fertile banks and islands of the river. The form of the city, exclusive of the suburbs, is an oblong, of which the length is parallel to the river. The buildings are in general old, but a number are regular, and even handsome. Of the four suburbs, the one called La Fosse is the finest, consisting of elegant houses inhabited for the most part by merchants, and considerably surpassing the town in beauty. The cathedral, which contains the tombs of the dukes of Brittany, is built in the Gothic style. The town-hall, and the residence of the prefect, are also magnificent buildings. The castle, situated on the quay, at the E extremity of the town, and commanding the port, is an edifice of great extent, and in a good state of repair. The university, founded in 1460, has been converted into a lyceum. The other institutions for education are schools of anatomy, surgery, and hydrography. Here are also a public library of 30,000 vols., a botanical garden, a museum, and a cabinet of natural history.—The pop. of N. in 1789 was 64,994; in 1821, 68,427; in 1846, 82,993.—N. and its neighbourhood contain a number of manufactories. The principal are for the spinning, weaving, and printing of cotton, also of woollens and linen of various qualities. Here are likewise manufactories of cordage, earthenware, glass, hardware, and spirituous liquors. Ship-building also is carried on to a considerable extent. The quay of the Fosse is full half-a-league in length. It is shaded by magnificent trees, planted at regular distances, before warehouses and magazines filled with the produce of the colonies. The river is crowded with ships of all nations, but principally from the N of Germany, Sweden, Denmark, and Russia. The vessels come freighted with timber, hemp, tallow, &c., and carry back the brandies and wines of France. Before the first revolution the commerce of N. was much more considerable. It then was remarkable for the construction of beautiful and quick sailing vessels, and its general commerce yielded in extent and importance to none of the cities of France. Now, however, Havre and Marseilles stand far above it, and more vessels are constructed at Bordeaux. The small vessels now built here are principally intended for the cod and whale fisheries, which are carried on with zeal and success. N. also sends out 200 vessels in what are called *voyages au long cours*. But these are all of small tonnage, for ships of very large burden cannot come up to the town, the nature of the bed of the river being an impediment: they consequently unload their cargoes at Paimbœuf, 20 m. down the river.—There is canal navigation from N. to Brest, by three canals passing successively from the basin of the Loire, the Vilaine, and the Blavet, to the river Aulne, which joins the harbour of Brest. The total length of this navigation is 218 m.; and the locks, 238 in number, overcome a difference in level of 1,711 ft. The chief towns with which N. has communication by means of the Loire are Angers, Tours, Blois, and Orleans. N. is the seat of a prefect, of the criminal court of the dep., and of a chamber-of-commerce; it is likewise the see of a bishop.—The arrond. of N. has an area of 176,531 hect., and comprises 12 cants. Pop. in 1841, 216,143.—The cant. comprises 5 coms. Pop. 95,083.

History.] In the 5th cent. N. sustained a siege of 60 days by the Huns. It has been the seat of several ecclesiastical councils, and is noted in history for the celebrated edict issued in 1598 by Henry IV., in favour of the Protestants, the recall of which, in 1685, by Louis XIV., is justly considered a fatal error in that memorable reign. In the calamities of the revolution N. participated largely. The civil war of La Vendee spread to its very gates; and here, after the ascendancy of the Jacobins, 'the legislative butcher,' Carrier, gave vent to his sanguinary character, not merely by the guillotine, but by drowning his victims in the Loire.

NANTEUIL, a town of France, in the dep. of Oise, 10 m. SE of Senlis. Pop. 1,560.—Also a village in the dep. of Deux-Sevres, near St. Maixent. Pop. 1,100.—Also a v. in the dep. of Dordogne, cant. and 2 m. E of Thiviers.

NANTEUIL-EN-VALLE'E, a town of France, in the dep. of the Charente, cant. of Ruffec, 30 m. N by E of Angouleme. Pop. 1,020.

NANTEUIL-LES-MEAUX, a village of France, in the dep. of Seine-et-Marne, cant. and 3 m. S of Meaux. Pop. 1,500.

NANTGLYN, a parish of Denbighshire, 4 m. SW by S of Denbigh. Pop. in 1831, 345; in 1841, 391.

NANTIAT, a town of France, in the dep. of Haute-Vienne, 16 m. NW of Limoges. Pop. 1,245.

NANTICOKE, a river of Maryland, U. S., which rises in Delaware, and runs SW into the Chesapeake.—Also a township of Broome co., in the state of New York, 14 m. NW of Binghamton. Pop. 400.—Also a village in Sussex co., in Delaware.—Also a village of Upper Canada, in Walpole township.

NANTINAN, a parish of co. Limerick, 2½ m. SSE of Askeaton. Area 7,922 acres. Pop. 1,345.

NANTMEL, a parish of Radnorshire, 5 m. ESE of Rhayader. Pop. in 1831, 1,274; in 1841, 3,018.

NAN-TSING, a district and town of China, in the prov. of Fo-keën, div. and 9 m. WNW of Chang-chu-fu, and 150 m. SW of Fuh-chu-fu, in N lat. 24° 38′, and E long. 117° 25′.

NANTUA, an arrondissement, canton, and commune of France, in the dep. of Ain.—The arrond. comprises 6 cants. Area 86,144 hectares. Pop. in 1841, 52,242.—The cant. comprises 11 coms.—The town is 17 m. E of Bourg, and 36 m. W of Geneva, situated between two hills, in the neighbourhood of a considerable lake. Pop. 3,248. It has cotton and woollen spinning-mills and paper-mills, and a considerable transit-trade between France and Switzerland.

NANTUCKET, an island of Massachusetts, U. S., 56 m. S of Cape Cod, in N lat. 41° 18′. It is of a triangular form, about 15 m. long, and 11 m. broad where widest, containing 29,380 acres. The soil is in some places very productive; but it is mostly sandy. The inhabitants are chiefly engaged in the whale-fishery. Nantucket, together with several small islands near it, forms a co.; and contains a town of the same name with the island, but formerly called Sherburne. Pop. in 1840, 9,012; in 1850, 8,452.—The town is situated on the W side of a basin, on the NW side of the island, 109 m. SSE of Boston. Pop. 4,000. It contains 9 churches, 3 banks, a court-house, an athenæum, a library with 2,000 vols., a museum, and a school founded by Admiral Sir I. Coffin of the British navy. At the entrance of the basin there are two points which nearly land-lock the harbour, and render it safe from all winds. About 150 vessels belong to this port. The whaling business has been the principal employment of the inhabitants of N., in common with that of all the ports along this coast, from Cape Cod to New London, for more than a century. There are also woollen factories, rope-works, and fulling-mills in the vicinity of the town.

NANTUCKET-SHOAL, a bank which stretches out above 15 leagues in length, and 6 in breadth, to the SE of the above island.

NANTWICH, or NAMPTWICH, a parish and market-town in Cheshire, 18½ m. ESE of Chester, and 164 m. NW of London, intersected by the Birmingham and Liverpool Junction canal and the Grand Junction railway, and comprising the townships of Alvaston, Leighton, Willaston, and Woolstanwood. Area 3,490 acres. Pop. in 1831, 5,357; in 1841, 5,921.

—The town is situated in a pleasant valley on the banks of the Weaver. Its streets are irregular, and a considerable number of the houses are ancient erections. The principal manufactures are those of silk, shoes, and cotton. It was formerly noted for its extensive manufacture of salt. In the time of Henry VIII. there were 300 salt-works; but in consequence of superior springs having been found in other places, the trade has declined; a large quantity of salt, however, is still made here for home consumption. The pop. of the town in 1851 was 5,426. A decisive battle, on 18th January 1643, was gained in the vicinity of N. by the parliamentary troops under Fairfax.

NAN-YANG, a district and town of China, in the prov. of Ho-nan, div. of Nan-yang-fu.

NAN-YANG-FU, a div. and town of China, in the prov. of Ho-nan. The div. comprises 12 districts. The town is 180 m. SW of Kae-fung-fu, and 120 m. S of Ho-nan-fu, in N lat. 33° 6′ 15″, and E long. 112° 34′ 35″. It is enclosed by mountains in which azure stone is found.

NAN-YAN-KEANG, a river of China, in the prov. of Kwang-tung, and island of Hai-nan. It descends from a mountain in the centre of the island; runs W; receives several considerable affluents; passes a little to the N of Kan-gan, and throws itself into the bay of that name.

NAOS. See Navy Bay.

NAOS, a port on the SE side of Lanzarote, one of the Canary islands.

NAOUR, a village of Nubia, on the Nile, 15 m. NE of Moscho.

NAOURS, a town of France, in the dep. of the Somme, 9 m. N of Amiens. Pop. 1,918.

NAPA, a river of Upper California, which flows through a beautiful valley into the N side of the strait of Carquines, which it enters by a beautiful estuary. The valley is 36 m. in length from N to S, and is bounded on each side by lofty sierras, which at the lower end are 6 or 7 m. apart, but gradually approach each other at the upper end. The soil of this valley is of considerable fertility; and here the fruits of the temperate zone, peaches, pears, apples, melons, and grapes, grow side by side with the sugar-cane, date, fig, banana, and other natives of tropical climates.

NAPAGEDL, a small town of Moravia, on the March, 38 m. E of Brunn. Pop. 2,500.

NAPA-KIANG, a port on the island of Lieu-Kieu, the S point of which is in 26° 12′ 25″ N lat. The bay in every part is circumscribed by a broad coral ledge, beyond which are the coral islands of Tzi. It is open to winds from the N by W, to SW, yet is very secure. There are two entrances to the outer harbour, one from the N, the other from the W. Near the bay is a bustling little town called Napa or Napa-ching.

NAPANEE, a village of Upper Canada, in the township of Richmond, 25 m. W of Kingston, on a river of the same name, which is navigable to the v. for schooners drawing 6 ft. water. Pop. 500.—The river rises in Midland district, and flows into the bay of Quinté.

NAPANIR, a village of Hindostan, in the prov. of Malwah, in N lat. 24° 2′, E long. 77° 9′.

NAPARIMA (Mount), a hill on the W coast of the island of Trinidad, 9½ m. NE of Point-Brea.

NAPATA, a village of Sennaar, near the E bank of the Nile, 210 m. ESE of Dongola.

NAPEH-NIEU, a town of Burmah, on the road from Ava to Arracan by the Aarg pass, 32 m. SSW of Saluen.

NAPIER, a township of Bedford co., in Pennsylvania, U. S. Pop. 2,468.—Also a river of Western Australia, a branch of the Kalgan.

NAPIER (Mount), a flat-topped hill of Eastern Austrialia, in S lat. 37° 52′, 15 m. from Portland bay. Its summit presents a circular crater wholly composed of lava and scoriæ.—*Mitchell.*

NAPIERVILLE, a village of Du-Page co., in Illinois, U. S., 176 m. NNE of Springfield. Pop. 300.

NAPLES (Kingdom of),

A European state of the second class, politically designated Il Regno delle Due Sicilie, *i. e.* 'the Kingdom of the Two Sicilies;' consisting of the continental territory of Naples, or the southern portion of the Italian peninsula, and of the island of Sicily, which are sometimes distinguished as the *Regno-di-qua-dal-Faro* or Hither Sicily, and the *Regno-al-di-la-del-Faro* or Further Sicily. The continental portion, extending from 38° to 43° N lat. and from 14° to 18° E long., is bounded by the Papal dominions on the NW and N: the mouth of the river Tronto on the Adriatic, and of the outlet of the Lago-di-Fondi on the Mediterranean, marking the limits between the two territories; on the E by the Adriatic; on the S and W by the Mediterranean, and the straits of Messina by which it is separated from Sicily. It extends in length from SE to NW, that is, from Cape Leuco to the mouth of the Tronto, 280 m.; but if we measure from Cape Spartivento to the mouth of the Tronto, it will be 360 m. Its greatest breadth is 120 m.; in many places it is 80 m., and in some only 25 or 20 m. The extent of coast-line of this portion of the kingdom is 1,134 m.; its superficies 24,971 Italian or geog. sq. m. according to Bianchi, or 24,563 according to the *Almanach de Gotha;* that of the entire kingdom being 32,758 Italian sq. m. according to Bianchi, and 32,530 according to the *Almanach de Gotha.*

Administrative divisions.] The whole kingdom is administratively divided into provinces; the provs. into *distretti* or districts; and the districts into *circondarii* or circles, which last are again subdivided into *comuni* or communes. The following table presents the area in Italian sq. m., and population in 1837 and 1845, of the several provinces of Continental Naples, or the Provincie-al-di-qua-del-Faro, as they are designated:

Provinces.	Area.	Pop. In 1837.	Pop. In 1845.
Napoli, . .	288	715,654	780,434
Terra-di-Lavoro,	1,885	694,986	721,971
Principato-Citeriore,	1,710	513,177	537,606
Basilicata, .	3,134	486,270	481,288
Principato-Ulteriore,	1,064	379,386	384,507
Capitanata, .	2,205	302,666	311,517
Terra-di-Bari,	1,783	448,943	491,331
Terra-d'Otranto,	2,171	385,284	401,488
Calabria Citeriore,	1,980	402,757	414,932
Calabria-Ulteriore II.,	1,560	356,915	372,281
Calabria-Ulteriore I.,	1,659	272,444	306,328
Molise or Sannio,	1,344	342,778	353,083
Abruzzo-Citeriore,	940	287,052	301,746
Abruzzo-Ulteriore II.,	1,905	300,257	307,708
Abruzzo-Ulteriore I.,	935	200,719	216,486
	24,563	6,089,288	6,382,706

Physical features.] The Apennines on the NW run into Naples as far as the district of Rapollo, where the ridge divides into two branches, one of which passes through the prov. of Basilicata into that of Terra-d'Otranto, and terminates at Capo-di-Leuca; the other runs through the three Calabrias to the S point of Italy. From these main ridges side-branches run in several directions, partly connected with the principal chain, and partly forming separated groups. Among the former are the chains of Sorrento and Cenide; among the latter, the mountains of Gargano in Puglia, which cover a surface of 600 geog. sq. m.,

Monte-Barbaro and Mount-Vesuvius near Naples, and the Volture in Puglia. These mountains are not very well known; but their basis is almost generally granite and calcareous rock; the latter is predominant in the neighbourhood of Naples.—The principal capes on the Tyrrhenian sea are Capo-di-Gaeta, Ancini, Della-Campanella, D'Orso, Licosa, Dell' Asiarolli, Palinuro, Centraro, Zambrone, Vaticano, and Dell' Armi; on the Ionian sea are Spartivento, Rizguto, Delle-Colonne, Dell'-Alice, and Di-Leuca; on the Adriatic, Capo-d'Otranto, Cavallo, Punta-Rossa, and Punta-Saracina. The strata of the Apennines are granite, gneiss particularly mica slate, porphyry, jasper, and clay: their flanks are mostly calcareous rock and serpentine; on the NW coast of the continent, and on the E of the island of Sicily, basalt, lava, and volcanic tufa present themselves. The Apennines attain their greatest elevation in the Abruzzi, where the Gran-Sasso has an alt. of 10,185 ft., and the Monte-Majella of 9,325 ft See article APENNINES.—The most extensive of the level tracts of continental Naples is that of Puglie, which extends over the greater portion of the provs. of Capitanata and Terra-di-Bari. The ancient *Campania Felix*, surrounding the city of Naples, is also a magnificent plain, stretching about 40 m. in length, with a breadth varying from 10 to 20 m.

Rivers and lakes.] The seas which wash the coast form several considerable gulfs. The Tyrrhenian sea, which is connected with the Ionian sea by the straits or the Faro-di-Messina, forms the bays of Gaeta, Naples, Salerno, Policastro, and Santa Eufemia; the Ionian sea forms the bays of Squillace and Tarento; and the Adriatic the bay of Manfredonia. —All the rivers descend from the Apennines, and have consequently but a short course. The principal rivers of continental Naples falling into the Adriatic are the Tronto, which divides the Neapolitan dominions from the Papal delegation of Ascoli, and which is navigable for about 42 m. by small vessels; the Aterno or Pescara, formerly navigable, but now nearly choked up; the Sangro, flowing into the sea near Fossaceca; the Biferno, falling into the sea, after traversing a wild and sylvan district, between Termoli and Campo-Marino; the Fortore, the principal river of Capitanata; and the Ofanto, which in a course of 70 m. divides the prov. of Capitanata from Basilicata and Tierra-di-Bari. The Bradano and the Crati flow into the gulf of Taranto. The Mediterranean receives the two largest rivers in the kingdom, the Gangliano or ancient *Liris*, and the Volturno, which passing Capua, flows into the gulf of Gaeta.—The Fucino or Lago-di-Celano is the principal lake in this part of the kingdom. It is situated in the Abruzzi, and has an area of 36,315 acres.—The physical features of SICILY are described under that article.

Climate.] In the highly elevated districts of Continental Naples the cold of winter is severe and protracted. Towards the end of October, the tops of the mountains are covered with snow, which usually lies till the following summer. In some parts of Abruzzo the winter lasts 8 months; in the Terra-di-Lavoro and Apulia, cold weather continues only 4 or 5 months. In the plains and villages at the foot of the Apennines, snow seldom falls, and the climate is mild and balmy: perpetual spring seems to reign in this beautiful region: the winter is scarcely ever so cold as a cool Scotch September, and vegetation is never interrupted. Here, even in the depth of winter, the fields are green, the orange-trees continue in flower, the air is filled with the fragrance of shrubs and flowers, and the sea ever reflects a dark blue sky; but from the end of May to the beginning of September, the sun consumes the vegetation with his almost vertical rays, and an ever-cloudless sky yields little refreshing moisture to the languishing earth; even the sea-breeze comes laden with the fiery winds of Africa and conveys no relief to exhausted nature. Some tracts are infected with the exhalations of mephitic swamps, which seem to increase every year, as districts which were formerly accounted healthy are now deserted on account of the pestilential air. A great part of Puglia is a desert, on which during winter only innumerable flocks of sheep are fed. At the S extremity of the kingdom, the aloe and palm flourish in the open air.—The atmosphere is much more charged with moisture on the W side of the Apennines than on the E; but the average annual fall of rain is about 29 inches.

Agriculture and trade.] The Neapolitan territory is thus appropriated to agricultural purposes:

	British sq. m.
Corn-lands,	12,000
Vineyards,	1,000
Woods and olive-grounds,	3,000
Gardens and orchards,	500
Pastures and sheep-walks,	6,500
Wastes,	9,000
Total,	32,000

The chief products of husbandry are corn, wine, oil, cotton, flax, hemp, liquorice, paste, silk, and wool. There is an indescribable richness of vegetation throughout this country, and corn, wine, and oil are exported from it to a large annual amount; yet agriculture is carried on in the most wretched manner; and those districts on which Nature has scattered her richest bounties seem the most neglected. In the mountainous and more rugged quarters there is more industry exhibited than in the teeming plains. The peasants live mostly upon Indian corn and vegetables, reserving their wheat for exportation. Neither the inhabitants of N., nor those of Sicily, understand the management of wine; nevertheless, the wines of Vesuvius and Ætna, and those of Syracuse and Ischia, are good; while the oil of Puglia, though inferior to that of Lucca and Genoa, is an article in demand. Silk is extensively grown on the continent; and numerous flocks of sheep are kept, which furnish tolerably good wool. The horse is a noble animal here; but only buffaloes and oxen are used in the plough. The average crop of wheat is 5,500,000 imperial quarters, and the yearly consumption 5,000,000 quarters. The yearly production of wine is about 400,000 pipes, the greater portion of which is consumed at home. About 70,000 tuns of olive-oil are expressed yearly, half of which is retained for home-consumption. The yearly crop of cotton is about 10,000 tons. The annual production of raw silk is calculated at 1,000,000 lbs., of which one-half is consumed at home.—The chief manufactures are those of cloths, leather, and silks. The woollen factories produce yearly about 6,000 pieces of fine cloth for the markets of Naples and Palermo, and from 60,000 to 80,000 pieces of coarse cloth for the use of the peasantry and fishermen. The cotton manufacture is principally in the hands of Swiss and German capitalists. The wages of men is 1s. 2d. to 1s. 6d. a-day; of females, 8d. to 10d.; of children, 5d. to 7d. About 1,500 tons of malleable and 500 of pig-iron are made yearly in the realm.—The inland trade has increased considerably of late years, since the roads have been improved. The building of merchant-ships—promoted by the abundance of materials, and the cheapness of workmanship—has made great progress within the last 20 years. In 1824 the total capacity of the Neapolitan marine was 8,000 tons; in 1837 it amounted to 150,634 tons, comprised in 7,800 vessels. The fisheries of Sicily

are considerable, and employ between 4,000 and 5,000 hands. In 1835 there were 2,058 vessels attached to Sicily, possessing a tonnage of 41,800. The imports from Sicily into N. in 1836 amounted to £443,000, of which £257,000 consisted of materials of food. The exports from N. to Sicily during the same year amounted to £454,000, of which one-half was for articles of clothing, building, and furnishing. The total foreign trade of N. in 1840 amounted to £1,526,845 in imports, whereof £802,176 was from Great Britain and her colonies; and in exports to £612,500, whereof £123,949 was to Britain and the British colonies.—The tariff of the Two Sicilies, framed in 1823 and 1824, imposed inordinate duties, varying from 40 to 100 per cent. *ad val.* on colonial produce and on foreign manufactured goods, and by this system it encouraged smuggling and injured trade. In August 1845 a royal decree was published, reducing the duties on colonial produce and salt fish from a high to a moderate standard. The reform of the colonial tariff led to that of the duties on manufactured goods. A decree appeared in April 1846, reducing to a considerable extent the duties on 110 articles of natural products, manufactured goods, and goods necessary to manufactures. The second class includes cotton and woollen goods of all descriptions, on which the duties were reduced from 80 and 90 per cent. to 40 and 50. This reform was no less beneficial to the revenue than it had been to the trade of the country. In the second half of the year 1845, the customs' revenue of the kingdom amounted to 1,437,634 dollars, or £238,272; in the second half of the year 1846 it had risen to 1,565,048 dollars, or £260,841. See article NAPLES (CITY OF).—Accounts are kept in ducats and grains. Ten grains make a carline, worth about 4d.; and 10 carlines a ducat, worth 3s. 4d. Heavy goods are weighed by the cantaro and the rotolo. A rotolo is somewhat less than 2 lbs.; and 100 rotoli make a cantaro.—Weekly communication is kept up between the Two Sicilies by means of steam-packets of from 160 to 240 horse-power; and almost daily communication is maintained between N. on the one hand, and Civita Vecchia, Leghorn, Genoa, and Marseilles on the other, by national and foreign steamers of large size.—The king has ordered surveys to be made for two important railroads, which, after having passed the Apennines, are to unite the capital with the two extreme points of his states from N to E. The first of these two grand enterprises is to run from N. to Termoli on the Adriatic, with a branch to Chieti. The second line is intended to be carried from N. to Lecci, 8 leagues from the port of Brondes on the Adriatic. A railway from N. to Castellamare was opened on the 1st of August 1841. It is 14¾ Neapolitan or about 15 English m. in length.

Population.] In 1465 the kingdom of N., exclusive of Sicily, contained a pop. of only 1,647,376 inhabitants, which in 1483 had fallen to 1,540,645. In 1505 the pop. had increased to 1,760,339; in 1510 it had further risen to 1,824,070; in 1518, after the plague, it was 1,737,196; in 1561 it had increased to 3,318,547; and in 1595 to 3,624,501. From this period to 1669 there are no records extant; but in that year we find that owing to sundry visitations of the plague, and the oppression of the Spanish viceroys, who, it is said, from 1631 to 1644 sent into Spain 100,000,000 *scudi* (£23,750,000), the pop. had fallen to 2,718,370, being a reduction of 906,131. We have no official accounts from 1669 to 1734, when the pop. had again increased to 3,044,562. In 1765 it was 3,953,098; in 1773 it was 4,249,430; in 1791 it had risen to 4,925,381; and in 1805 to 4,988,679. In 1814 it had decreased to 4,956,693, in consequence of the war with France. In 1819 it had recovered to 5,034,191; and in 1824 it was found to be 5,386,040, which, with 1,730,000 for the island of Sicily, made the total pop. of the whole kingdom at that period 7,116,040. In 1840 the pop. of the kingdom of N. was returned at 6,177,598; and that of Sicily at 1,800,000; making a total pop. of 7,977,598 souls. The *Almanacco reale del regno delle Due Sicile* for 1844 estimated the pop. of the Neapolitan territories at 6,309,894; and of Sicily at 2,010,323, making a total of 8,320,217. The pop. was returned in 1845 at 6,382,706 for the continental territories, and 2,040,610 for the insular territories of the kingdom. In 1851 the pop. of continental Naples was estimated at 6,640,679. This pop. is very unequally scattered. There are entire tracts of land, such as the plains of Puglia, desert and waste; whilst others, as the Campagnia Felice, and the neighbourhood of the capital, have upwards of 450 inhabitants on a sq. m. With the exception of 75,000 Arnauts, a few Greeks, and about 2,000 Jews, the whole Neapolitan nation are Italians, and speak a dialect of the Italian language varying according to the different provs. The Arnauts reside on the E coasts of the continent, and in four districts of the Val-di-Mazzara in Sicily; they have preserved their national manners and customs, and even their language, and all belong to the united Greek church.

Ecclesiastical affairs, &c.] The religion of the state is the Roman Catholic; but the Protestants, until recently, enjoyed here considerable toleration. No inquisition was ever established in Naples; and no bull of the pope can be published without the royal assent. The king himself is head of the Neapolitan church, and has the title of 'Beatissimo Padre.' In 1824, according to the official registers, there were in the whole of Naples, exclusive of Sicily, 27,612 secular priests, 8,455 monks, and 8,155 nuns: total in holy orders, 44,222. In Sicily the proportion is much greater. When Joseph Bonaparte suppressed the monastic orders, their wealth amounted to 150,000,000 ducats = £25,000,000. By a concordat with the Pope in 1818, it was stipulated that the number of bishoprics in M. should be 109, and that each should have a revenue of not less than 3,000 ducats = £500; and that the dissolved monasteries should be re-established.—The kingdom of N., says Lady Morgan, "gave to ancient Rome, Ennius, Cicero, Horace, Ovid, and Statius; and to modern Europe, Tasso, Sannazaro, and Salvator Rosa. N., in the lower ages, was the asylum of the little learning then left; and the greater part of the classics which have reached posterity, was preserved by the learned industry of the Benedictine monks of Mount Cassin and Otranto. The flame of science was rekindled in the schools of Salerno; the Pandects of Justinian were found in Amalfi; and, in the 16th cent., its society, according to Apostolo Zeno, was so literary that the intellectual of all countries might have chosen for their residence the favourite retreat of Virgil, of Seneca, of Livy, and of Claudian." Colletta, writing in recent times, complains that "instruction was not public and diffused; and its political end sacrificed,—an error," he adds, "which pervaded every age, and every turn in the fortunes of our literature, down to our own days in 1806." Public instruction is carried on by means of an university, lyceums, and colleges, seminaries, and primary and secondary schools. In the university of Naples education is divided into the 5 faculties of divinity, jurisprudence, medicine, physics, and morals, each of which has various professorships attached to it specially. The lyceums are those of the capital and of 4 of the chief provinces. The other 11 provinces have colleges or minor lyceums. Some of

the pupils pay for their board and education, and others are free scholars. Secondary schools, or classical and mathematical seminaries, are established in all the principal communes; and primary schools, or schools for reading, writing, and arithmetic, are instituted in all communes without distinction. Youths intended for the medical profession are educated at a medical school in the metropolis, which is amply supplied with subjects for dissection, and which is closely connected with the general hospital. The principal establishments for female education are the first and second Educandati Isabella. In the first, which was founded by Caroline Murat, 116 girls, daughters of noble parents, are boarded and educated. A certain number, called Queen's scholars, pay £15 a-year; the others, who form the minority, pay £30 each. They enter the school at 8 years of age, and remain until 18. The second educandato is on the same plan with the first, but on a smaller scale, and is open to all girls, without distinction of rank or parentage. Girls of the lower orders receive gratuitous instruction in reading, writing, and sewing in the schools of the metropolis. Schools for the lower classes were established in 1843, in which reading, writing, and arithmetic are taught; but the means of public instruction which exist are entirely in the hands of the clergy. There is an academy of sciences at Naples, and several public libraries mostly consisting of theological works.—In 1821 and 1822 only 56 works were published in the kingdom. The greater part of the works which issue from the Sicilian presses relate to antiquities and the fine arts. In the capital of Naples there are 45 printing-offices, but on the whole island of Sicily only 5.—From an official statement published by the official *Journal of the Two Sicilies*, it appears that the number of crimes in that kingdom, which in 1837 amounted to 17,361, in 1838 to 17,919, in 1849 to 17,855, was only 16,626 in 1850. The average of crime with respect to pop., calculated upon a period of 10 years, is one crime for every 438 inhabitants. The number of cases brought before the criminal tribunals in 1850 was 4,016, relating to 5,805 prisoners. The number of political prosecutions was 215; the persons under trial 442, of whom 142 were acquitted.

Government.] The government of N. is an hereditary monarchy in the male and female line of the present dynasty. The laws are contained in the *Codex Carolinus*, published in 1754. The kingdom of Naples for many ages laboured under the accumulated weight of the feudal system in its worst form, and of vice-regal administration. The former chained and enslaved nine-tenths of the pop.; whilst the latter—the most pernicious mode of government ever experienced—subjected the whole nation to systematic plunder. The accession of the late sovereign, weak and ignorant as he undoubtedly was, was so far a fortunate circumstance that it delivered the Neapolitans from the tyranny of a viceroyalty. The kingdom is at present governed by an absolute monarch, in whose person the legislative and executive functions are placed as in a centre. The will and pleasure of the sovereign is divulged officially by laws, decrees, regulations, and rescripts. A law is made by the sovereign for general purposes. The draft of a law is first laid before the *consulta* of state, then brought before the council of state, of which the king is the head, and lastly, is made into a law of the land, in which shape it is put into force by a minister of state. A decree is made by the king to carry the principle of law into full effect, at the instance of the minister under whose care and attention the law particularly comes. A regulation is made by a minister of state for the better execution of a law or decree. A royal rescript is a decision clearing up doubts as to the meaning of decrees, which proceeds from the king in council.—The principal branches of government are the ordinary council of state, the council of ministers, the offices of president of the council of state, the ministries for foreign affairs, grace, and justice, ecclesiastical affairs, finances, the interior, war and marine, and police, and the general consulta of the kingdom. The last department embraces two sections; one for the affairs of Naples, consisting of 16 Neapolitans, and one for those of Sicily, consisting of 8 Sicilians. The united sections compose a general consulta for the common concerns of both divisions of the kingdom. The judges by whom the laws are administered are appointed and paid by the king, who has established a scale of rank in which every magistrate finds his proper place. A *conciliatore*, taken from among the principal householders, and recommended by the *decurionate* to the king, exercises authority in every commune to settle petty quarrels at the instance of the disputants. A judge of *circondario*, resident in every country town and in every quarter of the chief cities, acts as a civil and criminal authority. A judge of instruction is stationed in every district for the arrest and prosecution of criminal offenders. Tribunals of commerce, whose decisions are final in certain cases, are established in all the principal cities. A civil tribunal in every province pronounces judgment in the first instance in causes of limited value, and admits appeals from minor authorities, whose sentences it reverses or confirms. A criminal great court, established in every prov., decides in the first and last instance in criminal causes, and receives appeals against sentences of judges of *circondario*. Supreme courts of justice in Naples and Palermo are appeal courts from all tribunals, whether civil or criminal, by which all judges are kept under constant control. The judicial system, however praiseworthy for the even distribution of magisterial power, is faulty in the immense number of agents required for its daily working In Naples there are no less than 800 judges and assistants; in Sicily there are 250. They receive from £40 a-year, the stipend of a judge of *circondario*, to £667, the net salary of the president of the supreme court. In July 1812 a new constitution was drawn up for Sicily, upon the model of that of Great Britain, which received in part the royal assent, at the hand of the hereditary prince, under the title of vicar-general; but this constitution soon became little more than a dead letter. In 1848, under the pressure of the revolutionary movements of Europe, and of Sicily in particular, a liberal constitution was granted, which was as speedily revoked when the danger seemed to have passed away.

Revenue, &c.] The joint revenue of the kingdom amounted in 1814 to £4,333,333, and its debt to £20,619,000. In 1825, the revenue was 26,669,787 ducats = £4.444,964; the expenditure 27,298,616 d. = £4,549,436. The present revenue of continental Naples is about 26,000,000 ducats; while the debt in 1844 was 86,299.380 ducats. The revenue is derived from five principal sources, viz. direct taxes, indirect taxes, miscellaneous branches, petty receipts, and contributions from Sicily. The direct taxes consist of the land-tax and the tax on grinding corn. The former, or *fondiaria*, is levied upon the net rental of all lands, houses, mills, and barns, on an average of 10 years, at 12½ per cent. The latter, or *macino*, is levied upon corn ground at the mill, at the rate of about 3s. 2d. a quarter. The indirect taxes consist of the produce of the customs, the navigation dues, the consumption duties, and the royal monopolies of salt, tobacco, gunpowder, playing cards, and snow. The miscellaneous branches consist of the registration and stamps, the lottery, the post-office, the mint, the united branches of the sinking fund endowment and the public demesne, the woods and forests, and the *crociata* or sale of indulgences. The petty receipts consist of deductions from salaries, fees of office, and petty perquisites. The contribution from Sicily consists of the Sicilian quota, or one-fourth of the general revenue, and of the Sicilian debt, payable by instalments to the Neapolitan treasury.—In 1827 the armed force consisted of 47,324 men; in 1850 it was returned at 45,000. The militia amount to about 40,000. The strong places are Gaeta, Scilla, Amandea, Regio, Brindesi, Manfredonia, Capua, and Pescara. In 1827, the navy consisted of 2 ships-of-the-line, 5 frigates, and 50 armed vessels of less size. In 1850 it was composed of 1 ship of 80 guns; 2 frigates of 60 guns, and 3 of 44 guns; a corvette of 22 guns, and 8 other armed vessels; besides 6 steam-frigates of 300 horse-power each, and 8 smaller steamers.

History.] The S portion of the Italian peninsula was in early times inhabited by tribes of Illyrian descent. Grecian colonists having settled on the coast, it received from them the name of *Græcia Magna*. After the fall of the occidental empire, this part of Italy was seized by the Ostrogoths, whilst Sicily fell into the hands of the Vandals. In 554, Narses re-conquered both countries for the Grecian emperor Justinian I., whose successors incorporated them with the exarchate of Ravenna. The weakness of the exarchs, and the politics of the court of Constantinople, caused the establishment of the distinct principalities of Benevento, Naples, Salerno, Capua, and Tarentum, which successively became independent. The Greeks, however, during the incessant incursions of the Arabians—who in the 9th cent. settled in Sicily—exercised important influence in Apulia of Sicily, but both Greeks and

Arabians were finally driven from all their possessions in these countries in 1035. The Normans united all the principalities which had hitherto subsisted in Naples with Sicily; and Roger II. in 1130 assumed the title of king of Naples and Sicily, or 'of the Two Sicilies,'—a title which was only revived in 1816. With William II., Roger's male line became extinguished; but the right to both crowns was inherited from the house of Hohenstaufen by the emperor Henry VI., who had married the Norman princess Constantia. Conrad IV., in 1254, closed the line of Hohenstaufen on this throne. The Pope, taking advantage of Conradin's minority, gave the kingdom to Charles of Anjou, brother of Louis IX. of France. Sicily freed itself from French dominion in 1282 by the insurrection of 'the Sicilian Vespers,' as it is called, and came into possession of Peter of Aragon; but the line of the kings of Naples, of the house of Anjou, ended with Joanna I. Charles of Durazzo, his son, and his grand-daughter, Joanna II., successively occupied the throne in the midst of great troubles. The latter gave it by testament to Alfonso V. of Aragon, who maintained his right to it against Louis III. of Anjou. Ferdinand the Catholic conquered N.; and his grandson, Charles V., inherited the two Sicilies. For two centuries the united kingdom remained a Spanish prov., but rebellion and internal dissensions constantly distracted the country, and the insurrection of Masaniello nearly subverted the government. The peace of Utrecht, which terminated the Spanish war of Succession, gave N. to Austria, and Sicily to the house of Savoy; and when Spain in 1717 attacked Sardinia and Sicily, Austria made an exchange with Savoy of Sardinia for Sicily, and the kingdom of the two Sicilies became a part of the Austrian monarchy. In the war which arose in 1733, after the death of Augustus II. of Poland, Spain again conquered the two Sicilies for the Spanish Infant Don Carlos, who being in 1759, by the death of his brother, called to the Spanish throne, gave the Sicilies to his son Ferdinand IV., under the condition that this kingdom was never to be again united with the Spanish crown. The French revolution led the king of N. into a war with France. In 1796 he obtained peace by paying a large contribution; but a new war having broken out, a French army entered Naples and forced the king to retire to Palermo in Sicily. In January 1799, the Parthenopeian republic—as it was called from the ancient name of the town of Naples, *Parthenope*—was founded at Naples. In the summer of 1799 the Russians and Austrians being successful in Upper Italy, Macdonald who commanded the French troops in N. was compelled to retire, and the ancient order of things was again restored; but the battle of Marengo forced N. to conclude a separate peace with France at Florence, in March 1801, in which the island of Elba, the principality of Piombino, and the Stato-degli-Presidii were ceded to France, and Naples agreed to shut its harbours against the British. When war broke out again between France, Austria, and Russia, a treaty of neutrality was concluded between N. and France in September 1805; but Napoleon embraced the pretext of Russian and British troops being allowed to land in the rear of Massena to declare that the reigning dynasty had forfeited the throne of Naples. Massena now occupied the Neapolitan states, and Ferdinand and his family fled to Sicily, where he remained under the protection of the English till 1815. In March 1806, Napoleon named his elder brother, Joseph, king of Naples, and settled the hereditary royalty on his male descendants. But after a reign of two years Joseph was called to the throne of Spain in 1808, and Napoleon's brother-in-law, Joachim Murat, named king of Naples. Murat's ambition of becoming sole king of Italy, fanned into flame by the sudden resuscitation of the phœnix at Elba, encouraged him first to temporize with the allies, and then suddenly to attack the unprepared Austrians. The scheme at first succeeded; but the Austrians recovering from their surprise, rallied their scattered troops, and in their turn attacked Murat, and compelled him to make a hasty retreat towards his own dominions. In the meantime, a British squadron appeared before the capital, and 2 sail-of-the-line afloat, and one on the stocks, with all the stores in the naval arsenal, were taken possession of by the British government for Ferdinand, king of the two Sicilies. On the 20th of May, 1815, a military convention was signed, by virtue of which the whole kingdom of N.,—the fortresses of Gaeta and Pescara, together with Ancona in the Papal states excepted,—was surrendered to the allies, to be held by them for their lawful sovereign, Ferdinand IV. On the 23d, the Austrian army entered Naples, and the queen, agreeably to a treaty concluded with her, was conveyed by the British fleet to Trieste, and allowed an asylum in the Austrian dominions. Murat effected his escape from Naples to Portici, where finding a small vessel, he got on board and sailed for Toulon. Soon after this event, Pescara and Ancona surrendered; and Gaeta, a place of great strength, and defended by a numerous garrison commanded by French officers, was forced after a short defence to surrender to the united Austrian and British troops. Ferdinand returned to Naples in 1815, and solemnly promised a constitution to his subjects, but broke his word, and even did away with the constitution given by the English to Sicily. Murat was but coldly received by Napoleon. After the battle of Waterloo he with difficulty escaped in an open boat to Corsica. While here, a retreat was offered to him in Austria on condition that he would consent to live there merely as a private individual; but he had now got himself surrounded by a band of needy and desperate adventurers who prompted him to the mad enterprise of landing on the coasts of Calabria with the view of recovering his kingdom. He was taken prisoner at Pizza a few hours after his landing, and sentence of death passed and executed upon him the same day. In 1820 the introduction of the Spanish constitution was demanded from the king, who consented to it, and he and the crown-prince swore to it on the 7th of July. This proceeding dissatisfied the Holy Allies. An Austrian army entered N. in February 1821. In a few weeks the Austrians were masters of N., and soon afterwards of Sicily also, upon which the king returned to Naples, where all the blessings of an arbitrary government were restored. After the return of Ferdinand from the congress of Laybach, in May 1821, it was ordered that the administration of Sicily should be separated from that of N. A ministry was therefore instituted in Naples for the exclusive management of the affairs of Sicily, and a council-of-state was established in Palermo. This ministry lasted until June 1824, and the council was then installed in Naples, forming one only body with that of N. In 1833 the ministry for the affairs of Sicily was renewed, and besides the ministry, 4 directors, 2 of whom were Neapolitans, were appointed as advisers to the lieutenant-general. In 1837 the ministry for the affairs of Sicily, in Naples, was again abolished, and their direction placed in the hands of the Neapolitan ministers. The authorities of Sicily were directed to correspond directly with the ministers of Naples; the lieutenant-general was removed as the medium of communication, and remained only for the functions of his office; all the central administrations of Sicily were abolished, the general direction of police, the general superintendence of the roads, and others; and those which remained were considered as provincial establishments, dependent on Naples. A revolution at last burst forth on January 12, 1848, in which the Sicilian people, by force of arms, for a moment reacquired their ancient independence and liberty. See article SICILY.

NAPLES, the capital of the kingdom of the same name, situated in N lat. 40° 50′ 15″, E long. 14° 50′ 15″. There is no city in Europe more distinguished for beauty of site. Its position is in the form of an amphitheatre, on the shores of a bay which seems as it were shut up by the island of Capri, 17 m. to the S, and by those of Procida and Ischia, on the other side of the basin. On the E, at a distance of about 8 m., Vesuvius raises its isolated and fire-scathed summit; its smooth brown sides dotted over to one-third of its height with white houses, while at its feet lie the beautiful villages of Portici, and Torre-del-Greco. On the other side is the hill of Posilipo, with the tombs of Virgil and Sannazarius. At a distance is seen the chain of the Apennines, from which a branch detaching itself runs to the SW, having its summits crowned with the villages of Castell-a-Mare, Massa, and Sorrento, the birthplace of Tasso. The city itself is seated on the slope of a range of hills fronting the S and E, enjoying at almost every point of view the most varied and delightful prospects. Its suburbs stretch in a magnificent sweep from Portici on the E, to the promontory of Misenum on the W; and "every cliff and headland is a history." There is no beach, but the sand is firm and spotted like fine granite; and the anchorage is so good that the largest men-of-war ride within a mile of the shore. The general form of the city is oblong, extending from N to S, the S side resting on the bay; but the surrounding country is so studded with houses and villas that it is impossible to mark a line of separation between the city itself and its environs. The circumf. of the city alone, however, is computed at 9 m.; and with the suburbs at 18 m. The suburbs and contiguous villages extend 6 or 8 m. along the edge of the bay, over wide quays, terraces, and projecting piers, which break the uniformity of a mere line of houses. "To enjoy the picture of N. at its finest point of view," says Forsyth, "you must sail out in the morning about a mile from the mole, and catch the sun rising behind the hills. There you can distinguish at once the three celebrated craters upon which the city forms a loose amphitheatre: you see the whole elevation broken into great masses and crossed by great lines; lines formed of long palaces, hanging gardens, and

regular rows of terraced roofs: you trace the outline on the sea curiously indented, the shipping clustered behind the moles, and castles or towers on the points of projection." The appearance of the interior of the city is in general pleasing; its principal streets are wide and well-built, and the public edifices so lofty and solid as to give a general air of grandeur to the city. Their magnificence, however, chiefly consists in their magnitude: they want simplicity and unity of design, and present a confusion of almost every order and species of architecture, — Greek, Roman, Spanish, Moorish, and Arabian. The paintings, marbles, and other decorations, with which they are enriched, are seldom judiciously placed, and are scattered around with a profusion which mars their effect. The streets, though in general narrow, are straight and tolerably regular, and are handsomely paved with large flags of lava. The Strada-di-Toledo (*a a a*), extending half the length of the city, and having at the one end the Largo-del-Mercatello (*n*), at the other the Royal palace (*m*), is the finest street in N., and one of the best in Europe. It is broad, straight, well-paved, and bordered in its whole length with elegant buildings. The number of squares is considerable: several are spacious, but few handsome. The principal are those called Largo-del-Castello (*o*), Largo-di-Palazzo (*p*), and Largo-del-Mercatello (*n*). Several of them are decorated with obelisks and fountains. The houses are in general 6 or 7 stories high, flat-roofed, and covered with a kind of stucco, made of pozzolana sand, which becomes indurated by continued exposure to the atmosphere. Most of them have their flat roofs covered with flowers and shrubs planted in boxes filled with earth. "More than half their fronts consist in windows, and every window is faced with an iron balcony."

Public buildings.] Of the public edifices of Naples, the churches—which are said to number 330 —are the most conspicuous; but their splendour consists less in elegance of architecture than in

the richness of their paintings, marbles, and other decorations. Several of them are understood to occupy the sites of ancient temples. The cathedral (A), built on or near the substructure of a temple of Apollo, is a handsome Gothic edifice, but overcharged with ornaments in a discordant style. It is supported by more than 100 columns of granite, belonging originally to the edifice which it has replaced. In the subterranean chapel, under the choir, is deposited the body of St. Januarius. The church of the Santi Apostoli, erected on the ruins of a temple of Mercury, is perhaps the most ancient church in N. The church of St. Paul, said to occupy the site of a temple of Castor and Pollux, is spacious, well-proportioned, and finely incrusted with marble. The church of Santa Chiara is, for its antiquity and magnificence, the most attractive; and the convent attached to it is one of the most distinguished and wealthiest in Italy. The church of St. Filippo Neri is remarkable for the number of ancient pillars which support its triple row of aisles on both sides of the nave. The Royal palace (P), situated near the quay, at the southern extremity of the Strada-di-Toledo, has an air of grandeur: it is three stories high, and consists of three different orders of architecture. The palace of Capo-di-Monte (R), another royal residence, is situated outside of the town, towards the N, on an eminence commanding a delightful prospect. The old palace of the sovereigns of N. is now occupied by the courts of justice. "The villas of the Poggia Reale, Capo del Monte, Caserta, &c., &c., are most remarkable for their position. Some of them serve the king as hunting-lodges, but are otherwise rarely inhabited. The old palaces of the nobility, in the dark narrow lanes of the old part of the city, built round little cloistral courts, are melancholy fabrics, ill-furnished, and bearing every mark of time and negligence. Those

of a more modern date, in the Toledo and the other comparatively spacious avenues, though large, are little notable for the beauty of their architecture; and the elegant modern houses of that unrivalled site, the Chiaja, the 'Vaghissima Piaggia' of the Neapolitans, present a striking contrast, in their freshness, elegance, and accommodations, to the edifices of the Anjous and the Arragons, and those of the Spanish viceroy, or the lawless Neapolitan barons. These residences are all of a modern date; and white walls, green jealousies, light balconies, and gay verandahs, accord well with the beautiful gardens of the Villa Reale, which spread before them, without excluding the view of the bay over which these public gardens hang. The Chiaja is principally inhabited by the corps diplomatique, and foreign visitants of all countries, who either hire apartments in the houses of some Italian prince or noble, or occupy apartments in the numerous hotels, in which the Chiaja abounds; in either case the price is enormous; and in every respect N., to a stranger, is perhaps the dearest place in Europe after London." [*Lady Morgan.*] The theatres of N., great and small, are 7 in number; that of San Carlo, contiguous to the royal palace, is one of the finest in Italy, and perhaps the most magnificent in the world.

The harbour and fortifications.] These contribute greatly to the beauty and importance of N., which, like London, joins the bustle of a seaport to that of a capital. The quays, or buildings along the waterside, extend in the form of a crescent along the bay for the space of nearly 5 m., from the gate of Posilipo (P) on the W, to Ponte-della-Maddalena (M) or bridge over the small river Sebeto on the E. Their appearance, particularly in the quarter of the Chiaja, to the W of the harbour, is grand and imposing. The Villa-Reale or royal garden in this suburb (G) is a favourite promenade of the inhabitants, and commands a charming view of the bay. Though the bay is large, the harbour properly so called is small, and is entirely artificial, being formed by a large mole (*b b b*) projecting into the sea, and enclosing a basin nearly square, but little more than a $\frac{1}{4}$ m. across. At its entrance is a lighthouse.—The fortifications of N. are not adapted to resist an army, though the city is surrounded with a wall, and defended by a number of towers as well as by three large castles. The Castello-Nuovo (D) is situated near the harbour, and is connected by a covered way with the Royal palace (R). The Castel-del'Ovo (O), so called from its oval figure, is a fort of considerable strength, situated on a rock which communicates with the quay by means of a mole. The castle of St. Elmo (E), the chief citadel of the place, stands at a distance from the sea, on a hill to the W of the city; its subterraneous works are extensive, and bomb-proof. The arsenal (H) adjoins the sea, and is defended by bastions.

Literary and charitable establishments.] The university of N. was founded in 1224. Its pile of building, called the Palazzo-degli-Studii, is on a large scale, and when completed will be very elegant. Its interior is divided into several compartments, each containing a valuable collection. Among these are a library with 90,000 vols., a number of manuscripts and specimens of the press of the 15th cent., a cabinet of manuscripts of Herculaneum, with the various machines for unfolding them, a museum of paintings, a museum of sculpture, a collection of bronzes of Herculaneum and Pompeii, and a collection of Etruscan vases. In addition to its university, N. has a number of schools and *conservatorii*, a royal military school, a naval college, a college for the instruction of young Chinese and Japanese, a school for music and the arts, and a deaf-and-dumb school. Its institutions of a higher class are the royal academy of arts and sciences, and the society of agriculture, manufactures, and arts. Besides 4 public libraries, it has a museum, a botanical garden, and an observatory.—The charitable establishments of this city are numerous and well-endowed. Their total number is above 60. Of these, 7 are hospitals; above 30 are schools for poor children of both sexes, who are boarded, educated, and taught, in some a mechanical occupation, in others music; 5 are pawn banks for the industrious poor; most of the others are charity schools. The two principal hospitals are the Degli Incurabili and Della Annunziata. The former is open to the sick of all descriptions; the latter, which is well-endowed, is destined to receive foundlings and penitent females. Each affords relief to between 1,500 and 2,000 at a time.—On the E side of the city, by the side of the Campo Marzo, which stands high, and to which a splendid road leads, is the cemetery of Santa-Maria-del-Pianto, the general burying-place of the city, consisting of 365 huge pits or wells dug into the pozzolana of which the hill is composed, each closed by means of a stone with a ring to it. One of the holes receives each day the dead bodies of that day, which are brought in carts and tumbled down into it; after which quicklime is thrown in, and the pit is closed for a year.

Trade and manufactures.] The trade of N., though great for so inactive a country as the S of Italy, is small when compared to most of the crowded seaports of England and Holland. Its exports are confined to the products of the adjacent country, such as silk, wool, cotton, oil, wine, corn, and fruit. Silk is exported to a considerable amount to France and Spain, and, in a manufactured state, to England. The wool of Puglia is exported in considerable quantities. The cotton of N. is raised chiefly in the southern provs. The oil exported under the name of Gallipoli oil, is made both in Puglia and Calabria. Wine, particularly of the growth of Puzzuoli and the neighbourhood of Vesuvius, is shipped from N. in considerable quantities, as well as fruit, both dried and in a natural state. Timber also forms in a small degree an object of export, together with the very different articles of essences and liqueurs. The following table shows the foreign trade of N. in 1840:

Countries.	Imports.	Exports.	Total.
United States, . .	£90,586	£54	£90,640
Baltic countries, .	141,733	14,692	156,425
Belgium, Germany, &c., .	60,084	9,236	69,320
Brazil and states of the Rio de-la-Plata, . .	12,214	...	12,214
France and colonies, .	200,109	304,337	504,446
Great Britain and colonies,	802,176	123,949	926,125
Italian states, . .	191,711	158,691	350,402
Mediterranean countries, .	28,232	1,631	29,863
Total, . . .	1,526,845	612,590	2,139,435

N. has extensive manufactories of silk fabrics, and on a small scale, stockings, gloves, lawn, lace, cotton stuffs, diaper, fire-arms, china, glass, soap, and leather. A good deal of ingenuity is displayed in making violins and other musical instruments, also in mahogany furniture and carriages, and in the manufacture of snuff-boxes from lava and tortoise-shell.—The city is divided into 12 administrative wards, and 48 parishes. The municipal district includes 30 villages and hamlets.

Population.] The pop. of N, according to an official census, amounted, on the 1st of January 1845, to 400,813 souls, viz., 197,423 males, and 203,390 females. There were besides 30,000 foreigners, provincials, soldiers, and prisoners. The births in 1844 were 14,181 in number, viz, 11,831 legitimate, 128 illegitimate, and 2,222 *esposiii*, or exposed before the figures of Madonnas. The deaths were in the same year 13,342, or 839 less than the births. The various classes of the pop. were divided as follows:

Clergy,	Secular clergy,		3,401	
	Regular do.,	Monks, 1,764	3,209	6,610
		Nuns, 1,445		
Proprietors,				16,878
Government officers,				8,337
Pensioners,				11,902
Professors of sciences and assistants,				5,091
Professors of the liberal arts, and others,				1,936
Merchants and shopkeepers,				3,465
Notaries,				115
Students,				1,383
Farmers, shepherds, &c.,				2,596
Mechanics,				83,176
Engaged in the royal commission of benevolence,				2,830
Military,				18,184

Among the scientific professors were 133 bleeders! The schools are almost entirely placed under the control of the Jesuits. There were 24 primary schools, 253 private institutions for boys, and 137 for females. In N. they reckon 13,047 births in the year, and amongst them 2,164 illegitimate; in the kingdom the proportion of illegitimate to legitimate is as 4 to 100. With respect to the state of crime, we may expect it to be formidable. There were in one year 4,104 sentences pronounced in the tribunals, and 22,050 cases where the crimes were not prosecuted for want of evidence or discovery of the guilty. There were before the tribunals of correctional police in a year 144,465 cases, of which only 32,297 were convicted. Amongst the serious crimes were 115 of violence against the government officers, 5 of parricide, 37 *di conjugicidio*, 21 of murder of relations, 15 infanticides, 9 of poisoning and attempts at poisoning, 134 premeditated homicide, 46 attempts at murder, 89 involuntary homicides, 482 stabbings, many horrible crimes, 129 burning of houses, 75 thefts with murder, 1,700 robberies, &c. The fickleness of the people in making charges and withdrawing them is manifest from this, that of 88,358 prosecutions before the tribunal of correctional police in 1832, 40,904 were withdrawn by the complainants: this arises from terror, threats of vengeance, or false compassion. The number of female criminals is comparatively small. There were 95 persons condemned to death in 1833. A mild climate exalts the susceptibility and quickens the imagination of the Neapolitans, and gives an air of picturesque extravagance to many of their proceedings. Owing to the same cause, too, an unusual proportion of their time is spent in the open air, and many of the operations which in other countries take place within doors, are here exposed to public view: even the cookery of the lower orders is generally performed on the street. Mr. Whiteside says of the Neapolitans: "They are in all respects the reverse of the Romans in look, manner, dress, disposition, and civilization; insomuch that it is difficult to believe them to belong to the same country; an union between races so different would seem to be impossible. The Romans are quiet in their streets, almost gloomy, naturally grave and serious; the Neapolitans are like a crew of Bacchanalians, in perpetual revelry. N. seems ever in a carnival: it is scarcely possible to suppose the people we behold appear in their real characters; the business of life is turned into a masquerade. The glorious climate in which they live may have much influence on the habits of the people,—their corrupt government more. Populous as N. is, to a stranger it appears to possess a pop. exceeding that of London; for this reason, the whole mass of the pop., man, woman, and child, rush with one consent into the streets in the morning, and continue there, shouting, grinning, dancing, or at their trades or occupations, till night. Little real business all the while is done. Naples, for its size and importance, has less trade than any such city in the world. The people supply the want of business by noise and clamour. The dwellings of the people are cheerless and wretched; when, therefore, the bright sun shines in the morning, they pour down from their lanes and narrow streets into the broad Piazza, or Chiaja, or the Mole. The men do any little work they get, the women bring their chairs, and sit down and knit, or sew, or cleanse their hair in the streets, while the little *lazzaroni*, of whom I have reckoned one hundred in a short distance, tumble about in the dust, or roll an orange from one sewer to another—or, if on the shore, will dive for a farthing; and so their intellectual day passes, not omitting their enjoyment of the animating exhibition of Pulcinella, a spectacle to be seen in all parts of N., and announced by a national air highly musical. The *lazzaroni*, in which term I include fishermen, porters, messengers, &c., are, physically, a fine race of fellows; they seem as if preparing to go to bed, pursuing their occupations in linen drawers and a night-cap; they disdain shoes or stockings. Their gait is an ambling, between a walk and a run, and they are equally ready for playing or fighting. I really believe their felicity would be complete with maccaroni and Pulcinella. Punch is a very important personage in N.; he dresses up and retails the drolleries of the day; he is the channel of the passing opinions, and could gain a mob or keep the whole kingdom in good humour. The fishermen who drag their nets at the end of the Villa Reale will suddenly drop their rather profitless business, (the fish is small and scanty,) seat themselves on the beach, and play with dirty cards; their gravity during this sport being more ludicrous than their merriment. I may add some particulars of daily life The cows are driven to the doors in the morning to be milked; nobody would believe he got *milk* otherwise. Herds of goats with bells are also twice every day driven into the city for the like purpose, while the national conveyance (*curriculo*) flies along the Chiaja, with a dozen people hanging on and around, and behind it, all so balanced that one horse can draw it and gallop. No filth remains in the streets, for, unlike the Romans, the Neapolitan gardeners employ *lazzaroni* to go about with asses, loaded with two deep pockets of strong matting at each side, into which they pack daily the offal of the city: they thus scour the streets effectually. There is gas, but it escapes; there are sewers, but they have no fall, nor water. Being open to the bay, when the wind blows from the SE, they are to some extent washed out; otherwise, as there are no tides, the consequences are not agreeable. There are volumes of dust never laid with water, and raised sometimes by sweeping. It results that the higher your apartment is the better, as well to escape these annoyances, and the unceasing noise, as to secure the view. I conceived an unconquerable repugnance to the Neapolitan people which I could not overcome; their savage appearance, wild behaviour, incessant uproar, gross ignorance and superstition, disgust a stranger; while to an invalid the din of N. is intolerable. A man may occasionally smile at the amusing follies of a light-hearted people; but it is not possible to behold the utter degradation of his fellow-creatures, and preserve a permanently cheerful spirit." The *lazzaroni* constitute a distinct class of the populace, peculiar to N. Nearly 50,000 of them crowd the porticoes of the city, or the caves in the neighbouring beach. They perform miscellaneous services of all kinds for hire; beg, and occasionally steal.—If the feudal bondage under which N. has groaned for centuries were abolished,—the enormous wealth and numbers of lazy ecclesiastics reduced,—and the attention of government directed to the introduction of useful manufactures and the encouragement of commerce and agriculture, we would probably hear as little of the *lazzaroni* of N. as of the *lazzaroni* of London. The lower classes among the Neapolitans are dexterous swimmers and divers. They are also adroit in catching shell-fish, of which there is a great variety in the bay, attached to the rocks, and in very deep water. It is astonishing the length of time these *pescatori* will remain under water. The violent pressure on the lungs produces affections of the chest; yet, with the certainty that they are to be prematurely cut off, they persist in this arduous employment which after all earns them but a scanty subsistence. The remarkable transparency of the sea in the bay of N. is such that, in the clear sunlight, and with quiet water, you may see to a depth of 24 ft., and far beyond what can be seen in any stream. As soon, however, as the slightest breeze ruffles the surface of the water, the depths become dark, in proportion of course to the size and strength of the waves, which disturb the fall of light, and refract it considerably. The fishermen of N. always carry with them, therefore, a small flask of oil; and if the water be disturbed, they pour a few drops upon it. The oil expands rapidly on the surface, and in a few seconds forms, as it were, a clear glass, through which you can trace the bottom of the sea, and the fish or molluscs that inhabit it. This pure and transparent water, which in a vessel will appear perfectly colourless, is, like the air, of a deep blue tint,—the deeper the water, the deeper the blue. In the canals of Venice, Trieste, and Leghorn, and in the inner harbour of N., the water is of a dark green colour, owing to the constant disturbance of the black clayey soil. One of the most beautiful appearances of the sea here is the white spectre-like light which the waves give at every motion, called by the Venetians *ardore de mar*. The nearer you approach the land the livelier it becomes; and it is more beautiful in the canals of Venice and the harbour of N. than elsewhere. —The nobility of N. are excessively addicted to show and splendour. About 100 of them are called princes, and a still greater number are denominated dukes. Six or seven of them have estates from £10,000 to £13,000 a-year. A considerable number have possessions to half that amount; many not more than £1,000 or £2,000 annually. The inferior nobility are much poorer; many counts and marquises not having above £300 or £400 a-year of paternal estate, and not a few enjoying a title without any estate whatever to support it.—N. was the birth-place of Marino, Sannazaro, Costanza, Porta, Borrelli, Filangieri, Bernini, and Pergolese.

Climate.] The situation of N. is even surpassed by its climate: its sky is ever pure and serene, its air free and salubrious, and its soil remarkably fertile. It is not then surprising that travellers should describe N. with more than ordinary enthusiasm. During the time of the Romans, the shores of its bay were covered with their villas; and there are few Roman poets who have not celebrated the beauties of *Parthenope*. In modern times, such has been the increase of its inhabitants that many of the villages which formerly surrounded the town are now joined to it, and these suburbs now contain a much larger pop. than the ancient city itself. It is a mistake, however, to suppose that the climate of N. is altogether exempt from violent atmospheric perturbations. "When," says Dr. Burgess, "the NW wind, the *mistral* of Italy, escapes round the promontory that separates N. from Pozzuoli and Baiæ, it sweeps along the entire locality with enormous force, agitates the sea violently, and rushes impetuously along the magni-

ficent street which skirts the quay. It is singular that whilst this boisterous wind is playing in full force in the above-named locality, the atmosphere of the interior of the city is comparatively calm. The mistral of Italy is generally charged with humidity, and is so far different from that of Provence, which is dry. Although the autumn and winter are the seasons during which it most prevails, the other periods of the year are by no means exempt from occasional visits. During a sojourn of three months at N., including the months of November, December, and January, M. Carrière felt the influence of this wind, as nearly as possible, every fourth day. It prevailed most frequently in the morning; and when occurring in the evening it was charged with a glacial humidity that would make strangers wince, although of the strongest constitution. This baneful wind suddenly suppresses the transpiration, causes acute pectoral affections, with disorder of the circulatory and nervous systems. The part of the city where its influence is most severely felt has been aptly described by Dr. Chevalley de Rivas as 'the Siberia of Naples.' Nevertheless the locality of the mistral forms the fashionable part of the city, where tourists and foreigners generally reside. Persons of robust constitution may certainly escape with impunity; but invalids, especially those suffering from pulmonary complaints, who rashly take up their quarters in this part, will soon be compelled to fly from the effects of this lethal blast." It is a striking fact that there is one death from consumption in a mortality of 2½ at N., whilst in the hospitals of Paris there is only one fatal case from that disease in a mortality of 3¼.

NAPLES (Gulf of), a beautiful bay of the Mediterranean, on the SW coast of Italy, between the gulf of Gaeta and the gulf of Salerno, entering between the islands of Ischia and Procida on the NW, and the promontory of Campanella and the island of Capri on the SE. It lies between the parallels of 40° 54′ and 40° 36′ N, and the meridians of 13° 50′ and 14° 30′ E. The Isola-d'Ischia (*a*), the ancient *Pithecusa*, chiefly consists of one large volcanic mountain, Monte Ipomeo, which attains an alt. of 2,574 ft. above sea-level. From near Campagnana, at the SE extremity of this island, "beginning with the rugged rocks of *Capreæ*, rendered famous by the imperial residence of Augustus, and infamous by that of Tiberius, the spectator may cast his view across the narrow channel which separates the island from the promontory of Minerva, and contemplate the beautiful shores of Massa, Sorrento, Vico, and Castelamare. The sites now occupied by the remains of *Stabiæ*, *Pompeii*, and *Herculaneum*, and the fiery mountain to which they owe their ruin, may next engage his attention. He will reflect with surprise on the boldness of the present generation, who have erected their numerous and sumptuous palaces on the very ashes of the cities destroyed; and will dread lest a repetition of the same tremendous phenomena should at some future period involve the modern establishments in a similar fate, and again consign to ages of oblivion the valuable and curious remnants of antiquity which have been recently brought to light. The melancholy feelings which this prospect awakens are soothed by a view of the gay, the luxurious Parthenope, the abode of ease and voluptuousness, and the enchanting coast of Pausilippo, where Lucullus and many other distinguished Romans sought a relief from the cares and bustle of the capital. From thence the eye will rove over the nearer shores of Nisida, Puteoli, and Baiæ, once the seats of pleasure and licentiousness; first the retreat of Marius, Sylla, Cicero, and the Cæsars, and afterwards contaminated by the debaucheries, the cruelties, and the parricide of Nero. From hence the eye may range along the bold promontory of *Misenum*, and its Elysian fields; may mark the situation of the ancient *Cuma;* and finally, after dwelling on the neighbouring island of Procida, may repose on the observatory station, which has furnished one of the most exquisite panoramas that nature can display or taste select; and no less distinguished by historical and poetical interest than by picturesque beauty." [*Colt Hoare.*] On the E side of the island of Ischia stands the fortified town of Ischia (*b*); and directly in front of that town, and midway between it and the broad promontory of Misenum, lies the island of Procida (*c*), the ancient *Prochyta*, the SW extremity of which is only 1½ m. distant from the castle of Ischia; while the little islet of Vivara (*d*), off the same point, approaches within 1 m. of Ischia. From Chiupetto point, the NW extremity of Procida, to the high point of Cape Mesa (*e*), a headland on the SW side of Monte Procida, on the mainland, is a distance of 1¾ m. N ¼ E; and from Cape Mesa to Cape Miseno (*f*), the SE extremity of this peninsular portion of the mainland, is 3½ m. SE. On the N side of the promontory of Miseno, is a small inlet, the Porto-di-Miseno (*g*), which formerly offered a good harbour for small vessels, and which leads into an inner lagune called the Mare Morto (*h*). On a steep point on the E side of Pozzuoli bay,—or the indentation of coast from Cape Miseno to Punto Cavallo (*i*),—stands the castle of Baia (*k*), between which and the town of Pozzuoli (*l*), 1½ m. E by N, the land forms a deep bay, rendered dangerous by the numerous ruins of ancient buildings, as well as rocks, which stretch into it. The Lago-Lucrino (*m*), a few yards inland from the bottom of this bay, has a depth of 30 fath.; and to the N of it lies the Lago-Averno. To the NNW of Pozzuoli lies Monte Barbaro (1); to the NNE, Monte d'Astroni (3); and between these Monte Cigliano (2). The Lago-di-Agnano (4) lies to the SE of Monte-d'Astroni, and the Solfatara about 1 m. to the E of Pozzuoli. From Cape Miseno, the high island of Nisita (*n*), the quarantine-station for Naples, lies 1 league ENE; and 1 m. to the E of Nisita is Punta Gaiola (*o*), a high promontory, with a rocky islet off it. From La Gaiola to Cape Posilipo, is a stretch of high coast of about 1 m.: and 2½ m. ENE from Cape Posilipo is the Castel del' Ovo (*p*), the outermost fortification of the city of Naples. A fine sandy beach, and that splendid quarter of the city known as the Chiaja, lies to the W of the Castel del' Ovo. Lady Morgan, describing the line of coast to the W of Naples now traced, says: "Above this enchanting coast, which places within view so many islands and islets of classic interest and picturesque beauty, rises that hill whose Greek name is said to intimate its original beauty, and which will ever be remembered by those who have visited it as one of the loveliest sites on which nature and art have conferred their combined gifts,—the hill or promontory of Posilipo! Its chain of undulations girdles a great part of the city, and spreads its paradise for 3 m. along the S coast. Pleasure and piety have alike chosen it in all ages for their enjoyment or retreat. Everywhere the spires of churches and convents mingle with villas and belvideres, amidst lovely scenes that still recall and justify the eulogiums of their inspired tenant [Sannazaro], whose tomb adds new interest to the site he celebrated. The country on this side Naples, Pozzuoli, Baiæ, Misenum, &c., &c., will occupy the most cursory antiquarian for many days. For several miles the coast abounds in the remains of temples, villas, amphitheatres, and the sites of ancient song; every rood leaves a point to investigate or a dispute to decide. Among the multifarious objects, however, there are few sufficiently perfect to interest

the general inquirer, by their power of illustrating the internal economy of civil life, like those of Pompeii. But the indescribable richness of the loveliest scenery that can delight the senses, makes ample amends for the fatigue of descending into holes, nicknamed caves of sibyls; of plunging into the damp chill atmosphere of buried amphitheatres, not very unlike wine cellars; or of wandering over broken rubbish among tottering walls, by courtesy dignified with historic titles. The whole of this line of country is also the site of an extinct volcano, whose activity most probably ceased when that of Vesuvius commenced; though the formation of the Monte-Nuovo is of a far more recent date. The lake of Agnano forms one crater, the lake of *Avernus*—a lake in Virgil's time—is another, and the eye of science will trace many more within a few miles. The hill of Posilipo is tufa, and the same substance, seamed with frequent veins of lava, forms the soil of the whole country. The lake Agnano yet retains two traces of its original formation, in the Grotta del Cane, emitting for ages an unceasing stream of carbonic acid; and within 100 yds. the vapour-baths of St. Germano, which are produced by simply scratching the earth, when dense and hot mineral vapours exhale and form an atmosphere esteemed powerful in the cure of rheumatism. The Solfatara, a crater that can scarcely be said to be yet extinct, emits at all times a dense smoke, and sufficient sulphur is sublimed from the abyss below (whose vault resounds like thunder to a blow struck on the earth) to supply a manufactory which, when Sicily was shut out from Naples, provided for the consumption of the continental kingdom. There is also a considerable manufacture of alum; and there too, baths, more active than those of St. Germano, are said to prove highly

serviceable in pulmonary diseases." There is no regular tide in the bay of N.; but a rise and fall of water, occasioned by SW gales, is often experienced at the quays of the city. From the mole of Naples to Castellamare (*q*), where are the royal dock-yards, the distance is 13 m. SE by S, and the coast-line presents a succession of sandy beaches, towns, and villages, including Portici (5), Torre dell' Greco (6), and Torre dell' Annunciato (7). At the distance of 3 m. to the NNE of Torre dell' Greco is Mount Vesuvius (V); and 2½ m. E of Torre dell' Annunciata is the site of the buried city of *Pompeii*. "From N. to Pompeii," says the brilliant writer already quoted, "the route along the bay includes not only one of the loveliest of the many lovely views of this region, but most of the principal objects for which the naturalist and antiquarian visit this extraordinary region,—Herculaneum. Portici, Vesuvius. A long suburban line of buildings, some shattered and miserable (the abodes of the people), others spacious but deserted (the villas of the nobles), leads to the royal palaces of Portici, by the village of Resina,—the first stage in this journey of wonders at which taste or curiosity is induced to stop, for the streets of Resina cover the buried ruins of Herculaneum." Capo d'Orlando (*r*) is 1½ m. W from the mole of Castellamare; and 1½ m. further SSW is the village of Vico (*s*). About 1 m. W by S of Vico is Cape Gradele (*t*), 2¾ m. WSW of which is Cape Sorrento. The intervening coast-line is steep and smooth at the summit, but hollowed out into subterranean cells, the work apparently of the Romans. In the S part of the bay, between the two last-named capes, is the town of Sorrento (*u*), situated on the side of a hill rising from the shore between Monte-Viso and Monte-Massa. From Cape Sorrento the Capo-di-Massa bears 1¼ m. SW by W; and from the latter cape to Capo-di-Como (*v*) is about the same distance SW ½ S. La Punta-della-Campanella (*w*), the extremity of Monte Costanza, and of the peninsular projection of the mainland on the SW of the bay of N., the *Promontorium Minervum* of the an

cients, is 3 m. S by W. The E point of the island of Capri (*C*) lies 3 m. WNW of Cape Campanella.

NAPLES, a township of Cumberland co., in the state of Maine, U. S., 66 m. SW of Augusta, watered by Crooked and Sango rivers, and by portions of Long and Brandy ponds. Pop. in 1840, 758.—Also a township of Ontario co., in the state of New York, 18 m. S of Canandaigua. It has a hilly surface, and is drained by inlets of Canandaigua and Honeoye lakes. The soil consists chiefly of clay loam. Pop. 2,345. The village is on an inlet of Canandaigua lake, and contains about 1,000 inhabitants.—Also a village of Scott co., in the state of Illinois, 56 m. W of Springfield, on Illinois river, 2 m. above the mouth of Mauvaiseterre river. Pop. about 200.

NAPLOUS. See NABLOUS.

NAPO, a river of Ecuador, which has its source in the Andes, in the dep. of Pichincha, 30 m. SE of Quito; runs ESE; traverses the territory inhabited by independent Indian tribes; and throws itself into the Amazon, on the l. bank, in S lat. 3° 25′, and W long. 71° 38′, and after a rapid course of 600 m. Its principal affluents are the Coca and Ahuaricu, which it receives on the l., and the Curaray. In 1774 this river, in consequence of an eruption of the volcano of Cotopaxi, inundated an extensive tract of country.

NAPOLEON, a township of Jackson co., in the state of Michigan, U. S., 66 m. W of Detroit. Pop. in 1840, 1,098.—Also a township of Henry co., in the state of Ohio, 154 m. NW of Columbus. Pop. 615. The village is on the bank of Maumee river. —Also a village of Ripley co., in the state of Indiana, 59 m. SE of Indianapolis. Pop. about 100.—Also a village of Chicot co., in the state of Arkansas, 148 m. SE of Little Rock, on the W bank of the Mississippi, at the entrance of Arkansas.

NAPOLI. See NAPLES.

NAPOLI, a township of Cattaraugus co., in the state of New York, U. S., 308 m. W by S of Albany. It has an elevated surface, drained by Coldspring creek. The soil possesses considerable fertility. Pop. 1,145.

NAPOLI-DI-MALVASIA. See MONEMBASIA.

NAPOLI-DI-ROMANIA. See ANAPLI.

NAPONOCH, a village of Wawarsing township, Ulster co., in the state of New York, U. S., on Rondout creek. Pop. in 1840, 500.

NAPOULE (LA), a village of France, in the dep. of the Var, cant. and 14 m. ENE of Frejus, and 24 m. E of Draguignan, on a gulf of the same name. It has a small harbour defended by a fort. The gulf of La-N. is 6 m. in length, and 3 m. in depth.

NAPTON-ON-THE-HILL, a parish of Warwickshire, 3 m. E of Southam. Area 4,140 acres. Pop. in 1831, 833; in 1841, 951.

NAQADE'H, a town of Upper Egypt, in the prov. of Thebes, 3 m. SW of Kous, on the l. bank of the Nile. It contains 5 churches and a Franciscan convent, and has manufactories of blue calico.

NAQUERA, a town of Spain, in the prov. and 17 m. N of Valencia, and partido of Murviedro. Pop. 473. In the environs are quarries of fine marble.

NARA, a river of Russia in Europe, which has its source in a small lake in the gov. of Moscow, in the district and 21 m. NNE of Vereïa; runs SE; traverses the NE part of the gov. of Kalouga; re-enters that of Moscow; and joins the Oka, on the l. bank, 1½ m. below Serpoukhov, and after a course of 75 m.

NARA, a town of Japan, in the island of Nifon and prov. of Oumi, 24 m. NE of Meaco, and near the W bank of Lake Oitz.

NARAINGUNGE, a trading town of Bengal, in the district of Dacca, in N lat. 23° 37′, E long. 90° 35′, on the W bank of a branch of the Brahmaputra. Pop. 15,000. The inhabitants carry on an extensive traffic in grain, salt, tobacco, and lime; a considerable quantity of fine muslin is also made here. During the rainy season the greater part of the adjoining country is inundated.

NARAINGUR, a town of Bengal, in the district of Midnapore, in N lat. 22° 11′. It was formerly surrounded at some distance by a thick wood, defended by batteries and impervious by cavalry.

NARAJOW, a town of Galicia, in the circle and 10 m. NW of Brzezany, and 36 m. SE of Lemberg, on the r. bank of a river of the same name, an affluent of the Dniester. It has a Catholic and a Greek church.

NARANG, a village of Afghanistan, on the r. bank of the Kuner, 26 m. NW of Bajour.

NARANGABAD, a town of Hindostan, in the prov. of Oude, 72 m. NW of Hyderabad.

NARANJO, a port on the N coast of Cuba, at the mouth of a small river of the same name.

NARANJOS, a group of islands off the coast of New Granada, in the dep. of Ystmo, in the gulf of Panama, in N lat. 9° 27′ 30″, E long. 79° 52′.—Also a group of small islands in the Philippine archipelago, near the S extremity of the island of Luçon, in N lat. 12° 20′, E long. 124° 3′.

NARBERTH, a market-town and parish of Pembrokeshire, 11½ m. NNE of Pembroke. Pop. of p. in 1831, 2,589; in 1841, 2,620. Pop. of town in 1851, 1,392. The town joins with Haverford-West and Fishguard in sending a member to parliament. Electors in 1848, 44.

NARBONNE, a town of France, in the dep. of Aude, 32 m. E of Carcassonne, on the railway from Bordeaux to Cette, and on two canals, of which one communicates with the great canal of Languedoc, and the other with the Mediterranean. Pop. in 1789, 8,528; in 1846, 10,578. N., the *Narbo* of Roman times, was the capital or central station of *Gallia Narbonensis;* but, notwithstanding its early celebrity, few monuments of its antiquity now remain. The cathedral is admired for the elegance of its architecture, and the boldness of its vaulting. The palace of the archbishop is an ancient building, and has, from the number of its towers, the appearance of a fortress. N. has some trade in corn, salt, oil, saltpetre, and verdigris; and an extensive traffic in honey and wax, the produce of the neighbourhood. Its manufactures chiefly consist of stockings and leather. It is the see of an archb.—The cant. comprising 9 coms., had a pop. of 16,727 in 1841.—The arrondissement, comprising 6 cantons, has an area of 149,565 hectares. Pop. in 1841, 39,847.

NARBOROUGH, a parish of Leicestershire, 5½ m. SSW of Leicester. Area 2,380 acres. Pop. in 1831, 1,147; in 1841, 1,329.—Also a parish in Norfolk, on the East Anglian railway, 5½ m. WNW of Swaffham. Area 3,800 acres. Pop. in 1831, 300; in 1841, 360.

NARBOROUGH, an island in the group of the Galapagos islands, to the W of Albemarle island, in S lat. 1° 20′, W long. 91° 40′. Its highest summit has an alt. of 3,720 ft. above sea-level. Its chief headlands are capes Douglas and Hammond. On the N it forms, with Albemarle island, Banks bay.

NARCIA, a river of Spain, in Asturias, in the prov. of Oviedo, which has its source in the SW part of the prov.; runs NE; and throws itself into the Nalon, on the l. bank, 1½ m. above Pravia, and after a total course of about 54 m. This river is supposed to be the *Melso* of the ancients.

NARCISSO, CLERKE or ANGIER ISLAND, an island of the South Pacific, in the Low archipelago, in S lat. 17° 19′, W long. 138° 30′. It is about 12 m. in length from E to W, and 3 m. in breadth. It was discovered by Boenecheo in 1772.

NARCONDAM, an island in the bay of Bengal, in the Andaman archipelago, 90 m. E of Great An-

daman island, in N lat. 13° 24′, E long. 93° 12′. It is covered with wood, and is uninhabited. It attains an alt. of 2,500 ft. above sea-level, and forms an important sea-mark.

NARCY, a town of France, in the dep. of the Nièvre, cant. and 5 m. NE of La-Charité, and 15 m. SSE of Cône, on the Mèves. Pop. 775. In the environs are extensive forges and nail-works.

NARDA, a town of Japan, in the island of Kiusiu, and prov. of Fizen. It has manufactories of porcelain.

NARDINPELT, a town of Hindostan, in the prov. and 30 m. SE of Hyderabad, district and 36 m. N of Dawurconda.

NARDO, a town of Naples, in the prov. of the Terra-d'Otranto, district and 11 m. NNE of Gallipoli. Pop. 8,000. It has a cathedral, several churches, and an hospital; and possesses manufactories of blankets and of cotton fabrics, of the latter of which the material is grown in the environs.

NARE′, or NARES, a river of New Granada, in the dep. of Cundinamarca, and prov. of Antioquio, which descends from the E side of the Andes; runs E; and throws itself into the Magdalena, on the l. bank, at a village of the same name, and after a course of about 60 m. The village is 105 m. ESE of Santa-Fe-de-Antioquia, and 120 m. NNW of Santa-Fe-de-Bogota. Its port is the most frequented in the prov., and carries on an active trade in cocoa-nuts and gold.

NAREA. See ENAREA.

NAREH, a village in Sinde, 53 m. N of Sehwan, about a mile from the l. bank of the Indus. It is built of brick and is of considerable extent.

NARELLAN, a parish and village of New South Wales, in the co. of Cumberland. Pop. 773. The village is 53 m. from Sydney.

NARENTA, NARONA, or OPUS, a river which has its source in Herzegovina, near Vorba. It runs first NW; then S to Mostar, where it passes under Trajan's arch; thence turns SW; passes Pocsitejl and Gabela; enters Dalmatia; and divides at Opus into 3 branches, which discharge themselves into the channel of the same name between low flat banks overgrown with reeds. Fort Opus is at the apex of the delta, which is laid out in vineyards and meadows, but much of which is often under water. It has a total course of 180 m.; and receives on the l. the Drinovnik and Croupa, and on the r. the Dretsnitza, Jossinitza, and Trebisat.

NARENTA (CHANNEL OF), a branch of the Adriatic, on the coast of Dalmatia, extending between the peninsula of Sabioncello on the E, and the island of Lesina and the continent on the W. It is 42 m. in length from NW to SE, and 12 m. in breadth.

NAREW, a river which has its source in Russia in Europe, in the gov. of Grodno, in the S part of the district of Volkovisk, and a little to the SE of Novosiolki; traverses the prov. of Bialystok, in which it bathes a town of the same name; runs along the Polish frontier, and passes Surasz and Tykoczyn; enters Poland; traverses the woiwodies of Augustowo and Plock, passing in its course Lomza, Ostrolenka, and Pultusk, and throws itself into the Bug at Sierock. It has a total course, and in a generally W direction, of 210 m. Its principal affluents are the Narewka, which it receives on the l.; and the Bobra, Pysz, Omulew, and Orsic. The town of N. is 20 m. SSE of Bialystok, district and 17 m. ENE of Bielsk, on the l. bank of the river of the same name. Pop. 425.

NAREWKA, a town of Russia in Europe, in the prov. and 42 m. S of Grodno, district and 36 m. NW of Proujani, on the r. bank of a small river of the same name, an affluent of the Narew.

NARGAN, NARGEN, or NARGOE, an island of Russia in Europe, in the gov. of Esthonia, district and 12 m. NW of Revel, in the gulf of Finland. It is about 4 m. in length, and 2 m. broad; affords easy landing, and has a lighthouse at its N extremity, in N lat. 59° 36′ 22″, E long. 24° 31′ 4″. It is well-wooded, and is partially cultivated. Fishing forms the chief occupation of its inhabitants.—Also a small island of the Caspian sea, near the coast of Shirvan, in Russia in Asia, and 9 m. SE of Baku.

NARGHUR, a town of Hindostan, in the prov. of Malwah, 16 m. NE of Mundessor. In 1820 it contained about 500 houses.

NARI, a river of Beluchistan, which has its source on the E side of the Hala mountains; runs in a generally S direction for about 50 m., when it is joined by the Bolan or Kauhi; thence continues its course to the S; and is lost in the desert of Cutch-Gundava. In great inundations its waters are said sometimes to extend to the Indus.

NARIGIAN, a strong position in the Tumar mountains, at the summit of the Aeng pass, on the frontiers of Arracan and Burmah. It is within the British frontier; but when we pass it, we step into the Burmese country. The position is one of remarkable strength. A hundred men posted here might bid defiance to an army; and as there is a fine piece of table-land, it might be fortified with ease, and provisioned without difficulty. From N. you "look down upon a rich and fertile country,—the Irawaddi close at hand, and abundance of pop. and cultivation as far as the eye can reach,—yellow paddy fields and curling smoke, a sight most pleasing as compared with the desolate regions on our side." The descent immediately on the other side of N. may be troublesome, but only for a short distance. Vegetation here is luxuriant; and as the road soon runs into the course of the Maine river, which is fed by numerous mountain-torrents, water is of course abundant. A deep defile leads out into the open country, not far from the Burmese frontier-town of Maphek-Mio, which all describe as an admirable military position; and from this point the road to Sembeghwin lies through a cultivated tract of country, "embellished with groves of palmyra and other trees, and full of populous villages." Captain Trant, with a regiment, accomplished the distance from N. to Sembeghwin,—that is, from the Burmese frontier to the banks of the Irawaddi,—in eight marches. A larger force with artillery would occupy a few days more; but there is little room to doubt that a British force, sent through the Aeng pass, might reach the banks of the Irawaddi 15 days after breaking ground from Aeng.

NARIMM, a town of Japan, in the island of Nifon, and prov. of Owari. Pop. 2,000.

NARIN, a mountain of Mongolia, in the Khalkas territory, a little to the W of Urga.

NARIN-KUNDU, a mountain of Mongolia, in the Khalkas country, near the r. bank of the Orkhon. It is covered with lofty pines.

NARKUS (JEBEL), a remarkable bell-shaped hill in the El Haman chain in the peninsula of Sinai, a ridge of low calcareous hills at a distance of 3½ m. from the beach. It is about a ½ m. NW of Jebel-Mokatteb, and is composed of a light-coloured friable sandstone, having an alt. of about 400 ft. This hill has been long celebrated for the extraordinary musical tones elicited from it, which have generally been compared to the deep booming of a church-bell: hence its name, which signifies 'the mountain of the Bell.' Of the cause of the phenomenon many opinions have been broached. The Arabs in the neighbourhood, with their ordinary propensity to the marvellous, attribute it to the real bells of a subterranean convent swallowed up by some convulsion of nature; and the Christian monks of Mount Sinai countenance this belief, by the idle story that the sound was first heard after the destruction of one of their convents in its vicinity. Some have supposed the sounds to be caused by the dropping of sand into the cavities of the rocks; others, by its motion over hollow rocks; others have attributed them to subterranean volcanoes; and a few have supposed that the action of the wind upon the elastic plates of mica, which is a component part of granite, may have

been the origin of the sound. Lieut. Newbold and Capt. Wellsted concur in opinion that the sound is produced by the rolling down of sand put in motion by the wind, or by persons walking on its surface. On the W side of this hill, which faces the Red sea, is a slope of about 80 ft., covered with a very fine quartzose sand, varying in depth from 5 or 6 inches to as many feet, according to the form of the sandstone rock which it covers: this is the spot from whence the mysterious sounds issue. Not the slightest noise was heard to issue from the hill at the approach of Lieut. Newbold's party; but when their Arab guide, desiring them to wait still at the bottom of the slope, began to ascend the slope, sinking to his knees at every step, they soon heard a faint sound resembling the lower string of a violoncello slightly touched. Disappointed at the result, they determined to ascend themselves, in spite of the intense heat of the sun and extreme fineness of the sand; and on reaching the summit, they sat down to observe the effect. The particles of sand set in motion agitated not only those below them, but, though in a less degree, those all around them, like the surface of water disturbed by a stone. In about 2 minutes they heard a rustling sound; and then the musical tone above alluded to, which gradually increased to that of a deep mellow church-bell, so loud that it rivalled the rumbling of distant thunder. This occurred when the whole surface was in motion; and the effect upon themselves the travellers compared to what they supposed might be felt by persons seated upon some enormous stringed instrument, while a bow was slowly drawn over the chords. They descended while the sound was at its height; and soon after it began to lessen with the motion of the sand, until, at the end of a quarter of an hour, all was perfectly still again. While the observations were making, a steady breeze from the W was blowing against the surface of the sand; and this Lieut. Newbold considers essential to the production of the sound; it having been found that the sounds are much fainter in still weather, or even quite inaudible. When the weather is wet no sounds are produced, because the sand is then agglomerated, and will not slide at all. Wellsted has given a view of this hill in his *Travels in Arabia*.

NARLAH, a town of Hindostan, in the prov. of Orissa, 57 m. E of Bustar.

NARMATZO, a village of Russia in Europe, in the gov. and 38 m. from Kasan. Pop. 4,500. It contains a palace belonging to Prince Kulautshakov.

NARNI, a town of the Papal states, in the deleg. and 21 m. SSW of Spoleto, and 48 m. N of Rome, on a hill on the l. bank of the Nera. Pop. 3,260. It has a cathedral, numerous churches and convents, a fine aqueduct, and the remains of a magnificent bridge built by Augustus, a house-of-detention, and a number of handsome houses. It possesses a few woollen manufactories.

NARNUL, a district and town of Hindostan, in the presidency of Bengal, and prov. of Agra. The town is 90 m. WSW of Delhi, at the foot of a hill. It is about 1 m. in length, and is intersected by a nullah or water-course. It was formerly a place of considerable importance.

NARO, a considerable town of Sicily, in the Val-di-Mazzara, situated near the l. bank of a river of the same name, the ancient *Hypsa*, about 15 m. from the coast, and 11 m. ESE of Girgenti, in a strong military position, and surrounded by fertile valleys. It has a pop. of 10,000, who are employed partly as mechanics and manufacturers, partly in cultivating the surrounding country. It has some trade in wine, oil, and sulphur. It is thought by some to be the *Motyum* of Diodorus.—The N. river rises 16 m. SW of Caltanisetta, and flows into the sea, after a SW course of above 20 m.

NARODICZE, a village of Russia, in the gov. of Volhynia, 18 m. SE of Ovrutsh. Pop. 600.

NAROL, a town of Austrian Poland, in the circle of Zolkiew, 36 m. NE of Jaroslav.

NARONA. See NARENTA.

NAROTSH, a lake of Russia, in the gov. of Vilna, 30 m. SE of Swinziani. It is about 10 m. in length, and discharges itself into the Vilia.—Also a town in the gov. of Minsk, 12 m. WNW of Vileika.

NAROV, a town of Russia, in the gov. of Minsk, 21 m. SSE of Mozir. Pop. 1,800.

NAROVA, or NARVA, a river of Russia, which issues from Lake Peipus; passes Sirensk; and falls into the gulf of Finland, near Narovskaia, after a NNE course of 40 m. Near its mouth it has a fall 18 ft. in height. Its principal affluent is the Pliusa, on the r.

NAROVTSHAT, a town of Russia, in the gov. and 74 m. NW of Pensa, near the rivers Scheldai and Laguschevka. Pop. 2,700. It has some trade in the productions of the country, and three large annual fairs.

NARR (DER HOHE), a mountain of Austria, on the S frontier of the circle of Salzburg, one of the Noric Alps. It has an alt. of 11,324 ft. above sea-level.

NARRA, a branch of the Indus, which diverges from it, on the E side, a few miles above Rori in Sind, and flowing S, joins the Fulaili branch.—Another arm, known as the Western N., separates from the Indus, 25 m. below Sukkur, and flows in a very winding course to Lake Manchar, in N lat. 26° 30′, which discharges again its waters, by the Arul, into the Indus.

NARRAGANSET BAY, a bay of the Atlantic ocean, which intersects the state of Rhode island, U. S. It is about 28 m. long, and 10 m. broad; and contains Rhode island, Canonicut, Prudence, with various other smaller islands. The Providence and Pawtucket rivers flow into it on the NW, Taunton river on the NE, and Pawtuxet on the W.

NARRAGHMORE, a parish of co. Kildare, 2 m. NNW of Ballytore. Area 11,270 acres. Pop. 5,895.

NARRAGUAGUS BAY, a bay on the coast of Maine, U. S., joining Machias bay. It receives on the NW a river of the same name, and contains several islands.

NARRAH, a town of Hindostan, in the prov. of Gundwana, 70 m. W by S of Sumbulpur.

NARRAINGUNGE. See NARAINGUNGE.

NARRAN, a river of Tropical Australia, which, flowing in a SSW course, appears to lose itself in a large swamp, in S lat. 29° 45′, E long. 147° 40′.

NARROWS (THE), a channel between Long island on the E, and Staten island on the W, connecting New York bay with the Atlantic, 9 m. S of New York, U. S. The channel is 1,905 yds. wide, and is well-defended by forts and batteries.—Also the channel between the islands of St. Christopher and Nevis, in the Little Antilles.

NARSINGAH, a town of Hindostan, in the prov. of Orissa, 60 m. W by N of Cuttack, in N lat. 20° 41′.

NARSINGPUR, a town of Hindostan, in Mysore, on the r. bank of the Cavery, 21 m. SE of Seringapatam.

NARSINGUR, a town of Bengal, in the district and 57 m. W of Midnapore, near the l. bank of the Soburyka. It formerly possessed a good fortress, which commanded the high road from Pachete to Jellasore; but, with the other innumerable forts in this district, has been allowed to fall into decay. The town, however, continues to flourish, being favourably situated for the inland trade.

NARSIPUR, or NARSAPUR, a town of Hindostan, in the Northern Circars, and district of Ellore, situated on the S branch of the Godavery, about 10 m. from the sea, in N lat. 16° 21′.

NARUNGPUR, a town of Hindostan, in the prov. of Allahabad, and district of Ghazipur, on the W bank of the Ganges, nearly opposite Buxar.

NARVA, a town of Russia, in the gov. and 82 m. WSW of St. Petersburg. It is built, at a distance of nearly 8 m. from the sea, on steep limestone hills on both sides of the river Narva or Narova, which is here both broad and deep, and 2 m. higher up has a fall of 18 ft. over a ledge of rock. Its houses are of brick, stuccoed white; so that it has more the appearance of a German than of a Russian town; in fact a number of its inhabitants are of German descent. In the suburb called Ivangorod, the

remains of an extensive fortress overhang the Narva in a very picturesque manner. N. was one of the Hanse towns, and still has a brisk traffic in corn, timber, and flax. Small vessels can ascend within a few miles of the town; for the remainder of the distance flat-bottomed lighters must be employed. Salt is the chief article of the import trade. Near this town, in Nov. 1700, Charles XII. of Sweden, at the head of 9,000 men, obtained a complete victory over 39,000 Russians, commanded by Peter the Great. N. was retaken by the Czar five years after. In 1773 it was destroyed by fire.

NARWAR, or NURWAR, a district of Hindostan, in the prov. of Agra, situated principally between the 25th and 26th parallels of N lat. The face of the country is hilly and woody, but the soil in many parts is rich and productive. The Sind is the principal river; the chief towns are Narwar, Collarass, and Shepur.—The capital, of the same name, is situated on the E side of the Sind river, 40 m. S by W of Gwalior. It was formerly a place of note, and governed by a Hindu prince.

NARYM, a town of Asiatic Russia, in the gov. of Tomsk, cap. of a district traversed by the small river Narymka, an affluent of the Ovi. It is situated on the Obi, near its confluence with the Keta. It was originally only a simple *ostrog* or palisadoed fort: but this fort has been removed to a different spot, on account of the marshes by which it was surrounded. The Chinese outposts approach the vicinity of this place.

NASACARA, a town of Ximo, in Japan, 15 m. E of Kokura.

NASAS (RIO), a river of Mexico, in the state of Chihuahua, which empties itself into the S end of Lake Cayman, in about N lat. 26° 30′, after a NE course of 180 m. It is nearly dry in the summer season.

NASBINALS, a town of France, in the dep. of Lozère, 28 m. W by N of Mende. Pop. 1,300.

NASCA, a town of Peru, in the prov. and 190 m. SE of Lima, on the r. bank of a small river of the same name. It has a fine harbour, but the town itself is in a state of decay. The surrounding country is fertile in vines and sugar-canes, and is watered by a river of the same name.—The whole of the coast of Peru is a continued sandy desert, with here and there an oasis or fertile valley. No rain ever visits these spots; cultivation is, therefore, only effected by artificial means of irrigation. The ancient inhabitants had recourse for this purpose to numerous subterranean water-courses or conduits, which still remain in many places. In the valley of N. they are about 2 ft. in height, and 1 ft. in breadth, lined with uncemented masonry, and covered with slabs. Most of them are now choked up with sand, but some of them remain unobstructed, and supply sufficient water to impart great fertility to the valley, where the vine, which is extensively cultivated, often equals in girth an elm of 10 years' growth. How far the underground aqueducts extend, or whence flow the head-waters, is not known; but the works of the Peruvian in this branch of rural economy are wonderful. Every new acquisition of territory was followed by the construction of *azequias*, as these channels were called.

NASCARA, a river of Naples, in Calabria Ultra, which falls into the gulf of Squillace.

NASCHITZA, or NASSITZA, a small town of the Austrian states, in the co. of Verovitz, 26 m. W by S of Eszek.

NASEBY, a parish and village of Northamptonshire, 12 m. NNW of Northampton. Area of p. 3,690 acres. Pop. 898. It was in the vicinity of this v. that the battle was fought, in 1645, between Charles I. and Oliver Cromwell, which terminated in the total discomfiture of the royalist army.

NASH, a parish of Pembrokeshire, 2 m. NNE of Pembroke. Pop. 140.—Also a parish of Monmouthshire, 4 m. SE of Newport. Area 2,710 acres. Pop. 291.

NASH, a central county of N. Carolina, U. S. Area 640 sq. m. Pop. in 1850, 10,657.

NASHAUN, one of the Elizabeth islands, on the SE side of Buzzard's bay, and NW of Martha's Vineyard, off the coast of Massachusetts, U. S.

NASHPORT, a village of Muskingum co., in Ohio, U. S., 54 m. from Columbus. Pop. 200.

NASHUA, a town of Hillsboro' co., New Hampshire, U. S., 12 m. NW of Lowell, on the W side of the Merrimac. Pop. 7,000, chiefly employed in cotton manufactures.—Also a river in Massachusetts, which runs NE into the Merrimac, at Nashua, after a course of 40 m.

NASHVILLE, a town of Davidson co., Tennessee, U. S., in N lat. 36° 9′ 33″, W long. 86° 49′ 3″, 909 m. SW of New York, on the S side of the Cumberland river, which is navigable for vessels of 30 or 40 tons, 9 months of the year, and at certain times for ships of 400 tons. Pop. in 1830, 5,566; in 1840, 6,929; in 1850, 17,502. It is regularly laid out, and is a thriving and wealthy town, the largest in the state, and situated in a fertile and populous country; great changes have recently taken place in the elements of its growth, and manufactures of all kinds, which until lately were unknown in it, are now in a rapidly progressive condition. There is steam-boat navigation between N. and New Orleans, from which place it is distant by land, through Natchez, 586 m.; through Madisonville, 480 m. N. university, founded in 1806, has a president and 5 professors, with a library of 12,000 vols.—Also a village in Holmes co., in Ohio, 82 m. NE of Columbus.—Also the cap. of Brown co., in Iowa.—Also the cap. of Washington co., in Illinois.

NASHWAC, a river of New Brunswick, which runs S into the St. John, a little above Fredericton.

NASIELSK, a town of Poland, 27 m. N by E of Warsaw. Pop. 1,200. The Russian army, under Kamenskoy, were driven from their intrenchments here by Bonaparte, on 25th December, 1806.

NASING, a parish of Essex, 4½ m. NNW of Epping. Area 3,724 acres. Pop. 824.

NASO, a town of the island of Sicily, in the Valdi-Demona, on a hill on the coast, with finely wooded environs. It has some handsome buildings, with a pop. of 8,000. It is supposed to occupy the site of the ancient *Agathyrnum*. Near it are some mineral springs of ferruginous quality.

NASONGO, or MORANGANE, a village of Quilimane, on the Quilimane river. It is inhabited solely by the slaves of the governor of Quilimane, who cultivate a tract of land in the vicinity for their master.

NASPA, a river of Mexico, which flows into the sea 27 m. SE of Acapulco, after a SSW course of 200 m.

NASQUIROU, a river on the coast of Labrador, to the W of Esquimaux river.

NASSABERG, a town of Bohemia, in the circle and 8 m. S of Chrudim. Pop. 560.

NASSAGAIVEYA, a township of Upper Canada, in Gore district. Pop. in 1841, 3,059.

NASSAU, the name of several principalities in the German empire, all of which are now united under one head, and form an independent duchy in the Germanic confederation, lying between the parallels of 49° 56′, and 50° 52′, and bounded on the W, N, and E by the Prussian territory, and on the E and S by the different states of the princes of Hesse. It has an area of 1,751 sq. m. Pop. in 1818,

303,000; in 1846, 424,817. It is divided into the three districts or governments of Wiesbaden, Weilburg, and Dillenburg; and these are subdivided into bailiwics. The surface is hilly throughout, and in some places the elevations are considerable; along the rivers there are low level tracts of limited width. The chief mountain-ranges are the Westerwald in the N, and the Taunus or Höhe in the S. The rivers are the Rhine to the W, the Maine to the S, and the Lahn in the interior. The Elz, the Aue, the Weil, the Embs, the Aar, the Dreisch, and the Muhl, are affluents of the Lahn. The Wisperbach flows into the Rhine; and the Nidda is a tributary of the Maine. This duchy contains some of the principal watering-places in Germany, viz., Ems, Schlangenbad, Wiesbaden, Nieder-Selters, Upper Lahnstein, and other places.—The climate is temperate on the banks of the Rhine and Maine; but in the N, where the Westerwald elevates the surface, the air is often cold and piercing. The culture of the vine, and the rearing of cattle, form the chief employments. The principal corn districts lie along the rivers Lahn and Aar; but the best wines, such as Johannisberg, Rudesheim, Markbrunn, Asmanshauser, and Geisenheim, are raised on the banks on the Rhine. There are mines of salt, marble, coal, lead, iron, and silver. The chief manufactures are paper, leather, brandy, beer, pottery, tobacco, vinegar, and potash. A considerable quantity of coarse linen is woven throughout the duchy.—The inhabitants of this duchy are almost equally divided between the Protestant and Catholic faith. In 1814, there were 120 Lutheran, 97 Calvinist, and 152 Catholic churches. The two Protestant parties, in August 1817, agreed to lay aside their distinctive appellations, and to unite in one body under the title of Evangelical Christians. There is a gymnasium at Weilburg, and colleges or lyceums at Dillenburg, Hadamar, Idstein, and Wiesbaden.—The duke of N. holds the 13th place in the smaller assembly of the German diet. In the *plenum* or full assembly he has 2 votes. His duchy is one of the few German states which have received a representative assembly. Justice is administered by the high court of appeal at Dietz, by another court at Wiesbaden, and by inferior offices in the country.—The military force is between 2,000 and 3,000 men; the revenue nearly £180.000.—In 1802, the representative of the house of Orange received in this quarter an additional domain as an indemnity for the stadtholdership. In 1806, an accession of territory was given to both branches, on the formation of the confederation of the Rhine. In 1815, certain exchanges of territory were made with Prussia. The N. family, after long being counts, were made princes of the empire in 1688 and 1737. In 1806 they were declared dukes, which in Germany is a distinct and in general a higher title.

NASSAU, the capital of the above duchy, lies on the r. bank of the Lahn, 25 m. NW of Wiesbaden, and 10 m. WSW of Limburg. Near it are the ruins of the ancient castle of Naussauberg, which gave name to the family of N.

NASSAU, or POGGY ISLANDS, a chain of islands which skirt the whole length of the W coast of Sumatra, at the distance of 20 or 30 leagues. The N extremity of the most northern island is situated in S lat. 2° 18′; the S extremity of the most southern island in S lat. 3° 16′. They consist of high hills of sudden and steep ascent, and covered with trees to their summits. The sago tree constitutes the chief article of food to the inhabitants. The natives are few in number, and are divided into small tribes, each tribe occupying a small river, and living in one village. The pop. probably does not exceed 1,000.

NASSAU, a fort maintained by the Dutch at Mori, on the Gold coast of Africa.

NASSAU, a county in the NE of Florida, U. S. Area 576 sq. m. Pop. in 1840, 1,892; in 1850, 2,195. It comprises Amelia island, and is watered by the Nassau on its S border, and by St. Mary's river on the N.

NASSAU, the capital of the island of New Providence, one of the Bahamas, situated on the N part of the island, in N lat. 25° 5′, W long. 77° 21′. Pop. 7,000. It is well-built, and is defended by two forts.—Also an island off the coast of Patagonia, in S lat. 55° 50′, W long. 71° 04′. It was taken by the Spaniards in 1782, but was restored to the English in the following year. Its harbour has been considerably improved of late years.

NASSAU, an island in the Pacific, in S lat. 11° 30′, W long. 165° 30′, discovered by an American whaler in 1835. It is low in surface, and apparently uninhabited; but affords wood and water.—Also a river of N. Australia, which enters the gulf of Carpentaria, on the E side, in S lat. 15° 50′.

NASSAU, a township of Rensselaer co., New York, U. S., 12 m. SE of Albany. Pop. 3,236.

NASSAU BAY, a bay on the S coast of Terra-del-Fuego, discovered by the Dutch in 1624. Its W point is situated in S lat. 55° 39′.

NASSAU (CAPE), a cape on the coast of Guayana, in N lat. 7° 40′.

NASSAU (FORT), a fortress of Brabant, on the Scheldt, between Tolen and Bergen-op-Zoom.—Also a village of British Guayana, on the r. bank of the Berbice river, 45 m. from the sea.

NASSENFELS, a town of Bavarian Franconia, on the Schutter, 4 m. N of Neuburg.

NASSENFUSS, a town of Austrian Illyria, in Lower Carniola, 5 m. N of Rudolfswerth.

NASSICZE, a market-town of the Austrian states, in Slavonia, 47 m. ENE of Gradiska.

NASSINGTON, a parish of Northamptonshire, 2½ m. SSW of Wandsford. Area 1,660 acres. Pop. in 1831, 601; in 1841, 721.

NASSOGNE, a town of Belgium. in the prov. of Liege, near the source of the river Fosse, 21 m. SE of Dinant. Pop. 900.

NASSUK, a town of Hindostan, in the prov. of Aurungabad, in N lat. 19° 56′, E long. 73° 56′. on the Godavery. It is the chief seat and centre of Brahminical learning in the W of India; and is densely populated, nearly 40,000 inhabitants being here crowded into a space not exceeding 4 m. in circuit. The temples are almost innumerable, and many of them remarkably picturesque. Opposite the city the bed of the river has been built up to a succession of levels, so as to form a series of cascades.

NASTEDE, or NASTADTEN, a small town of the duchy of Nassau, 15 m. SE of Coblenz. Pop. 1,550.

NATA, or SANTIAGO-DE-LOS-CABALLEROS, a town of New Granada, 73 m. SW of Panama.

NATA (POINT), the W point of the gulf of Panama, whence the coast extends W to Haguera Point, 7 leagues.

NATAANA, a town of Hindostan, in the district of Serinagur, in N lat. 20° 7′.

NATACHQUOIN, a river of Labrador, which runs into the sea in N lat. 50° 25′. The Little Natachquoin has its mouth to the WSW.

NATAKU, a town of the Bambuk territory in Africa, on the l. bank of the Rio-d'Oro, 3 leagues below Tabaura, in a rich plain nearly 7 leagues in length, irrigated by a number of streams which bring down emery impregnated with gold-dust from the mountains of Tabaura to the SE of Bambuk.

NATAL, or PORT NATAL, an English colony, now in progress of settlement, extending along the E

coast of Southern Africa rather more than 100 m., and inland about 150 or 200 m., between the parallels of 27° 40′ and 30° 10′ S lat. It is bounded on the SE by the ocean; on the SW by the Umkomanzi or Umcomas river, from the sea to its source on the E flanks of the Quathlamba or Kahlamba mountains dividing it from the Amaponda territory; on the W and NW by the Quathlamba range separating it from the Basutu territory, and skirting the meridian of 29° E; and on the NE by the Umzinyati, or Buffalo river, from its source in the Quathlamba range to its junction with the Tugela, in S lat. 28° 42′, and thence by the Tugela or Umgala to its efflux into the sea, in S lat. 29° 13′, dividing it from the Zoolu territory. The boundaries thus traced enclose an estimated area of 18,000 sq. m.

Physical features.] The principal natural division of this territory is formed by a range of heights which runs nearly parallel with the coast from about the spot where the Umkomanzi has its sources, to near the junction of the Buffalo and Tugela rivers. To the E of this range the country is undulating, but in no place rising higher than 700 ft., and furrowed by a number of rivers that find their way to the ocean in courses parallel to the Lower Tugela: of these the most important are the Umkomanzi, forming the S frontier of the colony, the Umlazi, the Umgeni, the Umhlali, and the Umvoti. Port Natal is situated in S lat. 29° 45′, nearly midway between the mouths of the Umkomanzi and the Tugela. It is a circular basin of about 10 m. in circumf., with a comparatively narrow mouth, across which is a bar about 120 ft. broad, having little more than 11 ft. water over it in the dry season. Inside there is a channel with considerable depth, but great part of the space is occupied by islands covered with mangrove trees, and accessible from the shore at low water. Two inconsiderable streams, the Umbilo, and the Umhlatuzi, empty themselves into the basin. The depth of water, at the ordinary anchorage, is reported to be 20 ft. The Umgeni and the Umlazi rivers have their embouchures, the former 3 m. to the N of Port Natal, the latter 10 m. to the S; and as the land intervening between the mouths of these two latter rivers is almost a dead level, they could with comparatively little labour be turned into the bay, and their combined stream would, it is supposed, produce a weight and volume of water sufficient to clear away all obstruction, and open a deep and permanent channel for vessels of large tonnage. Ships of from 200 to 300 tons have, in the present state of the port, made their exit and entrance with safety; but it is not considered prudent for any vessel drawing more than 12 ft. to attempt the channel. There is, however, good anchorage outside, with a sandy bottom, which affords good holding-ground. The prevailing winds are the NE and SW; and as it very rarely blows from any other quarter, ships may clear the land at any time, without making a tack. With good surf-boats cargo can be landed outside the bay, on the sea-beach, with as little difficulty as in Algoa bay. The bay presents many of the more pleasing characteristics of lake-scenery, and is well-stocked with fish, oysters, and crabs.—The portion of N. which lies to the NW of the dividing range above noticed may be described as a great inland basin drained by the Upper Tugela, through which flow the Buffalo from the NW; the Upper Tugela, with its affluents, the Bushman's, Klip, and Sunday rivers, from the W, and the Mooie or Impafana from the SW; all converging till they meet at a point a little to the W of the termination of the dividing range. The coast-division, extending in a direction from SW to NE for rather more than 100 m. along the coast, with a breadth inland of from about 60 to 100 m., reaches from a few miles S of the 30th parallel to a few miles N of the 29th. It is throughout well-watered. The soil is sandy towards the shore, passing into loam and clay as you approach the dividing range. In some parts there is great scarcity of timber; whilst in others magnificent clumps of wood are found every few miles. The timber used is principally 'yellow wood,' which is like fir-deal but more splintery in the grain; 'stinkwood,' a dark-grained wood resembling mahogany; 'thornwood,' a tough wood of an ashen quality; and wild lemon, a still tougher wood. Quince is used for the fences. In the vicinity of the coast, little wood is found except mangrove; towards the hills, there is abundance of good timber. On the coast barley, oats, pulse, and most descriptions of vegetables thrive. Arrowroot, ginger, turmeric, pease, beans, potatoes, cabbages, radishes, and cucumbers are grown; and nearly all through the district two crops in the year can be relied on by judicious farming. The cotton and castor-oil plants grow wild in the woods. There are a variety of indigenous plants yielding indigo; cotton appears to be admirably adapted to the soil and climate; even the sugar-cane grows luxuriantly; and tropical fruits, and most European fruits—with the exception of apples—flourish."—The attention of settlers here was first directed to the cultivation of cotton by observing the spontaneous growth of the native plant scattered over the face of the country, as well as a general tendency in many indigenous plants to produce a material of a cottony texture. The first seeds were imported from America, and sown in the garden of a mission-station: for several years these plants manifested the capabilities of the soil and climate for the production of cotton to exist in a remarkable degree. The plant was found to be perennial, to acquire a gradual increase of growth until it attained a height of from 6 to 10 ft., and to spread over a large surface of ground; it produced throughout the the year, winter and summer, very abundantly, the quality of the cotton seeming rather to improve than to deteriorate, and the quantity rather to increase than lessen, with each additional year. Seeds have since been procured from the East Indies, Egypt, Brazil, China, and America. The first crops from the several kinds, sown on lands in a comparatively foul and unprepared state, have produced a quality of cotton not inferior, it is said, to that gathered in the several countries whence they have been brought. The American variety is, however, most commonly cultivated; and it has been ascertained that the plant furnishes cotton at N. equal if not superior to the American in all the characteristics that constitute commercial value. It may be sown in N. from Aug. to October. The strength of the cotton-harvest is from January to the end of March. The plant prefers the vicinity of the sea, particularly in dry countries, and the interior districts of naturally damp climates: so that it may be supposed it is not merely temperature by which the quality is affected, but a peculiar combination of heat, light, and moisture. Although Georgia has hitherto been supposed to combine these advantages in the greatest proportion, N. will probably vie with that district. It has an extensive coast; the heat is equal to Georgia; frosts are unknown, except in the mountains; the atmosphere is brilliant; and the soil is peculiarly suited, being a light sand, which cotton prefers, and kept in a perpetual state of moisture by a subsoil of clay. The plant, which is an annual elsewhere, becomes perennial in N., whereby much labour is saved and a greater yield obtained. In London, N. uplands cot ton has been sold at from 5½d. to 7d. per lb., and cotton grown from the sea-island seed 1s. to 1s. 3½d.

per lb." Coffee has also been found to thrive near the coast. Horses, cattle, and sheep, have not prospered hitherto on the coast, with the exception of a small breed of cattle reared by the Zulus. On the base and declivity of the dividing range the country has been found well-adapted for the purposes of the grazier. Indications of coal have been discovered on the coast about 40 m. to the N of D'Urban. Copper, tin, and lead are known to exist, and there are indications of silver.—The inland basin, E of the dividing range, is enclosed on two sides by the Quathlamba mountains or Drakenberg. From the sources of the Impafana to those of the Tugela, the direction of this chain is from SSE to NNW. The mountains in this division are so high that snow lies on them a part of the year, and are conjectured to be of granitic formation. From the sources of the Tugela to those of the Buffalo the direction of the mountains is from SSW to NNE. They have here an average alt. of 5,000 ft. above the sea, and about 1,500 ft. above the country at their base. Their outline is rounded; they decline in alt. towards the NE. They are passable at almost any part by horses and cattle. The principal passes in use are Bezuidenhout's, in about 28° 33′ S lat., and 28° 44′ E long.; and De Beer's, in about 28° 20′ S lat., and 28° 52′ E long. Good timber abounds in the river-valleys of this basin, and on the base of the mountains. The country affords throughout abundance of good pasturage for sheep and cattle. The soil is generally well-adapted for agricultural purposes, and water abounds. The rocks are of granite, basalt, and other members of the trap family; slate, sandstone, and shale-coal are found in various places at the surface, but generally in beds of inconsiderable thickness. The cereals, pulses, and many kinds of fruit flourish in this division. The animal kingdom presents the buffalo, hippopotamus, leopard, hyena, eland, alligator, snakes, boa-constrictor, elephant, and several varieties of antelope.

Climate.] The heat of N. is less than might have been anticipated from its lat., owing in part to the greater coolness of the southern hemisphere, in part to the presence of high mountains. The hottest months are December and January: in them the therm. has been observed, in the coast division, to reach 85°, rarely 90°. In part of April, in May, and part of June, the highest range of the therm. at noon was 73°; the lowest, at 8 A. M., 49½°. The winter months are generally dry, but few of the rivers ever fail. In summer much rain falls, and there are frequent and violent thunder-storms; but the dust-storms, the plague of the Cape colony, do not extend to N., and the Quathlamba summits interpose a cooling medium between winds blowing from the interior.

Divisions.] For police purposes the settlement has been divided into six districts; three of which are in the coast-division, and three in the inland basin. The coast-districts are: Umvoti to the N, extending from the Tugela to a few m. S of the Umvoti, and comprising the whole breadth of the coast division; D'Urban, on the coast, extending from the S frontier of Umvoti to the river Umlazi; and Pietermaritzburg towards the dividing range, to the S of Umvoti and W of D'Urban. The Umlazi location, as it is called, is a small section on the coast between the Umlazi and the S frontier line of the Umhkomanzi. The divisions in the inland basin are: Umzinyati, a triangular district enclosed by the Quathlamba mountains on the W and NW, the Buffalo from its source to its juncture with the Tugela, and the Tugela and its NE affluent the Klip; Upper Tugela, an irregular parallelogram enclosed by the angle of the Quathlamba mountains, the Klip, and a range of heights which divides the Little Tugela from the Krantz river; Impafana, bounded by the Umzinyati division, the Tugela, Umvoti, and Pietermaritzburg divisions, and the Quathlamba range.

Population.] The native Africans in N. are Zulus or Zuluhs, not aboriginal tribes, but immigrants who have sought shelter from the tyranny of native chiefs. Their number is loosely estimated at from 80,000 to 100,000. There are various locations of these natives in the different divisions, which are declared to be inalienably vested in the chiefs in trust for the use of all their kraals; and a considerable number of stragglers, not yet located, along the Tugela.—The European pop. is principally concentrated in and about D'Urban, Pietermaritzburg, and Weenen. D'Urban, the port of the colony, is situated on a peninsula on the N side of the entrance into Port Natal. It has about 500 inhabitants. The streets are laid out at right angles. There is no municipality and no police, but paved streets and water supply might easily be introduced. Pietermaritzburg is situated on the lower declivity of the Stinkhout-berg, about 50 m. inland, in a direction W by N, from D'Urban. It has about 2,500 inhabitants, exclusive of the military who number 600. Some of the houses are built of a kind of stone which is easily wrought, and hardens by exposure to the air; but many are either of brick or 'wattle and slab.' There are nine parallel streets, intersected at right angles by other five streets, a spacious market-place, a church in which service is performed in Dutch and English, a Wesleyan chapel, and a government school. A government gazette is published here, and a weekly newspaper. The vicinity is fertile and picturesque. To the W of the town the country rises rapidly, and in winter the snow-clad summits of the hills can be seen from the town.—Weenen is situated near the angle formed by the junction of the Tugela and Bushman rivers, 60 m. N by W of Pietermaritzburg. It contains 800 inhabitants, principally Dutch. The neighbourhood is fertile, affording good pasture for sheep and cattle, and susceptible of tillage. Coal of an anthracitic character occurs here near the surface; but wood is the general fuel, and is abundant. There are a few Europeans at the different missionary stations; some Germans at Bergtheil's settlement on the Umgeni, 15 m. NW of Pietermaritzburg; a village called Verulam, on the Umlazi, about 5 m. from D'Urban, principally inhabited by settlers from St. Alban's; and another village called Compensation, on the Umloti river, where it is crossed by the track of the Zulu traders. The aggregate European pop. of the colony may border on 6,000.

Commerce.] The value of the goods exported from N. in 1846 was £15,416; in 1847, £13,674; in 1848, £10,866; in 1849, £11,265. In the latter year the various articles of export were classified as follows:

Ivory,	£5,454 16
Animals,	2,356 0
Butter,	2,174 16
Hides,	542 15
Grain,	420 1
Cotton,	128 0
Tallow,	30 0
Wool,	16 10
Other articles,	142 8
	£11,265 6

Of these, grain, cotton, tallow, and wool, it is said, might be greatly increased, with immediate profit to the settlers. The number of vessels entered inwards during the year 1849 was 40, with a capacity of 5,905 tons; and the number cleared outwards was 93, with a capacity of 6,066 tons. The value of the imports from all parts in 1849 was £55,922. A return of the value of goods imported into the colony during the quarter from January 6 to April 5, 1851, gives a

sum of £25,351, against exports valued at £5,419. The customs-duties levied during that period were £2,552. The shipping returns for the same period give the following results:—

ENTERED INWARDS.

From Great Britain,	5	—	655	—	44	—
„ Cape of Good Hope,	5	—	655	—	44	—
„ Mauritius,	2	—	268	—	21	—
„ Madras,	1	—	149	—	9	—
„ St. John's, N. B.,	1	—	97	—	7	—
Total,	14	—	2,166	—	141	—

ENTERED OUTWARDS.

To Akyab,	1	—	337	—	17	—
„ Cape of Good Hope,	10	—	1,470	—	97	—
„ Mauritius,	2	—	317	—	21	—
Total,	13	—	2,124	—	135	—

The total value of the imports for 1850 was £111,016, against £55,922 in 1849, being an increase of £55,094. The exports in 1850 were of the value of £15,614, against £11,265 in 1849, being an increase of £4,349. The value of the principal articles of export in both of the above-mentioned years was:

	1849.	1850.
Ivory,	£5,455	£9,199
Butter,	2,175	3,329
Hides,	543	851
Cotton,	128	243

In 1849, 27 vessels entered inwards from the Cape of Good Hope, 10 from Great Britain, 2 from the Mauritius, and 1 from Gottenburg; whilst in 1850 the arrivals were, 29 from the Cape of Good Hope, 28 from Great Britain, and 7 from the Mauritius, being a total of 40 vessels in 1849, against 64 vessels in 1850.

Revenue.] The gross revenue collected in N. in 1846 was £5,561; in 1847, £8,476; in 1848, £11,925; in 1849, £18,968. Of this latter sum, £5,681 was raised from customs, £2,150 from land-sales, and £1,960 from taxes, while £4,000 were advances in aid of revenue. The public expenditure in 1846 was £6,949; in 1847, £9,077; in 1848, £10,446; in 1849, £19,104. The estimated revenue for 1851 was £44,530; estimated expenditure, £43,742. There are a lieutenant-governor with a salary of £1,070, a colonial secretary with a salary of £870, a surveyor-general with a salary of £904, a collector of the customs with a salary of £970, a recorder, and a crown prosecutor, and 'a diplomatic agent with the native tribes within the colony,' with a salary of £300 a-year, who has a body-guard of 150 native police, all paid. There are also 10 justices-of-the-peace, all paid, besides resident magistrates with clerks, field-cornets, officers of yeomanry, commissioners for dividing the territory, and selecting sites for towns and villages, gaolers, and constables, all paid. Its land-jobbers have been a pest to N. When the followers of Pretorius fled before the establishment of British sovereignty, their lands were of course thrown into the market, and an enormous extent of land came at once to be offered for sale. Wide tracts were purchased by adventurers who had no means of turning them to account except by encouraging emigration; and many of these set up as colonizers, and issued most tempting programmes of intended settlements. The consequence was a precipitate rush to the colony of emigrants deluded by recklessly exaggerated representations of its present condition. They found no lands surveyed; and in some instances no lands for them in the possession of those who induced them to emigrate. Commissioners from N. have recently visited the Amaponda country to the S, with the view of inquiring into charges of cruelty and injustice towards the natives on the part of residents in that country. Whilst there, the Amaponda chief ceded to the commissioners, on behalf of the N. government, in consideration of 100 oxen, above 4,000,000 acres of fertile country, lying nearly unoccupied, between what is known as Amaponda-land and the N. colony.

History.] N. was visited, and favourably reported of, towards the close of the 17th cent., by Dampier, Woods, Rogers, and several Dutch navigators. Subsequently, a Dutch expedition purchased a cession of the territory from some native chiefs. The project of its actual colonization, however, dates no farther back than 1823. In that year Mr. Thomson, a merchant of Cape Town, and Lieutenants Farewell and King, of the royal navy, in the course of an experimental trading voyage to the E coast of Africa, put into N. harbour. In 1824, Lieut. Farewell, having visited it again with a view to form trading-relations with the natives, put himself into communication with Chaka, king of the Zulus, who had conquered the country, and obtained from him a grant of land round Port N. He hoisted the English flag, and took possession on the 27th of August 1824. In 1831, the governor of the Cape of Good Hope intimated that Dingaan, king of the Zulus, wished to have a white settlement formed at Port N., and recommended that his wishes should be complied with. In 1834, a large body of the inhabitants of Cape Town solicited the countenance of government for a settlement in N. In 1835 the American missionaries broke ground in the territory; nothing, however, was done on a large scale and systematically till about 1838, when the emigrant Dutch farmers who had ascended to the sources of the Orange river, found their way across the Quathlamba range. In 1840, so many of these wanderers had found their way into N. that it was estimated there were 600 men of them capable of bearing arms between the Quathlamba and the sea, living together in groups of from 50 to 100 families. The emigrants founded Pietermaritzburg, with a view to make it the capital of their settlement; called themselves the republic of N.; and delegated the necessary powers of government to a council of 24, elected out of their number; and soon found it necessary to elect a president or permanent chairman of the council, annually, with 2 *landdrosts*, each assisted by 6 *heemraden*. The landdrosts acted as judges, assisted in weighty criminal cases by juries of 12. The men capable of bearing arms were enrolled as a militia, under field-cornets, commandants, and a principal field-commandant, subject to the council. When the British government, on the 12th of May 1843, declared the sovereignty of her majesty to extend over N., and sent a military expedition to take possession of the N. country, the more resolute of the emigrants, under Pretorius, resolved to abandon their adopted country as soon as the British flag was hoisted, and they have been followed from time to time by others. Their places have been supplied by immigrants, in the first place, from the Cape colony, and latterly from England. In 1846, the district was constituted a distinct and separate government, after having been in 1845 annexed to the Cape colony.

NATAL, a district and town of Brazil, in the prov. of Rio-Grande-do-Norte. The district is bounded on the N by that of Estremoz; on the W by that of Villanova-do-Principe; on the S by the district of Goianinha; and on the E by the ocean. Pop. 10,000. It possesses considerable fertility, and produces sugar, cotton, tobacco, rice, mandioc, and millet.—The town, which is the cap. of the prov., is 180 m. N of Olinda, and 1,440 m. NNE of Rio-de-Janeiro, on a hill on the r. bank of the Rio Potengi or Grande, about 4 m. above the entrance of that river into the Atlantic, and in N lat. 5° 26′, W long. 35° 13′. The only edifices which it contains worthy of note are the churches, the governor's house, and the custom-house. The streets are irregular and narrow. The harbour of N. is situated at the mouth of the river, and is capable of being rendered one of the finest in Brazil. Its entrance is obstructed by rocks, and the depth insufficient for vessels above 150 tons burthen. The export trade, which is considerable, consists chiefly in timber, cotton, drugs, and other local productions.

NATAL, or Natar, a Malay settlement on the SW coast of Sumatra, S of the river Tabuyong, in N lat. 0° 33′. It is a place of considerable commerce. Gold of fine quality is procured from the adjacent country, some of the mines being within 10 m. of the factory; and there is a considerable vent for imported goods, the returns for which are chiefly made in that article, and in camphor and wool. The anchorage is about 2 m. off shore, in 5 fath.; but it is one of the worst roads on the W coast of Sumatra, having numerous shoals and often a heavy sea.

NATARI, a district of Japan, in the island of Nifon, and prov. of Yetsongo.

NATCHANG, a river of Connecticut, U. S., which has its source in Union and Woodstock, and flows into Shetucket river.

NATCHERADETZ, a town of Bohemia, in the circle and 29 m. S of Kaurzim, and 42 m. SSE of Prague. Pop. 665.

NATCHEZ, a port-of-entry in Adams co., Mississippi, U. S., on the E bank of the Mississippi, 155 m. from New Orleans by land, and 292 m. by the course of the river. The greater part of the town stands on ground upwards of 150 ft. above the surface of the river; but the view of the river from the town is intercepted by an intervening hill. The city is regularly laid out, with streets intersecting each other at right angles. It contains a court-house, a jail, a market-house, 3 banks, an academy, and 4 churches, and is well situated for a commercial depot, having a fertile and well-cultivated country in its rear, which produces great quantities of cotton. Pop. in 1810, 1,511; in 1818, 3,000; in 1840, 4,800; in 1850, 5,239. The great telegraphic line to California as presently projected, and reported upon to the United States senate, is to commence at N., and run through Northern Texas to El-Paso on the Rio Grande; thence to the junction of the Gila and Colorado rivers, crossing at the head of the gulf of California to San Diego on the Pacific; and then skirt the coast to Monterey and San-Francisco. The committee report, that if this line of wires be established, the Pacific and Atlantic oceans will, for commercial communications, become as it were as one; and that intelligence will be conveyed from London to California and India in a shorter time than was required ten years since to transmit a letter from Liverpool to New York.—A project is also now before the public for a railway from the port of Savannah, in the state of Georgia, *via* Albany and Fort Gaines in Georgia, and Abbeville, Montezuma, and Stockton in Alabama, to Columbia in the state of Mississippi, and thence to N. By this line, the tedious passage round Cape Florida would be avoided, and N. might be reached within 24 hours by railway from Savannah.

NA-TCHING-TANG, a town of the Corea, in the prov. of Hoang-hai, 180 m. NW of Han-yang, near the shore of the Yellow sea.

NATCHINSKAIA, a village of Russia in Asia, in Kamtchatka, 45 m. WNW of Petropavlosk. In its vicinity are thermal springs and baths.

NATCHITOCHES, a parish in the N part of the state of Louisiana, U. S., comprising an area of 4,000 sq. m., bordered by Sabine river on the SW, and drained by Red river. It is to a great extent covered with pine, and, except on the river, possesses little fertility. Pop. in 1840, 14,350; in 1850, 14,473. The chief town, which bears the same name (pronounced Nakitosh), is 368 m. NW by W of New Orleans, on the W side of Red river, 200 m. above its junction with the Mississippi. Pop. 2,000.

NATCHUTEN LAKES, a chain of small lakes in British North America, in New Caledonia, to the SW of Stuart's lake, and which discharge themselves by a river of that name into Fraser's river.

NATEBY, a township in Kirkby-Stephen p., Westmoreland, 1½ m. S of Kirkby-Stephen, on the W bank of the Eden. Pop. in 1831, 136; in 1841, 108.—Also a township in the p. of Garstang, Lancashire, 1¾ m. NW by W of Garstang. Area 1,210 acres. Pop. in 1831, 232; in 1841, 341.

NATELY (Upper), a parish in the co. of Southampton, 2½ m. W by N of Odiham. Area 980 acres. Pop. in 1831, 153; in 1841, 163.

NATELY-SCURES, a parish in the co. of Southampton, 3¾ m. E by N of Basingstoke, on the Southampton and Stoke railway, and on the Basingstoke canal. Area 1,120 acres. Pop. in 1841, 278.

NATENS, or Nathunz, a town of Persia, in the prov. of Irak-Ajemi, district and 90 m. NNE of Ispahan, and 36 m. SE of Kashan. It contains about 1,200 houses. The environs are noted for their pears.

NATERS, a town of Switzerland, in the cant. of Valais, dizain and 1 m. NNE of Brig, and 33 m. ENE of Sion, near the r. bank of the Rhone, in a narrow gorge. Saffron is extensively grown in the environs.

NATHALICO. See Anatolico.

NATHDORA, or Nath-devara, a town of Hindostan, in the prov. of Ajmir, and district of Riwar, 27 m. NNE of Odeypur, and near the Banass. It is noted for its temple, and is resorted to by large numbers of pilgrims of the Gossain class.

NATHLASH (St.), or Nicholas (St.), a parish in co. Cork, 1½ m. S of Kildorrery, containing the village of Rockmills. Area 1,024 acres. Pop. in 1831, 869; in 1841, 899.

NATHNAGUR, a town of Hindostan, in the presidency of Bengal, prov. of Bahar, and district of Boglipur. It contains about 900 houses.

NATHO, a village of the duchy of Anhalt-Bernburg, to the NW of Koswigk. Pop. 166.

NATHO-SALIMKE-CHISTI, a village on the NE frontier of Bhawpur, near the l. bank of the Ghara.

NATICK, a township of Middlesex co., in the state of Massachusetts, U. S., 17 m. WSW of Boston. It is watered by Charles river, and intersected by the Boston and Worcester railway. Pop. in 1840, 1,285. It contains 2 villages.—Also a village of Warwick township, Kent co., in the state of Rhode island, 9 m. SSE of Providence, on the N side of Patuxet river.

NATISONE, a river of Austria, in Lombardy, in the prov. of Udino. It has its source near Bergogna; passes Cividale; and throws itself into the Torre, by the l. bank, a little to the E of Trevignano, and after a course, in a generally S direction, of 36 m.

NATISTAGOET, a harbour on the S coast of Labrador, in the N part of the gulf of St. Lawrence, in N lat. 50° 5′, and W long. 65° 35′.

NATIVE CREEK, a river of Australia Felix, in the co. of Grant, an affluent of the Barwon.

NATIVIDADE, an island of the N. Pacific, off the coast of Old California, in N lat. 27° 57′, and W long. 119° 40′. It is about 6 m. in length.

NATIVIDADE, a town of Brazil, in the prov. of Goyaz and district of Tocantins, 390 m. NNE of Villa-Boa, on the r. bank of the Luiz-Alves. Pop. 2,000. It is situated near the W base of the S extremity of an extensive serra about 2,000 ft. in alt., and is very irregularly built, but contains a parish-church, 3 unfinished churches or chapels, a jail, and schools. The culture of sugar, cotton, tobacco, mandioc, and millet, form the chief occupations of the inhabitants, who, however, "work little, but eat and sleep a great deal." The environs are noted for their oranges and citrons. The gold mines once wrought in the vicinity are now nearly abandoned.—Also a rocky island in the Rio Doce, in the prov. of Minas-Geraes.

NATLE-GAUR, a lake of Norway, in the diocese of Nordland, in the NE part of the bail. of Finmark, and 18 m. NE of the embouchure of the Tana. It is 9 m. in length, and 6 m. in breadth; and discharges itself on the NE into the Kongsfiord, a bay of the Northern ocean.

NATOLIA. See Anatolia.

NATOYE, a department and commune of Belgium, in the prov. of Namur, and arrond. of Dinant. Pop. of dep. 754; of com. 341.

NATRUN, a town of Barca, WNW of Derneh, on the Mediterranean. It is the *Erythron* of the ancients, and is now in ruins.

NATRUN (Wadi), a district of Egypt, in the western desert. It contains several Coptic monasteries, and the village of Zakik, which is 36 m. W by S of Teraneh. It is celebrated for its natron, which is found both in the plain, and in two or three small lakes in the wadi. See article Egypt, p. 162.

NATSCH, a town of Russia in Europe, in the gov. and 54 m. NE of Grodno, district and 23 m. NW of Lida.

NATTAI, a river of New South Wales, in the co. of Camden, an affluent of the Wollondilly.

NATTAM, a town of Hindostan, in the presidency of Madras, and prov. of the Carnatic, district and 21 m. ESE of Dindigul.

NATTENHAESDONCK, a commune of Belgium, in the prov. of Antwerp, and dep. of Hingene. Pop. 195.

NATTERY, a hill of New South Wales, in the co. of Argyle, on the Wollondilly river, 114 m. from Sydney.

NATTORE, a town of Hindostan, in the presidency and prov. of Bengal, and district of Rajishahy, on an arm of the Ganges and Atri, and 43 m. ENE of Murshedabad. Silk is extensively cultivated in the environs. Between N. and Jaffiergunge is a very extensive morass, supposed to be the old bed of the Ganges, which, during the rainy season, extends as far as Dacca, and is navigable by boats.

NATTRADACOTTA, a town of Hindostan, in the district of Tinnevilly, 68 m. NE of Cape Comorin.

NATUNA (Great), an island in the Chinese sea, in N lat. 4°, E long. 108°. It is estimated at 40 m. in length, and 13 m. of average breadth, and is surrounded by numerous small rocky isles. Some of the high mountains on this island may be seen 15 leagues off.

NATUNAS, a cluster of small islands in the China sea, in N lat. 4° 45′. From October to December, the best tract for ships bound to China is past these islands to the N.

NATURALISTE (Cape), a headland on the coast of Van Diemen's Land, in S lat. 40° 51′ 46″.—Also a headland on the coast of Australia, in S lat. 33° 27′ 42″.

NATZA, a village of the duchy of Saxe-Gotha, 5 m. ESE of Treffurt.

NAUCELLES, a town of France, in the dep. of Aveyron, 15 m. SW of Rhodez. Pop. 1,500.

NAUDERS, or Nodrio, a large village in Tyrol, near the Inn, 15 m. N of Glurentz, a short distance from the ridge which separates the Tyrol from the Engadin in the cant. of Grisons.

NAUEN, a town of Prussia, in the reg. and 17 m. WNW of Potsdam, on the Hamburg and Berlin railway. Pop. 4,300.

NAUGARDTEN, a town of Prussia, in the reg. and 29 m. NE of Stetten. Pop. 2,800.

NAUGATUCK, a village of New Haven co., in Connecticut, U. S., 53 m. SW of Hartford, on the W side of a stream of the same name, an affluent of the Housatonic. Pop. 1,500.

NAUGHTON, a parish of Suffolk, 4 m. N of Hadleigh. Area 630 acres. Pop. 137.

NAUHAM, a village of Hesse-Cassel, 13 m. NNW of Hanau, on the Usbach. Pop. 1,400. It has strong saline springs.

NAULE, a parish, containing a village of the same name, in co. Dublin. Area of p. 2,627 acres. Pop. in 1831, 758; in 1841, 756. The village stands on the river Delvin, 3¾ m. ENE of Garristown. Pop. in 1831, 216; in 1841, 217. The vale of N. or the Roches, traversed by the Delvin river, is a picturesque glen, screened by a chain of expressively-featured hills.

NAUMBURG, a town of Prussian Saxony, in the gov. of Merseburg, on the Saale, 17 m. SSW of Merseburg. It is divided into the town proper, the liberties, and the suburbs. The town is surrounded with walls, and contains a castle, a public school, a council-house, a large church, an orphan-house, and an hospital. The part called the Liberties is surrounded by a separate wall and ditch, and contains the cathedral, a fine Gothic building, erected in 1027, the chapter-school, the residences of the canons, and a number of private houses. The suburbs contain several hospitals and an infirmary. The pop. of the three divisions in 1846 was 12,700. The inhabitants carry on several manufactures, particularly that of stockings, gloves, and caps. Leather, soap, starch, and gunpowder, are also manufactured here, and shoe-making is carried on on a large scale. Some wine is produced in the environs.—Also a town of Hesse-Cassel, on a small stream called the Elbe, 16 m. WSW of Cassel. Pop. 1,500.

NAUMBURG-ON-THE-QUEISS, a town of Prussian Silesia, in the gov. of Liegnitz, on the r. bank of the Queiss, 11 m. NW of Louenberg. Pop. 1,700.

NAUMPUR, a town of Hindostan, in the prov. of Candeish, 92 m. SE of Surec.

NAUNDORF (Gross), a village of Saxony, in the circle of Meissen, on the borders of Lusatia, 15 m. ENE of Grosenhayn.

NAUNHOF, a village of Saxony, in the circle and 10 m. SE of Leipsic. Pop. 530.

NAUNTON, a parish of Gloucestershire, 6 m. WSW of Stow-on-the-Wold. Area 6,280 acres. Pop. 523.—Also a parish in Worcestershire, 5 m. NE of Pershore. Area 820 acres. Pop. 176.

NAUPLIA. See Anapli.

NAUSA, a settlement of Quito, in the prov. of Guayaquil.

NAUSSA, a town and very convenient harbour, on the N coast of the island of Paros, in the Grecian archipelago. The town is regularly built, and has some remains of fortifications made by the Russians, about 1776, when their fleet was here. The bay is capable of holding an immense fleet, but is much exposed to the N. From N. a good road leads to Parkia, on the W side of the island.

NAUSSAC, a village of France, in the dep. of Aveyron, cant. and 3 m. SW of Asprieres. Pop. 500.

NAUTILUS, one of the Kingsmill islands, in S lat. 1° 33′ 30″.

NAUTPUR, a town of Bengal, in the district of Purneah, on the W bank of the Cosah, in N lat. 26° 17′.

NAUVOO, a celebrated Mormon town, in the state of Illinois, U. S., on the l. bank of the Mississippi, 124 m. NW of Springfield, and 181 m. above the mouth of the Illinois. As originally laid out, its limits comprised a space 4 m. long, and 3 m. wide; but its buildings consisted, at the end of three years, of about 1,000 white-washed log cabins, with a few frame and brick houses, a spacious hotel, in which their leader had a suite of rooms, and the celebrated Temple of 'the Latter Day Saints.' After a long series of struggles, and a regular siege of the city of N. by the inhabitants of the surrounding counties, the Mormons agreed to leave Illinois in the spring of 1846. They directed their migration to California, where they ultimately fixed on the Great Salt lake valley as the future home of their sect, and thither they have since continued to flock from all quarters. See article Deseret.

NAVA, or Nau (Cape), a cape of Naples, on the E coast of Calabria, 4 m. SSW of Cape Colonna, in N lat. 39° 2′.

NAVA (La), a village of Spain, in the prov. and 38 m. NE of Seville. Pop. 250.

NAVA (Pola de), a village of Spain, in the prov. and 15 m. E of Oviedo.

NAVACE (La), a small island between Jamaica and Hispaniola, in N lat. 18° 23′, W long. 74° 50′.

NAVA-CERADA, a village of Spain, in the prov. and 32 m. NNW of Madrid.

NAVA-CONEIJO, a village of Spain, in the prov. and 60 m. NNE of Caceres.

NAVA-DE-LA-ASCENCION, a town of Spain, in the prov. and 21 m. NW of Segovia.

NAVA-DE-LOS-OTEROS, a town of Spain, in the prov. and 15 m. SSE of Leon.

NAVA-DEL-REY (La), a town of Spain, in the prov. and 27 m. SW of Valladolid. Pop. 3,800.

NAVA-EL-CARNERO, a town of Spain, in the prov. and 21 m. WSW of Madrid. Pop. 3,200. It has an active trade in wine, fruit, and oil.

NAVA-EL-MANZANO, a town of Spain, in the prov. and 21 m. NNW of Segovia. Pop. 1,500.

NAVA-EL-QUEGIGO, a town of Spain, in the prov. and 27 m. NW of Madrid, on the l. bank of the Tercio.

NAVA-HERMOSA, a town of Spain, in the prov. and 36 m. SW of Toledo. Pop. 2,600. It has woollen factories.

NAVAJAS, a village of Spain, in the prov. and 32 m. N of Valencia, on the r. bank of the Palencia. Pop. 950.

NAVA-LA-FUENTE, a village of Spain, in the prov. and 60 m. N of Madrid. Pop. 220.

NAVA-LA-GAMELLA, a village of Spain, in the prov. and 24 m. ESE of Avila. Pop. 408.

NAVALCAN, a town of Spain, in the prov. and 75 m. W of Toledo. Pop. 1,200.

NAVALMORAL, a town of Spain, in the prov. and 48 m. NE of Caceres. Pop. 2,100.

NAVALMORAL-DE-PASA, a town of Spain, in the prov. and 38 m. ESE of Toledo, on the r. bank of the Pasa. It has woollen factories and pottery works. Pop. 1,800.

NAVALMORAL-DE-TOLEDO, a village of Spain, in the prov. of Toledo, adjoining N.-de-Pasa. Pop. 850.

NAVALNULLOS-DE-TALAVERA, a village of Spain, in the prov. and 39 m. WSW of Toledo, between the Pasa and the Sedana rivulets. Pop. 1,780.

NAVALVILLAR-DE-PELA, a village of Spain, in the prov. and 72 m. E of Badajoz. Pop. 2,300.

NAVAMORALES, a village of Spain, in the prov. and 27 m. SE of Salamanca, on the Tormes. Pop. 500.

NAVAMORQUENDE, a village of Spain, in the prov. and 42 m. SW of Avila. Pop. 1,614.

NAVAN, a parish in co. Meath, containing the greater part of the town of Navan. Area 3,544 acres. Pop. in 1831, 5,292; in 1841, 6,834.

NAVAN, one of the chief towns of co. Meath, and formerly a parliamentary borough, partly in the parish of Athlumney, partly in the parish of Donaghmore, but chiefly in the parish of Navan, 6 m. SW of Slane, and 22 m. NW by N of Dublin. Pop. 4,987. The town stands at the confluence of the Blackwater with the Boyne; and is divided by these streams into three sections, which are conveniently connected by bridges. The parish-church is a commodious structure; and the Roman Catholic chapel is a spacious Grecian structure. The barrack occupies the site of a quondam abbey, on the r. bank of the Blackwater. The court-house and the market-house present no particular feature. The infirmary for the county is situated at N.—N., in consequence of the opening of the Boyne navigation hence to Drogheda, has become a place of considerable trade, and may be considered as in a steadily prosperous condition. Its advantageous situation in the centre of a great and rich agricultural country, commands for it a very extensive trade in farm produce. It sent two members to the Irish parliament till the Legislative union.

NAVAON, a river of Portugal, which rises to the W of Ameira in Estremadura; runs SSE; and flows into the Zezere, on the r. bank, after a course of 30 m.

NAVARES-DE-ENMEDIO, a village of Spain, in the prov. and 32 m. NE of Segovia. Pop. 850.

NAVARES-DE-LAS-CUEVAS, a village of Spain, in the prov. and 32 m. NE of Segovia. Pop. 320.

NAVARIDAS, a village of Spain, in the prov. and 27 m. S of Vittoria. Pop. 300.

NAVARIKOS, or Tripia, a large village of Turkey, in Albania, in the district of Suli, on a rugged and steep elevation to the S of Klissura.

NAVARIN, Avarin, Navarino, or Neu-Castron, a town of Greece, on the SW coast of the Morea, 6 m. N of Modon, on a bay of the Mediterranean, 72 m. SW of Argos. Previous to its being reduced to a heap of ruins during the war of independence, its houses, particularly those near the harbour, were tolerably well-built; but the streets were narrow, dirty, steep, and uneven. It was, however, a place of considerable trade, from the excellence of its port, which is the largest in the Morea; and is formed by a bay of considerable extent, the entrance of which is secured by the celebrated but deserted island of Sphacteria, or Sfagia, while the N and NE sides are protected by a range of high mountains. The passage leading into the bay is small, and lies between the island and the continent. Old N. lies at the N end of the bay, and is supposed to occupy the site of the ancient *Pylos*. The adjacent country is fertile and well-cultivated. In describing the prospect which the castle commands, Mr. Wordsworth says: "Let us imagine a semicircular bay 2½ m. in diameter, lying from NE to SW. Let us place a castle on each of its two horns, that on the N being on a lofty ground and in ruins. Let us suppose a large lagoon stretching along the coast to the E of the latter, and fields of maize covering the low lands near it. Let us add two small streams flowing down from the limestone hills on the E, and emptying themselves into the bay. Let us plant some small churches here and there on the eminences of these hills, and trace some mountain-paths winding in an inland direction upon the surface. On the S horn of the bay let us place a large fortress of a pentagonal form, a number of small houses, and a cemetery; and near it, farther to the E, a small creek filled with Greek boats. Let us stretch across the harbour a long narrow island, leaving a passage between itself and the S castle of rather more than half-a-mile, and one of about 500 ft. between its N point and the other promontory of the bay, the latter being shallow and fordable, the former having an average of 27 faths. of water. We have then a picture of the ancient harbour of *Pylos*, and, as it is termed, from the names of the castles, the modern bay of N." Take away from the above description the "small houses" and the cemetery, both of which have disappeared, and add what Mr. Wordsworth has omitted, the little island of Marathonisi in the centre of the bay, and we have as correct an idea of the harbour of N. as description can give. To the natural beauties of the scene, however, are added the many and interesting associations which cluster around the 'sandy Pylos,' once 'the well-built city of the Nelian Nestor,' and the well-known and ill-fated island of Sphacteria,—the first of which reminds us of the interview between the youthful Telemachus and the eloquent Nestor,—while the other recalls to mind the victory which was here gained, in the 7th

year of the Peloponnesian war, by the Athenians over the sons of Sparta. The fortress of N.—which in latter times became the theatre of still greater events than those which have been celebrated by Homer and Thucydides—was built by St. Omer between the years 1310 and 1320. In 1571 it fell into the hands of the Turks, and was augmented by a citadel of 6 bastions; and in 1644 its harbour, under the protection of its cannon, became the rendezvous of the Turkish fleet, which is said to have consisted of 2,000 sail. In 1680 it was again taken by the Venetians, and in 1715 fell once more into the hands of the Turks, who, in 1770, were dispossessed by the Russians, but the victors a few days afterwards left the castle and the Christians to the mercy of the Turks. Fifty-one years after this ill-concerted attempt of Orloff, N. was besieged by the Greeks, and its inhabitants were massacred without distinction of age or sex. The Greeks, however, who remained in possession of the fortifications till 1825, were besieged in turn by Ibrahim Pasha, and then the 'sandy Pylos,' the island of Sphacteria, and the fortress of N. became once more the scenes of stirring and animating events. To the battle on the heights of Opsimo followed those splendid manœuvres, by means of which Ibrahim, who was at the head of 15,000 men, possessed himself first of Sphacteria, then of ancient Pylos, and last of N.; which was surrendered by capitulation. N. and its port continued to be the head-quarters of Ibrahim Pasha and the Turco-Egyptian fleets till the 20th of October, 1828, when the destruction of the Turkish armament by the combined squadron of England, Russia, and France, put an end to the power of Ibrahim, and with it to the power of Turkey in Greece. On the 20th Oct., the combined British, French, and Russian squadrons, led by Admiral Codrington, commander of the British squadron, entered the harbour of N., their force consisting of 29 vessels, viz. 10 line-of-battle ships, 10 frigates, 4 brigs, the rest schooners. The Turco-Egyptian fleet consisted of about 70 vessels of war, viz. 3 line-of-battle ships, 5 fifty-four gun ships, 15 frigates, 25 corvettes, and 12 brigs; the rest smaller vessels; besides 40 transports. It was moored in form of a crescent, with springs on their cables, and having 6 brulots anchored to windward; the whole lying under cover of the batteries of the town of Navarino. On the entrance of the European fleet, the Turks prepared for battle in their confused way; without other order than the example of the Capitana Bey; the Egyptian admiral, Moharem Bey, in fact declaring that he would not fight. But before all the European vessels had come to anchor, a boat sent by one of them to a Turkish fireship, requesting her to move, was fired upon, and some of her men killed; this was answered by a return fire of musketry; an Egyptian corvette then imprudently fired a cannon-shot into the Dartmouth, which of course brought on a return fire; and the Turks madly answering it from several vessels, part of the line began an action. Meantime Admiral Codrington in the Asia, desirous of preventing a general action, fired only upon the ships-of-the-line of the Constantinople admiral, who had fired first; the Egyptian admiral lying upon his other bow was not molested, until Codrington sending his pilot to the Egyptian admiral, to signify his intention of not fighting if he could avoid it, the boat was fired upon, the pilot and some men were killed, and the Egyptian fired upon the Asia. Codrington thereupon opening his tremendous broadside upon the Egyptian on one side, and the Turk on the other, in a few moments reduced them both to mere wrecks, and they swung utterly destroyed to leeward; thus uncovering the second Turkish line of vessels which lay behind them, and which opened their whole fire upon Codrington. The action now became general; the vessels of each nation striving to outdo the other, and the Turks firing with the blind fury of desperation, and warmly seconded by the whole line of land-batteries. The battle raged from 3 o'clock, P. M., until 7: and ended, as every contest must end where one side opposes only superior force directed by blind fury, to cool courage, discipline, and science. The Turkish fleet was almost utterly destroyed, many ships had been blown up, sunk, or burned; the rest were pierced through and through, shattered, dismasted, or driven on shore; not more than 15 vessels had escaped undamaged; and more than 5,000 Turks had been killed. The rest, overwhelmed with confusion and rage but not with fear, continued during the night madly to set fire to and blow up their vessels which were on shore or disabled, regardless of the English admiral's assurance, that he had finished. Thus an action, commenced by accident, ended in the almost complete destruction of the naval power of Turkey.

NAVARRE, or in Spanish, NAVARRA, a province of the NE of Spain; bounded by the Mediterranean and France on the N and NE; on the E by the prov. of Huesca; on the SE by Saragossa; on the SW by Logrono; and on the NW by Vascongades. It has an area of 2,450 sq. m. Pop. in 1823, 282,224; in 1833, 230,925; in 1849, 280,000. The Pyrenees divide this prov. from France, and cover a great part of its surface, sending three main ramifications southward across it. The principal summits within the prov. have an alt. of 5,300 ft. These mountains are here in general very steep, and are intersected by difficult defiles. The most remarkable of these defiles are those of Lescou, Bastan, Roncal, and Roncesvalles. The small streams are numerous; but the only great river is the Ebro. The next in importance are the Bidassoa, flowing N into the bay of Biscay, and the Aragon and the Arga, affluents of the Ebro. The general elevation of the surface has a very sensible effect on the temperature, which, except in the valleys, is below that of most of the provs. of Spain. The more elevated mountain-districts often present only naked rock; but some of them are covered with wood and pasturage. Game, cattle, and sheep are numerous. The grain produced is insufficient for the home-consumption, yet an occasional export of corn is made to France in return for silk and cotton fabrics. The wine of N. is in general of good quality. The other productions are hemp, flax, fruit, pulse; and a little oil is produced in the neighbourhood of Tudela. Cyder is made in a few districts, but chiefly in the valley of Bastan. The liquorice imported into England is chiefly the produce of N. The fruit-trees consist chiefly of pine, beech, deciduous oak, and chestnut.—Iron abounds; there are large mines of it at Vedrin and Lugarchuelo. At Pampeluna is a copper mine; in the neighbourhood of Valtierra a mine of rock salt occurs between strata of gypsum. Jasper and marble occur in large beds.—In manufactures N. has made little progress. The chief establishment of this kind is a foundry, about 1 m. from Eguy, at which cast-iron bombs and cannon-balls are made for account of government. Yet this prov. possesses tolerable means of communication in the canal of Aragon, and some good roads made about the middle of the 18th cent. It retains also with the other Basque provinces some valuable privileges, importing most foreign commodities without paying duty, and being exempted from the heavy and troublesome tax called the provincial rents. Its chief towns are Pampeluna, Tudela, and Estella.

N. still preserves its ancient constitution, and is

governed like a separate kingdom; its legal forms differ totally from those of the rest of Spain, and appeals, instead of going to Madrid, are finally decided by the provincial council at Pampeluna. Its peculiar government comprises—"1st, A viceroy, representing the king's person, who has the command of the army, and the government of Pampeluna, and moreover possesses the privilege of presiding at the cortes and the grand council of N. 2d, The deputation or cortes, composed of three *estamentos*, ecclesiastical, military, and civil. In the first class of these may be numbered various dignitaries of the church, such as bishops, abbés, and the priors of Roncesvalles; in the second nobles and chevaliers; and in the third the chosen of 34 villages, named by the several proprietors, the merchants, and the legal profession. The cortes assemble once a-year and are elected for three. No matter can be discussed before the wrongs or grievances of the nation have been redressed. The viceroy opens the sitting in due form, but cannot in any way dictate to the cortes, who have the exclusive right of treating of all affairs of the kingdom; such as regulating taxes, &c. The laws and decrees of the crown cannot be put into execution without having first had the sanction of the cortes, who moreover receive the oath of the viceroy both for himself and the king his master. 3d, The royal council of Navarre, which corresponds with that of Castile. 4th, The chamber of accounts, in which are deposited all claims of levies and disbursements.—The laws are administered by the village alcaldes in the first instance. Cases of appeal are brought before the alcaldes of the cortes, who sit in judgment at Pampeluna, and finally before the royal council; the constitution not suffering anything to be judged without the limits of the kingdom. There are no other customs in N. than what are sanctioned by the deputation, nor can there be any other governors than those of Pampeluna and the passes of the mountains, and those only where they formerly existed. The municipal institutions vary according to their localities; each municipality is composed of an alcalde and corregidors, either elected or hereditary in particular families. In some places lots are cast for the several offices by the claimants. There is, moreover, an alcalde for every village. These, 34 in number, are divided into five *merindades*, each having a mayor with two deputies. These municipal institutions are accompanied by an infinitude of petty corporations, which, while they have their advantages, have also inconveniences of more than one kind, yet to which the people are much attached." [*Major Richardson.*]—The inhabitants have the general character of Spanish mountaineers; they are brave, active, ingenious, and spirited, but often impatient and quarrelsome. The Spanish spoken here is much mixed with Basque, Catalan, and French words. "There are moral influences," says Major Richardson, "which contribute powerfully to attach the Navarrese to their nationality—namely, their religion, their nobility, their language, and their military glory. The Navarrese are aware that their ancestors never ceased to be Christians; that it was with the aid of the church that their territory was wholly purged of the Moors, and that the clergy have always gone hand-in-hand with the nation throughout the various changes to which it has been subjected. It is to this that is to be ascribed the profound respect with which this body is considered—a respect which goes so far as to accord to the ecclesiastic *estamento* the right of giving the casting vote in the deliberate councils of the two others. Again, the nobility is a class esteemed in N. not merely for the eminent services rendered by it, but by reason of the deep root it has taken in the country. Each property is a manor bearing the name of the family and the date of its erection. The law of primogeniture is in its full vigour, and each name is handed down with the mansion. In many parts may be found families who have resided 1,000 years on the same estate without interruption, and these properties being much divided and subdivided, this portion of the nobility is extremely popular. Moreover, the Navarrese acknowledge no other nobility in their own province than Navarrese, which the cortes and naturalization alone can confer. Their language is dear to the Navarrese, not only because it is their original tongue, but because it is an evidence of their past glory, since it attests their independence. It accords with all their ancient customs, their patronymic names, like those of their neighbours, being altogether Basque. As to military glory, it is sufficient to observe that the Navarrese go far beyond the rest of the Spaniards. The recent recollections of the war of independence, from 1808 to 1813, has so inflated their national vanity, that it may be said that to obtain the name of guerilla is with them one of the most powerful incentives that can act upon the human heart. The Navarrese seems formed by nature to be a guerilla—a bold marcher, a poacher, and smuggler from habit; capable of any work, and inured to all sorts of fatigue; the guerilla state is to him one of choice, and he only requires to be well-fed and to be sanguine of success to prefer that condition to any other; usually ill-clad and exposed to the inclemency of the seasons, he fears not to brave it, and luckily for him Navarre is so fertile that he can easily recruit his exhausted strength with abundant food and drink—that which is to him of the utmost importance. A Navarrese in rags, with a musket in his hand, and plenty of wine, may be said to be in his aboriginal state."—The university of Pampeluna has been for some time suppressed, and its place supplied by an academy. There are in the prov. 4 other academies, or rather schools; for they do not go beyond elementary instruction in Latin.—N., by its mountainous position, escaped the yoke of the barbarians who expelled the Romans from Spain, till 470 or 472, when Pampeluna and the surrounding district were seized by Euric, king of the Goths. The Goths were expelled by the Moors; but in 806, the latter were in their turn driven out by Louis of Aquitaine, a son of Charlemagne. About half-a-century after, a count of Bigorre established in N. a sovereignty, which lasted in his family 500 years. In 1512 this kingdom was dismembered. The reigning prince having been excommunicated by the Pope, Ferdinand V. of Spain assumed the execution of the Papal ban, and seized all the part lying on the Spanish side of the Pyrenees, which was thereafter called Upper N. to distinguish it from the French portion called Lower N. French Navarre, a tract of country similar in climate and aspect to the Spanish, preserved its independence, and continued a separate state, till added to the dominions of France, by the accession of Henry IV., in the end of the 16th cent. It is now comprised in the dep. of Basses-Pyrenees.

NAVARRENX, or NAVARREINS, a canton, commune, and town of France, in the dep. of the Lower Pyrenees, and arrond. of Orthez. The cant. comprises 25 com. Pop. in 1831, 10,767; in 1841, 11,457. The town is 12 m. S of Orthez, and 21 m. W of Pau, in a fertile plain, on the r. bank of the Gave-d'Oleron, which is here crossed by a stone-bridge, and at the confluence of 2 small streams named Anglade and Larroder. Pop. 1,533. It is enclosed by a wall flanked with towers, and is tolerably well-built. It has a prison and barracks, and possesses manufactories of capes and cord. Wine is cultivated in the

vicinity. N. was founded in 1529 by Henry d'Albret, maternal grandfather of Henry IV. In 1569 it sustained a siege by the Catholics.

NAVARRES, a town of Spain, in the prov. and 39 m. SSW of Valencia, and partido of Enguera, in a fertile locality. Pop. 1,740. It has a parish-church, a custom-house, and a public granary, and carries on a considerable trade in cattle.

NAVARRETE, a town of Spain, in Old Castile, in the prov., partido, and 8 m. W of Logrono, at the foot of a mountain. Pop. 2,015. It has an old castle, a parish church, a convent, an hospital, and a custom-house. The distillation of brandy, and the manufacture of common linen and woollen fabrics, form the chief branches of local industry.

NAVARRO, a mountain of Brazil, in the S part of the prov. of São-Pedro-do-Rio-Grande. Its summit, which rises between the mountains of Castelhos-Grandes and Xafatole, forms one of the points in the boundary-line between the Banda-Oriental and Brazil.

NAVAS, a town of Spain, in Old Castile, in the prov. and 23 m. NE of Burgos, partido and 5 m. N of Bribiesca. Pop. 112.—Also a port of Cuba, on the N coast, at the mouth of a river of the same name, in N lat. 20° 29′ 44″, W long. 74° 29′.

NAVASA (La), a small island, in the Caribbean sea, between Hayti and Jamaica, in N lat. 18° 24′, W long. 75°. It is not inhabited.

NAVAS-FRIAS, a town of Spain, in Leon, in the prov. of Salamanca, and partido of Ledisma. Pop. 1,128. It has a parish church, and several convents. The distillation of brandy and manufacture of linen form the chief branches of local industry. —Also a village of Spain, in the prov. and 54 m. SW of Salamanca, near the source of the Agueda. Pop 760.

NAVAS-DE-JORQUERA (Las), a town of Spain, in the prov. of Albacete, and partido of Casas-de-Ibanez, 72 m. SSE of Cuenca. Pop. 816. It has manufactories of linen.

NAVAS-DE-SAN-ANTONIO, a town of Spain, in the prov. and partido of Segovia. Pop. 994. It has a parish church, a custom-house, and a public granary. Cattle are extensively reared in the environs.

NAVAS-DE-SAN-JUAN, a town of Spain, in Andalusia, in the prov. of Jaen, and partido of Carolina. Pop. 1,405. It has a parish church and a custom-house. The manufacture of linen and rearing of cattle form the chief branches of local industry.

NAVAS-DEL-MADRONO (Las), a town of Spain, in the prov. and 18 m. WNW of Caceres. Pop. 2,761.

NAVAS-DEL-MARQUES, a town of Spain, in the prov. and 24 m. ESE of Avila. Pop. 3,200, a considerable proportion of whom are employed in woollen manufacture. There is a fine palace here.

NAVAS-DE-TOLOSA (Las), a village of Spain, in the prov. and 30 m. N of Jaen. Pop. 283.

NAVASQUES, a village of Spain, in the prov. and 32 m. ESE of Pampeluna. Pop. 550.

NAVATA, a village of Spain, in the prov. and 18 m. N of Girona. Pop. 800.

NAVE, a town of Austrian Italy, in the Brescia, on the river Garza, 3 m. NE of Brescia. Pop. 1,500.

NAVEIL, a town of France, in the dep. of Loir-et-Cher, near the Loir, 3 m. SW of Vendome.

NAVELLS, a town of Naples, in Abruzzo-Ultra 2da, 21 m. SE of Aquila. Pop. 1,200.

NAVENBY, a parish of Lincolnshire, 10 m. NW of Sleaford. Area 2,110 acres. Pop. 942.

NAVER, a river of Sutherlandshire, which runs due E to a loch of the same name, in the p. of Fars, about 6 m. in length; and re-issuing from it, after a course of 20 m., falls into the ocean at Torrisdale.

NAVES, a town of France, in the dep. of Corrèze, 3 m. N of Tulle. Pop. 1,500.

NAVESINK, a harbour of Monmouth co., New Jersey, U. S., 5 m. NW of Shrewsbury.

NAVESTOCK, a parish of Essex, 4 m. SSW of Chipping-Ongar. Area 3,730 acres. Pop. 887.

NAVIA-DE-LUARCA, a town of Spain, in the prov. and 45 m. WNW of Oviedo, at the mouth and on the r. bank of a river of the same name, which here flows into the Atlantic after a NNE course of 90 m. Pop. 1,200.

NAVIANOS-DE-LA-VEGA, a village of Spain, in the prov. and 32 m. SSW of Leon, on the r. bank of the Orvigo. Pop. 450.

NAVIDAD, a village and port of Mexico, in the state of Jalisco, 30 m. SW of Villa-de-la-Purificacion.

NAVIGATOR'S ISLANDS, or Samoan Isles, the Isles Hamoa of the French, a cluster of islands in the S. Pacific, between 169° 25′ and 172° 40′ W long., and 13° 30′ and 14° 30′ S lat. They are all lofty, but are neither surrounded with a low border nor enclosed by reefs. All the islands of the South sea are more or less formed of coral reefs, which make secure harbours: "the Navigator's islands only are not indebted to these active little animals for this advantage." [*Kotzebue.*] The easternmost islands of the cluster, Opoun, Lione, and Fanfoue, seem to have been first discovered by Roggewin and Bauman in 1721. Another was seen by Bougainville in 1766, who appropriated the discovery, and gave the group the name it now bears, on account of the skill displayed by their inhabitants in rigging and sailing small craft. The two westernmost islands, Ojolava and Pola, which are the most considerable, were discovered by La Perouse in 1787. Each of the latter is nearly 40 m. in length. Kotzebue says that Ojolava surpasses Tahiti itself in luxuriant beauty. Pola is one high mountain nearly equalling in altitude the Peak of Teneriffe. It presents the largest superficial area of any in the group. Perouse was informed of three more to the southward, named Sheka, Ossamo, and Uera, which he could not fall in with.—The inhabitants are represented by Perouse as the stoutest and the best-made they had seen in this quarter of the globe, their ordinary height being 5 ft. 9, 10, or 11 in. Their bodies, when Perouse visited them, were thickly tattooed and painted, so that they appeared to be dressed, though they wear nothing but an apron of palm-leaves, or of the Ti tree, round their loins, which reaches to their knees. Tattooing, however, appears to have gone out of fashion at the more recent period of Kotzebue's visit. Their complexion is a dark brown; their hair is black, straight, and very long, and frequently turned up all round the head so as to heighten the ferociousness of their countenances. Some colour their hair red, and wear it curled over their shoulders like a full-bottomed wig. They are extremely ferocious in their manners. The least dispute between them is followed by blows from clubs, sticks, or paddles; and almost all of them are covered with scars, the consequences of their quarrels. They use hatchets shaped like adzes, and made of a fine and compact basalt. With these they finish their carefully constructed canoes and works in wood, to which they give so high a polish that they appear to be coated with varnish. In addition to the produce of their fishing, the different species of bananas and other fruit trees, and nutritious roots, ensure subsistence to them, as well as to their hogs, dogs, and fowls. They manufacture a species of cloth which possesses great strength and pliability, and is well calculated for the sails of their canoes. Their canoes are very carefully constructed, and can paddle 6 or 7 m. an hour. Their houses are often built under fruit-trees

which preserve in them a refreshing coolness; or are placed on the borders of a rivulet. The principal aim of their architecture is to defend themselves from the heat; and they know how to combine this with elegance. The houses are surrounded with blinds, which are kept open on the side of the wind, and closed facing the sun; and they sleep on very fine clean mats perfectly secure against any damp. Hogs, dogs, fowls, pigeons, parrots, and fish, abound in these islands. The sugar-cane grows spontaneously on the banks of the rivers; but it is watery and less sweet than in the West Indies. These islands appear to be volcanic. All the stones on the beach—on which the sea breaks with such violence that the spray flies to the distance of more than 50 ft.—are fragments of lava, rounded basalt, or coral. There are no data to calculate the pop. of these islands; but it must be considerable, considering their size and fertility; some of them being among the largest and finest islands in the South sea.

NAVY-BAY, Naos-Harbour, or Limon-Bay, an inlet on the Atlantic coast of the dep. of Istmo, in New Granada. Its W point is Toro-point; its E, the N end of Manzanilla island, which is distant from Toro-point 2⅜ m. It extends inward nearly 4 m. S from the middle of its mouth. Its breadth is nearly equal. To the parallel of Point-Limon it is clean, with a depth of from 3¼ to 6½ fath. on sand and clay; from Point-Limon to the S it is shallow. It is open to winds from NE to NW, round by N. This bay has been adopted, in connexion with Manzanilla island, as the terminus, on the side of the Atlantic, of the Panama railway. The line is carried along piles of yellow pine driven in from 8 to 10 ft. water, to the island, which has an area of about 800 acres; and commodious wharves are being constructed upon it at which vessels in the bay may load and unload. The distance of this N terminus from Gatun is 7½ m.; to Gorgona, 29 m.; and from Gorgona to Panama, 20 m. See articles Chagres, Manzanilla, and Panama.

NAVY-BOARD INLET, a small bay on the S side of Lancaster sound, in N lat. 73° 44′, W long. 80° 56′, at which the North Star, which went out in May 1849, with provisions for Sir John Franklin's expedition, deposited her stores in August 1850.

NAWADA, a town of Hindostan, in the district and 20 m. S of Bahar.

NAWARGUNGE, a town of Hindostan, in the prov. of Oude, 38 m. NE of Lucknow.

NAWORTH-CASTLE, a township in the p. of Brampton, in Cumberland, 11 m. ENE of Carlisle. Pop. 466.

NAXOS, or Naxia, an island of European Turkey, in the Grecian archipelago, in N lat. 37° 0′, E long. 25° 31′, separated from Paros by a channel 6 m. wide. Its superficial extent is 170 sq. m., being the largest of the Cyclades. Its coast is bold and lofty. The hills are generally covered with arbutus, lentisks, and dwarf shrubs. Its pop., once estimated at 100,000, was in 1840, 19,912. These are mostly Greeks, but a few are of Italian descent, this island having long been in possession of the Venetians, and the residence of governors appointed by them over the neighbouring islands. N. is mountainous and rocky, but contains a great number of extensive and fertile valleys, and is by no means unproductive in fruit, wine, oil, cotton, silk, wheat, and barley; while the higher grounds afford pasture for cattle, or are employed as vineyards. The orange, lemon, fig, apricot, almond, mulberry, apple, pear, nut, quince, and olive, are grown. In the principal valley, that of Drymalia, which is about 30 m. in circuit, the chief object of agriculture is the olive. Emery is found in various places, mostly on the surface of the ground, and is the principal article of exportation. The Turks occasionally send a *cadi* to collect the taxes, amounting to about £1,000 a year; but the inhabitants preserve their ancient laws, and choose their own rulers. They occupy one small town, and a number of petty villages.—The town is picturesquely situated on a small bay on the S coast of the island. The upper or centre part, called the castle, is a collection of houses almost exclusively inhabited by ancient families, originally from Venice. Besides a convent, there is here a Capuchin and a Lazarist monastery. The Lazarists are Frenchmen, and have taught nearly all the male inhabitants of the island to speak French. On the land side of the town is a large plain covered with vineyards and barley and cotton fields. The celebrated fountain of Ariadne is still pointed out near the sea-side, and near it are the ruins of the temple of Bacchus. The pop. of the town is about 4,000.

NAY, a town of France, in the dep. of Basses-Pyrénées, 9 m. SSE of Pau. Pop. 3,028, who are employed in manufacturing serges, blankets, and other woollens.—Also a small river of France, which falls into the Charente, opposite to Cognac.

NAYEMU, a small town of Bondu, in Western Africa, 12 m. SW of Futteconda.

NAYLAND, a parish and village of Suffolk, 14 m. WSW of Ipswich. Area of p. 1,470 acres. Pop. in 1831, 1,047; in 1841, 1,114.

NAYO, a small island in the Eastern seas, near the N coast of Celebes, in N lat. 1° 24′.

NAZAIRE (Saint), a commune of France, in the dep. of the Aude, arrond. and 12 m. NW of Narbonne, and cant. of Ginestas, on the l. bank of the Aude. Pop. 669. The village of St. N. was formerly a fortified town. The environs afford excellent wine.—Also a com. in the dep. of the Charente-Inferieure, cant. and 7 m. NNW of St. Agnant, and 9 m. NNE of Marennes. Pop. 1,581.—Also a cant., com., and town of France, in the dep. of the Loire-Inferieure, and arrond. of Savenay. The cant. comprises 3 coms. Pop. in 1831, 10,424; in 1841, 10,971. The town is 15 m. WSW of Savenay, and 33 m. W of Nantes, on the r. bank of the estuary of the Loire. Pop. in 1841, 3,771. It has a custom-house, and a good harbour and roadstead. The latter, which consists of two parts, is defended by a mole of masonry 196 yds. in length, and is capable of containing a large number of vessels. This town furnishes the greater number of pilots employed in the navigation of the Loire.—Also a village in the dep. of the Isere, cant. and 9 m. NE of Grenoble. Pop. 400.

NAZAIRE (Saint), or Se'nary Beau-Port, a commune, town, and port of France, in the dep. of the Var, cant. of Ollioules, and 7 m. W of Toulon, on the roadstead of Brusq, and near the embouchure of the Rèpe. Pop. 2,774. The harbour, situated at the head of an extensive roadstead in which vessels of the largest size can find safe anchorage, is enclosed on the E and W by two moles, and is capable of receiving 50 vessels of 150 or 200 tons burthen. The quays have an extent of 612 yds., but are built without regularity.

NAZAIRE-EN-ROYANS (Saint), a commune of France, in the dep. of the Drome, and cant. of Bourg-du-Peage, 21 m. ENE of Valence, on the l. bank of the Bourne, near its confluence with the Isere. Pop. 1,022. It has a considerable trade in silk fabrics of local manufacture, and in timber, grain, and nuts. In the vicinity is an ancient castle, which has sustained several sieges, and a coal-mine.

NAZAIRE-LE-DESERT (Saint), a commune of France, in the dep. of the Drome, and cant. of La Mothe-Chalançon, and 15 m. S of Die, on the Roanne. Pop. 1,100.

NAZAR, a town of Spain, in the prov. of Navarra, partido and 11 m. W of Estella, on a hill. Pop. 212. It has a fine fountain.

NAZARETH, a department, commune, and market-town of Belgium, in the prov. of E. Flanders, and arrond. of Ghent. Pop. of dep. 5,420. The town is 8 m. SW of Ghent, on the railway to Brussels. Pop. 1,816.

NAZARETH, a hamlet of Naples, in the prov. of the Terra-di-Bari, near Barletta. Pop. 48. It contains a cathedral, and gives its name to a bishopric.

NAZARETH, a comarca of Brazil, in the prov. of Pernambuco. Its chief town is Nazareth-das-Matas.—Also a town in the prov. of Bahia, on the l. bank of the Jaguaripe, 30 m. W of San Salvador. Pop. 2,000.—Also a parish in the prov. of Minas-Geraes, and district of São-João-d'El-Rei.—Also a parish in the prov. of Para, on the l. bank of the Rio Negro.—Also a village about half-a-league NE of Belem.—Also a village in the prov. of Maranhão, on the l. bank of the Rio Mearim.—Also a village in the prov. of Piauhi, and district of Oeiras, on the Piauhi, near the confluence of the Canindé. In its vicinity is a lake, which also bears the same name.—Also a village in the prov. of Minas-Geraes, about 5 m. S of Paracatu.

NAZARETH, or Nassara, a town or rather village of Palestine, situated in a deep valley of the same name, in a cluster of white limestone hills, which "rise round it like the edge of a shell to guard it from intrusion" [*Richardson*], and separate it on the NW from the plain of Zabulon, and on the SW from that of Esdraelon. It contains about 250 houses, and 3,000 inhabitants, two-thirds of whom are Turks, and about one-third Christians. The streets are steep and narrow. On the W side of the town are overhanging precipices, which Tischendorf says made "a terrific impression" upon him. A Latin convent, containing about 14 friars of the Franciscan order, has its church—which is the finest in Syria after that of the Holy Sepulchre at Jerusalem—erected over a cave or grotto, of about 10 ft. either way, and forming a little chapel or recess, which is asserted to have been the residence of the Virgin Mary; but the Greek church does not recognise this as the true sanctuary. The Greek church is on the SE skirt of the town, at the foot of the hill. There is a mosque in the town, and a good khan. The most singular resort of the devout in N. is a stone termed *Mensa Christi*, which stands in a small chamber, also a chapel: the wall is hung round with certificates of the sacred nature of the relic, written in every language known throughout Christendom. It was upon this stone, tradition says, that our Lord and his disciples supped before and after his resurrection. It is recorded merely as a tradition of the Church, but procures for all who say in a proper spirit an Ave Maria or Pater Noster, 7 years' plenary indulgence. The clearest water is drawn from a fountain not very far from the town, to which nearly all the women seem to flock, called after the Virgin, from the belief that she used to draw water for her household from it. "Few of the venerated spots of Palestine are so sure of their identity as this well. It is now the only one of the city, and probably it was so more than 2,000 years ago." [*Tischendorf.*]

NAZARETH BAY, an indentation of the Gabun coast of Upper Guinea, enclosed on the W by Cape Lopez. It is about 36 m. in width from E to W, and 15 m. in depth. A river of the same name, the course of which is still unknown, flows into it on the SE.

NAZARETH-DA-CABO, a village of Brazil, in the prov. of Pernambuco, and district of Cabo-di-Santo-Antonio. It has a parish-church.

NAZARETH-DAS-MATAS, a village of Brazil, in the prov. of Pernambuco, and comarca of Nazareth, near a small river named Tracunhaen, and 56 m. NE of Recife. It has a parish-church.

NAZARO-DI-BURGONDI (Santo), a town of Sardinia, in the div. of Novara, and prov. of Lomellina, 14 m. SE of Mortara, and 20 m. NE of Alessandria.

NAZ-DESSOUS, a hamlet of France, in the dep. of the Ain, cant. and ¾ m. SE of Gex, and com. of Chevry. Pop. 87. The environs are noted for their wool, which is considered the finest in France.

NAZE, a Norwegian promontory, in N lat. 58°, W long. 7°.—Also a headland of Senegambia, 39 m. SE of Cape Verd, in N lat. 14° 30′, W long. 17° 10′.

NAZE, or Ness, a promontory on the coast of England, to the S of Harwich, in N lat. 51° 53′, W long. 1° 17′, enclosing some small islands, from which the land trends to the W, and forms the N shore of the river Thames.

NAZELLES, a commune of France, in the dep. of the Indre-et-Loire, and cant. of Amboise, 15 m. E of Tours. Pop. 1,107. It produces good wine.

NAZLU, or Nozli-Bazar, a town of Turkey in Asia, in Anatolia, sanj. and 17 m. E of Aïdin.

NAZLU, or Nozli-Buïuk, a town of Turkey in Asia, in Anatolia, and sanj. of Aïdin, 24 m. E of Guzel-Hissar, and near the r. bank of the Buïuk-Mendere. It contains several fine mosques, and the houses are generally regularly built. The environs are fertile, and are noted for their figs. Earthquakes are of frequent occurrence in the locality.

NAZUK, a lake of Turkey in Asia, in the E part of the pash. of Erzerum, near the NW extremity of Lake Van. It is about 9 m. in length, and discharges itself into the Murad-shaï. It is the *Arethusa* of the ancients. Its banks are bare and uninteresting.

NAZZARO (Santo), a village of Austria, in Lombardy, in the prov. and 24 m. NNE of Vicenza, district and 6 m. NNW of Bassano, on the l. bank of the Brenta.

NEAGH (Lough), a great lake in the centre of the eastern half of the Irish prov. of Ulster. It is nearly as large as the lake of Geneva; and is second in size to no other lake in Europe, except Lake Ladoga in Russia, and Lake Vener in Sweden. It extends from N to S between co. Antrim on the E, and cos. Tyrone and Londonderry on the W; its foot belongs to Antrim, its head to Armagh, and a tiny portion of its SE corner to Down. Its length, from S to N, is 14 m.; and from SW to NE respectively 16 m.; its breadth, from E to W, but exclusive of a contracted portion at its N extremity, is from 6 to 8½ m. The surface-elevation of the lake above low-water sea-level is 48 ft. The principal bays are Antrim-bay at the NE corner, Sandy-bay, and Bartin's-bay in the E, and Washing-bay in the SW. The islands are few and small, and all situated near the shores. The chief are Ram's island in Sandy-bay; Bird's island at the SE corner; Coney island in the SW, near the influx of the Blackwater river; and Skady island, and the Three islands, in the N. The principal streams which flow into Lough N. are the Maine river, and the Six-Mile-water into Antrim-bay; the Crumlin and the Glenavy rivulets into Sandy-bay; the Upper Bann river into the S; the Blackwater river into the SW; the Ballinderry rivulet into the W; and the Moyola rivulet into the NW. The whole of the superfluent waters are discharged northward from the NW corner by the Lower Bann river, which flows between Antrim and Londonderry, and across the NE corner of the latter county to the Atlantic. The depth of Lough N. in nearly all its central and its southern parts varies

from 39 to 42 ft.; its extreme depth occurs a little S of Skady island, and is 102 ft.; its depth over a few 'flats' or shoals in the central parts varies from 19 to 32 ft. Several good landing-places and ports occur in each great sweep of shore. The Lagan navigation or canal goes off from the SE corner to carry vessels down to the sea at Belfast; the Upper Bann river takes craft to the Newry canal, along which they are conveyed past Newry to the sea at Lough Carlingford; and the Blackwater communicates with both the short navigation to the Tyrone coal-field, and the new and long navigation by the Ulster canal to Upper Lough Erne. The waters of Lough Neagh usually attain a surface-elevation in winter about 7 ft. higher than that of summer; and they, in consequence, effect wide-spread inundations every season, —covering upwards of 50,000 acres of good land, and a vast aggregate of bog-lands and morasses. Fish of various kinds, particularly perch, trout, bream, and the dollachan or char, are abundant in this town.

NEALE, a village in the parish of Kilmolara, co. Mayo, 3 m. S of Ballinrobe. Area 6 acres. Pop. in 1841, 196.

NEAMOM, a Greek monastery of the Archipelago, in the central part of the island of Chio, and 9 m. W of the town of that name. It has a fine church, founded by Constantine the Great.

NEANT, a village of France, in the dep. of Morbihan, cant. and 6 m. SW of Mauron, and 7 m. NE of Ploërmel. Pop. 1,500.

NE-ARS-SU, a river of Eastern Africa, in the territory of Mozambique, which flows into the channel of that name near Moggur. Its estuary is narrow, and contains two islands. Hippopotami and alligators abound in its waters. Its upper course is still unknown.

NEAS. See Nias.

NEATH, a parish, port, and parliamentary borough, in the co. of Glamorgan, 7 m. NE of Swansea, on the navigable river Neath, and intersected by a canal extending from Cwm-Neath to Britton-ferry, by Aberdulais, where it unites with another to Swansea. Pop. of p. in 1801, 2,502; in 1831, 4,043; in 1841, 4,970.—The town is nearly confined to the E or l. bank of the river. Its streets are narrow, and lined with small houses. It was formerly contributory to Cardiff, &c., in returning a member to parliament; but is now contributory to the Swansea district of boroughs. Pop. of parl. borough in 1851, 5,841. The number of electors registered, in 1837, was 218; in 1847, 184. The revenue of the corporation, in 1850, was £2,172.—The exports from the port are coal, culm, copper, iron, fire-bricks, oak, timber, bark, &c.: the imports, black jack and general shop goods, copper and iron ore, corn, flour, and foreign timber. The port is at Britton-ferry, about 2¼ m. below the bridge of Neath, by the course of the stream. The canal from Cwm-Neath, up the valley of the Neath, runs past the town, on the l. bank of the river, to Britton-ferry. It is connected at Aberdulais, about 1½ m. above Neath, with the canal which runs down the r. bank of the river to Swansea. Vessels of from 300 to 400 tons can get up the river to the town, but the trade has been chiefly carried on by barge-communication between the town and ferry. There are here extensive copper and iron works, founderies, collieries, &c. The ruins of N.-castle are in the vicinity; and about 1 m. S of the town are the extensive remains of N. abbey.

NEATH, or Nedd, a river of Walls, formed by the union of several mountain-streams above or at Pont-Nedd-Fychan, and flowing in a SW course through the vale of Neath in Glamorganshire to Breton-ferry, where it enters Swansea-bay after a course of above 30 m.

NEAUPHLE-LE-CHATEAU, a commune and town of France, in the dep. of the Seine-et-Oise, cant. and 5 m. NE of Montfort-l'Amaury, and 24 m. W of Paris, on a woody hill. Pop. 1,015.

NEAVES, a township of Darke co., in the state of Ohio, U. S. Pop. in 1840, 645.

NEBEL, a river of the grand-duchy of Mecklenburg-Schwerin, which has its source in Lake Cramone; passes Gustrow; forms Lake Kracow; and falls into the Warnow at Butzow.

NEBIAS, a village of France, in the dep. of the Aude, cant. and 5 m. WNW of Quillan. Pop. 700.

NEBKA, or Nebk (En), a town of Syria, in the sanj. and 45 m. ENE of Damascus. Pop. about 5,000. It is supplied with excellent water.

NEBRA, a town of Prussia, in the prov. of Saxony, rgbz. of Merseburg, circle and 8 m. S of Querfurt, on the Unstrut. Pop. 1,746.

NEBRASKA, an unorganized territory of the United States, occupying the country between the Rocky mountains and the W frontier of the states of Iowa and Missouri, from the parallel of 43° on the N, to the frontiers of Texas and New Mexico on the S. Its area is estimated at 136,700 sq. m. It is watered by the Platte river, the Kansas, and the Arkansas, with their numerous affluents. Its surface presents an immense extent of prairie land on the E; on the W it rises gradually to the summit of the Rocky mountains. Its central portion is a barren and apparently irreclaimable waste, in which thousands have perished from fatigue, or by the hands of the Indians, while endeavouring to make their way to California and Oregon. The only settlements at present existing in this territory are the military post of Fort Leavenworth, and the Indian agency of Council-Bluffs.

NEBY-SAMWIL, a village of Turkey in Asia, in Syria, in the pash. of Damascus, 24 m. WNW of Jerusalem.

NECESSIDADES, or Santo-Antonio, a parish of Brazil, in the prov. and island of Santa-Catharina, to the N of Desterra. Pop. 3,000. The distillation of brandy, and the cultivation of sugar, mandioc, millet, flax, and pot herbs, are carried on here.

NECHANITZ, a town of Bohemia, in the circle of Bidschow, 7 m. E of Neu-Bidschow, and 11 m. WNW of Königgratz. Pop. 1,054.

NECHARA, a village of Beluchistan, 16 m. SE of Kelat.

NECHE. See Pori.

NECHERS, a village of France, in the dep. of the Puy-de-Dome, and cant. of Champeix, 6 m. NW of Issoire, on the Couse. Pop. 1,930. In the vicinity is an extensive bed of lava.

NECHES, a large river of Texas, which enters Sabine-bay about 18 m. N of the mouth of the Sabine. It is supposed to be navigable for small steamers upwards of 100 m. Its tributaries are Charles creek, 75 m. in length; Big Sandy creek, 35 m. in length; Alabama or Village creek, navigable for 70 m.; the Angelina, 170 m. in length; Ayish bayou, 75 m. in length; the Attoyac, 60 m. in length; Pine creek, 40 m. in length; and San-Pedro bayou, which joins the N. 60 m. above Pine creek, and to the mouth of which the main river is navigable during winter.

NECHI, a river of New Granada, which has its source in the dep. of Cundinamarca, in the prov. of Antioquia, near Yarimol; runs N; is joined by the Porce on the r.; enters the dep. of the Magdalena; and throws itself into the Cauca, on the r. bank, and after a total course of 180 m.

NECHTCHEROV, a town of Russia in Europe,

in the gov. and district and 27 m. SSE of Kiev, and 20 m. ESE of Vasilkov, on the r. bank of the Veta.

NECKAR, or NEKKER, a river of Germany, which has its source in Würtemberg, on the frontier of the grand-duchy of Baden, near the village of Schwenningen, in the circle and on the E side of the mountains of the Schwarzwald, at an alt. of 2,084 ft. above sea-level. Running N, it traverses the NW part of the principality of Hohenzollern-Sigmaringen; then bends NE, and returns into the circle of the Schwarzwald; intersects from N to S the circle to which it gives its name; flows thence into the grand-duchy of Baden; and, after a total course of 180 m., throws itself into the Rhine, on the r. bank, at Manheim. The principal towns which it waters are Rottweil, Oberndorf, Sulz, Horb, Rottenburg, Tübingen, Nürtingen, Esslingen, Kannstadt, Marbach, Heilbronn, Neckarsulm, Neckarelz, Eberbach, Neckargemund, and Heidelberg. Its principal affluents are, on the r., the Eyach, Rems, Sulm, Kocher, and Jaxt; and, on the l., the Enz. It is navigable to Kannstadt, the interruption in the navigation which formerly occurred in Heilbronn, having been overcome by means of the canal of Wilheim, constructed in 1821. —Also an administrative province and circle in the NW part of Würtemberg, comprising the bailiwicks of Baiknang, Besigheim, Böblingen, Brackenheim, Kannstadt, Esslingen, Heilbronn, Leonberg, Ludwigsburg, Marbach, Maulbronn, Neckarsulm, Stuttgart, Vaihingen, Warblingen, and Weinsberg. It has an area of 60·4 German sq. m., with a pop. in 1840 of 467,374, of whom 434,252 were Protestants, and 30,047 Catholics. In 1850, the pop. was returned at 504,872. This circle comprises the most fertile portion of the kingdom.

NECKARAN, a parish and village of the grand-duchy of Baden, in the circle of the Lower Rhine, and bail. of Swetzingen, 3 m. S of Mannheim, on an island of the Rhine. Pop. 1,631.

NECKAR-BISCHOFSHEIM. See BISCHOFSHEIM.

NECKAR-ELZ, a town of the grand-duchy of Baden, in the circle of the Lower Rhine, at the confluence of the Elzbach with the Neckar, 33 m. ESE of Mannheim, and 18 m. N of Heilbronn. Pop. 905. It has a custom-house. Agriculture forms the chief industry of the inhabitants.

NECKAR-GERACH, a village of the grand-duchy of Baden, in the circle of the Lower Rhine, on the r. bank of the Neckar, and NE of Aglasterhausen. Pop. 955. Agriculture forms the chief branch of local industry.

NECKAR-GMUND, an amt or bailiwick and town of the grand-duchy of Baden, in the circle of the Lower Rhine, 18 m. ESE of Mannheim, and 36 m. NNE of Carlsruhe, at the confluence of the Elsenz with the Neckar. Pop. 2,159. It has a custom-house, and manufactories of leather and of pottery, and building docks. Free-stone is quarried in the environs. Pop. of bail., 11,440.

NECKARHAUSEN, a village of the principality of Hohenzollern-Sigmaringen, on the Neckar, to the E of Glatt.

NECKAR-REMS, a village of Würtemberg, in the circle of the Neckar, 9 m. NNE of Stuttgard, at the confluence of the Rems with the Neckar. Pop. 813. It has a castle, noted in history, now in ruins, and has a timber depot.

NECKAR-STEINACH, a town of the grand-duchy of Hesse-Darmstadt, and prov. of Starkenburg, bail. and 5 m. SW of Hirschhorn, and 6 m. E of Heidelburg, on the r. bank of the Neckar. Pop. 1,521. It is enclosed by walls, has several tanneries, and carries on a considerable trade in wood. In the vicinity on the summits of hills are 4 castles.

NECKARSULM, an oberamt or bailiwick and town of Würtemberg, in the circle of the Neckar, 33 m. N of Stuttgard, at the confluence of the Sulm with the Neckar. Pop. 2,495, of whom, in 1840, 71 were Protestants, and 52 Jews. It has a castle, and possesses a manufactory of tobacco, several tanneries, and several gypsum works.

NECKARTENZLINGEN, a village of Würtemberg, in the circle of the Schwarzwald, at the confluence of the Erms with the Neckar. Pop. 940.

NECKARTHAILFINGEN, a market-town of Würtemberg, in the circle of the Schwarzwald, bail. and 4 m. SW of Nurtingen, on the l. bank of the Neckar, which is here crossed by a bridge. Pop. 980.

NECKARWEIHINGEN. See WEIHINGEN.

NECKAR-WIMMERSBACH, a market-town of the grand-duchy of Baden, in the circle of the Lower Rhine, on the Neckar. Pop. 425. Agriculture forms the chief employment of the inhabitants.

NECKAR-ZIMMERN, a village of the grand-duchy of Baden, in the circle of the Lower Rhine, on the Neckar, S of Mosbach. Pop. 661. It has a castle.

NECKENMARKT, NYEK, or LIEKENDROFF, a town of Hungary, in the comitat and 6 m. SSW of Oedenburg. Pop. 1,727.

NECKER. See NECKAR.

NECKER, an island of the North Pacific, to the NW of the Sandwich islands, in N lat. 23° 34′, and W long. 164° 32′. It was so named by Perouse, by whom it was discovered. It is only about two-thirds of a mile in length; and has an alt. of about 127 yds. above sea-level. It is destitute of trees, but is covered with excellent herbage.

NECTAIRE (SAINT), or SENECTERRE, a commune and town of France, in the dep. of the Puy-de-Dome, and cant. of Champeix, 21 m. W of Issoire. Pop. in 1841, 1,334. It is noted for its mineral springs, and for its cheese.

NECTON, a parish of Norfolk, 3½ m. ENE of Swaffham. Area 4,030 acres. Pop. in 1841, 991.

NECY, a village of France, in the dep. of the Orne, cant. and 8 m. W of Trun, and 8 m. NW of Argentan. Pop. 1,050.

NEDA, a river of Greece, in the Morea, an affluent of the bay of Arcadia.

NEDA (SAN-NICOLAS-DE), a town of Spain, in Galicia, in the prov. and 21 m. ENE of La Coruna.

NEDAY, a town of Burmah, in the prov. of Mranma, 21 m. NE of Pagahmmion, and 90 m. WSW of Ava, on the r. bank of the Irawady, a little below the confluence of the Kyen-duen.

NEDDAMUNGALUM, a town of Hindostan, in the presidency of Madras, prov. of the Carnatic, district and 22 m. SW of Tanjore. It contains several Hindu temples, and several choultries.

NEDDE, a commune of France, in the dep. of the Haute-Vienne, cant. and 5 m. ESE of Eymoutiers, and 32 m. ESE of Limoges, on the r. bank of the Vienne. Pop. 1,430.

NEDDIK, a district in the E part of Tripoli, to the E of the plain of Saltin.

NEDDOCK (CAPE), a headland of York co., in the state of Maine, U. S. It is a rocky bluff, and is inhabited by a few fishermen.

NEDELICZ, or NEDELISCHE, a town of Hungary, in the comitat of Salad, 9 m. ESE of Fridan, and 6 m. N of Warasdin, on the r. bank of the Ternova.

NEDENAES, a bailiwick of Norway, in the prov. of Christiansand, divided into the two fogderies of Osterrusöer and Arendal. Area 97 Swedish or 4,266 English sq. m. Pop. in 1845, 53,932. Its chief river is the Torreself. Its chief towns are Arendal, Grimstad, and Lillesund. See article NORWAY.

NEDERBOULAERE, a department and com-

mune of Belgium, in the prov. of East Flanders and arrond. of Audenarde. Pop. 423.

NEDERBOULAEREWYK, a commune of Belgium, in the prov. of East Flanders, and dep. of Onkerzele. Pop. 161.

NEDERBRAKEL, a department and commune of Belgium, in the prov. of East Flanders, and arrond. of Audenarde. Pop. 3,786.

NEDERHAGEN, a commune of Belgium, in the prov. of East Flanders and dep. of Essch-Saint-Lieven. Pop. 228.

NEDERHASSELT, a department and commune of Belgium, in the prov. of East Flanders, and arrond. of Audenarde. Pop. of dep. 1,289; of com. 406.

NEDERHEEMBEECK, a commune of Belgium, in the prov. of Brabant, and dep. of Nederover-Heembeeck. Pop. 397.

NEDERHEIM, a department and commune of Belgium, in the prov. of Liege and arrond. of Tongres. Pop. 396.

NEDERHOLBEKE, a commune of Belgium, in the prov. of East Flanders, and dep. of Etichove. Pop. 403.

NEDERLENAEME, a department and commune of Belgium, in the prov. of East Flanders, and arrond. of Audenarde, watered by the Scheldt. Pop. 544. It has manufactories of linen.

NEDERLIEDEKERKE, a commune of Belgium, in the prov. of Brabant, and dep. of Liedekerke. Pop. 695.

NEDEROCKERZEEL, a department and commune of Belgium, in the prov. of Brabant and arrond. of Brussels. Pop. 897.

NEDEROVERHEEMBEECK, a department and commune of Belgium, in the prov. of Brabant and arrond. of Brussels, intersected by the Senne, and by the canal from Brussels to the Ruppel. Pop. 876. It has a manufactory of animal black.

NEDER-STRAET, a commune of Belgium, in the prov. of East Flanders, and dep. of Appelterre-Eychem. Pop. 763.

NEDER-SWALM, a department and commune of Belgium, in the prov. of East Flanders and arrond. of Audenarde, watered by the Swalm. Pop. of dep. 295; of com. 244.

NEDERSWYNAERDE, a commune of Belgium, in the prov. of East Flanders, and dep. of Swynaerde or Zwynaerde. Pop. 487.

NEDERWEERSCHE-STRATE, a commune of Belgium, in the prov. of East Flanders, and dep. of Letterhautem. Pop. 183.

NEDERWYK, a commune of Belgium, in the prov. of East Flanders, and dep. of Ninove. Pop. 245.

NEDJERA, a village of Yemen, in Arabia, 14 m. NW of Sana.

NEDJERAN, a principality of Yemen, in Arabia, three days' journey ENE of Saade. It is well-watered, and abounds in corn, pasturage, and dates. It has a capital of the same name, which is often mentioned in Arabian history.

NEDJID, or NEDJD, an extensive division of Arabia, including nearly all the central parts of that region, and having the Aneizeh territory on the N; on the E, El-Ahhsa; on the S, the great desert of Roba'-el-Chaly; and the Hedjaz on the W. It is composed chiefly of mountains and deserts, and is peculiarly the *Arabia Deserta* of ancient geographers; many parts of it, however, are habitable, and traversed by numerous hordes of pastoral and nomadic race. The tract immediately bordering on Syria, inhabited by the Aneizeh Arabs, is flat and desert; but to the S rises a very extensive and lofty range of mountains, called the Toueyk mountains, running N and S, covered with forests, and maintaining a numerous pop. The Aftan, a river descending from this chain and flowing through the SE part of the prov. into the Persian gulf, is probably the chief river of the country. To the S of these, on the borders of Hadramaut and Oman, the country again becomes desert. The whole of this tract is almost a *Terra incognita*, the existence of which has been chiefly known by the swarms which have issued from it to conquer and lay waste the neighbouring countries. Even in the time of Mahomet, this region gave birth to the prophet Moseilama, who fixed his capital at Yemen, but proved unable to cope with his celebrated competitor. The Wahabis of modern times originated in this quarter of Arabia. Sheik Mahommed formed an alliance with Ebn Saoud, a brave and enterprising chief, who undertook to lead the armies of the confederacy, while the other was declared supreme pontiff. Under the command of Saoud, and of his successor Abdelaziz, the dominion of the Wahabis was extended to the holy cities of Mecca and Medina, and they even made incursions into Syria and Palestine, and threatened Egypt. N., as to internal government, is generally divided among a number of little chieftains, one of whom presides over almost every district and village. Its principal produce is fruit, particularly dates, wool, and ostrich-feathers. It also furnishes dromedaries and horses of an excellent breed. Its towns carry on a considerable trade by caravans with the countries on the coast. From the confines of the canton of Haurân to the banks of the Euphrates, the whole is one immense desolate plain called El-Hamad, the Al-dahna of Abulfeda and D'Anville, the scene of the wanderings of various Arab tribes. To the S of this plain, the caravans of Damascus, on leaving Esrak, follow for seven days the channel of a dry river, which leading SE brings them to Djof. After this there is another desert, behind which rises Mount-Shammar, the *Zametas* of Ptolemy, covered with trees and villages.—The *aglym* or districts appear to be El-Aflaq, El-Ared, El-Jebel, El-Haryq, El-Khardj, El-Wechem, El-Kassym, and Soudeyr; besides the 4 *wadis* or valleys of Chahran, Douacer, Subay, and Thalyth. It is said to be capable of furnishing 60,000 fighting men.

NEDJING, a parish of Suffolk, 4 m. NW of Hadleigh. Area 810 acres. Pop. 195.

NEDREMANNOI, a fortified post of Russia, in the Caucasus, 18 m. SW of Stavropol, on the r. bank of the Kuban.

NEDRIGAILOV, a town of Europe, in the gov. of Charkov, 27 m. NW of Lebedin. Pop. 3,800.

NEDWIEDITZ, a town of Moravia, in the circle and 15 m. NNW of Brunn, on the r. bank of the Schwarza. Pop. 696.

NEEDE, a village of Holland, in the prov. of Gelderland, 20 m. E of Zutphen. Pop. 2,600.

NEEDHAM, a parish of Norfolk, 2 m. SW of Harleston. Area 1,260 acres. Pop. 316.

NEEDHAM, a township of Norfolk co., Massachusetts, on the river Charles, 12 m. SW of Boston. Pop. 1,488.

NEEDHAM-MARKET, a town in the parish of Barking, Suffolk, situated on the river Orwell, 7 m. NNW of Ipswich. Pop. in 1841, 1,353.

NEEDHAM-POINT, a cape on the SW coast of Barbadoes, to the S of Carlisle bay, in N lat. 13° 5′.

NEEDLES, a cluster of pointed rocks, off the W end of the Isle of Wight. A lighthouse has been erected on the outmost cliff in the Isle of Wight, in N lat. 50° 39′, W long. 1° 33′, for the guidance of vessels passing between the N. and some smaller rocks lying to the N. called the Shingles. The passage is regarded as dangerous in foggy weather. The channel is very narrow; and the flood-tide, coming in westward, sets at angles with it.

NEEDWOOD-FOREST, a highly-cultivated district in Staffordshire, formerly appropriated to the chase by the kings of England, but now included in the parishes to which it was allotted in 1801 for enclosure; namely Hanbury, Tatenhill, Tutbury, and Yoxhall. Shaw, who wrote in 1798, says, "the whole forest does not contain less than 1,000 acres of oak-timber;" but nearly all the trees and underwood, except on the steep declivities, were uprooted at the time of the enclosure, and carried away as timber, or burnt upon the spot as charcoal or manure for the soil.

NEEKE, a commune of Belgium, in the prov. of E. Flanders, and dep. of Somergem. Pop. 815.

NEEKERSPOEL, a commune of Belgium, in the prov. of Antwerp, and dep. of Malines. Pop. 729.

NEELAB. See NILAB.

NEEMBUCU. See NIMBUCU.

NEEN-SAVAGE, a parish of Salop, 13 m. S by W of Bridgenorth. Area 1,370 acres. Pop. 490.

NEEN-SOLLARS, a parish in Salop, 10 m. E by S of Ludlow, on the W bank of the Rea. Area 1,370 acres. Pop. in 1831, 208; in 1841, 190.

NEENTON, a parish in Salop, 6½ m. SW of Bridgenorth, on the W bank of the Rea and near its source. Area 1,450 acres. Pop. in 1831, 120; in 1841, 144.

NEER, a village of Belgium, in the prov. of Limburg, 4 m. N of Ruremonde, at the influx of a small stream of the same name into the Meuse. Pop. 1,419.

NEERAUBEL, a commune of Belgium, in the prov. of Liege, and dep. of Aubel. Pop. 211.

NEERBEKE, a commune of Belgium, in the prov. of W. Flanders, and dep. of Bisseghem. Pop. 197.

NEERBUTSEL, a commune of Belgium, in the prov. of Brabant, and dep. of Roosbeek. Pop. 121.

NEERELBOUT, a commune of Belgium, in the prov. of W. Flanders, and dep. of Marche. Pop. 105.

NEERGLABEEK, a department and commune of Belgium, in the prov. of Limburg, and arrond. of Tongres. Pop. of dep. 121; of village, 73.

NEERHALFEN, a commune of Belgium, in the prov. of Brabant, and dep. of Ternath. Pop. 158.

NEERHAREN, a department and commune of Belgium, in the prov. of Limburg, and dep. of Tongres, watered by the Meuse. Pop. 401.

NEERHESPEN, a department and commune of Belgium, in the prov. of Liege, and arrond. of Huy, watered by the Ghète. Pop. 312.

NEERHEYLISSEN, a commune of Belgium, in the prov. of Brabant, and arrond. of Louvain, watered by the Little Gêthe. Pop. of dep. 1,266; of com. 887.

NEERHOEH, a commune of Belgium, in the prov. of West Flanders, and dep. of Ousselghem. Pop. 210.

NEERITTER, a commune and village of Belgium, in the prov. of Limburg, 20 m. N of Maestricht. Pop. 1,239.

NEERLAND, a commune of Belgium, in the prov. of Antwerp, and dep. of Wilryk. Pop. 166.

NEERLANDEN, a department and commune of Belgium, in the prov. of Liege. Pop. 314.

NEERLINTER, a department and commune of Belgium, in the prov. of Brabant, and dep. of Louvain. Pop. of dep. 1,832; of com. 380.

NEEROETEREN, a department and commune of Belgium, in the prov. of Limburg, and arrond. of Tongres. Pop. of dep. 1,231; of village, 740.

NEERPELT, a department and commune of Belgium, in the prov. of Limburg, and arrond. of Hasselt, watered by the Dommel. Pop. of dep. 1,131; of com. 161.

NEERREPEN, a department and commune of Belgium, and arrond. of Tongres. Pop. of dep. 192; of com. 140.

NEERSTRAETE, a commune of Belgium, in the prov. of East Flanders, and dep. of Laethem-Saint-Martin. Pop. 387.

NEERVELP, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Louvain. Pop. 336.

NEERVEN-ET-HEGT, a commune of Belgium, in the prov. of Antwerp, and dep. of Loenhout. Pop. 271.

NEERWINDEN, a village of Belgium, in S. Brabant, 16 m. E of Louvain. Pop. 291. Near this village Marshal Luxemburg obtained a victory over William III. of England in 1693; and on 18th March 1793, Dumourier was defeated here by the Austrians under the prince of Saxe-Coburg.

NEERWINDEN, a department and commune of Belgium, in the prov. of Liege, and arrond. of Huy. Pop. 328.

NEERYSSCHE, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Louvain, watered by the Yssche. Pop. of dep. 1,118; of com. 522.

NEFERN, or NEVERN, a parish in Pembrokeshire, 2 m. NE of Newport. Pop. in 1841, 1,625.

NEFFIER, a commune and village of France, in the dep. of Herault, cant. of Roujan, 18 m. NNE of Beziers. Pop. 1,036.

NEFSEI, a commune of Belgium, in the prov. of Namur, and dep. of Biesme. Pop. 125.

NEFTA, or NEFT, a small town in the S part of the kingdom of Tunis, where it borders on the desert, 60 m. S of Gafsa, on the W side of a large lake.

NEFTENBACH, a parish and village of Switzerland, in the cant. of Zurich, on the r. bank of the Töso, opposite Pfangen. Pop. 1,267. There are extensive dye-works here, celebrated for their productions of Turkey-red.

NEFYN, or NEVIN, a parish and market-town in Carnarvonshire, 5 m. NW by W of Pwllheli. Pop. in 1801, 1,028; in 1831, 1,726; in 1841, 1,656. It is contributory to Carnarvon in returning a member to parliament. The small harbour of Porth-yr-Lleyn, near N., is supposed to have been used by the Romans.

NEGADA. See ANEGADA.

NEGAPATAM, a seaport of the south of India, in the district of Tanjore, formerly the capital of the Dutch possessions on the coast of Coromandel. It is well-fortified, and has a regular citadel with wet ditches. The town lies on the N side of the citadel, near the mouth of a river capable of receiving small vessels. N. was originally fortified by the Portuguese; but was taken from them by the Dutch in 1660, who strengthened its fortifications, erected public offices, and established a mint here. Towards the close of the year 1781, it was captured by the British; and at the ratification of the peace in 1783 was formally ceded to them, since which period its fortifications have been neglected, and the trade transferred to other places.

NEGARA, a town of the island of Borneo, cap. of the kingdom of Banjarmassim, situated on the E side of a large river, 100 m. from the sea, and 60 m. N of the town of Banjarmassim.

NEGELSTADT, a small town of Prussian Saxony, in Thuringia, 10 m. SE of Muhlhausen. Pop. 800.

NEGOMBO, a town on the W coast of the island of Ceylon, 24 m. by road N of Colombo. It is advantageously situated for carrying on the coasting and inland trade, particularly with Colombo, by a branch of the Muli-Waddie river. It has a small fort, and ranges of buildings for cinnamon store-houses and barracks. The vicinity produces cinnamon and rice; the gardens are well-stocked

with roots and vegetables; and fish, kid, poultry, and eggs, are forwarded from this place to the cap.

NEGRA (Punta), a headland on the coast of Brazil, to the SE of Natal, in S lat. 5° 26′.—Also a headland on the coast of Monte-Video, to the W of Maldinado, in S lat. 34° 55′.

NEGRA (Sierra), a ridge of mountains rising on the mutual frontier of the Spanish prov. of Zamora, and the Portuguese prov. of Tras-os-Montes, and connected with the Sierra-Segundera.

NEGRAIS, a small island, with an excellent harbour, at the W mouth of the Irawaddy river. The SW point of the island, called Cape Negrais, in N lat. 16° 1′, E long. 94° 12′, marks the S extremity of the Burmese dominions. In 1757, Alompra, the Birman emperor, ceded this island to the English. The place was in consequence taken formal possession of, and a factory erected; but in 1759, some disputes having taken place between the Birman governor of Bassein and the English resident, the place was suddenly attacked, and all the British who could not effect their escape were put to death.

NEGRAR, a small town of Austrian Italy, in the deleg. of Verona, on a hill near the Adige, 6 m. N of Verona. Pop. 3,475.

NEGRATAO (Cape), a cape on the W coast of Virginia, in N lat. 40° 40′.

NEGREPELISSE, a town of France, in the dep. of Tarn-et-Garonne, on the river Aveyron, 8 m. NE of Montauban. Pop. 1,224. It has manufactures of coarse fustians.

NEGREPONT. See Negropont.

NEGRET, a village of France, dep. of Charente. Pop. 1,000.

NEGREVILLE, a village of France, in the dep. of La Manche, 2 m. W of Valognes.

NEGRIL (North and South), two remarkable points, 8 m. apart, at the W extremity of the island of Jamaica, forming, in the intermediate space, a semicircular bay called Ling bay.

NEGRILLOS, a cluster of small islands in the Pacific ocean, near the coast of Peru, in S lat. 4° 40′. —There are also some rocky isles of the same name in the gulf of Mexico.

NEGRO (Cape), a cape on the E coast of Africa, in S lat. 15° 40′ 7″, E long. 11° 53′ 3″, formed by a precipitous mass rising at the extremity of a low projecting point.—Also a cape on the E coast of Minorca, in N lat. 39° 53′.—Also a cape on the W coast of Corsica, in N lat. 41° 45′.—Also a cape on the W coast of Terra-del-Fuego, in S lat. 52° 56′, W long. 70° 49′.

NEGRO (Rio), a large and navigable river of South America, which has its rise in the Sierra Tuanhoy, an insulated group of low elevations in the Llanos, in New Granada, under the parallel of 2° 30′ N; runs E into the dep. of Maturin; then turns S and enters the Brazilian prov. of Para; and after a long ESE course, during which it collects the tribute of numerous inferior streams, falls into the Amazons, near Fortaleze-da-Barra, on the l. bank, in S lat. 2° 30′, W long. 74°, after a course of above 1,200 m. Its width at its mouth is at least 3,600 paces, with a depth of from 18 to 19 fath. Its principal affluents are the Cassiquiari and the Rio Branco on the r.; and the Ucayari and Unini on the l. The important fact of the communication of this river with the Cassiquiari, a tributary of the Orinoco, after being long doubted, and confidently contradicted by some of the Portuguese missionaries, was established by M. Humboldt, who, ascending the Orinoco, made his way into the Cassiquiari, and from thence into the Rio Negro. All doubts were thus completely set at rest as to the communication between the great rivers the Amazons and the Orinoco. See article Amazon. It is said to derive its name from its dark brown or nearly black waters.

NEGRO (Rio), or Cusu Leubu, a large river of S. America, which has its rise in the E declivity of the Chilian Andes, in the Encarnacion and the Catapuliche, which unite in about S lat. 40° 8′, W long. 70° 53′. It flows across the continent in an ENE and then a SE direction, and falls into the Atlantic ocean in S lat. 41° 3′, a little below the settlement of Carmero. A great part of its course is through an arid sandy country, bare of vegetation.—Also a large river of Monte-Video, which descending from the W flank of the Cochilla-Grande-de-los-Tapes, runs SW, and joins the Uruguay.—Also a river of New Granada, in the prov. of Tunja, which enters the Magdalena.—Also a river of New Granada, in the prov. of Ubaque, which rises near Santa-Fe, and enters the Meta after a course of 75 m.—Also a river of Buenos Ayres, in the prov. of Tucuman, which runs E and enters the Vermejo.—Also a river of New Granada, in the prov. of Maracaibo, which enters the lake of that name.—Also a river of Peru, in the prov. of Chachapoyas, which enters the Mayobamba. — There are several other inconsiderable streams of this name in S. America.

NEGROES, a race or variety of the human species deriving their name from one of their most striking characteristics, their black colour; called, also, the Ethiopic race. Their native region seems to be the central portion of Africa, though some tribes of the N. variety have been found in America and the South Sea islands. The Negro formation prevails in W. Africa in the region of the Gambia and Senegal; extending southwards, is most strongly marked in Guinea, and passes gradually over into the Caffre and Hottentot formation. In Eastern Africa, it commences to the S of Abyssinia; prevails in Zanguebar and Monomotapa, though not in general pure. Of the tribes in the more central part of Africa little is known. Dr. Latham says, "the true Negro area,—the area occupied by men of the black skin, thick lip, depressed nose, and woolly hair, is exceedingly small; as small in proportion to the rest of the continent as the area of the district of the stunted Hyperboreans is in Asia, or that of the Laps in Europe. Without going so far as to maintain that a dark complexion is the exception rather than the rule in Africa, it may safely be said that the hue of the Arab, the Indian, and the Australian is the prevalent colour. To realize this we may ask, what are the true N. districts of Africa, and what those other than Negro? To the former belong the valleys of the Senegal, the Gambia, the Niger, and the intermediate rivers of the coast, parts of Sudania, and parts about Sennaar, Kordofan, and Darfûr; to the latter, the whole coast of the Mediterranean, the Desert, the whole of the Kaffre and Hottentot areas south of the line, Abyssinia, and the middle and lower Nile. This leaves but little for the typical N." The heat of the climate, in all these regions, may have some effect upon the tint of the skin, but is by no means the only or the principal cause of the black colour, since, under the same climates of the torrid zone there are found all shades of complexion. White men in Africa only become somewhat swarthier, but never black, even in a succession of generations, unless they intermingle with the N.; and blacks, in other regions and climates, are not found to lose their native hue. The seat of the black colour is the *rete mucosum*, and the external surface of the true skin. When the *rete mucosum* is destroyed, as by disease, &c. (see Albinos), the colour is lost: while in parts of the body where the epidermis is unusually thick—the palms of the hand and the soles of the feet—it is of a lighter shade. N. are also distinguished from the other races by other external, and by some anatomical peculiarities, particularly in the conformation of the cranium. The projection of the whole visage in advance of the forehead; the prolongation of the upper and lower jaws; the small facial angle; the flatness of the forehead, and of the hinder part of the head, and the compression in the direction of the temples, allowing less space for the brain than in some other varieties; the woolly, frizzled hair; the short, broad and flat nose; the thick, projecting lips, with many other peculiarities of formation, constitute some of the characteristics of the Negro or Ethiopic race. The African tribes of this variety have, in general, elevated themselves so far above the simple state of nature, as to have reduced the lower animals to subjection, constructed settled habitations, practised a rude agriculture, and manufactured some articles of clothing or ornament. In political institutions they have made no advance, their governments being simple despotisms, without any regular organization. Their religion is merely the instinctive expression of the religious feeling, in its lowest form of fetichism. Their languages are described as extremely rude and imperfect; almost destitute of construction, and incapable of expressing abstractions. They have no art of conveying thoughts or events by writing, not even by the simplest symbolical characters. The N. character, if inferior in intellectual vigour, is marked by a warmth of social af-

NEGROPONT.

A. Fullarton & Co. London & Edinburgh.

fections, and a kindness and tenderness of feeling, which even the atrocities of foreign oppression have not been able to stifle. All travellers concur in describing the N. as mild, amiable, simple, hospitable, unsuspecting and faithful. They are passionately fond of music, and express their hopes and fears in extemporary effusions of song. "The Negro," says Malte Brun, "amidst all varieties of colour and conformation, seldom labours under bodily defects. His health is kept up by a simple style of living, by exercise and perspiration; among some Negro nations, if not all, infants born with any defect are destroyed. The N. do not seem to have inherited the privilege of the ancient Macrobians: the length of their lives, at least at Senegambia and at Sierra Leone, is not equal to ours. Instances of longevity are very common among the N. transported to the colonies, which must belong to some tribes more favoured by nature. Fevers, diarrhœa, smallpox, leprosy, a variety of syphilis called the *pian*, and the Guinea-worm, are the most common scourges of the life of the N. The thin beard of the N. partakes of the woolly character of their hair, yet in pruriency of temperament, vigour of constitution, and fecundity of population, they excel all other races of mankind; and polygamy is carried to greater excess among them than in any other part of the world. There are some nations which give their teeth a pointed form by filing: but Isert asserts that he has seen some N. whose teeth were naturally so formed Some among them boast of being cannibals, and to prove the fact, will bite off a piece of flesh from the arm of a bystander. The practice of making incisions in the skin prevails, in various forms and degrees, among all the N. nations which have preserved their primitive character. The Mandingoes have vertical cuts over their whole body; the same mark is found among the Akras, the Watiehs, the Tambus, the Mokkos, and the Eyéos of Guinea, and among the inhabitants of Bornoo, Darfur, and Mobba. The situation and number of these incisions vary. The people of Darfur are marked in the face and the back, those of Mobba in the neck. The Mokkos mark their bodies on the stomach with figures of trees and foliage; the Calabars mark their foreheads with cuts in a horizontal direction, the Sokkos with two crossed lines; the Subaloas cover the cheeks and the whole body with curved lines crossing one another. The Mangrees mark themselves under the eyes with a figure resembling the letter V inverted. Some tribes near Sierra Leone have the art of making their skin rise in elevated marks like basso relievos." See articles Africa, and Nigritia.

NEGROLAND. See Nigritia.

NEGROPONT, Egripo, or Egribos, the ancient *Eubœa*, a long and narrow island of Greece, extending between the parallels of 37° 57′ and 39° 3′, along the E coast of Livadia, from which it is separated by a narrow channel, called the strait of Euripus, remarkable for the irregularities of its tides. The island, which is connected with the continent by a bridge, is one of the largest in Greece, containing a pop. of about 44,000, of whom more than three-fourths are Greeks. Its surface is covered with mountains, which are highest towards the centre of the island, and present regions as wild and romantic as any on the continent of Greece. They are in general barren, and their tops are covered with snow during a part of the year; but the valleys and plains, especially towards the N shores of the island, are highly productive. The most important streams are the Kumi which flows towards the E coast, and the Mestesona which flows SE. Corn, wine, fruit, cotton, and oil are cultivated. The pasturages of the island have been in repute since the time of the ancients. Of mineral productions the chief are marble and copper. The island has several commodious harbours.

Negropont, the ancient *Chalcis*, the capital of the above island, is situated on the W coast, and is connected with the continent by a stone-bridge across the strait at this place. Hence the name *Euripoponte*, pronounced *Evriponte*, and corrupted by the Venetians into *Negropont*. This bridge is divided into two unequal parts by a castellated tower. Its length between the mainland and the tower is 70 ft., while a drawbridge of about half that width spans the narrowest and deepest part of the Euripus. The depth of the channel under the drawbridge does not exceed 8 or 9 ft. Its navigation is difficult, as the waters flow through it with "the rush and roar of a mountain-torrent," or with "as much rapidity as the tide at London-bridge." On each side of this narrow channel, the Euripus swells into considerable breadth. Towards the S, the shores appear to form a basin of 4 or 5 m. diam. The N part of the channel spreads uninterruptedly to the breadth of 8 or 10 m. The town is fortified, and has on its S side a port, corresponding to the ancient *Aulis*, capable of containing several hundred vessels in safety. A flotilla of Turkish galleys was generally stationed here, while the island was under Turkish sway. On the N side of the town, the port is not so secure. The suburbs are separated from the town by a deep ditch, and are inhabited by Greeks. The pop. of the town proper, partly Turkish, amounts in all to about 16,000. The Capudan pasha, to whose government the whole island belonged, had here a palace in which he commonly resided; but the towers and kiosks of the Turks are nearly all in ruins. The town was taken by the Turks by assault in 1462; and was besieged, though without success, by the Venetians in 1688.

NEGROS, or Buglas, one of the Philippine islands, situated due S of Luconia. It is about 145 m. long, by 25 m. in average breadth. It seems to be generally mountainous; but is fruitful in rice. This island was so named by the Spaniards, from the Papuan or Oriental negroes by which it was almost entirely inhabited, when it was discovered by the Spaniards. The mountains are still inhabited by this race, who live in a state of savage independence. The pop. subject to Spanish government was returned in 1837 at 35,622.

NEGUERUELA, a village of Spain, in the prov. and 24 m. W of Logrono.

NEHAVEND, or Nehanud, a town of Persia, in the prov. of Irak, 55 m. S of Hamadan, celebrated for a battle fought between the Saracens and Persians, in the year 638, when the former being completely victorious, overthrew the Sassanian dynasty, and established themselves on the throne of Persia.

NEHEIM, a town of Prussian Westphalia, 10 m. NNW of Arensberg, at the confluence of the Mône and the Ruhr. Pop. 1,970.

NEHESDORF, a village of Prussia, in the reg. of Frankfort, circle of Luckau. Pop. 530.

NEHOGATOOANNAH, a river of the United States, which runs into the Mississippi, in N lat. 44° 24′.

NE'HOU, a village of France, in the dep. of Manche, 6 m. SW of Valognes. Pop. 2,400.

NEHRUNG. See Curische-Haff and Frische-Haff.

NEHRWALLEH, Nehrwalla, or Anhulwara, a very ancient city of Hindostan, the ancient cap. of Western India, the long-disputed position of which Major Todd fixes in the immediate neighbourhood of the modern Puttan or Patana-soma-natha, near the S extremity of the peninsula of Gujerat. Anhulwara, though not itself a sea-port, was the Tyre of ancient India. "The contiguous countries of Gujerashtra [*vulgò* Guzzerat] and Saurashtra [the region of the Gujers and Sauras], formed," says Major Todd, "the nucleus of the Balhara sovereignty, and in one or other, according to political contingencies, was placed the metropolis." The first dynasty of the Surya race of princes had Dhauk or Moongy-puttun as their residence. Thence they founded Balabhi. On the destruction of this city in the 5th cent., by an irruption of Parthians, Getes, Huns, or Catti, "this branch fled eastward, eventually obtaining Cheetore, when the isle of Deo and Somnath-Puttun, in the division termed Larica, became the seat of government. On its destruction, in the middle of the 8th cent., Anhulwarra became the metropolis; and this, as recorded, endured until the 14th, when the title of Bal-ca-rae became extinct. To the author of the *Periplus* we are indebted for the first notice of the

commercial greatness of these princes, in whose territory he resided, viz. at Barygaza, correctly Brigugocha, the modern Berwuch, or, anglicised, Baroach, which was still one of the 'eighty-four ports,' when the metropolis was removed to Anhulwarra. From the days of Arrian in the 2d, to the founder of Anhulwarra in the 8th, and to the time of the last of the second dynasty in the 10th cent., notwithstanding its inland position, the commerce he describes appears not to have languished; the same products enumerated by the Grecian agent in the second, continued to crowd the 'eighty-four bazars' of this grand mart in the 8th and 12th cents. Her position on the Sarasvati, at a point equidistant from the ports in the gulfs of Cutch and Cambay, threw into her lap all the products of Africa, Egypt, and Arabia. Her chief port, Gujna or Cambayet, was not above 100 m. distant, and that of Mandvie little more." To attest the former splendour of this great emporium, four architectural relics are alone left. "The sceptic in Scriptural prophecies should repair to the once proud metropolis of the Balharras. He would there just see sufficient of this once magnificent city, with its 84 squares and 84 bazaars, to mark the facility with which capitals are raised and overthrown. He would discern but one vestige of the lofty circumvallation which enclosed the palace of its Cæsars; of the rest, like the walls of Babylon, there is not one stone left upon another. When desertion commences in the East, there is soon nothing remaining but sacred edifices, and the *baories*, or reservoirs of water."

NEIBA, or Neiva, a bay on the S coast of the island of Hayti, between that of Ocoa and of Petit-Trou, in N lat. 18° 16′, W long. 70° 28′. It receives a river of the same name, which rises in the central mountains of the island, and runs W and S through a beautiful valley of the same name.

NEIBSHEIM, a village of Baden, 14 m. E by N of Carlsruhe. Pop. 900.

NEIDENAU, a town of Baden, on the Jaxt, 11 m. N by E of Heilbronn. Pop. 1,150.

NEIDENBURG, a town of E. Prussia, in the gov. and 24 m. S of Königsberg, on the Neide, an affluent of the Soldau. Pop. 2,742.

NEIDLINGEN, a town of Würtemberg, 9 m. SE of Kirchheim. Pop. 880.

NEILA, a town of Spain, in the prov. and 40 m. SE of Burgos. Pop. 750.

NEILGHERRIES, Neilgherry Hills, Neelgherries, or Blue Mountains, a range of mountains in the south of India, between the 11th and 12th parallels of N lat., and the 76th and 77th meridians of E long., at the point where the Eastern and Western Ghauts unite, and on the confines of the provs. of Coimbatore and Malabar. They form a trapezoidal-shaped mass of about 650 sq. m. in area, joined to the table-land of Mysore by a narrow neck on the N, but completely isolated on every other side, and rising abruptly from the plain to a height of from 5,000 to 7,000 ft. Their greatest length is, from SW to NE, 43 m., at a medium elevation of 5,000 ft. Their medium breadth, at the same height, is a little under 15 ft. Their highest point, Dodabet, or Dodabetta, has an alt. of 8,760 ft. above sea-level. They are 40 m. distant from the Malabar coast, and 230 m. from that of Coromandel. They are composed of three ranges or groups of hills densely crowded together. The range to the W is called in its N part the Neddimulla hills; in its S, the Kundahs. The central or principal range is a continuous chain rising gradually to the culminating point of Dodabet, and forms the separating line between the NE and SW monsoons. The E division has been distinguished as the Kotagherry range. The following table of heights in the Neilgherries is from Dr. Baikie's work entitled *Observations on the Neilgherries*. [Calcutta, 1834, 8vo.]:

Dodabet range.	
Dodabetta,	8,760 ft.
Davursolabetta,	8,380
Bevoybetta,	8,488
Koondamoya,	7,816
Hokulbetta,	7,267
Tamburbetta,	7,292
Ootacamund,	7,361
Do.,	7,416
Coonoor,	5,886
Kundah range.	
Moorkoortee peak,	8,402
Koondah peak,	8,353
Kudiakad (Saddle-back, Avalanche Hill),	8,502
Davebetta (Sugar-loaf Hill),	6,571
Kotagherry range.	
Kodanad,	6,815
Koondabetta,	6,555
Oorbetta,	6,915
Kotagherry,	6,571
Dimhutty,	6,330
Low Country, adjoining	
Meetapollium,	942
Sreemogah bungalow,	949
Coimbatoor palace,	1,483
Danaikencottah fort,	1,066

"The base of the hills," says Dr. Baikie, "is completely surrounded by a belt of dense jungle of various breadth, and rising in general to the height of from 2,500 to 3,500 ft. on their declivities. The line of demarcation is very strongly marked, there being generally an open space from 1½ to 2 m. wide nearly destitute of trees all the way round. Above this space the character of the vegetation is completely changed, and the forests assume the appearance of woods in temperate climates, besides being nearly destitute of underwood. The breadth of the belt of jungle is very various; it is however nowhere greater than 20 m., and in many places it does not exceed 6 m., as at Matepollium, where it is crossed by the great road to Utacamund by the Kunur pass. The surface of the table-land on the summit of the hills is much undulated, and presents various characteristics in the different divisions. The only circumstance common to the whole is the occurrence of swamps, of various extent, in the valleys formed by the undulations. The soil in these swamps is of considerable depth and very rich; in some it approaches to the nature of peat bog. The vegetation on the surface, however, is generally luxuriant; and they are always traversed by a stream of water, which after percolating through them issues forth as clear, pure, and as fit for use as if just taken from the spring. Nothing like miasm or exhalation exists in or near these swamps; as a proof of which *todermunds* or villages are frequently found in their immediate vicinity; and the nature of the vegetation is entirely different from that which characterises swamps in the low country. The Kundahs towards the W. or Malabar side rise very suddenly from the plains below, and terminate in immense rocky precipices, presenting some of the grandest and most romantic scenery to be found in the world. This is particularly remarkable at the junction of the Nedimulla hills with the range of the Kundahs properly so called. The outline of the summits forms an immense circular basin, bordered with precipices, everywhere perpendicular, in many places overhanging, and of such a height that a stone dropped from the edge will in many places descend at least 5,000 ft. at one bound before reaching the bottom, the crests of the rocks being at the same time broken into the most irregular and fantastic forms. A minute examination of the whole of this line presents only one accessible point, the site of the new Kundah pass. The table-land above is broken into a

Painted by T. Cresw[illegible] Engraved by J. W. Archer

KOONGR FALLS, NEILGHERRI MOUNTAINS.

A. Fullarton & Co. London & Edinburgh

number of long rounded ridges, with deep narrow valleys interposed, and richly wooded in the more sheltered spots. A striking peculiarity of these woods, common in fact to the whole hills, is their being nearly destitute of underwood, and having their borders so well defined as to resemble the ornamental plantations of a gentleman's park; so complete is the resemblance, so artificially are they disposed, and so perfect is the keeping of the scenery, that in many parts one is tempted to look round for the castle or seat to which they belong. The soil is also exceedingly rich, and covered with a short close green sward, which is maintained in a constant state of verdure by the abundant supply of moisture. The Bowany river takes its rise in the Kundahs, flowing through a deep fissure till it reaches the SW angle of the range, when it makes a sudden turn to the E. It is joined by a great number of tributary streams, each of the lateral valleys having its own brook of beautifully limpid water. Several of these rise within a few feet of the edge of the precipice, bordering the hills on the W; but with scarce an exception, all flow to the E. The edge of the Kundahs towards Ootacamund is broken into a number of valleys nearly filled with wood and interspersed with patches of verdure."—It appears from Dr. Baikie's observations that the mean annual temperature of Utacamund is 58°·68′; the greatest annual range, 39°; the maximum being 77°, and the minimum 38°. The mean annual range is 16°·84′, and the mean daily range 17°·01′. The maximum power of the sun's rays is equivalent to 21°·73′. The quantity of rain that falls, on an average of four years, is 44·88 inches; the number of days in a year in which there is heavy rain, 19; of showery rain or drizzle with fair intervals, 81; cloudy, 28; and of days perfectly fair and dry, 238. The mean temperature of Kotagherry and Dimhutty is rather more than 3° higher than that of Utacamund; that of Kunur, probably 6° warmer. Less rain falls at either of these places than at Utacamund; and it is generally dry at both when it rains at Utacamund, from their being affected by different monsoons.—The following are the travelling distances from the principal points in the Madras territory: From Madras *via* Trichinopoly 393 m., *via* Salem 332 m., *via* Bangalore 385 m.; from Trichinopoly 153 m.; from Bangalore 176 m.; from Calicut 156 m.; from Tellicherry (Cannanore) 130 m.

The N. are inhabited by three distinct races, who regard themselves as the aboriginal possessors of the soil, the Kotas, the Burgas, and the Thodas. Of these the Burgas are the most numerous class. They are an industrious race, and the cultivators of the soil. The Thodas are a well-developed muscular race, with handsome Roman features, and a fine clear brown complexion. The Kotas, forming about a tenth part of the whole, are a degraded race of low intellect. The soil of the N. is naturally productive, and is susceptible of the highest cultivation; especially in the lowlands, where the Burgas raise luxuriant crops, without more labour than is necessary just to scratch up the surface so as to cover the seed; neither tilling nor dressing is bestowed upon the land, yet the harvest is plentiful; and neither frost, nor snow, nor deluge, nor drought, are known to come unseasonably, to interfere with the regular operations of the husbandman. Wheat, barley, oats, small pulse, and potatoes, have been grown with abundant success in the neighbourhood of Utacamund; and despite the earnest assurances of the Burgas, that the sacred mountains would return no produce to any but the devout worshippers of the divine Ram, it has been discovered that the presiding genius is in truth unusually bountiful in repaying the toil of European cultivators.

NEILSTON, a parish and village of Renfrewshire, 5 m. S of Paisley. Pop. of p. 10,577; of v. 1,497, chiefly engaged in cotton-works.

NEIPPERG, a village of Würtemberg, 3 m. N of Brackenheim. Pop. 450. It gives title to the counts of Neipperg.

NEIRA, or Banda-Neira, one of the Banda islands, immediately N of Great Banda, and separated from Gonong-Api on the W by a narrow strait. It is about 2¼ m. in length, and ¾ m. where broadest. It is defended by two forts. The SW extremity is inhabited by Chinese and native fishermen. See Banda Isles.

NEISAPUR. See Nishapur.

NEISSE, an ancient principality of Silesia, long governed by the bishop of Breslau. Part of it lies in Austrian Silesia, and has now lost the name of Neisse, being incorporated into the circle of Troppau. The Prussian part is included in the gov. of Oppeln. Its area is 550 sq. m.

NEISSE, a town of Prussian Silesia, in the gov. and 30 m. S of Oppeln, on the river Neisse, the cap. of the above principality, and one of the chief fortresses of the Prussian states. It is a neat and clean town, containing a splendid mansion belonging to the bishop, a collegiate church, and seven other churches, a monastery and convent belonging to the Catholics, and a Lutheran church and school. Pop. in 1846, 16,225. The chief employments are brewing, weaving of woollen, linen, ribbons, and stockings, and yarn-spinning. In the neighbourhood are quarries of excellent stone. N. was taken by the Prussians under Frederick II. in 1741.—Also a river of Germany, which rises near Reichenberg, in Bohemia, in the circle of Bunzlau; enters Lusatia above Zittau; becomes navigable at Guben; and afterwards falls into the Oder, on the l. bank, after a course of 115 m., in which it is joined by a smaller stream called the Black Neisse.—Also a rapid stream in Prussian Silesia, which rises on the Spieghtzer-Schneuberg, in the Sudetic chain, near Mittelwalde, and falls into the Oder near Brieg, after a NE course of 98 m.

NEITHORP, a village in the p. of Banbury, Oxfordshire, a ½ m. WNW of Banbury. Pop. 3,007.

NEITRA. See Neutra.

NEIVA, a small river in the north of Portugal, in the prov. of Entre-Duero-e-Minho, which falls into the sea near the pretty town of Neiva.—Also a town and district of New Granada, in the dep. of Cundinamarca. The district, consisting mostly of a tract of territory entirely level, extends 80 leagues from N to S on either side of the river Magdalena. It is of a hot and unhealthy temp. The town is situated on the r. bank of the Magdalena, at the junction of a small stream of the same name, 120 m. NE of Popayan, and 107 m. SW of Santa-Fe.

NEIVA, a river of Russia, in the gov. of Perm, which here originates in a lake about 30 m. NW of Yekaterinburg, and flows into the Tura, on the r. bank, after a sinuous course towards the E of about 250 m. Its principal affluents are the Rij and the Irbit.

NEIVA. See Neiba.

NEIVE, a town of Piedmont, in the prov. and 4 m. NE of Alba, on a hill near the Tinella. Pop. 2,400.

NEJAPA, a village of Mexico, in the state and 90 m. E of Oaxaca.

NEJIN, or Nieshin, a town of Russia, in the gov. and 36 m. SE of Chernigov, on the l. bank of the Oster, in N lat. 51° 2′ 45″. It is a well-built town of some 17,000 inhabitants, and has a cathedral, a convent, an hospital, 17 churches, and a lyceum. It forms a kind of commercial entrepot between Leipsig and Dantzic on the one hand, and Moldavia, Wallachia, and the Crimea, on the other; and has 3 large an-

nual fairs. Its manufactures consist of silk stuffs, soap, leather, and liqueurs.

NEKHVOROCHTSHA, a town of Russia, in the gov. and 36 m. S of Pultava, on the r. bank of the Orel.

NEKKE, a village of Upper Egypt, on the l. bank of the Nile, 4 m. S of Manfalut.

NEKOUBAN (Lake), a lake of Canada, 24 m. NW of Quebec.

NEKRESE, a town of Georgia, in the prov. of Kacheti, 65 m. NE of Tiflis.

NELL (Loch), a small lake in the p. of Kilmore and Kilbride, Argyleshire. It is about 2 m. long, and a ½ m. broad.; and sends a brief stream to the head of the marine bay Loch-Feachan.

NELLAMANGALAM, a town of Hindostan, in Mysore, 15 m. NW of Bungalore.

NELLEKENSKEER, a commune of Belgium, in the prov. of E. Flanders, and dep. of Nokere. Pop. 429.

NELLEMBUR, a town of Hindostan, in Malabar, 30 m. E of Calicut.

NELLENBURG, a district in Suabia, with the title of a landgraviate, formerly belonging to Austria, but ceded to Würtemberg in 1806, and exchanged to Baden in 1810. Its area is 340 sq. m.—Its cap., of the same name, is a small town 15 m. WNW of Constanz. Pop. 800.

NELLISSERAM, a town of India, on the W coast of Canara, in the district of Chincal, in N lat. 12° 16′.

NELLORE, a district of Hindostan, in the Carnatic; bounded on the N by Guntur; on the E by the bay of Bengal; on the SW by N. Arcot; on the W and NW by Cuddapah. Area 12,000 sq. m., including Ongole, and a part of the Western Zemindaries. It is intersected by the Surnamuki, Kundli, Muldavi, Pennar, Munnasu, Chippelaidu, and several other rivers. Pop. in 1836, 846,572. The crops chiefly grown are dry grain, but there is a considerable extent of paddy cultivation. Firewood, saltpetre, betel-nut, tobacco, salt, and salted fish, are exported to Madras. The district has long been celebrated for its manufactures of cloth, and for its fine breed of cattle. The district of N. was acquired by treaty in 1801. The revenue is 1,860,853 r.—The cap., which gives name to the district, is situated on the S side of the Pennar, in N lat. 14° 29′, E long. 80° 1′, 100 m. N by W of Madras. It is surrounded by mud walls, and has an extent of 1,200 yds. from E to W, and of 600 yds. on the other sides.

NELSON, a district and town in the Middle island of New Zealand. The district embraces all that part of the island which lies to the N of the parallel of 42° S, and embraces the settlements of Massacre bay, Blind bay, Pelorus, Queen Charlotte sound, and Wairau. The surface generally, along the coast, is mountainous and heavily wooded. There are, however, some tracts of level or gently undulating country; and on the E coast a considerable breadth of level table-land, as well as some low plains. Mr. Earp says of Massacre bay district that it is "a very pretty one; the greater portion heavily timbered, and the land extremely good. Coal and lime exist in it, both accessible at the surface on the bank of a small river, the Motupipi, in which they can at once be put on board vessels of 15 or 20 tons burden. The gross amount of level land in this bay is estimated at 45,000 acres, of which at least 25,000 are fit for agriculture. Blind bay contains about 60,000 acres of land sufficiently level for agriculture; but not above one-half of this is of a quality adapted for that purpose. It is generally free from timber, but covered with fern; and in the swampy parts, forming a margin a ½ m. deep on the S and E, near the sea, covered with flax. The latter description of land was considered, at the period of the original selection of suburban sections, as nearly worthless; it has now, however, proved to be the best land in the district, is easily drained and cleared, and bears very heavy crops. The fern-land is also good when the fern grows strong and high; though, when the vegetation is stunted, it of course indicates a poor soil. But on some fern-land, cultivated on a large scale, from 30 to 35 bushels of wheat per acre have been grown without manure, proving that it only requires proper culture to make it good land. Cloudy bay, with the Wairau plain and valley, forms the most extensive and most valuable portion of the settlement. The whole of that district is somewhat of the shape of a skate-fish,—a broad level plain, 8 or 10 m. wide, at the head of Cloudy bay, running inland for 18 m., when it suddenly converges to a width of 2 or 3 m., equally level with the plain below, and extending from 40 to 50 m. further inland. Though it appears level—or may in a general description be so spoken of—there is a very considerable but gradual fall from the head of the valley to the sea, probably not less than 2,000 ft. in 50 m.; but it is not perceptible to the traveller. The land for 4 or 5 m. from the sea is covered with flax and other strong vegetation, and is generally swampy, but of excellent quality, and capable apparently, like that in Blind bay, of easy drainage; for the next 8 or 10 m. it is dry, covered with long grass, and generally of good quality; beyond this it continues grassy, the land getting lighter the further you advance up the country, till the last 16 or 18 m., which are very poor and stony, only fit for grazing purposes. At the very extremity there are a few miles of forest. The whole district contains a great abundance of excellent agricultural land; but its principal value at present is to be found in the fertile pasture with which it is clothed from end to end, including the whole of the hills which bound it on the E side, which present some of the finest sheep-runs in the world, and extend all the way to the E coast by Cape Campbell, and southward to the Kaikora mountains."—The town of N. is situated in S lat. 41° 14′, E long. 173° 16′, at the head of the great inlet called Blind bay, on a low plain surrounded by lofty fern-clad hills, looking across Tasman's gulf. The town, exclusive of shops, stores, and taverns, contains a fort consisting of a ball-proof stockade, rampart, and ditch, a wooden court-house, barracks, and a powder-magazine. The harbour has a narrow entrance, but water for vessels of 500 or 600 tons, excellent holding-ground, and perfect shelter. The rise and fall of tide is 12 ft. The European pop. in 1843 was 1,460; in 1850, 4,047. The Maori pop. in 1849 was 1,408. The number of acres in crop in 1850 was 4,242. The live stock amounted to 441 horses, 5,052 horned cattle, 70,960 sheep, and 5,337 goats. The soil is generally light; no heavy clays or stiff marls are met with. The agricultural produce consists of wheat, barley, oats, potatoes, turnips, tares, flax, and hops. Strawberries, raspberries, gooseberries, currants, apples, peaches, plums, grapes, cherries, melons, and pumpkins, are grown. The imports in 1847 amounted to £10,566; the exports to £3,576. There are places of worship for Episcopalians, Methodists, Presbyterians, Roman Catholics, and German Lutherans.

NELSON, a county of Western Australia, bounded on the N by the co. of Wellington; on the E by the cos. of Wicklow and Goderich; on the S by the co. of Lanark; and on the W by that of Sussex. It is intersected from N to S by the Roe range. On the N it is watered by the head-streams of Preston river, and on the SW by those of Blackwood river.—Also a district of New South Wales, in the co. of Cumberland.—Also a parish in the same co. Pop. 183.

NELSON, an island of the Southern ocean, in the archipelago of New South Shetland, between King George and Robert islands, in S lat. 62° 15′, W long. 58° 50′.

NELSON, a central county of the state of Virginia, U. S., comprising an area of 490 sq. m., bounded on the SE by James river, on the NW by Blue ridge, and drained by Rockfish and Tyne rivers. Pop. in 1840, 12,287; in 1850, 12,758. Its cap. is Livingston.—Also a central co. of the state of Kentucky, comprising an area of 460 sq. m., drained by Beich fork and Rolling fork of Salt river, and their branches. Pop. in 1840, 13,637; in 1850, 15,207. Its cap. is Bardstown.—Also a township of Cheshire co., in the state of New Hampshire, 44 m. SW of Concord, on an elevated ridge between Connecticut and Merrimac rivers. It has a hilly surface, and contains several ponds, the outlets of which flow into Ashuelot and Contoocook rivers. The soil is chiefly in pasture. Pop. in 1840, 835.—Also a township of Madison co., in the state of New York, 109 m. W by N of Albany. It has an elevated surface, and is drained by Chittenango and Chenango rivers. The soil consists chiefly of clay and calcareous loam. Pop. 2,100. It has a village containing about 225 inhabitants.—Also a township of Portage co., in the state of Ohio, 164 m. NE of Columbus. Pop. 1,398. The soil is generally fertile.

NELSON, a river of British North America, which issues from the N extremity of Lake Winnipeg; passes through a series of lakes; and enters Hudson's bay, to the N of York, and after a total course of 300 m.—Also a district intersected by the river from which it takes its name.—Also a lake in the district of Nelson river, formed by an expansion of English or Churchill river. At its N extremity is a fort of the same name.

NELSON, a township of Upper Canada, in the Gore district, bounded on the SE by Lake Ontario. It contains fine land, watered by Twelve Mile creek and numerous small streams, and is generally well-cultivated. Pop. in 1840, 3,059.—Also a village on Dundas strait, in the township of the same name. Pop. about 50.

NELSON (Cape), a headland of New Munster, or Middle island, New Zealand, on the W side of Port Hardy, D'Urville island.

NELSON, or Montague (Cape), a headland of Australia Felix, to the W of Portland bay, in S lat. 38° 24′ 15″, E long. 141° 34′ 15″.

NELSON FACTORY, a village of Nelson township, Cheshire co., in the state of New Hampshire, U. S., 38 m. SW of Concord, on Souhegan river.

NELSON'S FORT, a settlement on the W shore of Hudson's bay, at the mouth of the Nelson river, 250 m. SE of Churchill-fort, in N lat. 57° 12′.

NELSONVILLE, a village of York township, Athens co., in the state of Ohio, U. S., 59 m. SE of Columbus, on the N side of Hockhocking river. Pop. in 1840, about 100.

NEMAON, or Nomaes, a town of Portugal, in the prov. of Beira, comarca and 27 m. NE of Trancoso, and at an equal distance NNW of Pinel. Pop. 3,274. It has a fortress flanked with 15 towers.

NEMAWHAW, a river of the Missouri territory, U. S., which runs E, and, after a course of about 225 m., joins the Missouri, on the r. bank.

NEMBRO, a town of Austrian Lombardy, in the deleg. and 6 m. NE of Bergamo, district and 1½ m. N of Alzano-Maggiore, on the r. bank of the Serio. Pop. 2,000. It has 2 churches and an hospital, and contains several iron-works, a silk spinning-mill, and several brick-works. Grinding-stones are extensively quarried in an adjacent mountain.

NEMDENGTE, or Tambatsi, a river of Mandshuria, in the prov. of Helung-keang, which, after a course in a generally NW direction of 75 m., joins the Amur, on the r. bank, near Kitsibuk.

NEMEA, a village of Greece, in the Morea, in the gov. and 14 m. SW of Corinth, on the r. bank of the Coutzomari. It contains the remains of a temple of Jupiter, and several other antiquities.

NEMERKEN, a commune of Belgium, in the prov. of Brabant, and dep. of Tholembeek. Pop. 351.

NEMETHI, or Nemee, a town of Hungary, in the comitat of Honth, and 15 m. SSE of Schemnitz.

NEMETHI-SZATHMAR. See Szathmar.

NEMET-UJVAR. See Gussing.

NEMI, a village of the Papal states, in the comarca and 18 m. SE of Rome, on the NE bank of a fine lake of the same name, and near the Appian way. Pop. 1,100. The lake occupies the crater of an extinct volcano, and has an alt. of 1,022 French ft. above sea-level. Its waters are affected by the tide. It is about 5 m. in circumf., and is surrounded by thick woods, formerly famous for the worship of Diana.

NEMIROV, a town of Russia in Europe, in the gov. of Podolia, district and 14 m. NW of Bratslav, and 90 m. ENE of Kamenetz, on the r. bank of the Ronda. Pop., chiefly Jews, 2,000. It contains 2 churches, a Greek and a Lutheran, and a college, and has manufactories of printed calicoes and linen. A treaty of peace was here concluded in 1737 between Russia, Austria, and Turkey.—Also a town of Poland, in the prov. of Bialystock, on the Bug, 23 m. SE of Drohitshin. Pop. in 1838, 3,876.

NEMISKAU, a lake in the SW part of Labrador, in N lat. 51° 20′, W long. 77° 30′. It discharges itself by Rupert river into James bay.

NEMMERSDORF, a village of Prussia, in the reg. and SW of Gumbinnen. Pop. 150.

NEMONAITZY, a town of Russia in Europe, in the gov. of Vilna, district and 48 m. WSW of Nowo-Troki, and 48 m. S of Kowno, on the r. bank of the Niemen.

NEMONIEN, a village of Prussia, in the reg. of Königsberg, on the Curische-Haff, NE of Labiau. Pop. 510.

NEMOURS, a canton, commune, and town of France, in the dep. of the Seine-et-Marne, and arrond. of Fontainebleau. The cant. comprises 16 coms. Pop. in 1831, 9,882; in 1841, 10,129.—The town is 11 m. S of Fontainebleau, 21 m. S of Melun, and 54 m. SSE of Paris, on the Loing, which is here crossed by a fine stone-bridge, and surrounded by a canal of the same name. Pop. in 1841, 3,547. It is pleasantly situated in a picturesque valley, is enclosed by walls, and has four suburbs. It is generally well-built, and its streets are straight and spacious. The principal buildings are the parish-church, a large and handsome edifice, with a lofty spire, and the castle of the dukes of N., an ancient structure, flanked with towers and surrounded by a ditch. It has also an hospital, a college, and a public library, and several fine promenades. The industry of the place is considerable. It has numerous flour and tan-mills, extensive tanneries, manufactories of hats and of starch, a large marble-work, and numerous brick, tile, and lime-kilns. The trade consists chiefly in corn, flour, wine, cheese, timber, iron, &c. This town was formerly cap. of the French Gatinais, and had the title of a duchy. A castle, named Nemus, originally occupied the island in the Loing on which a portion of the town now stands. A priory was subsequently erected by Louis VII. on his return from Jerusalem. In 1170 N. was erected into a town. It passed through various fortunes until 1507, when it again became attached to the crown of France. In 1515 it was alienated by Francis I. in favour of, and retained by, the house of Savoy until 1666. The duchy

was conferred by Louis XIV. upon his brother, the duke of Orleans.

NEMPNET, or NEMPNETT-THRUBWELL, a parish of Somersetshire, 8 m. NE by E of Axbridge, near the source of the Yeo. Area 1,180 acres. Pop. 269.

NEMROUD. See NIMRUD.

NEMTSCHITZ, a town of Moravia, in the circle and 12 m. S of Olmutz, and 17 m. NW of Hradisch.

NEMZA. See NYAMTZ.

NEN, or NENE, a river of Northamptonshire, which crosses the co. from Daventry to Peterborough; and is navigable to Allerton-mills, about 6 m. above Peterborough. From Peterborough it runs across the upper part of Cambridgeshire; passes Wisbeach; and skirting the NW part of Norfolk, empties itself into the Cross-Keys-Wash.—The Nen outfall, for the discharge of the waters of the river N. into the sea, is a new tidal channel which commences about 6 m. below Wisbeach, and extends to Crabhole, a distance of 6½ m., from which point the river has shaped for itself a natural channel of 1½ m. long into the Eye, an inlet of the German ocean. The width of the river at the bottom varies from 140 to 200 ft.; the depth is about 24 ft. from the surface of the adjacent land. The spring-tides rise 22 ft. at the lower and 18 ft. at the upper end. By the formation of this artificial cut and works connected with it, upwards of 7,000 acres have been reclaimed.

NENAGH, a river of co. Tipperary. It rises in two head-streams among the W declivities of the Devil-Bit mountains, and runs about 12 m. NW, past the town of N., to Lough-Derg.

NENAGH, a parish, containing a town of the same name, in co. Tipperary. Area 3,881 acres. Pop. in 1831, 9,159; in 1841, 9,540.—The town of N., the cap. of the N. R. of co. Tipperary, stands near the N. river, 3½ m. SE of Youghal bay in Lough Derg, and 74¾ m. SW of Dublin. The town has a comparatively airy, clean, and comfortable appearance. The castle—or as it is popularly called Nenagh Round—is a conspicuous feature of the town, and a fine monument of Norman military architecture. The jail is a new structure, and contains 192 cells, 20 day or work-rooms, 11 yards, and a chapel. Pop. 8,618.

NENKUR, a village of Sinde, 5 m. N of Sehwan, about 4 m. W of the Indus.

NENNDORF (GROSS), a village of Hesse-Cassel, in the prov. of Lower Hesse, and circle of Schaumburg, bail. and 2 m. NNE of Rodenburg, and 17 m. WSW of Hanover. Pop. 574. It has an electoral castle, and extensive mineral baths. In the vicinity is another village named Klein-N., with 222 inhabitants.

NENNEETSUK NAZE, a headland on the coast of Greenland, in N lat. 60° 28′, W long. 43° 04′.

NENNORTALIK, an island on the SW coast of Greenland, in N lat. 60° 08′, W long. 45° 16′.

NENOKAZK, a village of Russia in Europe, in the gov. of Archangel, and district of Kholmogory. It has extensive salt-works.

NENOKOTSKOI, a town of Russia in Europe, in the gov. and district and 41 m. W of Archangel, near the White sea.

NENSLING, a town of Bavaria, in the circle of Middle Franconia, 9 m. W of Greding, and 33 m. SE of Anspach. Pop. 800.

NENTERHAUSEN, a village of the duchy and NE of Nassau. Pop. 560.

NENTHORN, a parish of Berwickshire, 4 m. NW of Kelso. Area 5½ sq. m. Pop. in 1841, 446.

NEOCASTRON. See NAVARINO.

NEOCHORI, a town of Turkey in Europe, in Rumelia, in the sanjak and 110 m. NW of Gallipoli, and 15 m. NNE of Inidje.—Also a town of Albania, in Epirus, NW of Paromythia.—Also a town of Greece, in Livadia, in the dep. and 15 m. W of Thebes.—Also a town in the dep. of Locri, on the channel of Talanda, NE of Bodonitza.—Also a town of the Morea, in the dep. of Achaia, on the gulf and SW of Patras.

NEOGORI, or NEOCHORI, a town of Turkey in Europe, in Albania, in the sanjak and 40 m. SE of Avlona, on the l. bank of the Vojutza or Poro, and 20 m. NW of Argiro-Castro.

NEOGRAD, NOGRAD, or NOWGRAD, a gespenschaft, administrative province, comitat, and town of Hungary, in the circle beyond the Danube. The comitat is bounded on the N by the comitats of the Sohl; on the E by those of Gömör and Heves; on the S by the comitat of Pesth; and on the W by that of Honth; and comprises an area 66 m. in length from N to S, and 30 m. in medium breadth, with a superficies of 645 sq. m. Pop. in 1837, 212,524, of whom the majority were Hungarians. It is intersected in the N and S by branches of the Carpathian mountains; the former distinguished by the name of Ostroski, and the latter by that of Cserhat. The central part is level, and produces corn, hemp, fruit, and wine. The principal rivers are the Danube, the Ipoly, and the Zagyva, an affluent of the Theiss. The rearing of pigs forms an important branch of local industry. The comitat is divided into 4 marches, and contains 11 towns, of which Losoncz is the chief, and 253 villages. The diets of the county assemble at Balassa-Gyarmath.—The town is 30 m. N of Buda. Pop. 1,353. It contains the ruins of an ancient fortress.

NEOLA, a state in the central part of Senegambia; bounded on the N by Bondu, and on the E by Dentella; on the S by the Gambia; and on the W by the Nerico, by which it is divided from Wulli. It is watered by several streams, of which Neolakoba is the principal, and is woody in the NE. The butter-tree is common, and elephants abound in the locality. Its capital is Badu.

NEOLA-KOBA, a river of Senegambia, in the N part of the kingdom of Neola, which flows WSW, and joins the Gambia.

NEOMAYE (SAINTE), a village of France, in the dep. of the Deux-Sevres, cant. and 5 m. SW of St. Maixent, and 11 m. E of Niort. Pop. 800.

NEOSHO, a river of the Indian territory, which has its source in the dividing ridge between the Arkansas and Kansas rivers; runs 240 m. SE and S through the Osage and Cherokee lands; and enters the Arkansas about 4 m. below Fort-Gibson.—Also a village of Newton co., in the state of Missouri, U. S., 175 m. NW of Jefferson city, on Spring creek, an affluent of Neosho river.

NEOTOI, an island of Tenasserim, formed by the river of that name at its confluence with the Indian ocean, and to the S of Mergui island.

NEOT'S (ST.), a parish and market-town in Huntingdonshire, 8½ m. SSW of Huntingdon, and 56 m. NNW of London, on the E bank of the Ouse, over which there is here a handsome stone-bridge, and near the line of the Great Northern railway. Area of p. 4,750 acres. Pop. in 1801, 1,752; in 1831, 2,617; in 1841, 3,123. The town is well-built, and consists of several streets.—Also a parish in Cornwall, 4¾ m. NW by W of Liskeard, on the E bank of the Towey. Area 14,540 acres. Pop. in 1801, 906; in 1831, 1,424; in 1841, 1,515.

NEOUNDOH, a town of Burmah, 5 m. NE of Pagahm-nieu, and 105 m. SW of Ava, on the l. bank of the Irawaddi. It is a flourishing place, and contains numerous religious edifices. It has a manufactory of lacker.

NEOUX, a village of France, in the dep. of the

Creuse, cant. and 5 m. SE of Aubusson. Pop. 1,160.

NEPAUL, or Nepal, a territory in the N of Hindostan, between the parallels of 26° 30′ and 30° 50′ N, and the meridians of 80° and 88° E, one of the largest and most compact independent sovereignties of India, though greatly curtailed in extent by the peace of 1815. On the N it is separated from Tibet by the Himalayas; on the E it is separated from Bhotan by the river Mitchi, and the territory recently belonging to the rajah of Sikkim; on the S by the British territories of Delhi, Oude, Bahar, and Bengal, with the exception of about 60 m. belonging to the nabob of Oude; and on the W by the Cali river and Kumaon, separating it from the Punjab. Its extreme length may be estimated at 466 m.; its average breadth at 115 m. Its area has been roughly estimated at 53,000 sq. m.; and its pop. at 2,000,000. The lowest belt of the Nepaulese dominions is part of the great plain of Hindostan; in a few spots the British districts reach to the base of the Himalayas, but in most parts the Gorkha possessions stretch about 20 m. into the plains. Bounding this low country on the N, is a region nearly of the same width, consisting of small hills, which rise gradually towards the N, and are watered by numerous streams springing from the southern faces of the first lofty mountains to which these hills imperceptibly unite. The lower portion of these hills, and some of the adjacent plains, are the chief site of the saul-forests. In several places these low hills are separated by fine *doons*, or what in Scotland would be called *straths*. Many of these are well-cultivated. On arriving at what may be called the mountains, the inhabited valleys are generally very narrow, and from 3,000 to 6,000 ft. of perpendicular height above the plains of Bengal. Some of these valleys produce enormous rattans and bamboos; others, pine-apples and sugar-canes; others, only oats and barley.

Climate and productions.] In temperature N is, from its great elevation, cool and healthy; yet the orange here ripens in winter, and is nowhere finer. The northernmost part of the N. valley scarcely lies in a higher parallel of N lat. than 27° 3′: yet it enjoys, in some respects, the climate of the S of Europe. Its height above the sea appears to be above 4,000 ft.: the mean temp., from the 17th to the 25th of March, was 67°. The seasons here are pretty much the same as in Upper Hindostan. The rains commence rather earlier, and set in from the SE quarter; are usually very copious, and break up about the middle of October. In a few hours the inhabitants, by ascending the mountains, can pass a variety of temperatures; and in three or four days' journey, by moving from Noakote to Kheroo, or Ramika, may exchange the heat of Bengal for the cold of Russia.—Cardamom and ginger are valuable productions; but transplanted rice forms one-half of the whole cultivation in this quarter. Considerable flocks of sheep are fed by the Gurung and Limbu tribes; horses are imported from Tibet. The frigid regions are the abode of two of the finest birds that are known;—the *marral*, or *Meleagris satyra*,—and the *damphiya*, or *Phasianus Impeyanus*. The mountains contain iron, lead, and copper: gold is occasionally found in the channels of the rivers. The copper-mines are quite superficial; each mine belongs to certain families, but the rajah shares with them in the produce. The valley of N. Proper is the largest in the Gorkha dominions; yet in this elevated plain there is not naturally a single stone of any considerable size; the whole seems to consist of alluvial matter covered with soil. This valley is nearly of an oval figure: its greatest length from N to S is 12 m., by 9 m. its greatest breadth; the circumf. of the whole being under 50 m. To the S it is bounded by very stupendous mountains; but to the E and W the enclosing hills are less lofty. Sheopuri, which constitutes its principal barrier to the N, is the highest of the mountains that encircle it, whence issue the Bhagmatti and Vishunmatti rivers, which, with many other streams, traverse the valley of N., the bottom of which, besides being very uneven, is intersected with deep ravines, and speckled with little hills. Seen from Mount Chandragiri, the valley of N. appears thickly settled with villages, among fields fertilized by numerous streams; but the part of the view which most powerfully attracts the attention, is the adjacent enormous mountains of Sheopuri and Jibgibia, with the gigantic Himalaya ridge, covered with everlasting snow, in the back ground. The whole lands of the two villages of N. have been long partitioned into fields, each of which in ordinary seasons is calculated to produce 234 bushels of rice. The hoe is the grand instrument of cultivation; but the inhabitants have numerous water-mills for grinding corn. Throughout N. proper, the Newar tribes alone cultivate the ground, and exercise the useful arts. The sovereign is regarded as the original absolute proprietor of all lands. Even the first subject of the state has, generally speaking, but a temporary and precarious interest in the lands which he holds; being liable, at every pungunni or grand council to be deprived of them altogether; to have them commuted for a pecuniary stipend, or exchanged for others. This council consists of the principal ministers of government, and of such other persons as the sovereign thinks fit to invite to it. The lands of the state are divided into 1. crown lands; 2. Birta, or Bimooter lands; 3. Kohrya or Bari lands, or such as are destitute of streams; and 4. Kaith, or plantation-lands of the first quality. The beegah is used in mensuration by the Purbutties only: by which appellation the occupiers of the hilly regions surrounding the valley of N. are distinguished from the Newars or proper inhabitants of the latter. Many kaiths yield three harvests; one of rice, one of wheat, pulse, &c., and sometimes one or two of an excellent vegetable, called tori. There are grounds that yield two crops of rice successively; one fine and the other coarse; beside affording in the same year a wheat crop. In some ancient Hindu books N. is called Deccani Tapu or 'the Southern isle,' in reference to its situation with respect to the Himalaya mountains, and the contiguous northern regions; the valley of N. being there described as an immense lake, which, in the progress of ages, had retired within the banks of the Bhagmatti. The ridge of the snowy Alps, although it here appears to wind considerably, has few interruptions, and in most places is altogether insuperable. Several rivers that rise in Tibet pass through among its peaks, but amidst such enormous precipices, and through such narrow chasms, that their openings are in general quite impracticable. The widest break gives passage to the Arun, the chief branch of the Cosi.

Population.] The northern valleys of N. are inhabited by Tartar or Chinese tribes. The prevailing religion is the Hindu; but many of the inhabitants are supposed to be descendants of Tartars, and are reckoned impure. The tribe called Newars admit of poliandry, or rather the women are at liberty to divorce their husbands, and take others as often as they choose. The Brahmins of N. are numerous, and deeply skilled in Sanscrit lore. One of their libraries is said to contain 15,000 vols. in that language. There are five vernacular languages, but Hindostani is pretty generally understood in N. Hindus of pure birth are not numerous. Be-

fore the Gorkha predominance, the military force among the petty chiefs of N. was always large, but undisciplined; it is now much improved. As soldiers the Gorkhas are altogether unrivalled in Hindostan; to them danger is quite unknown; they fight hand to hand with courage amounting to heroism; and have, in their irregular regiments, become the most valuable part of our Indian army. They are small in size; seldom much exceeding 5 ft. in height; but are as hardy and enduring in frame, as they are indomitable in spirit. For the Sepoys they entertain great contempt; refuse to be incorporated in regiments with them; and speak of them as 'fowls.' Of these brave and hardy little mountaineers we have already some five or six irregular regiments in our service; and on the breaking up and disbandonment of a disorderly regular regiment, one of these irregular levies was recently converted into a regiment of the line. In all our late campaigns the Gorkhas distinguished themselves greatly; when the unhappy Shah Sujah was placed on the throne of Cabul, he chose these gallant fellows for his body-guard, and in Jellalabad a regiment of them had the honour of being imprisoned with Sir Robert Sale. "As soldiers they have, indeed, only one defect: it is inability to bear extreme heat."

Trade and Commerce.] The commerce of N. is not so extensive as it might be under better regulations. This is partly to be attributed to the ignorance and jealousy of the administration; but also in a great degree to the monopolies certain *Uluts* or mercantile Gossains, and a few other merchants, have long been in possession of. If it were not for these obstacles an extensive traffic might be carried on between Tibet and the British territories, through this country. N. exports to British India, elephants, elephants' teeth, rice, timber, hides, ginger, terra-japonica, turmeric, wax, honey, pure resin of the pine, walnuts, oranges, long-pepper, bark of the root of bastard cinnamon, dried leaves of ditto, large cardamums, dammer lamp oil, and cotton of the simul-tree. These articles are the produce of the Morung and other parts of the Turiani, and of N.: besides these, a great variety of articles produced in Tibet are sent through N. There are small quantities of salt and saltpetre made in the eastern part of the N. valley; but the former is not so much esteemed by the natives as that of Tibet.—The following articles are exported from the British dominions to N., either for the consumption of that country, or for the Tibet market; viz. Bengal cloths, muslins and silks of various sorts, raw silk, gold and silver laces, carpets, English cutlery, saffron, spices, sandal-wood, quicksilver, cotton, tin, zinc, lead, soap, camphor, chillies, tobacco, and coral.

Manufactures.] The Newars of N. fabricate only cloths of a very coarse kind. The cotton employed is the produce either of Niakot, or of the Muddaize; by which latter name they commonly distinguish the Company's territories. They work very well in iron, copper, and brass, and are particularly ingenious in carpentry: though they never use a saw, dividing their wood, of whatever size, with the chisel and mallet. They export some of their brazen utensils to the southward. They have attempted without success, to manufacture some fire arms; but their swords and daggers are tolerably good. They gild extremely well, and construct bells of so large a size as five feet diameter. From rice, and other grain, they distil spirits, and also prepare a fermented liquor from wheat, &c. *munnua*, rice, which they name *phaur;* it is made in the manner of our malt liquors, which it resembles. The currency of N. consists chiefly in silver pieces of eight annas (14d.) called siccas, and they have a coin so low as the 280th part of a sicca. A considerable trade subsists between the N. territories and the district of Purneah in Bengal.—Katmandu the capital is but a small town. The other principal towns are Lalita-Patan, Bhatgong, Noyacote, Chinachin, Calesi, and Hatiya.

History.] The ancient history of N. is very obscure. Runjit Mull, the last prince of Newar blood who reigned here, formed an alliance with Prithi Narrain, the rajah of Gorkha, which ended in the total subjugation of N. by this ally in 1768. In 1769 the Gorkha dynasty first came into collision with the British, who penetrated as far as Sederoly, but did not prosecute the enterprise. In 1792 the emperor of China despatched an army of 70,000 men against the Nepaulese, to revenge certain indignities which they had offered to the Tibet Lama, and extorted a nominal submission from them. In 1814, a large body of Gorkhas attacked two British stations in Goruckpur and Sarun, whereupon Sir David Ochterlony marched against the redoubtable Amir Singh, and compelled him to accede to a treaty of peace, by which he renounced all the country lying W of the Cali. At this latter period the Gorkha conquests had brought their frontiers up to those of our ally, the Nawab Vizier, and to the protected Sikh states. On this approximation disputes arose as to boundaries; these were from time to time accommodated, but in such a manner as to encourage the Gorkhas and to leave on the British government the impression that they aimed at still larger territorial aggressions. Gradually the Nepaulese laid claim to Bulurel and Sheoraj; this claim was, however, referred to arbitration, but when the evidence before the arbitrators was going strongly against them, the Nepaulese commissioners withdrew from the reference, and shortly afterwards their sovereign seized on the disputed territory. By the treaty of 1815, not only was the disputed territory given up, but large adjacent districts were ceded to the British government, and security taken for the protection of our allies. In addition, the rajah of N. agreed not to take any British, European, or American subject into his service without the permission of the British government, and to receive a resident at the court of Katmandu. It is by the terms of this treaty that our relations with N. are still regulated. It leaves, with the single exception just mentioned, freedom of political action to N. That state is neither subsidiary to nor dependent on the government of India; it is unrestricted in its external alliances, and unfettered in its internal administration; it owes us no fealty, pays us no tribute, receives from us no contingent, and is at liberty to form what friendships it pleases. Thus situated, N. has since 1815 remained at peace with the Indian government. The Nepaulese appear still to recognise some kind of connexion with China, as every fifth year a complementary mission is sent from Katmandu to Pekin.

NEPEAN, a river of New South Wales, which flows NW, between the cos. of Camden and Cumberland; and, joining the Warra-Gamba, forms with it the HAWKESBURY: which see.—Also a township of Upper Canada, in the Dalhousie district, skirted on the N by the Ottawa river. Pop. in 1842, 7,294.

NEPEAN-BAY, a large bay on the coast of Kangaroo island, in S. Australia, 70 m. SW of Adelaide.

NEPEAN-ISLAND, a small island in the South Pacific, about ¼ m. distant from Norfolk island. It is uninhabited, but was formerly used as a place of transportation for the violently refractory convicts from Norfolk island. Here they were employed in boiling salt, and only occasionally visited by boats. Although the distance is so small between this and Norfolk island, the communication is rendered difficult by the mountainous sea which runs between the two islands.

NEPEAN (POINT), a rocky projection on the coast of S. Australia, the E point of entrance into Port-Philip, in E long. 144° 38′, S lat. 38° 18′, 40 m. SSW of Melbourne.—Also a large steep bluff on the S coast of Admiralty island, in N lat. 57° 10′.

NEPEAN-SOUND, a bay on the W coast of N. America, in N lat. 53° 32′, W long. 127° 30′.

NEPHIN, a mountain of co. Mayo, 5¼ m. S by W of Crossmolina, on the W side of Lough Conn. Alt. 2,646 ft. above sea-level.

NEPHINBEG, a mountain of co. Mayo, 9 m. N by W of Newport. Alt. above sea-level, 2,065 ft.

NEPHTENOI, an island in the E part of the Caspian, at the entrance of the gulf of Balkan. It is 20 m. in length from NNW to SSE, and about 10 m. in breadth.

NEPI, a small but fortified town of the States of the Church, in the deleg. of Viterbo, 22 m. NNW of

Rome, remarkable for a fine modern aqueduct, and some Roman ruins. Its walls are high and grand, but mouldering to decay. It is the see of a bishop, whose diocese is united to that of Sutri. Pop. 1,800.

NEPIKAR, a township in Wrotham p., in Kent. Pop. in 1811, 528; in 1841, 600.

NEPISINGUI. See NIPISSING.

NEPISS (LAKE), a lake of Canada, on the borders of Maine, in N lat. 45° 40′, at the foot of the Alleghany range.

NEPO, an island of Russia, in the gulf of Oneg, on the coast of the gov. of Archangel.

NEPOMUK, a small town of Bohemia, 55 m. SW of Prague. Pop. 1,480. In the neighbourhood are several iron-works. This town was the native place of John Nepomuk, the tutelar saint of Bohemia, who lived in the 14th cent., and was canonized by Benedict XIII.

NEPONSET, a river of Massachusetts, U. S., which flows into Boston harbour. It is navigable for vessels of 150 tons, 4 m. to Milton.—Also a village situated on both sides of the above river, in Norfolk co., 5 m. S of Boston. Pop. 800.

NEPTUNE-ISLES, a cluster of low rocky islands on the S coast of Australia, at the entrance into Spencer's gulf, 45 m. NW of Kangaroo island. The southernmost is in S lat. 35° 22′ 15″, E long. of Swan river 20° 22′ 15″.

NEQUONQUIQUA, a river of New Brunswick, which runs into the St. John in N lat. 46° 6′.

NER, a river of Poland, which joins the Wartha at Chelmno, after a NW course of 60 m.

NERA, or NAR, a considerable river of Italy, in the Papal states, which rises in the Marca-d'Ancona or Monte-Sibilla, and falls into the Tiber, on the left bank, opposite Otta, after a course of 60 miles.

NERAC, a town of France, in the dep. of Lot-et-Garonne, on the river Baise, 15 m. WSW of Agen. It is divided into Great and Little N.; is well-built; and contains 3,600 inhabitants. It has manufactories of cotton-stuffs, caps, corks, and leather; also of starch, of which the quantity annually made here exceeds 400 tons.

NERBUDDA, NURBUDDAH, or NARMADA, a celebrated river of Hindostan, which has its source in the district of Omercuntoc, in Gundwana, in about N lat. 22° 55′, E long. 82° 15′, in the same mountain on which two other large rivers, one running to the E, the Sone, and the other to the S, the Mahanaddi, have their sources. After passing through Gundwana, it continues its course in a W direction through the provs. of Khandeish and Malwah; at Hassingabad it is 900 yds. wide, and from 5 to 6 ft. deep; at Mundleysir its breadth is suddenly contracted from 1,200 to 200 yds.; at about 10 m. above Tullukwara it enters the low lands of Gujerat; passing the city of Baroach, it falls into the gulf of Cambay, 28 m. W of Baroach, and after a course of 650 m. It is navigable by boats for a considerable distance; but the navigation is considerably impeded by rocks, shallows, and cataracts. Its waters are said to have a peculiar quality in bleaching cloths. This river in former times was the boundary between Hindostan proper and the Dekkan or Southern peninsula. It is sometimes called the Reva. Its principal affluents are the Praun and the Orsong on the r.; and the Tawah and Odi on the l.

NERCHAW, a town of Saxony, 17 m. E of Leipzig, on the r. bank of the Muhlde. Pop. 721.

NERE', a village of France, in the dep. of Charente-Inferieure, cant. and 6 m. SE of Aulnay. Pop. 1,100.

NERECHTA, a town of Russia, in the gov. and 26 m. SW of Kostroma, on the river Nerechta, which falls into the Wolga. It has some trade in yarn and linen. Pop. 1,200.

NERESHEIM, a town of Würtemberg, on the river Egge, at the foot of the hill of Ulrichsberg, 6 m. SSW of Nordlingen. Pop. 1,000.

NERESI, the chief town of the island of Brazza, on the coast of Austrian Dalmatia, 14 m. S of Spolato.

NERETO, a town of Naples, in Abruzzo-Ultra, 36 E. NNE of Aquila.

NERETOA, or NARENTA, a town of Bosnia, in the Herzegovina, 45 m. N of Mostar, on an affluent of the Narenta, consisting of from 500 to 600 cottages, scattered over a number of small hills.

NERIAD, a town of Hindostan, in Gujerat, 30 m. NNE of Cambay.

NERIKE, or NERICIE, an ancient central prov. of Sweden, surrounded by Westmannland, Warmeland, E. and W. Gothland, and Sudermannland, now forming the S part of the government of Orebro.

NERINJAPETTAH, a town of India, in the district of Coimbatur, on the W bank of the Cavery, in N lat. 11° 35′.

NERIS, a town of France, in the dep. of Allier, 4 m. SE of Montlucon. Pop. 1,432. Its mineral springs, of a temp. varying from 16° to 42° Reaumur, are in great repute.

NERJA, a town of Spain, in the prov. and 30 m. E of Malaga, on a small stream of the same name. Pop. 5,000.

NERL, a river of Russia, in the gov. of Vladimir, rising in two head-streams which unite near Mislaol; flowing E and SE; and joining the Kliasma, on the l. bank, 9 m. below Vladimir, after a course of 150 m.—Also a river of the same gov., which, flowing out of Lake Plestchev, runs NE to the Volga, which it joins on the r. bank, 12 m. SW of Koliazin, after a course of 60 m.

NERNALLAH, a district and town of Hindostan, in the W part of the prov. of Berar. The town is 32 m. W of Ellichpur, near the Bara.

NERNIER, a village of Sardinia, in the division of Savoy, 3 m. N of Douvaine, on the lake of Geneva.

NERO, or NERA, a lake of Russia, in the gov. of Jaroslav, which receives the Gda and the Sara, and discharges itself by the Kolorost, an affluent of the Volga.

NERONDE, a town of France, in the dep. of La Loire, 30 m. W of Lyon, and 18 m. SSE of Roanne. Pop. 1,000.

NERONDES, a town of France, in the dep. of Cher, 21 m. ESE of Bourges. Pop. 1,420.

NEROUSA, a river of Russia, in the gov. of Orel, falling into the Desna, on the l. bank, opposite Troubtchevsk, after a W course of 90 m.

NERPIO, a town of Spain, in the prov. and 50 m. SSW of Chinchilla, on a stream of the same name, an affluent of the Segura. Pop. 3,200.

NERSAC, a town of France, in the dep. of the Charente, 4 m. W of Angouleme, on the Boherne. Pop. 1,100.

NERTCHINSK, a town of Asiatic Russia, in the gov. of Irkutsk, on the Chinese frontier, in N lat. 51° 55′ 34″, E long. 116° 32′ 21″, on the l. bank of the Shilka, an affluent of the Nertsha. In 1658 it was merely a palisadoed fort; but in 1781 was raised to the rank of a town. Cochrane describes it as "vilely built, widely scattered, badly situated, and worse inhabited." Since the caravans destined for the trade with China, instead of passing through this town, have gone by way of Selinginsk, the importance of this place is much decayed; but a few merchants still carry on a fur trade, particularly in sables. It contains about 200 houses, and 1,000 inhabitants including the military. The neighbouring mountains afford excellent pasturage; but the district is

chiefly distinguished by the mines of lead and silver which are worked for the Crown by exiles banished into this remote part of the empire. These mines yield, in common years, 40,000 pouds of lead, from which 250 pouds of pure silver are extracted. Of these, 25,000 are sent to the mines of Kolyvan, 10,000 to the depot of artillery, and the rest is sold to private individuals.

NERTSHA, a river of Asiatic Russia, which flows S, and joins the Chilka, on the l. bank, near Nertshinsk.

NERTSHINKOI-ZAVOD, a town of Asiatic Russia, in the gov. of Irkutsk, 130 m. ESE of Nertchinsk, near the l. bank of the Argun. Pop. 1,800.

NERVI, a town of the Sardinian states, in the Genoese territory, on the coast, 6 m. ESE of Genoa. It is well built, and has some manufactures of silk and woollen. Pop. 4,089.

NERVIANO, a town of Austrian Italy, on the Olona, 12 m. NW of Milan. Pop. 2,500.

NERVIEUX, a town of France, in the dep. of the Loire, 12 m. N of Montbrison. Pop. 1,000.

NERVION, a river of Spain, which rises in the prov. of Vitoria, near Orduna, and entering Bilbao, joins the Durango, on the l. bank, 3 m. above Bilbao, the united stream forming the Ansa.

NERWINDE. See NEERWINDEN.

NESA, a town of Kharasm or Independent Tartary, near the frontier of the Persian prov. of Khorassan, 110 m. NNE of Meshid. It was taken and nearly destroyed by Jenghis Khan, in 1221, after a siege of 15 days.

NESBIN. See NEZIBIN.

NESBIT (POINT), a cape on the W coast of the Duke of York's island, in Duke of Clarence strait, in N lat. 56° 15′.

NESCOPECK, a township of Luzerne co., in Pennsylvania, U. S., 98 m. NE of Harrisburg, on the l. bank of the Susquehannah, which is here crossed by a timber bridge, 1,256 ft. in length.—Also a river of Luzerne co., which falls into the Susquehannah at the above town, after a W and NW course of 30 m.

NESHAMINY, a river of Bucks co., Pennsylvania, U. S., which runs SE into the Delaware, 5 or 6 m. below Bristol.

NESHANOCK, a township of Mercer co., Pennsylvania, U. S. Pop. 2,068.

NESKALONKA, a river of the state of Missouri, U. S., which falls into the Arkansas.

NESLE, a town of France, in the dep. of the Somme, on the small river Ingon, 10 m. S of Peronne, and 25 m. E of Amiens. Pop. 1,756.

NESMY, a village of France, in the dep. of La Vendée, cant. and 6 m. S of Bourbon-Vendée. Pop. 1,000.

NESS (LOCH), a beautiful and well-known lake in the NE division of Inverness-shire. It is the longest, the largest, and, with the slender exception of Loch-Dochfour, the most northerly of the chain of fresh-water lakes which occupy the Glenmorenan-Albin, and carry along the navigation of the Caledonian canal. It extends with singular straightness, from SW to NE; and, at its extremities, is distant respectively 28 m. from Fort-William, and 6 m. from Inverness. Its length is 23 m. and 56 chains; its breadth, from 2 m. at the NE end, averages about 5 furs.; then suddenly expands to upwards of 1½ m.; and thence to the SW extremity averages about 1 m., and is remarkably uniform. The rivers Oich and Tarff enter it within brief space of each other, at its upper end; the streams Foyers and Farikaig, besides some rills, enter upon its r. bank; and the Morriston and the Coiltie enter upon its l. Loch-Dochfour, somewhat less than a ½ m. in breadth, and 1½ m. in length, is in a sense a continuation to the NE of Loch-Ness, and communicates with it by a narrow channel of about ¼ m. in length. The depth of Loch-N. in the middle is from 106 to 130 faths.; and, within 250 or 300 ft. of the shore, is often from 40 to 50 faths. Its waters, in consequence, never freeze; and, even after escaping from it, they reach the sea, in the short run of the river Ness, before they can be cooled to the congealing point. The mountain-ranges which flank the great glen come direct down upon the lake, and even plunge their bases within the margin of its waters, forming two long lines of stupendous rampart, straight, lofty, and acclivitous; and rendering the prolonged and very narrow range along the lake like the restricted view seen through a fixed telescope. The two ranges are generally nearly equal to each other in elevation, and have an average alt. above sea-level of between 1,200 and 1,500 ft.; but about the middle of the left-hand range rises the stupendous huge-based Mealfourvounie, sending up a dome-shaped summit to the height of upwards of 3,000 ft.—On the 1st of November, 1755, at the time of the great earthquake at Lisbon, this loch was suddenly upheaved, rolled itself with amazing impetuosity in a billowy volume toward its head, and there discharged a wave 200 yds. up the river Oich, at a level 5 ft. above the margin of the stream. After experiencing a continued ebb and flow for about an hour, it amassed a huge ridge of billow, tossed it 30 ft. up its NW bank, and then subsided into its ordinary repose.—The river which conveys the superfluent waters of the loch to the Moray frith has a NE direction, and its length of course about 8 m. Its channel is gravelly, and on the average about 180 ft. wide, with a mean depth in summer of about 3 ft., and in winter of 6 or 7 ft. A brief way before entering the frith, it is sheeted on both banks, but particularly on the r., by the town of Inverness; and immediately below the town it expands into a harbour, and offers accommodation to the steamers and sailing craft which ply from the capital of the Highlands.

NESS (GREAT), a parish of Salop, 7½ m. NW of Shrewsbury. Area 5,570 acres. Pop. 622.

NESSA, or NESSERLAND, a small island of Hanover, in the large maritime inlet called the Dollart, in N lat. 53° 10′, to the S of Emden. It is the remaining part of a district long since overflowed by the sea.

NESSA, or NESSE, a small river of Prussian Saxony, which flows through the duchy of Saxe-Coburg-Gotha, and the principality of Eisenach, and falls into the Werra, 5 m. NW of Eisenach.

NESSELROD, a village of the Prussian prov. of the Rhine, in the duchy of Berg, 3 m. S of Solingen.

NESSELWANG, a town of Bavaria, on the Wurtach, 11 m. SE of Kempten. Pop. 1,200.

NESTALAS, a village of France, in the dep. of Hautes-Pyrenees, cant. and 4 m. S of Argeles. Pop. 500.

NESTAR, a town of Spain, in the prov. and 60 m. NNE of Palencia.

NESTARES-DE-CAMEROS, a town of Spain, in the prov. and 15 m. SSW of Logrono, on the Iregna. Pop. 210.

NESTAVISHKI, a village of Russia, in the gov. and 45 m. ENE of Wilna, on the r. bank of the Vilia.

NESTE, or NESTES, a river of France, in the dep. of Hautes-Pyrenees, formed by the union of the Neste-d'Aure and the Neste-de-Loaron, at Arreau. It runs N, and then E; and flows into the Garonne, on the l. bank, near Mazeres.

NESTIER, a canton and village of France, in the

dep. of Hautes-Pyrenees, near the r. bank of the Neste, 24 m. SE of Tarbes. Pop. 500.

NESTING, a parish nearly in the middle of the eastern district of Shetland, comprehending the ancient parishes of Nesting, Lunnesting, and Whalsay, and a district of detached islands. Nesting and Lunnesting extend along the E coast of Mainland from Gletness to Lunnanness; and measure, in extreme length, 18 m.; in extreme breadth 4 m. Whalsay consists principally of the island of that name, lying nearly 3 m. E of the nearest part of Lunnesting. The detached district of islands consists chiefly of Fair-Isle, Toula, and the Out-Skerries. Pop. in 1801, 1,941; in 1831, 2,103; in 1841, 2,294. The pop. are widely dispersed, seldom more than 70 or 100 persons being assembled in one group of farms, or one 'town.' They are almost all both farmers and fishermen, and often exercise other mechanical professions. The average rent of farms is £5, and the highest £13.

NESTON (Great), a parish and market-town in Cheshire, 10 m. NW of Chester, on the E bank of the Dee. The p. comprises the townships of Lidsham, Leighton, Ness, Great N., Little N., Raby, Thornton-Mayow, and Willaston. The town is well-built, and pleasantly situated on the SW side of a peninsula formed by the estuaries of the Dee and the Mersey. It owes its chief consequence to summer-visitors. Area 10,260 acres. Pop. in 1801, 3,939; in 1831, 3,518; in 1841, 3,809, of whom about 1,700 were in the town.

NESTVED, a port of Denmark, in the stift and island of Seeland, amt and 15 m. NW of Prestoe, and 51 m. SW of Copenhagen, on the l. bank of the Stor-el-Suus river. Pop. 2,300. It has 2 churches and 2 hospitals, and possesses manufactories of woollen fabrics and printed calicoes. Its trade consists chiefly in corn. The number of vessels which arrived at the port in 1849 was 265 = 6610 lasts.

NESVY. See Nieszwitsch.

NESZMIL, or Neszmely, a village of Hungary, in the comitat and 24 m. E of Komorn, on the r. bank of the Danube. Pop. 1,210. It affords good wine.

NETCHETCHE, a town of Russia in Europe, in the gov. and 60 m. E of Grodno, district and 17 m. SSW of Lida.

NETELZEEP, a commune of Belgium, in the prov. of Brabant, and dep. of Becquevort. Pop. 211.

NETHAN, a river in Lanarkshire, rising in the hills which separate the parishes of Lesmahagow in Lanarkshire, and Muirkirk in Ayrshire, and, running NE through Lesmahagow parish, where it is joined by the Logan and other streams, and falls into the Clyde a little below Craignethan-castle.

NETHE, or NEETHE, a river of Belgium, in the prov. of Antwerp, formed by the confluence of the Grande and Petite Nethe, which unite at Lier. The Grande N. has its source in the prov. of Limburg, and cant. of Peer, near Hechtel, and flows thence into the prov. of Antwerp. It has a total course, in a generally W direction, of about 51 m., 15 of which are navigable. The Petite N. has its source in the S part of the prov. of North Brabant, near the ancient abbey of Postel, and enters immediately into the prov. of Antwerp, where it has a course in a WSW direction of about 36 m., 15 of which are navigable. The united streams direct their course WSW, and after running for about 9 m. join the Dyle at Rumpst and 3 m. NW of Malines. The above-named rivers give their name to the dep. of the Deux-Nethes now comprised in the prov. of Antwerp.

NETHEN, a department and commune of Belgium, in the prov. of Brabant, and arrond. of Nivelles, watered by the Dyle. Pop. of dep. 1,214; of com. 570.

NETHER-AVON, or Netherhaven, a parish in Wiltshire 5¼ m. N by W of Amesbury, on the river Avon. Area 5,160 acres. Pop. in 1841, 505.

NETHERBURY, a parish in Dorsetshire, 1½ m. SW of Beaminster, on the river Brit, comprising the tythings of Aish, Bowood, Melplash, and N. Area 6,600 acres. Pop. in 1831, 1,942; in 1841, 2,162.

NETHERBY, a township in Arthuret parish, Cumberland, 2¾ m. N by E of Longtown, on the E bank of the Eske. Pop. in 1831, 326; in 1841, 368.

NETHEREX, a parish in Devonshire, 5 m. N by E of Exeter. Area 450 acres. Pop. in 1841, 97.

NETHERLAND (Island), or Nederlandsch Eiland, an island of the Pacific, to the NW of the Ellice Islands and the N point of which is in S lat. 7° 10′, and E long. 177° 33′. It is about 9 m. in length, low and surrounded by coral reefs. On the W side is a bay enclosed by reefs and terminating in lagunes. The general aspect of the island is extremely pleasing, and it appears to abound in cocoa-palms and other trees. The inhabitants are copper-coloured, tall, robust, and well-made. Their only clothing is a cincture consisting either of large leaves, or of cloth made of cocoa-nut fibre. Their language bears considerable resemblance to that of the inhabitants of Noukhiva. This island was discovered in 1825, by the Dutch navigator Eeg.

NETHERLANDS, a district of Europe comprising the Lowlands, or NW declivity of the great basin formed by the forest of Ardennes, the Vosges, the Hunsdruck, the Siebengebirge, the Spessart, Odenwald and Hartz, in the valley of which the Rhine flows down through the Netherlands. The southern portion of these Low Countries belonged, in Cæsar's time, to *Gallia Belgica*. The northern portion, situated between the Meuse, the Ural, and the Rhine, was called the Island of the Batavians; and, with Friesland, formed part of Germany. The part of the N. N of the Rhine, was inhabited by the Frisians, who were, as well as the Batavians, a German nation. In the 5th cent. the Batavians, and in the 6th the Belgians, were reduced to submission by the Franks; but the Frisians were not subdued until the 7th cent. By the peace of Verdun, in 843, Batavia and Friesland were annexed to the new kingdom of Germany, and administered by governors who eventually became independent. In the 11th cent., the country was divided into duchies, counties and imperial cities: Brabant or Lower Lorraine, and afterwards Luxemburg, Limburg and Guelders, were governed by dukes; Flanders, Holland, Zeeland, Hainault, Artois, Namur and Zutphen, by counts; Friesland Proper remained a free lordship; Utrecht became a bishopric, the secular authority of which bishop extended over Groningen and Overyssel. Of all these rulers, the counts of Flanders were the most powerful; and, after their possessions had passed, in 1383, to the more powerful house of Burgundy, the latter, partly by marriages, partly by force or cession, obtained possession of the largest part of the Low Countries. The last duke of Burgundy, Charles the Bold, fell, in 1477, in battle with the Swiss; his daughter Mary, by her marriage with the emperor Maximilian, brought the N. to Austria; and Charles V., grandson of Maximilian, born in the Netherlands, in 1548 united the seventeen provinces with Spain, by 'the pragmatic sanction,' as for ever inseparable from it, according to the rule of primogeniture. From 1512, they formed, under the name of 'the Circle of Burgundy,' an appendage to the German empire. East Friesland continued, under its own princes, attached to the circle of Westphalia. The further

history of the N. is fully traced in the articles BELGIUM and HOLLAND.

NETHER-STAVELY, a township in Kirkby-Kendal p., Westmoreland, 4½ m. of Kirkby-Kendal, on the Kent. Pop. in 1841, 210.

NETHERTON, a township in Sephton p., in Lancashire, 6 m. N by E of Liverpool. Pop. in 1841, 289. —Also a township in Cropthorne parish, Worcestershire, 1½ m. SW of Dudley. Pop. in 1841, 104.

NETHOU, or ANETHOU, a summit of the Pyrenees in Spain. It has an alt. of 1,787 toises = 3,809 yds. above sea-level, and forms the highest point of the mountain of Maladetta.

NETHY, a rivulet of Inverness-shire and Morayshire, rising on the W side of Benna-Bynack, one of the heights of the Cairngorm mountain-range, and running N through Badenoch, and N and NW through the SE district of Morayshire, to the Spey, into which it falls within a mile of the church of Abernethy.

NETLINGEN, a village of Hanover, in the gov. and principality and 9 m. E of Hildesheim. Pop. 930.

NETOLITZ, or NETOLICZY, a town of Bohemia, in the circle of Prachin, 23 m. S of Pisek, and 15 NW of Budweis. Pop. 1,650. It has manufactories of hosiery, of articles in leather and of oil, and large horse-markets.

NETRA, an amt and market-town of Hesse-Cassel, in the prov. of Lower Hesse, circle and 6 m. SSE of Eschwege, on a river of the same name. Pop. of bail., 5,380; of town, 800.

NETRAVATTY, a river of Hindostan, in the presidency of Madras and prov. of Kanara, which has its source on the W side of the Western Ghauts; runs WSW; and throws itself into the N extremity of Lake Mangalore. It is navigable at high tide for little boats.

NETSCHETIN, a town of Bohemia, in the circle and 20 m. NW of Pilsen, and 4 m. WSW of Manetin. Pop. 515.

NETTE, a village of Hanover, in the gov. and principality and 11 m. SSE of Hildesheim and bail. of Woldenberg. Pop. 340.

NETTESHEIM, a village of Prussia, in the prov. of the Rhine, regency and 14 m. S of Dusseldorf, circle and 16 m. S of Neuss. Pop. 2,130, of whom 60 are Jews, and the remainder Catholics. It has 2 Catholic churches.

NETTINNE, a department and commune of Belgium, in the prov. of Namur, and arrond. of Dinant. Pop. 230.

NETTLEBED, a parish in Oxfordshire, 5 m. NW by W of Henley-upon-Thames. Area 1,120 acres. Pop. in 1831, 618; in 1841, 690.

NETTLECOMBE, a parish in Somersetshire, 6½ m. N by W of Wiveliscombe. Area 3,760 acres. Pop. in 1831, 325; in 1841, 338.

NETTLEHAM, a parish in the co. of Lincoln, 3½ m. NE by N of Lincoln. Area 3,270 acres. Pop. in 1831, 714; in 1841, 841.

NETTLESDEN AND FRIESDEN, a chapelry in Piglesthorne p., Bucks, 6 m. SE by E of Ivinghoe. Area 420 acres. Pop. in 1831, 142.

NETTLESTEAD, a parish of Kent, 5 m. SW of Maidstone, on the river Medway. Area 1,310 acres. Pop. in 1831, 344; in 1841, 326.—Also a parish in Suffolk, 3¾ m. S of Needham. Area 590 acres. Pop. in 1831, 74; in 1841, 98.

NETTLESWELL, or NETSWELL, a parish in Essex, 16 m. W by N of Chelmsford. Area 1,830 acres. Pop. in 1831, 316; in 1841, 336.

NETTLETON, a parish in Lincolnshire, 1 m. S by W of Caistor. Area 3,570 acres. Pop. in 1831, 385; in 1841, 457.—Also a parish in Wiltshire, 7½ m. NW by W of Chippenham. Area 1,860 acres. Pop. in 1831, 385; in 1841, 536.

NETTOKO, a town of Senegambia, in the kingdom of Bambuk, on the Sanonkolez, 24 m. ESE of Ferbanna. It has gold mines in its environs.

NETTOLITZ. See NETOLITZ.

NETTSTALL, a village of Switzerland, in the cant. and 3 m. N of Glaris, near the l. bank of the Lintz, at the foot of the Wiggis. Pop. 1,600. It has a Protestant and a Catholic church, and possesses manufactories of paper and of straw-hats.

NETTUNO, a town and port of the Papal States, in the comarca and 34 m. SSE of Rome, on the Mediterranean. Pop. 1,800. There is now but little activity or commerce here, on account of the depopulation of the neighbouring country. It has the remains of a temple of Neptune, whence its name, and is supposed to be the *Cæno* or *Cerio* of the ancients, the port of *Antium*.

NETTUNO (ANTRO-DI), a stalactitic grotto on one of the promontories of Capo Caccia in the island of Sardinia, 12 m. from Alghero. It is situated close to the little island of Foradada, and so exposed that any wind between the NW and the S prevents an entry. The first vaulted cavern, forming an antechamber about 30 ft. high, has no peculiar beauty. Crossing a second cavern, in which are about 20 ft. of beautifully clear water, and then, turning to the left, we find ourselves in an intricate navigation among stalactites, with surrounding walls and passages of stalagmites of considerable height. Passing these, and proceeding westerly, we reach another cavern with a natural column in its centre, "the shaft and capital of which, supporting the immense and beautifully fretted roof, reminded me," says Mr. Tyndale, "of those in the chapter-house of the cathedral at Wells, and the staircase of the hall at Christ Church, Oxford. It stands, the growing monument of centuries, in all its massive and elegant simplicity, with, comparatively speaking, few other stalagmites to destroy the effects of its noble solitude. The vista of the caverns and passages through which we had passed disclosed in the distance a slight greyish shade, —the feeble struggle of the few rays of daylight contending with the victorious blaze of nearly 3,000 candles, which, placed in all parts of the gigantic abyss where we stood, were reflected on the unruffled lake at our feet, while the roseate tint of the carbonate of lime gave a warmth to the whole scene. Opposite to us was a diminutive mountain, on the summit of which a row of lights, arranged expressly to illumine the overhanging roof, gave to the small stalactites in the distance the appearance of icicles of a frozen fountain; and to our right hand were columns of enormous and bizarre formation from 50 to 60 ft. high, with recesses and projections of every variety. We then ascended this mountain, whence a *coup d'œil* of the whole surrounding hill, valley, and lake was obtained. In parts of the grotto were corridors and galleries, some 300 and 400 ft. long, reminding one, if such a comparison is allowable, of the Moorish architecture of the Alhambra."

NETWORITZ, a town of Bohemia, in the circle and 23 m. SE of Beraun, and 21 m. S of Prague.

NETZE, a river of Prussia, which issues from a lake in the prov. of Posen and regency of Bromberg, circle and 6 m. SE of Inowraclaw; passes Uskz, Czarnikow and Filehne; enters the prov. of Brandenburg and regency of Frankfort, and throws itself into the Warta, on the r. bank, 9 m. above Landsberg. It has a total course in a generally W direction of 150 m., and is navigable to Nackel.

NETZENBACH, a river of France, in the dep. of the Vosges, and cant. of Schirmeck, which has its source near the confines of the dep. of the Meurthe,

in the portion of the Vosges named the Basse-Bruche; and after a course of about 8 m. throws itself into the Bruche, at a hamlet of the same name.

NETZSCHKAU, a town of Saxony, in the circle of the Voigtland, bail. and 12 m. NNE of Plauen, on the Gölzsch, near its confluence with the Elster. Pop. 1,600. It has manufactories of woollen and linen fabrics, and of paper.

NEUBAIERN, a town of Bavaria, in the circle of Upper Bavaria, and presidial of Rosenheim, on the Inn. Pop. 370. In its environs is a quarry of millstone.

NEUBERG, a village of Styria, in the circle and 20 m. NNE of Bruck, and 45 m. N of Grätz, on the Murz. Pop. 340. It has a fine church belonging to a Cistercian abbey which was suppressed in 1786, and in the environs are extensive iron-mines.

NEUBETSCHE, a market-town of Hungary, in the comitat of Torontal, on the Theiss. Pop. 3,920.

NEUBOURG, or Neuf-Bourg (Le), a canton, commune, and town of France, in the dep. of the Eure and arrond. of Louviers. The cant. comprises 26 com. Pop. in 1831, 13,133; in 1841, 12,525. The town is situated in a fertile plain between the Rille and the Seine, 18 m. SW of Louviers. Pop. in 1841, 2,105. It is a place of active manufacturing industry in cotton goods.

NEUBURG, a duchy of the German empire. It is divided into two parts; the western, lying between Suabia and Franconia, on both sides of the Danube; the eastern, called also the Nordgau, stretching along the borders of the Upper palatinate. The territory, which has an extent of 1,080 sq. m., is well-cultivated, and contains some iron-works; but the principal manufactures are of hemp and flax. In 1808 the whole was incorporated in the Bavarian circles of the Upper Danube and the Regen. It was the N. branch which succeeded to the states and dignity of the elector of Bavaria in 1742.—Also a town of Bavaria, on the r. bank of the Danube, 11 m. W of Ingoldstadt. Pop. 6,000. It is neatly built, and contains several good edifices. The old ducal palace is still a good building. N. has also a collegiate church, a college, an hospital, and an orphan-house. It was formerly a fortified place, but was dismantled in the early part of the 18th cent.

NEUBURG. See Kloster-Neuburg.

NEUBURG-VOR-DEM-WALDE, *i. e.* 'N. near the Forest,' a town of Bavaria, on the Schwarzach, 21 m. ESE of Amberg. Pop. 1,400.

NEUBURG-AN-DER-KAMLACH, a town of Bavaria, on the Kamlach, 6 m. NW of Ursberg.

NEUCHATEL. See Neufchatel.

NEUDAMM, a town of Prussia, in the prov. of Brandenburg, 11 m. N by E of Custrin, on the Mietzel. Pop. 2,997 in 1837. It has manufactories of woollens and hosiery.

NEUDEK, a town of Bohemia, 10 m. NW of Carlsbad. Pop. 1,966.

NEUDENAU, a town of Baden, 11 m. N by E of Heilbronn, on the r. bank of the Jaxt. Pop. 1,222.

NEUDORF, a village of Lower Austria, 36 m. N by E of Vienna. Pop. 900.—Also a v. of Croatia, in the com. of Agram.—Also a v. of Bohemia, 6 m. S of Elnbogen.—Also a v. of Saxony, on the Elbe, N of Dresden.

NEUDORF, or Iglo, a town of Hungary, in the com. of Zips, 5 m. S of Leutschau, on the l. bank of the Hernad. Pop. 5,871. It is the seat of the central administration of the 16 privileged towns of Zips, and of a tribunal of mines; and has iron and copper-works, with manufactories of linen and of salt.

NEUENBURG, or Nowe, a town of Prussia, on the Vistula, 10 m. SW of Marienwerder. Pop. 2,960.—Also a town of Baden, on the Rhine, 15 m. S of Old Breisach. Pop. 740.—Also a town of Würtemberg, in the Black forest, on the Enz, 15 m. SE of Carlsruhe. Pop. 1,554. It is neatly built, having been almost entirely burned down in 1783.

NEUENDORF, a town of Prussia, on the Rhine, 2 m. N of Coblenz. Pop. 1,800.

NEUENECK, or Newenegg, a village of Switzerland, in the cant. and 6 m. SW of Berne. Pop. 2,155, Protestants.

NEUENHAUS, or Nienhaus, a town of Hanover, in the gov. and 50 m. WNW of Osnabruck, on the Dinkel, an affluent of the Vechte. Pop. 1,462.

NEUENKALDEN, or Neu-kalden, a town of Mecklenburg-Schwerin, near the lake of Cummerow, 30 m. SE of Rostock. Pop. 2,150. It has manufactories of linen and of tobacco-pipes.

NEUENKIRCHEN, a town of Prussian Westphalia, in the gov. of Minden, 16 m. WNW of Paderborn. Pop. 1,370.—Also a town of Hanover, 5 m. SW of Otterndorf. Pop. 1,100.

NEUENKIRCHEN-BEI-MELLE, a village of Hanover, 6 m. SSE of Melle. Pop. 1,180.

NEUENRADE, a town of Prussian Westphalia, in the Mark, near the Lenne, 7 m. S of Iserlohn. Pop. 1,277. It has manufactories of linen and of iron.

NEUENSTADT, a town of Würtemberg, on the Kocher and the Brettach, 10 m. WNW of Oehringen. Pop. 1,476.

NEUENSTEIN, a town of Würtemberg, on the Eppach, 3 m. E of Oehringen. Pop. 1,486.

NEUENWALDE, a village of Hanover, 32 m. W of Stade. Pop. 480.

NEUERBURG, a village of Prussia, in the prov. of the Rhine, 9 m. W of Bittburg. Pop. 1,400.

NEUERMULEN, a village of Russia, in the gov. of Livonia, on the r. bank of the Aa, 9 m. NNE of Riga.

NEUERN, a town of Bohemia, in the circle and 15 m. SSW of Klattau.

NEUERN (Unter), a village of Bohemia, on the Angel. 12 m. SSW of Klattau. Pop. 825.

NEUERVELT, a village of Bohemia, near the source of the Elbe, 18 m. NNW of Arnau.

NEUFAHRWASSER, a village of Prussia, 4 m. N of Danzig, at the mouth of the west arm of the Vistula, forming the port of Danzig. Its lighthouse stands in N lat. 54° 24′, E long. 18° 34′.

NEUFBERQUIN, a village of France, in the dep. of Nord, cant. of Merville. Pop. 1,376.

NEUFBOURG, a village of France, in the dep. of Bas-Rhin, cant. and 4 m. ENE of Lauterbourg. Pop. 890.—Also a canton and town in the dep. of Eure, 12 m. WSW of Louviers. Pop. of cant. in 1841, 12,525; of town 2,105. The town stands in a fertile plain between the Rille and the Seine. It has extensive cotton-works, and an active trade in cattle and grain, the produce of the surrounding country.

NEUF-BRISACH. See Brisach.

NEUFCHATEAU, a town of France, in the dep. of Vosges, on the Mouzon, near its junction with the Meuse, 35 m. NW of Epinal. Pop. 3,598. It is the seat of a communal college, and has a public library of 7,500 vols. Its manufactures chiefly consist of coarse cottons, and basket-work.—The arrond. of N., comprising 5 cants., has an area of 111,265 hectares. Pop. in 1841, 65,527.—Also a town of Belgium, in the grand-duchy of Luxemburg, 30 m. WNW of Luxemburg. Pop. 1,648.

NEUFCHATEL, or Neuchatel, in German, Furstenthum - Neuenburg - und - Grafschaft-Valengin, a canton in the NW of Switzerland, between the parallels of 46° 47′ and 47° N lat., and bounded by the cant. of Berne, the lake of N., the Pays-de-Vaud, and the French dep. of Doubs. Its

superficial extent is about 281 sq. m. Pop. in 1836, 58,616; in 1850, 70,753, of whom 64,952 were Protestants, and 5,570 Roman Catholics. Its surface, which is divided between the basins of the Rhine and the Rhone, is mountainous, being intersected from S to N by several branches of the Jura chain. The climate is cold; winter continuing during 7 or 8 months. Pasture-lands occupy the greater part of the surface; but vines are cultivated in the lower and sheltered parts of the cant., bordering on the lake. The two principal valleys, the Val-de-Ruz and the Val-de-Travers, produce a little corn; but the higher part of the cant., bordering on France, is laid out only in pasturage and plantations, and corn is imported to supply the home-consumption. Cattle and cheese are exported. Of a total surface of 213,161 *poses* of 32,000 sq. ft. each, 60,006 *poses* are occupied with pasturage, 47,928 are in meadow-land, 44,133 in woods and forests, 34,353 in open land, 10,008 are cultivated, 7,211 in waste lands, and 4,591 in vineyards.

Manufactures.] The manufacturing industry of this cant. is very considerable. Its fabrics of cotton, linen, and woollen are extensive, as well as those of lace and stockings, watches, and other works in metal. Manufactures of printed cottons were established in the cant. in the beginning of the last cent., but they made little progress till about the year 1760, from which time up to 1804 there was a gradual increase and improvement in quantity and quality. In 1805 cylinders of engraved metal were introduced, and, though only employed by one manufacturer at first, they became general in 1811. To the various modifications and improvements of this discovery the cotton-printers attribute their principal success. The events of 1814 put an end to the pernicious influence of France upon the manufactures of Switzerland, and the manufacture of cotton prints again became active. At the present moment most of the cloths which are printed in N. are of Swiss manufacture, and are furnished principally by the canton of Zurich. For certain articles, and especially for those produced by the engraved cylinder machinery, the power-loom cloths of England are preferred. The weaving is more regular, and better suited to receive mechanical impressions. The probable production of printed cottons in N. is now about 80,000 pieces per annum, each containing 25 French ells, or about 32 English yds. The number of workpeople engaged is about 1,000, of whom five-eighths are men, and three-eighths women and children. Of these prints about 30,000 pieces are exported to the Prussian territories, and the remaining 50,000 to Holland, Belgium, and Italy. [*Bowring's Report in* 1836.] The art or trade of clock-making was first introduced into the mountains of N. in a manner worthy of notice. As early as the 17th cent., some workmen had constructed wooden clocks with weights, after the model of the parish clock which was placed in the church of Locle in 1630; but no idea had been as yet conceived of making clocks with springs. It was only about the latter end of the same cent. that an inhabitant of these mountains, having returned from a long voyage, brought back with him a watch, an object which was till that time unknown in the country. Being obliged to have his watch repaired, he carried it to a mechanic named Richard, who had the reputation of being a skilful workman. Richard succeeded in repairing the watch, and, having attentively examined its mechanism, conceived the idea of constructing a similar article. By dint of labour and of perseverance he at length succeeded, though not without having had great difficulties to surmount, as he was compelled to construct all the different movements of the watch, and even to manufacture some ill-finished tools in order to assist him in his labours. When this undertaking was completed it created a great sensation in the country, and excited the emulation of several men of genius to imitate the example of their fellow-citizen, and thus, very fortunately, the art of watch-making was gradually introduced among our mountains, whose inhabitants had hitherto exercised no other trade or profession than those which were strictly necessary to their daily wants, their time being principally employed in cultivating an ungrateful and unproductive soil. Lace-making was also introduced at the same period as the art of watch-making. The former was imported by the refugees from France, who had been compelled to seek an asylum in a Protestant country in consequence of the revocation of the edict of Nantes. Lace-making principally occupies the female sex, and a woman might earn from 1 to 3 frs. a-day, according to her skill and assiduity in her work. For a period of rather more than a century lace-making was a very lucrative occupation to the pop. of these mountains; but since the invention of machines for the manufactory of lace this branch of industry has entirely decayed. Most of the persons who were occupied in making lace have successively embraced some branch of watch-making. Others continue to make blond lace, though their earnings are very trifling; but, from the facility of transfer to other occupations, the destruction of this branch of industry has not occasioned any very considerable inconvenience. The number of watches manufactured annually in this canton may be calculated to be from 100,000 to 120,000, of which about 35,000 are in gold, and the rest in silver. Now supposing the first, on an average, to be worth 150 fr., and the others 20 fr., it would represent a capital of nearly 7,000,000 fr., without taking into consideration the sale of clocks and instruments for watch-making, the amount of which is very large. It is calculated that from 18,000 to 20,000 persons are occupied in watch-making, or in manufacturing instruments and articles for the construction of watches. [*Ibid.*]

Government.] The principality of N., though forming one of the confederated cantons of Switzerland, recognises the sovereignty of the king of Prussia, and pays to him an annual tribute. The representative body is nominated by the people, on a very extensive suffrage, with freedom and publicity of debate, and independence in the exercise of the electoral franchise. All the administrative functionaries are, however, nominated by the king of Prussia, and upon their nomination no *veto* is exercised by the legislature. The budgets are voted by the great council or the assembled deputies of the people, for whose account the imposts are received through agents nominated by the king; his representative has the title of 'governor,' and many of the members of the legislative body hold offices to which they have been named by the Prussian monarch. The principality does not form a part of the German commercial league, but has certain privileges and immunities allowed to its exports when they pass the Prussian frontier with certificates of Neufchatel origin. No custom-houses exist in any part of the canton, and the *péage* is much lower than in most of the other Swiss cantons.—The revenue of the canton of N., for 1834, was as follows:

Revenues.

1. Cens, tithes, domains, and fisheries,	£5,422	12	0
2. Forests,	499	2	0
3. Lods,	4,368	10	0
4. Salt, at per month,	3,228	14	0
5. Post-office,	2,056	8	0
6. Turnpikes (*péages*),	610	8	0

7. Casual revenues,	374	13	0
8. Extraordinary receipts,	118	14	0
Total,	16,679	1	0
Expenditure,	13,144	19	0
Surplus revenue,	3,534	2	0

It appears that the disbursements amount to about 4s. 8d. per inhabitant yearly. No new taxes of any sort have been laid on for more than six centuries, and many ancient imposts have been either reduced or abolished as unnecessary for the expenses of the government. The king of Prussia receives an annual revenue of £3,862 sterling from the principality, which is somewhat less than one-third of the whole expenditure. Independently of the sum charged in the account for the clergy, there are glebes attached to many of the livings, and the parishes aid by voluntary contributions.—The maximum salary of a clergyman is 2,200 fr. = £121; the minimum 1,300 fr. = £72; and the average 1,500 fr. = £83. There are 34 clergymen in the principality, which gives one to every 1,647 persons. Besides the amount which appears as furnished by the state for the purpose of education, every commune is required to provide a schoolmaster, and education is made obligatory throughout the principality. About two-thirds of the pop. are Neuchatelois; the remaining one-third being either from other provinces of Switzerland or from foreign countries.

History.] This cant. originally formed, with the adjacent principality of Valengin, a small state enjoying a considerable share of freedom; the prince being obliged, before his accession, to take an oath that he would preserve the integrity of the principality and secure to his subjects all their ancient rights. In 1707, on the extinction of the reigning family, the state acknowledged the claims of the king of Prussia to its sovereignty. In 1807, by the treaty of Tilsit, N. was ceded by Prussia to France, and given by Buonaparte to Marshal Berthier. The congress of Vienna acknowledged it a Swiss canton, but the nominal sovereignty of Prussia was preserved. The late king of Prussia granted to his Swiss subjects a constitutional charter. Nevertheless the ambiguous position of this little state, as a federal canton and a dependency of the house of Hohenzollern, has repeatedly occasioned considerable difficulties. The confederation only recognises the cantonal government; and in 1833, when the occupation of the territory was decreed, it resisted the attempts of the Prussian envoy to interfere in the matter. In 1848, the question was still further entangled by a revolution in N., mainly brought about by the efforts of a party in the neighbouring canton of Vaud. The constitution of the confederacy was fundamentally altered, and the newly-installed government were disposed to assert higher pretensions than had been urged by any of their predecessors. Prussia insisted upon the rights of the Crown in N.; whilst the Swiss government contended that the citizens had a right to change their constitution, and that the canton, as a member of the confederacy, could only be subject to the federal authority. Under these circumstances, Prussia called upon the other Powers which had been parties to the treaty of Vienna to support her in maintaining the rights guaranteed to her by that instrument; and the opinion of the governments represented at the conference was so far favourable to her claims that a protocol was drawn up in which they were asserted.

NEUFCHATEL, the cap. of the above canton, is situated in the midst of vineyards and gardens, near the point where the rivulet Seyon falls into the lake of Neufchatel, on its NW side, 25 m. W of Berne, in N lat. 46° 59′ 16″. Pop. in 1850, 7,727. It stands partly on an eminence, partly on a plain; at the base of the E range of the Jura, which stretches like a wall along the lake and the valley for 100 m. It is in general well-built, the houses having an air of neatness and elegance. It consists of four principal streets; and has several public buildings of interest, particularly the old castle, the town-house, the principal church, and the hospital. The manufactures of N. chiefly consist of printed cottons and linens.

NEUFCHATEL (LAKE OF), a considerable lake in the NW of Switzerland, 18 m. N of the lake of Geneva, surrounded by the cants. of N., Vaud, Friburg, and Berne. It is about 24 m. long, and 4 m. broad, extending from SW to NE. Its greatest depth is about 420 ft. Alt. above the level of the sea, 466 metres = 509 yds. The rivers that fall into it are the Orbe, the Ruz, the Seyon, and the Broie or Broye, which latter river connects it with Lake Morat. It discharges itself by the Thiel through the small lake of Bienne into the Aar, and eventually into the Rhine. It abounds in fish; and affords the means of steam-boat navigation between the towns of N. and Yverdun, though the boats on its surface are occasionally exposed to danger from sudden storms.

NEUFCHATEL-EN-BRAYE, a town of France, in the dep. of Seine-Inferieure, on the small river Bethune, 26 m. NE of Rouen. Pop. in 1841, 3,572; in 1789, 1,742. The environs are remarkable for the richness of their pastures, and the town has a considerable trade in butter and cheese.—The arrond. comprises 8 cants., and has an area of 153,914 hect. Pop. in 1841, 85,236.

NEUFCHATEL-EN-SAONNOIS, a village of France, in the dep. of Sarthe, cant. of La Fresnaye. Pop. 1,441.

NEUFELDEN, a town of Upper Austria, on the r. bank of the river Muhl, 17 m. NW of Lintz. Pop. 700.

NEUFFEN, a town of Würtemberg, 9 m. NE of Reutlingen, in a romantic valley on the Steinach, among the Suabian Alps. Pop. 1,789.

NEUFONTAINE, a village of France, in the dep. of Nievre, cant. and 6 m. E of Tannay. Pop. 900.

NEUFRA, a town of Würtemberg, in the principality of Furstenberg, 2 m. S of Riedlingen. Pop. 700.

NEUFREN, a village in the principality of Hohenzollern, 10 m. N of Sigmaringen. Pop. 900.

NEU-GARIEP. See GARIEP.

NEUGEDEIN, a village of Bohemia, in the circle and 15 m. W of Klattau. It has extensive manufactories of merinos and fine woollens.

NEUGERSSING, a village of Saxony, 9 m. SSW of Pirnau, on the r. bank of the Rothen-Wasser. Pop. 656.

NEUHAMBERG, a village of Hesse-Darmstadt, in the prov. of Rhein-Hessen, on the Appelbach, near Wölstein. Pop. 553.

NEUHAUS, or GINDRZICHU-HRADICZ, a well-built town of Bohemia, in the circle and 24 m. SSE of Tabor. Pop. 5,776. It contains a gymnasium, and a fine castle of the counts of Czenim; and has extensive manufactories of woollens. In 1801 the greater part of the town was laid in ashes by fire.—Also a village of Hanover, 16 m. SE of Lauenburg, on the Krainke. Pop. 675.—Also a town of Hanover, in the duchy of Bremen, on the river Oste. Pop. 1,271. Its harbour is obstructed by a sand-bank at the influx of the Oste into the Elbe. It has, however, some trade in corn and linen, and ship-building.—Also a town of Prussian Westphalia, in the gov. of Minden, situated at the point where the Padre and Alme fall into the Lippe, 2 m. NNE of Paderborn. Pop. 1,500.—Also a village of Bavaria, on the l. bank of the Saal, opposite Neustadt.—Also a village of Hungary, 15 m. S of Furstenfeld, in the com. of Euenburg. Pop. 500.—Also a village of Saxe-Meiningen, 7 m. SSE of Sannenburg. Pop. 400.

NEUHAUSEL, a town of Hungary, on the r. bank of the river Neutra, 48 m. E by S of Presburg. Pop. 6,699. It had a castle, formerly of great strength, but which was demolished in 1724.

NEUHAUSEN, a town of Würtemberg, near Esslingen. Pop. 2,376 in 1840.—Also a village of Würtemberg, in the bail. and 6 m. E of Tuttlingen. Pop. 900.—Also a village of Switzerland, in the cant. and 8 m. W by S of Schaffhausen, with large iron-manufactures.

NEUHOF, a market-town of Bohemia, 4 m. NW of Czaslau. Pop. 450.—Also a village of Hesse-

Cassel, 6 m. SSW of Fulda. Pop. 470.—Also a village of Bavaria, on the Zenn, 9 m. NNE of Anspach.

NEUHOFEN, a village of the archd. of Austria, on the l. bank of the Krems, 12 m. WNW of Steyer. Pop. 450.

NEUILLE-PONT-PIERRE, a canton and commune of France, in the dep. of the Indre-et-Loire, and arrond. of Tours. The cant. comprises 10 coms. Pop. in 1831, 8,943; in 1841, 8,752. The v. is 14 m. NNW of Tours. Pop. 1,701. It has manufactories of cloth, serge, and drugget.

NEUILLY, a village of France, in the dep. of the Haute-Marne, cant. and 6 m. WSW of Doulevent-le-Chateau, and 12 m. SSW of Vassy. Pop. 500. Coal is found in the environs.

NEUILLY-L'EVEQUE, or Les Langres, a canton and commune of France, in the dep. of the Haute-Marne, and arrond. of Langres. The cant. comprises 17 coms. Pop. in 1831, 8,471; in 1841, 8,630. The v. is in the cant. and 8 m. ENE of Langres, and 20 m. W of Bayeux. Pop. 1,213.—Also a village in the dep. of the Calvados, cant. and 4 m. S of Isigny, near the Elle, an affluent of the Vire. Pop. 1,000. Cheese is made here in large quantities.

NEUILLY-SAINT-FRONT, a canton, commune, and town of France, in the dep. of the Aisne, and arrond. of Chateau-Thierry. The cant. comprises 34 coms. Pop. in 1831, 11,732; in 1841, 12,379. The town is 12 m. NNW of Chateau-Thierry, near the Ourcq. Pop. in 1841, 1,802. Woollen hosiery is extensively manufactured here.

NEUILLY-LE-LIERRE, a village of France, in the dep. of the Indre-et-Loire, cant. and 9 m. NNE of Vouvray, and 14 m. NE of Tours. Pop. 500.

NEUILLY-LES-REAL, a canton, commune, and town of France, in the dep. of the Allier, and arrond. of Moulins-sur-Allier. The cant. comprises 10 coms. Pop. in 1831, 5,859; in 1841, 6,061. The v. is 12 m. SSE of Moulins-sur-Allier, on an affluent of the Allier. Pop. 1,139.

NEUILLY-SUR-SEINE, a canton and commune of France, in the dep. of the Seine, and arrond. of Saint-Denis. The cant. comprises 17 coms. Pop. in 1831, 8,471; in 1841, 8,630. The v. is 7 m. SW of Saint-Denis, and 2 m. WNW of the Varriere-de-l'Etoile in Paris, on the road from Paris to St. Germain, and on the r. bank of the Seine. Pop. in 1841, 9,493. It is well-built, and has a handsome church. It has manufactories of articles in caoutchouc, of hosiery and lace, of straw-hats, shoes, oriental damask, chemical substances, ratafias, &c.; several oil-mills, printing-mills, bleacheries, distilleries, tallow-works, &c. In its vicinity is the Chateau-de-Neuilly, a private residence of the late ex-king Louis-Philippe, the chateaux de Villiers and de Bagatelle, and extensive nursery gardens. The Seine here forms several islands, and is crossed by a wooden bridge, built by Perronet, and which, for the combination of elegance and solidity exhibited in its construction, is considered a *chef-d'œuvre*. It is 750 ft. in length, and is supported by 5 arches, 120 ft. in breadth, and 30 ft. to the key-stone.

NEUILLY-EN-THELLE, a canton and commune of France, in the dep. of the Oise, and arrond. of Senlis. The cant. comprises 15 com. Pop. in 1831, 10,182; in 1841, 10,200. The village is 15 m. W of Senlis, and 18 m. SE of Beauvais. Pop. 1,197. It has a fine castle and park, and has extensive manufactories of silk and cotton fabrics. Sheep of the merino breed are reared in great numbers in the locality.

NEUILLY-LE-VENDIN, a commune of France, in the dep. of the Mayenne, cant. and 3 m. NW of Couptrain, and 20 m. NE of Mayenne, near the l. bank of the river of that name. Pop. 1,520.

NEUKIRCH, a town of Saxony, on the river Wesenitz, 7 m. SSW of Budissin.—Also a village of Prussian Silesia, in the reg. of Oppeln, 9 m. ESE of Leobschutz. Pop. 1,040.—Also a town of the archd. of Austria, 24 m. WNW of Lintz.

NEUKIRCHEN, a town of the electorate of Hesse, 31 m. S of Cassel, on the Greuft. Pop. 1,580.—Also a town of Saxony, 13 m. SE of Plauen. Pop. 1,400.—Also a town of Bavaria, 24 m. NW of Pasau. Pop. 1,100.—Also a village of Bavaria, 4 m. W of Teisendorf.—Also a town of Bavaria, 27 m. SSE of Bamberg, on the Brand.—Also a village of the Prussian prov. of the Rhine, in the duchy of Juliers, 6 m. E of Grevenbroich. Pop. 1,700.

NEUKLOSTER, a village of Mechlenburg-Schwerin, 9 m. E of Wismar. Pop. 1,250.

NEULERCHENFELD, a village of the archd. of Austria, 1 m. W of Vienna. Pop. 4,700.

NEULERT, a village of Würtemberg, between the Jaxt and the Kocher, 35 m. N of Ulm. Pop. 1,500.

NEULIAR, a town of France, in the dep. of Morbihan, cant. of Cleguerec, 4 m. N of Pontivy. Pop. 2,000.

NEUMAGEN, a town of the Prussian prov. of the Rhine, on the r. bank of the Moselle, 11 m. ENE of Treves. Pop. 1,100.

NEUMARK. See Maros, and Maros-Vasarhely.

NEUMARK, a village of the archd. of Austria, 15 m. NNE of Salzburg. Pop. 550.—Also a village of Galicia, 30 m. W of Norvi-Sandec, at the confluence of the White and the Black Dunajec.—Also a village of Prussia, in the reg. and 15 m. SE of Stettin. Pop. 540.—Also a village of Prussia, in the reg. and 38 m. SE of Marienwerder, on the l. bank of the Drewenz. Pop. 1,040.—Also a village of Saxe-Weimar, 9 m. NNW of Weimar, on the r. bank of the Wippach. Pop. 340.

NEUMARKT, a small but well-built town of the Tyrol, on the Adige, 19 m. NNE of Trente. Pop. 520.—Also a town of Bavaria, in the Upper palatinate, on the Sulz, and 19 m. SE of Nuremberg, on the road between Nuremberg and Ratisbon. Pop. 3,085. Near the town are mineral waters, with appropriate buildings for visitors. It was here that, on the 23d of August, 1796, the French, under Jourdan, met with the first of that series of defeats which led to their retreat across the Rhine.—Also a neat market-town of Bavaria, on the Rott, 43 m. ENE of Munich. Pop. 900.—Also an ancient town of Prussian Silesia, 21 m. WNW of Breslau, on the railway to Glogau. Pop. 4,100. It has woollen and linen manufactures. Near this is the village of Leuthen, where the Prussians obtained a signal victory over the Austrians on the 5th December, 1757.—Also a small town of West Prussia, situated on the Drewenz, 10 m. SE of Tempelburg.

NEUMARKTL, or Tersezch, a small town of Austrian Illyria, in Carniola, 16 m. S of Clagenfurt, at the foot of Mount Leobel. It has manufactories of iron and copper, also of leather and coarse woollens.

NEUMUHL, a village of Prussia, in the reg. of Frankfort, circle of Custrin. Pop. 348.

NEUMUNSTER, a town of Denmark, in Holstein, situated on the Schwale, 18 m. SSE of Kiel, near the railway line to Hamburg. Pop. 1,600. It has several woollen factories.

NEUNDORF, a village of Prussian Silesia, in the reg. of Liegnitz, 5 m. NNE of Bunzlau. Pop. 1,000.—Also a v. in the reg. of Breslau, circle of Habelschwerd. Pop. 472.

NEUNDORF (Ober), a village of Prussia, in the reg. of Lieguitz, circle of Görlitz. Pop. 416.

NEUNDORF (Sohr), a village of Prussia, in the reg. of Liegnitz, circle of Görlitz. Pop. 622.

NEUNDORF (Schwarz), a village of Prussia, in the reg. of Liegnitz, circle of Lowenberg. Pop. 394.

NEUNHOFEN, a village of Saxe-Weimar, in the bail. and 1½ m. SW of Neustadt, on the Orla. Pop. in 1837, 300.

NEUNKIRCHEN, a town of Lower Austria, on the Schwarza, 35 m. S by W of Vienna. Pop. 2,000.—Also a village of Baden, 6 m. NW of Mosbach. Pop. 800.—Also a town of Prussia, in the prov. of the Rhine, 4 m. S of Ottweiler. Pop. 1,600.—Also a village of Prussia, in the reg. of Treves, circle of Sieg. Pop. 326.

NEUNSTADT, a village of Saxe-Meiningen, 12 m. N of Eisfeld, on the Rennsterg. Pop. 450.

NEUPAKAU, a town of Bohemia, 57 m. NE of Prague. Pop. 2,482, chiefly employed in cotton-factories.

NEUPOLLA, a village of the archd. of Austria, 56 m. NW of Vienna.

NEURATH, a village of Prussia, in the reg. of Dusseldorf, circle of Grenenbroich. Pop. 573.

NEUREICHENAU, a village of Bohemia, in the circle and 32 m. E of Tabor. Pop. 600.

NEUREUSCHE, or Nowarzisse, a town of Moravia, 42 m. W of Brunn. Pop. 900.

NEURODE, a town of Prussian Silesia, in the co. and 12 m. NNW of Glatz, on the Walditz. Pop. in 1846, 5,300, whose chief employment is in the manufacture of woollens.—Also a v. in the reg. of Breslau, circle of Wartenberg. Pop. 296.

NEUSALZ, a neat town of Prussian Silesia, 22 m. NW of Glogau, on the l. bank of the Oder. Pop. 3,370, a considerable proportion of whom are Hernhutters or Moravians. The town was founded by a colony of that sect, who, like the majority of their brethren in Germany, are manufacturers of cotton-goods, linen, and lace.

NEUSALZA, a village of Saxony, 9 m. SSE of Bautzen.

NEUSATZ, Neo-Planta, or Uj-Videk, a considerable town of Hungary, in the palatinate of Bacs, in N lat. 45° 16′, 46 m. NW of Belgrade, separated from Peterwardein only by the Danube, and considered a suburb of that town until its population exceeded that of the parent settlement. It is, however, totally distinct in a civil point of view, having received the privileges of a free city in 1751, and having its own magistrates. It is neatly built, and surrounded with a wall. Its pop. in 1845 was 17,400, and appears to be on the increase. The trade of N., favoured by the navigation of the Danube, is considerable particularly with Turkey. The majority of the inhabitants are of the Greek church.

NEUSCHLOSS, a large village of Bohemia, 3 m. S of Leypa.

NEUSCHONBERG (Lower and Upper), two villages of Saxony, in the Erzgebirge circle, 6 m. E of Zöbelitz.

NEUSE, a river of North Carolina, U. S., which rises near Hillsborough, and runs SE into Pamlico sound, after a course of 350 m. It is navigable for sea-vessels 12 m., and for boats 200 m.

NEUSEN, a village of Prussia, in the reg. and circle of Aachen. Pop. 367.

NEU-SHEHR, a town of Asiatic Turkey, in the pash. of Koniyeh, in N lat. 38° 37′. It is a pleasing and cleanly town, situated at the side of a bold ravine, and darkly backed by high cliffs of volcanic rocks. The Greeks, who form a considerable portion of the community here, appear to have congregated into the 'New city;' for all the numerous and various troglodyte villages in the neighbourhood are now, for the most part, abandoned by their original occupants. N. contains 2,000 houses of Mahommedans, 800 of Greeks, 60 of Armenians, two large *jámis*, one Greek church, 9 kháns, a bath, 6 Mahommedan schools, and a quadrangular castle with round towers at the angles. In a commercial point of view N. is, when compared with other towns of the interior of Asia Minor, a very flourishing place. It has a mean elevation above sea-level of 3,940 ft.

NEUSIEDLER-SEE, or Fertoe-Tava, a considerable lake in the W of Hungary, lying between the coms. of Oedenburg and Wieselburg, 19 m. SSW of Presburg. It extends from N to S, its southern extremity making a considerable curve towards the E. Its length is about 24 m.; its breadth, where greatest, about 10 m. It is too shallow to admit of navigation. Its shores on the N side are hilly; on the W are covered with vineyards and forests; on the E they are flat, marshy, and overgrown with reeds, and this character prevails to the neighbourhood of the Danube. Its depth varies from 9 to 13 ft., and is said to be decreasing. Its water, though generally clear, becomes turbid, or of a pale milky green, when agitated by wind, and is liable to considerable variations in height according to the previous degree of rain or drought. Its great peculiarity is its saltness, which appears to be produced by the presence not of the common muriate of soda but of nitre; its fish, chiefly carp and pike, are consequently not numerous. In 1777 and 1780, a dike or mound was erected to form the SE limit of this lake; but beyond it is a large marsh called the Hansag: see that article. The only town on the lake is Rust or Ruzt, celebrated for the excellence of its wines.

NEU-SOHL, or Besztercze-Banya, a large town of Hungary, on the rivers Gran and Bistricz, the chief place of the palatinate of Sohl, 24 m. NNE of Chemnitz, and 80 m. N of Pest, in N lat. 48° 45′. It was founded in 1222 by the Hungarian government, who brought hither a colony of Saxons for the purpose of working the mines. It is well-built in the German style, wide-streeted, and rather imposing in its appearance; and has an old castle, a Catholic and Lutheran church, and an hospital. A Catholic bishopric was founded here in 1766; and there are also a Catholic seminary and a high school called an archi-gymnasium. The Lutherans have a gymnasium and school. In the neighbourhood are extensive copper mines, particularly at Herrengrund; and the town contains numerous smelting-houses and a number of forges. A mining court or judicial establishment for the decision of disputes connected with the mines of an extensive district around has its seat at N. The vicinity is laid out in gardens and vineyards. The pop. of the town itself is about 3,600; but with that of the adjacent villages, nearly 12,000, partly Germans, partly Slowacs.

NEUSS, a town of Prussia, in the gov. of Dusseldorf, on the Erfft, and about 1 m. from its influx into the Rhine, in N lat. 51° 18′. Pop. 8,000. It is partly fortified with bastions and towers. Its manufactures consist of cotton stuffs, ribbons, baize, flannels, and yarns; it has also some trade in corn, oil, and wood. N. was the *Novesium* of the Romans.

NEUSTADT, a village of the duchy of Brunswick, on the r. bank of the Radau, 5 m. E by S of Goslar. Pop. 900. A little to the S of this village are the productive salt-works of Juliushall, belonging in common to Brunswick and Hanover.—Also a town of Hesse-Cassel, 13 m. E of Marpurg. Pop. 1,350.—Also a town of the grand-duchy of Mecklenburg-Schwerin, on the river Elde, 18 m. SSE of Schwerin. Pop. 950.—Also a town of Switzerland, in the cant. of Berne, on the lake of Bienne, 1½ m. N of Cerlier. Pop. 1,411.—Also a town of the Prussian province of the Rhine, in the gov. and 30 m. E

of Cologne. Pop. 2,790.—Also a town of Prussian Silesia, in the gov. of Oppeln, on the Prudnitz, 18 m. SE of Neisse. It is surrounded by an earthen mound, and is regularly built; and has breweries, manufactories of linens and woollens, and a considerable trade in wines from Hungary. Pop. 4,100.—Also a town of Prussian Poland, 30 m. SSE of Posen, on the l. bank of the Warta. Pop. 1,600, of whom about a fourth are Jews.—Also a town of Saxony, 19 m. E of Dresden. Pop. 1,500, chiefly engaged in linen manufactures.—Also a town of Prussia, on the river Biala, 22 m. NNW of Dantzic. Pop. 1,150.—Also a town of Prussian Saxony, immediately adjoining to Magdeburg, and forming properly a part of that town.—Also a circle or inferior division of Saxony, ceded to Prussia by the treaty of Vienna in 1815, and subsequently made over in part to the grand-duke of Saxe-Weimar. The part so ceded to the grand-duke is now annexed to the prov. of Weimar, while the remainder, with the detached parts of the Voigtland, lying among the possessions of the dukes of the house of Saxe, still forms a circle in the Prussian territory, and bears the name of N.—Also a seaport in the S of Denmark, in the duchy of Holstein, on the bay of Lubeck. Pop. 1,600. The arrivals at the port in 1849 were 265 vessels = 6,610 lasts of tonnage. It suffered greatly from fire in Sept. 1817.—Also a town of Baden, in the Black forest, on the Wutach, 17 m. ESE of Freyburg. Pop. 1,140.—Also a town of Bavaria, on the Danube, 18 m. SW of Ratisbon. Pop. 900.—Also a town of Bavaria, on the Waldnab, 50 m. N by E of Ratisbon. Pop. 1,300.

NEUSTADT (Mahrisch), a walled town of Moravia, in the circle and 13 m. NW of Olmutz, with a station on the railway to Prague. Pop. 4,000. It has a variety of manufactures on a small scale, amongst which are woollens, needles, saltpetre, gunpowder, and glass.

NEUSTADT (Wienerisch), a fortified town of Lower Austria, 13 m. S of Vienna, and connected with that city by a canal which runs from the Leitha to the Danube, and also by the railway to Gratz. Pop. in 1845, 9,323, exclusive of the garrison and military school, who make from 2,000 to 3,000 more. It is well-built, with wide and straight streets and neat squares. The military school was founded in 1752, and has an establishment of 36 professors, and 440 pupils. Being situated on the high road between Styria and Vienna, and forming one of the entrepots between Italy and Hungary, this town has a brisk trade; it also has manufactories of pins, brass-wire, silk stuffs, woollens, and stoneware; sugar-refineries, breweries, and paper-mills.

NEUSTADT, or Nowymiesto, a town of Bohemia, 76 m. ENE of Prague, on the r bank of the Metau. Pop. 5,600.

NEUSTADT-EBERSWALDE, a fortified town of the Prussian prov. of Brandenburg, at the confluence of the Finow and the Schwarz, and on the railway to Stettin. Pop. in 1846, 5,360. It consists of two parts, called Neustadt and Eberswalde. A colony of Swiss Protestants settled here in 1693; and another colony from Thuringia in Saxony, in 1743 and 1748. The pop. are chiefly employed as hardware manufacturers.

NEUSTADT-AN-DER-AISCH, a town of Bavaria, 22 m. WNW of Nuremberg, on the r. bank of the Aisch. Pop. 1,800, chiefly engaged in woollen and cotton manufactures.

NEUSTADT-AN-DER-DOSSE, a town of Prussian Brandenburg, 44 m. WNW of Berlin. Pop. 800. It has a manufactory of plate-glass of fine quality, which has existed here since 1696.

NEUSTADT-AN-DER-HARTH, a town of Bavaria, on the Speyerbach, at the foot of the mountain called the Harth, 12 m. N of Landau, and 17 m. SW of Manheim. Pop. 2,900.

NEUSTADT-AN-DER-HAYDE, a town of the duchy of Saxe-Coburg, on the Rotha, which is united by a canal to the Sternach, 8 m. NE of Coburg. Pop. 1,370.

NEUSTADT-AM-KULMEN, a town of Bavaria, 15 m. SE of Baireuth. Pop. 900.

NEUSTADT-AN-DER-WALD-NAB, a town of Bavaria, 32 m. ENE of Baireuth. Pop. 1,130.

NEUSTADT-AN-DER-ORLA, a town of the grand-duchy of Saxe-Weimar, 26 m. SE of Weimar. Pop. 4,200. It has manufactories of woollen, linen, and leather.

NEUSTADT-AN-DER-RUBENBERG, a town of Hanover, on the Leine, 15 m. NW of Hanover. Pop. 1,300.

NEUSTADT-AN-DER-SAALE, a town of Bavaria, 41 m. N by E of Wurzburg. It is a well-built place.

NEUSTADT-BEI-STOLPEN, a town of Saxony, 6 m. NE of Hohnstein, on the Polenzbach. Pop. 1,500.

NEUSTADT-UNTERM-HOHNSTEIN, a village of Hanover, in the gov. and 60 m. SE of Hildesheim. Pop. 550.

NEUSTADTEL, a town of Bohemia, on the borders of Lusatia, 66 m. NNE of Prague. Pop. 1,800.—Also a mining village of Saxony, 21 m. SSW of Chemnitz. Pop. 900.—Also a town of Bohemia, on the borders of Bavaria, 77 m. WSW of Prague. Pop. 1,820.—Also a town of Prussian Silesia, in the gov. of Liegnitz, 15 m. W by N of Great Glogau. Pop. 1,120.

NEUSTADTEL, or Rudolphswerth, a town of Austrian Illyria, in the gov. and 25 m. SSE of Laybach, on the l. bank of the river Gurk. Pop. 1,600.

NEUSTADTEL (Ober), a town of Hungary, in the com. of Trentsen, on the r. bank of the Kiszucsa.

NEUSTADTEL-AN-DER-WAAG, or Vag-Ujheli, a town of Hungary, in the com. of Neutra, on the river Waag, 52 m. NNE of Presburg. Pop. 2,500.

NEUSTADTL, or Nowymiesto, a town of Moravia, in the circle and 21 m. NE of Iglau. Pop. 1,814.

NEUSTAPOW, a village of Bohemia, in the circle and 15 m. N of Tabor.

NEUSTIFT, a village of Bohemia, in the circle and 18 m. E of Tabor.—Also a village of Styria, in the circle and 15 m. S of Marburg.—Also a village of Tyrol, 12 m. SSW of Inspruck. Pop. 1,400.

NEUTEICH, or Nitych, a town of W. Prussia, in the gov. of Dantzic, 16 m. W of Elbing. Pop. 1,380.

NEUTRA, or Nytra, a palatinate in the NW of Hungary, bordering on Moravia; bounded by the com. of Trentsen on the N; Thurotz on the NE; Bars on the E; Komorn on the S; Presburg on the W; and by Moravia on the NW. It is skirted by the March in the NW, and is intersected by the Waag. The W part is traversed by the Carpathians, ramifications from which extend towards its central and E parts. Its area is estimated at 121·9 German sq. m. Pop. in 1837, 391,407, of whom three-fourths were Slavonians. The soil is productive, and a considerable number of cattle and horses are reared. The com. is divided into the 5 *marches* of Bajmocz, Bodok, Neustadtl, N., and Skalitz. Its principal towns are N., Skalitz, and Leopoldstadt.

Neutra, or Nytra, a town of Hungary, on a river of the same name, capital of the above palatinate, finely situated on two elevations, on one of which stands the bishop's palace and cathedral, 45 m. ENE of Presburg. Pop. 4,090. Behind the town rises a range of hills covered with forest-trees.

NEUVACHE, a village of France, in the dep. of Hautes-Alpes, cant. and 9 m. N of Briancon, on the Claret. Pop. 950.

NEUVEGLISE, a town of Belgium, in the prov. of W. Flanders, 10 m. S of Ypres. Pop. 2,650.—Also a town of France, in the dep. of Cantal, cant. and 9 m. SW of Saint-Fleur. Pop. 2,942.

NEUVELYRE (La), a commune and town of France, in the dep. of Eure, cant. of Rugles, on the r. bank of the Rille, 28 m. WSW of Evreux. Pop. 800.

NEUVEVILLE (La), a commune and village of France, in the dep. of Vosges, cant. of Raon-l'Etape, on the Meurthe. Pop. 1,200.

NEUVIC, a canton and town of France, in the dep. of the Dordogne, 14 m. SW of Perigueux, on the r. bank of the Isle. Pop. of cant. 9,505; of town 2,318.—Also a town and cant. in the dep. of Correze, 14 m. S of Ussel. Pop. of cant. 10,618; of town 2,619.

NEUVIC-ENTIER, a town of France, in the dep. of Haute-Vienne, cant. of Chateauneuf, on the r. bank of the Combade. Pop. 1,900.

NEUVIED. See Neuwied.

NEUVILLE, or Noville, a town of Switzerland, in the Pays-de-Vaud, 22 m. SE of Lausanne. At Rosek, in the vicinity, are salt-springs, and a quarry of variegated marble.

NEUVILLE, a village of France, in the dep. of Calvados, cant. and 1 m. N of Vire. Pop. 850.—Also a canton, commune, and town in the dep. of the Vienne, and arrond. of Poitiers. The cant. comprises 11 com. Pop. in 1831, 9,622; in 1841, 9,654. The town is 9 m. NW of Poitiers. Pop. 2,720.—Also a department and commune of Belgium, in the prov. of Namur, and arrond. of Dinant. Pop. of dep. 536; of com. 525.—Also a commune in the prov. of Liege, and dep. of Andrimont. Pop. 210.—Also a commune in the prov. of Luxemburg, and dep. of Vielsalm. Pop. 339.—See also Noville.

NEUVILLE, Neuveville, Bonneville, or Neustadt, a town of Switzerland, in the cant. and 21 m. WNW of Berne, bail. and 2 m. NW of Cerlier, on the W bank of Lake Bienne, at the foot of the Chasseral. Pop. 1,411. It contains the ruins of the castle of Schlossberg.

NEUVILLE (La), a commune of Belgium, in the prov. of Luxemburg, and dep. of Ceplet. Pop. 268.—Also a commune in the prov. of Luxemburg, and dep. of Tenneville. Pop. 184.

NEUVILLE-SUR-AIN, a commune of France, in the dep. of the Ain, and arrond. of Bourg-en-Bresse. The village is 3 m. NNE of Pont-d'Ain, and 12 m. SE of Bourg-en-Bresse, on the r. bank of the Ain, which is here crossed by an elegant bridge. Pop. 1,414. It has building-docks.

NEUVILLE-L'ARCHVEQUE, or Neuville-sur-Saone, a canton, commune, and town of France, in the dep. of the Rhone, and arrond. of Lyon. The cant. comprises 13 com. Pop. in 1831, 13,032; in 1841, 14,976. The town is 9 m. N of Lyon, and 6 m. SSW of Trevoux, on the l. bank of the Saone. Pop. 1,476. It has extensive silk and cotton mills, bleacheries, printing-mills, and plumber-works.

NEUVILLE-A'-BAYARD, a village of France, in the dep. of the Haute-Marne, and cant. of Chevillon, and 8 m. NE of Vassy. Pop. 150. It has 2 forges and a blast-furnace.

NEUVILLE-AUX-BOIS (La), a canton, commune, and town of France, in the dep. of the Loiret, and arrond. of Orleans. The cant. comprises 10 com. Pop. in 1831, 8,598; in 1841, 9,188. The town is 14 m. NE of Orleans. Pop. 2,556.

NEUVILLE-CHAMP-D'OISSEL (La), a commune of France, in the dep. of the Seine-Inferieure, and cant. of Boos, 8 m. SE of Rouen. Pop. 1,551.

NEUVILLE-EN-CONDROZ, a department and commune of Belgium, in the prov. of Liege, and arrond. of Huy. Pop. of dep. 599; of com. 500.

NEUVILLE-COPPEGUEULE (La), a village of France, in the dep. of the Somme, cant. and 8 m. S of Oisement, and 26 m. WSW of Amiens. Pop. 1,000.

NEUVILLE-LES-DAMES, or Neuville-sur-Renon, a commune and town of France, in the dep. of the Ain, cant. and 4 m. NNE of Chatillon-les-Dombes, and 12 m. WSW of Bourg, on the l. bank of the Renon. Pop. 1,304.

NEUVILLE - EN - FERRAIN, a commune of France, in the dep. of the Nord, cant. and 1½ m. N of Tourcoing. Pop. in 1841, 2,250.

NEUVILLE-FERRIERE, a village of France, in the dep. of the Seine-Inferieure, cant. and 1½ m. S of Neufchatel. Pop. 500. Iron is found in the locality.

NEUVILLE-EN-HEZ (La), a town of France, in the dep. of the Oise, cant. and 4½ m. WNW of Clermont, and 12 m. E of Beauvais. Pop. 680. It has extensive manufactories of linen and a flax spinning mill.

NEUVILLE - SOUS - HUY, a department and commune of Belgium, in the prov. of Liege, and arrond. of Huy, watered by the Meuse. Pop. of dep. 147; of com. 108.

NEUVILLE-AUX-JOUTES (La), a commune of France, in the dep. of the Ardennes, cant. and 3 m. WNW of Signy-le-Petit, and 14 m. W of Rocroy. Pop. 1,465. It has extensive iron-works.

NEUVILLE-AU-PONT (La), a commune and town of France, in the dep. of the Marne, cant. and 3 m. N of Sainte-Menehould, and 27 m. NE of Chalons, on the r. bank of the Aisne. Pop. 1,360. This town was built in 1203, by Blanche, countess of Champagne.

NEUVILLE-A-ROI (La), a village of France, in the dep. of the Oise, cant. and 8 m. E of St.-Just-en-Chaussée, and 11 m. NE of Clermont. Pop. 700. It was almost entirely destroyed by fire in 1797. It formerly contained a fort, which was taken by the English in 1428.

NEUVILLE - SUR - SARTHE, a commune of France, in the dep. of the Sarthe, cant. and 6 m. N of Le Mans, on the l. bank of the Sarthe. Pop. 1,378.

NEUVILLE-SUR-SEINE, a commune of France, in the dep. of the Aube, and cant. of Mussy-sur-Seine, 5 m. S of Bar-sur-Seine, on the r. bank of the Seine. Pop. 981. It is noted for its wine.

NEUVILLE-EN-TOURNAFUY (La), a village of France, in the dep. of the Ardennes, cant. and 4 m. S of Juniville, and 14 m. S of Rethel. Pop. 800.

NEUVILLE - SAINT - VAAST, a commune of France, in the dep. of the Pas-de-Calais, and cant. of Vincy, 4 m. N of Arras. Pop. 1,372. It has a manufactory of beet-root sugar, an oil-mill, and several breweries.

NEUVILLER, or Neuweiler, a small town and castle of France, in the dep. of Meurthe, on the l. bank of the Moselle, 9 m. SW of Luneville.

NEUVILLERS, a commune of Belgium, in the prov. of Luxemburg, and dep. of Recogne. Pop. 416.

NEUVILLY, a commune and town of France, in the dep. of Nord, cant. of Le Cateau, 12 m. ESE of Cambrai. Pop. 1,696.

NEUVY, a town of France, in the dep. of Nievre, 3 m. W of Clamecy. Pop. 1,350.—Also a town of France, in the dep. of Saone-et-Loire, dist. of Charolles. Pop. 1,126.—Also a town of France, in the dep. of Indre-et-Loire, 13 m. N of Tours. Pop. 1,628.

NEUVY-PAILLOUX, a commune and village of France, in the dep. of Indre, 8 m. S of Issoudun. Pop. 1,020.

NEUVY-SAUTOUR, a town of France, in the dep. of Yonne, 17 m. NW of Tonnere. Pop. 1,500.

NEUVY-SAINT-SEPULCRE, a town of France, in the dep. of Indre, 14 m. S of Chateauroux, on the r. bank of the Bouzanne. Pop. 2,040.

NEUVY-SUR-BARANION, a town of France, in the dep. of Cher, 16 m. NNW of Bourges.

NEUWARP, a town of Prussia, in Pomerania, on a small peninsula formed by a lake of the same name, which is connected with the Little Haf, 23 m. NNW of Stettin. Pop. 1,742.

NEUWEDEL, a town of Prussia, in Brandenburg, on the r. bank of the lake of Drage, 28 m. E of Stargard. Pop. 1,800.

NEUWEILER, or NEUVILLER, a commune and village of France, in the dep. of Bas-Rhin, cant. of La Petite Pierre, 6 m. N of Saverne. Pop. 1,740.

NEUWELT, a village of Bohemia, in the circle of Bitschow, among the Sudetic mountains, 14 m. ENE of Cromau.

NEUWERK, a village of the duchy of Brunswick, on the l. bank of the Bode. Pop. 350. There are large iron and tin works in the neighbourhood.—Also a small island in the embouchure of the Elbe, a dependency of the bail. of Ritzebüttel.

NEUWEYER, a village of the grand-duchy of Baden, in the bail. of Steinbach. Pop. 890.

NEUWIED, a town of Prussia, in the prov. of the Lower Rhine, in the reg. of Coblenz, on the Rhine, at the embouchure of the Vied, 8 m. WNW of Coblenz. It was the chief town of a petty principality, which enjoyed independence until 1806. The prince, who was a Calvinist, opened his little capital to all who felt themselves restrained elsewhere in the exercise of their worship. A mixed population was thus collected here, whose industry gave an impulse to the town, which in 1837 contained 5,708 inhabitants, who conduct a variety of manufactures in cotton and wool, hardware, linen, soap, watches, and cabinet-making. From its vicinity to the Rhine, N. has also a traffic in the products of the adjacent country, corn, wine, timber, and potash. The prince's palace is surrounded with extensive gardens, and contains a good library; and there are several excellent educational establishments in the town.

NEVA, a large river of Russia, which issues from the SW angle of the great lake Ladoga; and after a course of about 40 m. empties itself into the gulf of Finland, below St. Petersburg. Though its course is short, the medium breadth of its main stream is about 500 yds., and the depth of its mid-channel about 50 ft.; it is consequently navigable for vessels of considerable size. Its water is pure, and is used for drinking and cooking throughout St. Petersburg. The N. is generally frozen over from the end of October till April. It breaks up very rapidly; and for 3 or 4 months in the year its overflowing is immense. It is connected with the Volga by 3 different lines of canal-communication.

NEVADA (SIERRA), a chain of mountains in the S of Spain, forming the most elevated range in the whole peninsula. It branches off from the great Iberian chain, in the vicinity of the Sierras-de-Filabres and Algamilla; and bending in a SW, and then in a direction almost due W, separates the provs. of Granada and Murcia from Andalusia, and terminates to the NE of Cadiz. This range is denominated *Sierra Nevada*, or 'Snowy ridge,' from having its lofty summits covered the whole year with snow and ice; and must be very elevated from the circumstance of its being visible, in a clear day, from the opposite coast of Africa. It takes consecutively the denominations of Sierra-de-Gador, S.-de-Nevada, S.-de-Bermeja, and S.-de-Ronda. The perpetual snow-line on the Sierra-N. begins at the height of 3,305 varas or 9,171 ft. above the level of the sea: on the other ranges it seldom lies above a few months. Firs, oaks, and cork-trees clothe the higher regions; chestnuts, tamarisks, pines, and beeches, the lower. The loftiest peak is the Cumbre-de-Mulhacen, which is said to rise to an elevation of 13,600 ft. The Alpujarras and the mountains of Ronda form parts of this chain.

NEVADA (SIERRA). See article CALIFORNIA, p. 189.

NEVEL, a town of Russian Poland, in the gov. and 54 m. N of Vitebsk. Pop. 4,600.

NEVELE, a commune and town of Belgium, in the port of E. Flanders, 8 m. W of Ghent. Pop. 3,780. It has linen manufactures.

NEVENDON, a parish of Essex, 5 m. ESE of Billencay. Area 970 acres. Pop. 216.

NEVERBURG, a town of the Prussian prov. of the Rhine, 19 m. NNW of Treves. Pop. 130.

NEVERI, a river of Venezuela, in the province of Cumana, which takes its rise in the Bergantin mountains, and after a SSW and W course, joins the Aragua. The united stream runs into the sea at Barcelona. The waters of the different rivers which it receives in its course, and the declivity of the ground, give the united stream a powerful current.

NEVERS, a considerable town of France, the capital of the dep. of the Nièvre, situated on the declivity of a hill, on the r. bank of the Loire, where that river is joined by the Nièvre, 35 m. ESE of Bourges, and 116 m. NW of Lyons, in N lat. 46° 59′. Pop. in 1831, 15,085; in 1846, 13,751. Its appearance from the opposite side of the Loire is beautiful, but on entering the town the streets are found to be narrow and winding, and the houses in general old and gloomy. The quays on the river are bordered with good houses. It has a communal college, a school-of-design and chamber-of-manufactures; and is the see of a bishop. The Loire is here crossed by a fine bridge of 20 arches; and the principal entrance to the town is through a triumphal arch. The promenade called the Park is very fine, and the country between this and Moulins exhibits one of the most charming landscapes in France. The town has manufactories of glass, plate, hardware, china-ware, and enamel; and in the neighbourhood are iron-mines, forges, and government foundries for cannon, cannon-balls, chain-cables, and anchors. N. is by some supposed to be the *Noviodunum* of Cæsar. In 865 it was burned by Hugh Caput. It was the birthplace of Mirabeau.—The arrond. of N. comprises 8 cants., with a pop. in 1841 of 93,920. Its area is 226,115 hectares.—The cant. comprises 12 coms. Pop. in 1841, 23,623.

NEVERSINK, a township of Sullivan co., in the state of New York, U. S., 99 m. SW of Albany. It has a hilly surface, and is drained on the S by a river of the same name, an affluent of the Delaware, and on the E by Redout creek. Pop. in 1840, 1,681.

NEVERSINK (HIGHLANDS OF), an elevated tract of land, extending across the N part of Monmouth co., in the state of New Jersey. Near the ocean it has an alt. of from 300 to 400 ft. above sea-level. It is well-wooded, but is only to a small extent cultivated.

NEVES, a town of Brazil, in the prov. of Rio-de-Janeiro, on the l. bank of the Macahé. Pop. 1,000. It has a considerable trade in timber, rice, millet, and other articles of local produce.

NEVESIGNE', a town of Turkey in Europe, in Bosnia, and sanj. of Herzegovine, 15 m. E of Mostar, and 45 m. SSW of Bosna-Serai, on a small river of the same name, an affluent of the Narenta, and at the extremity of a plain, partly cultivated. It contains about 600 houses, generally well-built.

NEVEZ, a commune of France, in the dep. of the Finistère, cant. and 3 m. SW of Pontaven, and 13 m. W of Quimperlé. Pop. 1,450. It contains the ruins of the ancient castle of Poulguen, and has a considerable trade in barley and cider.

NEVIANO, a town of Naples, in the prov. of the Terra-d'Otranto, district and 11 m. ENE of Gallipoli, cant. and 8 m. SSE of Nardo. Pop. 700.

NEVIANSK (Nijnii), a town of Russia in Europe, in the gov. of Perm, district and 36 m. W of Irbit, on the r. bank of the Neïva. Pop. 12,000. It has 2 churches. Plate-iron forms its chief article of manufacture.

NEVIANSK (Verknii), a town of Russia in Europe, in the gov. of Perm, district and 48 m. W of Irbit, on the l. bank of the Neïva. Pop. 3,600. In its vicinity is a large iron-work.

NEVIGES, a village of Prussia, in the prov. of the Rhine, regency and 15 m. NE of Dusseldorf, and circle of Elberfeld-Mettmann. It has manufactories of cloth and of other woollen fabrics.

NEVIL, or Novil's (Bay), a bay of British North America, in the W part of Hudson's bay, on the coast of New North Wales, in N lat. 61° 58′, and W long. 92°.

NEVILLE, a commune of France, in the dep. of the Seine-Inferieure, cant. and 3 m. S of Saint-Valery-en-Caux, and 17 m. N of Yvetot. Pop. 1,578.

NEVILLE, a village of Washington township, Clermont co., in the state of Ohio, U. S., 126 m. ESE of Columbus, on the Ohio river.

NEVILLE (Port), an inlet of British North America, in New Caledonia, to the N of Vancouver's island, and of Johnstone's strait, in N lat. 50° 32′, and W long. 125°.

NEVIN. See Nefyn.

NEVINNOI, a fortress of Russia in Europe, in the prov. of the Caucasus, district and 63 m. WSW of Alexandrov, and 24 m. NNE of Stavropol, on the r. bank of the Kuban.

NEVIS, an island of the W. Indies, in the Leeward group, in N lat. 17° 10′, W long. 62° 40′, separated by a channel, 2 m. wide, from the SE extremity of St. Christopher's. From the S, it presents the appearance of a single mountain surrounded by a margin of low lands. It is only 24 m. in circumf.; and its single cone-shaped mountain, alt. 2,500 ft., has probably been produced by one volcanic eruption. It has an area of about 20 sq. m. It is well-watered; and the land, a strong tenacious marl, is in general fertile, producing on an average about 16 cwt. of sugar an acre. Its staple is sugar. The estimated value of the exports, in 1812, amounted to £217,672; the imports, to £94,293. The pop. at the same date consisted of 500 white persons, 250 free persons of colour, and 15,000 slaves. In 1841, its exports were valued at £17,455; its imports at £23,728. In 1847, the imports amounted to £37,103, but sunk to £21,261 in 1848. In 1847, the exports amounted to £78,405, but sunk to £23,593 in 1848. The sugar exported in 1847 amounted to 3,734 hhds.; in 1848 to 1,814 hhds. In 1851 its pop. was estimated at 10,200, of whom about 6¼ per cent. were under daily instruction. The island is divided into 5 parishes. Charleston, on the SW side, is the capital.—The English first settled here in 1628, by a colony from St. Christopher's; and the island flourished so greatly that in 1640 there were 4,000 whites. In 1706 it was taken by the French, but was restored by the peace of Utrecht. In 1782 it was again taken by the French, but was restored by the peace in 1783.

NEVIS, a small river in the SW of Lochaber, in Inverness-shire, which rises amidst a mass of mountains geographically 6 m. E of the summit of Ben-nevis, and runs WSW and W to Loch-Eil at Fort-William.

NEVIS (Loch), a long inlet of the sea, between the districts of Knoydart and Morar, in Inverness-shire. It is about 13 m. long, and varies in breadth from 2 m. to 2 furs.

NEVRAUMONT, a commune of Belgium, in the prov. of Luxemburg, and dep. of Orgeo. Pop. 144.

NEVREKOP, or Negrokop, a town of Turkey in Europe, in Rumelia, in the sanj. and 39 m. NNE of Serès, on the r. bank of a river of the same name, and at the foot of the Nevrekop-dagh, a ramification of the Balkan. A large fair is held here annually in October for the supply of Servia, Albania, and Upper Greece. In the environs are rich mines of iron.—The river N., in the lower part of its course, takes the name of Anghista, and flows into Lake Takinos.

NEVREMONT, a commune of Belgium, in the prov. of Namur, and dep. of Fosse. Pop. 306.

NEVYN. See Nefin.

*** NEW. For names with this prefix not occurring here, see the latter word of the compound term.

NEWABBEY, a parish and village in Kirkcudbrightshire, 7 m. S of Dumfries. Pop. in 1801, 832; in 1841, 1,049. The district on the sea-board, comprising upwards of one-fourth of the whole area, is regularly enclosed, and commands a noble prospect of the Solway frith and the coast of Cumberland. The upper district consists of rocky hills, muirs, and mosses. The Nith and the Solway, where they form the E boundary, are respectively about 2 and 12 m. broad; during the recess of the tide they are mere sandy wildernesses, threaded by the wandering fresh water stream; and at the flow of the tide, they exhibit in its richest form their peculiar phenomenon, and have a depth in spring-tides of 15 or 16 ft. The v. of N. stands on the Pow, 1¾ m. from the Nith, and 7 m. S of Dumfries. Pop. in 1836, 366. The ruins of the abbey, whence the p. has its modern name, are an imposing object in the centre of a magnificent landscape, occupying the middle of a fine level field in the vale of the Pow, and enclosed by a stone wall 8 or 10 ft. high. The church is the principal part of the existing ruin.

NEWAHY, a town of India, in the Jypur territory, 35 m. SE of Jypur.

NEW ALBANY, a township and town of Floyd co., in the state of Indiana, U. S., 121 m. S by E of Indianapolis, on the N bank of the Ohio. Pop. of township, exclusive of the city, in 1840, 1,308. The town, which is the largest in the state, is regularly laid out, with six streets running parallel to the river. Pop. 4,226.—Also a village of Greene township, Columbiana co., in the state of Ohio. Pop. 52.

NEW ALBION, a township of Cattaraugus co., in the state of New York, U. S., 307 m. W by S of Albany. It has an elevated and rugged surface, and is drained by Cattaraugus and Alleghany rivers. The soil is generally fertile. Pop. in 1840, 1,016.

NEW ALEXANDER, a village of West township, Columbiana co., in the state of Ohio, U. S., 146 m. NE by E of Columbus. Pop. in 1840, 150.

NEW ALEXANDRIA, a village of Westmoreland co., in the state of Pennsylvania, U. S., 171 m. W of Harrisburg, on the E side of Loyalhanna river, and containing in 1840 about 30 dwellings.

NEW ALSTEAD, a village of Alstead township, Cheshire co., in the state of New Hampshire, U. S., 54 m. SW of Concord, on the S side of Cold river.

NEW AMSTERDAM, a village of Harrison co., in the state of Indiana, U. S., 140 m. S of Indianapolis, on the E side of the Ohio, a little above the confluence of Indian creek.

NEWARK-UPON-TRENT, a parish and parl.

borough, in the southern division of Newark wapentake, co. of Nottingham, 17½ m. NE of Nottingham, by the Derby and Lincoln branch of the North Midland railway, and 16 m. from Lincoln, on the E bank of the 'Newark canal,' formed by an arm of the Trent, which deviates from the main stream a little above N., unites with the river Deven beyond its junction with the Cardyke, and again inosculates with the main stream a little below N. Area of the p. 2,080 acres. Pop. in 1801, 6,730; in 1831, 9,557; in 1841, 10,195. Next to Nottingham this is the largest town in the county. It is neatly built, and has a large quadrangular market-place, in which stands the town-hall, a handsome edifice erected, in 1805, at a cost of £17,000. The Trent branch, or N. canal, is crossed near the cattle-market and the castle, by a bridge connected with a raised causeway constructed under the direction of Mr. Smeaton in 1770, and leading, as part of the Great North road, across an island, formed by the main stream and the branch or arm of the Trent, to Muskam bridge over the main stream. On this road or causeway are 13 bridges of various sizes, containing, in all, 94 arches in a distance of 1½ m., by which the road is carried above the reach of the floods to which this vicinity is liable.—N.-castle, the interior of which has been cleared away to form the site of the cattle-market, was a venerable pile of feudal grandeur. Its general outline is square. This fortress was the last retreat of King John, and a principal garrison of the royalists in the reign of Charles I. It was besieged by the parliamentarians, and ultimately surrendered by order of the king.—The church of St. Mary Magdalene is one of the most elegant and spacious churches in England. It was erected in the reign of Henry VI., on the site of a more ancient edifice, by Alan Fleming, principal of one of the religious houses formerly existing in the town. The style is the later Gothic, of the period in which the pointed arch sunk into the flat-browed or perpendicular, the acute angles formed by the lateral tangents expanding into right angles, and finally disappearing. The exterior, comparatively with the generality of English churches, is of elaborate workmanship, well-adorned with grotesque spout-heads and bosses on the mouldings, and showing some fine examples of richly wreathed foliation in the windows. Of these the lower story has 13 of a side; the upper story, 20; while the E end of the church is beautifully lighted by three fine windows, of which the grand middle window above the altar is the finest, having no fewer than 26 compartments in its head or upper portion. The effect of the whole exterior of the clerestory, when the church was lighted up for midnight-mass or early matin-song, must have been superb. The building is cruciform, with aisles and transepts. The most remarkable feature of the church, whether exteriorly or interiorly, is the steeple, which rises to the height of 255 ft., the alt. of the tower being 144 ft., and that of the spire 111 ft., with a poise not easily matched for lightness and airiness of effect. The second story of the tower is adorned with four pointed arches, resting on columns having richly-wrought capitals; over them is placed the clock. The room above, containing 10 bells, is lighted by a beautiful double window. The spire is octagonal, having four tiers of pointed windows or apertures.—Under the new municipal act the borough is divided into 3 wards, and appointed to be governed by 6 aldermen and 18 councillors. The income of the borough in 1840, arising chiefly from borough-rates, was £1,066; in 1849-50, £1,397.—The old parl. boundaries, coincident with those of the ancient municipal borough, were left unaltered by the reform act. Pop. of parl. borough in 1841, 10,218; in 1851, 11,330. Electors registered in 1837, 1,221; in 1848, 1,016. N. is a polling-place, and principal place of election for the E division of the co.—The principal trade of N. is in malt, which is largely manufactured here, and in corn, cattle, wool, and coal. Gypsum is burnt to a considerable extent for stucco, and sent by water to the metropolis. The linen manufacture is carried on to a small extent. Huckabacks, sheeting, shirting, table-cloths, &c., are the chief fabrics made by weavers. The circumstance of N. being on the great road between York and London, long added considerably to its prosperity, and the town was famous for its inns. The White Hart has existed since the days of Henry IV., and is an excellent specimen of the household architecture of the Middle ages. The Saracen's Head dates as far back as the reign of Henry III., and was occasionally occupied by Charles I. in the civil wars. The Swan and Salmon was established by Henry VIII. In the latter two cases, however, the original buildings have been replaced by others of more modern date. The opening of the Great Northern, Midland, and other lines of railway between York and London, however, has proved not a little prejudicial to this source of prosperity.—N. is believed to have been the site of the Roman station of *Eltavona*, and was a place of importance under the Heptarchy, defended by a strong wall and fortress, constructed partly of Roman materials. By many inquirers it has been supposed identical with the *Sidnaceaster* of the Saxons, which, however, has also been placed at Stow in Lincolnshire. Having fallen a prey to the ravages of the Danes in one of their many invasions, it was rebuilt, whence its name of Newark, or 'New-work,' by which it was known in the time of Edward the Confessor. The manor of N. was given by Leofric earl of Mercia, and his Countess Godiva, to the monastery of Stow, and was afterwards claimed by the bishops of Lincoln, one of whom, Alexander de Blois, built the castle in King Stephen's reign.

NEWARK, a township of Caledonia co., in the state of Vermont, U. S., 57 m. NE of Montpellier. It has a hilly surface, and is drained by the head-waters of Pasumsic river. The soil is cold, wet, and unproductive. Pop. in 1840, 360.—Also a township of Tioga co., in the state of New York, 8 m. N of Owego, and 161 m. WSW of Albany. The surface is hilly, and is drained by the East and West Owego creeks. The soil consists chiefly of gravelly loam. Pop. 1,616.—Also a village of Arcadia township, Wayne co., in the state of New York, 186 m. W by N of Albany, on the Erie canal. Pop. 1,200.—Also a maritime town of Essex co., in the state of New Jersey, 9 m. W of New York, and 49 m. NE of Trenton, on the W side of Passaic river, 6 m. above its entrance into Newark bay, and in N lat. 40° 44′. It is the most flourishing place in the state, and has extensive manufactories of coaches, cabinet-work, leather, and shoes; and a large and increasing trade. The river is here navigable for vessels of 100 tons burthen, and frequent communication with New York is maintained by steam and railway. Pop. in 1830, 10,950; in 1840, 17,290; in 1850, 38,885.—Also a village of Newcastle co., in Delaware, 59 m. N by W of Dover.—Also the cap. of Licking co., in Ohio, 39 m. NNE of Columbus, on the Erie and Ohio canal. Pop. in 1841, 2,705.—Also a township of Allegan co., in Michigan, 180 m. W of Detroit, on the Kalamazoo river, 2 m. from its influx into Lake Michigan.—Also a village of Scotland co., in Missouri, 44 m. N of Jefferson.

NEWARK VALLEY, a village of Tioga co., in New York, U. S., 154 m. WSW of Albany, on East Oswego creek. Pop. 400.

NEW-ASHFORD, a township of Berkshire co.,

in Massachusetts, U. S., 18 m. N of Lenox. Pop. 227.

NEW ATHENS, a village of Harrison co., in Ohio, U. S., 115 m. E by N of Columbus. Pop. 350. It is the seat of Franklin college, founded in 1825.

NEWBALD, a parish in the E. R. of Yorkshire, 3½ m. NE of North Cave. Area 5,450 acres. Pop. in 1831, 769; in 1841, 973.

NEW BALTIMORE, a township of Greene co., in New York, U. S., 15 m. S of Albany, with a village of the same name, on the W side of the Hudson. Pop. 2,306.—Also a village of Fauquier co., in Virginia, 108 m. N by W of Richmond. Pop. 140.—Also a village of Marlborough township, in Stark co., Ohio.

NEW BARBADOES, a township of Bergen co., in New Jersey, U. S., containing the v. of Hackensack. Pop. 2,104.

NEWBATTLE, a parish of Edinburghshire, 7 m. S of Edinburgh. Pop. in 1841, 2,033. The coal measures in this p. constitute a mineral field equal in wealth to that of any equal extent of territory in the kingdom. Limestone and sandstone are obtained from surface-quarries; and coal can be mined in upwards of twenty seams of from 1½ to 8 ft. thick. To facilitate the exportation of the mineral produce, a railway 1½ m. in length is carried across the vale of the S. Esk by a viaduct 1,200 ft. long, and joins the North British company's railway at Dalhousie-mains. The ancient v. of N. stands in the lowest grounds of the vale of the Esk, 1 m. S of Dalkeith. There are three other villages, all inhabited chiefly by colliers,—Easthouses, with 400 inhabitants, 1 m. E of N.; Westhouses, with 150, about 2 m. to the SE; and Stobhill, with 210, situated 2½ m. to the S.—N. abbey, a prime object both of antiquarian and of modern interest, was anciently, as its name imports, a monastery, and is now the seat of the marquis of Lothian. The buildings of the monastery have long ago been either wholly demolished, or entirely concealed from observation, by the erection on their site of the present noble mansion.

NEWBAWN, a parish in co. Wexford, 6 m. SE of New Ross. Area 7,537 acres. Pop. 1,703.

NEW BEDFORD, a port of Bristol co., in Massachusetts, U. S., 58 m. S of Boston, with which it is connected by railroad, on an arm of the sea which sets up from Buzzard's bay, in N lat. 41° 38′ 7″, W long. 70° 55′ 49″. Pop. in 1820, 3,947; in 1840, 12,087; in 1850, 16,464. Its harbour is safe and spacious. The inhabitants and capital of the place are chiefly devoted to the whale-fishery. Of 605 vessels employed in the whale-fishery, New B. has 275. The tonnage in 1840 was 89,039 tons.—Also a village in Mercer co., in Pennsylvania, 244 m. WNW of Columbus.—Also a village of Coshocton co., in Ohio, 99 m. NE of Columbus.

NEWBERG, a village of Cass co., in Michigan, U. S., 157 m. W by S of Detroit.

NEW BERLIN, a township in Chenango co, in New York, U. S., 8 m. NE of Norwich, with a v. of the same name on the Unadilla river. Pop. 3,086.—Also the cap. of Union co., in Pennsylvania, 69 m. N of Harrisburg. Pop. 679.—Also a v. in Stark co., in Ohio; and another in Milwaukie co., in Wisconsin.

NEWBERN, a port, the cap. of Craven co., in N. Carolina, U. S., on the SW bank of the Neuse, at the junction of the Trent, 30 m. above Pimlico sound, and 120 m. SW of Raleigh. Pop. in 1830, 3,776; in 1840, 3,690; in 1850, 4,722. The Neuse is here 1½ m., and the Trent ¾ m. wide. Its export trade consists in grain, pork, lumber, tar, pitch, turpentine, and naval stores.

NEWBERRY, a district of S. Carolina, U. S., near the centre of the state. Area 540 sq. m. Pop. in 1840, 18,350; in 1850, 20,143.—Also a township of York co., in Pennsylvania. Pop. 1,850.—Also a v. of Wayne co., in Kentucky, 119 m. S of Frankfort.—Also a v. of Lycoming co., in Pennsylvania, 95 m. N of Harrisburg.

NEWBIGGIN, a township in Dacre p., Cumberland, 3 m. W by S of Penrith.—Also a township in Middleton-in-Teesdale p., Durham, 11½ m. NW of Barnard-castle, on the N bank of the Tees. Area 4,290 acres. Pop. in 1831, 507; in 1841, 516.—Also a township in Newburn p., Northumberland, 3¾ m. NW of Newcastle.—Also a chapelry in Woodhorn p., Northumberland, 7½ m. E by N of Morpeth, and 1½ m. N of the mouth of the Wansbeck, on the coast of the North sea. The stationary inhabitants are chiefly fishermen. Pop. in 1831, 519; in 1841, 606.—Also a township in Shotley p., Northumberland, 9½ m. S by E of Hexham, on the N bank of the Derwent.—Also a parish in Westmoreland, 6¾ m. NW by N of Appleby, on a branch of the Eden. Area 1,140 acres. Pop. in 1801, 126; in 1841, 140.—Also a township in Aysgarth p., N. R. of Yorkshire, 7½ m. W by S of Middleham. Area 1,360 acres. Pop. 122.

NEWBLISS, a market-town of co. Monaghan, 4 m. ESE of Clones. Pop. 566.

NEW BLOOMFIELD, a village in Perry co., Pennsylvania, U. S., 34 m. W by N of Harrisburg.

NEWBOLD, a township of Chesterfield p., Derbyshire, 1¾ m. NW of Chesterfield. Pop. in 1831, 1,140; in 1841, 1,527.—Also a hamlet in Tredington p., Worcestershire, 3½ m. N by W of Shipston-upon-Stour, on the W bank of the Stour. Pop. 300.

NEWBOLD-ASTBURY, a township in Astbury p., Cheshire, 3 m. S by E of Congleton. Area 2,880 acres. Pop. in 1831, 598; in 1841, 641.

NEWBOLD-UPON-AVON, a parish in Warwickshire, 1¾ m. NW by N of Rugby, on the N bank of the Avon, intersected by the Oxford canal, and nearly 1 m. N of the London and Birmingham railway. The p. comprises the hamlets of Cosford, Little Lawford, and Long Lawford. Area 4,020 acres. Pop. in 1831, 1,063; in 1841, 1,248.

NEWBOLD-PACEY, a parish in Warwickshire, 4½ m. NW of Kineton. Area 1,350 acres. Pop. 357.

NEWBOLD-VERDON, a parish in Leicestershire, 2½ m. E by N of Market-Bosworth. Area 2,400 acres. Pop. in 1831, 590; in 1841, 660.

NEWBOROUGH, a chapelry and township in Hanbury p., Staffordshire, 5¾ m. SE by S of Uttoxeter. Area 2,970 acres. Pop. in 1831, 910; in 1841, 742.—Also a recently constituted parish in Northamptonshire, 5 m. NE of Peterborough. Area 4,940 acres. Pop. in 1831, 340; in 1841, 572.

NEWBOROUGH (Llanbedr-), a parish and market-town in Anglesey, 5 m. NW of Carnarvon, on the coast. Pop. in 1831, 804; in 1841, 895.

NEW BOSTON, a township of Hillsboro' co., in New Hampshire, U. S., 22 m. S by W of Concord. Pop. 1,569.—Also a v. of Windham co., in Connecticut; and another of Berkshire co., in Massachusetts.

NEWBOTTLE, a township in Houghton-le-Spring p., Durham, 7¼ m. NE by N of Durham. Area 1,460 acres. Pop. in 1831, 2,198; in 1841, 1,835.—Also a parish in Northamptonshire, 4 m. W of Brackley. Area 2,990 acres. Pop. in 1831, 366; in 1841, 384.

NEWBOURNE, a parish in Suffolk, 4 m. S of Woodbridge, on the river Deben. Area 940 acres. Pop. in 1811, 153; in 1831, 171; in 1841, 163.

NEW BRAINTREE, a township of Worcester co., in Massachusetts, U. S., 66 m. W of Boston. Pop. 752.

NEW BREMEN, a village of Mercer co., in Ohio, U. S., 97 m. NW of Columbus.

NEWBRIDGE, or Pont-y-Prid, a hamlet in the

p. of Eglwys-Ilan, Glamorganshire, 3 m. NNE of Llantrissaint, on the river Taff, near its junction with the Rhondda, and in the line of the Glamorganshire or Cardiff and Aberdare canals, and Taff Vale railway. Across the river Taff here is a very elegant bridge. Several large iron and tin works have recently been opened in this vicinity.

NEWBRIDGE, a market-town in the parishes of Great Connell and Morristown-Biller, co. Kildare, on the river Liffey, 21 m. SW by W of Dublin. Pop. in 1841, 792.—Also a hamlet in the parish of Castle-Macadam, co. Wicklow, on the river Ovoca, 4½ m. S by E of Rathdrum.—Also a village in the p. of Hollywood, co. Down, 1½ m. E of Belfast. Pop. 406.—Also a hamlet in the p. of Rathkeale, co. Limerick, 2 m. S by E of Askeaton.

NEW BRIGHTON, a village of Richmond co., in the state of New York, U. S., on the N end of Staten island, 6 m. from New York.—Also a village of Beaver co., in Pennsylvania, on the E bank of the Beaver, 3 m. above its mouth. Pop. in 1840, 981.

NEW BRITAIN, an archipelago in the Pacific ocean, between 4° and 6° 30′ S lat., and 149° and 152° E long., consisting of two large islands, and several small ones discovered by Dampier in 1699.

NEW BRITAIN, a township of Hartford co., in Connecticut, U. S., 10 m. SW of Hartford. Pop. 1,500.—Also a township of Bucks co., in Pennsylvania, 25 m. NW of Philadelphia. Pop. 1,304.

NEWBROUGH, a parochial chapelry in Northumberland, 4¾ m. NW of Hexham, in the line of the Carlisle and Newcastle railway. Area 7,270 acres. Pop. in 1831, 494; in 1841, 547.

NEW BRUNSWICK, a province of British North America, lying between Nova Scotia on the E, and Canada on the W, or the parallels of 45° and 48° N, and between 64° and 68° W long. It is bounded on the N by the entire course of the Restigouche river, and the bay of Chaleurs; on the E by the gulf of St. Lawrence, Northumberland strait, and Nova Scotia; on the S by the bay of Fundy, the head of which, Chignecto bay, approaches within a few miles of Bay Verte in Northumberland strait; on the S it has the bay of Fundy; on the W it is separated from the state of Maine by the entire course of the St. Croix, from its mouth in the Passamaquoddy bay, through the Chipineticook lakes, to its source; thence along the meridian of 67° 53′, crossing Mars-hill, and the Little Madawaska branch of the St. John, till it strikes the river St. John; thence up the main channel of the St. John to the mouth of the Grand river, and up that river to its sources near Bold mountain, and the sources of the Restigouche. The remainder of the boundary with the United States in this quarter—which is continued up the St. John to the St. Francis-line—is common to Lower Canada and the State of Maine. The area of this prov. is roughly estimated at 25,000 sq. m.

Rivers, &c.] New B. is well-watered in every direction. The principal rivers are the St. John, the Miramichi, and the Restigouche. The St. John, which runs SE to the bay of Fundy, is navigable by steamers to the Great Falls, a distance of upwards of 200 m.; and from that point upwards to the American territory, and to within 26 m. of the St. Lawrence by the Upper Madawaska and Temiscouata lake. The principal New B. tributary of this noble river is the Tobique.—The Miramichi has its head-streams near the sources of the Monquart and Pekagonik tributaries of the St. John, and crosses the central part of the prov. in a NE direction to Miramichi bay in the gulf of St. Lawrence. It is navigable by ships of a large class for 50 m.—The head-waters of the Restigouche approach within 3 m. of some of the tributaries of the St. John. It runs upwards of 100 m., in a W direction, to the bay of Chaleur, through a country of undulating hill and dale, and remarkable for beauty and richness of scenery.—Dense forests cover nearly the whole of the interior of this prov. The pine, birch, beech, and maple are the prevailing trees. The principal tracts of flat alluvial soil lie stretched along the countless rivers which intersect the country; but no part of New B. can be considered mountainous.—The mineral riches of this prov. have been but imperfectly explored; coal, it is reported, is plentiful, and iron-ore is known to be abundant.—The wild animals are bears, moose-deer, foxes, tiger-cats, racoons, beavers, otters, and porcupines. The rivers and lakes abound in salmon, trout, chub, eels, and perch; and cod, mackarel, and herrings are abundant on the coast.

Climate and agriculture.] The climate of New B.—except on a narrow sea-board of about 20 m. in depth, which is foggy—is salubrious; that of the S districts is considerably milder than that of the N, and the whole country is covered with snow for about four months. A short spring commencing in the latter end of April, is usually succeeded by a very warm summer. "One of the most striking peculiarities of the climate of New B., and indeed of all N. America, is its low mean annual temp., and greater extremes of heat and cold, compared with places in corresponding latitudes in Europe. The changes of temp. are, perhaps, not more capricious than they are in Great Britain; yet they run to a greater extent, and exert an influence over vegetation scarcely known in that country. Edinburgh is 9° farther to the N than Quebec, yet its mean annual heat is 6° higher than that of the latter place. Along the whole Atlantic, and especially in Nova Scotia, a S wind is always warm. The heat imparted to the atmosphere by the gulf-stream which sweeps the S border of the continent greatly increases the temp. of the coasts. A SW wind, from passing along the land of the American continent, is warm and agreeable, except on the shores of the bay of Fundy, where its vapour is condensed in thick fogs, which prevail during the summer. These fogs lie along the shores, and do not extend to beyond 15 or 20 m. into the interior, where, by the increased heat of the air, they are quickly dispersed. From having a cold continent on one side, and a warm sea on the other, a shifting of the wind in New B. produces a great change of temp., which has been known to rise or fall 60° in 24 hours. The clearing of the land of its dense forests greatly mitigates the severity of winter and the heat of summer. The unbroken wilderness-woods retard the melting of the snow in spring; and accordingly, as they are cleared away, so will the season for vegetation be prolonged. The shortness of the season is here abundantly compensated by the almost miraculous rapidity of vegetation, and the short period necessary for ripening the productions of the country. Only 90 days are required to grow and ripen wheat, rye, barley, and oats, under a medium temp. of 52°: pulse, pease, and a number of garden vegetables, are brought to maturity in a much shorter period. Before June arrives, Nature, in myriads of forms, begins to display her beauties; the overflown streams retreat within their summer-bounds, and the whole country is enlivened by the music of the sweet songsters of the forest. The beauty and serenity of the autumn here as in other parts of North America are unrivalled in any other part of the world." [*Gesner.*] Agricultural operations are generally commenced about the middle of April, and cease about the middle of November. From this period the prevalence of frost and snow prevents the labours of the husbandman as respects the soil; yet the industrious farmer can always find employment during the winter, as it is the most favourable season for cutting and hauling fuel and rails for fences, and for transporting grain and other produce to market.—In a general view the climate of New B. is decidedly healthy, and there is no disease peculiar to the country.

Settlements.] The river St. John runs through 6 cos.; and from its mouth to the Madawaska river, a distance of 230 m., the settlements extend along both banks, in almost unbroken contiguity, with good roads on both sides of the river; and following up the numerous tributaries on the r. and l., settlements are found in every direction along their banks.—The co. of St. John on the western shore of the bay of Fundy, contains an area of 586 sq. m., and a pop. of about 45,000, with 48 parish schools. The city of St. John, including the suburbs, contains about 30,000, and is accessible by ships of the largest class, at all seasons of the year. Very little ungranted land, fit for settlement, is found in this co., except at the NE extremity. The salmon, shad, and herring fisheries of the bay of Fundy, are very valuable.—King's co., the next in order, contains

1,328 sq. m., with a pop. of about 19,000, and 61 parish schools. Many parts of this co. are highly cultivated, and present some of the finest scenery in the prov. Its proximity to the city of St. John insures a ready sale for its surplus produce. The great road from Halifax to Quebec passes through this co. for a distance of 75 m., and a line of railway is projected, and has been recently surveyed, passing through this co. from St. John to the gulf of St. Lawrence, which, it is contemplated, will unite with the projected grand trunk-line from Halifax to Quebec.—The next on the St. John river is Queen's co., containing 1,502 sq. m., and a pop. of 10,000, with 47 parish schools. Some of the best farms of the prov. are found in this co., and large tracts of good land are yet undisposed of.—The co. of Sunbury contains an area of 1,222 sq. m., a pop. of 5,000, and 24 parish schools. Extensive and valuable farms are seen on both banks of the river. The river Oromocto, with its branches, presents some flourishing settlements. This co. and Queen's contain an immense extent of the finest alluvial land, and some of the most productive and fertile islands in the river St. John.—The co. of York contains an area of 3,440 sq. m., with a pop. of 21,000, and 60 parish schools. The city of Fredericton, the seat of government, is in this co., on the r. bank of the river, distant from St. John by the river 75 m., and by the road 66 m. The tract of land granted to the Nova Scotia and New Brunswick land-company has left but a small portion at the disposal of government on the E side of the river, below the Nackawick. At the distance of 24 m. from Fredericton, on the great road to St. Andrews, is the Harvey settlement, formed in 1837, by emigrants from Northumberland. In the vicinity of Harvey is an Irish settlement, formed in December 1841.—At a distance of 48 m. from Fredericton commences the co. of Carleton, which extends upwards to the frontiers of Canada and the United States. This county has been more rapidly cleared and improved within the last few years than any other co. of the province. It contains an area of 4,050 sq. m., and a pop. of 21,000. The soil throughout is deep and rich, and under good cultivation would soon render it one of the most productive portions of the prov.—The Tobique, which empties into the St. John about 40 m. above Woodstock, is of great extent, and offers superior facilities for immediate settlement on a large scale.—To the S of York, Sunbury, Queen's, and King's, lies the co. of Charlotte, containing an area of 1,224 sq. m., with a pop. of about 22,000, and 69 parish schools. This co. contains many extensive and valuable settlements.—The cos. of Westmoreland and Albert lie to the N and E of St. John and King's, and contain a pop. of about 25,000, with 98 parish schools, and cover an area of 2,112 sq. m. The most extensive and valuable marshes in the prov. are in Westmoreland, and furnish great facilities for grazing. The shad-fishing of this district is not surpassed by any other in the world. Cannel coal of a superior quality has been discovered in Albert, and promises an extensive and valuable trade.—The co. of Kent covers an area of 1,260 sq. m., and contains about 9,000 inhabitants, with 35 parish schools. Extensive cultivation is found along the coast and on the Richibucto river; but a tract of ungranted land still remains, through which the line of projected railway from Halifax to Quebec passes. The harbour of Richibucto is safe and commodious, and the river admits of vessels of the largest class for some distance.—Northumberland includes an area of 5,000 sq. m., with 20,000 inhabitants, and 53 parish schools. This co. presents a large extent of cultivated land, and a vast tract of ungranted land.—Gloucester and Restigouche, the two most N cos., lie on the gulf of St. Lawrence and the Bay-Chaleurs, and include an area of about 4,000 sq. m., with a pop. of only 15,000, and 37 parish schools. The quality of the soil is generally good, and in many parts of a superior description. For many years past this has been the best wheat-growing district in the province. The settlements in these counties are principally along the coast. The country above Dalhousie is principally settled by Scotch, who are in very prosperous circumstances. The projected line of railway from Halifax to Quebec passes through these cos. down the Nipisiguit to Bathurst, and thence to a point above Campbelltown.—The vast tract lying between the Restigouche and the St. John rivers, containing several millions of acres, presents a wide field for settlement.

Soil and productions.] The soil of New B. is excellent throughout, and admirably adapted, especially in the northern counties, to the growth of every description of grain of the best quality. In those counties the average weight of wheat is 65 lbs. per bushel; of barley 52 lbs. per bushel; and of oats 40 lbs. per bushel. The alluvial lands on the banks of all the principal rivers, and the extensive marshes which have been reclaimed from the sea, offer extraordinary and rare advantages for breeding and feeding cattle, and for the establishment of dairies on an extensive scale.—Every kind of field and garden crops cultivated in England can be grown in this prov., with the addition of Indian corn. The average produce per acre is large, especially where the rotation system has been followed. In different parts of the country, wheat, barley, and pease have yielded 40 bushels per acre; oats, 60 bushels; Indian corn and buck-wheat, 65 bushels; carrots and mangel-wurzel, 30 tons; turnips, 1,000 bushels; and potatoes, 800 bush.—Estimating the area of the prov., in round numbers, at 17,000,000 acres—a recent estimate makes it 18,907,360 acres—of these 2,000,000 acres may be deducted for water-surface and utterly waste land; but at least 12,000,000 acres are capable of immediate and profitable cultivation, and 1,000,000 more might be easily reclaimed. About 5,000,000 acres have already been granted to settlers; but there are about 10,220,000 acres yet ungranted and in a state of wilderness. Of these ungranted lands not more than one-tenth lies to the W of the St. John; the remaining nine-tenths are to the E of that river.

Projected railways.] This immense tract of yet unsettled land would be prodigiously benefited by the execution of the projected railway between Halifax and Quebec, *via* Truro, Amherst, the bend of the Peticodiac river, and the grand falls of the St. John, which would pass in a NW direction nearly through the centre of the prov.; but another line has been suggested from Halifax to Bridgetown, on the S side of the bay of Fundy; thence by steam-boat across the bay to St. John; and thence up the valley of the St. John, through Frederictown and Woodstock to the Grand falls; and from thence, as in the other line, by the shortest route to Quebec. According to Major Robinson, three principal lines present themselves for a trunk railway from an E port in Nova Scotia through New B. to Quebec; and by combining portions of two of these lines together, a fourth and fifth route may be formed. The shortest of these routes is 595 m., and the longest 692 m. The one recommended is the Halifax and Eastern, or Bay-Chaleurs route, to Quebec; the length is 635 m. It runs from Halifax to Truro; thence up to Bathurst; then along the shore of the Bay-Chaleurs to the Restigouche river; then across the valley of the Metapediac to the St. Lawrence, and along the banks of that river to Quebec. The principal recommendations of this line are the prospect of its opening up a large field for provincial improvements, for the settlement of emigrants, and also for developing the commerce and fisheries of New B. The neighbourhood of a great portion of it to the sea-coast would add to the facilities of construction, and remove the chances of interruption from the effects of climate. The extent to which the line will pass through Crown lands is estimated at 375 m. A single line of rails is proposed in the first instance. The greater portion of the land might be granted free of cost, and timber and stone can be had nearly along the whole distance. Under these circumstances, it is considered that £7,000 per mile may fairly be assumed as the probable limit of cost. This for 635 m.

will be £4,445.000, making with the addition of 10 per cent. for contingencies £4,889,500, or in round numbers £5,000,000. With regard to revenue, it is considered that the total pop. either upon or near the line, including the two termini, may be estimated at 250,000 persons, and that the whole number within the area which will be benefited by the line will not be less than 400,000. The net earnings of the Massachusetts lines gives a proportion of 11s. per head for the entire population of the state; and taking a nearly similar calculation in the present instance, that is to say 10s. per head, we should have a return of £200,000. The transit of timber, the great staple of New B., the products of the fisheries, coals from the great Cumberland field, flour, grain, and other articles, are however also to be taken into account; and as the St. Lawrence is closed during six months of the year, not only would the railway have a monopoly during that time, but it would prove of inestimable advantage to the colony in setting articles free which are now so long locked up. Flour and wheat from the far west of the United States are also calculated upon, since while it costs 5s. 1d. to convey a barrel of flour from Illinois and Michigan to New York, and 6s. to Boston, it could, it is alleged, be brought to Halifax for 4s. 2d. But a line from Montreal to Portland-in-Maine, now constructing, will, it is admitted, be a great competitor with the Halifax and Quebec route. A loan of £3,000,000, it is suggested, could be raised upon the provincial revenues at 4 per cent., if guaranteed by the mother country; and this, with £2,000,000 of acres of land that would be brought into value by the line, might prove sufficient.—Major Robinson's line being mainly designed for military objects, deviated considerably from the route indicated by the commercial interests of the countries traversed. On entering New B., it made a wide sweep towards the bay of Chaleurs, leaving the settled districts on the St. John considerably to the S, but obtaining thereby a greater security from attacks on the side of the United States frontier, as well as increased facilities of communication with the gulf of the St. Lawrence. It was, however, ascertained, that by means of a railway from Halifax to Waterville in Maine—joining at the latter point the line which already extends from thence to New York—the sea voyage between the latter city and London might be diminished by 1,107 m.; and that, although the total distance would be increased by 152 m. the substitution of land for sea travelling would save 56 hours. A convention was held at Portland in July 1850, at which the states of Maine, New England, and New York, pledged themselves to delegates from the British provs. to make so much of the proposed line as was to pass through the territory of the Union; and American capitalists and contractors volunteered to complete the whole, if acts of incorporation and other facilities were granted them. The latter overture was declined by the colonists, but the provincial legislatures of Nova Scotia and New B. decided to execute the railway from Halifax to St. Andrew's—the point where the line in question would intersect the frontier—at their own expense; and proposed to raise the necessary sum by mortgaging their entire revenues for the repayment both of capital and interest. In order, however, to enable them to negotiate the loan more cheaply, the imperial government was requested to guarantee to subscribers the interest of their money at the market rate. Earl Grey declined to advocate an imperial guarantee for the route between Halifax and Maine; but was ready to negotiate in favour of a line traversing the three colonies of Nova Scotia, New B., and Canada, which should pass wholly through British soil. On this understanding a scheme was submitted to Earl Grey, differing from Major Robinson's plan in bending southward, instead of northward, after entering New B. The advantages contemplated by the proposed deviation were, that the road would pass through the settled portions of the prov., instead of through uninhabited wastes; and that it would shorten the distance necessary to be traversed by the proposed branch-line to the United States. The sum to be raised was not to exceed £1,000,000. The scheme, as thus modified, was declined by Earl Derby's ministry, on the ground that while the line contemplated by Major Robinson, and which in all previous discussions had been assumed as the line of intercolonial communication, continues the northern line where it enters the prov. of New B., passing at no great distance from the sea, making a sort of circuit in the E and N parts of New B., and falls into the line of the valley of the St. Lawrence, taking then a westerly direction; the line proposed by the colonial legislature follows up to the very margin of the prov. the same line which is the line of communication with the United States, and thence turns at right angles, and follows the valley of St. John in a N direction until it reaches the Canadian prov. Instead of making the circuit of the N and E coasts, it makes two right angles,—one to the W, passing the borders of New B., and another passing due N along the valley of St. John's. It is true that by this line there would be a less amount of railway to be made than by the former line, if the line through the United States is to go on, as the parts running along the S side of the prov. of New B. would be common to the two lines; but as to the whole length of the line, though no definite survey has been taken of the St. John line, it would be found that the line which we call at present the North line, would not involve a greater distance between Halifax and Quebec than the line passing through the valley of St. John's, and passing by the St. John's river. No doubt, in a commercial point of view, there is the prospect of greater advantage being derived from the line passing along the valley of St. John; but, on the other hand, the effect of opening the line by the valley of the St. John must be to deprive us of the great advantage of the former scheme, viz., of opening new districts by the railway itself, for colonization on either side, to which settlers from this country would naturally be invited, which would add largely to the prosperity of the prov., combining with that the advantage already adverted to of easy communication with the coast of New B., and the various fishing establishments upon it. It is not pretended that any survey has been made by which it can be secured and promised to the country that the railway will pass along the E or British side of the St. John river, and not pass along the W, that is the American side. If that be the case, and if the communication be along an open undefended frontier of the United States, in the event of hostilities we may be cut off from communication with our own provs. by the intervention of the rapid and difficult river of St. John's, and under such circumstances, such a railway in time of war, as a means of military communication, would in nowise differ from a railway carried through America, and not through British territory. Another thing is to be considered; it passes along the frontier, and so far as a railway tends to improve cultivation, and to open the resources of a country, it will improve the cultivation and open the resources, not so much of the British provs. as of the adjoining state of the United States, and has no communication with the British prov., from which it is cut off by the river of St. John's. "Under these circumstances," said the premier, "and with the greatest desire to effect the great object contemplated by a communication between Halifax and Quebec, viz., encouraging emigration and settlements in the British colonies, maintaining a communication free from hostile interruption, and passing exclusively through British territory on the one side and the other, and tending to the improvement of our territory, I and my colleagues in the government cannot say that the project that has been put forward on the part of New B. is such a compliance with that which we hold to be an imperial object as to induce us, for such a project, to involve ourselves in a guarantee."

Exports and Imports.] The chief exports of New B. are timber, flour, dried fish, and fish-oil. In 1837, the export of timber was valued at £476,670; of fish and oil, £68,000. The quantity of timber exported from St. John and its out-bays in 1848 was 194,240 tons, and in 1847, 152,062. The export of deals in 1848 amounted to 129,073,000 ft. (superficial); while in 1847 the quantity exported was 126,852,000 ft. The quantity of boards and scantling exported in 1847 was 9,515,000 ft.; in 1848, 13,898,000 ft. The exportation of wheat-flour in 1848 was 3,574 barrels; in 1847, 8,070 barrels. The total value of exports to the United Kingdom in 1848 was £466,188; to the United States, £37,871. The total value of the exports from St. John in 1848, was £417, 258 sterling; Miramichi, £72,266; Dalhousie, £27,401; Bathurst, £15,971; Caraquet, £15,301; Richibucto, £22,241; Dorchester, £4,717; and Shediac, £13,311.—The number of vessels entered inwards at St. John for 1848 was 1,611, amounting to 283,705 tons; an increase, as compared with 1847, of about 14,000 tons. The number of vessels cleared outwards in 1848 was 1,610, amounting to 305,246 tons, which, compared with 1847, shows a decrease of over 4,000 tons.—The imports into New Brunswick were as follows in the years mentioned:

	From the United Kingdom.	From the United States.	Total from all countries.
1845,	£576,496	293,777	893,413
1846,	522,540	309,042	861,468
1847,	553,314	338,423	925,958
1848,	251,496	244,670	517,201
1849,	305,696	264,961	506,405

The exports from New B. in these years were:

	To the United Kingdom.	To the United States.	Total to all countries.
1845,	£667,635	28,437	721,181
1846,	760,825	15,878	795,899
1847,	558,635	44,614	617,593
1848,	498,784	44,345	561,906
1849,	462,709	51,664	546,529

Fisheries.] The in-shore and bay fisheries of New B. are highly important and flourishing, and the legislature appears to regard the recent proposition of the United States' government to concede the privilege of fishing on their coasts as an equivalent for like participation in the fisheries of Newfoundland and New B. as delusive and unfair, except upon the general principle of the American government

opening their coasting-trade, and extending the principle of reciprocity to colonial ships.

Population.] In 1783, the pop. of New B. was estimated at 11,457; in 1824, by census, at 74,176; in 1840, by census, at 156,162; it is now [1853] about 208,000, or at the rate of about 1 individual for every 92 acres. The average number of emigrants which yearly arrive in the prov. is 6,000, but of these about 2,500 find their way annually into the United States. The chief body of the permanent pop. are descendants of the first American settlers and of emigrant loyalists from the United States; and are mostly located along the St. John. The descendants of the Acadian French occupy villages bordering on the great marshes of Westmoreland co., and along the N coast from Bay Verte to the Restigouche, also along the Upper St. John. There are still the remnants of two Indian nations in New B., the Micmacs and the Milicete. The Micmacs are, both intellectually and physically, a superior race. They are tall, strong, and hardy. They inhabit the sea-coast, to which they are warmly attached. Their hunting-grounds, over which they range at pleasure, extend along the whole NE coast, from Bay Verte to the Bay of Chaleurs. Their language is a dialect of the Algonquin, of which powerful nation they once constituted an influential tribe. It is exceedingly complex. All the changes of mood, person, tense, and number, are formed by changes of termination. Upwards of 2,000 terminals are made on one radix of the Micmac tongue. The number of Micmacs in New B. is about 1,000. The Milicete tribes are somewhat less numerous, being about 500 strong, or a little less, and decidedly inferior. They frequent the countries watered by the St. John and its great tributaries. They principally reside in a village situated about 10 m. from Fredericton, the seat of colonial government. The slight birch-bark wigwam is their ordinary abode; but some of the more industrious and civilized of them have built two-story houses. Neither the Micmacs nor the Milicetes paint their bodies: they have given up the custom in consequence of their intercourse with Europeans.

Educational establishments.] The educational institutions of the prov. are headed by King's college, established at Fredericton in 1828, in connection with the church of England, and endowed with an annual grant of £1,000 from the Crown, and an equal sum from the Provincial legislature. The Methodists have an academy at Sackville; and the Baptists, a seminary at Fredericton. There is in each co. a grammar-school, governed by trustees; and parish or primary schools are scattered over the whole cleared districts, each school receiving from £10 to £30 per ann. from government, a grant for which about £12,000 is annually set apart.

Government.] The executive power in New B. is vested in a lieutenant-governor, aided and advised by a council of 9 members appointed by royal *mandamus*. The legislative council consists of 19 members; the house-of-assembly of 33, who are elected by the people every 4 years. The legislature meets during the winter season at Fredericton, and generally sits two months. Its powers are unlimited; but none of its statutes can be put in operation until they have received the assent of the governor and the royal sanction. For the administration of justice there is a supreme court, consisting of a chief judge, and 3 puisne judges, which sits four times a-year at Fredericton, and twice at St. John and at St. Andrews. In each co. a court of general sessions is held; and in every co. there is a high sheriff, who is appointed by the governor.—The militia force amounts to about 55,000 men.—The revenue, chiefly raised from import duties, in 1835, was £79,512; in 1845, £113,019; in 1848, £81,947; and for 6 months from Jan. 1 to June 30, 1851, £52,029. The public debt, on 31st December, 1850, was £127,703.—The total expenditure incurred by Great Britain for the prov. of New B., in 1848–9, was £15,280. There are no direct taxes, except statute labour for the roads, and a trifling county-assessment for the poor and other local purposes. There are no tolls on the bridges or roads.

History.] The history of New B. is comprehended in that of Nova Scotia until 1784, when it was formed into a separate government. Two Englishmen of the name of Gilbert appear to have been the first European settlers in this prov. in 1607. In 1621, Sir William Alexander obtained a free grant from James I. of all the country from the St. Croix to the St. Lawrence; and in 1625, Charles I. renewed this patent. In 1629, by the treaty of St. Germain, Charles I. recognised the right of Louis XIII. to New France, and Claude de la Tour obtained a grant from the latter monarch of a large tract on the St. John river. By the peace of Utrecht, in 1713, all Acadia, or Nova Scotia in its ancient limits, was ceded to Great Britain; and by the treaty of 1763, France finally resigned all her claims in North America. The first English settlement made on the St. John was at Mangerville in 1766, by a number of families from Massachusetts; and in 1784, New B. was separated from Nova Scotia, and made a distinct government.

NEW BRUNSWICK, a town partly in Middlesex co., and partly in Somerset co., in the state of New Jersey, U. S., 29 m. SW of New York, and 27 m. NE of Trenton, on the W bank of Raritan river, 14 m. from its entrance into Raritan bay. It is the capital of Middlesex co., and contained, in 1840, 6,893, in 1850, 7,898 inhabitants. The Delaware and Raritan canal, which admits the passage of vessels of 100 tons burthen, commences in this town, and it is intersected by the New Jersey railroad.

NEW BUFFALO, a township of Berrien co., in the state of Michigan, U. S., 225 m. W by S of Detroit. Pop. 123. The village is on a point of land between Galien river and Lake Michigan. Pop. in 1840, 400. — Also a village of Buffalo township, Perry co., in the state of Pennsylvania, 19 m. N by W of Harrisburg, on the Susquehanna river, 5 m. above the entrance of the Juniata.

NEWBURG, a township of Penobscot co., in the state of Maine, U. S., 51 m. NE of Augusta. It has a fertile soil, and is drained by a branch of Sowadabscook river. Pop. in 1840, 963.—Also a township of Orange co., in the state and 60 m. N of New York, and 84 m. S by W of Albany. It has a hilly surface, and is bounded on the E by Hudson river. The soil consists of clay and sandy loam. Pop. 8,933. The village stands on a rising ground, on the W bank of Hudson river. Pop. 6,000.—Also a a village of Hopewell township, Cumberland co., in the state of Pennsylvania, 41 m. W by S of Harrisburg, consisting in 1840, of about a dozen dwellings. —Also a township of Cuyahoga co., in the state of Ohio, 150 m. NE by N of Columbus. Pop. 1,342. The village is on Mill creek, and is of considerable extent.—Also a township of Geauga co., in the same state. Pop. 1,209.—Also a township of Miami co., in the same state. Pop. 1,312.—Also a village of Jefferson co., in the state of Kentucky, 63 m. W of Frankfort. Pop. 80.—Also a village of Warrick co., in the state of Indiana, 183 m. SSW of Indianapolis, on the N bank of the Ohio river.

NEWBURGH, a parish and burgh of Fifeshire stretching along the Tay, near its mouth, 9 m. SE of Perth. Area of p. 1,145 acres, of which 737 are under cultivation. Pop. in 1801, 1,936; in 1841, 2,897, of whom 2,491 were in the burgh. NE of the town, and at the extremity of the p., on a gentle rise, in the middle of the rich clay land near the Tay, stand the ruins of the ancient abbey of Lindores, founded in 1178.—The burgh of N. consists chiefly of one long well-built street, about a ½ m. in length,

a range of houses fronting the harbour, and some lanes leading down to the 'shore.' To the S of the town, but within the p. of Abdie, a considerable number of houses have been recently erected, in consequence of the increased trade and manufactures of the town. The income of the burgh is £170 per annum. Its pop. in 1851 was 2,638. The linen manufacture is extensively carried on here, and has made progress of late years. The principal branch of manufacture is the weaving of what is called dowlas, for which a ready market is found in London, Leeds, and Manchester; large quantities are also exported to the West Indies and South America.

NEWBURGH, or NEWBROUGH, a township in Coxwold p., Yorkshire, 7 m. SW of Helmsley. Area 3,770 acres. Pop. in 1841, 111.

NEWBURN, a parish of Northumberland, 5¼ m. WNW of Newcastle-upon-Tyne, in the line of the Newcastle and Carlisle railway, comprising the townships of Black Callerton, Butterlaw, Dalton, E. Denton with Sugley, W. Denton, N. and S. Dissingtons, Newbiggin, Newburn, Newburn-Hall, Throckley, Walbottle, E. and W. Wholtons, and Woolsington. Area 11,000 acres. Pop. in 1801, 4,209; in 1831, 4,639; in 1841, 4,156.

NEWBURY, a parish and market-town, in Berks, 17 m. W by S of Reading, on the river Kennet, and intersected by the Kennet and Avon canal. Area of p. 1,820 acres. Pop. in 1801, 4,293; in 1831, 5,977; in 1841, 6,379.—The town is pleasantly situated in a fertile plain, watered by the Kennet, over which there is here a stone-bridge. The principal streets are broad and well-paved, and lighted with gas. The environs are adorned by numerous handsome residences. The income of the borough, in 1840, amounted to £687; in 1847 to £1,123. Its pop. in 1851 was 6,574. The town was at one period celebrated for its woollen manufactures; but these have long since disappeared. The manufacture of narrow ribands by hand-loom is carried on. The rapid declivity, and the copious supply of water, in the river Kennet, near N., have occasioned the erection of numerous large corn-mills in its course; there are also large malt-houses in the town, and its immediate vicinity. The quantity of grain annually exported from N., by the Kennet and Avon canal, either as flour, malt, or unmanufactured, amounts to upwards of 7,000 tons. The market, which is one of the largest in the co. for corn, is on Thursday. Newbury is a place of considerable antiquity, being supposed to have arisen from the Roman station *Spinæ*. In the 11th of Edward III. it sent three deputies to a great council of trade held at Westminster. During the reign of Henry VIII. the famous John Winchcombe, better known by the name of 'Jack of Newbury,' flourished here. He was one of the greatest clothiers in England. In the expedition to Flodden field against the Scots, in 1513, he marched with 100 of his workmen, armed and clothed at his own expense. In the vicinity of the town two sanguinary battles were fought between Charles and the parliamentarian forces.

NEWBURY, a township of Merrimac co., in the state of New Hampshire, U. S., 130 m. WNW of Concord. It has a mountainous surface, and is bordered on the N by Sunapee lake, and drained by a branch of Warner river. Pop. in 1840, 816.—Also a township of Orange co., in the state of Vermont, 36 m. SE of Montpellier, on the W side of Connecticut river, opposite Haverhill, New Hampshire. It contains a wide extent of fine alluvial land on the Connecticut, and is watered on the N by Wells river. Pop. 2,578.—Also a township of Essex co., in the state of Massachusetts, 31 m. N by E of Boston, on the S side of Merrimac river, opposite Salisbury, in New Hampshire. The soil is fertile and well-cultivated, and is watered by Parker and Artichoke rivers. Pop. 3,789.—Also a township of York co., in the state of Pennsylvania, 12 m. N of York. It has an undulating surface, and is bounded on the S by Conewago creek, on the W by Stoney Run and Beaver creek, and intersected in the NE by Fishing creek. The soil consists of calcareous loam and gravel. Pop. 1,850.—Also a township of La Grange co., in the state of Indiana. Pop. 145.

NEWBURY PORT, a township and port of Essex co., in the state of Massachusetts, U. S., 38 m. N by E of Boston, beautifully situated on the S bank of Merrimac river, at its entrance into the Atlantic. Pop. in 1830, 6,388; in 1840, 7,161.

NEWBY, a township in Irthington p., Cumberland, 5¼ m ENE of Carlisle, on the N bank of the Irthing, near its junction with the Eden. Pop. in 1841, 124.—Also a township in Stokesley p., Yorkshire, 3 m. NNW of Stokesley. Area 1,940 acres. Pop. in 1841, 133.—Also a township in Scalby p., Yorkshire, 2 m. NW by W of Scarborough. Area 1,240 acres.—Also a township in Clapham p., Yorkshire, 7½ m. NW of Settle. Pop. 890.—Also a township in Ripon p., Yorkshire, 3 m. SE by S of Ripon, on the E bank of the Ure. Area 700 acres.—Also a township in Morland p., Westmoreland, 6 m. W by N of Appleby. Pop. in 1841, 284.—Also a township in Kirby-Wisk p., Yorkshire, 15½ m. SE by E of Richmond. Pop. in 1841, 231.

NEW CALEDONIA, an extensive island of the S. Pacific. It was first seen by Cook in 1772; but his survey of it extended no farther than to its NE parts. Twenty years afterwards, it was visited by D'Entrecasteaux, when a more extended observation was directed both to its coasts and to the interior. According to the account of the former of these navigators, it is situated between S lat. 19° 37′ and 22° 30′, E long. 163° 37′ and 167° 14′. The position assigned to it by the latter is for the S extremity, S lat. 22° 31′, E long. 166° 60′; for the N, S lat. 19° 58′, and E long. 163° 30′. Its length from SE to NW may be estimated at about 400 m.; its greatest breadth does not exceed 60 m. The coast is bold and difficult of access, and is on almost all sides environed with coral reefs, islets, shoals, and sand-banks, which either form a continued chain, in the line of the shore, and at from 4 to 50 m. from it, shutting it up completely from the open sea, or assume the yet more dangerous aspect of numerous unconnected points shooting up irregularly from the surrounding deep. "On the SW side a coral reef extends along the whole coast, forming a steep wall to seaward, level with the water's edge, and having no soundings within two ships' length of it with 150 faths. line. There are several passages through the reef admitting ships of the largest size, with good anchorage inside in from 18 to 10 and 8 faths. The bottom is sandy near the reef; but towards the shore changes to a bluish stiff mud. In clear weather, and the sun at an alt. of 20°, a ship—with a look-out on the topsail yard—may be navigated up and down the coast inside the reef for nearly 75 m. Vessels should be kept nearer the coast-line than the reef, as, when the latter is approached, there are many spits of coral which would not be seen, were the sun obscured, until the ship was close upon them. The coast-line is mostly clear, and there are few dangers but what are visible. Inside the reef there are a number of islands of considerable size, situated about from 3 to 4 m. from the mainland, forming excellent harbours, with a depth of water from 11 to 3 faths. In fact, one of these harbours, to which there is a direct entrance through the reef, is a natural wet-dock which would contain a number of large vessels,

and a more excellent depot for the accommodation of steamers could not perhaps be found in the world. Distant about 12 or 14 m. in a SE direction, fresh water may be obtained on many of the islands, and an abundance of firewood. On the mainland, fresh water may always be procured; and in many places boats can enter the small fresh-water rivers and fill alongside. The NE side does not furnish more than three good harbours, and it requires great caution in approaching them, as there is a chain of reefs fronting the whole length of the coast, with many detached, diverging from 1 to 9 m. from the shore, with no anchorage inside of them, until about 150 m. to the NW, where the reef is continuous for some time, and forms a good anchorage. The whole coast of New C., on both sides, has at a distance a most uninviting appearance, except about 40 m. at the NW end, where the land is thickly covered with vegetation to the water's edge. On entering the rivers a fine alluvial country is found; on the NE side, more particularly, the scenery is grand beyond description. Most of the land has evidently been formed from the washing down of soil from the high lands for ages. In some places the land is formed into small islands, with a good boat channel between them, forming picturesque views when seen from a height. In the valleys there are groves of the courie pine large enough to make spars for vessels of 300 to 400 tons; and there are many other trees of large dimensions. fit for shipbuilding and other purposes." [*Overland Register.*] The sea around the coasts is generally deep, and abounds with fish, which the native, safe within the barrier of the surrounding rocks, can pursue with ease and success in the slightest canoe.

Climate.] The winds in May, June, and July, were found by Cook to be chiefly from E points; but in the subsequent month they were more from the W. The heat was excessive, but the degree indicated by Reaumur's thermom. was never higher than 25° on shore, and 21° at sea. The writer in the *Overland Register* reports that the climate is very salubrious by reason of the cool SE winds blowing from April to October. "There are frequent gales of winds from November to March, accompanied with heavy rains from the NE, the wind veering round to NW and SW. When it gets to the southward of SW the weather becomes fine and serene, and the wind settles to the S and E, with moderate weather, until change of the moon, when an alteration takes place, and the same expositions of winds are observed. In the latter part of November, and nearly all December, there is much lightning and heavy thunder, with vast quantities of rain, but these storms seldom last beyond 36 hours. At these periods the water inside the reef on the SW side is deeply coloured, from the great quantity of soil washed down from the high lands all along the coast, and it is then dangerous to move a ship, unless the commander is particularly well acquainted with the various channels. In February and March, hurricanes may be looked for; but they seldom rage with the fury which they do at the Mauritius, which is in the same parallel; nor are they so frequent as they are at that island, as several years may pass over without one being known. They commence from the same point of the compass as those at the Mauritius, and there is about the same interval of calm, but they soon resolve themselves into moderate gales." The tides were observed only once a-day, when the water rose in perpendicular height from 4 to 5 ft.

General features.] The aspect of the island is mountainous and lofty. A chain of hills, consisting of three distinct rows or ridges, the breadth of which, taken together, is not less than 20 m., runs through the whole extent of the island, in the direction of its length, or NW and SE. These ridges rise above one another somewhat in the form of an amphitheatre, varying in elevation from 2,000 to 6,000 ft. above the level of sea. One detached mountain rises above all the others to an alt. of 7,000 ft. The principal component parts of these masses are quartz, mica, steatite more or less hard, green schorl, granite, specular iron-ore, &c. Garnets are also found, likewise serpentine, hornblende, and talc. New C. appears to be entirely destitute of volcanic productions. The soil on the sides of the hills is principally a yellow clay; but is commonly of small depth, and much interrupted by deep ravines, rocky protuberances, and other obstructions: while nearer the summits, the farther impediment is added of extreme cold, and violent winds. Commonly, however, the mountains are coated with coarse grasses and other plants, and here and there with trees and shrubs: some are even covered with trees to their very tops. The comparatively low-lying grounds, which for the most part prevail over the whole extent of coast, and stretch to a great distance between the hills, have a sandy black mould; and the cultivation of them is conducted with industry, and at the same time with considerable skill. Soil, which otherwise would not be sufficiently permanent to insure a crop, is secured and supported by means of little walls built under it; and the fruitfulness of arid spots is increased by leading into them streams of water.—The vegetable productions of New C. seem, in general, to be the same which prevail commonly in similar latitudes. Small clusters of fig, cocoa, or other trees, usually surround the different hamlets, serving at once for ornament and shelter. In one or two instances there were observed thick forests of cocoa-trees; but, upon the whole, these seem to be rather scarce in the island; and even of the plantain and bread-fruit tree, notwithstanding the attention that seemed to be paid to them where they occurred, few specimens were seen. Bananas, Caribbee cabbages, and other plants of the arum tribe, melaleuca trees, and various plants of the *Proteæ* and *Bignoniæ* families, are mentioned among the productions that were observed here, as also some species of *hibisci*, *acanthi*, *casuarinæ*, and *acrosticha*. The *Commersonia echinata*, a tree very frequent in the Moluccas, was noticed in the upper grounds; and a species of *hypoxis* grows here spontaneously. Sugar canes, sweet potatoes, and yams also occur, together with a species of bean, *Dolichos tuberosus*, the roots of which are very much in request as an article of food. Some new species of figs, a peculiar fern, a jasmine, a plant or two of the asparagi and loti families, several species of limodorum, of passiflora, and of cerbera occur here. The animal kingdom contains a beautiful species of magpie, several varieties of pigeons, and a species of fish belonging to the genus tetraodon of Linnæus, apparently of a poisonous quality. Till the arrival of Cook at this island, the inhabitants appear to have been altogether unacquainted with goats, hogs, dogs, or cats; but the animals which he left were probably devoured or destroyed, as no vestiges of them were discovered by D'Entrecasteaux's people.

Population.] A stranger visiting this country would imagine it was thickly populated, in consequence of the natives—generally speaking, two or three friendly tribes—assembling together whenever Europeans make their appearance. That it has been thickly populated at some time there can be little doubt, not only from the appearance of the neglected cultivation, but from statements made by the elder inhabitants. Captain Kent, of her Majesty's ship Buffalo, who discovered and named Port Saint-Vin-

cent in 1803, mentioned that the natives were very numerous there; at the present time there are not 20 natives to be found all around that fine harbour. For many miles round the S end, and on the coast WNW about 50 m. from Port Saint-Vincent, there is not a native establishment to be seen. The natives are most numerous at the NW end of the island, and there is a considerable number residing on the adjacent islands inside the reefs on the SW side, generally employed in fishing, who are all subject to the chiefs on the mainland. The whole pop. of New C. would probably not be under-rated at 25,000, although the French Roman Catholic missionaries have stated the pop. to be 60.000. There are now residing at Balade harbour 11 French missionaries.—The inhabitants are a robust race of people, well-made, active, and of features and an expression of countenance rather agreeable. The common stature, both of men and women, especially of the former, is above the middle size. There were some instances of persons not less than 6 ft. 4 ins. high. The prevalent colour is somewhat between a copper colour and a jet black. The beards of the men, and the hair in both sexes, is strong, coarse, and much frizzled. The practice prevails of pulling out the beard by the roots. The hair is worn in many different ways: sometimes tied up to the crown of the head, sometimes clubbed at the sides, sometimes cropped short, and sometimes the appearance of long hair is acquired by means of two or three artificial tresses, made commonly with the leaves of some plant of the grass kind, and covered with the hair of the vampire bat. The men wear little or no clothing. A kind of garments made of coarse matting was observed among them, but was seldom used by them. Their ordinary dress consisted merely of a piece of stuff manufactured from bark, or of the large leaf of a tree suspended from the neck, and wrapt round the middle of the body. The dress of the women is a short petticoat or fringe, formed by putting together filaments of the plantain tree to the thickness of 6 or 8 inches, and not much more in length, which are fastened about the waist by means of a long string. Their houses or huts are of a circular construction, somewhat in the form of a bee-hive, with a framing of small spars, reeds, and such like materials. The roof tapers off in a pretty regular cone, and is terminated by the upper end of a post fixed in the centre of the floor; the whole being covered with a thatch made of coarse long grass.—The subsistence of the natives is chiefly derived from roots and fish. The canoe which they use seems to be peculiar to themselves, being a double canoe, formed by the junction, at the distance of about 3 ft., of two distinct single ones. The mast is in the middle space betwixt both; and this clumsy and inartificial vessel is impelled by means of one or two latteen sails. Their principal offensive weapons are clubs, spears, darts, and slings, which they use with considerable art, and which are made with much neatness, and even often decorated with a profusion of ornaments.—The territory of New C. is divided apparently into many districts, each governed by its own chief. There is some intercourse of war or of peace between these different principalities, but there has been as yet no such union as to have ever led to the denomination of the whole island by a common name.—Of the religion of the people of New C. nothing is known. They deposit their dead in the ground, and generally in the vicinity of their dwelling-houses.—The language spoken in New C. is in some degree peculiar, but seems to be chiefly a compound formed from several of the languages prevalent in the different adjacent clusters of islands. A vocabulary of this language is annexed to the narrative of D'Entrecasteaux's voyage, published by Labillardiere.—A sort of disease, somewhat of the nature of a leprosy, seems to be very prevalent. Vast swarms of mosquitoes which hover everywhere around the coasts, are extremely troublesome, both in the houses and in the fields.

NEW CANAAN, a township of Fairfield co., in the state of Connecticut, U. S., 74 m. SW of Hartford. The surface is mountainous, and the soil chiefly gravelly loam. Pop. in 1840, 2,217.

NEW CANTON, a village of Buckingham co., in the state of Virginia, U. S., 64 m. W of Richmond, on Slate creek. It contained in 1840 about 36 dwellings.

NEW CARLISLE, a village of Bethel township, Clark co., in the state of Ohio, 102 m. W of Columbus. Pop. in 1840, 475.

NEWCASTLE, or Newcastle-Lyons, a parish, containing a village of the same name, in co. Dublin. Area 4,282 acres. Pop. in 1831, 1,098; in 1841, 1,108.—The village, formerly a parl. borough, stands on the road from Lucan to Naas, 4 m. SSW of Lucan, at an alt. of 307 ft. above sea-level. Pop. in 1831, 395; in 1841, 281.

NEWCASTLE, a small sea-port in co. Down, at the head of the most westerly sweep of Dundrum bay, 2 m. SE of Bryansford, and 10 m. SW by S of Downpatrick. The town has gradually and somewhat rapidly increased in importance since 1822; it has acquired much celebrity, and certainly possesses powerful attractions as a watering-place. It is now nearly 1 m. in length, and contains several places of worship, some schools, a comfortable inn, numerous pleasant and respectable bathing-lodges, several large and handsome private dwellings, and various other appropriate attractions. A harbour, designed to be a place of rendezvous for the revenue cruisers in the neighbouring coast, has been completed at a total cost of about £30,000. Considerable quantities of granite from the neighbourhood are shipped at the port; some agricultural produce is sent to the larger towns; and the general trade of both port and market has materially increased. Pop. in 1831, 987; in 1841, 1,057.—Also a parish in co. Limerick, containing the village of Churchtown, and the greater part of the town of Newcastle. Area 5,425 acres. Pop. in 1831, 4,434; in 1841, 4,191.

NEWCASTLE, a market-town in the ps. of Newcastle and Monegay, co. Limerick, at the intersection of the road from Limerick to Tralee, 10 m. NE of Abbeyfeale. It contains a church, a Roman Catholic chapel, a market-house, and an infantry-barrack; and stands in the centre of the richest part of a very fertile and beautiful tract of country, watered by a pleasant affluent of the Deel. Pop. in 1831, 2,908; in 1841, 2,917.

NEWCASTLE, a parish, containing a v. of the same name, in co. Tipperary, 6¾ m. SW of Clonmel. Area 10,854 acres. Pop. in 1831, 2,455; in 1841, 2,953. The village of N. stands on the Suir. Pop. in 1841, 253.—Also a parish of co. Waterford, 4 m. E by N of Kilmacthomas. Area 3,961 acres. Pop. in 1831, 1,124; in 1841, 1,337.—Also a village in the parish of Lower Newcastle, co. Wicklow, 2½ m. S of Kilcoole. Pop. in 1841, 196.—Also a village in the p. of Enniskeen, 3¼ m. NNW of Nobber, co. Meath.—Also a village in the p. of Rahoon, co. Galway, on the Corrib river, 1 m. N by W of Galway.

NEWCASTLE, a county in the N part of the state of Delaware, U. S., comprising an area of 456 sq. m., bounded on the E by Delaware river, and drained by Naaman's, Brandywine, Red Clay, Christiana, St. George's, Appoquinnimink, Blackbird, and Duck creeks. It is hilly towards the N and W, but in the E is low and marshy. The soil is gene-

rally fertile. The railroads from Philadelphia to Baltimore, and from Newcastle on the Delaware to Frenchtown of the Chesapeake, and a ship-canal connecting the Delaware with the Chesapeake, pass through this county. Pop. in 1840, 33,120; in 1850, 42,669.—Also a township of Lincoln co., in the state of Maine, 35 m. SE of Augusta, between Damariscotta and Sheepscot rivers. Pop. in 1840, 1,712.—Also a township of Westchester co., in the state of New York, 128 m. S of Albany. It has a hilly surface, and is drained by Croton and Saw-mill rivers. The soil consists chiefly of gravel, clay, and sandy loam.—Also a township of Rockingham co., in the state of New Hampshire. It consists of an island in Portsmouth harbour, comprising an area of 458 acres. Pop. 472.—Also a town of Neshannock township, Mercer co., in the state of Pennsylvania, 234 m. WNW of Harrisburg, at the confluence of Shenango and Neshannock creeks. Pop. 611.—Also a village of Newcastle co., in the state of Delaware, 5 m. SSW of Wilmington, on the W bank of Delaware river, and 32 m. SW of Philadelphia, on the Newcastle and Frenchtown railroad. Pop. 1,200.—Also a village of Bottetourt co., in the state of Virginia, 192 m. W by S of Richmond, in the fork of Craig's creek. Pop. 110.—Also a township of Coshocton co., in the state of Ohio, 71 m. ENE of Columbus.—Also a village of Henry co., in the state of Indiana, 47 m. E by N of Indianapolis, on Blue river. Pop. 528.

NEWCASTLE, an incorporated district of New South Wales, comprising the NE portion of the co. of Northumberland, and containing an area of 112,028 acres.—Also a parish and sea-port town in the same co. The parish is bounded on the N by the river Hunter; on the E by the Pacific; and on the W by the p. of Hexham. The town is at the mouth of the river Hunter, in S lat. 32° 55′ 50″, E long. of Sydney 0° 34′ 45″, 80 m. from Port Jackson. Its native name is Mulubinba. Pop. 1,471. The entrance of the harbour is sheltered by Nobby or Coal island.

NEWCASTLE, a district of Upper Canada, bounded by Colborne district on the N, from which it is separated to a considerable extent by Rice lake and the river Trent; on the E by the Victoria dist.; on the W by the Home dist.; and on the S by Lake Ontario. It comprises the counties of Northumberland and Durham, and is watered by Skugog lake and numerous streams. The surface, amounting to 1,970,000 acres, is generally hilly, and the soil varied in quality; but it is to a great extent well-cultivated, and produces wheat and other grain in large quantities and of excellent quality. Pop. in 1842, 32,033; in 1848, 47,433. Coburg, the district-town, is a large and flourishing place.—Also a village in the township of Clark, 5 m. E from Bowmanville. Pop. about 300.

NEWCASTLE (Bay), an indentation of the NE coast of Australia, 9 m. wide and 6 m. in depth. Its shores are low and sandy.

NEWCASTLE (Little), a parish in Pembrokeshire, 9 m. N of Haverfordwest. Pop in 1841, 431.

NEWCASTLE (Lower), a parish and village of co. Wicklow, 2½ m. SE of Newtown-Mount-Kennedy. Area 4,750 acres. Pop. in 1831, 1,399; in 1841, 1,226.

NEWCASTLE (Upper), a parish in co. Wicklow, containing the small town of Newtown-Mount-Kennedy. Area 7,025 acres. Pop. in 1841, 2,766.

NEWCASTLE-IN-EMLYN, a market-town in Kennarth p., co. of Carmarthen, 10 m. SE by E of Cardigan, on the river Teifi. Pop. 1,049. The earl of Cawdor derives the inferior title of baron from this place.

NEWCASTLE-UNDER-LYME, a parish and parl. borough in the N division of Pirehill hundred, Staffordshire, near the source of the Trent, intersected by a branch of the Grand Trunk canal, about 5 m. E of the Whitmore station on the Grand Junction railway, and 19 m. NNW of Stafford. Area of the p. 640 acres. Pop. in 1801, 4,604; in 1831, 8,192; in 1841, 9,838.—The town is well-built, particularly the principal street, which is spacious and well-paved, with an excellent market-place in the centre of the town, in which stands the guild-hall. There are a theatre, a literary and scientific institution, and several libraries in the town. The income of the borough in 1848 was £796. The borough returns 2 members to parliament. The ancient parl. boundaries were co-extensive with the parish; under the new boundary act, a small isolated portion of the township of Penkhull, in the p. of Stoke-upon-Trent, has been added to the borough. Pop. of the parl. borough in 1851, 10,569. Electors registered in 1837, 990; in 1848, 1,047. N. is a polling-place in the county elections. The chief manufacture is that of hats, which are prepared here for the finishers in London; but this branch of trade has greatly declined since the introduction of silk hats. Two silk-mills, in 1838, employed 396 hands; the cotton-manufacture has been introduced, and paper and pottery are made to a small extent. N. was formerly regarded as in some measure the cap. of the pottery dist. An extensive coal-trade is carried on in this district; and in the townships of Shelton and Hanley are valuable iron-mines.

NEWCASTLE-UPON-TYNE, the county-town of Northumberland, and one of the most prosperous and rapidly increasing towns of England, situated in N lat. 54° 58′ 30″, W long. 1° 17′ 30″, on the l. bank of the Tyne, 8½ m. above the influx of that river to the sea, 15 m. N of Durham, 56 m. E of Carlisle, 117 m. SE of Edinburgh, and 273 m. NNW of London. Both its parl. and its municipal boundaries include the former municipal borough, or town and county of the town, with an area of 2,000 acres; and the townships of Elswick, Westgate, Jesmond, Heaton, and Byker, with jointly an area of 5,568 acres. The town extends nearly 2 m. along the river, and is confronted, on the opposite or Durham bank, with the large suburban town and borough of Gateshead: which see. A narrow belt of plain along the margin of the Tyne,—the steep faces of 3 considerable eminences rising up from the plain,—the prolonged summits of the eminences stretching away in mimic table-land,—the waving hollows, and in one instance a naturally deep and rocky dell between the heights,—form the site of N. "On the lower levels, sweeping along the margin of the river, are dense masses of building through which it would seem impossible that sun or ventilation could penetrate, much less the ordinary accommodations of civilized life, and the only object of whose builders seems to have been, in the troublous times when they were built, to nestle close under the shadow and the shelter of the now old but then new castle. These places are now abandoned to the lowest, the most neglected, and the most vicious part of the pop.; while creeping up the steep banks, broad, handsome, and substantial-looking streets spread out on every hand, with exchanges, markets, news-rooms, and other appliances of civilization, which rival, if they do not surpass, those of any other town in the empire." The castle whence the town has its name stands in an irregular open area called the Castle-garth, accessible by various crooked alleys. The keep, or interior strength, covers an area of 76 ft. by 68 ft., is from 14 ft. to 17 ft. thick in its walls, and rises upwards of 97 ft. The walls, gates, and towers of N., aided by the Tyne on the S, and the deep glens of Ouseburn and Pandon-dean on the W, were regarded, in the time of Leland, as excelling the fortifications of every other town of England, and of most towns in Europe. Since 1745

however, when they were last put into a state of repair, they have been shouldered down by the dense pressure of commercial movement, and carried away in such masses that only a few remains exist to indicate general transition from warlike to peaceful times.

Public buildings.] Tyne bridge, consisting of nine elliptic arches, was rebuilt in 1774-80, at the cost of upwards of £40,000, and was widened in 1801.—The High-level bridge by which the great line of railway from Edinburgh to London is carried across the Tyne is noticed in a subsequent paragraph. The Exchange, on the S side of Sandhill, cost £10,000 in 1658, and large sums at other dates, but is now little else than the carelessly renovated wreck of a quondam structure of some grandeur. Its lower story is distributed into the fish-market, a news-room, and piazzas; and its upper part contains the court-room of the guildry and of the town's assizes. The Moot-hall, or county-court house, in the immediate vicinity of the castle, and standing 100 ft. above the level of the river, is a magnificent structure, built in 1810-12.—The custom-house, on Quay side, was purchased by the lords of the Treasury, and adorned with a neat stone front, in 1829.—The new jail and house-of-correction, in Carliol square, built in 1823-28 at a cost of about £35,000, is a massive erection, with a bold and formidable central tower.—Pandon-dean bridge, a handsome erection of 3 arches, built in 1812, spans the deep and narrow glen whence it has its name, and leads the way from New-bridge street to North Shields and Tynemouth.—The public baths, off the E side of Northumberland street, occupy an area of 172 ft. by 132 ft. There are also corporation baths and wash-houses on the New-road.—The new or central exchange, a superb edifice, occupies a triangular area between Grainger, Grey, and Market streets. The interior, used as a news-room, is a half-moon area of 11,835 square feet, and displays a semi-circular colonnade of 14 grand Ionic pillars supporting an ornate dome.—The Grey column, immediately N of the north angle of the exchange, and looking down both Grey and Grainger streets, is a noble pillar 121 feet in height, surmounted by a colossal statue of Earl Grey.—Extensive barracks, enclosed within a stone-wall, are situated in the open country, nearly ¾ m. NW of the W end of Blackett street.—The theatre-royal, on the E side of Grey street, has a sumptuous and imposing facade, 120 ft. in length.—The assembly-rooms, situated in a recess off the N side of Westgate street, were built in 1776, at a cost of £6,700. The music-hall, on the N side of Nelson street, is a handsome structure, with an apartment 80 ft. long, 40 ft. broad, and 24 ft. high.—The public markets, enclosed by Grainger, Nun, Clayton, and Nelson streets, occupy an area of 9,047 sq. yds., and are the most extensive range in Europe. The vegetable-market encloses within the fronts of the fruit and vegetable shops a hall, 318 ft. long, 57 ft. broad, and 40 ft. high, roofed with wooden work in the style of Gothic cathedrals; and has two fountains in close imitation of the famous one in the Borghese palace at Rome. The butcher-market consists of 4 avenues, each 316½ ft. long, 19½ ft. broad, and 27 ft. high, crossed by 4 lofty arcades, and provided with no fewer than 360 glazed sashes. It contains 166 butchers' shops, and a weigh-house. The corn-exchange, erected in 1839, on the N side of St. Nicholas square, is 156 ft. in length.—Other civil public buildings nearly all belong to literary institutions, schools, or charities.

Ecclesiastical buildings.] St. Nicholas church, situated in an open area, immediately S of Mosley and Collingwood streets, built in 1091, destroyed by fire in 1216, restored in 1359, and extensively repaired at numerous subsequent dates, is at once the most conspicuous and the most beautiful and imposing of all the town's rich assemblage of edifices. Its style of architecture is chiefly Tudor-Gothic, or of the decorated English character. The edifice is cruciform; and the choir, 136 ft. by 64 ft., is enclosed for service, while the nave, 110 ft. by 74 ft., is without seats. The steeple at the W end, 193½ ft. high, and 36¾ ft. by 35 ft. at the base, is very beautiful, and has been imitated in that of St. Giles of Edinburgh, St. Dunstan's in the East in London, and in several other localities.—St. Andrew's church, on the W side of Newgate street, has been ascribed to David I. of Scotland. Its style of architecture seems to have been originally Norman; but the building has been much modified by frequent alterations and repairs.—St. John's church, on the W side of Westgate street, is a large cruciform structure, probably of the age of Edward I., and chiefly of the early English character.—All Saints' church, surmounting the brow of a steep bank on the S side of Silver street, and built in 1786-96, is an elliptical structure of 86 ft. by 72 ft. in the Grecian style of architecture. St. Thomas's chapel is a beautiful edifice in the early English style. The United Presbyterian church, in Blackett street, has a handsome Gothic front.—A Roman Catholic chapel, in Pilgrim street, is lighted by six large Gothic windows.—St. Mary's (Catholic) cathedral, in Clayton street, is a handsome structure.—The Wesleyan chapel, in Brunswick place, possesses an elegantly-finished interior.—Salem chapel, built for the Methodist New Connexion, is a handsome Grecian structure, with a recessed portico of 4 fluted Doric columns.—The Primitive Methodist chapel, in Nelson-street, built in 1838, has a front in the Roman style of architecture. The Wesleyan Association chapel, in Gibson street, has been converted into Ragged schools.—St. James' chapel, belonging to the Independents, built in 1826, has a massive Doric portico and a neatly-finished interior. There are alse various other places of worship.—The Westgate-hill cemetery, opened in 1829, is in imitation of the Pere-le-Chaise of Paris. The Jesmond cemetery, consisting of 19 acres, was laid out by a joint-stock company in 1834, at a cost of about £7,000; and is tastefully arranged and planted, and enclosed with a high wall.—The early monasteries of N., or properly of Monkchester, were destroyed by the Danes; but were succeeded by others, which survived to the days of Henry VIII.—All the town and county of the town of N. are in the p. of St. Nicholas, with the parochial chapelries of All Saints, St. Andrew's, St. John's and St. Ann's, all in the archd. of Northumberland and dio. of Durham.

Literary and Scientific institutions.] The literary and philosophical society, instituted in 1793, has a library of 25,000 vols., and gives frequent courses of lectures.—The natural history society, an offshoot of the former, has a large and valuable museum, open to the members of the former society.—The Antiquarian society was instituted in 1813, and occupies the ancient castle of the Conqueror at the N end of the High-level bridge, where it has a museum and library.—The North of England society for the promotion of the fine arts and of designing for manufactures, was instituted in 1837, and is now in connection with the Government-department of practical art.—The Literary, Scientific, and Mechanical institution, occupies the centre of a range of buildings in Blackett-street, and maintains classes for various studies.—Two Law societies, instituted in 1826 and 1835, are devoted exclusively to objects connected with the legal profession.—The school of Medicine and Surgery, instituted in 1834, was dissolved about two years ago; and there are now two schools, one occupying the Barber Surgeons' hall, in connection with a College of Practical Science,—the other lodged in Neville hall, and connected with Durham university.—The Pathological society holds periodical meetings, at which papers are read. There are also one or two medical clubs.—The Botanical and Horticultural society, instituted in 1824, holds exhibitions and incites and directs attention to the objects indicated in its designation.—The chief public libraries, additional to those of the literary institutions, are one in the Trinity-house, for the master and brethren of the institution; another, called St. Nicholas, located beside the

church so named, and presenting a large, rare, and costly collection, comprising a valuable bequest from the Rev. Dr. Thomlinson; and a third, called the Medical, connected with the infirmary, but accessible to the public.—Four newspapers are published in Newcastle.

Schools.] The principal schools in N. are the Royal grammar-school, founded in 1525; the Royal Jubilee school, a handsome structure, erected in 1810 in the New-road; the Royal Improved school, for girls, founded in 1814; St. John's and St. Andrew's National schools; and St. Nicholas', All Saints', St. John's, St. Andrew's, and Hanover-square chapel charity schools. According to a paper read before the Statistical section of the British Association in 1838, there was then in N. a total of 128 day schools, conducted by 178 teachers, and 38 Sunday schools, attended by 5,058 children.—The Infirmary is an extensive and well-arranged edifice, built in 1752, enlarged in 1802, and now undergoing a further enlargement, within a spacious enclosure on the Forth bank, in Westgate township. The in-door and the out-door patients, in the year 1851-52, were respectively 1,575 and 1,930, and occasion an annual expense of about £3,000.—The Dispensary, founded in 1777, affords relief (including casualties and slight cases) to no fewer than about 11,000 or 12,000 cases in the year.—The House-of-recovery is a commodious and well-ventilated fever hospital, situated in an airy and retired spot.—The Lying-in hospital, affording a retreat to about 70 poor married women in the year, is a neat edifice, built in 1819.—The Lunatic asylum, airily situated a little NW of the House-of-recovery, is a skilfully constructed edifice, restricted to the maximum of 80 patients. An Asylum for the blind was opened in June 1838, and a Female penitentiary was instituted in 1831.—The other benevolent institutions in N., comprising an institution for the deaf and dumb, are too various and minute to admit of detail.—About 18 associations exist as auxiliaries to the Bible, Missionary, and Moral societies, general and denominational, of the metropolis.—The Chamber of commerce, and also the Commercial association, watch the interests of trade. The banking business of the town and its vicinity is very extensive, and is conducted by 3 joint-stock banks, the branch bank of England, and a private bank.

Railroads.] Private railroads or waggon-ways, first of timber, next of timber plated with iron, and next of iron bars, have existed in connection with the collieries of N. during more than two centuries.—The N. and Carlisle railway was opened partially in May 1835, and completely in June 1838. The Brandling Junction railway connects the N. depot of the N. and Carlisle railway with S. Shields and Monkwearmouth, and was completed to the original E terminus of that work in 1838. The N. and North Shields railway commences in Pilgrim-street; crosses the Ouseburn by a bridge 750 ft. in length, and 108 ft. in height, and Willington Dean by a bridge 1,040 ft. in length, with 7 arches, and altogether has, in the course of its 8 m. of extent, no fewer than 24 arched viaducts.—The Stanhope and Tyne railway, 33¾ m. long, was opened over the entire line in Sept. 1834. It serves chiefly to connect a continuously rich and extensive coal-field with the Tyne, and commands at its Shields terminus advantageous dock and quay-ground.—The N. and Durham Junction railway connects the S. Durham coal-field with the Tyne; and is carried over the valley of the Wear by a magnificent bridge, 811 ft. in length, irrespective of the approaches. Under acts of parliament obtained for the formation of 'the Great North of England railway,' a line was begun between N. and York. In 1841 a negotiation was opened between the companies of the Great North of England, the N. and Carlisle, the Durham Junction, the Brandling Junction, the Midland Counties, and the Manchester and Leeds railways, for a union of interests in a railway from the Croft branch, near Darlington, to the Durham Junction. When this union was effected, the line was pushed forward to Berwick, and thence by the North British line to Edinburgh. The York, N., and Berwick railway represents various railway interests, with a united capital of £7,300,000, and an aggregate length of 330 m. —At N. the great Eastern trunk-line of railway from London to Edinburgh is intersected by a main line of railway extending across the island from sea to sea, that is to say, from Maryport on the Irish channel, to Tynemouth on the German ocean. The local traffic of the Great Northern mining district gives employment to branches from N. to North Shields and Tynemouth, to S. Shields, and to Sunderland. Thus, with the despatch of the through trains, at least 140 arrivals and departures of passenger-trains take place daily at the central station of N.; and to provide for this immense accumulation of traffic, the sheds and erections must necessarily be upon a scale of no ordinary magnitude. The facade or principal front of the N. central station, exclusive of the hotel, is 600 ft. in length. The style of the building is Roman Doric, and the most striking feature in the design is the portico in the centre (not yet built), 200 ft. in length, by 70 ft. in width, flanked on each side by an arcade the same length, and 35 ft. in width, allowing sufficient room for passengers and luggage to be loaded and unloaded under cover. The shed is 236 yds. long, and 61 yds. wide, covering an area of 14,426 yds., or about 3 acres. The roof is composed of iron, divided into three compartments, and supported by columns 33 ft. apart, and 23 ft. apart from the platform to the springing of the roof. The various offices, waiting-rooms, and refreshment-rooms, front the platform, with the exception of the booking-office and parcels-office, which extend the full width of the building. The entrance to the shed is, from the centre of the portico, 50 ft. wide, with a stone vaulted ceiling, supported by two rows of columns, which lead direct to the centre of the platform, about 120 ft. square. The High-level bridge, by which the railway from Berwick is conducted over the Tyne to the N. terminus, is a surpassing structure, and has often been described, "but few descriptions can convey the sensations of those who pass over it for the first time; and not the least feeling is that of surprise, since, high as it is, the precipitous banks of the river on both sides, crowded as they are with a dense mass of habitations, entirely hide it from view till the train is actually upon it. Then the sudden view of ships' masts under the feet, the pigmy appearance of men and horses as they move slowly along the quaint old bridge a little lower down, give the passenger some idea of the dizzy elevation to which he is raised. Even the lower level which has been added to the railway bridge for the purposes of ordinary traffic, is high above the lower streets of the two towns, and saves to a considerable extent the steep hills by which the town is approached." This bridge is 1,375 ft. in length, running at a height of 112 ft. above high-water mark. There are 6 principal openings, each of 126 ft. span. The principle on which this bridge is constructed is that of bow and string. The arches, which form the bow, are of cast-iron, and the rods, which form the strings, are of wrought iron, to resist tension. There are 4 arches to each span, 2 on each side, which bear properly on the piers through the medium of bed-plates, on which the arches rest. The strings of each arch consist of two wrought iron rods, keyed to the arches at the abutments. Cast-iron columns connected to the arches support a platform above, on which three sets of rails are laid, and they also support another platform below for a carriage-road, the footpaths running between the two arches on each side. This road, in fact, runs along the strings, but has no connection with them; the arches take the whole weight of both platforms above and below, leaving the strings independent, to resist only the tension.

Manufactures.] The manufacture of glass was commenced at Newcastle about the close of the 16th cent.; and, though removed for a time to Stafford, was brought back to N., and has long been a chief employment in the town. Glass of all kinds is made here. The manufacture of plate-glass was commenced about a cent. ago, and is the most extensive in the kingdom. Potteries are numerous, and in some instances large. About 12 extensive chemical works, situated on the margin of the river, produce sulphuric acid, soda, and other chemical preparations. The lofty chimney-stalks of these works, varying in height from 150 to 300 ft., form a marked feature in the urban landscape, and, owing to the flatness of the surrounding country, are seen at a great distance. The manufacture of steam-engines, mill-work, and other iron-machinery, employs upwards of 2,000 hands, of whom nearly one-half are attached to the great locomotive-engine factories of Messrs. Stephenson. Extensive iron-works exist for forging, for rolling, and for casting iron. A manufactory was begun in 1796 for the conversion of lead into sheets, pipes, shot, white-lead, red-lead, and litharge. Various departments of leather manufacture employ about 200 men. There are large soap-works, several sail-cloth factories, linen-yarn factories, iron and wood ship-building yards, large paper-mills, manufactories of painters' colours, brass foundries, and stove-grate factories, also coal-tar, lamp-black, copperas, and vinegar-works; linseed oil-mills, large saw-mills, bone-mills, and extensive establishments for making the celebrated N. grindstones. A screw frigate of 50 guns, launched for the Sardinian government, May 1853, shows its capability in ship-building.

Harbour and Shipping.] The Tyne, at N., has a mean breadth of about 420 ft. It so ebbs at low water as to leave belts of dry beach, yet affords even then a large extent of floating berth; it experiences a rise in spring-tides of about 11 or 12 ft.; and it can bring up to the town at all times vessels of from 200 to 300 tons, and occasionally of 400 tons. The tidal rise on Tynemouth-bar and at Shields is about 18 ft., and the depth then 26 ft. Measures have recently been in progress for deepening the river up to N. by dredging, and for adding about 3,000 ft. to the length of the quay. The port comprehends politically the whole navigation of the Tyne, and of Seaton-sluice and Blyth creeks; and, of course, includes the harbour of Gateshead, N. and S. Shields, Blyth and Hartley. During the early Norman reigns, the Tyne

was a port of shipment for the bishopric of Durham, and the bishops jealously guarded the rights connected with its navigation, maintaining for themselves the same privileges on the southern bank which were possessed by the burgesses of N. on the northern. On the acquisition, however, of the wapentake of Sadberge by Hugh Pudsey, the facilities presented by the situation of Hartlepool seemed to have attracted his notice. Under his episcopate and that of his successors it became the emporium of the palatinate, and the control of the navigation of the Tyne was, after many struggles with the borough of Gateshead and the monasteries of Tynemouth and Durham, ultimately transferred to the exclusive conservancy of the corporation of N.—The shipping of N., though on the whole of gradual increase, experienced two great accessions, respectively after the commencement of the coal trade to London, and during the last continental war. Its amount, in 1676, after the coal trade had been quite formed, was estimated at 80,000 tons. In 1850 the number of sailing vessels registered at the port of N. was 913 = 196,366 tons; and of steam-vessels 138 = 3,830 tons. In 1851, 136 steamers were registered, and 898 sailing vessels. Some addition must be made to these figures in consideration of large vessels, really belonging to the port, but registered at London. Yet only about one-half belongs to the town of N.; the other moiety being connected with the other harbours of the political port. The number of men and boys employed in the navigation, is about 14,000. Large steam-vessels ply regularly and frequently between Newcastle and Hamburg, Rotterdam, Aberdeen, Leith, Hull and Gainsborough, and London. Considerably upwards of 100 small steam-vessels, of aggregately about 2,000 tons, are employed in towing sailing-vessels, and in making passenger-trips between N. and Shields.

Commerce.] The principal articles of foreign export are coals, lead and its preparations, the various kinds of glass, iron in its different forms and conditions, earthenware, bricks, fire-clay, and fire-bricks, painters' colours, chemical preparations, soap, linen and linen yarn, sailcloth, woollen goods, leather, ropes, machinery, coal-tar, and grindstones. The trade in most of these articles, particularly in chemicals and in the preparations of lead, has been rapidly increasing. The following table, showing the number and tonnage of vessels which have cleared out for foreign ports, indicates the amount and increase of the whole foreign export trade of N., exclusive of Shields, since 1820:—

Year.	Brit. Vessels.	Tonnage.	For. Vessels.	Tonnage.
1821,	761	111,521	96	8,141
1826,	736	112,917	430	40,728
1831,	772	114,689	499	50,175
1837,	1,608	248,558	1,117	126,583
1850,	2,540	475,340	2,260	294,972

In addition to the above trade, the number of ships which cleared for the colonies in 1850 was 299 British vessels = 55,941 tons, and 30 foreign vessels = 10,438 tons; while 61 British vessels = 13,025 tons, and 10 foreign vessels = 1,290 tons, entered inwards from the colonies. The foreign import trade of N., in consequence of the most valuable articles of foreign produce being received coastwise from Hull, London, and Leith, deals almost wholly in bulky articles for consumption in the town and a limited circumjacent district. Its chief articles are grain, timber, hides, hemp, flax, tallow, brimstone, bones, grease-butter, oak bark, Dutch cheese, wines, spirits, seeds and fruits. The trade is much inferior to that of foreign exports; but is rapidly increasing. The following table of arrivals shows its amount and augmentation:—

Year.	Brit. Vessels.	Tonnage.	For. Vessels.	Tonnage.
1821,	152	24,741	71	5,906
1826,	194	33,518	214	19,100
1831,	274	47,670	249	23,458
1837,	291	54,992	327	32,618
1850,	827	144,489	1,089	144,612

The outward coasting-trade is extensive and increasing; and deals chiefly in coals, and, next to them, in the same articles as those of foreign export. The principal additional articles are paper, plate-glass, bacon and butter, anchors and chain-cables, locomotive engines, tiles, and leather gloves. The chief articles of the inward coasting-trade are groceries, Irish farm produce, Scotch timber for the collieries, soft goods, wines, spirits, drugs, oils, herrings, slates, paving stones, and, in general, whatever is needed for the mines and the manufactories. The condition of the coasting-trade, both out and in, is shown by the following table:—

	OUTWARD.		INWARD.	
Year.	Vessels.	Tonnage.	Vessels.	Tonnage.
1823,	11,271	1,543,815	2.275	189.240
1827,	10.632	1,439,941	2,214	109,077
1831,	10,855	1,475,302	2.358	215,481
1837,	15,399	1,818,409	2.923	259.172
1850,	11,314	1,596,748	1,928	167,187

It is to be observed that the return for 1850 does not include the port of Shields, nor the steam-vessels traffic. The latter consisted in 1850 of 366 vessels = 64,862 tons clearing outwards; and 371 = 64,364 entering inwards. The gross receipts at the Custom-house, in the years ending 5th January 1836-7-8-9-40, were respectively £307,274, £413,796, £379,360, £464,219, and £443,294. In 1848, they amounted to £391,986; and in 1849 to £347,498. These receipts were exceeded in Britain only by those of London, Liverpool, Bristol, Hull, Leith and Glasgow. There are bonded warehouses at N. for all foreign goods, without limitation.—Three or four ships belonging to this port were annually sent to the Davis's Straits whale-fishing; but this branch of industry has of late years deserted the Tyne.

The Coal trade.] The Romans appear to have had no proper name for coal, yet it was used among them. Coal cinders form part of the relics found at Roman stations in this country, yet they do not seem ever to have worked it systematically. In 852 a payment in kind was made to the abbey of Peterborough, consisting of ale, wood, and 12 vessels of fossil or pit coal. The use of coal, however, was long very limited. In the *Leges Burgorum*, made about 1140, a particular privilege was granted to those who brought fuel into boroughs, but coal was not among the kinds mentioned. These laws were made in N. by David, King of Scotland, then in possession of the town. Probably coals were used for manufacturing purposes in N., and exported also, before the grant of any royal charter to work them; because privileges were not sought till their value was known. In 1239 Henry III. granted a charter to the freemen of Newcastle to dig coals in the Castlefield and the Forth. Six years afterward coal was called by Matthew Paris *carbo maris*, i. e. 'sea coal,' from its being taken to London by sea. The mines at Liege were discovered in 1189. The tracts of ground "extra muros," mentioned in the charter to N. of Henry III., contained at that time several beds of coal, particularly the seam from 5 to 6 ft. thick called the High main. In aid of the free-farm rent payable to King John, the liberty to dig coals was granted by his successor. In 1305, towards the end of the reign of Edward I., artizans and others used coal, other fuel becoming scarce in populous districts; but parliament declared it a noxious nuisance, corrupting the air by its smoke. In the beginning of the 14th cent. the coal trade was found to be progressing by the opening of new mines, while the old were still worked. Two of the new ones are mentioned as having been let by the prior of Tynemouth, near Elswick. In the middle of the 14th cent. the working of coals extended on the N, S, and W of Newcastle, but only where it lay near the surface. In the latter part of the 16th cent. coal was in general use for manufacturing and culinary purposes, but not for domestic fires. In the reign of Charles I. coal was much in demand in the metropolis; and in 1703, it was officially reported by the Trinity-house of N. to have become an article of export to the amount of 48,000 N. chaldrons a-year. In 1710, 1773, and 1779, the quantities exported were respectively 178,143,—326,542,—and 491,185 chaldrons. In 1800, 537,793 chaldrons were shipped coastwise, and 47,487 foreign, the Newcastle chaldron weighing 53 cwt. The following table exhibits, for the years specified, the amount of shipments of coals coastwise from the United Kingdom, and from the port of N·

Year.	United Kingdom. Tons.	Newcastle. Tons.
1820,	4,554,308	2,004,759
1829,	5,854,378	1,956,829
1838,	7,182,351	2,453,225
1840,	7,459,070	2,267,082
1850,	9,112,122	2,270,379

The quantity exported to foreign countries was, in 1833, 230,434 tons; in 1838, 554,175 tons; in 1849, 834,005 tons; in 1850, 1,088,495 tons. In 1852, 1,054,000 tons left the port for 311 places in various parts of the world. The coals were, for the most part, carried down the river in broad vessels called *keels;* and the boatmen, in consequence, wear the designation of keelmen. But coal is now shipped most commonly by railway.

Municipal corporation.] Under the municipal reform act, N. is governed by a mayor, 14 aldermen, a sheriff, 42 common councillors, a recorder, a town-clerk, and an under-sheriff. The county of the town court is held by the deputy-recorder. The board of river-conservancy now consists of representatives of the town-councils of Newcastle, Gateshead, South Shields, and Tynemouth, with four life-members appointed by the Admiralty. The assizes for the county are held at N. twice a-year. The following is the gross amount of receipt and expenditure of burgh funds in the years stated:—

	Receipts.	Payments.
1822-3,	£39,849	£37,645
1828-9,	46,462	46,320
1831-2,	43,397	43,386
1839,	69,435	69,427
1850,	70,104	75,603
1851,	58,372	58,337
1852,	49,842	49,870

The diminished receipt and expenditure arises from the transference of the river-conservancy to the commissioners.

The police of N. is composed of a superintendent, inspectors, and constables. The borough of N. returns two members to parliament. The pop. of the parl. burgh in 1841, was 60,430; in 1851, 87,784. The number of electors registered in 1837, was 1,816 freemen and 2,766 householders; in 1847, 1,812 freemen and 5,370 householders. Newcastle is a polling-place in election of members for the southern division of the county.

History.] Various antiquarian remains prove the site of N. to have been that of a Roman station. During the heptarchy, the place became a prime retreat of monks, and in consequence obtained the graphic name of Monkchester. In 875, the monasteries of Monkchester were plundered and dilapidated by the Danes; and thence, till 1073, they lay in desolation. In 1068, William the Conqueror encountered, on Gateshead fell, and completely defeated, Edward Etheling, and Malcolm, king of Scotland. Early in the reign of Stephen, the town by force, and the castle by treaty, fell into the keeping of David I. of Scotland; and they remained 16 years under the Scottish crown. Edward I. received at N. John Baliol's homage for the crown of Scotland. In 1346, the town furnished for the siege of Calais 17 ships and 314 mariners,—a quota larger than that from any northern or central port excepting Yarmouth. The plague frequently ravaged N. In 1588, 1589, 1625, and 1638, it made appalling havoc. In 1639, Charles I. remained 12 days at N., at the head of an army, which he led against the Scottish Covenanters. During a year succeeding August 1640, the town was in the possession of the Scots. During the rebellion of 1745, N. contributed 3,000 volunteers against the Jacobites, and became the rendezvous of about 15,000 troops. Subsequent public events have, for the most part, had reference to architectural, municipal, commercial, and social improvements.

NEWCHURCH, a parish of Kent, 4½ m. N by W of Romney. Area 2,930 acres. Pop. in 1831, 241; in 1841, 282.—Also a chapelry in Winwick p., Lancashire, 4¾ m. E by S of Newton.—Also a parish in Monmouthshire, 5¾ m. NW by W of Chepstow. Area 3,460 acres. Pop. in 1831, 723; in 1841, 688.—Also a parish in the isle of Wight, 4½ m. SE by E of Newport, on the S bank of a small river which flows into Brading harbour. Area 8,870 acres. Pop. in 1801, including the township of Ryde, 2,039; in 1831, 4,928; in 1841, 8,370.—Also a chapelry in Whalley p., Lancashire, 4½ m. W of Colne.—Also a parish in Radnorshire, 7 m. SW of Kington, on the river Arrow. Pop. in 1831, 164; in 1841, 155.

NEWCHURCH-IN-ROSSENDALE, a chapelry in Whalley p., Lancashire, 6 m. SW of Burnley. Coal, freestone, and slate, are wrought here; and cotton and woollen goods are manufactured to a considerable extent. Area 9,650 acres. Pop. 9,196. Dedwin-Clough, Tunstead, Wolfenden, and Bacup are included in the returns made from this place.

NEW-CHURCH, or Llan-Newydd, a parish in Carmarthenshire, 3¼ m. NW of Carmarthen. Pop. in 1831, 659; in 1841, 847.

NEW COLUMBIA, a village of Union co., in the state of Pennsylvania, U. S., 72 m. N of Harrisburg, on the W bank of the W branch of the Susquehanna river. In 1840 it consisted of about 35 dwellings.

NEWCOMB, a township of Essex co., in the state of New York, U. S., 32 m. SW of Elizabeth, and 92 m. N by W of Albany. Pop. in 1840, 74.

NEW COMERSTOWN, a village of Oxford township, Tuscarawas co., in the state of Ohio, U. S., 93 m. ENE of Columbus, on the N bank of the Tuscarawas river, and on the Ohio and Erie canal.

NEW CONCORD, a village of Union township, Muskingum co., in the state of Ohio, U. S., 68 m. E of Columbus. Pop. 300.

NEW CUMBERLAND, a village of Allen township, Cumberland co., in the state of Pennsylvania, U. S., 4 m. SW of Harrisburg, on the Susquehanna river, at the confluence of Yellow Breeches creek. Pop. in 1840, 284.—Also a v. of Warren township, Tuscarawas co., in the state of Ohio, 123 m. ENE of Columbus, on the Ohio canal. Pop. 125.

NEWDIGATE, a parish, containing a hamlet of the same name, in Surrey, 6 m. SSE of Dorking, near one of the sources of the Mole. Area 4,610 acres. Pop. in 1831, 519; in 1841, 552.

NEW DURHAM, a township of Strafford co., in the state of New Hampshire, U. S., 33 m. NE of Concord. It has a hilly surface, and contains several large lakes. The soil is moist, but affords good pasturage. Pop. in 1840, 1,032.—Also a village of Bergen co., in the state of New Jersey. Pop. 25.

NEW ECHOTA, a village of Cass co., in the state of Georgia, U. S., 166 m. NW of Milledgeville, on the S side of Oostanaula river.

NEW EGYPT, a village of Upper Freehold township, Monmouth co., in the state of New Jersey, U. S., 18 m. SE of Trenton, on Crosswick's creek.

NEWENDEN, a parish in Kent, 4¾ m. SW by S of Tenterden, on the N bank of the Rother. Area 1,120 acres. Pop. in 1831, 158; in 1841, 164.

NEW ENGLAND, a squatting district of New South Wales, bounded on the N by the Darling Downs district; on the E by the Clarence and M'Leay districts, and Macquarie co.; on the S by the Manning river, by which it is separated from Gloucester co.; and on the W by the Great Dividing range. Pop. in 1847, 2,231. It comprises a superficial area of 5,000,000 acres, the principal summits of which are Ben Lomond, Mitchell, Gullegal, Bullimbulla, Basaltic Rock, Wirrekimbe, Mount Sea-View, the Snowy mountains, Sugar-Loaf mount or Chandler's peak, and the Blue mountains. The principal rivers are the Clarence, Apsley, Hastings, and Manning. The live stock of the district in 1847 amounted to 1,635 horses, 57,000 head of cattle, 570,000 sheep, and 500 pigs.

NEW ENGLAND, a name borne by the old Eastern states of the North American federacy, namely, Maine, New Hampshire, Vermont, Massachusetts, Connecticut, and Rhode-Island. In 1606, the portion of North America lying between the 34th and 45th parallels of lat. was divided by James I. into two parts, called North and South Virginia, and granted to two companies. The London company were authorized to make settlements anywhere between 34° and 41°; and the Plymouth company received the same privilege in regard to the country between 38° and 45°. In 1614, Captain Smith having examined the coasts of N. Virginia, made a map of the country, and pre-

sented it to Prince Charles, who changed the name to New England; and in 1620 a new patent was granted to the Plymouth company, comprehending that part of the country lying between 40° and 48° from N to S, and extending throughout the mainland from sea to sea, under the name of New England in America. This name has ever since continued to be appropriated to the country lying E of New York; and although it has never formed a political whole, yet the most of the colonies which were planted in it were founded on the same principles of government, by men of similar political and religious views and character, and have ever been closely associated with each other, and in many respects differed, and still differ, from the other colonies and states in their institutions and internal organization. The governments of the New England colonies were charter-governments, while those of the other colonies were royal or proprietary; the government and ownership of the country was in the colonists, while in the other colonies they were both in the crown or proprietors, or the government was vested in the former, while the property of the colony was in the latter. The New England colonists were Puritans,—a party which no less strenuously defended civil than religious liberty; and the events of the middle of the 17th cent. brought out a large number of republicans to join them. The early and general provision for common education in New England was another peculiarity of that part of the country. In ten years after the settlement of Massachusetts bay, Harvard college was established. In 1647, the legislature of that prov. passed a law, requiring every town with 50 families to provide a school; and a similar law was adopted in Connecticut in 1660. Provisions of the same nature were made in New Haven and Plymouth. These laws laid the foundation of the New England system of free schools. The organization of the church government is entirely democratical, and the municipal system is in many respects peculiar. The geographical and statistical details will be found under the appropriate heads.

NEWENHAM, a parish in Northamptonshire, 2¼ m. S by E of Daventry, at the source of the Nene. Area 1,940 acres. Pop. in 1831, 581; in 1841, 583.

NEWENHAM (Cape), a headland of Russian America, to the W of Kamuschutsk or Bristol bay.

NEWENT, a parish and market-town in the Forest-of-Dean, co. of Gloucester, 8 m. NW of Gloucester, intersected by the Hereford and Gloucester canal. The p. comprises the tythings of Compton, Cugley, Malswick, Bouldston-with-Killcot, and the liberty of N. Area 7,800 acres. Pop. in 1841, 3,099.

NEW FAIRFIELD, a township of Fairfield co., in the state of Connecticut, U. S., 74 m. SW of Hartford. Pop. in 1840, 956.

NEW FANE, a township of Windham co., in the state of Vermont, U. S., 12 m. NW of Brattleboro, and 100 m. S of Montpellier. It has a hilly surface, and is watered by West river. Pop. in 1840, 1,403.—Also a township of Niagara co., in the state of New York, 279 m. W by N of Albany. It is bounded on the N by Lake Ontario, and drained by Eighteen Mile creek. The soil consists of sandy and argillaceous loam. Pop. 2,372.

NEWFIELD, a township of York co., in the state of Maine, U. S., 80 m. SW by W of Augusta. It is drained by Little Ossipee river, and has a productive soil. Pop. in 1840, 1,351.—Also a township of Tompkins co., in the state of New York, 283 m. W of Albany. Its surface is hilly, and drained by Cayuta creek, an affluent of Cayuga lake. The soil, of gravelly loam, is generally fertile. Pop. 3,567.

NEW FOREST, a royal forest, and until recently a hundred, in the co. of Southampton, consisting of two divisions, E and W, and bounded on the N by part of Wiltshire; on the NE and E by the hund. of Redbridge and Southampton-Water; on the S and SE by Christ-church hund. and the Solent; and on the W by the hunds. of Ringwood and Fordingbridge. Area of the two hundreds, 196,230 acres. Pop. in 1831, 37,473. This extensive tract of land was appropriated by William the Conqueror to the chase. The Forest is divided into 9 bailiwicks or walks, each having a keeper under the Lord Warden, besides two rangers and a bow-bearer. It is one of the few that remain of the 69 English forests. "It seems to retain," says William Howitt, "not only more of the forest character than all our other forests, but to have maintained more exactly its ancient boundaries. William of Malmesbury says, the Conqueror laid waste 39 m. of country for this forest. The perambulation of the 22d of Charles II., extending from Milton south, along the Avon west, to Bramshire north, and within Southampton-Water east, by Fawley and Boldre, back to Milton, includes about 30 m. sq.; and this is the extent that is now attributed to it by the inhabitants of the neighbourhood. In the present hundred of New Forest, we have the parishes of Minstead, Fawley, and Boldre; the chapels or curacies of Lyndhurst, Beaulieu, Exbury and Brokenhurst. It is, indeed, the only one of our forests which can now give us a perfect idea of what an English forest was in the feudal ages." The Parliamentary evidence states there to be 66,000 acres of land in the New Forest, of which 25,000 are covered with timber, which is good land; 20,000 more are fit for the growth of the best description of timber; and 20,000 are very bad land, in waste, at present. This is the only forest belonging to the Crown, of which the origin is known. Domesday Book contains a distinct account of its afforestation; and our historians concur in accusing William the Conqueror of laying waste the country in Hampshire to a very large extent, and even destroying churches, without giving any compensation. In justice to the Conqueror's memory, however, it should be stated that an anterior forest certainly existed here, and is mentioned by several writers, under the name of Ytene. The Conqueror merely enlarged its circuit to the extent stated, and gave it a fresh name. The pop. generally, both in the forest and on the borders, are greatly inferior to the pop. of other parts of the country. Every one knows the deplorable picture which Bernard Gilpin, in one of his works, gave of the lower classes of Lymington. Gypsies frequent this royal domain at all seasons of the year, but more particularly in the spring and autumn. Their chief trade is in the New Forest ponies, which in the autumn of the year are caught up by the keepers, and exposed to sale for the benefit of government. The Forest-court is held at Lyndhurst; and the Commissioners of Woods and Forests are the parties to be appealed to in all instances of demurrage.

NEWFOUND LAKE, a sheet of water in Grafton co., in the state of New Hampshire, U. S. It is 6 m. in length, and 2½ m. broad, and discharges itself into Pemigewasset river.

NEWFOUNDLAND, an island on the E coast of America, opposite the gulf of St. Lawrence, separated from the Labrador coast on the continent on the N by the strait of Bellisle, about 21 m. wide. It is of a triangular form, extending from 47° 46′ to 51° 35′ N lat., and from 52° 33′ to 59° 20′ W long. Its length is about 450 m.; its breadth from 40 m. to 300 m. A line drawn round the three sides of its triangular-shaped coast, without tracing its deep indentations and great bays on the E and S, would exceed 1,000 m. in length. Its surface is estimated at 36,500 sq. m., or somewhat larger than Ireland. The coasts are lofty, desolate, and rocky; but its indented outline presents several excellent ports. The whole circuit of N. is indented at intervals of 2 or 3 m. by deep bays, having generally a smooth bottom, and a rivulet of pure fresh water at the head. It is in such situations that the inhabitants have most commonly built their hamlets; their fishing-craft being secured among the rocks. The interior of the country has been little explored; the wetness of the soil in summer, and the coldness of the air in winter, render this a difficult and perilous undertaking: so that it has seldom been traversed except by the aborigines of the country. It may be stated generally of the surface of the interior, that a multitude of small lakes are observed, with copious marshes around

them; hills of considerable elevation, scantily clothed with sorry birches or fir-trees; and low-lying level spaces which, if not drenched with moisture, are frequently stretched out into plains of considerable size, bearing nothing but a few stunted shrubs and a little heath among the rocks which cover them. Almost the only practicable mode of travelling in the interior of N. is by sledges on the frozen rivers.—It is a fact worthy of notice, that the whole of the land in and about the neighbourhood of Conception-bay, and very probably the whole island, is rising out of the ocean at a rate which promises, at no very distant day, materially to affect, if not render useless, many of the best harbours on the coast. At Port-de-Grave a series of observations has been made which proves the rapid displacement of the sea-level in that vicinity. Several large flat rocks, over which schooners might pass some thirty or forty years ago with the greatest facility, are now approaching the surface, the water being scarcely navigable for a skiff. At a place called the Cosh, at the head of Bay-Roberts, upwards of 1 m. from the sea-shore, and several ft. above its level, covered with 5 or 6 ft. of vegetable mould, there is a perfect beach, the stones being rounded, of a moderate size, and in all respects similar to those now found in the adjacent land-washes.

Geology.] Mr. Juke, in his Report to the legislature of N., in 1839–40, on the geology of the island, represents all the country to the S of a line drawn from Cape Ray, the SW angle of the island, to the head of the Bay-of-Exploits, in the centre of the NE shore, as hopeless and barren, covered only with granite and infertile rocks: Sir Richard Bonnycastle considers this too sweeping a conclusion; and gives it as his opinion that this district will be found to contain numerous tracts of land which only require the hand of cultivation to reduce them to fertility, and extensive and valuable mineral deposits. The great coal basin of the St. Lawrence covers a large portion of the W side of the island, terminating eastwards in a country covered with lakes, ponds, and rivers, but, according to Sir Richard, "abounding with everything requisite for settlements."

Climate.] During great part of the year the SE. and the only inhabited portion of the island, is enveloped in perpetual vapours; ships crossing the Great bank are obliged to ring bells lest they fall foul of each other; and the fortress of St. John's keeps firing a gun every half-hour to prevent them from running ashore against the rocks. The penguins of Bacalao island are protected under a penalty by law, because their cry answers a similar purpose. In winter the cold is rigorous; the whole country is ice-bound, inaccessible to vessels, and beaten with whirlwinds of sleet and snow, from which the breezes often load themselves with icy *spiculæ*, so minute that they penetrate the smallest aperture, and greatly augment the discomforts of the season. Yet in the absence of these 'frost-smokes,' as they are called, a N. winter is said to be less fierce than a Canadian one, and has some beauties peculiar to itself. The moon and stars shine here with a lustre unknown in Europe; and the Northern lights exhibit during the calm frost all their brilliancy. About the commencement of April symptoms of thaw display themselves; and a few days completes the process. As in Siberia, the snow, melted both from above and below, soon yields to this double agency, and impetuous torrents, loaded with half-dissolved fragments, and every kind of debris, rush headlong towards the coast from all points of the island. At the same period, thousands of floating masses of ice arrive from Davis' straits, and surround the shore on every side; and their mutual shocks, aided by the agitation of a turbulent sea and the deluge flowing from the land, produces a singularly wild scene. Sometimes a strong 'north-wester' will at once recongeal every thing, and bring winter back again with new bitterness. Before June, summer, without any spring intervening, has arrived: the air is now hot to suffocation, and infested with mosquitoes. About the middle of August the weather begins to be moderate; some days are even said to be delightful, but they are of short continuance; before the end of October the fogs—never long absent at any season—have resumed their empire, and cold and snow announce the approach of winter. The following table, given by Sir R. Bonnycastle, in his work entitled *Newfoundland in* 1842, shows the average of the therm. and barom. in N. for six years. The place of observation had an alt. of about 120 ft. above sea-level:

	Therm.	Barom.		Therm.	Barom.
Jan.,	22·7	29·6	July,	57·4	29·7
Feb.,	42·6	29·6	August,	58·3	29·8
March,	24·0	29·7	Sept.,	53·3	29·8
April,	33·8	29·6	Oct.,	44·0	29·8
May,	39·5	29·7	Nov.,	34·0	29·6
June,	49·8	29·7	Dec.,	26·0	29·6

The greatest height of the therm and barom., in 1841, during the same period, was:

	Therm.	Barom.		Therm.	Barom.
Jan.,	44·0	30·3	July,	79·5	30·1
Feb.,	42·6	30·2	August,	78·3	30·2
March,	47·0	30·3	Sept.,	75·3	30·2
April,	56·5	30·2	Oct.,	68·3	30·3
May,	62·0	30·2	Nov.,	57·0	30·2
June,	74·0	30·1	Dec.,	44·5	30·4

The greatest depression of the therm. and barom., for the same period, was:

	Therm.	Barom.		Therm.	Barom.
Jan.,	—3·0	28·7	July,	34·8	29·3
Feb.,	—4·6	28·6	August,	38·5	29·3
March,	—0·5	28·8	Sept.,	33 5	29·3
April,	14·3	28·9	Oct.,	24·0	29·2
May,	21·8	29·1	Nov.,	18·5	28 9
June,	29·8	29·2	Dec.,	—5·6	28·9

February is usually the coldest and most stormy, and July the warmest month in the year. The most remarkable feature of the climate is the frequency of severe gales on land, either from the N or the SW.

Native productions.] Of indigenous productions N. exhibits no great variety. Its timber is not abundant or valuable; the principal use made of it is for fuel and fishing-stages. Some attempts were made at one time to construct ships of the larger trees, but their utmost period of duration was seven years. There is some large timber about the bay of Islands, and along the coast to the N of it; and the country near the Humber is densely covered with fine black and white spruce, larch, fir, and beech.—The native animals of the island are bears, otters, beavers, red foxes, which are hunted in the winter-season for their skins, and herds of red deer. A few small horses are reared, and some black cattle find a precarious livelihood during summer among the woods, returning home of their own accord at the beginning of winter, or every evening if they have young. Goats are numerous, and chiefly supply the inhabitants with milk. The web-footed dog of this island is celebrated for his aquatic powers; he serves in his own country frequently in the additional capacity of a beast of draught. He resembles the Greenland dog in several respects, and seems to be a distinct species. The animal commonly met with in England under this name is but half-bred.—The hawk and pie families of birds are numerous; also the *grallæ* and *anseres*.—Venomous reptiles, and toads and frogs, are unknown; but musquitoes, stinging midges, and flies, are rife in every quarter.

Agriculture.] It may be said that the cultivation of the soil made little or no progress in N. until after the peace with France in 1814. The sole occupation of the resident inhabitants was confined to the fishery, and an opinion generally prevailed that the soil and climate raised impassable barriers to agriculture. It was even an offence against the laws of the fishery to clear, inhabit, or cultivate the waste lands of N. Before that period there may have been some few gardens for vegetables, and a few spots of land cleared for raising potatoes; but farming, as an occupation, or as a means of employment or subsistence, was unknown. The first relaxation was made in the old system regarding land in 1815, by the governor, Sir Richard Keats, who was authorized to make small grants of land, limited from 2 to 4 acres. Sir Thomas Cochrane, immediately on his arrival as governor, in 1825, entered warmly into the subject of the agricultural improvements of the colony, and made liberal grants of land from 500 to 250 acres. The large amount of appropriations for the forma-

tion of roads, during the government of Captain Prescott, greatly facilitated the progress of agriculture; not only the margins of the various roads branching from St. John's, but likewise in Conception bay, Trinity bay, Bonavista, Ferryland, Prepassey, St. Mary's, Placentia, Burin, and in all the inhabited districts of the island, a road was opened, and cultivation and pop. followed in its course. During the administration of his successor, Sir John Harvey, large votes were recommended to the assembly for roads and bridges; land, particularly in the neighbourhood of St. John's, doubled in value; and agriculture became a recognised and important branch of industry. Farms have been successfully cultivated in the districts of St. John's, Trinity, Bonavista, Conception bay, St. Mary's, Placentia, Burin, and Fortune bay; and in every part of the island, wheat, oats, barley, potatoes, turnips, have been produced of excellent quality. Governor Sir J. G. Le Marchant, in his report to the colonial secretary, under date May 1848, says: "It is not easy to obtain exact details that can be relied on, but I have been assured, on authority that can be relied on, that on one of the farms in the vicinity of the town of St. John's, 2 bushels and 2 gallons of bere-barley were on the 19th May sown upon three-quarters of an acre of potato land, and from it were thrashed 42 bush. of excellent quality, being at the rate of 56 bush. per acre. Wheat has also been known on another farm, in this neighbourhood, to produce at the rate of 50 bush. per acre, and this is a heavy crop for any country. This large produce may be in a great degree attributed to the repeated applications of fish and other manures to the previous crops of potatoes." All ordinary garden vegetables are grown with as little trouble as in England. Among those most commonly cultivated are lettuce, endive, radish, asparagus, sea-kale, beets, turnips, cabbages, cauliflowers, pease, beans, both French and broad, all of which attain maturity with common care. Melons and cucumbers are grown every year in slight hot-beds, and the latter may be transplanted from the seed-bed to the open air, where they will generally produce abundantly. Turnips, cabbages, and all the *brassica* tribe, have in the early stages numerous enemies in the turnip-fly, caterpillars, &c.; but independently of this, the climate and soil are fitted to produce large crops of them. It may also be observed that many of the perennial and other herbaceous plants of Britain bear the severity of the N. winter well, among which may be mentioned the polyanthus, pansy, and sweetwilliam, also pinks and carnations generally. Among bulbous roots, all kinds of lily, even the white lily, tulip, hyacinths, &c., are rarely known to fail though kept in the ground all winter. Of fruit-trees, those of the more hardy kinds, and which produce their fruit at an early season, of course answer best. The climate is well-adapted to gooseberries and currants of every variety, and they produce abundant crops almost invariably; the insect tribe alone seems inimical to them. The trees are frequently divested of their foliage by caterpillars, except in low or moist situations, where these trees generally succeed best. Cherries of most kinds also bear the climate and produce well. With respect to apples, pears, and plums, the early varieties only may be considered as well-adapted. Plums of many kinds and damsons have been grown for many years in Conception bay as well as in St. John's: the earliest kinds ripen, and the late sorts answer for culinary purposes. Raspberries and strawberries succeed as well here as in any country; they are, in fact, indigenous, and are found wild in considerable quantities. The cultivated kinds rarely if ever fail to yield fruit, and the strawberries are remarkable for abundant produce and fine flavour.

Fisheries.] The wealth of N. consists in the produce of its waters, "like which," as Bacon said concerning it, "of all the minerals there is none so rich." Besides abundance of salmon in its rivers, the shores are frequented by shoals of capelans, herrings, mackerel, and above all by enormous multitudes of cod. The cod fisheries of N. are the richest in the world, and give employment to many thousands, and food to millions. The fishery is on the banks, at different distances from the island. The chief fishery is that on the Great bank, which lies between 41° and 49° N lat., and is in length 300 m., and in breadth 75 m., some assigning to it a length of more than 400 m., and a breadth of about 140 m. It has from 22 to 50 fath. water. Vert or Green bank is not much inferior to the Great bank in dimensions, being 240 m. long, and 120 m. wide; and Banquero is not much less. Besides these there are many other shoals abounding with fish. The fishery near the shore commences earlier and continues longer than that upon the banks, but is not nearly so productive. The shore-fishery begins about the 20th of April; the fishery upon the bank on the 10th of May. The former continues till the 10th of October, while the latter concludes about the end of September. Different baits are used at different periods of the season. The first is a piece of pork, or of bird's flesh. The cod when caught furnishes bait to continue the fishing; the shell-fish called clams, which are found in the belly of the cod, being excellent for that purpose. To the clam succeeds the lobster; and to the lobster, the herring and launce; which in June are succeeded by the capelan, a fish which then makes its appearance upon the coast. The capelan is in August displaced by the squid, which again makes way for the herring. The cod is not taken with a net but with hooks, and only during daylight. An expert fisher will take from 150 to upwards of 300 in a day. A single fisher has in one season caught 12,000 fish, but the average number is 7,000. "When the boats are stationed on the fishing-ground, the men sit or stand at equal distances from the gunwales, and each attends to his own lines. So abundant are the fish at times, that a couple of cod are hooked on each line before the lead reaches the bottom; and while the one line is running out, the fisherman has only to turn round and pull in the other, with a fish on each hook. In this way they fill the boat in a very short time. If the cod be very large, it is lifted into the boat as soon as it comes to the water's edge by a strong iron hook fixed on the end of a short pole, called a gaff. As soon as the boat is loaded, they proceed to the stage on the shore with the fish, when the operations of splitting and salting succeed. Fish should be brought to the shore within 48 hours at farthest after it is caught. A splitter who has acquired dexterity, will, in an hour, split 300 quintals of fish; but the common quantity is 200 quintals. When the fish has been dried, and laid in heaps, a heap 20 ft. in length by 10 ft. in breadth, is supposed to contain 300 quintals; and if it be permitted to lie two days, it decreases in bulk about one-twelfth. The fish caught at the beginning of the season are reckoned the best. The best method of curing is by drying them, and this way is most generally practised; but, in some cases, they are salted in bulk in the hold, and are thus carried to market. Some ships, instead of stopping to fish, proceed directly to the island, where they purchase a cargo from the inhabitants; but by far the greater number catch and cure a cargo for themselves. The former are called sack-ships, the latter fishing-ships. The fish are sold in every part of the world, but the principal markets are the West Indies, Spain, Portugal, and Italy. The shipping belonging to this colony, employed in the fishery, amounted, in 1812, to 495 vessels, admeasuring 61,543 tons, and navigated by 4,950 seamen; besides 2,000 fish-shallops, measuring about 20,000 tons, and manned by 6,000 men. At the close of the war the fisheries rose to a pitch of prosperity quite unprecedented, the exports in 1814 amounting to £2,831,538. By the census of 1845 the planters, fishermen, and shoremen amounted in number to 18,503 persons. Their boats, which are divided into 3 classes according to the burthen of fish they can carry, amounted to 10,089; the divisions being:—8,092 boats, carrying from 4 to 15 quintals of fish; 1,025 boats, from 15 to 30 quintals; and 972 boats, from 30 quintals upwards. The fish when cured is sold and delivered to the merchants, who on receiving it have it divided into four qualities, viz. merchantable, Madeira or seconds, West India or third quality, and lastly inferior, which is about half the price of merchantable; Madeira is 1s. a quintal under merchantable, and 1s. 6d. more than West India. The liver of the cod yields a large quantity of oil, which is extracted from it by natural heat, no other preparation being necessary than merely putting it into casks, and when it is fully decayed drawing off the oil. A quintal of good fish will yield more than a gallon of oil; but the produce of the season is not more than 80 gallons to 100 quintals of fish.—The Americans are at present making vigorous efforts to obtain a right of participation in the fisheries of N. and New Brunswick. The first article of the convention between the United States and Great Britain, of the 20th of October, 1818, is in these words: "'Whereas, differences have arisen respecting the liberty claimed by the United States for the inhabitants thereof to take, dry, and cure fish on certain coasts, bays, harbours, and creeks of His Britannic Majesty's dominions in America, it is agreed between the high contracting parties that the inhabitants of the said United States shall have for ever, in common with the subjects of His Britannic Majesty, the liberty to take fish of every kind on that part of the S coast of Newfoundland which extends

from Cape Ray to the Ramean islands,—on the W and N coasts of said Newfoundland from the said Cape Ray to the Quirpon islands,—on the shores of the Magdalen islands, and also on the coasts, bays, harbours, and creeks from Mount Joly,—on the S coast of Labrador, to and through the straits of Belle-Isle, and thence N indefinitely along the coast,—without prejudice, however, to any of the exclusive rights of the Hudson's Bay company; and that the American fishermen shall also have liberty for ever to dry and cure fish in any of the unsettled bays, harbours, and creeks of the S part of the coast of Newfoundland here above described, and off the coast of Labrador; but so soon as the same or any portion thereof shall be settled, it shall not be lawful for the said fishermen to dry or cure fish at such portion so settled, without previous agreement for such purpose with the inhabitants, proprietors, or possessors of the ground. And the United States hereby renounce for ever any liberty heretofore enjoyed or claimed by the inhabitants thereof to take, dry, or cure fish, on or within 3 marine miles of any of the coasts, bays, creeks, or harbours of His Britannic Majesty's dominions in America not included within the above-mentioned limits. Provided, however, that the American fishermen shall be admitted to enter such bays or harbours for the purpose of shelter and of repairing damages therein, of purchasing wood, and of obtaining water, and for no other purpose whatever. But they shall be under such restrictions as may be necessary to prevent their taking, drying, or curing fish therein, or in any other manner whatever abusing the privileges hereby reserved them." By a strict yet fair construction of this article, fishing-vessels of the United States are precluded from entering into the bays or harbours of the British provs., except for the purposes of shelter, repairing damages, and obtaining wood and water A bay, as is usually understood, is an arm or recess of the sea entering from the ocean between capes or headlands, and the term is applied equally to small and large tracts of water thus situated. It is common to speak of Hudson's-bay or the bay of Biscay, although they are very large tracts of water; and the British authorities rightly argue that England has a right to draw a line from headland to headland, and to capture all American fishermen who may follow their pursuits inside of that line. In 1841 the legislature of Nova Scotia proposed a case for the consideration of the advocate-general and attorney-general of England, upon the true construction of this article of the convention. The opinion delivered by these officers of the Crown was, that "by the terms of the convention American citizens were excluded from any right of fishing within three miles from the coast of British America, and that the prescribed distance of 3 m. is to be measured from the headlands or extreme points of land next the sea or the coast, or of the entrance of bays or indents of the coast, and that consequently no right exists on the part of American citizens to enter the bays of Nova Scotia, there to take fish, although the fishing, being within the bay, may be at a greater distance than 3 m. from the shore of the bay, as we are of opinion that the term 'headland' is used in the treaty to express the part of the land we have before mentioned, including the interior of the bays and the indents of the coast." It is this construction of the intent and meaning of the convention of 1818 for which the colonies have contended since 1841, and which they now desire shall be enforced.

Seal fishery.] The capture of the seal for the sake of its skin, and the oil that is produced from its fat, either by means of nets along its shores, or by vessels proceeding to the fields of ice that annually drift from the arctic regions, has been an object to the inhabitants of N. from its earliest settlement. The prosecution of the seal-fishery by vessels is quite of a modern date, it being only 59 years ago that the first vessel sailed on this expedition, and it has in this short period arrived at its present extent, and now gives employment to near 11,000 men, actually engaged in catching the seal, and employs 340 vessels = 29,800 tons. It also gives employment to almost every class of mechanics, as well as common labourers, in manufacturing the produce of the seals. The usual time of leaving for the ice is from the 1st to the 10th of March, if the vessels can get out. The crews are shipped on shares, each man being directly interested in the quantity of seals caught. They pay the owner a sum varying from 10s. to 35s. for being allowed to proceed in the vessel, which is called 'berth-money;' each man has to find a gun, or to pay the hire of one, and also has to find 25 sticks of firewood for fuel while on the voyage. The owner of the vessel receives one-half of the seals brought home in the vessel, for fitting her out, &c., with all necessary material; the other half is taken by the crew, and equally divided among them according to the number, the owner receiving the master's share, who is paid by the owner 4d to 6d. for each seal the vessel brings in, or 1s. to 1s. 3d. per cwt., according to the agreement that may be made between them previous to the commencement of the voyage. The vessels in Conception bay are insured in mutual societies, that is, a certain number of owners enter into an agreement with each other that they will pay all losses that may occur to each other's vessels during the season.

Commerce.] In 1812, the exports from this colony amounted to £705,594. In 1838, the average amount of exports and imports was about £1,500,000. The value of the imports in 1839 was £1,433,474, and that of the exports was £701,839. The ships which entered inwards in the latter year were 2,594 = 342,501 tons, with 16,214 men; the ships entered outwards, 2,605 = 381,577 tons, with 17,313 men. Of the vessels entered inwards, 542 were from Great Britain, 1,636 from British colonies, 380 from the United States, and 36 from foreign states; of the vessels entered outwards there were 772 for Great Britain, 1,549 for British colonies, 283 for the United states, and 1 for foreign states. In comparing the trade of 1842 with 1831, it appears that the total value of imports showed a decrease of £696,937: the amount for 1831 being £1,201,736; and for 1842, only £504,799. The total value of exports in 1841 was £591,088; in 1842, £383,627. The commercial statistics of the year ending 5th January 1850, exhibited the following results: The number of vessels entered inwards was 1,149 = 132,321 tons; outwards, 1,077 = 127,074 tons. The number of vessels owned in the island was 970 = 59,501 tons. New vessels built in 1849, 30, measuring 1,055 tons. The quantity of wine imported was 37,137 gals. The value of imports from Great Britain was £278,732; from British W. Indies, £6,003; from British N. America, £94,835; from the United States, £233,852; from other foreign countries £144,522, and from other British places £12,239. The total value of goods imported was £770,190. The value of exports was as follows: To Great Britain, £281,964; to the British W. Indies, £58,782; to British N. America, £49,139; to the United States, £20,859; to foreign states, £456,032; to other British places, £9,791. The total value of goods exported during the year 1849 was £876,567. It will be seen from this that the exports exceeded the amount of imports by upwards of £100,000. The quantity of dry cod fish exported from the island in 1849 was 1,175,167 quintals; of seal-oil, 4,190 tuns of 240 gals.; of cod oil, 4,800 tuns; of herrings, 11,471 barrels; of salmon, 5,911 barrels; and of seal-skins, 306,072 pieces. The imports of 1850 amounted in value to £867,316; the exports to £975,770, of which £928,427 was the produce of the fisheries alone, the remainder consisting almost entirely of articles imported for subsequent exportation. The quantity of oils and fish exported in 1850 was as follows:

Seal oil,	6,235 tons 19 gals.	£193,289
Blubber and dregs,	730 — 115 —	5,837
Unrefined cod oil,	3,107 — 251 —	93,241
Refined do.,	228 — 169 —	17,561
Seal-skins,	442,392 in number.	66,359
Dry cod,	1,089,182 cwt.	532,969
Caplin,	529 boxes.	132
Herrings,	19,556 barrels.	2,779
Salmon,	1,933 tierces 1,700 bar.	9,200
Fish sands,	240 kegs.	60
		£928,427

The shipping which entered inwards in 1850 was 196 = 28,846 tons from Great Britain; 551 = 50,558 tons from the British colonies; 130 = 15,622 tons from the United States; and 343 = 43,602 tons from foreign states: in all, 1,220 ships = 138,628 tons, and navigated by 8,279 seamen.—The greater part of the trade of the colony being effected in barter, it is impossible to estimate accurately the amount of coin in circulation; but it has been conjectured to be from £80,000 to £100,000. British money and Spanish dollars are the coins in circulation, the latter established by the governor's proclamation at 4s. 4d. sterling, but passing current at 5s. The course of exchange varies according to circumstances and to the demand for bills to remit to England in payment of goods and merchandise imported into the colony, and generally highest in the autumn; and this demand is governed in a great measure by the result of the cod and spring seal-fisheries. If successful, remittances are made chiefly in oil; if otherwise, bills of exchange are remitted. The par of exchange

is 15⅔ per cent. currency premium. The exchange occasionally rises to from 2 to 6 or 7 above par, but rarely falls below it. Weights and measures are according to the standard of England.

Population.] The pop. of N. rapidly increased during the war. The number of permanent inhabitants in 1816, according to official statement, was 70,000, principally Irish. In 1837, the pop. amounted to 75,094; of whom 37,376 were Roman Catholics; 26,748 Episcopalians; 10,636 belonged to various classes of Dissenters; and about 40 families consisted of Micmac Indians. Besides the resident pop. several thousand persons winter here, for the purpose of building and repairing vessels, and erecting scaffolds for drying fish. The census of 1845 returned the pop. at 96,295, of whom 34,281 were Episcopalians, and 46,785 Roman Catholics.

Government and Judicature.] In 1825, the king granted this prov. a charter by which was established a supreme court, from which an appeal lies to the sovereign in council. In 1832, a representative constitution was granted, in which the elective suffrage is conferred by one year's occupation of any description of dwelling. The gross annual revenue from imperial and colonial duties, quit-rents, &c., was in 1849, £69,405; in 1850, £82,653.—The supreme court is composed of a chief-justice at a salary of £1,200, and 2 assistant-judges each at a salary of £700. This court, which has jurisdiction throughout the whole government of N. and its dependencies, and on the seas and banks to which vessels resort for carrying on the fishery, and has all criminal and civil jurisdiction, sits only at St. John's, the capital of the island, at such times as the governor by his proclamation may appoint. All civil actions in which the matter in dispute exceeds 40s. are tried by jury. The practice on the common law side is in general the same as that of the court of queen's bench, modified by rules adapted to the circumstances of the colony. An appeal lies from the supreme court to the queen in council, where the matter in dispute exceeds £500. The island is divided into three judicial districts,—the central, northern, and southern,—within which, respectively, there is a superior court of record, styled the circuit court, held by the chief or one of the assistant judges of the supreme court. This court has the same powers within the district, as the supreme court throughout the whole island, save in cases of treason, capital felonies, and prosecutions for breach of the revenue laws. An appeal lies from the circuit courts to the supreme court in matters exceeding £50 sterling.—Courts of general and quarter sessions are also held at St. John's and the principal outports, the sittings of which are regulated by the governor's proclamation. The English criminal law being in force in the colony, these courts and the magistrates have jurisdiction and powers similar to those of the quarter sessions and justices of the peace in England. These courts are presided over by stipendiary magistrates, of whom there are 3 at St. John's at salaries of £300, 2 at Harbour-Grace at salaries of £180 and £150; and one at each of the 13 other outports, at salaries varying from £100 to £150.—There are three sheriffs, one for each of the judicial districts, at salaries of £750 for the central, £300 for the northern, and £200 for the southern district. The sheriffs are appointed annually by the governor.—There are 11 clerks of the peace appointed by the governor.—At various places throughout the island, there are in all, 66 paid constables, at an annual salary varying from £12 to £45.

Towns.] As fishing constitutes the main object for which N. is visited or occupied, the number of persons to be found on it varies greatly at different seasons of the year; formerly none except a few poor families passed the winter here; even the governor himself, who was simply the commodore of the squadron appointed to protect the fishing-vessels, used to live on ship-board. For a long period, however, the number of wealthy residents has been progressively increasing; a considerable quantity of capital has been vested in permanent establishments; and the villages of N. are gradually emerging from the condition of bleakness and impurity in which they once stood. St. John's, Placentia, and Harbour-Grace, in Conception bay, have already the appearance of flourishing colonial towns. All three are in the SE portion of the island. St. John's is the seat of the governor, whose authority also extends over Anticosti, some smaller islands, and the adjoining coast of Labrador. Placentia was long a French settlement; both it and Harbour-Grace are greatly inferior to St. John's. The following table exhibits the statistics of pop. of the several districts into which the island is divided, as returned in 1845:

	Pop.	Rom. Cath.	Schools.	Chur.
St. John's,	25,196	18,986	52	21
Conception bay,	28,026	11,580	54	39
Trinity bay,	8,801	1,283	22	22
Bonavista bay,	7,227	1,809	17	14
Twillingate and Fogo,	6,744	1,128	10	12
Ferryland,	4,370	4,201	22	10
Placentia and St. Mary's,	6,473	5,455	11	13
Burin,	4,358	1,951	11	6
Fortune bay,	5,100	392	10	5
	96,295	46,785	209	142

Ecclesiastical affairs.] In 1839, this colony, with the Bermudas, was disjoined from the diocese of Nova Scotia, and erected into a separate see; but there are neither parishes nor rectors properly so called; the Protestant episcopal clergymen, 32 in number, are all missionaries under the Society for the propagation of the gospel. The Roman Catholics have 42 churches, and a cathedral at St. John's. Their establishment consists of a bishop and 24 clergymen.—Elementary schools are established in every district of the island, under separate and distinct boards of education, Roman Catholic and Protestant, in each district. According to the census of 1845, there were 209 such schools conducted by masters, with 9,042 pupils; and 358 conducted by mistresses, with 1,224 pupils. In addition to the government-schools, the Newfoundland School society and the Wesleyan Methodists have established schools. There is an academy at St. John's, and grammar-schools at Harbour-Grace and Carbonear.

History.] Cabot discovered N. in 1497. The land itself was of little value, but the fishery upon the neighbouring banks soon convinced the British that the possession of it was a matter of some consequence. The French, too, knew the value of the fishery as well as the British, and many disputes arose concerning N. At the peace of Utrecht, the possession of the island was confirmed to the English, but the French were allowed to dry their nets upon its N shores. In 1763, their privilege of fishing was extended to the gulf of St. Lawrence, provided they should never approach within less than 3 leagues of the shores of British America; at the same time they obtained possession of St. Pierre and Miquelon, two small islands to the north of N.; but were prohibited from erecting fortifications, or from keeping upon them more than 50 soldiers. These privileges were continued by the treaty of 1814.

NEWFOUNDLAND, a village of Morris co., in the state of New Jersey, U. S., 93 m. N of Trenton.

NEW FRANKLIN, a village of Scott co., in the state of Indiana, U. S., 81 m. S by E of Indianapolis.—Also a village of Paris township, Stark co., in the state of Ohio, 140 m. NE of Columbus, and on the line of Sandy and Beaver canal. Pop. in 1840, 150.

NEWGALL, a stream in Pembrokeshire, which takes its rise in a moor near Trethyog, in St. Edrin's parish, and passing by Tankardston and Eweston, into a SSW direction, falls into St. Bride's bay. It is chiefly remarkable as one of the grand boundaries between the Englishery and Welshery, for on one

side of it the barbarous English peculiar to the hundred of Roos is spoken, while on the other, in Dewislan, Welsh is spoken.

NEW GARDEN, a township of Chester co., in the state of Pennsylvania, U. S., 32 m. SW of Philadelphia, and 74 m. ESE of Harrisburg. The surface is level, and is drained by Red Clay and White Clay creeks. The soil consists of calcareous loam. Pop. in 1840, 1,411.—Also a village of Guilford co., in the state of North Carolina, 98 m. WNW of Raleigh.—Also a village of Hanover township, Columbiana co., 150 m. NE by E of Columbus.—Also a township of Wayne co., in the state of Indiana, 78 m. E of Indianapolis. Pop. 1,890.

NEW GENEVA, a village of Springfield township, Fayette co., in the state of Pennsylvania, U. S., 196 m. W by S of Harrisburg, on Monongahela river, at the junction of George creek. Pop. in 1840, 400.

NEW GERMANTOWN, a village of Toboyne township, Perry co., in the state of Pennsylvania, U. S., 46 m. W of Harrisburg. Pop. in 1840, 150.

NEW GLASGOW, a village of Amherst co., in the state of Virginia, U. S., 119 m. W of Richmond, containing in 1840 about 25 dwellings.

NEW GLOUCESTER, a township of Cumberland co., in the state of Maine, U. S., 41 m. SW of Augusta, watered by Royal's river. It is very fertile, especially on the streams. Pop. in 1840, 1,946.

NEW GRANADA, the most important of the three republics into which the South American republic of Colombia resolved itself at the breaking up of that federation. See article COLOMBIA. It comprises the greater part of the old vice-royalty of New G., as it existed previous to 1810. The present republic is bounded on the N by the Caribbean sea; on the E by the republic of Venezuela; on the SE by Brazilian Guayana; on the S by the republic of Ecuador or Equator; and on the W by the Pacific ocean. On the NW it unites, by the isthmus of Panama, with Central America. It lies between the parallel of 12° 30′ N, and the equator; and between the meridians of 69° 20′, and 82° 30′. Its area has been estimated at 17,955 German, or 381,328 English sq. m.; and its pop. in 1850 at 2,138,000.

Physical features.] Alpine regions and extensive plains divide between them the greater portion of this country. The western and larger portion of the region included within the boundaries now traced is traversed by several chains of the Andes, rising from elevated table-lands; the eastern portion belongs to the great *llanos* or plains of the Orinoco. Near the S frontier, at the sources of the Magdalena and Cauca, on the frontiers of Ecuador, the great chain of the Andes diverges into three distinct ridges. Of these, the eastern or Venezuelan ridge, which extends to the extremity of the Parian promontory in W long. 62°, divides the valley of the Rio-Magdalena from the immense plains watered by the Guaviari, Meta, and Apure, the three great western tributaries of the Orinoco. The highest summits of this chain, which nowhere rises to the region of perpetual snow, are those of Summa-Paz and Chingaza. The central chain, which terminates near Mompox, divides the valley of the Rio-Magdalena on the E from that of the Cauca on the W; and is the highest of the three, often attaining the limits of perpetual snow, and greatly surpassing it in the colossal summits of Gouanacas, Barragan, and Quindiu. The western chain separates the valley of Cauca from the prov. of Choco and the coasts of the Pacific, and about the parallel of 6° N lat. bends to the NNW. Its highest elevation is scarcely 5,000 ft.; and it sinks so low in its progress northward, that its course can scarcely be traced into the dep. of Panama, where it forms mountainous land only 1,200 ft. in height. The mean elevation of the Andes in New G. is about 11,000 ft. Their alt. is greatest towards the equator. See article ANDES. The valleys between these chains form the great plateau of New G., upon which the population is chiefly concentred. The llanos or plains commence at the foot of the Eastern Andes and extend thence into the Venezuelan territories. They bear all the characteristics of their tropical position, but are as yet scarcely redeemed from their primitive solitude and wilderness state.

Rivers.] The principal river is the Magdalena, which intersects the country from N to S in a course of nearly 900 m.; and is joined by the Rio-Cauca on the l. bank a little below Mompox. The Magdalena is called the Rio Grande, or 'Great river,' by the Spaniards. It rises in the prov. of Popayan, in a small lake called Papas, in N lat. 1° 50′, and W long. 75° 30′, in the angle formed by the eastern and the central chain of the Andes. At the distance of 210 m. from its source, it receives the river of Bogota, 35 m. SW of the capital; 200 m. farther down, it receives the Sogamozo formed by the junction of two large streams from the eastern ramification of the Andes, which separates all the streams which run W into the Magdalena from those which flow E to the Orinoco; 150 m. farther onwards it receives on the opposite or l. bank the large stream of the Cauca; and 150 m. below, it enters the Caribbean sea, or Atlantic, by several deltoid branches. At its mouth it is 2 leagues broad; and the current is so rapid that large vessels cannot go up the stream, but are obliged to discharge their goods into canoes, which are towed along the banks, and occupy two months in their passage to where it ceases to be navigable, though they are only three weeks in coming down. Like other tropical rivers, the M. is subject to great inundations. See article MAGDALENA.—The Cauca rises on the W side of the central ridge of the Andes, which divides it from the valley of the Magdalena, in N lat. 2° 34′, at the pass of Guanacas, within 100 fath. of a source of the Magdalana. Up to the parallel of 8° N, its course is nearly parallel with that of the Magdalena, into which it falls after a course of more than 600 m. See article CAUCA.—The lakes of New G. are of considerable extent. The most celebrated is that of Guatavita near Bogota. Some extensive salt-marshes occur on the NW coast. The head-branches of the Amazon water the SE part of the country.

Climate.] The climate resembles that of Mexico; hot and unhealthy on the low coast, but gradually cooling as we ascend to the table-land. At Cartagena, on the N coast, the rainy season lasts from May to November; from April to December, the heats are terrible and destructive. At Santa Marta, on the same coast, the climate is more cool and healthy. At Popayan, in the extreme S and interior, the driest months are June, July, and August. At Bogota, the climate is cold considering its latitude, but still it may be deemed a perpetual spring. In the Llanos the mean temp. is 80°. See article ECUADOR.

Productions.] The forests of New G. are rich in dye-woods and cabinet-woods. Cinchona or Peruvian bark is collected near the sources of the Magdalena and the Cauca. The famed balsam of Tolu is so called from a village in the neighbourhood of Cartagena. The best cochineal is from the banks of the Sogamozo. The great variety of soil and climate renders the culture of both tropical as well as northern staples practicable. Coffee, cotton, cocoa, indigo, sugar, and tobacco, flourish in the savannas E of the Andes, and are considered as articles of export; the grain and nutritious roots, known in the W. Indies as ground-provisions, are produced only in sufficient quantities for home-consumption. Maize is grown every where, and when ripe is pounded in wooden mortars into a coarse meal, there being no more perfect machinery for grinding it. Wheat is grown on the higher lands, and on the elevated mountain-plains, where it suc-

ceeds as well as in the W parts of the United States, and often yields 40 bush. to the acre, and two crops may be produced in the year. A substitute for bread is found in cassava, which is procured by a process similar to that for making starch, from the yuca root. The plaintain is, to the mass of the natives, what the potato has become to the poor of Ireland; but the rice of the lowlands of New G. is indifferent. Coffee is chiefly cultivated in the province of Santa-Marta, but its culture is conducted with less care than in the W.-India islands. Cotton is chiefly grown in Cartagena, on the newly-cleared lands, between successive crops of maize, but the produce is said to be inferior to that from the uplands of North America, which is, in a great measure, owing to the defective mode generally followed of cleaning and depriving it of the seed. The growth of this article for export is very insignificant. The works erected in different parts of the country for the manufacture of sugar, were mostly destroyed during the revolutionary struggle, and very few of them have been repaired. No sugar is now exported, and the half-inspissated juice of the cane is only used for confectionary, or is eaten by the natives with their chocolate.—Previous to the discovery of the country, horses and cattle were unknown in these regions; but since their introduction, they have increased to such an extent as to form one of the great articles of export. Sheep and goats are numerous on the rich plains of Bogôta, and animal food is cheap, and much consumed; and hides, wool and cheese, form a principal portion of rural produce. Still, amidst all this exuberance of nature, agriculture is so imperfectly understood, and so languidly pursued, that not the thousandth part of the produce which this country might readily yield is raised. A traveller is astonished at finding the plantations of a region perhaps the most lovely and luxuriant in the world so trifling and unproductive. A planter is here thought rich, whose annual income is from £900 to £1,000. So little attention is paid to agriculture in the prov. of Choco, to the W of the Cauca, between Antioquia and Darien, that it still remains nearly in the same uncultivated state as when first discovered. —a thick impervious forest, without pasturage and roads. A variety of causes co-operate to produce this state of things, throughout the Colombian republics, such as the high interest of money, and the number of mortgages with which every plantation is more or less burdened. The pious legacies and prebends with which many estates were encumbered was also another serious obstacle to agriculture. These, accumulating from generation to generation, could not be bought up by payment of the capital, and the planter was thus kept under perpetual obligation to pay the interest. An ordonnance was enacted in 1802, against such pious donations; and recent reforms aim at the extinction throughout the republic of the heavy impost of clerical fees. Another obstacle to colonial prosperity under the old regime, and perhaps as much so under the new system of things, was the passion for public employments. The prospect of unbounded wealth from a large and rich plantation could never induce a Spaniard to relinquish his desire of military rank, of a judicial office, or of the cross of an order.

Minerals.] The viceroyalty of New G. has always been celebrated for the abundance of its gold; in Antioquia and other districts, no other money is known. This metal is generally obtained from the *lavaderos*, or washing-places established in alluvious grounds. These lavaderos are situated to the W of the central Cordillera, in the provinces of Antioquia and Choco, in the valley of the Cauca, and on the coast of the Pacific, in the partido of Barbacoas. The prov. of Antioquia contains mines of gold in micaceous slate, at Buritoca, San-Pedro, and near Aimas; but they are not wrought for want of hands. Gold is collected in great abundance on the alluvious grounds of Santa-Rosa, in the Valle-d'Orsas, and the Valle-des-Trinidad. At Choco, the richest river in gold is the Rio-Andageda; which, with the rivers of Quito and Zitura, forms near Quibdo, the Rio-Atrato or River of Darien. All the ground between the Andageda, the Rio-de-San-Juan, the Rio-de-Jamana, and the Rio-de-San-Augustin, is auriferous. The number of slaves employed in gathering gold-dust in the district of Choco, amounted in 1778 to 3,054; and in the valley of the Cauca, to 8,000. The prov. of Choco might alone, it has been estimated, produce 20,000 marks of gold annually, from washing, if in peopling this region—the most fertile in New G.—the government would turn its attention to agriculture. In 1801, when Humboldt was at Bogota, the total produce of the gold-mines of the viceroyalty was estimated at 2,500,000 dollars, or £562,500; namely, 2,100,000 d., or £472,500, for the two mints of Santa Fé and Popayan; and 400,000 d., or £90,000, as the exportation of the ingots and wrought gold. In addition to this, might be added the fraudulent exportation of the gold of Choco, which has much increased since the navigation of the Rio-Atrato was declared free. Gold dust, and even ingots, instead of being conveyed by Cali or Mompox, to the mints of Santa-Fé or Popayan, now take the direct road to Cartagena and Porto-Bello, whence they flow into the British colonies or are shipped direct for England. The mouths of the Atrato and Sinu serve as stations for smugglers. According to Humboldt's information from those who dealt in gold dust, at Cartagena, Mompox, Puga, and Popayan, the smuggled gold might be estimated at 2,500 merks, or £82,062 annually. The total produce of the gold of this viceroyalty, coined, exported in ingots and wrought plate, together with that of fraudulent exportation, was estimated at 20,800 marks fine gold, or £683,760.—Platina, the rarest and most infusible of all metals, and in value next to gold, is produced in Choco and Barbacoas, to the W of the freestone mountains which rise on the W banks of the Cauca. There are some mines of extremely rich silver in the Vega-de-Supia, 20 leagues distant from Cartago, to the N of Quebraloma, between the Cerro-de-Tacon and the Cerro-de-Marmaton. These mines were only discovered of late. There are also mines of cinnabar, or sulphurated mercury, in three different places,—namely, in the province of Antioquia, in the valley of Santa-Rosa, to the E of the Cauca, in the mountain of Quindiu formerly mentioned, and lastly, in the prov. of Quito, between Azoque and Cuenca.—New G. abounds in precious stones. Amethysts, *pantausas*—a kind of precious stone of various colours, with grains of gold in the interior—diamonds of a very small size, jacinths, beautiful garnets, turquoises, girasols, obsidian, and *mapulas*, another little-known precious stone, are found. There are mines of emeralds in the vicinity of Muzo, a town in the district of Tunza, inhabited by about 200 families, who are chiefly occupied in searching for emeralds. They occur in the mountain of Itoco, within 3 leagues of Muzo, and 50 m. N of Santa Fé. This mine has for many years almost exclusively supplied the world with this precious stone. It generally occurs in a gangart of pure white quartz, which enhances the extreme delicacy of the green colour; but there are examples of their being found in a fine grained schistus like touchstone. These stones are called emeralds of Peru, though it is doubtful if emeralds were ever found in that viceroyalty; and those of New G. were celebrated in 1740. Coal is a rare production in the Cordilleras. There are, however, beds of coal in the valley of Bogota, near Tauss-Canoas, and in the Cerro-de-Suba, places elevated 2,500 metres, or 8,201 ft. above the level of the sea. Copper-mines of a superior quality are wrought in the vicinity of Nirgua, which besides supplying the planters with materials for their boilers, cylinders of mills, and other implements, furnished in 1804, 171 quintals for exportation. Salt is found in great abundance along the whole coast, and is of a beautiful whiteness.

Manufactures.] The manufactures of the country are of the simplest kinds, consisting chiefly of leather, hammocks, baizes, hats, and salt. None of them are of importance. The principal salt-works are at Araya and Santa-Marta. The facilities for internal communication have been very much neglected; but steamboats have been established on the Magdalena and other rivers, which will much facilitate the development of the country bordering on that great river and open rich stores to commerce. The system of roads is altogether unavailable and bad; there is scarcely a passable road throughout the whole country. The backs of mules form the principal means of conveyance; and in places along the Andes, where even these cannot find a sure footing, men are employed to transport travellers in a rude kind of chair fastened to the back. Bridges are almost unknown. The method of crossing streams is by ropes stretched from one side to the other, with sling and basket, in which the passenger is seated, and pulled safely over the rivers or abyss, as the case may be. A considerable inland trade is carried on by the merchants of the coast. Foreign imports are sent by the steamboats on the Magdalena, or carried on the backs of

mules into the interior, and the metals, hides, and other produce are brought down and re-shipped to foreign countries in exchange.

Commerce.] The average annual value of the commerce of New G. is estimated at 40,000,000 francs. The imports in 1840 scarcely exceeded 17,000,000 fr.; in 1843 they rose to 23,000,000 fr.; and in 1844 again fell off to 22,000,000 fr. In 1843, the exports amounted to 16,000.000 fr., and in 1844 to 14,000,000 fr. The contraband trade is very large. Commercial transactions carried on with the following nations approximate to the proportions annexed:

Jamaica and England,	about 13,000,000 fr.
France,	3,769,000
United States,	1,000,000
Island of Curacoa,	820,000
Spain,	610,000
Venezuela and Peru,	each 750,000 = 1,500,000

The ports of Santa-Marta, Cartagena, Chagres, Panama, and Porto-Bello, are most frequented by foreign vessels. The port of Cartagena, on the N coast, is one of the finest harbours of the world. The coasting-trade is chiefly conducted from the port of Panama. A line of steam-ships, owned by the British, carry the mails from Chagres to Valparaiso; and the W. India steamers, plying between England and the United States, leave the mails at the isthmus, to be carried across to that point, and receive the return mail. The customs' duties levied on the £880,000 of merchandise entered in 1844, amounted to £230,800. The values imported in 1844 were thus divided for principal heads:

Jamaica and Liverpool, for	£520.000
France,	150,800
The United States,	40,000

The remainder of the imports was derived in nearly equal proportions from the Isle of Curaçoa, Spain, Venezuela, and Peru. The imports from England and Jamaica were therefore about 3-5ths of the whole. About one-fourth of the whole foreign commerce of the country centres in the port of Cartagena; of the exports alone, more than one-third. Of a total of 12,950 tons of shipping, entries and sailings together, exclusive of coasting-craft, in 1844, the British flag in that port covered 5,404 tonnage. The exports of British and Irish produce to New G. in 1846 amounted in value to £219,593; in 1847 to £145,606; in 1848 to £247,916; in 1849 to £331,112; and in 1850 to £330,810. The chief imports into this country in 1850 from New G. consisted of 198 cwts. of Peruvian bark; 2,886 cwts. of cochineal; 4,692,016 lbs. of coffee; 3,395 cwts. of codillas and hemp; 12,201 lbs. of sarsaparilla; and 97,035 lbs. of cotton. At Riohacha a project has been started for a railway to run from that city to the valley of Dupar in the province of Santa Marta. It appears that the government are making exertions to facilitate land-intercourse, and introduce the steam-boat upon the Magdalena, and generally into the waters of the republic; but their efforts have as yet met with little success. A few years ago a company was chartered in New G. for purposes of general improvement, with a capital of 200,000 d., and with a special design to navigate the Magdalena river, plying between Santa Marta on the Caribbean sea, and Hondo the head of the river-navigation, a distance of about 600 m. The river being very shallow at certain seasons, having at some points only about 3 ft. water in the channel, the boats were constructed with flat bottoms, and so as to draw, with their engines, the necessary fuel, and 60 tons of freight, only 2 ft. 9 in. They were 150 ft. on deck, 6 ft. hold, 25 ft. beam, and 40 ft. over all. Each vessel has two high-pressure engines of 50 horse-power, and their estimated speed is 12 m. an hour. The Magdalena, although one of the finest rivers in the world, and accessible for more than 500 m. from its mouth, has till now been of comparatively little benefit, owing to the strength of its descending current.—An important treaty was concluded between the United States and the republic of New G. on the 12th of December 1846, and ratifications thereof exchanged on the 10th of June 1848. The conquest or reduction of Mexico was decided upon about the date of this arrangement with New G. By the first subsidiary declaration, under the 35th article of this Bogota treaty, the territory of the isthmus, from the S extremity to the frontier of Costa-Rica, and the transit from one sea to the other, are thrown open to the enterprise of the United States. New G. guarantees to the States a perfect equality with its own citizens in the enjoyment of every right of transit across the isthmus, by all existing and by all future routes or modes of communication; and in return for these and for other very complete privileges and advantages of a commercial character, the United States have guaranteed to New G. the perfect neutrality of the isthmus itself, in order that the free transit from sea to sea should not be interrupted, while this 20 years' treaty lasts, and also the right of sovereignty and property over the territory.—A more recent scheme for uniting the two oceans lies also within the frontiers of this republic, that namely for a navigable canal between the Savannah river and Caledonia bay. See article MIGUEL (GULF OF SAN).—The opening of roads, the improvement of the dists. where tobacco is cultivated, and the extension of trade with the coast, are still attracting the notice of the executive; and the various decrees issued on these matters evince a spirit of concession to those whose immediate interests are concerned.

Government.] The form of government of New G. is based upon the plan of that of the United States. The legislative function is vested in a senate and house-of-representatives, both consisting of members elected by the cantonal deputies of the provinces, in a provincial assembly held once in four years. The executive is vested in a president and vice-president, the former of whom is elected for a period of four years. The constitution is, with slight variations, the same as was adopted by the confederation at Cucuta on the 18th July 1821. The departments have each an intendente, with full powers under the general government, saving military command. The provinces are under the administration of governors, with similar powers and restrictions, and the cantons and parishes have each their own officers.—The laws, as in all the old Spanish colonies, are an ill-digested mass of the laws of Spain and the Indies; but even such as they are, they would be tolerable if they were not so badly administered. Trial by jury, however, is allowed to all.—The Roman Catholic is the religion of the nation, and the church-festivals and celebrations are conducted with extraordinary magnificence. The clergy are paid by the state; but since the revolution they have lost much of that influence they formerly possessed over the minds of the people.—Education is more flourishing in New G. than in the other Colombian states, and as a consequence the people are more intelligent and refined. The government is making great efforts to instruct the pop. Lancasterian schools are now established in all the chief cities and towns; and elementary schools are by law supported in every district of the country.

Revenue.] The public revenue is raised from import and export duties, taxes, salt-mines, the post-office, profit on tobacco, and the sale of public lands. According to an official statement issued in relation to the estimates for 1850-51, the finances of New G. do not appear to be flourishing: a deficit is shown of nearly 5,000,000 reals: the resources of the government being put down at 21,894,000 r., and the outlay at 26,329,000 r. It would seem that the chief expenditure rests upon the following items: National debt, 4,397,398 r.; war-department, 5,043,205 r.; treasury and finance, 6,651,930 r.; and government department,

2,130,804 r. The whole of the debt of the republic, including internal and external, was represented at 208,619,397 r., and is chiefly due in England. It is not mentioned what are the kind of expedients that will be resorted to in order to cover the deficiency, or whether the government had in contemplation any plan for effecting necessary retrenchment. Nor is the condition of financial matters more hopefully set forth in the message of General Lopez to the New G. congress on 1st March 1853. According to that document, the public debt now amounts to the enormous sum of 377,000,000 reals, or 47,125,000 dollars, whilst 28,000,000 r. are required for the expenses of the incoming year, and 10,000,000 r. to complete that of the current year, which with 8,000,000 r. to pay the negociated debts and the expenses of the army makes a total deficit of 18,000,000 r. or 2,250,000 d., whilst the credit for the incoming year only amounts to 20,000,000 r. or 2,500,000 d. The president goes on to say that the only possible way he can propose for remedying this great evil is to give 2,000,000 fanegadas of the state lands (*tierras baldias*) to the creditors, which he conceives can be done without any loss to the country, as, from the survey under Colonel Cadazzi, now in progress, it is proved that in the 11 provs. already surveyed (out of the 35 that constitute the republic) there are 8,474,575 fanegadas of unreclaimed lands; and by converting the scrip now held for the foreign debt into notes representing the waste lands, the holders would either be obliged to colonise or cultivate the lands by native labour, to prevent a total loss to themselves. Thus, he adds, "whatever would be the course taken relative to the cultivation of the lands, it would produce an augmentation of the nation's riches, if it did not produce a large emigration, and with it incalculable advantages." The agent of the creditors in Bogota is said by the president to be favourable to this plan.

Population.] An official statement in 1836 estimated the pop. of New G. at 1,687,000, or about 4·4 to the sq. m.; and divided it according to races thus, —Whites and Creoles, 1,053,000; Indians, 376,000; Free-coloured, 168,000; Slaves, 85,000. The estimated pop. in 1850 was officially reckoned at 2,138,000. —The Whites, Negroes, and mixed races, are similar in origin and manners to the same classes throughout Spanish America. Many of the Indian tribes still enjoy their independence, and almost all of them retain their language and particular customs. The Guairas or Guagniros, occupy part of the provs. of Rio-de-la-Hacha and Santa-Marta, and live on friendly terms with the Motilones, who inhabit the lands watered by the Muchuchies and the St. Faustin as far as the valley of Cucuta. They infest the passes of the mountains; pillage, conflagration, and murder mark their incursions into the plains. The Chilimes, and another band of the Guairas, are free-booters on the banks of the Magdalena. The Urabas, the Zitaras, and the Oromisas, form three independent states in the prov. of Darien; the first under a native prince called the Plawon, the two last under a republican government. The Curacunas dwell on the mountains of Choco and Novita; they extend their ravages as far as Panama, and even attack small vessels in search of plunder. The ancient inhabitants of Quito are said to have spoken many different dialects. The missionaries have specified not less than 117; it appears, however, that the language of the Quitos prevailed over the plateau, and that of the Scires along the coast. In the year 1600, the Cofanes, one of the 117 tribes of Quito, are said to have amounted to 15,000 souls; they spoke a peculiar language, which was also spoken by the inhabitants of Anga-Marca, and in which a Jesuit has written an epitome of Christianity. Of the 52 tribes of Popayan, those of Guasinca, Cocanuca, and Paos, had three distinct languages, which are still partly preserved in the writings of the missionaries. The Xibaros, the Macas, and the Quixos, at one time formidable tribes, occupied the eastern declivities of the Andes, in the kingdom of Quito. Nearer the level of the sea, in the vast district of Maynas, are found the remains of unnumbered tribes, whose languages the missionaries have classed in the following order:—1st, Sixteen mother tongues, of which the Andoa has 9 dialects, the Campa 7, and the Mayna 4; 2dly, Sixteen scattered dialects that have no resemblance to any known mother tongue; 3dly, Twenty-two tribes, several of which are still extant, although their language is extinct; lastly, ten unknown languages. We have not included in this list the extensive tribe of the Omaguas, spread over the whole course of the Maranon or Amazon, and speaking a dialect of the Guarani language of Brazil, but simpler in its grammatical forms, and more abundant in its vocabulary, from which we may infer that they had arrived at a greater degree of civilization than their kindred tribes. The migrations of this tribe of river-navigators have not been clearly ascertained, but it is generally believed that they were originally from Brazil. The language of Bogota has been almost extinct since the end of the last cent. It was extended by the victories of the Zaque Huncahua, by the warlike exploits of the Zippas, and by the influence of the lamas of Iraca, from the plains of the Ariari and the Rio-Meta to the N of the Sogamozo. This language was called by the natives the Chibcha.

Cities and towns.] The republic is divided into the 5 departments of Ystmo, Cundinamarca, Cauca, Magdalena, and Boyaca.—The city of Bogota is the capital of the republic. It is situated at the foot of two mountains which shelter it from the violent E winds, on a table-land 8,650 ft. above the level of the sea, in N lat. 4° 37′, and W long. 74° 10′. It was founded in 1538 by Quesada, and now contains 40,000 inhabitants. See Bogota.—Hondo, on the Magdalena, the port of Bogota, is situated about 55 m. SW of that city. It has a considerable trade in cotton goods, hides, and grain, and contains a pop. of about 10,000.—Popayan, the next city to Bogota in size, is more elegantly built, being the residence of many opulent merchants. It is situated on the river Cauca, and has a considerable trade through the port of Cartagena. Pop. 25,000.—Cartagena is the principal port of the republic, and carries on quite an extensive trade with the United States and Europe. It is built on a sandy island of the N coast, to the W of the Rio-Magdalena, and possesses one of the finest harbours in America. It is well-fortified, and has a pop. of 18,000. Though much decayed, it is still a fine city, and the centre of trade. Panama is built on a peninsula of the S coast of the isthmus, to which it gives its name. It was formerly much frequented by Spanish merchantmen; and its importance has lately been revived by the project for making it the western depot of interoceanic communication. See articles Chagres and Panama. Its pop. fluctuates, but it is generally about 10,000.—Porto-Bello, or Puerto-Bello, is a small town or village, on a fine natural harbour, but in so unhealthy a situation that it has acquired the title of the 'grave of Europeans.' It stands on the N side of the isthmus, opposite Panama.—Santa-Marta, a fortified town, on the coast to the E of Magdalena, possesses a considerable trade, both internal and external. Pop. 6,000. Rio-Hacha, farther E, is a small town, with only 1,000 inhabitants: but is noted for the pearl-fisheries in its vicinity. There are few other towns of consequence, except the capitals of the several provinces, and a few inconsiderable ports on the Pacific.

History.] The coasts of New G., which border on the Caribbean sea, were first visited by Columbus during his fourth voyage. Sailing from Spain to the W. Indies, he arrived with his fleet at St. Domingo, where, having been refused permission to land, he was obliged to stand to the W; and after sailing in this direction for a few days, discovered a small island off the Cape of Honduras, where his brother landed and traded with the natives. Prosecuting their voyage, they touched at the cape itself, on which they landed to take possession for the crown of Spain. After performing this ceremony, the fleet proceeded along the shore, and was compelled by the easterly winds to double a cape, to which the pilots gave the name of Cape Gracias-á-Dios. Columbus touched in the course of the voyage at Veragua, Nombre-de-Dios, Belos, Porto-Bello, and other places. At Veragua he sent his brother up into the country to search for gold; and Bartholo-

mew returning with a considerable quantity, the admiral wished to have planted a colony here, but after several fruitless attempts, abandoned the design. Ojeda and Amerigo Vespucci, and many other adventurous persons, followed Columbus in exploring parts of the coast of New G.; and Vespucci gave the first regular description of the people who inhabited its shores. In 1508, Ojeda and Nicuessa obtained from the Spanish crown extensive grants in this district and the adjoining country. Ojeda had the country from Cape-de-la-Vela to the gulf of Darien included in his charter, which tract was to be styled New Andalusia; and Nicuessa was appointed to govern from the gulf of Darien to Cape Gracias-á-Dios; the territory included within these points to be named Golden Castile. Soon after the arrival of Ojeda at Cartagena, he imprudently attacked the natives, and lost the greater part of his men, but was fortunately relieved by the arrival of Nicuessa; he then went to the gulf of Darien, and established a colony on the E promontory, which he named St. Sebastian. The new colony was reduced to such distress in a short time, that it was determined to proceed to Cartagena: but while on their passage, they met with two vessels bringing supplies; and returning to St. Sebastian, found their town destroyed by the natives. The whole colony then sailed to the river of Darien, where they attacked and conquered an Indian tribe, and founded a town, which they named Santa-Maria-del-Darien. In the meantime Nicuessa endeavoured to establish a colony at Nombre-de-Dios; but a deputation being sent to request him to assume the government, Ojeda having died, he repaired thither. On his arrival he found that great dissensions had arisen among the colonists, who, instead of appointing him to the government, put him in a decayed vessel, and sent him to sea, where he is supposed to have perished. The prov. of Terra-Firma, including both the grants of Nicuessa and Ojeda, was given by a subsequent charter, in 1514, to Pedro Arias-de-Avila, under whose government Vasco Nunez-de-Balboa, the discoverer of the South sea, was beheaded on account of a revolt. Under the orders of Avila, the W coast of Panama, Veragua, and Darien was explored as far N as Cape Blanco, and the town of Panama was founded. In 1536, Sebastian-de-Benalcarar, one of the officers who accompanied Pizarro in the expedition to Peru, effected the conquest and colonization of the southern internal provs. of New G.; whilst Gonzalo Ximenes-de-Quesada, who had been sent by Lugo, the admiral of the Canaries, overrun the N districts from Santa-Marta. They met with considerable opposition from the natives; but finally succeeded in reducing the country, and the whole was formed into a kingdom, and governed by a captain-general, appointed in 1547; to check whose power the royal audience was established, of which he was, however, made president. In 1718 New G. was formed into a viceroyalty. This form of government continued until 1724, when the captain-generalship was restored; but in 1740 the viceroyalty was re-established. Under this system—the evils of which were of a very grievous nature—the inhabitants of New G. continued until the invasion of Spain by the French. The desire of independence had long been prevalent, but it was not until 1806 that it began to be publicly avowed. The juntas then chosen were composed of persons generally favourable to independence. A congress from the different provs. or departments of the viceroyalty soon afterwards assembled, and in 1811 a formal declaration of independence was made. See article COLOMBIA. The cause of freedom and that of the royalists were alternately triumphant, and many frightful scenes of rapine and bloodshed occurred. In 1816 a decisive action was fought between the independents and a Spanish army under Morillo, which ended in the total defeat of the former, and the dispersion of the congress. After remaining under the dominion of the royalists for three years, New G. was again emancipated by the army of Bolivar, who entered Santa-Fe in August 1819. His successes after this period were uniform, rapid, and brilliant; and the Spaniards finally evacuated the country in 1823, having been confined to the isthmus of Panama from the period of Bolivar's entrance. The republic of Colombia, of which New G. was a member, was formed in 1819, but on the dissolution of that confederation in 1831, it became once more a separate state, and as such remains to the present time. Santander was elected first president, and took office on the 7th October 1832.

NEW GUILFORD, a village of Perry township, Coshocton co., in the state of Ohio, U. S., 67 m. NE of Columbus.

NEW GUINEA, next to New Holland, the largest island of Australasia, lying between the parallels of 0° 15′ and 10° S, and the meridians of 131° 20′ and 149° 20′ E. Its approximative area is 275,000 sq. m. It is separated from New Holland on the S by Endeavour and Torres' straits; from New Britain on the E by Dampier's straits; and from Gilolo by Pitt's straits. It was discovered by the Spaniards in 1528 and 1543, but is still almost unknown. Forrest merely anchored on the N coast; Cook landed on the S shore; Dampier, Cartaret, Bougainville, D'Entrecasteaux, only visited some of the neighbouring islands; Le Maire and Schouten, who sailed along the greatest part of the N coast, had several interviews with the natives of the surrounding islands, but did not land upon the main island; and even the recent voyages of the Fly and the Rattlesnake effected little towards increasing our acquaintance with this large island. No civilized colony has yet been planted upon it; and the interior is altogether *terra incognita*. It is of irregular outline. The coasts in some parts appear to be high and mountainous, and in many places are deeply indented with bays. Of about 140 m. of the S coast examined by the expedition under Capt. Blackwood, in the Fly, from S lat. 8° 45′, and E long. 143° 35′, to S lat. 7° 40′, and E long. 144° 40′, "and for an unknown distance beyond that point, the coast has everywhere the same features. It was low, flat, muddy, covered with jungle and impenetrable forests, and intersected in every direction by a multitude of fresh-water arms and channels, uniting one with another, and forming a complete net-work of fresh-water canals of all sizes and depths, from a mere muddy ditch to a width of 5 m., and a depth of 20 to 30 ft. This coast was fronted by immense mud-banks, stretching from 10 to 20 m. outside, having at low water a general depth of about 12 ft., and some sand-banks much shoaler or quite dry. These mud-flats gradually deepened towards their outer edge to 3 and 4 fath., and then more rapidly to 6, 10, 15, and 20 fath. Now, this is precisely the formation of the delta of a river, and the only difficulty in the present case is, is the supposed river large enough to produce such a delta on an island such as New G.? From what we know of the rest of the island, however, the existence of such a river becomes highly probable. A range of high mountainous land runs along all the N coast from Dampier's strait to Geelvink bay. High land also comes out upon the SW coast about Triton bay, where the Dutch once formed a settlement near the 137th meridian. The hollow between these ranges would run towards the SE, in which direction, of course, their drainage would be deflected. We have already seen reason to believe that the country is a wet one; and the moisture, which does not fall as rain from the SE trade-wind, as it passes over flat land, is no doubt caught and precipitated in abundance on the SE sides of the mountains, and is thus sent down on the flat in the shape of rivers. Whether these ever join into one stream, or whether a number of them all run for the SE coast, and thus unite only in forming the delta of which we traversed the outer belt, is of course left open to conjecture. If they ever unite in one stream, it will probably be found to be a very noble one for the size of the island, winding perhaps through rich flats of tropical forests. Whatever be the characters of the interior waters, however," continues Mr. Jukes, "they must afford access for small craft into the very heart of the country. Unlike the rivers of Australia, the estuaries of which are all salt, and the rivers mostly trickling shallow streams, running over rocks or sands, the rivers of New Guinea are so full, and abound so with fresh water, as to influence the sea for miles outside their mouths, and expel the salt water even from the flattest and most sluggish of their course. Any craft, then, that can get across the mud-bank on their mouths, need never fear the being able to find water for many miles above them. I know of no part of the world, the exploration of which is so flattering to the imagination, so likely to be fruitful in interesting results, whether to the naturalist, the ethnologist, or the geographer, and altogether so well calculated to gratify the enlightened curiosity of an adventurous explorer, as the interior of New G. The very mention of being taken into the interior of New G. sounds like being allowed to visit some of the en-

chanted regions of the Arabian Nights, so dim an atmosphere of obscurity rests at present on the wonders it probably conceals!" Some lofty mountains appear to rise above each other in successive ranges towards the central part of the island. One of these ranges, stretching in a SSE direction from the meridian of 147° to 150° 30′ E, presents at its NW extremity a summit of the estimated alt. of 10,046 ft., to which the name of Mount Yule has been given; and another, about 60 m. to the S of Mount Yule, which has an estimated alt. of 13,705 ft.—Swine, dogs, birds-of-paradise, parrots, sea-fowl, fish, trepang, ginger, cloves, nutmegs, cocoa, betel, sago, and bread-fruit, are enumerated among the productions of the island.

Population.] The inhabitants are a variety of the Papuan or Malaysian Negro race. They have projecting lips, a flat broad nose, a large mouth, large eyes, shining black hair, and a black rough skin. They are strongly built, and go nearly naked, having only a thin stuff made of the fibres of the cocoa-nut round their loins. Their habitations on the coast are built on piles, with a sort of bridge extending above high-water mark. A dwelling of this kind is generally occupied by several families. One of these large habitations is thus described by the author of the *Voyage of the Fly:* "The house, or whatever it might be called, was raised from the muddy ground about 6 ft., resting on a number of posts placed irregularly underneath it, most of which seemed to be stumps of trees cut off at that height and left standing. The floor raised upon these seemed to consist of poles fastened across a framework, on which were laid loose planks made apparently of the outer rind of the sago-palm, split open and flattened and dried. This floor was perfectly level and smooth, and felt firm and stable to the foot. It was about 30 ft. in width, and upwards of 300 ft. long. The roof was formed of an arched framework of bamboo, covered with an excellent thatch of the leaves of the sago-palm. It was 16 or 18 ft. high in the centre, from which it sloped down on either hand to the floor. The end walls were upright, made of bamboo poles, close together; and at each end were three doorways, having the form of a Gothic arch, the centre being the largest. The inside of the house looked just like a great tunnel. Down each side was a row of cabins; each of these was of a square form, projecting about 10 ft., having walls of bamboo reaching from the floor to the roof, and accessible at the side by a small door very neatly made of split bamboo. Inside these cabins we found low frames, covered with mats, apparently bed-places; and over head were shelves and pegs on which were bows and arrows, baskets, stone axes, drums, and other matters. In each cabin was a fire-place (a patch of clay), over which was a small frame of sticks, about 2 ft. high, 3 ft. long, and a foot wide, as if for hanging something to cook or dry over the fire. A stock of dry firewood was also observed in each cabin on a shelf overhead. One or two of these fire-places were also scattered about in different part of the sides of the house. Between each two cabins was a small doorway, about 3 ft. high, closed by a neatly made door or shutter of split bamboo, from which a little ladder gave access to the ground outside the house. At each end of the house was the stage or balcony mentioned before, being merely the open ends of the floor outside the end walls, on which the cross poles were bare or not covered with planks. The roof, however, projected over these stages, both at the sides, and much more overhead, protruding forward at the gable, something like the poke of a lady's bonnet but more pointed. Inside, all the centre of the house, for about a third of its width, was kept quite clear, forming a noble covered promenade. The only light proceeded from the doors at the end, and the little side-doors between the cabins. Near the centre, on one side, was a pole reaching from the floor to the roof, on which was a kind of framework covered with skulls, very curiously ornamented, with a wooden projection inserted for the nose, black protruding lumps of gum, like short horns, in the sockets of the eyes, at the end of which were broad red seeds. The mouth and lower jaw was smeared over with black gum, in which were stuck seeds both red and white. On the base of the skull was fastened a handle of twisted cane, by which it was suspended upon the frame, but what was the form or nature of this frame there was too little light, and much too little time to determine. We nowhere saw any sign or fragment of European articles of workmanship, nor iron of any sort or kind. There was little or no cultivation near the houses. Ripe cocoa-nuts were hanging on some rails, apparently to dry; and in one spot the earth had been dug and heaped up into a circular mound, with a trench round it, and on this some young plants had been set. There were only one or two plantain or banana trees, but a dense thicket of sago-palms grew all round in the forest." The Chinese, who trade with the NW parts of the island, appear to have introduced some of the rites of Fo among the natives in that quarter. The principal part of the trade is monopolized by the inhabitants of the neighbouring island of Ceram.

Climate.] "Everything we saw ashore," says Captain Jukes, "the large sheltered houses raised above the ground,—the dry firewood stored in them,—the sticks and bushes on the pathways, &c.,—denotes the climate to be a very wet one, and in all our excursions into New G. we found almost continual rain. It is probable that during the whole SE monsoon, or from the middle of March to the end of October, the weather is rainy, and that during the NW monsoon, which brings rain to the N coast of Australia, the S coast of New G. may have its dry season. Australia, on the contrary, has a remarkably dry climate; and though there are frequent showers during the SE monsoon on the margin of the NE coast and about Cape York, where the trade-wind first strikes upon the land, it is probable that in the interior no rain falls during the greater part of the year, and heavy showers only during the remainder. Not only, however, is this variation of climate not sufficient to account for the utter difference in the vegetation of the two countries, Australia and New G.; but I much question whether the difference in the climate be not in great part the result of that in the vegetation. The thick dank woods and jungles of New G. completely protect the soil from the sun, the broad close leaves shelter even the stems of the trees, and all tend to produce a coolness favourable to the precipitation of moisture from the damp trade-wind. The open and scattered woodlands of Australia, on the contrary, offer no shelter to the ground from the rays of the sun. The small, thinly-disseminated leaves of these evergreen trees, instead of giving shade, become themselves as hot and parched as the rocks and sands beneath them. The ragged strips of dry and resinous bark hanging from the trunks of all the trees, are like tinder, ever ready to catch fire with a spark, and the grass among the trees commonly resembles hay. Everything absorbs the heat freely, and radiates it into the surrounding atmosphere. Instead of being cooled then, and precipitating its superabundant moisture, the sea air on entering an Australian wood has its temperature raised, and becomes capable of licking up any drop of humidity it may find still lingering there. For this reason, a current of air is seldom perceptible in an Australian forest, which always feels hot, dry, and oppressive."

NEW HACKENSACK, a village of Fishkill township, Dutchess co., in the state of New York, U. S., 79 m. S of Albany.

NEW HAGERSTOWN, a village of Orange township, Carroll co., in the state of Ohio, U. S., 114 m. ENE of Columbus. Pop. in 1840, 250.

NEW HAMBURG, a village of Poughkeepsie township, Dutchess co., in the state of New York, U. S., on Hudson's river, near the confluence of Wappinger's creek.

NEW HAMPTON, a township of Belknap co., in state of New Hampshire, U. S., 29 m. NW of Concord, bounded on the W by Pemigewasset river. It is hilly, but very fertile. Pop. in 1840, 1,809.—Also a village of Lebanon township, Hunterdon co., in the state of New Jersey, 47 m. N of Trenton, on

the S side of Musconetcong creek. It contained in 1840, about 25 dwellings.

NEW HANOVER. See HANOVER (NEW).

NEW HANOVER, a county in the SE part of the state of North Carolina, U. S., and bounded on the SE by the Atlantic. It comprises an area of 995 sq. m., and is drained by the NE branch of Cape Fear river and its tributaries. In its E part is a large swamp, and along the shore are numerous long, low, and narrow islands. Pop. in 1840, 13,312; in 1850, 17,764. Its cap. is Wilmington.—Also a township of Montgomery co., in the state of Pennsylvania, 74 m. E of Harrisburg. It has a hilly surface, and is drained by Swamp creek. The soil consists of loam and red shale. Pop. in 1840, 1,419.

NEW HARMONY. See HARMONY (NEW).

NEW HARTFORD. See HARTFORD (NEW).

NEW HARTFORD CENTRE, a village of New Hartford township, Lichfield co., in the state of Connecticut, U. S., 18 m. W by N of Hartford.

NEWHAVEN, or MEECHING, a parish and seaport in Sussex, 36 m. E by S of Chichester, and 55 m. S by E of London, at the mouth of the Ouse, which is here crossed by a handsome drawbridge, and on a branch line of the Lewes and Brighton railway. Area of p. 710 acres. Pop. in 1801, 584; in 1831, 904; in 1841, 955. It possesses a harbour of considerable value, formed in the channel of the river Ouse, at its entrance into the sea, by wooden piers carried out in a S direction across the beach. The Ouse is navigable as far as the town of Lewes, and open to the flow and ebb of the tide for 4 m. further up the stream, or 12 m. altogether, and affords a powerful backwater for scouring the entrance. The average rise of spring-tides at the harbour's mouth is from 19 to 20 ft., and of neap-tides about 14 to 15 ft. The bar is left dry at low-water spring-tides, but within the piers there is about 2 ft. water at such times, and this depth continues uniform for 1 m. up the channel. The distance between the pier-heads is only 106 ft. The bay is defended by a small fort. There is a custom-house, with a collector, comptroller, and harbour-master. The town is small but neat. A considerable trade is carried on in the importation of coal and foreign timber. Bonding warehouses for all kinds of timber have been constructed on the quay on an improved principle; the coasting trade in butter, flour, and corn, is also large.

NEWHAVEN, a fishing-village on the frith of Forth, 1 m. W of N. Leith. A substantial low-water stone-pier here encloses a commodious harbour for wherries and fishing-boats. About 500 yds. W of the stone-pier, a chain-pier was constructed in 1821, at an expense of £4,000. It is upwards of 500 ft. long, and 4 ft. wide, and extends to a depth at low-water of from 5 to 6 ft. About 1 m. to the W is the new pier of Granton. The v. is included within the parliamentary and municipal boundary of Leith. The inhabitants, an industrious, hardy, and thriving race, have for centuries formed a peculiar and exclusive community, all more or less mutually related by marriage, and rarely intermarrying with others than natives of the village. The males are mostly all fishermen, weather-beaten and athletic, and so trained from youth to spend most of their waking hours on the sea, that they are expert in nothing but handling the sailing-tackle and the net. Their wives and daughters are a sturdy corps of Amazons, so distinguished by peculiar habits as to be quite a study to the observer of human nature. They partake all the broad features which mark the character of their sisterhood of Fisherrow, and share with them the trade of supplying the markets of Edinburgh and Leith with fresh fish. They dress in a manner at once coarse, costly, and peculiar,—sufficiently tidy when viewed in connexion with their occupation, and not a little interesting to the lover of the picturesque. They usually wear a jerkin of blue cloth, and, on their neck and bosom, several fine neckerchiefs; and they wrap themselves up in a profusion of petticoats of different stuffs and colours, two or three being regularly adjusted on the person, and others so contorted into twists and bundles below the waist as to produce a strange bulkiness and grotesqueness of appearance.

NEW HAVEN, a county in the S part of the state of Connecticut, U. S., comprising an area of 540 sq. m., bounded on the S by Long Island sound, by Housatonic river on the SW, and drained by Nangatuck, Quinnipiac, Pomperaug, West, Mill, and Mununkatuck rivers. It is partly mountainous, and possesses considerable diversity of soil. Pop. in 1840, 48,619; in 1850, 65,841.—Also a township of Addison co., in the state of Vermont, 60 m. W of Montpellier. It has a hilly surface, and is watered by Otter creek, Middlebury river, and Little Otter creek. The soil consists chiefly of marl, clay, and loam, and is very fertile. Pop. in 1840, 1,583.

NEWHAVEN, the cap. of New Haven co., in the state of Connecticut, U.S., at the head of a bay of Long Island sound, 36 m. S by W of Hartford, 76 m. NE of New York, and 300 m. from Washington, in N lat. 41° 18′, W long. 72° 56′. Pop. in 1810, 5,772; in 1820, 7,147; in 1830, 10,180; in 1840, 12,960; in 1850, 22,539. It is beautifully situated in a plain sloping towards the sea, and enclosed amphitheatrally by hills, of which two, named East and West Rock, rise perpendicularly to the height of from 330 to 370 ft. The city extends about 3 m. from E to W, and 2 m. from N to S, and is laid out with great regularity. It consists of two parts, an old and a new town. The former is built in the form of a square, and subdivided into nine parts, of which the central was reserved for public buildings, and contains several handsome edifices. The houses are chiefly built of wood, neatly painted, and surrounded by court-yards and gardens. The new town is well and substantially built. The harbour is safe but shallow, and gradually filling up with mud. It has about 7 ft. water on the bar at low tide; common tides rise 6 ft., and spring-tides about 7 or 8 ft. Long wharf is 3,943 ft. in length; but there is less depth of water at its termination now than there was in 1765, when it was only 20 rods long. There is another wharf which has a basin, in which, by means of flood-gates, the water is always kept at the elevation of high tide. The maritime commerce of New H. is more extensive than that of any other city in Connecticut, its foreign and coasting trade being both considerable. The sealing business, connected with the China trade, formerly brought considerable wealth into the city. At present its foreign trade is chiefly with the W. Indies. The tonnage of the port in 1840 was 11,500. A line of steam-boats connects this port with New York, and also several lines of packets. The Farmington canal connects New H. with Northampton, Massachusetts, and Connecticut river near it; and a railroad connects it with Hartford. The most important public institution in the city is Yale college, one of the oldest and most extensive institutions of the kind in the United States. Without large funds it has accomplished great things. It was founded in 1701, originally at Killingworth; was removed to Saybrook in 1707; and to New H. in 1717. There are 4 college halls 100 ft. by 40, 4 stories high, containing 32 rooms each for students; and another hall is devoted to the use of the theological students. The chapel and college library occupy different floors of one building; and two other buildings, called the Athenæum and the Lyceum, are appropriated to re-

citation and lecture-rooms, rooms for the professors, and for the libraries of the literary societies. In the rear is another range of buildings, consisting of the chemical laboratory, the commons hall, in the second story of which is a spacious apartment devoted to the most splendid mineralogical cabinet in the United States, and a stone building containing a collection of paintings. A short distance from these are the buildings devoted to the law and medical departments, the latter of which has an anatomical museum and a library. Yale college has more students, and has educated more men, than any other college in the country. In 1841 the officers were 30 in number. Of these, besides the president, 17 were professors, and the remainder tutors or subordinate officers; 15 are connected with the college proper. The whole number of students of all descriptions was 550. Of these 410 were undergraduates, 59 theological students, 31 law, 47 medical, and 3 resident graduates. The whole number of graduates is over 5,000, of whom nearly 1,400 were ministers. The number of volumes in the various libraries is 33,000. —Also a township of Oswego co., in the state of New York, 10 m. E of Oswego, and 161 m. WNW of Albany. It has an undulating surface, and is drained by Catfish creek, an affluent of Lake Ontario, by which it is bounded on the N. The soil consists of sandy loam, and is very productive. Pop. in 1840, 1,738.—Also a township of Huron co., in the state of Ohio, 82 m. N of Columbus. Pop. 1,270.—Also a village of Gallatin co., in the state of Illinois, 197 m. SSE of Springfield, on Little Wabash river, 2 m. from its mouth. Pop. about 120.

NEW HAVEN MILLS, a village of New Haven township, Addison co., in the state of Vermont, U.S., 54 m. WSW of Montpellier.

NEW HILLS, a parish in the SE of Aberdeenshire, skirted on the NE by the Don. Area 17,000 acres. Pop. in 1801, 1,305; in 1841, 2,865.

NEW HOLLAND. See Australia.

NEW HOLLAND, a village of Earl township, Lancaster co., in the state of Pennsylvania, U. S., 49 m. E by S of Harrisburg, containing in 1840 about 30 dwellings.—Also a v. of Perry township, Pickaway co., in the state of Ohio, 43 m. S of Columbus.

NEWHOLM, a township in Whitby p., Yorkshire, 2½ m. W of Whitby, on the coast. Area 2,250 acres. Pop. in 1831, 347; in 1841, 383.

NEW HOPE, a town of Solebury township, Bucks co., in the state of Pennsylvania, U. S., 110 m. E by N of Harrisburg, on Delaware river, which is here crossed by a fine bridge, opposite Lambertsville, New Jersey. Pop. in 1840, 820.—Also a village of Augusta co., in the state of Virginia, 130 m. WNW of Richmond. Pop. about 50.—Also a v. of Iredell co., in the state of N. Carolina, 163 m. W of Raleigh. Pop. about 30.—Also a v. of Scott township, Brown co., in the state of Ohio, 99 m. SW of Columbus, on the E bank of White Oak creek. Pop. about 80.

NEW HUDSON, a township of Alleghany co., in the state of New York, U. S., 14 m. W of Angelica, and 270 m. WSW of Albany. The surface is undulating, and is drained by Black creek. The soil affords good herbage. Pop. in 1840, 1,502.

NEW HURLY, a village of Shawangunk township, Ulster co., in the state of New York, U. S., 83 m. SW of Albany. In 1840 it contained about 20 dwellings.

NEWICK, a parish in Sussex, 3 m. W of Uckfield. Area 1,930 acres. Pop. in 1841, 914.

NEWINGTON, a parish in Kent, 8 m. E by S of Rochester. Area 2,210 acres. Pop. in 1831, 730; in 1841, 734.—Also a parish in Oxfordshire, 9 m. SE of Oxford, on the E bank of the Thames. Area 3,080 acres. Pop. in 1831, 470; in 1841, 471.

NEWINGTON, an elegant modern suburb of the Old town of Edinburgh. It forms the extreme S of the city; occupies a site on the very gentle slope of the southern one of the three hills, where it nearly becomes lost in the plain; and is magnificently overlooked on the NE by the centre and most towering part of the bold curve of Salisbury-crags, and the most precipitous and picturesque face of Arthur's-seat.

NEWINGTON, a township of Rockingham co., in the state of New Hampshire, U. S., 40 m. ESE of Concord. The soil is to a great extent sandy and unproductive. Pop. in 1840, 543.—Also a village of Wethersfield township, Hartford co., in the state of Connecticut, 6 m. S of Hartford. Pop. 650.

NEWINGTON-BAGPATH, a parish in Gloucestershire, 5½ m. WNW of Tetbury. Area 1,700 acres. Pop. in 1831, 258; in 1841, 278.

NEWINGTON-BUTTS, or Newington-St.-Mary, a parish and village in Surrey, 1¾ m. S of London, at the termination of the Grand Surrey canal. The v. of late years has been greatly extended by the erection of modern buildings, particularly in the neighbourhood of Walworth. Area 630 acres. Pop. in 1831, 44,526; in 1841, 54,606.

NEWINGTON-GREEN, a village, partly in Stoke-Newington, and partly in Islington p., Middlesex, 2¾ m. N by E of St. Paul's.

NEWINGTON-NEXT-HYTHE, a parish in Kent, 2½ m. NE of Hythe, intersected by the South-Eastern railway. Area 3,260 acres. Pop. 475.

NEWINGTON (North), a hamlet in Broughton p., Oxfordshire, 2½ m. W by S of Banbury. Area 680 acres. Pop. in 1831, 318; in 1841, 448.

NEWINGTON (South), a parish in Oxfordshire, 4 m. WNW of Deddington. Area 1,460 acres. Pop. in 1831, 462; in 1841, 434.

NEWINGTON (Stoke), a parish and village in Middlesex, 3 m. N by E of London, in the line of the South-Eastern railway. The v. consists of a long street, composed of various ranges of buildings and handsome detached mansions, extending along the Cambridge-road from Kingsland to Stamford-hill. Area 650 acres. Pop. in 1841, 4,490.

NEW-INN, a village in the p. of Knockgraffon, co. Tipperary, 4 m. N by E of Cahir. Pop. in 1831, 320; in 1841, 242.—Also a hamlet in the p. of Lava, co. Cavan, 5 m. NW by N of Virginia.—Also a hamlet in co. Galway, 4 m. W by S of Kilconnel.

NEW IPSWICH, a township of Hillsboro' co., in the state of New Hampshire, U. S., 47 m. SSW of Concord. The soil is fertile, and is watered by Souhegan river and its branches. Pop. in 1840, 1,578.

NEW JERSEY. See Jersey (New).

NEW JERUSALEM, a village of Bucks co., in Pennsylvania, U. S., 66 m. E of Harrisburg.

NEW KENT, a county in the E part of the state of Virginia, U. S., comprising an area of 225 sq. m., bounded on the NE by Pamunky river, and on the S and SW by Chickahominy river. Pop. in 1840, 6,230; in 1850, 6,064. The cap., which bears the same name, is 30 m. E of Richmond, and 3 m. S of Pamunky river.

NEWKIRK'S MILLS, a village of Bleecker township, Fulton co., in the state of New York, U. S., 59 m. NW of Albany.

NEWLAND, a parish in Gloucestershire, 4 m. SE of Monmouth, comprising the chapelries of Breem and Coleford, with the tythings of Clearwell, Lee-Bailey, and Newland. Area 6,840 acres. Pop. in 1801, 2,543; in 1831, 4,046; in 1841, 4,085, a large proportion of whom are engaged in working coal-mines. The coal-tract, comprising the mining districts in the Forest of Dean, forms an elliptical basin the longest diameter of which is about 10 m., and the

shorter about 6 m. ranging round Coleford in this p. as a centre. There are about 20 beds of coal, of various thickness, containing together nearly 37 ft. of clear coal. The carboniferous strata crop out regularly all round against the mountain limestone and old red sandstone, and dip uniformly towards the centre of the basin.—Also a township in Ulverston p., Lancashire, 2¼ m. NNE of Ulverston, on the W bank of the Leven. Pop. in 1811, 374; in 1831, 491; in 1841, 477.—Also a chapelry in Great Malvern p., Worcestershire, 4½ m. SW by S of Worcester. Pop. in 1831, 130; in 1841, 143.—Also a township in Drax p., Yorkshire, 3¾ m. NE by E of Snaith. Area 2,180 acres. Pop. in 1831, 282; in 1841, 305.

NEWLANDS, a parish in the N of Peebles-shire, 11,000 or 12,000 acres in area. The river Lyne flows in a S direction 2¼ m. along the W boundary, and 3¾ m. through the interior, and receives on its l. bank, in drainage of a large part of the p., the streams of Dead and Flemington burns. Pop. in 1841, 1,063.

NEWLANDS, a chapelry and township in Crosthwaite p., Cumberland, 4 m. SW by S of Keswick, on a small stream which flows into Bassenthwaite water. Pop. in 1831, 113; in 1841, 133.

NEWLANDSIDE, a township in Stanhope p., co. of Durham, 5½ m. W of Wolsingham. Area 9,820 acres. Pop. in 1831, 847; in 1841, 468.

NEW LEBANON, a township of Columbia co., in the state of New York, U. S., 23 m. SE of Albany. It has a hilly surface, bounded on the W by Taghkannic mountain, and on the E by the Peterborough hills. Pop. in 1840, 2,536.—It contains 2 villages, one of which, named New Lebanon Shaker Settlement, is 2 m. S of New Lebanon Springs. It comprises about 3,000 acres, and is highly cultivated. Pop. about 600.—The other village, named New Lebanon Springs, is 25 m. SE of Albany, near the Massachusetts line, and near the Albany and West Stockbridge and the Hudson and Berkshire railroads. Pop. 200.—Also a village of Pasquotank co., in the state of North Carolina, 237 m. ENE of Raleigh, on the head waters of Pasquotank river, and at the S extremity of Dismal Swamp canal.—Also a village of Sullivan co., in the state of Indiana, 103 m. SW by W of Indianapolis.

NEW LEXINGTON, a village of Pike township, Perry co., in the state of Ohio, U. S., 52 m. E of Columbus, on the SE bank of Big Rush river. Pop. in 1840, 150.—Also a v. of Tuscaloosa co., in the state of Alabama, 24 m. N of Tuscaloosa, on the W side of North river.

NEW LIBERTY, a village of Owen co., in the state of Kentucky, U. S., 36 m. N of Frankfort, 3 m. E of Eagle creek. Pop. in 1840, 227.

NEW LIMERICK, a township of Aroostook co., in the state of Maine, U. S. Pop. in 1840, 123.

NEWLIN, a township of Chester co., in the state of Pennsylvania, U. S., 28 m. SW of Philadelphia.

NEW LISBON, a township of Otsego co., in the state of New York, U. S., 90 m. W of Albany. It has a hilly surface, and is drained by Butternut and Otsego creeks. The soil consists of sandy loam. Pop. in 1840, 1,909.—Also a village of Centre township, Columbiana co., in the state of Ohio, 150 m. ENE of Columbus, on the N side of Middle Fork of Little Beaver river, and on the Sandy and Beaver canal. Pop. 2,000.

NEW LONDON CROSS ROADS, a village of New London township, Chester co., in the state of Pennsylvania, U. S., 72 m. SE of Harrisburg.

NEW LYME, a township of Ashtabula co., in the state of Ohio, U. S., 195 m. NE of Columbus. Pop. in 1840, 527.

NEWLYN, a parish in Cornwall, 2½ m. WNW of St. Michael. Area 8,340 acres. Pop. in 1831, 1,218; in 1841, 1,451. A valuable lead-mine, and several chalybeate springs exist in this p.

NEW MADRID, a county in the SE part of the state of Missouri, U. S., comprising an area of 1,625 sq. m. Its surface is low and liable to innndation, but is in some parts very fertile. Pop. in 1840, 4,554. Its cap., which bears the same name, is 271 m. SE of Jefferson city, on the N side of the Mississippi. Pop. of township, 1,668.

NEWMARKET, a market-town, consisting chiefly of one long street, the N side of which is in Suffolk, the S in Cambridgeshire, 13 m. E by N of Cambridge, and 65 m. NNE of London, with which it is connected by the Eastern Counties railway. Area 570 acres. Pop. in 1801, 1,792; in 1831, 2,848; in 1841, 2,143. The town is pleasantly situated, the greater part of it occupying the gentle declivity of a hill. The main street is long, wide, and well-lighted; most of the houses are modern and well-built; and many of those which have been erected as residences for the nobility and gentry who attend the races, and even those of the leading jockeys and trainers, are handsome. The inns are proverbial for their good accommodations. The principal feature of the town is the New rooms, for the use of the Jockey club, situated in the centre of the town. The trade of N. depends almost exclusively on affairs connected with the turf, for which it has been long celebrated. The race-course, formed on an extensive heath in Cambridgeshire, in the immediate vicinity of the town, is 4 m. in length, and one of the finest in the kingdom. The training ground is also very fine. Previously to 1753, when the Jockey club purchased the present racing-ground, there were only two meetings in the year at N. for the purpose of running horses; there are now seven: viz., the Craven, on Easter Monday; the First spring, on Monday fortnight following; the Second spring, a fortnight after that; the July; the First October, held on the first Monday in that month; the Second October, on the Monday fortnight following; and the Third October, or Houghton, a fortnight afterwards. Those held in Easter week, and in the month of October, are the principal. At these periods the town presents an exceedingly lively and interesting appearance.—Also a parish in Flintshire, 4½ m. NE of St. Asaph, on a small river which flows into the English channel. Pop. in 1841, 713.

NEWMARKET, a town in the p. of Clonfert, co. Cork, on the river Dallua, 4 m. NW of Kanturk. Pop. in 1831, 1,437; in 1841, 1,899.—Also a village in the p. of Aghaviller, co. Kilkenny, 1¼ m. N by W of Higginstown.

NEWMARKET, a township of Rockingham co., in the state of New Hampshire, U. S., 38 m. SE of Concord, bordered on the NE by Lamprey river, and on the SW by Exeter river, and drained by a branch of Lamprey river. Pop. in 1840, 2,730.—Also a village of Piscataway township, Middlesex co., in the state of New Jersey, 36 m. NE of Trenton, on the E bank of Cedar creek, containing in 1840 about 25 dwellings.—Also a village of Frederick co., in the state of Maryland, 67 m. NW of Annapolis, on the N branch of Bush creek.—Also a village of Shenandoah co., in the state of Virginia, 139 m. NW of Richmond, 1 m. E of the N fork of Shenandoah river, and near the SW border of the co. Pop. 800.—Also a village of Jefferson co., in the state of Tennessee, 208 m. E of Nashville, on the head waters of Loss creek.—Also a village of Marion co., in the state of Kentucky, 65 m. SSW of Frankfort, on the N side of the Rolling Fork of Salt river.—Also a township of Highland co., in the state of Ohio, 81 m. SW of Columbus. Pop. 1,302.

NEWMARKET, a village of Canada West, in the township of Whitchurch, on the E branch of Holland

river, 3½ m. from Holland landing, and about 30 m. from Toronto. Pop. about 600. The surrounding country is fertile and well cultivated.

NEWMARKET-ON-FERGUS, a town in the p. of Tomfinlough, co. Clare, 2 m. E of the nearest point of the Fergus, and 6½ m. SE by S of Ennis. Pop. in 1831, 1,118; in 1841, 1,526.

NEW MARLBORO', a township of Berkshire co., in the state of Massachusetts, U. S., 131 m. SW by W of Boston. It has a hilly surface, and is drained by Konkapot river and its branches. The soil is chiefly adapted to pasturage.

NEW MEXICO. See MEXICO (NEW).

NEW MIDDLETON, a village of Columbiana co., in the state of Ohio, U. S., 185 m. NE by E of Columbus. Pop. 118.

NEW MILFORD, a township of Lichfield co., in the state of Connecticut, U. S., 51 m. WSW of Hartford. The surface is hilly, and is watered by Housatonic river and its branches. The soil consists chiefly of sand, gravel, and clay loam. Pop. in 1840, 3,974. It contains a village consisting of about 60 dwellings.—Also a village of Warwick township, Orange co., in the state of New York, 120 m. S by W of Albany.—Also a township of Susquehanna co., in the state of Pennsylvania, 185 m. N of Harrisburg. It has a hilly surface, and is drained by Mitchell's and Salt Lick creeks. Pop. 1,148. It has a village containing about 25 dwellings.

NEWMILL, a village in the p. of Keith, in Banffshire, on the l. bank of the Isla, 1½ m. N of Keith. Pop. 600.

NEWMILLS, a hamlet in the p. of Ross, co. Cork.—Also a village in the p. of Tullanisken, co. Tyrone, 3 m. NNE of Dungannon. Pop. in 1831, 105.—Also a village in the p. of Torryburn, in Fifeshire, a ½ m. W of Torryburn.

NEWMILN, a village in the parish of Loudoun, in Ayrshire, on the r. bank of the Irvine, 2½ m. E of Galston. Pop. in 1838, 1,130, chiefly muslin-weavers.

NEWMINSTER-ABBEY, a township in Morpeth p., Northumberland, ½ m. W of Morpeth. Pop. 121.

NEW-MOAT, a parish in Pembrokeshire, South Wales, on the river Sefeynfey, 10 m. NE of Haverford. Pop. in 1831, 331; in 1841, 377.

NEWNAN, a village of Coweta co., in the state of Georgia, U. S., 106 m. W by N of Milledgeville, consisting in 1840 of about 20 dwellings.

NEWNANSVILLE, a village of Alachua co., in the state of Florida, U. S., 120 m. ESE of Tallahassee.
